DR. WILLIAM SMITH'S  
DICTIONARY OF THE BIBLE;

COMPRISING ITS

ANTIQUITIES, BIOGRAPHY, GEOGRAPHY,  
AND NATURAL HISTORY.

REVISED AND EDITED BY

PROFESSOR H. B. HACKETT, D. D.

WITH THE COÖPERATION OF

EZRA ABBOT, LL. D.

ASSISTANT LIBRARIAN OF HARVARD COLLEGE.

VOLUME III.

MARRIAGE TO REGEM.

Jerusalem.

328191  
2. 7. 36.

BOSTON:  
HOUGHTON, MIFFLIN AND COMPANY.

The Riverside Press, Cambridge.

1889.

Entered, according to Act of Congress, in the year 1870, by  
HURD AND HOUGHTON,  
in the Clerk's Office of the District Court for the Southern District of New York.

RIVERSIDE, CAMBRIDGE:  
STEREOTYPED AND PRINTED BY  
H. O. HOUGHTON AND COMPANY.

## WRITERS IN THE ENGLISH EDITION.

**INITIALS**

**NAMES.**

- H. A. Very Rev. HENRY ALFORD, D. D., Dean of Canterbury.
- H. B. Rev. HENRY BAILEY, B. D., Warden of St. Augustine's College, Canterbury; late Fellow of St. John's College, Cambridge.
- H. B. Rev. HORATIUS BONAR, D. D., Kelso, N. B.; Author of "The Land of Promise."  
[The geographical articles, signed H. B., are written by Dr. Bonar: those on other subjects, signed H. B., are written by Mr. Bailey.]
- A. B. Rev. ALFRED BARRY, B. D., Principal of Cheltenham College; late Fellow of Trinity College, Cambridge.
- W. L. B. Rev. WILLIAM LATHAM BEVAN, M. A., Vicar of Hay, Brecknockshire.
- J. W. B. Rev. JOSEPH WILLIAMS BLAKESLEY, B. D., Canon of Canterbury; late Fellow and Tutor of Trinity College, Cambridge.
- T. E. B. Rev. THOMAS EDWARD BROWN, M. A., Vice-Principal of King William's College, Isle of Man; late Fellow of Oriel College, Oxford.
- R. W. B. Ven. ROBERT WILLIAM BROWNE, M. A., Archdeacon of Bath, and Canon of Wells.
- E. H. B. Right Rev. EDWARD HAROLD BROWNE, D. D., Lord Bishop of Ely.
- W. T. B. Rev. WILLIAM THOMAS BULLOCK, M. A., Assistant Secretary of the Society for the Propagation of the Gospel in Foreign Parts.
- S. C. Rev. SAMUEL CLARK, M. A., Vicar of Bredwardine with Brobury, Herefordshire.
- F. C. C. Rev. FREDERIC CHARLES COOK, M. A., Chaplain in Ordinary to the Queen.
- G. E. L. C. Right Rev. GEORGE EDWARD LYNCH COTTON, D. D., late Lord Bishop of Calcutta and Metropolitan of India.
- J. Ll. D. Rev. JOHN LLEWELYN DAVIES, M. A., Rector of Christ Church, Marylebone; late Fellow of Trinity College, Cambridge.
- G. E. D. Prof. GEORGE EDWARD DAY, D. D., Yale College, New Haven, Conn.
- E. D. EMANUEL DEUTSCH, M. R. A. S., British Museum.
- W. D. Rev. WILLIAM DRAKE, M. A., Chaplain in Ordinary to the Queen.
- E. P. E. Rev. EDWARD PAROISSIEN EDDRUP, M. A., Principal of the Theological College, Salisbury.
- C. J. E. Right Rev. CHARLES JOHN ELLICOTT, D. D., Lord Bishop of Gloucester and Bristol.
- F. W. F. Rev. FREDERICK WILLIAM FARRAR, M. A., Assistant Master of Harrow School; late Fellow of Trinity College, Cambridge.
- J. F. JAMES FERGUSSON, F. R. S., F. R. A. S., Fellow of the Royal Institute of British Architects.
- E. S. Ff. EDWARD SALUSBURY FFOULKES, M. A., late Fellow of Jesus College, Oxford.
- W. F. Right Rev. WILLIAM FITZGERALD, D. D., Lord Bishop of Killaloe.

## INITIALS.

## NAMES.

- F. G. Rev. FRANCIS GARDEN, M. A., Subdean of Her Majesty's Chapel Royal.
- F. W. G. Rev. F. WILLIAM GOTCH, I.L. D., President of the Baptist College, Bristol; late Hebrew Examiner in the University of London.
- G. GEORGE GROVE, Crystal Palace, Sydenham.
- H. B. H. Prof. HORATIO BALCH HACKETT, D. D., LL. D., Theological Institution, Newton, Mass.
- E. H—s. Rev. ERNEST HAWKINS, B. D., Secretary of the Society for the Propagation of the Gospel in Foreign Parts.
- H. H. Rev. HENRY HAYMAN, B. D., Head Master of the Grammar School, Cheltenham; late Fellow of St. John's College, Oxford.
- A. C. H. Ven. Lord ARTHUR CHARLES HERVEY, M. A., Archdeacon of Sudbury, and Rector of Ickworth.
- J. A. H. Rev. JAMES AUGUSTUS HESSEY, D. C. L., Head Master of Merchant Taylors' School.
- J. D. H. JOSEPH DALTON HOOKER, M. D., F. R. S., Royal Botanic Gardens, Kew.
- J. J. H. Rev. JAMES JOHN HORNBY, M. A., Fellow of Brasenose College, Oxford; Principal of Bishop Cosin's Hall.
- W. H. Rev. WILLIAM HOUGHTON, M. A., F. L. S., Rector of Preston on the Weald Moors, Salop.
- J. S. H. Rev. JOHN SAUL HOWSON, D. D., Principal of the Collegiate Institution, Liverpool.
- E. H. Rev. EDGAR HUXTABLE, M. A., Subdean of Wells.
- W. B. J. Rev. WILLIAM BASIL JONES, M. A., Prebendary of York and of St. David's; late Fellow and Tutor of University College, Oxford.
- A. H. L. AUSTEN HENRY LAYARD, D. C. L., M. P.
- S. L. Rev. STANLEY LEATHES, M. A., M. R. S. L., Hebrew Lecturer in King's College, London.
- J. B. L. Rev. JOSEPH BARBER LIGHTFOOT, D. D., Hulsean Professor of Divinity, and Fellow of Trinity College, Cambridge.
- D. W. M. Rev. D. W. MARKS, Professor of Hebrew in University College, London.
- F. M. Rev. FREDERICK MEYRICK, M. A., late Fellow and Tutor of Trinity College, Oxford.
- OPP. Prof. JULES OPPERT, of Paris.
- E. R. O. Rev. EDWARD REDMAN ORGER, M. A., Fellow and Tutor of St. Augustine's College, Canterbury.
- T. J. O. Ven. THOMAS JOHNSON ORMEROD, M. A., Archdeacon of Suffolk late Fellow of Brasenose College, Oxford.
- J. J. S. P. Rev. JOHN JAMES STEWART PEROWNE, B. D., Vice-Principal of St. David's College, Lampeter.
- T. T. P. Rev. THOMAS THOMASON PEROWNE, B. D., Fellow and Tutor of Corpus Christi College, Cambridge.
- H. W. P. Rev. HENRY WRIGHT PHILLOTT, M. A., Rector of Staunton-on-Wye, Herefordshire; late Student of Christ Church, Oxford.
- E. H. P. Rev. EDWARD HAYES PLUMPTRE, M. A., Professor of Divinity in King's College, London.
- E. S. P. EDWARD STANLEY POOLE, M. R. A. S., South Kensington Museum.
- R. S. P. REGINALD STUART POOLE, British Museum.

\*\*\* The new portions in the present edition are indicated by a *star* (\*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in *brackets* is also, with unimportant exceptions, editorial. This remark, however, does not apply to the *cross-references* in brackets, most of which belong to the original work, though a large number have been added to this edition.

---

### ABBREVIATIONS.

- Ald.** The Aldine edition of the Septuagint, 1518.
- Alex.** The Codex Alexandrinus (5th cent.), edited by Baber, 1816-28.
- A. V.** The authorized (common) English version of the Bible.
- Comp.** The Septuagint as printed in the Complutensian Polyglott, 1514-17, published 1522.
- FA.** The Codex Friderico-Augustanus (4th cent.), published by Tischendorf in 1846.
- Rom.** The Roman edition of the Septuagint, 1587. The readings of the Septuagint for which no authority is specified are also from this source.
- Sin.** The Codex Sinaiticus (4th cent.), published by Tischendorf in 1862. This and FA. are parts of the same manuscript.
- Vat.** The Codex Vaticanus 1209 (4th cent.), according to Mai's edition, published by Vercellone in 1857. "Vat. H." denotes readings of the MS. (differing from Mai), given in Holmes and Parsons's edition of the Septuagint, 1798. 1827. "Vat.<sup>1</sup>" distinguishes the primary reading of the MS. from "Vat.<sup>2</sup>" or "2. m.," the alteration of a later reviser.

### MARRIAGE

### MARRIAGE

**MARRIAGE.** The topics which this subject presents to our consideration in connection with Biblical literature may be most conveniently arranged under the following five heads:—

- I. Its origin and history.
- II. The conditions under which it could be legally effected.
- III. The modes by which it was effected.
- IV. The social and domestic relations of married life.
- V. The typical and allegorical references to marriage.

I. The institution of marriage is founded on the requirements of man's nature, and dates from the time of his original creation. It may be said to have been ordained by God, in as far as man's nature was ordained by Him; but its formal appointment was the work of man, and it has ever been in its essence a natural and civil institution, though admitting of the infusion of a religious element into it. This view of marriage is exhibited in the historical account of its origin in the book of Genesis: the peculiar formation of man's nature is assigned to the Creator, who, seeing it "not good for man to be alone," determined to form an "help meet for him" (ii. 18), and accordingly completed the work by the addition of the female to the male (i. 27). The necessity for this step appears from the words used in the declaration of the Divine counsel. Man, as an intellectual and spiritual being, would not have been a worthy representative of the Deity on earth, so long as he lived in solitude, or in communion only with beings either high above him in the scale of creation, as angels, or far beneath him, as the beasts of the field. It was absolutely necessary, not only for his comfort and happiness, but still more for the per-

fection of the Divine work, that he should have a "help meet for him,"<sup>a</sup> or, as the words more properly mean, "the exact counterpart of himself" — a being capable of receiving and reflecting his thoughts and affections. No sooner was the formation of woman effected, than Adam recognized in that act the will of the Creator as to man's social condition, and immediately enunciated the important statement, to which his posterity might refer as the charter of marriage in all succeeding ages, "Therefore shall a man leave his father and his mother, and shall cleave unto his wife: and they shall be one flesh" (ii. 24). From these words, coupled with the circumstances attendant on the formation of the first woman, we may evolve the following principles: (1) The unity of man and wife, as implied in her being formed out of man, and as expressed in the words "one flesh;" (2) the indissolubleness of the marriage bond, except on the strongest grounds (comp. Matt. xix. 9); (3) monogamy, as the original law of marriage, resulting from there having been but one original couple,<sup>b</sup> as is forcibly expressed in the subsequent references to this passage by our Lord ("they twain," Matt. xix. 5), and St. Paul ("two shall be one flesh," 1 Cor. vi. 16); (4) the social equality of man and wife, as implied in the terms *ish* and *ish-shah*,<sup>c</sup> the one being the exact correlative of the other, as well as in the words "help meet for him;" (5) the subordination of the wife to the husband, consequent upon her subsequent formation (1 Cor. xi. 8, 9; 1 Tim. ii. 13); and (6) the respective duties of man and wife, as implied in the words "help meet for him."

The introduction of sin into the world modified to a certain extent the mutual relations of man and wife. As the blame of seduction to sin lay on the latter, the condition of subordination was turned

<sup>a</sup> מַעֲרֹבֵי, literally, "as over against;" and so "corresponding to." The renderings, in the A. V. "meet for him," in the LXX. *κατ' ἀντόν, ὁμοίος αὐτῷ*, and in the Vulg. *simile sibi*, are inadequate.

<sup>b</sup> The LXX. introduces *δύο* into the text in Gen. ii. 24, and is followed by the Vulgate.

<sup>c</sup> *ישׁ* and *אִשָּׁה*. We are unable to express the verbal correspondence of these words in our language. The Vulgate retains the etymological identity at the expense of the sense: "*Virago quoniam de viro.*" The

old Latin term *virago* would have been better. Luther is more successful with *mann* and *mannin*; but even this fails to convey the double sense of *ishshah* as "woman" and "wife," both of which should be preserved, as in the German *weib*, in order to convey the full force of the original. We may here observe that *ishshah* was the only term in ordinary use among the Hebrews for "wife." They occasionally used *אִשָּׁה*, as we use "consort," for the wives of kings (Ps. xlv. 9; Neh. ii. 6; Dan. v. 2)

into subjection, and it was said to her of her husband, "he shall rule over thee" (Gen. iii. 16.) — a sentence which, regarded as a prediction, has been strikingly fulfilled in the position assigned to women in Oriental countries,<sup>a</sup> but which, regarded as a rule of life, is fully sustained by the voice of nature and by the teaching of Christianity (1 Cor. xiv. 34; Eph. v. 22, 23; 1 Tim. ii. 12). The evil effects of the fall were soon apparent in the corrupt usages of marriage; the unity of the bond was impaired by polygamy, which appears to have originated among the Cainites (Gen. iv. 19); and its purity was deteriorated by the promiscuous intermarriage of the "scions of God" with the "daughters of men," i. e. of the Sethites with the Cainites, in the days preceding the flood (Gen. vi. 2).

In the post-diluvial age the usages of marriage were marked with the simplicity that characterizes a patriarchal state of society. The rule of monogamy was reestablished by the example of Noah and his sons (Gen. vii. 13). The early patriarchs selected their wives from their own family (Gen. xi. 29, xxiv. 4, xxviii. 2), and the necessity for doing this on religious grounds superseded the prohibitions that afterwards held good against such marriages on the score of kindred (Gen. xx. 12; Ex. vi. 20; comp. Lev. xviii. 9, 12). Polygamy prevailed (Gen. xvi. 4, xxv. 1, 6, xxviii. 9, xxix. 23, 28; 1 Chr. vii. 14), but to a great extent divested of the degradation which in modern times attaches to that practice. In judging of it we must take into regard the following considerations: (1) that the principle of monogamy was retained, even in the practice of polygamy, by the distinction made between the chief or original wife and the secondary wives, or, as the A. V. terms them, "concubines" — a term which is objectionable, inasmuch as it conveys to us the notion of an illicit and unrecognized position, whereas the secondary wife was regarded by the Hebrews as a wife, and her rights were secured by law;<sup>b</sup> (2) that the motive which led to polygamy was that absorbing desire of progeny which is prevalent throughout eastern countries, and was especially powerful among the Hebrews; and (3) that the power of a parent over his child, and of a master over his slave (the *potestas patria* and *dominica* of the Romans), was paramount even in matters of marriage, and led in many cases to phases of polygamy that are otherwise quite unintelligible, as, for instance, to the cases where it was adopted by the husband at the request of his wife, under the idea that children born to a slave were in the eye of the law the

children of the mistress<sup>c</sup> (Gen. xvi. 3, xxx. 4, 9), or, again, to cases where it was adopted at the instance of the father (Gen. xxix. 23, 28; Ex. xxi. 9, 10). It must be allowed that polygamy, thus legalized and systematized, justified to a certain extent by the motive, and entered into, not only without offense to, but actually at the suggestion of, those who, according to our notions, would feel most deeply injured by it, is a very different thing from what polygamy would be in our own state of society.

Divorce also prevailed in the patriarchal age, though but one instance of it is recorded (Gen. xxi. 14). Of this, again, we must not judge by our own standard. Wherever marriages are effected by the violent exercise of the *patria potestas*, or without any bond of affection between the parties concerned, ill-assorted matches must be of frequent occurrence, and without the remedy of divorce, in such a state of society, we can understand the truth of the Apostles' remark, that "it is not good to marry" (Matt. xix. 10). Hence divorce prevails to a great extent in all countries where marriage is the result of arbitrary appointment or of purchase: we may instance the Arabians (Burckhardt's *Notes*, i. 111; Layard's *Nineveh*, i. 357) and the Egyptians (Lane, i. 235 ff.). From the enactments of the Mosaic law we may infer that divorce was effected by a mere verbal declaration, as it still is in the countries referred to, and great injustice was thus committed towards the wives.

The Mosaic law aimed at mitigating rather than removing evils which were inseparable from the state of society in that day. Its enactments were directed (1) to the discouragement of polygamy; (2) to obviate the injustice frequently consequent upon the exercise of the rights of a father or a master; (3) to bring divorce under some restriction; and (4) to enforce purity of life during the maintenance of the matrimonial bond. The first of these objects was forwarded by the following enactments: the prohibition imposed upon kings against multiplying<sup>d</sup> wives (Deut. xvii. 17); the prohibition against marrying two sisters together (Lev. xviii. 18); the assertion of the matrimonial rights of each wife (Ex. xxi. 10, 11); the slur cast upon the eunuch state, which has been ever regarded as indispensable to a system of polygamy (Deut. xxiii. 1); and the ritual observances entailed on a man by the duty of marriage (Lev. xv. 18). The second object was attained by the humane regulations relative to a captive whom a man might wish to marry (Deut. xxi. 10-14), to a purchased wife<sup>e</sup>

<sup>a</sup> The relation of the husband to the wife is expressed in the Hebrew term *baal* (בַּאֵל), literally *lord*, for husband (Ex. xxi. 3, 22; Deut. xxi. 13; 2 Sam. xi. 23, etc., etc.). The respectful term used by Sarah to Abraham (אֲדֹנָי, "my lord," Gen. xviii. 12; comp. 1 K. i. 17, 18, Ps. xiv. 11) furnishes St. Peter with an illustration of the wife's proper position (1 Pet. iii. 6).

<sup>b</sup> The position of the Hebrew concubine may be compared with that of the concubine of the early Christian Church, the sole distinction between her and the wife consisting in this, that the marriage was not in accordance with the *civil* law: in the eye of the Church the marriage was perfectly valid (Bingham, *Ant.* xi. 5, § 11). It is worthy of notice that the term *pillegesh* (פִּלְגֶשֶׁת; אֵשֶׁת זָרָה; A. V. "concubine") nowhere occurs in the Mosaic law. The terms used are either "wife" (Deut.

xxi. 15) or "maid-servant" (Ex. xxi. 7); the latter applying to a purchased wife.

<sup>c</sup> The language in 1 Chr. ii. 18, "these are *her* sons," following on the mention of his two wives, admits of an interpretation on this ground.

<sup>d</sup> The Talmudists practically set aside this prohibition, (1) by explaining the word "multiply" of an inordinate number; and (2) by treating the motive for it, "that his heart turn not away," as a matter of discretion. They considered eighteen the maximum to be allowed a king (Selden, *Ux. Ebr.* i. 8). It is noteworthy that the high-priest himself authorizes bigamy in the case of king Joash (2 Chr. xxiv. 3).

<sup>e</sup> The regulations in Ex. xxi. 7-11 deserve a detailed notice, as exhibiting the extent to which the power of the head of a family might be carried. It must be premised that the maiden was born of Hebrew parents was under age at the time of her sale (otherwise her father would have no power to sell), and that the

(Ex. xxi. 7-11), and to a slave who either was married at the time of their purchase, or who, having since received a wife<sup>a</sup> at the hands of his master, was unwilling to be parted from her (Ex. xxi. 2-6), and, lastly, by the law relating to the legal distribution of property among the children of the different wives (Deut. xxi. 15-17). The third object was effected by rendering divorce a formal proceeding, not to be done by word of mouth as heretofore, but by a "bill of divorcement" (Deut. xxiv. 1), which would generally demand time and the intervention of a third party, thus rendering divorce a less easy process, and furnishing the wife, in the event of its being carried out, with a legal evidence of her marriageability: we may also notice that Moses wholly prohibited divorce in case the wife had been seduced prior to marriage (Deut. xxii. 29), or her chastity had been groundlessly impugned (Deut. xxii. 19). The fourth object forms the subject of one of the ten commandments (Ex. xx. 14), any violation of which was punishable with death (Lev. xx. 10; Deut. xxii. 22), even in the case of a betrothed person (Deut. xxii. 23, 24).

The practical results of these regulations may have been very salutary, but on this point we have but small opportunities of judging. The usages themselves, to which we have referred, remained in full force to a late period. We have instances of the arbitrary exercise of the paternal authority in the cases of Achsah (Judg. i. 12), Izbaz (Judg. xii. 9), Samson (Judg. xiv. 20, xv. 2), and Michal (1 Sam. xvii. 25). The case of Abishag, and the language of Adonijah in reference to her (1 K. i. 2, ii. 17), prove that a servant was still completely at the disposal of his or her master. Polygamy also prevailed, as we are expressly informed in reference to Gideon (Judg. viii. 30), Elkanah (1 Sam. i. 2), Saul (2 Sam. xii. 8), David (2 Sam. v. 13), Solomon (1 K. xi. 3), the sons of Issachar (1 Chr. vii. 4), Shaharaim (1 Chr. viii. 8, 9), Rehoboam (2 Chr. xi. 21), Abijah (2 Chr. xiii. 21), and Joash (2 Chr. xxiv. 3); and as we may also infer from the number of children in the cases of Jair, Izbaz, and Abdon (Judg. x. 4, xii. 9, 14). It does not, however, follow that it was the general practice of the country: the inconveniences attendant on polygamy in small houses or with scanty incomes are

object of the purchase was that when arrived at puberty she should become the wife of her master, as is implied in the difference in the law relating to her (Ex. xxi. 7), and to a slave purchased for ordinary work (Deut. xv. 17), as well as in the term *amzah*, "maid-servant," which is elsewhere used convertibly with "concubine" (Judg. ix. 13; comp. vii. 31). With regard to such it is enacted (1) that she is not to "go out as the men-servants" (*i. e.* be freed after six years' service, or in the year of jubilee), on the understanding that her master either already has made, or intends to make her his wife (ver. 7); (2) but, if he has no such intention, he is not entitled to retain her in the event of any other person of the Israelites being willing to purchase her of him for the same purpose (ver. 8); (3) he might, however, assign her to his son, and in this case she was to be treated as a daughter and not as a slave (ver. 9); (4) if either he or his son, having married her, took another wife, she was still to be treated as a wife in all respects (ver. 10); and, lastly, if neither of the three contingencies took place, *i. e.* if he neither married her himself, nor gave her to his son, nor had her redeemed, then the maiden was to become absolutely free without waiting for the expiration of the six years or for the year of jubilee ver. 11!

so great as to put a serious bar to its general adoption,<sup>b</sup> and hence in modern countries where it is fully established the practice is restricted to comparatively few (Niebuhr, *Voyage*, p. 65; Lane, i. 239). The same rule holds good with regard to ancient times: the discomforts of polygamy are exhibited in the jealousies between the wives of Abraham (Gen. xvi. 6), and of Elkanah (1 Sam. i. 6); and the cases cited above rather lead to the inference that it was confined to the wealthy. Meanwhile it may be noted that the theory of monogamy was retained and comes prominently forward in the pictures of domestic bliss portrayed in the poetical writings of this period (Ps. cxviii. 3; Prov. v. 18, xvii. 22, xix. 14, xxxi. 10-29; Eccl. ix. 9). The sanctity of the marriage-bond was but too frequently violated, as appears from the frequent allusions to the "strange woman" in the book of Proverbs (ii. 16, v. 20, &c.), and in the denunciations of the prophets against the prevalence of adultery (Jer. v. 8; Ez. xviii. 11, xxii. 11).

In the post-Babylonian period monogamy appears to have become more prevalent than at any previous time: indeed we have no instance of polygamy during this period on record in the Bible, all the marriages noticed being with single wives (Tob. i. 9, ii. 11; Susan. vv. 29, 63; Matt. xviii. 25; Luke i. 5; Acts v. 1). During the same period the theory of monogamy is set forth in Eccles. xxvi. 1-27. The practice of polygamy nevertheless still existed; <sup>c</sup> Herod the Great had no less than nine wives at one time (*Joseph. Ant.* xvii. 1, § 3); the Talmudists frequently assume it as a well-known fact (*e. g.* *Ketub.* 10, § 1; *Yebum.* 1, § 1); and the early Christian writers, in their comments on 1 Tim. iii. 2, explain it of polygamy in terms which leave no doubt as to the fact of its prevalence in the Apostolic age. The abuse of divorce continued unabated (*Joseph. Vit.* § 76); and under the Asmonean dynasty the right was assumed by the wife as against her husband, an innovation which is attributed to Salome by Josephus (*Ant.* xv. 7, § 10), but which appears to have been prevalent in the Apostolic age, if we may judge from passages where the language implies that the act emanated from the wife (Mark x. 12; 1 Cor. vii. 11), as well as

<sup>a</sup> In this case we must assume that the wife assigned was a non-Israelitish slave; otherwise, the wife would, as a matter of course, be freed along with her husband in the year of jubilee. In this case the wife and children would be the absolute property of the master, and the position of the wife would be analogous to that of the Roman *contubernalis*, who was not supposed capable of any *conubium*. The issue of such a marriage would remain slaves in accordance with the maxim of the Talmudists, that the child is liable to its mother's disqualification (*Kiddush.* 3, § 12). Josephus (*Ant.* iv. 8, § 28) states that in the year of jubilee the slave, having married during service, carried off his wife and children with him: this, however, may refer to an Israelite maid-servant.

<sup>b</sup> The Talmudists limited polygamists to four wives. The same number was adopted by Mohammed in the Koran, and still forms the rule among his followers (Niebuhr, *Voyage*, p. 62).

<sup>c</sup> Michaelis (*Laus of Moses*, iii. 5, § 95) asserts that polygamy ceased entirely after the return from the Captivity; Selden, on the other hand, that polygamy prevailed among the Jews until the time of Honorius and Amandus (circ. A. D. 400), when it was prohibited by an imperial edict (*Ux. Ebr.* i. 9).

from some of the comments of the early writers on 1 Tim. v. 9. Our Lord and his Apostles re-established the integrity and sanctity of the marriage bond by the following measures: (1) by the confirmation of the original charter of marriage as the basis on which all regulations were to be framed (Matt. xix. 4, 5); (2) by the restriction of divorce to the case of fornication, and the prohibition of re-marriage in all persons divorced on improper grounds (Matt. v. 32, xix. 9; Rom. vii. 3; 1 Cor. vii. 10, 11); and (3) by the enforcement of moral purity generally (Heb. xiii. 4, &c.), and especially by the formal condemnation of fornication,<sup>a</sup> which appears to have been classed among acts morally indifferent (*ἀδιάφορα*) by a certain party in the Church (Acts xv. 20).

Shortly before the Christian era an important change took place in the views entertained on the question of marriage as affecting the spiritual and intellectual parts of man's nature. Throughout the Old Testament period marriage was regarded as the indispensable duty of every man, nor was it surmised that there existed in it any drawback to the attainment of the highest degree of holiness. In the interval that elapsed between the Old and New Testament periods, a spirit of asceticism had been evolved, probably in antagonism to the foreign notions with which the Jews were brought into close and painful contact. The Essenes were the first to propound any doubts as to the propriety of marriage: some of them avoided it altogether, others availed themselves of it under restrictions (Joseph. B. J. ii. 8, §§ 2, 13). Similar views were adopted by the Therapeutae, and at a later period by the Gnostics (Burton's *Lectures*, i. 214); thence they passed into the Christian Church, forming one of the distinctive tenets of the Encratites (Burton, ii. 161), and finally developing into the system of monachism. The philosophical tenets on which the prohibition of marriage was based are generally condemned in Col. ii. 16-23, and specifically in 1 Tim. iv. 3. The general propriety of marriage is enforced on numerous occasions, and abstinence from it is commended only in cases where it was rendered expedient by the calls of duty (Matt. xix. 12; 1 Cor. vii. 8, 26). With regard to re-marriage after the death of one of the parties, the Jews, in common with other nations, regarded abstinence from it, particularly in the case of a widow, laudable, and a sign of holiness (Luke ii. 36, 37; Joseph. Ant. xvii. 13, § 4, xviii. 6, § 6); but it is clear from the example of Josephus (17. § 76) that there was no prohibition even in the case of a priest. In the Apostolic Church re-marriage was regarded as occasionally undesirable (1 Cor. vii. 40), and as an absolute disqualification for holy functions, whether in a man or woman (1 Tim. iii. 2, 12, v. 9): at the same time it is recommended in the case of young widows (1 Tim. v. 14).

II. The conditions of legal marriage are decided by the prohibitions which the law of any country imposes upon its citizens. In the Hebrew com-

monwealth these prohibitions were of two kinds according as they regulated marriage, (i.) between an Israelite and a non-Israelite, and (ii.) between an Israelite and one of his own community.

i. The prohibitions relating to foreigners were based on that instinctive feeling of exclusiveness, which forms one of the bonds of every social body, and which prevails with peculiar strength in a rude state of society. In all political bodies the right of marriage (*jus connubii*) becomes in some form or other a constituent element of citizenship, and, even where its nature and limits are not defined by legal enactment, it is supported with rigor by the force of public opinion. The feeling of aversion against intermarriage with foreigners becomes more intense, when distinctions of religious creed super-vene on those of blood and language; and hence we should naturally expect to find it more than usually strong in the Hebrews, who were endowed with a peculiar position, and were separated from surrounding nations by a sharp line of demarcation. The warnings of past history and the examples of the patriarchs came in support of natural feeling: on the one hand, the evil effects of intermarriage with aliens were exhibited in the overwhelming sinfulness of the generation destroyed by the flood (Gen. vi. 2-13): on the other hand, there were the examples of the patriarchs Abraham, Isaac, and Jacob, marrying from among their own kindred (Gen. xx. 12, xxiv. 3, &c., xxviii. 2), and in each of the two latter cases there is a contrast between these carefully-sought unions and those of the rejected sons Ishmael, who married an Egyptian (Gen. xxi. 21), and Esau, whose marriages with Hittite women were "a grief of mind" to his parents (Gen. xxvi. 34, 35). The marriages of Joseph with an Egyptian (Gen. xli. 45), of Manasseh with a Syrian secondary wife (1 Chr. vii. 14; comp. Gen. xli. 20, LXX.), and of Moses with a Midianitish woman in the first instance (Ex. ii. 21), and afterwards with a Cushite or Ethiopian woman (Num. xii. 1), were of an exceptional nature, and yet the last was the cause of great dissatisfaction. A far greater objection was entertained against the marriage of an Israelitish woman with a man of another tribe, as illustrated by the narrative of Shechem's proposals for Dinah, the ostensible ground of their rejection being the difference in religious observances, that Shechem and his countrymen were uncircumcised (Gen. xxxiv. 14).

The only distinct prohibition in the Mosaic law refers to the Canaanites, with whom the Israelites were not to marry<sup>b</sup> on the ground that it would lead them into idolatry (Ex. xxxiv. 16; Deut. vii. 3, 4) — a result which actually occurred shortly after their settlement in the Promised Land (Judg. iii. 6, 7). But beyond this, the legal disabilities to which the Ammonites and Moabites were subjected (1 Chr. xxiii. 3) acted as a virtual bar to intermarriage with them, totally preventing (according to the interpretation which the Jews themselves put upon that passage) the marriage of

<sup>a</sup> The term *πορνεία* is occasionally used in a broad sense to include both adultery (Matt. v. 32) and incest (1 Cor. v. 1). In the decree of the Council of Jerusalem it must be regarded in its usual and restricted sense.

<sup>b</sup> The act of marriage with a foreigner is described in the Hebrew by a special term, *chatan* (חָתָן), expressive of the affinity thus produced, as appears

from the cognate terms, *châtân*, *choten*, and *choteneh*, for "son-in-law," "father-in-law," and "mother-in-law." It is used in Gen. xxxiv. 9; Deut. vii. 3; Josh. xxiii. 12; 1 K. iii. 1; Ezr. ix. 14; and metaphorically in 2 Chr. xviii. 1. The same idea comes prominently forward in the term *chatan* in Ex. iv. 26, where it is used of the affinity produced by the rite of circumcision between Jehovah and the child

Israelitish women with Moabites, but permitting that of Israelites with Moabite women, such as that of Mahlon with Ruth. The prohibition against marriages with the Edomites or Egyptians was less stringent, as a male of those nations received the right of marriage on his admission to the full citizenship in the third generation of proselytism (Deut. xxiii. 7, 8). There were thus three grades of prohibition — total in regard to the Canaanites on either side; total on the side of the males in regard to the Ammonites and Moabites; and temporary on the side of the males in regard to the Edomites and Egyptians, marriages with females in the two latter instances being regarded as legal (Selden, *de Jur. Nat.* cap. 14). Marriages between Israelite women and proselyted foreigners were at all times of rare occurrence, and are noticed in the Bible, as though they were of an exceptional nature, such as that of an Egyptian and an Israelitish woman (Lev. xxiv. 10), of Abigail and Jether the Ishmeelite, contracted probably when Jesse's family was sojourning in Moab (1 Chr. ii. 17), of Sheshan's daughter and an Egyptian, who was staying in his house (1 Chr. ii. 35), and of a Naphthalite woman and a Tyrian, living in adjacent districts (1 K. vii. 14). In the reverse case, namely, the marriage of Israelites with foreign women, it is, of course, highly probable that the wives became proselytes after their marriage, as instanced in the case of Ruth (i. 16); but this was by no means invariably the case. On the contrary we find that the Egyptian wife of Solomon (1 K. xi. 4), and the Phœnician wife of Ahab (1 K. xvi. 31), retained their idolatrous practices and introduced them into their adopted countries. Proselytism does not therefore appear to have been a *sine quâ non* in the case of a wife, though it was so in the case of a husband: the total silence of the Law as to any such condition in regard to a captive, whom an Israelite might wish to marry, must be regarded as evidence of the reverse (Deut. xxi. 10-14), nor have the refinements of Rabbinical writers on that passage succeeded in establishing the necessity of proselytism. The opposition of Samson's parents to his marriage with a Philistine woman (Judg. xiv. 3) leads to the same conclusion. So long as such unions were of merely occasional occurrence no veto was placed upon them by public authority; but, when after the return from the Babylonish Captivity the Jews contracted marriages with the heathen inhabitants of Palestine

in so wholesale a manner as to endanger their national existence, the practice was severely condemned (Ezr. ix. 2, x. 2), and the law of positive prohibition originally pronounced only against the Canaanites was extended to the Moabites, Ammonites, and Philistines (Neh. xiii. 23-25). Public feeling was thenceforth strongly opposed to foreign marriages, and the union of Manasseh with a Cuthæan led to such animosity as to produce the great national schism, which had its focus in the temple on Mount Gerizim (Joseph. *Ant.* xi. 8, § 2). A no less signal instance of the same feeling is exhibited in the cases of Joseph (*Ant.* xii. 4, § 6) and Anileus (*Ant.* xviii. 9, § 5), and is noticed by Tacitus (*Hist.* v. 5) as one of the characteristics of the Jewish nation in his day. In the N. T. no special directions are given on this head, but the general precepts of separation between believers and unbelievers (2 Cor. vi. 14, 17)<sup>a</sup> would apply with special force to the case of marriage; and the permission to dissolve mixed marriages, contracted previously to the conversion of one party, at the instance of the unconverted one, cannot but be regarded as implying the impropriety of such unions subsequently to conversion (1 Cor. vii. 12).

The progeny of illegal marriages between Israelites and non-Israelites was described under a peculiar term, *mamzer*<sup>b</sup> (A. V. "bastard"; Deut. xxiii. 2), the etymological meaning of which is uncertain,<sup>c</sup> but which clearly involves the notion of "foreigner," as in Zech. ix. 6, where the LXX. has ἀλλογενεῖς, "strangers." Persons born in this way were excluded from full rights of citizenship until the tenth generation (Deut. xxiii. 2). It follows hence that intermarriage with such persons was prohibited in the same manner as with an Ammonite or Moabite (comp. Mishna, *Kiddush*: 4, § 1).

ii. The regulations relative to marriage between Israelites and Israelites may be divided into two classes: (1) general, and (2) special — the former applying to the whole population, the latter to particular cases.

1. The general regulations are based on considerations of relationship. The most important passage relating to these is contained in Lev. xviii. 6-18, wherein we have in the first place a general prohibition against marriages between a man and the "flesh of his flesh,"<sup>d</sup> and in the second place special prohibitions<sup>e</sup> against marriage with a

<sup>a</sup> The term ἕτεροζυγοῦντες (A. V. "unequally yoked with"), has no special reference to marriage: its meaning is shown in the cognate term ἕτεροζυγος (Lev. xix. 19; A. V. "of a diverse kind"). It is, however, correctly connected in the A. V. with the notion of a "yoke," as explained by Hesychius, οἱ μὴ συζυγοῦντες, and not with that of a "balance," as Theophylact.

#### b מַמְזֵר.

<sup>c</sup> Cognate words appear in Rabbinical writers, signifying (1) to spin or weave; (2) to be corrupt, as an added egg; (3) to ripen. The important point to be observed is that the word does not betoken *bastardy* in our sense of the term, but simply the progeny of a mixed marriage of a Jew and a foreigner. It may be with a special reference to this word that the Jews boasted that they were not born "of fornication" (ἐκ πορνείας, John viii. 41), implying that there was no admixture of foreign blood, or consequently of foreign idolatries, in themselves.

<sup>d</sup> The Hebrew expression נֶפֶשׁ בְּנֶפֶשׁ (A. V. "heart of kin") is generally regarded as applying to

blood-relationship alone. The etymological sense of the term *sheer* is not decided. By some it is connected with *shaur*, "to remain," as by Michaelis (*Laws of Moses*, iii. 7, § 2), and in the marginal translation of the A. V. "remainder;" but its ordinary sense of "flesh" is more applicable. Whichever of these two we adopt, the idea of blood-relationship evidently attaches to the term from the cases in which it is used (vv. 12, 13, 17; A. V. "near-kinswoman"), as well as from its use in Lev. xx. 19; Num. xxvii. 11. The term *basar*, literally "flesh" or "body," is also peculiarly used of blood-relationship (Gen. xxix. 14, xxxvii. 27; Judg. ix. 2; 2 Sam. v. 1; 1 Chr. xi. 1). The two terms, *sheer basar*, are used conjointly in Lev. xxv. 49 as equivalent to *mishpachah*, "family." The term is applicable to relationship by affinity, in as far as it regards the blood-relations of a wife. The relationships specified may be classed under three heads: (1) blood-relationships proper in vv. 7-13; (2) the wives of blood-relations in vv. 14-16; (3) the blood relations of the wife in vv. 17, 18.

<sup>e</sup> The daughter is omitted: whether as being pro

mother, stepmother, sister, or half-sister, whether "born at home or abroad," a grand-daughter, aunt, whether by consanguinity on either side, or by marriage on the father's side, daughter-in-law, brother's wife, step-daughter, wife's mother, step-grand-daughter, or wife's sister during the lifetime of the wife.<sup>b</sup> An exception is subsequently made (Deut. xxv. 5) in favor of marriage with a brother's wife in the event of his having died childless: to this we shall have occasion to refer at length. Different degrees of guiltiness attached to the infringement of these prohibitions, as implied both in the different terms<sup>c</sup> applied to the various offenses, and in the punishments affixed to them, the general penalty being death (Lev. xx. 11-17), but in the case of the aunt and the brother's wife childlessness (19-21), involving probably the stain of illegitimacy in cases where there was an issue, while in the case of the two sisters no penalty is stated.

The moral effect of the prohibitions extended beyond cases of formal marriage to those of illicit intercourse, and gave a deeper dye of guilt to such conduct as that of Lot's daughters (Gen. xix. 33), of Reuben in his intercourse with his father's concubine (Gen. xxxv. 22), and of Absalom in the same act (2 Sam. xvi. 22); and it rendered such crimes tokens of the greatest national disgrace (Ez. xxii. 11). The Rabbinical writers considered that the prohibitions were abrogated in the case of proselytes, inasmuch as their change of religion was deemed equivalent to a new natural birth, and consequently involved the severing of all ties of

eminently the "flesh of a man's flesh," or because it was thought unnecessary to mention such a connection.

<sup>a</sup> The expression "born at home or abroad" has been generally understood as equivalent to "in or out of wedlock," i. e. the daughter of a father's concubine; but it may also be regarded as a re-statement of the preceding words, and as meaning "one born to the father, or mother, in a former marriage" (comp. Keil, *Archaeol.* ii. 55). The distinction between the cases specified in vv. 9 and 11 is not very evident: it probably consists in this, that ver. 9 prohibits the union of a son of the first marriage with a daughter of the second, and ver. 11 that of a son of the second with a daughter of the first (Keil). On the other hand, Knobel (*Comm. in loc.*) finds the distinction in the words "wife of thy father" (ver. 11), which according to him includes the *mother* as well as the stepmother, and thus specifically states the *full* sister, while ver. 9 is reserved for the half-sister.

<sup>b</sup> The sense of this verse has been much canvassed, in connection with the question of marriage with a deceased wife's sister. It has been urged that the marginal translation, "one wife to another," is the correct one, and that the prohibition is really directed against polygamy. The following considerations, however, support the rendering of the text. (1.) The writer would hardly use the terms rendered "wife" and "sister" in a different sense in ver. 18 from that which he assigned to them in the previous verses. (2.) The usage of the Hebrew language and indeed of every language, requires that the expression "one to another" should be preceded by a plural noun. The

cases in which the expression  $\text{אִשׁוֹתֶיךָ לְאִשׁוֹתֶיךָ}$  is equivalent to "one to another," as in Ex. xxvi. 3, 5, 6, 17, Ez. i. 9, 23. iii. 13. Instead of favoring, as has generally been supposed, the marginal translation, exhibit the peculiarity above noted. (3.) The consent of the ancient versions is unanimous, including the LXX. ( $\gamma\upsilon\upsilon\alpha\iota\kappa\alpha\ \epsilon\pi\ \alpha\delta\epsilon\lambda\phi\eta\ \alpha\upsilon\tau\eta\varsigma$ ), the Vulgate (*orari*

previous relationship: it was necessary, however, in such a case that the wife as well as the husband should have adopted the Jewish faith.

The grounds on which these prohibitions were enacted are reducible to the following three heads (1) moral propriety; (2) the practices of heathen nations; and (3) social convenience. The first of these grounds comes prominently forward in the expressions by which the various offenses are characterized, as well as in the general prohibition against approaching "the flesh of his flesh." The use of such expressions undoubtedly contains an appeal to the *horror naturalis*, or that repugnance with which man instinctively shrinks from matrimonial union with one with whom he is connected by the closest ties both of blood and of family affection. On this subject we need say no more than that there is a difference in kind between the affection that binds the members of a family together, and that which lies at the bottom of the matrimonial bond, and that the amalgamation of these affections cannot take place without a serious shock to one or the other of the two; hence the desirability of drawing a distinct line between the provinces of each, by stating definitely where the matrimonial affection may legitimately take root. The second motive to laying down these prohibitions was that the Hebrews might be preserved as a peculiar people, with institutions distinct from those of the Egyptians and Canaanites (Lev. xviii. 3), as well as of other heathen nations with whom they might come in contact. Marriages within the proscribed degrees prevailed in many civilized coun-

tries, as *uzoris tuæ*, the Chaldee, Syria: etc. (4.) The Jews themselves, as shown in the Mishna, and in the works of Philo, permitted the marriage. (5.) Polygamy was recognized by the Mosaic law, and cannot consequently be forbidden in this passage. Another interpretation, by which the sense of the verse is again altered, is effected by attaching the words "in her life-time" exclusively to the verb "vex." The objections to this are patent: (1) it is but reasonable to suppose that this clause, like the others, would depend on the principal verb; and (2), if this were denied, it would be but reasonable to attach it to the *nearest* ("uncover"), rather than the more remote secondary verb; which would be fatal to the sense of the passage.

<sup>c</sup> These terms are—(1.) *Zimmah* ( $\text{זִמְּה}$ ); A. V. "wickedness"), applied to marriage with mother or daughter (Lev. xx. 14), with mother-in-law, step-daughter, or grand-step-daughter (xviii. 17). The term is elsewhere applied to gross violations of decency or principle (Lev. xix. 29; Job xxxi. 11; Ez. xvi. 43, xxii. 11). (2.) *Tebel* ( $\text{תֵּבֵל}$ ); A. V. "confusion"), applied to marriage with a daughter-in-law (Lev. xx. 12): it signifies *pollution*, and is applied to the worst kind of defilement (Lev. xviii. 23). (3.) *Chesed* ( $\text{חֶסֶד}$ ); A. V. "wicked thing"), applied to marriage with a sister (Lev. xx. 17): its proper meaning appears to be *disgrace*. (4.) *Niddah* ( $\text{נִדְּה}$ ); A. V. "an unclean thing"), applied to marriage with a brother's wife (Lev. xx. 21): it conveys the notion of *impurity*. Michaelis (*Lives of Moses*, iii. 7, § 2) asserts that these terms have a forensic force; but there appears to be no ground for this. The view which the same authority propounds (§ 4) as to the reason for the prohibitions, namely, to prevent seduction under the promise of marriage among near relations, is singularly inadequate both to the occasion and to the terms employed.

tries in historical times, and were not unusual among the Hebrews themselves in the pre-Mosaic age. For instance, marriages with half-sisters by the same father were allowed at Athens (Plutarch *Vit. p. 4*, *Themistoc.* p. 32), with half-sisters by the same mother at Sparta (Philo, *de Spec. Leg.* p. 779), and with full sisters in Egypt (Diod. i. 27) and Persia, as illustrated in the well-known instances of Ptolemy Philadelphus in the former (Paus. i. 7, § 1), and Cambyses in the latter country (Herod. iii. 31). It was even believed that in some nations marriages between a son and his mother were not unusual (Ov. *Met.* x. 331; Eurip. *Androm.* p. 174). Among the Hebrews we have instances of marriage with a half-sister in the case of Abraham (Gen. xx. 12), with an aunt in the case of Amram (Ex. vi. 20), and with two sisters at the same time in the case of Jacob (Gen. xxix. 26). Such cases were justifiable previous to the enactments of Moses; subsequently to them we have no case in the O. T. of actual marriage within the degrees, though the language of Tamar towards her half-brother Amnon (2 Sam. xiii. 13) implies the possibility of their union with the consent of their father.<sup>a</sup> The Herods committed some violent breaches of the marriage law. Herod the Great married his half-sister (*Ant.* xvii. 1, § 3); Archelaus his brother's widow, who had children (xvii. 13, § 1); Herod Antipas his brother's wife (xviii. 5, § 1; *Matt.* xiv. 3). In the Christian Church we have an instance of marriage with a father's wife (1 Cor. v. 1), which St. Paul characterizes as "fornication" (*πορνεία*), and visits with the severest condemnation. The third ground of the prohibitions, social convenience, comes forward solely in the case of marriage with two sisters simultaneously, the effect of which would be to "vex" or irritate the first wife, and produce domestic jars.<sup>b</sup>

A remarkable exception to these prohibitions existed in favor of marriage with a deceased brother's wife, in the event of his having died childless.

<sup>a</sup> Various attempts have been made to reconcile this language with the Levitical law. The Rabbinical explanation was that Tamar's mother was a heathen at the time of her birth, and that the law did not apply to such a case. Josephus (*Ant.* vii. 8, § 1) regarded it as a mere ruse on the part of Tamar to evade Amnon's impurity: but, if the marriage were out of the question, she would hardly have tried such a poor device. Thienius (*Comm. in loc.*) considers that the Levitical prohibitions applied only to cases where a disruption of family bonds was likely to result, or where the motives were of a gross character; an argument which would utterly abrogate the authority of this and every other absolute law.

<sup>b</sup> The expression לַיָּרֵךְ admits of another explanation, "to pack together;" or combine the two in one marriage, and thus confound the nature of their relationship to one another. This is in one respect a preferable meaning, inasmuch as it is not clear why two sisters should be more particularly irritated than any two not so related. The usage, however, of the cognate word יָרַךְ, in 1 Sam. i. 6, favors the sense

usually given; and in the Mishna יָרַךְ is the usual term for the wives of a polygamist\* (*Mishna, Yebam.* i. § 1).

<sup>c</sup> The Talmudical term for the obligation was *yibbām* (יִבְבָּם), from *yabam* (יָבַם), "husband's brother:" hence the title *yebamoth* of the treatise in the Mishna for the regulation of such marriages. From the same

The law which regulates this has been named the "Levirate,"<sup>e</sup> from the Latin *levir*, "brother-in-law." The custom is supposed to have originated in that desire of perpetuating a name,<sup>f</sup> which prevails all over the world, but with more than ordinary force in eastern countries, and preëminently among Israelites, who each wished to bear part in the promise made to Abraham that "in his seed should all nations of the earth be blessed" (*Gen.* xxvi. 4). The first instance of it occurs in the patriarchal period, where Onan is called upon to marry his brother Er's widow (*Gen.* xxxviii. 8). The custom was confirmed by the Mosaic law, which decreed that "if brethren (*i. e.* sons of the same father) dwell together (either in one family, in one house, or, as the Rabbins explained it, in contiguous properties; the first of the three senses is probably correct), and one of them die and leave no child (*ben*, here used in its broad sense, and not specifically son; compare *Matt.* xxii. 25, μή ἔχων σπέρμα; *Mark* xii. 19; *Luke* xii. 28, ἄνεκνος), the wife of the dead shall not marry without (*i. e.* out of the family) unto a stranger (one unconnected by ties of relationship); her husband's brother shall go in unto her and take her to him to wife;" not, however, without having gone through the usual preliminaries of a regular marriage. The first-born of this second marriage then succeeded in the name of the deceased brother,<sup>g</sup> *i. e.* became his legal heir, receiving his name (according to Josephus, *Ant.* iv. 8, § 23; but compare *Ruth* i. 2, iv. 17), and his property (*Deut.* xxv. 5, 6). Should the brother object to marrying his sister-in-law, he was publicly to signify his dissent in the presence of the authorities of the town, to which the widow responded by the significant act of loosing his shoe and spitting in his face, or (as the Talmudists explained it) on the ground before him (*Yebam.* 12, § 6) — the former signifying the transfer of property from one person to another<sup>h</sup> (as usual among

root comes the term *yibbem* (יִבְבֵּם), to contract such a marriage (*Gen.* xxxviii. 8).

<sup>d</sup> The reason here assigned is hardly a satisfactory one. May it not rather have been connected with the purchase system, which would reduce a wife into the position of a chattel or *mancipium*, and give the survivors a reversionary interest in her? This view derives some support from the statement in Haxthausen's *Transcaucasia*, p. 404, that among the Ossetes, who have a Levirate law of their own, in the event of none of the family marrying the widow, they are entitled to a certain sum from any other husband whom she may marry.

<sup>e</sup> The position of the issue of a Levirate marriage, as compared with other branches of the family, is exhibited in the case of Tamar, whose son by her father-in-law, Judah, became the head of the family, and the channel through whom the Messiah was born (*Gen.* xxxviii. 29; *Matt.* i. 3).

<sup>f</sup> The technical term for this act was *khalitzah* (חַלְצָה), from *khalatz* (חָלַץ), "to draw off." It is of frequent occurrence in the treatise *Yebamoth*, where minute directions are given as to the manner in which the act was to be performed; *e. g.* that the shoe was to be of leather, or a sandal furnished with a heel-strap; a felt shoe or a sandal without a strap would not do (*Yebam.* 12, §§ 1. 2). The *khalitzah* was not valid when the person performing it was deaf and dumb (§ 4), as he could not learn the precise formula which accompanied the act. The custom is retained by the modern Jews, and is minutely described by Picart *Cérémonies Religieuses*, i. 243. It receives

the Indians and old Germans, Keil, *Archäol.* ii. 66), the latter the contempt due to a man who refused to perform his just obligations (Deut. xxv. 7-9; Ruth iv. 6-11). In this case it was permitted to the next of kin to come forward and to claim both the wife and the inheritance.

The Levirate marriage was not peculiar to the Jews; it has been found to exist in many eastern countries,<sup>a</sup> particularly in Arabia (Burckhardt's *Notes*, i. 112; Niebuhr's *Voyage*, p. 61), and among the tribes of the Caucasus (Haxthausen's *Transcaucasia*, p. 403). The Mosaic law brings the custom into harmony with the general prohibition against marrying a brother's wife by restricting it to cases of childlessness; and it further secures the marriage bond as founded on affection by relieving the brother of the obligation whenever he was averse to the union, instead of making it compulsory, as in the case of Onan (Gen. xxxviii. 9). One of the results of the Levirate marriage would be in certain cases the consolidation of two properties in the same family; but this does not appear to have been the object contemplated.<sup>b</sup>

The Levirate law offered numerous opportunities for the exercise of that spirit of casuistry, for which the Jewish teachers are so conspicuous. One such case is brought forward by the Sadducees for the sake of entangling our Lord, and turns upon the complications which would arise in the world to come (the existence of which the Sadducees sought to invalidate) from the circumstance of the same woman having been married to several brothers (Matt. xxii. 23-30). The Rabbinical solution of this difficulty was that the wife would revert to the first husband: our Lord on the other hand subverts the hypothesis on which the difficulty was based, namely, that the material conditions of the present life were to be carried on in the world to come; and thus He asserts the true character of marriage as a temporary and merely human institution. Numerous difficulties are suggested, and minute regulations laid down by the Talmudical writers, the chief authority on the subject being the book of the Mishna, entitled *Yebamoth*. From this we gather the following particulars, as illustrating the working of the law. If a man stood within the proscribed degrees of relationship in reference to his brother's widow, he was exempt from the operation of the law (2, § 3), and if he were on this or any other account exempt from the

obligation to marry one of the widows, he was **also** exempt from the obligation to marry any of them (1, § 1). It is also implied that it was only necessary for **one** brother to marry one of the widows, in cases where there were several widows left. The marriage was not to take place within three months of the husband's death (4, § 10). The eldest brother ought to perform the duty of marriage; but, on his declining it, a younger brother might also do it (2, § 8, 4, § 5). The *khulitzah* was regarded as involving future relationship; so that a man who had received it could not marry the widow's relations within the prohibited degrees (4, § 7). Special rules are laid down for cases where a woman married under a false impression as to her husband's death (10, § 1), or where a mistake took place as to whether her son or her husband died first (10, § 3), for in the latter case the Levirate law would not apply; and again as to the evidence of the husband's death to be produced in certain cases (caps. 15, 16).

From the prohibitions expressed in the Bible, others have been deduced by a process of inferential reasoning. Thus the Talmudists added to the Levitical relationships several remoter ones, which they termed *secundary*, such as grandmother and great-grandmother, great-grandchild, etc.: the only points in which they at all touched the Levitical degrees were, that they added (1) the wife of the father's *uterine* brother under the idea that in the text the brother described was only by the same father, and (2) the mother's brother's wife, for which they had no authority (Selden, *Ux. Ebr.* i. 2). Considerable differences of opinion have arisen as to the extent to which this process of reasoning should be carried, and conflicting laws have been made in different countries, professedly based on the same original authority. It does not fall within our province to do more than endeavor to point out in what respects and to what extent the Biblical statements bear upon the subject. In the first place we must observe that the design of the legislator apparently was to give an exhaustive list of prohibitions: for he not only gives examples of *degrees* of relationship, but he specifies the prohibitions in cases which are strictly parallel to each other, e. g., son's daughter and daughter's daughter (Lev. xviii. 10), wife's son's daughter and wife's daughter's daughter (ver. 17): whereas, had he wished only to exhibit the prohibited degree, one of these instances would have been sufficient. In

illustration from the expression used by the modern Arabs, in speaking of a repudiated wife, "She was my slipper: I have cast her off" (Burckhardt, *Notes*, 113).

<sup>a</sup> The variations in the usages of the Levirate marriage are worthy of notice. Among the Ossetes in Georgia the marriage of the widow takes place if there are children, and may be contracted by the father as well as the brother of the deceased husband. If the widow has no children, the widow is purchaseable by another husband, as already noticed (Haxthausen, pp. 403, 404). In Arabia, the right of marriage is extended from the brother's widow to the cousin. Neither in this nor in the case of the brother's widow is the marriage compulsory on the part of the woman, though in the former the man can put a veto upon any other marriage (Burckhardt, *Notes*, i. 112, 113). Another development of the Levirate principle may perhaps be noticed in the privilege which the king enjoyed of succeeding to the wives as well as the throne of his predecessor (2 Sam. xii. 8). Hence Absalom's public seizure of his father's wives was not only a

breach of morality, but betokened his usurpation of the throne (2 Sam. xvi. 22). And so, again, Adonijah's request for the hand of Abishag was regarded by Solomon as almost equivalent to demanding the throne (1 K. ii. 22).

<sup>b</sup> The history of Ruth's marriage has led to some misconception on this point. Boaz stood to Ruth in the position, not of a Levir (for he was only her husband's cousin), but of a *Goel*, or redeemer in the second degree (A. V. "near kinsman," iii. 9): as such, he redeemed the inheritance of Naomi, after the refusal of the redeemer in the nearest degree, in conformity with Lev. xxv. 25. It appears to have been customary for the redeemer at the same time to marry the heiress, but this custom is not founded on any written law. The writer of the book of Ruth, according to Selden (*De Success.* cap. 15), *confuses* the laws relating to the *Goel* and the *Levir*, as Josephus (*Ant.* v. 9, § 4) has undoubtedly done; but this is an unnecessary assumption: the custom is one that may well have existed in conformity with the *spirit* of the law of the *Levirate* marriage.

the second place it appears certain that he did not regard the degree as the text of the prohibition; for he establishes a different rule in regard to a brother's widow and a deceased wife's sister, though the degree of relationship is in each case strictly parallel. It cannot, therefore, in the face of this express enactment be argued that Moses designed his countrymen to infer that marriage with a niece was illegal because that with the aunt was, nor yet that marriage with a mother's brother's wife was included in the prohibition of that with the father's brother's wife. For, though no explicit statement is made as to the legality of these two latter, the rule of interpretation casually given to us in the first must be held to apply to them also. In the third place, it must be assumed that there were some tangible and even strong grounds for the distinctions noted in the degrees of equal distance; and it then becomes a matter of importance to ascertain whether these grounds are of *perpetual* force, or arise out of a peculiar state of society or legislation; if the latter, then it seems justifiable to suppose that on the alteration of that state we may recur to the spirit rather than the letter of the enactment, and may infer prohibitions which, though not existing in the Levitical law, may yet be regarded as based upon it.

The cases to which these remarks would most pointedly apply are marriage with a deceased wife's sister, a niece, whether by blood or by marriage, and a maternal uncle's widow. With regard to the first and third of these, we may observe that the Hebrews regarded the relationship existing between the wife and her husband's family, as of a closer nature than that between the husband and his wife's family. To what extent this difference was supposed to hold good we have no means of judging; but as illustrations of the difference we may note (1) that the husband's brother stood in the special relation of *levir* to his brother's wife, and was subject to the law of Levirate marriage in consequence; (2) that the nearest relation on the husband's side, whether brother, nephew, or cousin, stood in the special relation of *goël*, or avenger of blood to his widow; and (3) that an heiress was restricted to a marriage with a relation on her father's side. As no corresponding obligations existed in reference to the wife's or the mother's family, it follows almost as a matter of course that the degree of relationship must have been regarded as different in the two cases, and that prohibitions might on this account be applied to the one, from which the other was exempt. When, however, we transplant the Levitical regulations from the Hebrew to any other commonwealth, we are fully warranted in taking into account the temporary and local conditions of relationship in each, and in extending the prohibitions to cases where alterations in the social or legal condition have taken place. The question to be fairly argued, then, is not simply whether marriage within a certain degree is or is not permitted by the Levitical law, but whether, allowing for the altered state of society, *mutatis mutandis*, it appears in conformity with the general spirit of that law. The ideas of different nations as to relationship differ widely; and, should it happen that in the social system of a certain country a relationship is, as a matter of fact, regarded as an intimate one, then it is clearly permissible

for the rulers of that country to prohibit marriage in reference to it, not on the ground of any expressed or implied prohibition in reference to it in particular in the book of Leviticus, but on the general ground that Moses intended to prohibit marriage among near relations. The application of such a rule in some cases is clear enough; no one could hesitate for a moment to pronounce marriage with a brother's widow, even in cases where the Mosaic law would permit it, as absolutely illegal in the present day: inasmuch as the peculiar obligation of the *Levir* has been abolished. As little could we hesitate to extend the prohibition from the paternal to the maternal uncle's widow, now that the peculiar differences between relationships on the father's and the mother's side are abolished. With regard to the vexed question of the deceased wife's sister we refrain from expressing an opinion, inasmuch as the case is still *in lite*; under the rule of interpretation we have already laid down, the case stands thus: such a marriage is not only not prohibited, but actually permitted by the letter of the Mosaic Law; but it remains to be argued (1) whether the permission was granted under peculiar circumstances; (2) whether those or strictly parallel circumstances exist in the present day; and (3) whether, if they do not exist, the general tenor of the Mosaic prohibitions would, or would not, justify a community in extending the prohibition to such a relationship on the authority of the Levitical law. In what has been said on this point, it must be borne in mind that we are viewing the question simply in its relation to the Levitical law: with the other arguments *pro* and *con* bearing on it, we have at present nothing to do. With regard to the marriage with the niece, we have some difficulty in suggesting any sufficient ground on which it was permitted by the Mosaic law. The Rabbinical explanation, that the distinction between the aunt and the niece was based upon the *respectus parentele*, which would not permit the aunt to be reduced from her natural seniority, but at the same time would not object to the elevation of the niece, cannot be regarded as satisfactory; for, though it explains to a certain extent the difference between the two, it places the prohibition of marriage with the aunt, and consequently the permission of that with the niece, on a wrong basis: for in Lev. xx. 19 consanguinity, and not *respectus parentele*, is stated as the ground of the prohibition. The Jews appear to have availed themselves of the privilege without scruple: in the Bible itself, indeed, we have but one instance, and that not an undoubted one, in the case of Othniel, who was probably the brother of Caleb (Josh. xv. 17), and, if so, then the uncle of Achsah his wife. Several such marriages are noticed by Josephus, as in the case of Joseph, the nephew of Onias (*Ant.* xii. 4, § 6), Herod the Great (*Ant.* xvii. 1, § 3), and Herod Philip (*Ant.* xviii. 5, § 1). But on whatever ground they were formerly permitted, there can be no question as to the propriety of prohibiting them in the present day.

2. Among the special prohibitions we have to notice the following. (1.) The high-priest was forbidden to marry any except a virgin selected from his own people, *i. e.* an Israelite (Lev. xxi. 13, 14). He was thus exempt from the action of the Levirate law. (2.) The priests were less restricted in their choice<sup>a</sup>; they were only prohibited from marrying

<sup>a</sup> FROM Ez. xlv. 22 it appears that the law relative to the marriage of priests was afterwards made more

rigid: they could marry only maidens of Israelitish origin or the widows of priests

prostitutes and divorced women (Lev. xxi. 7). (3.) Heiresses were prohibited from marrying out of their own tribe,<sup>a</sup> with the view of keeping the possessions of the several tribes intact (Num. xxxvi. 5-9; comp. Tob. vii. 10). (4.) Persons defective in physical powers were not to intermarry with Israelites by virtue of the regulations in Deut. xxiii. 1. (5.) In the Christian Church, bishops and deacons were prohibited from having more than one wife (1 Tim. iii. 2, 12), a prohibition of an ambiguous nature, inasmuch as it may refer (1) to polygamy in the ordinary sense of the term, as explained by Theodoret (*in loc.*), and most of the Fathers; (2) to marriage after the decease of the first wife; or (3) to marriage after divorce during the lifetime of the first wife. The probable sense is second marriage of any kind whatever, including all the three cases alluded to, but with a special reference to the two last, which were allowable in the case of the laity, while the first was equally forbidden to all. The early Church generally regarded second marriage as a disqualification for the ministry, though on this point there was not absolute unanimity (see Bingham, *Ant. iv.* 5, § 1-3). (6.) A similar prohibition applied to those who were candidates for admission into the ecclesiastical order of widows, whatever that order may have been (1 Tim. v. 9); in this case the words "wife of one man" can be applied but to two cases, (a) to re-marriage after the decease of the husband, or (b) after divorce. That divorce was obtained sometimes at the instance of the wife, is implied in Mark x. 12, and 1 Cor. vii. 11, and is alluded to by several classical writers (see Whitby, *in loc.*). But St. Paul probably refers to the general question of re-marriage. (7.) With regard to the general question of the re-marriage of divorced persons, there is some difficulty in ascertaining the sense of Scripture. According to the Mosaic Law, a wife divorced at the instance of the husband might marry whom she liked; but if her second husband died or divorced her she could not revert to her first husband, on the ground that, as far as he was concerned, she was "defiled" (Deut. xxiv. 2-4); we may infer from the statement of the ground, that there was no objection to the re-marriage of the original parties, if the divorced wife had remained unmarried in the interval. If the wife was divorced on the ground of adultery, her re-marriage was impossible, inasmuch as the punishment for such a crime was death. In the N. T. there are no direct precepts on the subject of the re-marriage of divorced persons. All the remarks bearing upon the point had a primary reference to an entirely different subject, namely, the abuse of divorce. For instance, our Lord's declarations in Matt. v. 32, xix. 9, applying as they expressly do to the case of a wife divorced on other grounds than that of unfaithfulness, and again St. Paul's, in 1 Cor. vii. 11, pre-supposing a contingency which he himself had prohibited as being improper, cannot be regarded as directed to the general question of re-marriage. In applying these passages to our own circumstances, due regard must be had to the peculiar nature of the Jewish divorce, which was not, as with us, a judicial proceeding based on evidence and pronounced by authority, but the arbitrary, and sometimes capricious act of an in-

<sup>a</sup> The close analogy of this regulation to the Aſſenian law reſpecting the *ἐπίκληρος* has been already noticed in the article on *HEIR*.

dividual. The assertion that a woman divorced on improper and trivial grounds is made to commit adultery, does not therefore bear upon the question of a person divorced by judicial authority; no such case as our Lord supposes can now take place; at all events it would take place only in connection with the question of what form adequate grounds for divorce. The early Church was divided in its opinion on this subject (Bingham, *Ant. xxii.* 2, § 12). [DRYCKER, Amer. ed.]

With regard to age, no restriction is pronounced in the Bible. Early marriage is spoken of with approval in several passages (Prov. ii. 17, v. 18; Is. lxii. 5), and in reducing this general statement to the more definite one of years, we must take into account the very early age at which persons arrive at puberty in oriental countries. In modern Egypt marriage takes place in general before the bride has attained the age of 16, frequently when she is 12 or 13, and occasionally when she is only 10 (Lane, i. 208). The Talmudists forbade marriage in the case of a man under 13 years and a day, and in the case of a woman under 12 years and a day (Buxtorf, *Synagog.* cap. 7, p. 143). The usual age appears to have been higher, about 18 years.

Certain days were fixed for the ceremonies of betrothal and marriage — the fourth day for virgins, and the fifth for widows (Mishna, *Ketub.* 1, § 1). The more modern Jews similarly appoint different days for virgins and widows, Wednesday and Friday for the former, Thursday for the latter (Picart, i. 240).

III. The customs of the Hebrews and of oriental nations generally, in regard to the preliminaries of marriage as well as the ceremonies attending the rite itself, differ in many respects from those with which we are familiar. In the first place, the choice of the bride devolved not on the bridegroom himself, but on his relations or on a friend deputed by the bridegroom for this purpose. Thus Abraham sends Eliezer to find a suitable bride for his son Isaac, and the narrative of his mission affords one of the most charming pictures of patriarchal life (Gen. xxiv.); Hagar chooses a wife for Ishmael (Gen. xxi. 21); Isaac directs Jacob in his choice (Gen. xxviii. 1); and Judah selects a wife for Er (Gen. xxxviii. 6). It does not follow that the bridegroom's wishes were not consulted in this arrangement; on the contrary, the parents made proposals at the instigation of their sons in the instances of Shechem (Gen. xxxiv. 4, 8) and Samson (Judg. xiv. 1-10). A marriage contracted without the parents' interference was likely to turn out, as in Esau's case, "a grief of mind" to them (Gen. xxvi. 35, xxvii. 46). As a general rule the proposal originated with the family of the bridegroom; occasionally, when there was a difference of rank, this rule was reversed, and the bride was offered by her father, as by Jethro to Moses (Ex. ii. 21), by Caleb to Othniel (Josh. xv. 17), and by Saul to David (1 Sam. xviii. 27). The imaginary case of women soliciting husbands (Is. iv. 1) was designed to convey to the mind a picture of the ravages of war, by which the greater part of the males had fallen. The consent of the maiden was sometimes asked (Gen. xxiv. 58); but this appears to have been subordinate to the previous consent of the father and the adult brothers (Gen. xxiv. 51, xxvii. 11). Occasionally the whole business of selecting the wife was left in the hands of a friend, and hence the case might arise which is supposed by the Tal-

nudists (*Yebam.* 2, §§ 6, 7), that a man might not be aware to which of two sisters he was betrothed. So in Egypt at the present day the choice of a wife is sometimes entrusted to a professional woman styled a *khdt'beh*: and it is seldom that the bridegroom sees the features of his bride before the marriage has taken place (Lane, i. 209-211).

The selection of the bride was followed by the espousal, which was not altogether like our "engagement," but was a formal proceeding, undertaken by a friend or legal representative on the part of the bridegroom, and by the parents on the part of the bride; it was confirmed by oaths, and accompanied with presents to the bride. Thus Eliezer, on behalf of Isaac, propitiates the favor of Rebekah by presenting her in anticipation with a massive golden nose-ring and two bracelets; he then proceeds to treat with the parents, and, having obtained their consent, he brings forth the more costly and formal presents, "jewels of silver, and jewels of gold, and raiment," for the bride, and presents of less value for the mother and brothers (*Gen.* xxiv. 22, 53). These presents were described by different terms, that to the bride by *mohar*<sup>a</sup> (A. V. "dowry"), and that to the relations by

*mattan*.<sup>b</sup> Thus Shechem offers "never so much dowry and gift" (*Gen.* xxvii. 12), the former for the bride, the latter for the relations. It has been supposed indeed that the *mohar* was a price paid down to the father for the sale of his daughter. Such a custom undoubtedly prevails in certain parts of the East at the present day, but it does not appear to have been the case with free women in patriarchal times; for the daughters of Laban make it a matter of complaint that their father had bargained for the services of Jacob in exchange for their hands, just as if they were "strangers" (*Gen.* xxxi. 15); and the permission to sell a daughter was restricted to the case of a "servant" or secondary wife (*Ex.* xxi. 7); nor does David, when complaining of the non-completion of Saul's bargain with him, use the expression "I bought for," but "I espoused to me for an hundred foreskins of the Philistines" (*2 Sam.* iii. 14). The expressions in *Hos.* iii. 2, "So I bought her to me," and in *Ruth* iv. 10, "Ruth have I purchased to be my wife," certainly appear to favor the opposite view; it should be observed, however, that in the former passage great doubt exists as to the correctness of the translation *c*; and that in the latter the case

<sup>a</sup> The term *mohar* (מֹהָר) occurs only thrice in the Bible (*Gen.* xxxi. 12; *Ex.* xxii. 17; *1 Sam.* xviii. 25). From the second of the three passages, compared with *Deut.* xxii. 29, it has been inferred that the sum was in all cases paid to the father; but this inference is unfounded, because the sum to be paid according to that passage was not the proper *mohar*, but a sum "according to," i. e. equivalent to the *mohar*, and this, not as a price for the bride, but as a penalty for the offense committed. The origin of the term, and consequently its specific sense, is uncertain. Gesenius (*Thes.* p. 773) has evolved the sense of "purchase-money" by connecting it with מָכַר, "to sell." It has also been connected with מָהַר, "to hasten,"

as though it signified a present hastily produced for the bride when her consent was obtained; and again with מָחָר, "morrow," as though it were the gift presented to the bride on the morning after the wedding, like the German *Morgen-gabe* (*Saalschütz, Archaol.* ii. 193).

\* Gussset (*Commentarii Ling. Hebr.* ed. 2d, p. 875) has well said: "Significationes dotandi et accelerandi quomodo coinciderint in unum verbum. quidque commune habeant, vix dixeris." The writer of the preceding paragraph, in speaking of "the origin of the term and its specific sense," neglects to notice Fürst's phonetic combinations, and the Arabic usage, by which he very naturally connects the different senses of

מָוֶהַר with the ground meaning *to flow*; namely, *to flow onward*, *to hasten on*, and *to flow away to*, in the sense of passing over from one to another in exchange, and "hence *to take in exchange* (through a gift, מֹהָר) a wife, i. e. *to marry*, *Ex.* xxii. 15." He defines מֹהָר, "a gift, a marriage gift or price, paid to the parents of the wife."

In *Ex.* xxii. 15, 16 (A. V. 16, 17) the offender, in the case supposed, is required to pay the usual purchase-money to the parent, the latter being allowed to give the daughter in marriage or not, at his own option. "According to the purchase-money of virgins" means the sum usually paid for a virgin received in marriage. The expression, "he shall pay money," in its immediate connection with the preceding clause, "if her father utterly refuses to give her unto him," certainly implies that it shall be paid to the "father."

The point now at issue is stated too strongly in the text, by saying, "it has been supposed that the *mohar* was a price paid down to the father for the sale of his daughter." The customary present to the father, in return for the gift of his daughter in marriage, originating in such a custom, continued to be expressed by this word, though only an honorary acknowledgment of the favor shown by him in bestowing his daughter's hand. This view of the case disposes, substantially, of the objections urged in the text. But it may be added, that the statement there made of the ground of complaint, on the part of Laban's daughters, is an unnecessary and forced construction of the language in *ch.* xxxi. 15. Laban's right to require Jacob's service, in return for giving them in marriage, was not questioned by Jacob, nor, so far as appears, by them. (*See Gen.* xxix. 15, 18, 20.) The natural construction of their complaint is, that they are treated, in all respects, as aliens, and not as of his own flesh and blood. Similar to this, in effect, is Jacob's complaint in *ch.* xxxi. 42, "Surely thou wouldst now have sent me away empty." In the case of David and Saul the *mohar* is expressly declined by the latter (*1 Sam.* xviii. 25); and in place of it, he accepts the proofs that a hundred Philistines have been slain, "to be avenged of the king's enemies." Evidently, this requirement was made by the king on his own behalf, and in place of the usual present to the father. For this reason, as well as on the general ground above stated, that the *mohar* had become only an honorary present to the father, David could say (*2 Sam.* iii. 14) "I espoused," etc., instead of "I bought."

T. J. C.

<sup>b</sup> מִתְּנָתָן. The importance of presents at the time of betrothal appears from the application of the term *aras* (אָרַשׁ), literally, "to make a present," in the special sense of "to betroth."

<sup>c</sup> The term used (פָּקָדוֹן) has a general sense "to make an agreement." The meaning of the verse appears to be this: the Prophet had previously married a wife, named Gomer, who had turned out unfaithful to him. He had separated from her; but he was ordered to renew his intimacy with her, and previous to doing this he places her on her probation, setting her apart for a time, and for her maintenance agreeing to give her fifteen pieces of silver in addition to a certain amount of food.

would not be conclusive, as Ruth might well be considered as included in the purchase of her property. It would undoubtedly be expected that the *mohar* should be proportioned to the position of the bride, and that a poor man could not on that account afford to marry a rich wife (1 Sam. xviii. 23). Occasionally the bride received a dowry <sup>a</sup> from her father, as instanced in the cases of Caleb's (Judg. i. 15) and Pharaoh's (1 K. ix. 16) daughters. A "settlement," in the modern sense of the term, *i. e.* a written document securing property to the wife, did not come into use until the post-Babylonian period: the only instance we have of one is in Tob. vii. 14, where it is described as an "instrument" (συγγραφή). The Talmudists styled it a *ketubah*,<sup>b</sup> and have laid down minute directions as to the disposal of the sum secured, in a treatise of the Mishna expressly on that subject, from which we extract the following particulars. The peculiarity of the Jewish *ketubah* consisted in this, that it was a definite sum, varying not according to the circumstances of the parties, but according to the state of the bride, <sup>c</sup> whether she be a spinster, a widow, or a divorced woman<sup>d</sup> (1, § 2); and further, that the dowry could not be claimed until the termination of the marriage by the death of the husband or by divorce (5, § 1), though advances might be made to the wife previously (9, § 8). Subsequently to betrothal a woman lost all power over her property, and it became vested in the husband, unless he had previously to marriage renounced his right to it (8, § 1; 9, § 1). Stipulations were entered into for the increase of the *ketubah*, when the bride had a handsome allowance (6, § 3). The act of betrothal<sup>e</sup> was celebrated by a feast (1, § 5), and among the more modern Jews it is the custom in some parts for the bridegroom to place a ring on the bride's finger (Picart, i. 239) — a custom which also prevailed among the Romans (*Dict. of Ant.* p. 604). Some writers have endeavored to prove that the rings noticed in the O. T. (Ex. xxxv. 22; Is. iii. 21) were nuptial rings, but there is not the slightest evidence of this. The ring was nevertheless regarded among the Hebrews as a token of fidelity (Gen. xli. 42), and of adoption into a family (Luke xv. 22). According to Selden it was originally given as an equivalent for dowry-money (*Uxor Ebraic.* ii. 14). Between the betrothal and the marriage an interval elapsed, varying from a few days in the patriarchal age (Gen.

<sup>a</sup> The technical term of the Talmudist for the dowry which the wife brought to her husband, answering to the *dos* of the Latins, was כְּתוּבָה.

<sup>b</sup> כְּתוּבָה, literally "a writing." The term was also specifically applied to the sum settled on the wife by the husband, answering to the Latin *donatio propter nuptias*.

<sup>c</sup> The practice of the modern Egyptians illustrates this: for with them the dowry, though its amount differs according to the wealth of the suitor, is still graduated according to the state of the bride. A certain portion only of the dowry is paid down, the rest being held in reserve (Lane, i. 211). Among the modern Jews also the amount of the dowry varies with the state of the bride, according to a fixed scale (Picart, i. 240).

<sup>d</sup> The amount of the dowry, according to the Mosaic law, appears to have been fifty shekels (Ex. xxii. 17, compared with Deut. xxii. 29).

<sup>e</sup> The technical term used by the Talmudists for betrothing was *kiddushin* (קִדּוּשֵׁין), derived from

xxiv. 55), to a full year for virgins and a month for widows in later times. During this period the bride-elect lived with her friends, and all communication between herself and her future husband was carried on through the medium of a friend deputed for the purpose, termed the "friend of the bridegroom" (John iii. 29). She was now virtually regarded as the wife of her future husband; for it was a maxim of the Jewish law that betrothal was of equal force with marriage (Phil. *De spec. leg.* p. 788). Hence faithlessness on her part was punishable with death (Deut. xxii. 23, 24), the husband having, however, the option of "putting her away" (Matt. i. 19) by giving her a bill of divorce-ment, in case he did not wish to proceed to such an extreme punishment (Deut. xxiv. 1). False accusations on this ground were punished by a severe fine and the forfeiture of the right of divorce (Deut. xxii. 13–19). The betrothed woman could not part with her property after betrothal, except in certain cases (*Ketub.* 8, § 1): and, in short, the bond of matrimony was as fully entered into by betrothal, as with us by marriage. In this respect we may compare the practice of the Athenians, who regarded the formal betrothal as indispensable to the validity of a marriage contract (*Dict. of Ant.* p. 598). The customs of the Nestorians afford several points of similarity in respect both to the mode of effecting the betrothal and the importance attached to it (Grant's *Nestorians*, pp. 197, 198).

We now come to the wedding itself; and in this the most observable point is, that there were no definite religious ceremonies connected with it. It is probable, indeed, that some formal ratification of the espousal with an oath took place, as implied in some allusions to marriage (Ez. xvi. 8; Mal. ii. 14), particularly in the expression, "the covenant of her God" (Prov. ii. 17), as applied to the marriage bond, and that a blessing was pronounced (Gen. xxiv. 60; Ruth iv. 11, 12) sometimes by the parents (Tob. vii. 13). But the essence of the marriage ceremony consisted in the removal of the bride from her father's house to that of the bridegroom or his father.<sup>g</sup>

The bridegroom prepared himself for the occasion by putting on a festive dress, and especially by placing on his head the handsome turban described by the term *pe'ér* (Is. lxi. 10: A. V. "ornaments"), and a nuptial crown or garland<sup>h</sup> (Cant. iii. 11): he was redolent of myrrh and frankincense and "all

שָׁרֵשׁ, "to set apart." There is a treatise in the Mishna so entitled, in which various questions of casuistry of slight interest to us are discussed.

<sup>f</sup> It is worthy of observation that there is no term in the Hebrew language to express the ceremony of marriage. The substantive *chatunah* (חַתּוּנָה) occurs but once, and then in connection with the day (Cant. iii. 11). The word "wedding" does not occur at all in the A. V. of the Old Testament.

<sup>g</sup> There seems indeed to be a literal truth in the Hebrew expression "to take" a wife (Num. xii. 1; 1 Chr. ii. 21); for the ceremony appears to have mainly consisted in the taking. Among the modern Arabs the same custom prevails, the capture and removal of the bride being effected with a considerable show of violence (Burckhardt's *Notes*, i. 108).

<sup>h</sup> The bridegroom's crown was made of various materials (gold or silver, roses, myrtle, or olive), according to his circumstances (Selden, *Ur. Ebr.* li. 15). The use of the crown at marriages was familiar both to the Greeks and Romans (*Dict. of Ant.*, *CORONA*)

powders of the merchant" (Cant. iii. 6). The bride prepared herself for the ceremony by taking a bath, generally on the day preceding the wedding. This was probably in ancient as in modern times a formal proceeding, accompanied with considerable pomp (Picart, i. 240; Lane, i. 217). The notices of it in the Bible are so few as to have escaped general observation (Ruth iii. 3; Ez. xxiii. 40; Eph. v. 26, 27); but the passages cited establish the antiquity of the custom, and the expressions in the last ("having purified her by the laver of water," "not having spot") have evident reference to it. A similar custom prevailed among the Greeks (*Dict. of Ant. s. v. Balneæ*, p. 185). The distinctive feature of the bride's attire was the *tsâ'iph*,<sup>a</sup> or "veil" — a light robe of ample dimensions, which covered not only the face but the whole person (Gen. xxiv. 65; comp. xxxviii. 14, 15). This was regarded as the symbol of her submission to her husband, and hence in 1 Cor. xi. 10, the veil is apparently described under the term *ἐξουσία*, "authority." She also wore a peculiar girdle, named *kishshûrtm*,<sup>b</sup> the "attire" (A. V.), which no bride could forget (Jer. ii. 32); and her head was crowned with a chaplet, which was again so distinctive of the bride, that the Hebrew term *collah*,<sup>c</sup> "bride," originated from it. If the bride was a virgin, she wore her hair flowing (*Ketub. 2, § 1*). Her robes were white (Rev. xix. 8), and sometimes embroidered with gold thread (Ps. xlv. 13, 14), and covered with perfumes (Ps. xlv. 8); she was further decked out with jewels (Is. xlix. 18, lxi. 10; Rev. xxi. 2). When the fixed hour arrived, which was generally late in the evening, the bridegroom set forth from his house, attended by his groomsmen, termed in Hebrew *mêrê'im*<sup>d</sup> (A. V. "companions; Judg. xiv. 11), and in Greek *υἱοὶ τοῦ νυμφῶνος* (A. V. "children of the bride-chamber;" Matt. ix. 15), preceded by a band of musicians or singers

(Gen. xxxi. 27; Jer. vii. 34, xvi. 9; 1 Macc. ix. 39), and accompanied by persons bearing flambeaux<sup>e</sup> (2 Esdr. x. 2; Matt. xxv. 7; compare Jer. xxv. 10; Rev. xviii. 23, "the light of a candle"). Having reached the house of the bride, who with her maidens anxiously expected his arrival (Matt. xxv. 6), he conducted the whole party back to his own or his father's<sup>f</sup> house, with every demonstration of gladness<sup>g</sup> (Ps. xlv. 15). On their way back they were joined by a party of maidens, friends of the bride and bridegroom, who were in waiting to catch the procession as it passed (Matt. xxv. 6; comp. Trench on *Parables*, p. 244 note). The inhabitants of the place pressed out into the streets to watch the procession (Cant. iii. 11). At the house a feast<sup>h</sup> was prepared, to which all the friends and neighbors were invited (Gen. xxix. 22, Matt. xxii. 1-10; Luke xiv. 8; John ii. 2), and the festivities were protracted for seven, or even fourteen days (Judg. xiv. 12; Tob. viii. 19). The guests were provided by the host with fitting robes (Matt. xxii. 11; comp. Trench, *Parables*, p. 230), and the feast was enlivened with riddles (Judg. xiv. 12) and other amusements. The bridegroom now entered into direct communication with the bride, and the joy of the friend was "fulfilled" at hearing the voice of the bridegroom (John iii. 29) conversing with her, which he regarded as a satisfactory testimony of the success of his share in the work. In the case of a virgin, parched corn was distributed among the guests (*Ketub. 2, § 1*), the significance of which is not apparent; the custom bears some resemblance to the distribution of the *mustaceum* (Juv. vi. 202) among the guests at a Roman wedding. The modern Jews have a custom of shattering glasses or vessels, by dashing them to the ground (Picart, i. 240). The last act in the ceremonial was the conducting of the bride to the bridal chamber, *cheder*<sup>i</sup> (Judg. xv. 1; Joel

<sup>a</sup> צַעִיף. See article on DRESS. The use of the veil was not peculiar to the Hebrews. It was customary among the Greeks and Romans; and among the latter it gave rise to the expression *nytho*, literally "to veil," and hence to our word "nuptial." It is still used by the Jews (Picart, i. 241). The modern Egyptians envelope the bride in an ample shawl, which perhaps more than anything else resembles the Hebrew *tsaiph* (Lane, i. 220).

<sup>b</sup> קִישׁוּרְתִּים. Some difference of opinion exists as to this term. [GIRDLE.] The girdle was an important article of the bride's dress among the Romans, and gave rise to the expression *solere zonam*.

<sup>c</sup> בַּתָּה. The bride's crown was either of gold or gilded. The use of it was interdicted after the destruction of the second Temple, as a token of humiliation (Selden, *Ux. Ebr.* ii. 15).

<sup>d</sup> מְרֵעִים. Winer (*Rub. s. v. "Hochzeit"*) identifies the "children of the bridechamber" with the *shoshbenim* (שׁוֹשְׁבְנֵי בָּיִת) of the Talmudists. But the former were the attendants on the bridegroom alone, while the *shoshbenim* were two persons selected on the day of the marriage to represent the interests of bride and bridegroom, apparently with a special view to any possible litigation that might subsequently arise on the subject noticed in Deut. xxii. 15-21 (Selden, *Ux. Ebr.* ii. 16).

<sup>e</sup> Compare the *δαῖδες νυμφικαὶ* of the Greeks (Aristoph. *Plu.* 1317). The lamps described in Matt. xxv. 7

would be small hand-lamps. Without them none could join the procession (Trench's *Parables*, p. 257 note).

<sup>f</sup> The bride was said to "go to" (בֵּרוּת הָיָל) the house of her husband (Josh. xv. 18; Judg. i. 14); an expression which is worthy of notice, inasmuch as it has not been rightly understood in Dan. xi. 6, where "they that brought her" is an expression for *husband*. The bringing home of the bride was regarded in the later days of the Roman empire as one of the most important parts of the marriage ceremony (Bingham, *Ant.* xxii. 4, § 7).

<sup>g</sup> From the joyous sounds used on these occasions the term *hâlal* (הִלָּל) is applied in the sense of marrying in Ps. lxxviii. 63; A. V. "their maidens were not given to marriage," literally, "were not praised," as in the margin. This sense appears preferable to that of the LXX., *οὐκ ἐπὶνθησαν*, which is adopted by Gesenius (*Thes.* p. 596). The noise in the streets, attendant on an oriental wedding, is excessive, and enables us to understand the allusions in Jeremiah to the "voice of the bridegroom and the voice of the bride."

<sup>h</sup> The feast was regarded as so essential a part of the marriage ceremony, that *ποιεῖν γάμον* acquired the specific meaning "to celebrate the marriage-feast" (Gen. xxix. 22; Esth. ii. 18; Tob. viii. 17; 1 Macc. ix. 37, x. 58, LXX.; Matt. xxii. 4, xxv. 10; Luke xiv. 8), and sometimes to celebrate any feast (Esth. ix. 22)

<sup>i</sup> חֶדֶר.

ii. 16), where a canopy, named *chuppah*<sup>a</sup> was prepared (Ps. xix. 5; Joel ii. 16). The bride was still completely veiled, so that the deception practiced on Jacob (Gen. xxix. 25) was very possible. If proof could be subsequently adduced that the bride had not preserved her maiden purity, the case was investigated; and, if she was convicted,

Lamp suspended at a modern Egyptian wedding. (Lane.)

she was stoned to death before her father's house (Deut. xxii. 13-21). A newly married man was exempt from military service, or from any public business which might draw him away from his home, for the space of a year (Deut. xxiv. 5): a similar privilege was granted to him who was betrothed (Deut. xx. 7).

Hitherto we have described the usages of marriage as well as they can be ascertained from the Bible itself. The Talmudists specify three modes by which marriage might be effected, namely, money, marriage-contract, and consummation (*Kiddush. i. § 1*). The first was by the presentation of a sum of money, or its equivalent, in the presence of witnesses, accompanied by a mutual declaration of betrothal. The second was by a *written*, instead of a verbal agreement, either with or without a sum of money. The third, though valid in point of law, was discouraged to the greatest extent, as being contrary to the laws of morality (Selden, *Ux. Ebr. ii. 1, 2*).

IV. In considering the social and domestic conditions of married life among the Hebrews, we must in the first place take into account the position assigned to women generally in their social scale. The seclusion of the *harem* and the habits consequent upon it were utterly unknown in early times, and the condition of the oriental woman, as pictured to us in the Bible, contrasts most favorably with that of her modern representative. There is abundant evidence that women, whether married or unmarried, went about with their faces unveiled

(Gen. xii. 14, xxiv. 16, 65, xxix. 11; 1 Sam. i. 13). An unmarried woman might meet and converse with men, even strangers, in a public place (Gen. xxiv. 24, 45-47, xxix. 9-12; 1 Sam. ix. 11): she might be found alone in the country without any reflection on her character (Deut. xxii. 25-27); or she might appear in a court of justice (Num. xxvii. 2). Women not unfrequently held important offices, some were prophetesses, as Miriam, Deborah, Huldah, Noadiah, and Anna: of others advice was sought in emergencies (2 Sam. xiv. 2, xx. 16-22). They took their part in matters of public interest (Ex. xv. 20; 1 Sam. xviii. 6, 7): in short, they enjoyed as much freedom in ordinary life as the women of our own country.

If such was her general position, it is certain that the wife must have exercised an important influence in her own home. She appears to have taken her part in family affairs, and even to have enjoyed a considerable amount of independence. For instance, she entertains guests at her own desire (2 K. iv. 8) in the absence of her husband (Judg. iv. 18), and sometimes even in defiance of his wishes (1 Sam. xxv. 14, &c.); she disposes of her child by a vow without any reference to her husband (1 Sam. i. 24): she consults with him as to the marriage of her children (Gen. xxvii. 46): her suggestions as to any domestic arrangements meet with due attention (2 K. iv. 9): and occasionally she criticizes the conduct of her husband in terms of great severity (1 Sam. xxv. 25; 2 Sam. vi. 20).

The relations of husband and wife appear to have been characterized by affection and tenderness. He is occasionally described as the "friend" of his wife (Jer. iii. 20; Hos. iii. 1), and his love for her is frequently noticed (Gen. xxiv. 67, xxix. 18). On the other hand, the wife was the consolation of the husband in time of trouble (Gen. xxiv. 67), and her grief at his loss presented a picture of the most abject woe (Joel i. 8). No stronger testimony, however, can be afforded as to the ardent affection of husband and wife, than that which we derive from the general tenor of the book of Canticles. At the same time we cannot but think that the exceptions to this state of affairs were more numerous than is consistent with our ideas of matrimonial happiness. One of the evils inseparable from polygamy is the discomfort arising from the jealousies and quarrels of the several wives, as instanced in the households of Abraham and Elkanah (Gen. xxi. 11; 1 Sam. i. 6). The purchase of wives, and the small amount of liberty allowed to daughters in the choice of husbands, must inevitably have led to unhappy unions. The allusions to the misery of a contentious and brawling wife in the Proverbs (xix. 13, xxi. 9, 19, xxvii. 15) convey the impression that the infliction was of frequent occurrence in Hebrew households, and in the Mishna (*Ketub. 7, § 6*) the fact of a woman being noisy is laid down as an adequate ground for divorce. In the N. T. the mutual relations of husband and wife are a subject of frequent exhortation (Eph. v. 22-33; Col. iii. 18, 19; Tit. ii. 4, 5; 1 Pet. iii. 1-7): it is certainly a noticeable coincidence that these exhortations should be found exclusively in the epistles addressed to Asiatics, nor is it improbable that they

<sup>a</sup> חופה. The term occurs in the Mishna (*Ketub. 4, § 5*), and is explained by some of the Jewish commentators to have been a bower of roses and myrtles.

The term was also applied to the canopy under which the nuptial benediction was pronounced, or to the robe spread over the heads of the bride and bridegroom (Selden, ii. 15).

were more particularly needed for them than for Europeans.

The duties of the wife in the Hebrew household were multifarious: in addition to the general superintendence of the domestic arrangements, such as cooking, from which even women of rank were not exempted (Gen. xviii. 6; 2 Sam. xiii. 8), and the distribution of food at meal-times (Prov. xxxi. 15), the manufacture of the clothing and the various textures required in an eastern establishment devolved upon her (Prov. xxxi. 13, 21, 22), and if she were a model of activity and skill, she produced a surplus of fine linen shirts and girdles, which she sold, and so, like a well-freighted merchant-ship, brought in wealth to her husband from afar (Prov. xxxi. 14, 24). The poetical description of a good housewife drawn in the last chapter of the Proverbs is both filled up and in some measure illustrated by the following minute description of a wife's duties towards her husband, as laid down in the Mishna: "She must grind corn, and bake, and wash, and cook, and suckle his child, make his bed, and work in wool. If she brought her husband one bondwoman, she need not grind, bake, or wash: if two, she need not cook nor suckle his child: if three, she need not make his bed nor work in wool: if four, she may sit in her chair of state" (*Ketub. 5, § 5*). Whatever money she earned by her labor belonged to her husband (*ib. 6, § 1*). The qualification not only of working, but of working at home (*Tit. ii. 5*, where *οικουργός* is preferable to *οικουρός*), was insisted on in the wife, and to spin in the street was regarded as a violation of Jewish customs (*Ketub. 7, § 6*).

The legal rights of the wife are noticed in Ex. xxi. 10, under the three heads of food, raiment, and duty of marriage or conjugal right. These were defined with great precision by the Jewish doctors; for thus only could one of the most cruel effects of polygamy be averted, namely, the sacrifice of the rights of the many in favor of the one whom the lord of the modern *harem* selects for his special attention. The regulations of the Talmudists founded on Ex. xxi. 10 may be found in the Mishna (*Ketub. 5, § 6-9*).

V. The allegorical and typical allusions to marriage have exclusive reference to one subject, namely, to exhibit the spiritual relationship between God and his people. The earliest form, in which the image is implied, is in the expression "to go a whoring," and "whoredom," as descriptive of the rupture of that relationship by acts of idolatry. These expressions have by some writers been taken in their primary and literal sense, as pointing to the licentious practices of idolaters. But this destroys the whole point of the comparison, and is opposed to the plain language of Scripture: for (1) Israel is described as the false wife "playing the harlot" (Is. i. 21; Jer. iii. 1, 6, 8); (2) Jehovah is the injured husband, who therefore divorces her (Ps. lxxiii. 27; Jer. ii. 20; Hos. iv. 12, ix. 1); and (3) the other party in the adultery is specified, sometimes generally, as idols or false gods (Deut. xxxi. 16; Judg. ii. 17; 1 Chr. v. 25; Ez. xx. 30, xxiii. 30), and sometimes particularly, as in the case of the worship of goats (A. V.

"devils," Lev. xvii. 7), Molech (Lev. xx. 5), wizards (Lev. xx. 6), an ephod (Judg. viii. 27), Baalim (Judg. viii. 33), and even the heart and eyes (Num. xv. 39) — the last of these objects being such as wholly to exclude the idea of actual adultery. The image is drawn out more at length by Ezekiel (xxiii.), who compares the kingdoms of Samaria and Judah to the harlots Aholah and Aholibah; and again by Hosea (i.-iii.), whose marriage with an adulterous wife, his separation from her, and subsequent reunion with her, were designed to be a visible lesson to the Israelites of their dealings with Jehovah.

The direct comparison with marriage is confined in the O. T. to the prophetic writings, unless we regard the Canticles as an allegorical work. [CAN- TICLES.] The actual relation between Jehovah and his people is generally the point of comparison (Is. liv. 5, lxii. 4; Jer. iii. 14; Hos. ii. 19; Mal. ii. 11); but sometimes the graces consequent thereon are described under the image of bridal attire (Is. xlix. 18, lxi. 10), and the joy of Jehovah in his Church under that of the joy of a bridegroom (Is. lxii. 5).

In the N. T. the image of the bridegroom is transferred from Jehovah to Christ (Matt. ix. 15; John iii. 29), and that of the bride to the Church (2 Cor. xi. 2; Rev. xix. 7, xxi. 2, 9, xxii. 17), and the comparison thus established is converted by St. Paul into an illustration of the position and mutual duties of man and wife (Eph. v. 23-32). The suddenness of the Messiah's appearing, particularly at the last day, and the necessity of watchfulness, are inculcated in the parable of the Ten Virgins, the imagery of which is borrowed from the customs of the marriage ceremony (Matt. xxv. 1-13). The Father prepares the marriage feast for his Son, the joys that result from the union being thus represented (Matt. xxii. 1-14, xxv. 10; Rev. xix. 9; comp. Matt. viii. 11), while the qualifications requisite for admission into that union are prefigured by the marriage garment (Matt. xxii. 11). The breach of the union is, as before, described as fornication or whoredom in reference to the mystical Babylon (Rev. xvii. 1, 2, 5).

The chief authorities on this subject are Selden's *Uxor Ebraica*; Michaelis's *Commentaries*; the Mishna, particularly the books *Yebamoth*, *Ketuboth*, *Gittin*, and *Kubushin*; Buxtorf's *Sponsal. et Divort.* Among the writers on special points we may notice Benary, *de Hebr. Leviticis*, Berlin, 1835; Redslob's *Leviratsche*, Leipzig, 1833; and Kurtz's *Ehe des Hosea*, Dorpat, 1859.

W. L. B.

\* MARS' HILL, another name in the N. T. Acts xvii. 22, for Areopagus, ver. 19. The name is the same in Greek (*ἡ Ἀρειῶς πάγος*), and should be the same in English. The variation seems to be without design, or certainly without any distinction of meaning; for the translators remark in the margin against both passages that Areopagus was "the highest court in Athens." The older versions of Tyndale, Cranmer, and the Geneva render "Mars strete" in both places, while Wycliffe writes "Areopage." Against the view that Paul was arraigned and tried before the court,<sup>b</sup> as well

<sup>a</sup> The term *zānāh* (זָנָה), in its ordinary application, is almost without exception applied to the act of the woman. We may here notice the only exceptions to the ordinary sense of this term, namely, Is. xxiii. 17,

where it means "commerce," and Nah. iii. 4, where it is equivalent to "crafty policy," just as in 2 K. iv. 22 the parallel word is "witchcrafts."

<sup>b</sup> \* The modern Greeks in their disposition to re-

is on the topography of the subject, see AREOPAGUS. It is proposed here to give some account of the speech itself, which Paul delivered on this hill, and which has given to it a celebrity "above all Greek, above all Roman fame."

Scholars vie with each other in their commendation of this discourse. In its suggestiveness, depth of thought, cogent reasonings, eloquence, and remarkable adaptation to all the congruities of time and place, "although not the longest it is beyond question the first of all the recorded speeches of the great Apostle. De Wette pronounces it "a model of the apologetic style of discourse." "The address of Paul before this assembly," says Neander, "is a living proof of his apostolic wisdom and eloquence. We perceive here how the Apostle, according to his own expression, could become also a heathen to the heathen, that he might win the heathen to a reception of the gospel." "The skill," says Hensen, "with which he was able to bring the truth near to the Athenians, deserves admiration. We find in this discourse of Paul nothing of an ill-timed zeal, nothing like declamatory pomp. It is distinguished for clearness, brevity, coherence, and simplicity of representation." Some object that the speech has been overpraised because Paul was not enabled to bring it to a formal close. But in truth our astonishment is not that he was interrupted at length when he came to announce to them the Christian doctrine of a resurrection of the body, but that he held their attention so long while he exposed their errors and convicted them of the absurdity and sinfulness of their conduct.

The following is an outline of the general course of thought. The Apostle begins by declaring that the Athenians were more than ordinarily religious, and commends them for that trait of character. He had read on one of their altars an inscription <sup>b</sup> to "an unknown God." He recognizes in that acknowledgment the heart's testimony among the heathen themselves, that all men feel the limitations of their religious knowledge and their need of a more perfect revelation. It was saying to them in effect: "You are correct in acknowledging a divine existence beyond any which the ordinary rites of your worship recognize; there is such an existence. You are correct in confessing that this Being is unknown to you; you have no just conception of his nature and perfections." With this introduction he passes to his theme. "Whom therefore not knowing, ye worship, this one I announce unto you." He thus proposes to guide their religious instincts and aspirations to their proper object, *i. e.* to teach them what God is, his nature and attributes, and men's relations to Him, in opposition to their false views and practices as idolaters (ver. 23). In pursuance of this purpose he announces to them, first, that God is the Creator of the outward, material universe, and therefore not to be confounded with idols (ver. 24); secondly, that He is independent of his creatures, possessed of all sufficiency in Himself and in no need of costly gifts or offer-

store the ancient names of their history now call their highest appellate court the Ἄρειος πάγος (Areopagus). It consists of a πρόεδρος, or Chief Justice, and several σύνεδροι, or Associates, and holds its sessions at Athens. II.

a \* The speech if genuine must exhibit these correspondences; but with a strange perversity Baur (*Der Apost. Paulus*, p. 167 f.) admits their existence, and argues from them that the speech must be ficti-

ings of food and drink (ver. 25); thirdly, that He is the Creator of all mankind, notwithstanding their separation into so many nations, and their wide dispersion on the earth (ver. 26); and fourthly, that he has placed men, as individuals and nations, in such relations of dependence on Himself as render it easy for them to see that He is their Creator and Disposer; and that it is their duty to seek and serve Him (vv. 27, 28). The ground has thus been won for a direct application of the truth to his auditors. At this point of the discourse, as we may well suppose, stretching forth his hand towards the gorgeous images within sight, he exclaims: "We ought not, therefore, to suppose that the Deity is like unto gold, or silver, or stone, sculptured by the art and device of man" (ver. 29). Nor is this all. That which men ought not to do, they may not with impunity any longer do. It was owing to the forbearance of God that the heathen had been left hitherto to disown the true God, and transfer to idols the worship which belongs to Him. He had borne with them as if he had not seen their willful ignorance, and would not call them to account for it; but now, with a knowledge of the gospel, they were required to repent of their idolatry and forsake it (ver. 30), because a day of righteous retribution awaited them, of which they had assurance in the resurrection of Christ from the dead (ver. 31).

Here their clamors interrupted him; but it is not difficult to conjecture what was left unsaid. The recorded examples of his preaching show that he would have held up to them more distinctly the character of Christ as the Saviour of men, and have urged them to call on his name and be saved. It is impossible to say just in what sense the Apostle adduced the resurrection of Christ as proof of a general judgment. His resurrection from the dead confirmed the truth of all his claims, and one of these was that He was to be the judge of men (John v. 28, 29). His resurrection also established the possibility of such a resurrection of all men as was implied in the Apostle's doctrine, that all men are to be raised from the dead and stand before the judgment-seat of Christ. The Apostle may have had these and similar connections of the fact in his mind; but whether he had developed them so far, when he was silenced, that the Athenians perceived them all or any of them, is uncertain. It was enough to excite their scorn to hear of a single instance of resurrection. The Apostle's reference in his last words to a great day of assize for all mankind would no doubt recall to the hearers the judicial character of the place where they were assembled, but it was too essential a part of his train of thought to have been accidentally suggested by the place.

We are to recognize the predominant anti-polytheistic aim of the discourse in the prominence which Paul here gives to his doctrine with respect to the common parentage of the human race, while at the same time he thereby rebuked the Athenians for

fitions, on account of this remarkable fitness to the occasion. II.

b \* The Apostle's use of θεοειδαιμονοστέπων, at the opening of the speech, Dean Howson very justly points out as one of the proofs of his tact and versatility. (*See Lectures on the Character of St. Paul*, p. 45, i. 194, note a, Amer. ed.) Rev T. Kenrick's vindication of the rendering of the A. V. (*Biblical Essays*, pp. 108-129 Lond. 1864) shows only that the word admits of that sense. H.

their contempt of the other nations, especially of the Jews. If all are the children of a common parent, then the idea of a multiplicity of gods from whom the various nations have derived their origin, or whose protection they specially enjoy, must be false. The doctrine of the unity of the race is closely interwoven with that of the unity of the divine existence. But if all nations have the same Creator, it would at once occur that nothing can be more absurd than the feeling of superiority and contempt with which one affects to look down upon another. As the Apostle had to encounter the prejudice which was entertained against him as a foreigner and a Jew, his course of remark was doubly pertinent, if adapted at the same time to remove this hindrance to a candid reception of his message.

It will be seen from the foregoing sketch that it has been proposed, not without some justification, to arrange the contents of the discourse under the three heads of *theology*, *anthropology*, and *Christology*. At all events it will be seen, by casting the eye back, that we have here all the parts of a perfect discourse, namely, the exordium, the proposition or theme, the proof or exposition, and the application. It is a beautiful specimen of the manner in which a powerful and well-trained mind, practiced in public speaking, conforms spontaneously to the rules of the severest logic. One can readily believe, looking at this feature of the discourse, that it was pronounced by the man who wrote the epistles to the Romans and Galatians, where we see the same mental characteristics so strongly reflected. As we must suppose, on any view of the case, that

Mars' Hill, on the south side, and west from the Acropolis. (Photograph.)

the general scheme of thought, the *nexus* of the argument, has been preserved, it does not affect our critical judgment whether we maintain that the discourse has been reported in full, or that a synopsis only has been given.

It might have seemed to the credit of Christianity if Luke had represented the preaching of Paul as signally effective here at Athens, the centre of Grecian arts and refinement: on the contrary, he records no such triumphs.<sup>a</sup> The philosophers who heard him mocked: the people at large derided him as "a babbler." At the close of that day on which Paul delivered the speech it might seem as if he had spoken almost to no purpose. But the end is not yet. Our proper rule for judging here is that which makes "a thousand years with God as one day, and one day as a thousand years." We place ourselves again on the rock where Paul stood, and look around us, and how different a spectacle presents itself from that which met the Apostle's eye.

The monuments of idolatry on which he looked have disappeared. The gorgeous image of Minerva which towered aloft on the Acropolis, has been broken to pieces, and scattered to the winds. The temples at that time there so magnificent and full of idols,<sup>b</sup> remain only as splendid ruins, literally inhabited by the owls and the bats. Churches and chapels dedicated to Christian worship appear on every side, surmounted with the sign of that cross, which was "to the Jews a stumbling-block, and to the Greeks foolishness." This cross itself has become the national emblem, and gilds the future of these descendants of Paul's hearers with its brightest hopes. These and such results may indeed fall short of the highest spiritual effects of Christianity; but they show nevertheless the mighty change which has taken place in the religious ideas and civilization of pagan Greece, and bear witness to the power of St. Paul's seemingly ineffective speech on Mars' Hill. One must read the discourse on the spot, amid the

<sup>a</sup> \* It is worthy of notice that although Paul spent the next two years at Corinth, so near Athens that the Acropolis of the one city may be seen from the other, he did not during that time turn his steps again to Athens. On his third missionary tour, he came once more into this part of Greece, and on the way passed

Athens twice at least, and yet he did not revisit that city.

<sup>b</sup> \* Zeune (*ad Vig.* p. 638 a) points out the mis-translation of *κατείδωλον* by "given to idolatry," instead of "full of idols." It conceals from the reader a striking mark of Luke's accuracy. No ancient city was so famous for its images as Athens. 4

objects and associations which bring the past and present as it were into visible contact with each other, in order to understand and feel the impression of the contrast in its full extent.

Paul spoke of course in the open air. For a description of the scene under the Apostle's eye at the time, see Wordsworth's *Views of Greece, Pictorial, Descriptive, and Historical*, p. 85, also his *Athens and Attica*, ch. xi.; Robinson's *Bibl. Researches*, i. 10 f. (where the bearing of Mars' Hill from the Acropolis should be west, instead of north). For a view of the Acropolis restored, as seen from the Areopagus, see Conybeare and Howson's *Life and Letters of St. Paul*, i. 442. Stier treats at length of the discourse, exegetically and homiletically, in his *Reden der Apostel*, ii. 121-169. The events at Athens form an interesting sketch in Howson's *Scenes from the Life of St. Paul*, ch. vi. (Lond. 1866), and reprint by the American Tract Society (1868). Bentley's famous Sermons on Atheism and Deism (first of the series of Boyle Lectures, 1692) connect themselves almost historically with this address. Seven of the eight texts on which he founds the sermons are taken from Paul's Athenian speech. The topics on which the Apostle touched as the preacher enumerates them are "such as the existence, the spirituality, and all-sufficiency of God; the creation of the world; the origination of mankind from one common stock, according to the history of Moses; the divine Providence in overruling all nations and people; the new doctrine of repentance by the preaching of the gospel; the resurrection of the dead; and the appointed day of an universal judgment" (see his *Works*, iii. 33 f., Lond. 1838). We find here the germs of the best arguments employed in later times in controversies of the nature alluded to. Another later work furnishes a similar testimony. Mr. Merivale has recourse to Paul's sententious words for the principal text-mottos prefixed to his *Lectures on the Conversion of the Roman Empire* (Boyle Lectures for 1864). It is one of those speeches of the Apostle, "from all the ideas of which" (as Schneckemburger remarks of the one at Antioch, Acts xiii.) "may be drawn lines which terminate in his peculiar doctrinal teachings in the epistles" (*Stud. u. Krit.* 1855, p. 550). "Nothing can be more genuinely Pauline," says Lechler, "than the division here of history into its two great epochs, the pre-Messianic and post-Messianic, and the union of God's manifestations in creation, conscience, and redemption. It gives us in outline the fuller discussion in Rom. i. and ii." (*Das Apost. u. Nach. apost. Zeitalter*, p. 155). Ch. J. Trip refutes some of Baur's hypercritical objections to the genuineness of the speech (*Paulus nach der Apostelgesch.* p. 200 ff.). Other writers who may be consulted are F. W. Laufs, *Ueber die areopagische Rede des Apostels Paulus* (Stud. u. Krit., 1850, pp. 583-595); Williger's *Apostelgesch. in Bibelstunden*, pp. 506-526 (2<sup>te</sup> Aufl.); Lange's *Kirchengesch.* ii. 222 ff.; Gademann's "Theologische Studien," *Zeitschrift für luth. Theologie*, 1854, p. 648 ff.; Tholuck, *Gläubwürdigkeit*, p. 380 f.; Baumgarten, *Apostelgesch.* in loc.; and Pressensé, *Histoire de l'Église Chrétienne*, ii. 17-22. MAR'SENA (מַרְסֵנָה) [*worthy*, Pers., Fürst]:

Μαλισεῖρα: [Vat. FA.] Alex. Μαλλισεῖρα: *Marsena*, one of the seven princes of Persia, "wise men which knew the times," which saw the king's face and sat first in the kingdom (Esth. i. 14) According to Josephus they had the office of interpreters of the laws (*Ant.* xi. 6, § 1).

MARTHA (Μάρθα: *Martha*). This name, which does not appear in the O. T., belongs to the

later Aramaic, and is the feminine form of מַרְתָּא = Lord. We first meet with it towards the close of the 2d century b. c. Marius, the Roman dictator, was attended by a Syrian or Jewish prophetess Martha during the Numidian war and in his campaign against the Cimbri (Plutarch, *Marius*, xvii.). Of the Martha of the N. T. there is comparatively little to be said. What is known or conjectured as to the history of the family of which she was a member may be seen under LAZARUS. The facts recorded in Luke x. and John xi. indicate a character devout after the customary Jewish type of devotion, sharing in Messianic hopes and accepting Jesus as the Christ; sharing also in the popular belief in a resurrection (John xi. 24), but not rising, as her sister did, to the belief that Christ was making the eternal life to belong, not to the future only, but to the present. When she first comes before us in Luke x. 38, as receiving her Lord into her house (it is uncertain whether at Bethany or elsewhere), she loses the calmness of her spirit, is "cumbered with much serving," is "careful and troubled about many things." She is indignant that her sister and her Lord care so little for that for which she cares so much. She needs the reproof "one thing is needful;" but her love, though imperfect in its form, is yet recognized as true, and she too, no less than Lazarus and Mary, has the distinction of being one whom Jesus loved (John xi. 3). Her position here, it may be noticed, is obviously that of the elder sister, the head and manager of the household. It has been conjectured that she was the wife or widow of "Simon the leper" of Matt. xxvi. 6 and Mark xiv. 3 (Schultess, in *Winer, Reb.*; Paulus, in Meyer, in loc.; Gresswell, *Diss. on Village of Martha and Mary*). The same character shows itself in the history of John xi. She goes to meet Jesus as soon as she hears that He is coming, turning away from all the Pharisees and rulers who had come with their topics of consolation (vv. 19, 20). The same spirit of complaint that she had shown before finds utterance again (ver. 21), but there is now, what there was not before, a fuller faith at once in his wisdom and his power (ver. 22). And there is in that sorrow an education for her as well as for others. She rises from the formula of the Pharisee's creed to the confession which no "flesh and blood," no human traditions, could have revealed to her (vv. 24-27). It was an immense step upward from the dull stupor of a grief which refused to be comforted, that without any definite assurance of an immediate resurrection, she should now think of her brother as living still, never dying, because he had believed in Christ. The transition from vain fruitless regrets to this assured faith, accounts it may be for the words spoken by her at the sepulchre (ver. 39). We judge wrongly of her if we see in them the utterance of an impatient or desponding unbelief. The thought of that true victory over death has comforted her, and she is no longer expecting that the power of the eternal life will show itself in the renewal of the earthly. The wonder that followed

no less than the tears which preceded, taught her how deeply her Lord sympathized with the passionate human sorrows of which He had seemed to her so unmindful. It taught her, as it teaches us, that the eternal life in which she had learnt to believe was no absorption of the individual being in that of the spirit of the universe — that it recognized and embraced all true and pure affections.

Her name appears once again in the N. T. She is present at the supper at Bethany as "serving" (John xii. 2). The old character shows itself still, but it has been freed from evil. She is no longer "cumbered," no longer impatient. Activity has been calmed by trust. When other voices are raised against her sister's overflowing love, hers is not heard among them.

The traditions connected with Martha have been already mentioned. [LAZARUS.] She goes with her brother and other disciples to Marseilles, gathers round her a society of devout women, and, true to her former character, leads them to a life of active ministrations. The wilder Provençal legends make her victorious over a dragon that laid waste the country. The town of Tarascon boasted of possessing her remains, and claimed her as its patron saint (*Acta Sanctorum*, and *Brev. Rom.* in Jul. 29; Fabricii *Luz Evangel.* p. 388).

E. H. P.

\* **MARTYR** occurs only in Acts xxii. 15 as the translation of *μάρτυς*, the proper sense of which is simply "witness," without the accessory idea of sealing one's testimony by his death as understood by our stricter use of "martyr." All the older English versions (from Wycliffe, 1380, to the Rheims, 1582) have "witness" in this passage. It was not till after the age of the Apostles that the Greek word (*μάρτυρ* or *μάρτυς*) signified "martyr," though we see it in its transition to that meaning in Acts xxii. 20 and Rev. xvii. 6. Near the close of the second century it had become so honorable a title, that the Christians at Lyons, exposed to torture and death, and fearful that they might waver in the moment of extremity, refused to be called "martyrs" (*μάρτυρες*). "This name," said they, "properly belongs only to the true and faithful witness, the Prince of Life; or, at least, only to those whose testimony Christ has sealed by their constancy to the end. We are but poor, humble confessors, *i. e.* *ὁμολογοί*." (Euseb. *Hist. Eccles.* v. 2.) On *μάρτυς* see Cremer's *Wörterb. der Neutest. Gräcität*, p. 371 f.

H.

**MARY OF CLEOPHAS.** So in A. V., but accurately "of CLOPAS" (*Μαρία ἡ τοῦ Κλωπᾶ*). In St. John's Gospel we read that "there stood by the cross of Jesus his mother, and his mother's sister, Mary of Clopas, and Mary Magdalene" (John xix. 25). The same group of women is described by St. Matthew as consisting of Mary Magdalene, and Mary of James and Joseph, and the mother of Zebedee's children" (Matt. xxvii. 56); and by St. Mark, as "Mary Magdalene, and Mary of James the Little and of Joseph, and Salome" (Mark xv. 40). From a comparison of these passages, it appears that Mary of Clopas, and Mary

of James the Little and of Joseph, are the same person, and that she was the sister of St. Mary the Virgin. The arguments, preponderating on the affirmative side, for this Mary being (according to the A. V. translation) the *wife* of Clopas or Alphæus, and the *mother* of James the Little, Joseph, Jude, Simon, and their sisters, have been given under the heading **JAMES**. There is an apparent difficulty in the fact of two sisters seeming to bear the name of Mary. To escape this difficulty, it has been suggested (1) that the two clauses "his mother's sister" and "Mary of Clopas," are not in apposition, and that St. John meant to designate four persons as present — namely, the mother of Jesus; her sister, to whom he does not assign any name; Mary of Clopas; and Mary Magdalene (Lange). And it has been further suggested that this sister's name was Salome, wife of Zebedee (Wieseler). This is avoiding, not solving a difficulty. St. John could not have expressed himself as he does had he meant more than three persons. It has been suggested (2) that the word *ἀδελφή* is not here to be taken in its strict sense, but rather in the laxer acceptation, which it clearly does bear in other places. Mary, wife of Clopas, it has been said, was not the sister, but the cousin of St. Mary the Virgin (see Wordsworth, *Gk. Test.*, Preface to the Epistle of St. James). There is nothing in this suggestion which is objectionable, or which can be disproved. But it appears unnecessary and unlikely; unnecessary, because the fact of two sisters having the same name, though unusual, is not singular; and unlikely, because we find the two families so closely united — living together in the same house, and moving about together from place to place — that we are disposed rather to consider them connected by the nearer than the more distant tie. That it is far from impossible for two sisters to have the same name, may be seen by any one who will cast his eye over Betham's Genealogical Tables. To name no others, his eye will at once light on a pair of Antonias, and a pair of Octavias, the daughters of the same father, and in one case of different mothers, in the other of the same mother. If it be objected that these are merely gentile names, another table will give two Cleopatras. It is quite possible too that the same cause which operates at present in Spain, may have been at work formerly in Judæa. ΜΗΡΙΑΜ, the sister of Moses, may have been the holy woman after whom Jewish mothers called their daughters, just as Spanish mothers not unfrequently give the name of Mary to their children, male and female alike, in honor of St. Mary the Virgin.<sup>b</sup> This is on the hypothesis that the two names are identical, but on a close examination of the Greek text, we find that it is possible that this was not the case. St. Mary the Virgin is *Μαριάμ*; her sister is *Μαρία*. It is more than possible that these names are the Greek representatives of two forms which the antique *מָרְיָם* had then taken; and as in pronunciation the emphasis would have been thrown on the last syllable in *Μαριάμ*, while the final letter in *Μαρία* would have been almost unheard, there

<sup>a</sup> The form of the expression "Mary of Clopas," "Mary of James," in its more colloquial form "Clopas's Mary," "James's Mary," is familiar to every one acquainted with English village life. It is still a common thing for the unmarried, and sometimes for the married women of the laboring classes in a country town or village, to be distinguished from their namesakes, not

by their surnames, but by the name of their father or husband, or son, *e. g.* "William's Mary," "John's Mary," etc.

<sup>b</sup> Maria, Maria-Pia, and Maria-Immacolata, are the first names of three of the sisters of the late king of the Two Sicilies.

would, upon this hypothesis, have been a greater difference in the sisters' names than there is between Mary and Maria among ourselves.<sup>a</sup>

Mary of Clopas was probably the elder sister of the Lord's mother. It would seem that she had married Clopas or Alphaeus while her sister was still a girl. She had four sons, and at least three daughters. The names of the daughters are unknown to us: those of the sons are James, Josés, Jude, Simon, two of whom became enrolled among the twelve Apostles [JAMES], and a third (Simon) may have succeeded his brother in the charge of the Church of Jerusalem. Of Josés and the daughters we know nothing. Mary herself is brought before us for the first time on the day of the Crucifixion — in the parallel passages already quoted from St. Matthew, St. Mark, and St. John. In the evening of the same day we find her sitting desolately at the tomb with Mary Magdalene (Matt. xxvii. 61; Mark xv. 47), and at the dawn of Easter morning she was again there with sweet spices, which she had prepared on the Friday night (Matt. xxviii. 1; Mark xiv. 1; Luke xxiii. 50), and was one of those who had "a vision of angels, which said that He was alive" (Luke xxiv. 23). These are all the glimpses that we have of her. Clopas or Alphaeus is not mentioned at all, except as designating Mary and James. It is probable that he was dead before the ministry of our Lord commenced. Joseph, the husband of St. Mary the Virgin, was likewise dead; and the two widowed sisters, as was natural both for comfort and for protection, were in the custom of living together in one house. Thus the two families came to be regarded as one, and the children of Mary and Clopas were called the brothers and sisters of Jesus. How soon the two sisters commenced living together cannot be known. It is possible that her sister's house at Nazareth was St. Mary's home at the time of her marriage, for we never hear of the Virgin's parents. Or it may have been on their return from Egypt to Nazareth that Joseph and Mary took up their residence with Mary and Clopas. But it is more likely that the union of the two households took place after the death of Joseph and of Clopas. In the second year of our Lord's ministry, we find that they had been so long united as to be considered one by their fellow-townsmen (Matt. xiii. 55) and other Galileans (Matt. xii. 47). At whatever period it was that this joint housekeeping commenced, it would seem to have continued at Nazareth (Matt. xiii. 55) and at Capernaum (John ii. 12), and elsewhere, till St. John took St. Mary the Virgin to his own home in Jerusalem, A. D. 30. After this time Mary of Clopas would probably have continued living with St. James the Little and her other children at Jerusalem until her death. The fact of her name being omitted on all occasions on which her children and her sister are mentioned, save only on the days of the Crucifixion and the Resurrection, would indicate a retiring disposition, or perhaps an advanced

age. That his cousins were older than Jesus, and consequently that their mother was the elder sister of the Virgin, may be gathered as likely from Mark iii. 21, as it is not probable that if they had been younger than Jesus, they would have ventured to have attempted to interfere by force with Him for over exerting himself, as they thought, in the prosecution of his ministry. We may note that the Gnostic legends of the early ages, and the mediæval fables and revelations alike refuse to acknowledge the existence of a sister of St. Mary, as interfering with the miraculous conception and birth of the latter. F. M.

**MARY MAGDALENE** (*Μαρία ἡ Μαγδαλένη*: *Maria Magdalene*). Four different explanations have been given of this name. (1.) That which at first suggests itself as the most natural, that she came from the town of Magdala. The statement that the women with whom she journeyed, followed Jesus in Galilee (Mark xv. 41) agrees with this notion. (2.) Another explanation has been found in the fact that the Talmudic writers in their calumnies against the Nazarenes make mention of a Miriam Megaddela (*מגדל*), and deriving that word from the Piel of *גדל*, to twine, explain it as meaning "the twiner or plaiter of hair." They connect with this name a story which will be mentioned later; but the derivation has been accepted by Lightfoot (*Hor. Heb.* on Matt. xxvii. 56; *Harv. Evang.* on Luke viii. 2), as satisfactory, and pointing to the previous worldliness of "Miriam with the braided locks," as identical with "the woman that was a sinner" of Luke vii. 37. It has been urged in favor of this, that the *ἡ καλομένη* of Luke viii. 2 implies something peculiar, and is not used where the word that follows points only to origin or residence. (3.) Either seriously, or with the patristic fondness for *peronomasia*, Jerome sees in her name, and in that of her town, the old Migdol (= a watch-tower), and dwells on the coincidence accordingly. The name denotes the steadfastness of her faith. She is "vere *σπυγίτης*, vere *turris candoris* at Libani, *que prospicit in faciem Damasci*" (*Epist. ad Priscipianum*).<sup>b</sup> He is followed in this by later Latin writers, and the pun forms the theme of a panegyric sermon by Odo of Clugni (*Acta Sanctorum*, Antwerp, 1727, July 12). (4.) Origen, lastly, looking to the more common meaning of *גָּדוֹל* (*gadol*, to be great), sees in her name a prophecy of her spiritual greatness as having ministered to the Lord, and been the first witness of his resurrection (*Tract. in Matt.* xxxv.). It will be well to get a firm standing-ground in the facts that are definitely connected in the N. T. with Mary Magdalene before entering on the perplexed and bewildering conjectures that gather round her name.

I. She comes before us for the first time in Luke viii. 2. It was the custom of Jewish women

<sup>a</sup> The ordinary explanation that *Μαριάμ* is the Hebrew form, and *Μαρία* the Greek form, and that the difference is in the use of the Evangelists, not in the name itself, seems scarcely adequate: for why should the Evangelists invariably employ the Hebrew form when writing of St. Mary the Virgin, and the Greek form when writing about all the other Mariés in the Gospel history? It is true that this distinction is not constantly observed in the readings of the Codex Vaticanus, the Codex Ephraemi, and a few other MSS.:

but there is sufficient agreement in the majority of the Codices to determine the usage. That it is possible for a name to develop into several kindred forms, and for these forms to be considered sufficiently distinct appellations for two or more brothers or sisters, is evidenced by our daily experience.

<sup>b</sup> The writer is indebted for this quotation, and for one or two references in the course of the article, to the kindness of Mr. W. A. Wright.

Jerome on 1 Cor. ix. 5) to contribute to the support of Rabbis whom they revered, and in conformity with that custom, there were among the disciples of Jesus, women who "ministered unto Him of their substance." All appear to have occupied a position of comparative wealth. With all the chief motive was that of gratitude for their deliverance from "evil spirits and infirmities." Of Mary it is said specially that "seven devils (*δαίμονια*) went out of her," and the number indicates, as in Matt. xii. 45, and the "Legion" of the Gadarene demoniac (Mark v. 9), a possession of more than ordinary malignity. We must think of her, accordingly, as having had, in their most aggravated forms, some of the phenomena of mental and spiritual disease which we meet with in other demoniacs, the wretchedness of despair, the divided consciousness, the preternatural frenzy, the long-continued fits of silence. The appearance of the same description in Mark xvi. 9 (whatever opinion we may form as to the authorship of the closing section of that Gospel) indicates that this was the fact most intimately connected with her name in the minds of the early disciples. From that state of misery she had been set free by the presence of the Healer, and, in the absence, as we may infer, of other ties and duties, she found her safety and her blessedness in following Him. The silence of the Gospels as to the presence of these women at other periods of the Lord's ministry, makes it probable that they attended on Him chiefly in his more solemn progresses through the towns and villages of Galilee, while at other times he journeyed to and fro without any other attendants than the Twelve, and sometimes without even them. In the last journey to Jerusalem, to which so many had been looking with eager expectation, they again accompanied Him (Matt. xxvii. 55; Mark xv. 41; Luke xxiii. 55, xxiv. 10). It will explain much that follows if we remember that this life of ministration must have brought Mary Magdalene into companionship of the closest nature with Salome the mother of James and John (Mark xv. 40), and even also with Mary the mother of the Lord (John xix. 25). The women who thus devoted themselves are not prominent in the history: we have no record of their mode of life, or abode, or hopes or fears during the few momentous days that preceded the crucifixion. From that hour, they come forth for a brief two days' space into marvelous distinctness. They "stood afar off, beholding these things" (Luke xxiii. 49) during the closing hours of the Agony on the Cross. Mary Magdalene, Mary the mother of the Lord, and the beloved disciple were at one time not afar off, but close to the cross, within hearing. The same close association which drew them together there is seen afterwards. She remains by the cross till all is over, waits till the body is taken down, and wrapped in the linen cloth and placed in the garden-sepulchre of Joseph of Arimathea. She remains there in the dusk of the evening watching what she must have looked on as the final resting-place of the Prophet and Teacher whom she had honored (Matt. xxvii. 61; Mark xv. 47; Luke xxiii. 55). Not to her had there been given the hope of the Resurrection. The disciples to whom the words that

spoke of it had been addressed had failed to understand them, and were not likely to have reported them to her. The Sabbath that followed brought an enforced rest, but no sooner is the sunset over than she, with *Salome* and Mary the mother of James, "brought sweet spices that they might come and anoint" the body, the internment of which on the night of the crucifixion they looked on as hasty and provisional (Mark xvi. 1).

The next morning accordingly, in the earliest dawn (Matt. xxviii. 1; Mark xvi. 2), they come with Mary the mother of James, to the sepulchre. It would be out of place to enter here into the harmonistic discussions which gather round the history of the Resurrection. As far as they connect themselves with the name of Mary Magdalene, the one fact which St. John records is that of the chiefest interest. She had been to the tomb and had found it empty, had seen the "vision of angels" (Matt. xxviii. 5; Mark xvi. 5). To her, however, after the first moment of joy, it had seemed to be but a vision. She went with her cry of sorrow to Peter and *John* (let us remember that *Salome* had been with her), "they have taken away the Lord out of the sepulchre, and we know not where they have laid Him" (John xx. 1, 2). But she returns there. She follows Peter and John, and remains when they go back. The one thought that fills her mind is still that the body is not there. She has been robbed of that task of reverential love on which she had set her heart. The words of the angels can call out no other answer than that— "They have taken away my Lord, and I know not where they have laid Him" (John xx. 13). This intense brooding over one fixed thought was, we may venture to say, to one who had suffered as she had suffered, full of special danger, and called for a special discipline. The spirit must be raised out of its blank despair, or else the "seven devils" might come in once again, and the last state be worse than the first. The utter stupor of grief is shown in her want of power to recognize at first either the voice or the form of the Lord to whom she had ministered (John xx. 14, 15). At last her own name uttered by that voice as she had heard it uttered, it may be, in the hour of her deepest misery, recalls her to consciousness; and then follows the cry of recognition, with the strongest word of reverence which a woman of Israel could use, "*Rabboni*," and the rush forward to cling to his feet. That, however, is not the discipline she needs. Her love had been too dependent on the visible presence of her Master. She had the same lesson to learn as the other disciples. Though they had "known Christ after the flesh," they were "henceforth to know Him so no more." She was to hear that truth in its highest and sharpest form. "Touch me not, for I am not yet ascended to my Father." For a time, till the earthly affection had been raised to a heavenly one, she was to hold back. When He had finished his work and had ascended to the Father, there should be no barrier then to the fullest communion that the most devoted love could crave for. Those who sought, might draw near and touch Him then. He would be one with them, and they one with him.—It was fit that

\* The passage referred to is one of acknowledged difficulty. It is certainly an objection to the view proposed above that it represents our Lord as forbidding Mary to touch him, though he permitted the other women to whom he showed himself on their

return to the city, not only to approach him, but to hold him by the feet and worship him (Matt. xxviii. 9). It is to be noted that the verb which describes the act of the others (*ἐκράτησαν*) is a different one from that which describes the act denied to Mary (*μὴ*

this should be the last mention of Mary. The Evangelist, whose position, as the son of Salome, must have given him the fullest knowledge at once of the facts of her after-history, and of her inmost thoughts, bore witness by his silence, in this case as in that of Lazarus, to the truth that lives, such as theirs, were thenceforth "hid with Christ in God."

II. What follows will show how great a contrast there is between the spirit in which he wrote and that which shows itself in the later traditions. Out of these few facts there rise a multitude of wild conjectures; and with these there has been constructed a whole romance of hagiology.

The questions which meet us connect themselves with the narratives in the four Gospels of women who came with precious ointment to anoint the feet or the head of Jesus. Each Gospel contains an account of one such anointing; and men have asked, in endeavoring to construct a harmony, "Do they tell us of four distinct acts, or of three, or of two, or of one only? On any supposition but the last, are the distinct acts performed by the same or by different persons; and if by different, then by how many? Further, have we any grounds for identifying Mary Magdalene with the woman or with any one of the women whose acts are thus brought before us?" This opens a wide range of possible combinations, but the limits of the inquiry may, without much difficulty, be narrowed. Although the opinion seems to have been at one time maintained (Origen, *Tract. in Matt.* xxxv.), few would now hold that Matt. xxvi. and Mark xiv. are reports of two distinct events. Few, except critics bent, like Schleiermacher and Strauss, on getting up a case against the historical veracity of the Evangelists, could persuade themselves that the narrative of Luke vii., differing as it does in well-nigh every circumstance, is but a misplaced and embellished version of the incident which the first two Gospels connect with the last week of our Lord's ministry. The supposition that there were three anointings has found favor with Origen (*l. c.*) and Lightfoot (*Harm. Evang.* in loc., and *Hor. Heb.* in Matt. xxvi.); but while, on the one hand, it removed some harmonistic difficulties, there is, on the other,

something improbable to the verge of being inconceivable, in the repetition within three days of the same scene, at the same place, with precisely the same murmur and the same reproof. We are left to the conclusion adopted by the great majority of interpreters, that the Gospels record two anointings, one in some city unnamed (Capernaum or Nain have been suggested), during our Lord's Galilean ministry (Luke vii.), the other at Bethany, before the last entry into Jerusalem (Matt. xxvi.; Mark xiv.; John xii.). We come, then, to the question whether in these two narratives we meet with one woman or with two. The one passage adduced for the former conclusion is John xi. 2. It has been urged (Maldonatus in *Matt.* xxvi. and *Joan.* xi. 2, *Acta Sanctorum*, July 22d) that the words which we find there ("It was that Mary which anointed the Lord with ointment . . . whose brother Lazarus was sick") could not possibly refer by anticipation to the history which was about to follow in ch. xii., and must therefore presuppose some fact known through the other Gospels to the Church at large, and that fact, it is inferred, is found in the history of Luke vii. Against this it has been said on the other side, that the assumption thus made is entirely an arbitrary one, and that there is not the slightest trace of the life of Mary of Bethany ever having been one of open and flagrant impurity.<sup>a</sup>

There is, therefore, but slender evidence for the assumption that the two anointings were the acts of one and the same woman, and that woman the sister of Lazarus. There is, if possible, still less for the identification of Mary Magdalene with the chief actor in either history. (1.) When her name appears in Luke vii. 3 there is not one word to connect it with the history that immediately precedes. Though possible, it is at least unlikely that such an one as the "sinner" would at once have been received as the chosen companion of Joanna and Salome, and have gone from town to town with them and the disciples. Lastly, the description that is given—"Out of whom went seven devils"—points, as has been stated, to a form of suffering all but absolutely incompatible with the life implied in *ἀμαρτωλός*, and to a very

*μου ἄπτου*). This variation is of itself suggestive of a different purpose on the part of Mary in offering to touch him, and on the Saviour's part in interrupting the act.

Meyer on the basis of this difference in the language suggests another explanation, which deserves to be mentioned. It will be found in his remarks on John xx. 17 (*Comm.* pp. 499-502, 3te Auf.). He adopted a different view in his earlier studies. It should be observed that this imperative present form (*μὴ ἄπτου*) implies an incipient act either actually begun, or one on the point of being done, as indicated by some look or gesture.

Mary, it may well be supposed, was in the same perplexed state of mind on the appearance of Christ to her, which was evinced in so many different ways by the other disciples after the resurrection. She had already, it is true, exclaimed in the ecstasy of her joy, "Rabboni," but she may not yet have been certain as to the precise form or nature of the body in which she beheld her Lord. It is He, the Great Master, verily, she is assured; but is He corporeal, having really come forth out of the grave? Or is it his glorified spirit, having already gone up to God, but now having descended to her in its spiritual investiture? In this state of uncertainty she extends her hand to assure herself of the truth. She would procure for herself

by the criterion of the sense of touch the conviction which the eye is unable to give her. The Saviour knows her thoughts, and arrests the act. The act is unnecessary: his words are a sufficient proof of what she would know. He "had not yet ascended to the Father," as she half believed, and consequently has not the spiritual body which she supposed he might possibly have. He gives her by this declaration the assurance respecting his bodily state which she had proposed to gain for herself through the medium of sense. Her case was like that of Thomas, and yet unlike his; she wished, like him, to touch the object of her vision, but, unlike him, was not prompted by unbelief.

With this exegesis the confirmatory *οὐτω γὰρ ἀναβέβηκα* which follows has its logical justification. No explanation can be correct which fails to satisfy that condition.

II.

<sup>a</sup> The difficulty is hardly met by the pretentious conjecture of one commentator, that the word *ἀμαρτωλός* does not mean what it is commonly supposed to mean and that the "many sins" consisted chiefly (as the name Magdalene, according to the etymology noticed above, implies) in her giving too large a portion of the Sabbath to the braiding or plaiting of her hair! (Lamy in Lampe on John xii. 2.)

different work of healing from that of the divine words of pardon — "Thy sins be forgiven thee." To say, as has been said, that the "seven devils" are the "many sins" (Greg. Mag. *Hom. in Evang.* 25 and 53), is to identify two things which are separated in the whole tenor of the N. T. by the clearest line of demarcation. The argument that because Mary Magdalene is mentioned so soon afterwards she must be the same as the woman of Luke vii. (Butler's *Lives of the Saints*, July 22), is simply puerile. It would be just as reasonable to identify "the sinner" with Susanna. Never, perhaps, has a figment so utterly baseless obtained so wide an acceptance as that which we connect with the name of the "penitent Magdalene." It is to be regretted that the chapter-heading of the A. V. of Luke vii. should seem to give a quasi-authoritative sanction to a tradition so utterly uncertain, and that it should have been perpetuated in connection with a great work of mercy. (2.) The belief that Mary of Bethany and Mary Magdalene are identical is yet more startling. Not one single circumstance, except that of love and reverence for their Master, is common. The epithet Magdalene, whatever may be its meaning, seems chosen for the express purpose of distinguishing her from all other Marias. No one Evangelist gives the slightest hint of identity. St. Luke mentions Martha and her sister Mary in x. 38, 39, as though neither had been named before. St. John, who gives the fullest account of both, keeps their distinct individuality most prominent. The only *simulacrum* of an argument on behalf of the identity is that, if we do not admit it, we have no record of the sister of Lazarus having been a witness of the resurrection.

Nor is this lack of evidence in the N. T. itself compensated by any such weight of authority as would indicate a really trustworthy tradition. Two of the earliest writers who allude to the histories of the anointing — Clement of Alexandria (*Pædag.* ii. 8) and Tertullian (*de Pudic.* ch. 8) — say nothing that would imply that they accepted it. The language of Irenæus (iii. 4) is against it. Origen (*l. c.*) discusses the question fully, and rejects it. He is followed by the whole succession of the expositors of the Eastern Church: Theophilus of Antioch, Macarius, Chrysostom, Theophylact. The traditions of that Church, when they wandered into the regions of conjecture, took another direction, and suggested the identity of Mary Magdalene with the daughter of the Syro-Phœnician woman of Mark vii. 26 (Nicephorus, *H. E.* i. 33). In the Western Church, however, the other belief began to spread. At first it is mentioned hesitatingly, as by Ambrose (*de Virg. Vel. and in Luc.* lib. vi.), Jerome (*in Matt.* xxvi. 2; *contr. Jovin.* c. 16). Augustine at one time inclines to it (*de Consens. Evang.* c. 69), at another speaks very doubtfully (*Tract. in Joann.* 49). At the close of the first great period of Church history, Gregory the Great takes up both notions, embodies them in his Homilies (*in Ev.* 25, 53) and stamps them with his authority. The reverence felt for him, and the constant use of his works as a text-book of theology during the whole mediæval period, secured for the hypothesis a currency which it never would have gained on its own merits. The services of the feast of St. Mary Magdalene were constructed on the assumption of its truth (*Brev. Rom. in Jul.* 2. 22). Hymns and paintings and sculptures fixed it deep in the minds of the Western nations, France

and England being foremost in their reverence for the saint whose history appealed to their sympathies. (See below.) Well-nigh all ecclesiastical writers, after the time of Gregory the Great (Albert the Great and Thomas Aquinas are exceptions), take it for granted. When it was first questioned by Fèvre d'Étaples (Faber Stapulensis) in the early Biblical criticism of the 16th century, the new opinion was formally condemned by the Sorbonne (*Acta Sanctorum*, l. c.), and denounced by Bishop Fisher of Rochester. The Prayer-book of 1549 follows in the wake of the Breviary; but in that of 1552, either on account of the uncertainty or for other reasons, the feast disappears. The Book of Homilies gives a doubtful testimony. In one passage the "sinful woman" is mentioned without any notice of her being the same as the Magdalene (*Serm. on Repentance*, Part ii.); in another it depends upon a comma whether the two are distinguished or identified (*ibid.* Part ii.). The translators under James I., as has been stated, adopted the received tradition. Since that period there has been a gradually accumulating *consensus* against it. Calvin, Grotius, Hammond, Casaubon, among older critics, Bengel, Lampe, Greswell, Alford, Wordsworth, Stier, Meyer, Ellicott, Olshausen, among later, agree in rejecting it. Romanist writers even (Tillemont, Dupin, Estius) have borne their protest against it in whole or in part; and books that represent the present teaching of the Gallican Church reject entirely the identification of the two Marias as an unhappy mistake (Migne, *Dict. de la Bible*). The mediæval tradition has, however, found defenders in Baronius, the writers of the *Acta Sanctorum*, Maldonatus, Bishop Andrews, Lightfoot, Isaac Williams, and Dr. Pusey.

It remains to give the substance of the legend formed out of these combinations. At some time before the commencement of our Lord's ministry, a great sorrow fell upon the household of Bethany. The younger of the two sisters fell from her purity and sank into the depths of shame. Her life was that of one possessed by the "seven devils" of uncleanness. From the city to which she then went, or from her harlot-like adornments, she was known by the new name of Magdalene. Then she hears of the Deliverer, and repents and loves and is forgiven. Then she is received at once into the fellowship of the holy women and ministers to the Lord, and is received back again by her sister and dwells with her, and shows that she has chosen the good part. The death of Lazarus and his return to life are new motives to her gratitude and love; and she shows them, as she had shown them before, anointing no longer the feet only, but the head also of her Lord. She watches by the cross, and is present at the sepulchre and witnesses the resurrection. Then (the legend goes on, when the work of fantastic combination is completed), after some years of waiting, she goes with Lazarus and Martha and Maximin (one of the Seventy) to Marseilles [comp. LAZARUS]. They land there; and she, leaving Martha to more active work, retires to a cave in the neighborhood of Arles, and there leads a life of penitence for thirty years. When she dies a church is built in her honor, and miracles are wrought at her tomb. Clovis the Frank is healed by her intercession, and his new faith is strengthened; and the chivalry of France does homage to her name as to that of the greater Mary.

Such was the full-grown form of the Western story. In the East there was a different tradition

Nicéphorus (*H. E.* ii. 10) states that she went to Rome to accuse Pilate for his unrighteous judgment; Modestus, patriarch of Constantinople (*Hom. in Marias*), that she came to Ephesus with the Virgin and St. John, and died and was buried there. The Emperor Leo the Philosopher (circ. 890) brought her body from that city to Constantinople (*Acta Sanctorum*, l. c.).

The name appears to have been conspicuous enough, either among the living members of the Church of Jerusalem or in their written records, to attract the notice of their Jewish opponents. The Talmudists record a tradition, confused enough, that Stada or Satda, whom they represent as the mother of the Prophet of Nazareth, was known by this name as a "plaiter or twiner of hair;" that she was the wife of Paphus Ben-Jehudah, a contemporary of Gamaliel, Joshua, and Akiba; and that she grieved and angered him by her wantonness (*Lightfoot, Hor. Heb.* on Matt. xxvi., *Hom. Evng.* on Luke viii. 3). It seems, however, from the fuller report given by Eisenmenger, that there were two women to whom the Talmudists gave this name, and the wife of Paphus is not the one whom they identified with the Mary Magdalene of the Gospels (*Entleckt. Judenth.* i. 277).

There is lastly the strange supposition (rising out of an attempt to evade some of the harmonistic difficulties of the resurrection history), that there were two women both known by this name, and both among those who went early to the sepulchre (*Lampe, Comm.* in Joann.; *Ambrose, Comm.* in Luc. x. 24). E. H. P.

**MARY, MOTHER OF MARK.** The woman known by this description must have been among the earliest disciples. We learn from Col. iv. 10 that she was sister to Barnabas, and it would appear from Acts iv. 37, xii. 12, that, while the brother gave up his land and brought the proceeds of the sale into the common treasury of the Church, the sister gave up her house to be used as one of its chief places of meeting. The fact that Peter goes to that house on his release from prison indicates that there was some special intimacy (Acts xii. 12) between them, and this is confirmed by the language which he uses towards Mark as being his "son" (1 Pet. v. 13). She, it may be added, must have been, like Barnabas, of the tribe of Levi, and may have been connected, as he was, with Cyprus (Acts iv. 36). It has been surmised that filial anxiety about her welfare during the persecutions and the famine which harassed the Church at Jerusalem, was the chief cause of Mark's withdrawal from the missionary labors of Paul and Barnabas. The tradition of a later age represented the place of meeting for the disciples, and therefore probably the house of Mary, as having stood on the upper slope of Zion, and affirmed that it had been the scene of the wonder of the day of Pentecost, had escaped the general destruction of the city by Titus, and was still used as a church in the 4th century (*Epiphanius, de Pond. et Mens.* xiv.; *Cyril. Hierosol. Catech.* xvi.). E. H. P.

**MARY, SISTER OF LAZARUS.** For much of the information connected with this name, comp. LAZARUS and MARY MAGDALENE. The facts strictly personal to her are but few. She and her sister Martha appear in Luke x. 40, as receiving Christ in their house. The contrasted temperaments of the two sisters have been already in part discussed [MARTHA]. Mary sat listening eagerly

for every word that fell from the Divine Teacher. She had chosen the good part, the life that has found its unity, the "one thing needful," in rising from the earthly to the heavenly, no longer distracted by the "many things" of earth. The same character shows itself in the history of John xi. Her grief is deeper but less active. She sits still in the house. She will not go to meet the friends who come on the formal visit of consolation. But when her sister tells her secretly "The Master is come and calleth for thee," she rises quickly and goes forth at once (John xi. 20, 28). Those who have watched the depth of her grief have but one explanation for the sudden change: "She goeth to the grave to weep there!" Her first thought when she sees the Teacher in whose power and love she had trusted, is one of complaint. "She fell down at his feet, saying, Lord, if thou hadst been here, my brother had not died." Up to this point, her relation to the Divine Friend had been one of reverence, receiving rather than giving, blessed in the consciousness of his favor. But the great joy and love which her brother's return to life calls up in her, pour themselves out in larger measure than had been seen before. The treasured alabaster-box of ointment is brought forth at the final feast of Bethany, John xii. 3. St. Matthew and St. Mark keep back her name. St. John records it as though the reason for the silence held good no longer. Of her he had nothing more to tell. The education of her spirit was completed. The love which had been recipient and contemplative shows itself in action.

Of her after-history we know nothing. The ecclesiastical traditions about her are based on the unfounded hypothesis of her identity with Mary Magdalene. E. H. P.

**MARY THE VIRGIN** (*Μαριάμ*: on the form of the name see p. 1811). There is no person perhaps in sacred or in profane literature, around whom so many legends have been grouped as the Virgin Mary; and there are few whose authentic history is more concise. The very simplicity of the evangelical record has no doubt been one cause of the abundance of the legendary matter of which she forms the central figure. Imagination had to be called in to supply a craving which authentic narrative did not satisfy. We shall divide her life into three periods. I. The period of her childhood, up to the time of the birth of our Lord. II. The period of her middle age, contemporary with the Bible Record. III. The period subsequent to the Ascension. The first and last of these are wholly legendary, except in regard to one fact mentioned in the Acts of the Apostles; the second will contain her real history. For the first period we shall have to rely on the early apocryphal gospels; for the second on the Bible; for the third on the traditions and tales which had an origin external to the Church, but after a time were transplanted within her boundaries, and there flourished and increased both by the force of natural growth, and by the accretions which from time to time resulted from supposed visions and revelations.

I. *The childhood of Mary, wholly legendary.*— Joachim and Anna were both of the race of David. The abode of the former was Nazareth; the latter passed her early years at Bethlehem. They lived piously in the sight of God, and faultlessly before man, dividing their substance into three portions one of which they devoted to the service of the

Temple, another to the poor, and the third to their own wants. And so twenty years of their lives passed silently away. But at the end of this period Joachim went to Jerusalem with some others of his tribe, to make his usual offering at the Feast of the Dedication. And it chanced that Issachar was high-priest (Gospel of Birth of Mary); that Reuben was high-priest (Protevangelion). And the high-priest scorned Joachim, and drove him roughly away, asking how he dared to present himself in company with those who had children, while he had none; and he refused to accept his offerings until he should have begotten a child, for the Scripture said, "Cursed is every one who does not beget a man-child in Israel." And Joachim was shamed before his friends and neighbors, and he retired into the wilderness and fixed his tent there, and fasted forty days and forty nights. And at the end of this period an angel appeared to him, and told him that his wife should conceive, and should bring forth a daughter, and he should call her name Mary. Anna meantime was much distressed at her husband's absence, and being reproached by her maid Judith with her barrenness, she was overcome with grief of spirit. And in her sadness she went into her garden to walk, dressed in her wedding-dress. And she sat down under a laurel-tree, and looked up and spied among the branches a sparrow's nest, and she bemoaned herself as more miserable than the very birds, for they were fruitful and she was barren; and she prayed that she might have a child even as Sarai was blessed with Isaac. And two angels appeared to her, and promised her that she should have a child who should be spoken of in all the world. And Joachim returned joyfully to his home, and when the time was accomplished, Anna brought forth a daughter, and they called her name Mary. Now the child Mary increased in strength day by day, and at nine months of age she walked nine steps. And when she was three years old her parents brought her to the Temple, to dedicate her to the Lord. And there were fifteen stairs up to the Temple, and while Joseph and Mary were changing their dress, she walked up them without help; and the high-priest placed her upon the third step of the altar, and she danced with her feet, and all the house of Israel loved her. Then Mary remained at the Temple until she was twelve (Prot.) fourteen (G. B. M.) years old, ministered to by the angels, and advancing in perfection as in years. At this time the high-priest commanded all the virgins that were in the Temple to return to their homes and to be married. But Mary refused, for she said that she had vowed virginity to the Lord. Thus the high-priest was brought into a perplexity, and he had recourse to God to inquire what he should do. Then a voice from the ark answered him (G. B. M.), an angel spake unto him (Prot.); and they gathered together all the widowers in Israel (Prot.), all the marriageable men of the house of David (G. B. M.), and desired them to bring each man a rod. And amongst them came Joseph and brought his rod, but he shunned to present it, because he was an old man and had children. There-

fore the other rods were presented and no sign occurred. Then it was found that Joseph had not presented his rod; and behold, as soon as he had presented it, a dove came forth from the rod and flew upon the head of Joseph (Prot.); a dove came from heaven and pitched on the rod (G. B. M.). And Joseph, in spite of his reluctance, was compelled to betroth himself to Mary, and he returned to Bethlehem to make preparations for his marriage (G. B. M.); he betook himself to his occupation of building houses (Prot.); while Mary went back to her parents' house in Galilee. Then it chanced that the priests needed a new veil for the Temple, and seven virgins cast lots to make different parts of it; and the lot to spin the true purple fell to Mary. And she went out with a pitcher to draw water. And she heard a voice, saying unto her, "Hail, thou that art highly favored, the Lord is with thee. Blessed art thou among women!" and she looked round with trembling to see whence the voice came, and she laid down the pitcher and went into the house and took the purple and sat down to work at it. And behold the angel Gabriel stood by her and filled the chamber with prodigious light, and said, "Fear not," etc. And when Mary had finished the purple, she took it to the high-priest; and having received his blessing, went to visit her cousin Elizabeth, and returned back again." Then Joseph returned to his home from building houses (Prot.); came into Galilee, to marry the Virgin to whom he was betrothed (G. B. M.), and finding her with child, he resolved to put her away privily; but being warned in a dream, he relinquished his purpose, and took her to his house. Then came Annas the scribe to visit Joseph, and he went back and told the priest that Joseph had committed a great crime, for he had privately married the Virgin whom he had received out of the Temple, and had not made it known to the children of Israel. And the priest sent his servants, and they found that she was with child; and he called them to him, and Joseph denied that the child was his, and the priest made Joseph drink the bitter water of trial (Num. v. 18), and sent him to a mountainous place to see what would follow. But Joseph returned in perfect health, so the priest sent them away to their home. Then after three months Joseph put Mary on an ass to go to Bethlehem to be taxed; and as they were going, Mary besought him to take her down, and Joseph took her down and carried her into a cave, and leaving her there with his sons, he went to seek a midwife. And as he went he looked up, and he saw the clouds astonished and all creatures amazed. The fowls stopped in their flight; the working people sat at their food, but did not eat; the sheep stood still; the shepherds' lifted hands became fixed; the aids were touching the water with their mouths, but did not drink. And a midwife came down from the mountains, and Joseph took her with him to the cave, and a bright cloud overshadowed the cave, and the cloud became a bright light, and when the bright light faded, there appeared an infant at the breast of Mary. Then the midwife went out and told

<sup>a</sup> Three spots lay claim to be the scene of the Annunciation. Two of these are, as was to be expected, in Nazareth, and one, as every one knows, is in Italy. The Greeks and Latins each claim to be a guardians of the true spot in Palestine; the third claimant is the holy house of Loretto. The Greeks point out the spring of water mentioned in the Protevangelion as

confirmatory of their claim. The Latins have engraved on a marble slab in the grotto of their convent in Nazareth the words *Verbum hic caro factum est*, and point out the pillar which marks the spot where the angel stood; whilst the Head of their Church is irretrievably committed to the wild legend of Loretto (See Stanley, S. § P. ch. xiv.)

Salome that a Virgin had brought forth, and Salome would not believe; and they came back again into the cave, and Salome received satisfaction, but her hand withered away, nor was it restored, until, by the command of an angel, she touched the child, whereupon she was straightway cured. (Giles, *Codex Apocryphus Novi Testamenti*, pp. 33-47 and 66-81, Lond. 1852; Jones, *On the New Testament*, ii. c. xiii. and xv., Oxf. 1827; Thilo, *Codex Apocryphus*. See also *Vita gloriosissimæ Matris Annæ per F. Petrum Dorland*, appended to Ludolph of Saxony's *Vita Christi*, Lyons, 1642; and a most audacious *Historia Christi*, written in Persian by the Jesuit P. Jerome Xavier, and exposed by Louis de Dieu, Lugd. Bat. 1639.)

II. *The real history of Mary.*—We now pass from legend to that period of St. Mary's life which is made known to us by Holy Scripture. In order to give a single view of all that we know of her who was chosen to be the mother of the Saviour, we shall in the present section put together the whole of her authentic history, supplementing it afterwards by the more prominent legendary circumstances which are handed down.

We are wholly ignorant of the name and occupation of St. Mary's parents. If the genealogy given by St. Luke is that of St. Mary (Greswell, *etc.*), her father's name was Heli, which is another form of the name given to her legendary father, Jehoiakim or Joachim. If Jacob and Heli were the two sons of Matthan or Matthat, and if Joseph, being the son of the younger brother, married his cousin, the daughter of the elder brother (Hervey, *Genealogies of our Lord Jesus Christ*), her father was Jacob. The Evangelist does not tell us, and we cannot know. She was, like Joseph, of the tribe of Judah, and of the lineage of David (Ps. cxxiii. 11; Luke i. 32; Rom. i. 3). She had a sister, named probably like herself, Mary (John xix. 25) [MARY OF CLEOPHAS], and she was connected by marriage (*συγγενής*, Luke i. 36) with Elisabeth, who was of the tribe of Levi and of the lineage of Aaron. This is all that we know of her antecedents.

In the summer of the year which is known as B. C. 5. Mary was living at Nazareth, probably at her parents'—possibly at her elder sister's—house, not having yet been taken by Joseph to his home. She was at this time betrothed to Joseph and was therefore regarded by the Jewish law and custom as his wife, though he had not yet a husband's rights over her. [MARRIAGE, p. 1804.] At this time the angel Gabriel came to her with a message from God, and announced to her that she was to be the mother of the long expected Messiah. He probably bore the form of an ordinary man, like the angels who manifested themselves to Gideon and to Manoah (Judg. vi., xiii.). This would appear both from the expression *εισελθών*, "he came in;" and also from the fact of her being troubled, not at his presence, but at the meaning of his words. The scene as well as the salutation is very similar to that recounted in the Book of Daniel, "Then there came again and touched me one like the appearance of a man, and he strengthened me, and said, O man greatly beloved, fear not: peace be unto thee, be strong, yea, be strong!" (Dan. x. 18, 19). The exact meaning of *κεχαριτωμένη* is "thou that hast bestowed upon thee a new gift of grace." The A. V. rendering of "highly favored" is therefore very exact and much nearer to the original than the "*gratia plena*" of the

Vulgate, on which a huge and wholly unsubstantial edifice has been built by Romanist devotional writers. The next part of the salutation, "The Lord is with thee," would probably have been better translated, "The Lord be with thee." It is the same salutation as that with which the angel accosts Gideon (Judg. vi. 12). "Blessed art thou among women" is nearly the same expression as that used by Ozias to Judith (Jud. xiii. 18). Joseph proceeds to instruct Mary that by the operation of the Holy Ghost the everlasting Son of the Father should be born of her; that in Him the prophecies relative to David's throne and kingdom should be accomplished; and that his name was to be called Jesus. He further informs her, perhaps as a sign by which she might convince herself that his prediction with regard to herself would come true, that her relative Elisabeth was within three months of being delivered of a child.

The angel left Mary, and she set off to visit Elisabeth either at Hebron or JUTTAI (whichever way we understand the *εις την ορεινην εις πόλιν 'Ιουδα*, Luke i. 39), where the latter lived with her husband Zacharias, about 20 miles to the south of Jerusalem, and therefore at a very considerable distance from Nazareth. Immediately on her entrance into the house she was saluted by Elisabeth as the mother of her Lord, and had evidence of the truth of the angel's saying with regard to her cousin. She embodied her feelings of exultation and thankfulness in the hymn known under the name of the *Magnificat*. Whether this was uttered by immediate inspiration, in reply to Elisabeth's salutation, or composed during her journey from Nazareth, or was written at a later period of her three months' visit at Hebron, does not appear for certain. The hymn is founded on Hannah's song of thankfulness (1 Sam. ii. 1-10), and exhibits an intimate knowledge of the Psalms, prophetic writings, and books of Moses, from which sources almost every expression in it is drawn. The most remarkable clause, "From henceforth all generations shall call me blessed," is borrowed from Leah's exclamation on the birth of Asher (Gen. xxx. 13). The same sentiment and expression are also found in Prov. xxxi. 28; Mal. iii. 12; Jas. v. 11. In the latter place the word *μακαρίζω* is rendered with great exactness "count happy." The notion that there is conveyed in the word any anticipation of her bearing the title of "Blessed" arises solely from ignorance.

Mary returned to Nazareth shortly before the birth of John the Baptist, and continued living at her own home. In the course of a few months Joseph became aware that she was with child, and determined on giving her a bill of divorcement, instead of yielding her up to the law to suffer the penalty which he supposed that she had incurred. Being, however, warned and satisfied by an angel who appeared to him in a dream, he took her to his own house. It was soon after this, as it would seem, that Augustus' decree was promulgated, and Joseph and Mary travelled to Bethlehem to have their names enrolled in the registers (B. C. 4) by way of preparation for the taxing, which however was not completed till ten years afterwards (A. D. 6), in the governorship of Quirinus. They reached Bethlehem, and there Mary brought forth the Saviour of the world, and humbly laid him in a manger.

The visit of the shepherds, the circumcision, the adoration of the wise men, and the presentation in

the Temple, are rather scenes in the life of Christ than in that of his mother. The presentation in the Temple might not take place till forty days after the birth of the child. During this period the mother, according to the law of Moses, was unclean (Lev. xii.). In the present case there could be no necessity for offering the sacrifice and making atonement beyond that of obedience to the Mosaic precept; but already He, and his mother for Him, were acting upon the principle of fulfilling all righteousness. The poverty of St. Mary and Joseph, it may be noted, is shown by their making the offering of the poor. The song of Simeon and the thanksgiving of Anna, like the wonder of the shepherds and the adoration of the magi, only incidentally refer to Mary. One passage alone in Simeon's address is specially directed to her, "Yea a sword shall pierce through thy own soul also." The exact purport of these words is doubtful. A common patristic explanation refers them to the pang of unbelief which shot through her bosom on seeing her Son expire on the cross (Tertullian, Origen, Basil, Cyril, etc.). By modern interpreters it is more commonly referred to the pangs of grief which she experienced on witnessing the sufferings of her Son.

In the flight into Egypt, Mary and the babe had the support and protection of Joseph, as well as in their return from thence, in the following year, on the death of Herod the Great (n. c. 3).<sup>a</sup> It appears to have been the intention of Joseph to have settled at Bethlehem at this time, as his home at Nazareth had been broken up for more than a year; but on finding how Herod's dominions had been disposed of, he changed his mind and returned to his old place of abode, thinking that the child's life would be safer in the tetrarchy of Antipas than in that of Archelaus. It is possible that Joseph might have been himself a native of Bethlehem, and that before this time he had been only a visitor at Nazareth, drawn thither by his betrothal and marriage. In that case, his fear of Archelaus would make him exchange his own native town for that of Mary. It may be that the holy family at this time took up their residence in the house of Mary's sister, the wife of Clopas.

Henceforward, until the beginning of our Lord's ministry — i. e. from B. C. 3 to A. D. 26 — we may picture St. Mary to ourselves as living in Nazareth, in a humble sphere of life, the wife of Joseph the carpenter, pondering over the sayings of the angels, of the shepherds, of Simeon, and those of her Son, as the latter "increased in wisdom and stature and in favor with God and man" (Luke ii. 52). Two circumstances alone, so far as we know, broke in on the otherwise even flow of the still waters of her life. One of these was the temporary loss of her Son when he remained behind in Jerusalem, A. D. 8. The other was the death of Joseph. The exact date of this last event we cannot determine. But it was probably not long after the other.

From the time at which our Lord's ministry commenced, St. Mary is withdrawn almost wholly from sight. Four times only is 'he veil removed, which, not surely without a reason, is thrown over her. These four occasions are — 1. The marriage at Cana of Galilee (John ii.). 2. The attempt which she and his brethren made "to speak with him" (Matt. xii. 46; Mark iii. 21 and 31; Luke viii. 19). 3. The Crucifixion. 4. The days succeeding the Ascension (Acts i. 14). If to these we add two references to her, the first by her Nazarene fellow-citizens (Matt. xiii. 54, 55; Mark vi. 1-3), the second by a woman in the multitude (Luke xi. 27), we have specified every event known to us in her life. It is noticeable that, on every occasion of our Lord's addressing her, or speaking of her, there is a sound of reproof in his words, with the exception of the last words spoken to her from the cross.

1. The marriage at Cana in Galilee took place in the three months which intervened between the baptism of Christ and the passover of the year 27. When Jesus was found by his mother and Joseph in the Temple in the year 8, we find him repudiating the name of "father" as applied to Joseph. "Thy father and I have sought thee sorrowing" — "How is it that ye sought me? Wist ye not that I must be about" (not Joseph's and yours, but) "my Father's business?" (Luke ii. 48, 49). Now, in like manner, at his first miracle which inaugurates his ministry, He solemnly withdraws himself from the authority of his earthly mother. This is St. Augustine's explanation of the "What have I to do with thee? my hour is not yet come." It was his humanity, not his divinity, which came from Mary. While therefore He was acting in his divine character He could not acknowledge her, nor does He acknowledge her again until He was hanging on the cross, when, in that nature which He took from her, He was about to submit to death (St. Aug. *Comm. in Joan. Evang.* tract viii., vol. iii. p. 1455, ed. Migne, Paris, 1845). That the

words  $\tau\acute{\iota}\ \epsilon\mu\omicron\iota\ \kappa\alpha\iota\ \sigma\omicron\iota;$  =  $\text{מַה לִּי וְלָךְ}$ , imply reproof, is certain (cf. Matt. viii. 29; Mark i. 24; and I. X., Judg. xi. 12; 1 K. xvii. 18; 2 K. iii. 13), and such is the patristic explanation of them (see *Iren. Adv. Hær.* iii. 18; *Apud Bibl. Patr. Max.* tom. ii. pt. ii. 293; S. Chrys. *Hom. in Joan.* xxi.). But the reproof is of a gentle kind (Trench, *on the Miracles*, p. 102, Lond. 1856; Alford, *Comm.* in loc.; Wordsworth, *Comm.* in loc.). Mary seems to have understood it, and accordingly to have drawn back desiring the servants to pay attention to her divine Son (Olshausen, *Comm.* in loc.). The modern Romanist translation, "What is that to me and to thee?" is not a mistake, because it is a willful misrepresentation (Douay version; Orsini, *Life of Mary*, etc.; see *The Catholic Layman*, p. 117, Dublin, 1852).

2. Capernaum (John ii. 12), and Nazareth (Matt. iv. 13, xiii. 54; Mark vi. 1), appear to have been

<sup>a</sup> In the Gospel of the Infancy, which seems to date from the 2d century, innumerable miracles are made to attend on St. Mary and her Son during their sojourn in Egypt: e. g., Mary looked with pity on a woman who was possessed, and immediately Satan came out of her in the form of a young man, saying, "Woe is me because of thee, Mary, and thy Son!" In another occasion they fell in with two thieves, named Titus and Dumachus; and Titus was gentle, and Dumachus was harsh; the Lady Mary therefore

promised Titus that God should receive him on his right hand. And accordingly, thirty-three years afterwards, Titus was the penitent thief who was crucified on the right hand, and Dumachus was crucified on the left. These are sufficient as samples. Throughout the book we find St. Mary associated with her Son, in the strange freaks of power attributed to them, in a way which shows us whence the cultus of St. Mary took its origin. (See Jones, *on the New Test.*, vol. ii. Oxf. 1827 Giles, *Codex Apocryphus*; Thilo, *Codex Apocryphus*.)

the residence of St. Mary for a considerable period. The next time that she is brought before us we find her at Capernaum. It is the autumn of the year 28, more than a year and a half after the miracle wrought at the marriage feast in Cana. The Lord had in the mean time attended two feasts of the passover, and had twice made a circuit throughout Galilee, teaching and working miracles. His fame had spread, and crowds came pressing round him, so that he had not even time "to eat bread." Mary was still living with her sister, and her nephews and nieces, James, Josés, Simon, Jude, and their three sisters (Matt. xiii. 55); and she and they heard of the toils which He was undergoing, and they understood that He was denying himself every relaxation from his labors. Their human affection conquered their faith. They thought that He was killing himself, and with an indignation arising from love, they exclaimed that He was beside himself, and set off to bring Him home either by entreaty or compulsion.<sup>a</sup> He was surrounded by eager crowds, and they could not reach Him. They therefore sent a message, begging Him to allow them to speak to Him. This message was handed on from one person in the crowd to another, till at length it was reported aloud to Him. Again He refuses. Again He refuses to admit any authority on the part of his relatives, or any privilege on account of their relationship. "Who is my mother, and who are my brethren? and He stretched forth his hand toward his disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother" (Matt. xii. 48, 49). Comp. Theoph. in *Merc.* iii. 32; S. Chrys. *Hom.* xlii. in Matt.; S. Aug. in *Joan.* tract x., who all of them point out that the blessedness of St. Mary consists, not so much in having borne Christ, as in believing on Him and in obeying his words (see also *Quæst. et Resp. ad Orthod.* cxxxvi., *op. S. Just. Mart. in Bibl. Max. Patr.* tom. ii. pt. ii. p. 138). This indeed is the lesson taught directly by our Lord himself on the next occasion on which reference is made to St. Mary. It is now the spring of the year 30, and only about a month before the time of his crucifixion. Christ had set out on his last journey from Galilee, which was to end at Jerusalem. As He passes along, He, as usual, healed the sick, and preached the glad tidings of salvation. In the midst, or at the completion, of one of his addresses, a woman of the multitude, whose soul had been stirred by his words, cried out, "Blessed is the womb that bare thee, and the paps which thou hast sucked!" Immediately the Lord replied, "Yea rather, blessed are they that hear the word of God, and keep it" (Luke xi. 28). He does not either affirm or deny anything with regard to the direct bearing of the woman's exclamation, but passes that by as a thing indifferent, in order to point out in what alone the true blessedness of his mother and of all consists. This is the full force of the *μενοίργε*, with which He commences his reply.

3. The next scene in St. Mary's life brings us to the foot of the cross. She was standing there with her sister Mary and Mary Magdalene, and Salome, and other women, having no doubt followed her Son as she was able throughout the terrible morn-

ing of Good Friday. It was about 3 o'clock in the afternoon, and He was about to give up his spirit. His divine mission was now, as it were, accomplished. While his ministry was in progress He had withdrawn himself from her that He might do his Father's work. But now the hour was come when his human relationship might be again recognized. "Tunc enim agnovit," says St. Augustine, "quando illud quod peperit morielioratur" (S. Aug. in *Joan.* ix.). Standing near the company of the women was St. John: and, with almost his last words, Christ commended his mother to the care of him who had borne the name of the Disciple whom Jesus loved. "Woman, behold thy son." "Commendat homo homini hominem," says St. Augustine. And from that hour St. John assures us that he took her to his own abode. If by "that hour" the Evangelist means immediately after the words were spoken, Mary was not present at the last scene of all. The sword had sufficiently pierced her soul, and she was spared the hearing of the last loud cry, and the sight of the bowed head. St. Ambrose considers the chief purpose of our Lord's words to have been a desire to make manifest the truth that the Redemption was his work alone, while He gave human affection to his mother. "Non egelat adjutore ad omnium redemptionem. Suscepit quidem matris affectum, sed non quaesivit hominis auxilium" (S. Amb. *Exp. Evang. Luc.* x. 132).

4. A veil is drawn over her sorrow and over her joy which succeeded that sorrow. Mediæval imagination has supposed, but Scripture does not state, that her Son appeared to Mary after his resurrection from the dead. (See, for example, Ludolph of Saxony, *Vita Christi*, p. 666, Lyons, 1642; and Rupertus, *De Divinis Officiis*, vii. 25, tom. iv. p. 92, Venice, 1751.) St. Ambrose is considered to be the first writer who suggested the idea, and reference is made to his treatise, *De Virginitate*, i. 3: but it is quite certain that the text has been corrupted, and that it is of Mary Magdalene that he is there speaking. (Comp. his *Exposition of St. Luke*, x. 156. See note of the Benedictine edition, tom. ii. p. 217, Paris, 1790.) Another reference is usually given to St. Anselm. The treatise quoted is not St. Anselm's, but Eadmer's. (See Eadmer, *De Excellentia Mariæ*, ch. v., appended to Anselm's Works, p. 138, Paris, 1721.) Ten appearances are related by the Evangelists as having occurred in the 40 days intervening between Easter and Ascension Day, but none to Mary. She was doubtless living at Jerusalem with John, cherished with the tenderness which her tender soul would have specially needed, and which undoubtedly she found preëminently in St. John. We have no record of her presence at the Ascension. Arator, a writer of the 6th century, describes her as being at the time not on the spot, but in Jerusalem (Arat. *De Act. Apost.* l. 50, apud Migne, tom. lxxviii p. 95, Paris, 1848, quoted by Wordsworth, *Gk. Test. Com. on the Acts*, i. 14). We have no account of her being present at the descent of the Holy Spirit on the day of Pentecost. What we do read of her is, that she remained steadfast in prayer in the upper room at Jerusalem with Mary Magdalene and Salome, and those known as the Lord's brothers and the Apostles. This is the last view that we have of her. Holy Scripture leaves her engaged in prayer (see Wordsworth as cited above). From this point forwards we know nothing of her. It is probable that the rest of her life was spent in

<sup>a</sup> It is a mere subterfuge to refer the words *ἐλεγον* *αὐτῆς*, etc., to the people, instead of to Mary and his brethren (Calmet and Migne, *Dict. of the Bible*)

Jerusalem with St. John (see Epiph. *Trar.* p. 78). According to one tradition the beloved disciple would not leave Palestine until she had expired in his arms (see Tholuck, *Light from the Cross*, ii. *Serm.* x. p. 234, Edinb., 1857); and it is added that she lived and died in the Cœnaculum in what is now the Mosque of the Tomb of David, the traditional chamber of the Last Supper (Stanley, *S. of P.* ch. xiv. p. 456). Other traditions make her journey with St. John to Ephesus, and there die in extreme old age. It was believed by some in the 5th century that she was buried at Ephesus (see *Conc. Ephes.*, *Conc. Labb.* tom. iii. p. 574 a); by others, in the same century, that she was buried at Gethsemane, and this appears to have been the information given to Marcian and Pulcheria by Juvenal of Jerusalem. As soon as we lose the guidance of Scripture, we have nothing from which we can derive any sure knowledge about her. The darkness in which we are left is in itself most instructive.

5. The *character* of St. Mary is not drawn by any of the Evangelists, but some of its lineaments are incidentally manifested in the fragmentary record which is given of her. They are to be found for the most part in St. Luke's Gospel, whence an attempt has been made, by a curious mixture of the imaginative and rationalistic methods of interpretation, to explain the old legend which tells us that St. Luke painted the Virgin's portrait (Calmet, Kitto, Migne, Mrs. Jameson). We might have expected greater details from St. John than from the other Evangelists; but in his Gospel we learn nothing of her except what may be gathered from the scene at Cana and at the cross. It is clear from St. Luke's account, though without any such intimation we might rest assured of the fact, that her youth had been spent in the study of the Holy Scriptures, and that she had set before her the example of the holy women of the Old Testament as her model. This would appear from the *Magnificat* (Luke i. 46). The same hymn, so far as it emanated from herself, would show no little power of mind as well as warmth of spirit. Her faith and humility exhibit themselves in her immediate surrender of herself to the Divine will, though ignorant how that will should be accomplished (Luke i. 38); her energy and earnestness, in her journey from Nazareth to Hebron (Luke i. 39); her happy thankfulness, in her song of joy (Luke i. 48); her silent musing thoughtfulness, in her pondering over the shepherds' visit (Luke ii. 19), and in her keeping her Son's words in her heart (Luke ii. 51) though she could not fully understand their import. Again, her humility is seen in her drawing back, yet without anger, after receiving reproach at Cana in Galilee (John ii. 5), and in the remarkable manner in which she shuns putting herself forward throughout the whole of her Son's ministry, or after his removal from earth. Once only does she attempt to interfere with her Divine Son's freedom of action (Matt. xii. 46; Mark iii. 31; Luke viii. 19); and even here we can hardly blame, for she seems to have been roused, not by arrogance and by a desire to show her authority and relationship, as St. Chrysostom supposes (*Hom.* xlv. *in Matt.*); but by a woman's and a mother's feelings of affection and fear for him whom she loved. It was part of that exquisite tenderness which appears throughout to have belonged to her. In a word, so far as St. Mary is portrayed to us in Scripture, she is, as we should

have expected, the most tender, the most faithful, humble, patient, and loving of women, but a woman still.

III. *Her after life, wholly legendary.* — We pass again into the region of free and joyous legend which we quitted for that of true history at the period of the Annunciation. The Gospel record confined the play of imagination, and as soon as this check is withdrawn the legend bursts out afresh. The legends of St. Mary's childhood may be traced back as far as the third or even the second century. Those of her death are probably of a later date. The chief legend was for a length of time considered to be a veritable history, written by Melito, Bishop of Sardis, in the 2d century. It is to be found in the *Bibliotheca Maxima* (tom. ii. pt. ii. p. 212), entitled *Sancti Melitonis Episcopi Sardensis de Transitu Virginis Mariæ Liber*; and there certainly existed a book with this title at the end of the 5th century, which was condemned by Pope Gelasius as apocryphal (Op. Gelas. apud Migne, tom. 59, p. 152). Another form of the same legend has been published at Elberfeld in 1854 by Maximilian Enger in Arabic. He supposes that it is an Arabic translation from a Syriac original. It was found in the library at Bonn, and is entitled *Joannis Apostoli de Transitu Beate Mariæ Virginis Liber*. It is perhaps the same as that referred to in Assemani (*Biblioth. Orient.* tom. iii. p. 287, Rome, 1725), under the name of *Historia Dormitionis et Assumptionis B. Mariæ Virginis Joanni Evangelistæ falso inscripta*. We give the substance of the legend with its main variations.

When the Apostles separated in order to evangelize the world, Mary continued to live with St. John's parents in their house near the Mount of Olives, and every day she went out to pray at the tomb of Christ, and at Golgotha. But the Jews had placed a watch to prevent prayers being offered at these spots, and the watch went into the city and told the chief priests that Mary came daily to pray. Then the priests commanded the watch to stone her. But at this time king Abgarus wrote to Tiberius to desire him to take vengeance on the Jews for slaying Christ. They feared therefore to add to his wrath by slaying Mary also, and yet they could not allow her to continue her prayers at Golgotha, because an excitement and tumult was thereby made. They therefore went and spoke softly to her, and she consented to go and dwell in Bethlehem; and thither she took with her three holy virgins who should attend upon her. And in the twenty-second year after the ascension of the Lord, Mary felt her heart burn with an inexpressible longing to be with her Son; and behold an angel appeared to her, and announced to her that her soul should be taken up from her body on the third day, and he placed a palm-branch from paradise in her hands, and desired that it should be carried before her bier. And Mary besought that the Apostles might be gathered round her before she died, and the angel replied that they should come. Then the Holy Spirit caught up John as he was preaching at Ephesus, and Peter as he was offering sacrifice at Rome, and Paul as he was disputing with the Jews near Rome, and Thomas in the extremity of India, and Matthew and James these were all of the Apostles who were still living; then the Holy Spirit awakened the dead, Philip and Andrew, and Luke and Simon, and Mark and Bartholomew: and all of them were snatched away by

a bright cloud and found themselves at Bethlehem. And angels and powers without number descended from heaven and stood round about the house; Gabriel stood at blessed Mary's head, and Michael at her feet, and they fanned her with their wings; and Peter and John wiped away her tears; and there was a great cry, and they all said "Hail blessed one! blessed is the fruit of thy womb!" And the people of Bethlehem brought their sick to the house, and they were all healed. Then news of these things was carried to Jerusalem, and the king sent and commanded that they should bring Mary and the disciples to Jerusalem. And horsemen came to Bethlehem to seize Mary, but they did not find her, for the Holy Spirit had taken her and the disciples in a cloud over the heads of the horsemen to Jerusalem. Then the men of Jerusalem saw angels ascending and descending at the spot where Mary's house was. And the high-priests went to the governor, and craved permission to burn her and the house with fire, and the governor gave them permission, and they brought wood and fire; but as soon as they came near to the house, behold there burst forth a fire upon them which consumed them utterly. And the governor saw these things afar off, and in the evening he brought his son, who was sick, to Mary, and she healed him.

Then, on the sixth day of the week, the Holy Spirit commanded the Apostles to take up Mary, and to carry her from Jerusalem to Gethsemane, and as they went the Jews saw them. Then drew near Japhia, one of the high-priests, and attempted to overthrow the litter on which she was being carried, for the other priests had conspired with him, and they hoped to cast her down into the valley, and to throw wood upon her, and to burn her body with fire. But as soon as Japhia had touched the litter the angel smote off his arms with a fiery sword, and the arms remained fastened to the litter. Then he cried to the disciples and Peter for help, and they said, "Ask it of the Lady Mary;" and he cried, "O Lady, O Mother of Salvation, have mercy on me!" Then she said to Peter, "Give him back his arms;" and they were restored whole. But the disciples proceeded onwards, and they laid down the litter in a cave, as they were commanded, and gave themselves to prayer.

And the angel Gabriel announced that on the first day of the week Mary's soul should be removed from this world. And on the morning of that day there came Eve and Anne and Elisabeth, and they kissed Mary and told her who they were: came Adam, Seth, Shem, Noah, Abraham, Isaac, Jacob, David, and the rest of the old fathers: came Enoch and Elias and Moses: came twelve chariots of angels innumerable: and then appeared the Lord Christ in his humanity, and Mary bowed before him and said, "O my Lord and my God, place thy hand upon me;" and he stretched out his hand and blessed her; and she took his hand and kissed it, and placed it to her forehead and said, "I bow before this right hand, which has made heaven and earth and all that in them is, and I thank thee and praise thee that thou hast thought me worthy of this hour." Then she said, "O Lord, take me to thyself!" And he said to her, "Now shall thy body be in paradise to the day of the resurrection, and angels shall serve thee; but thy pure spirit

shall shine in the kingdom, in the dwelling-place of my Father's fullness." Then the disciples drew near and besought her to pray for the world which she was about to leave. And Mary prayed. And after her prayer was finished her face shone with marvelous brightness, and she stretched out her hands and blessed them all; and her Son put forth his hands and received her pure soul, and bore it into his Father's treasure-house. And there was a light and a sweet smell, sweeter than anything on earth; and a voice from heaven saying, "Hail, blessed one! blessed and celebrated art thou among women!"<sup>a</sup>

And the Apostles carried her body to the Valley of Jehoshaphat, to a place which the Lord had told them of, and John went before and carried the palm-branch. And they placed her in a new tomb, and sat at the mouth of the sepulchre, as the Lord commanded them; and suddenly there appeared the Lord Christ, surrounded by a multitude of angels, and said to the Apostles, "What will ye that I should do with her whom my Father's command selected out of all the tribes of Israel that I should dwell in her?" And Peter and the Apostles besought him that he would raise the body of Mary and take it with him in glory to heaven. And the Saviour said, "Be it according to your word." And he commanded Michael the archangel to bring down the soul of Mary. And Gabriel rolled away the stone, and the Lord said, "Rise up, my beloved, thy body shall not suffer corruption in the tomb." And immediately Mary arose and bowed herself at his feet and worshipped; and the Lord kissed her and gave her to the angels to carry her to paradise.

But Thomas was not present with the rest, for at the moment that he was summoned to come he was baptizing Polodius, who was the son of the sister of the king. And he arrived just after all these things were accomplished, and he demanded to see the sepulchre in which they had laid his Lady: "For ye know," said he, "that I am Thomas, and unless I see I will not believe." Then Peter arose in haste and wrath, and the other disciples with him, and they opened the sepulchre and went in; but they found nothing therein save that in which her body had been wrapped. Then Thomas confessed that he too, as he was being borne in the cloud from India, had seen her holy body being carried by the angels with great triumph into heaven; and that on his crying to her for her blessing, she had bestowed upon him her precious Girdle, which when the Apostles saw they were glad.<sup>b</sup> Then the Apostles were carried back each to his own place.

*Jovannis Apostoli de Transitu Beatæ Mariæ Virginis Liber*, Elberfeldæ, 1854; *S. Melitonis Episc. Sard. de Transitu V. M. Liber*, apud *Bibl. Max. Patr.* tom. ii. pt. ii. p. 212, Lugd. 1677; *Jacobi a Voragine Legendæ Auræ*, ed. Græssæ, ch. cxix. p. 504, Dresd. 1846; *John Damasc. Serm. de Dormit. Deiparæ*, Op. tom. ii. p. 857 ff., Venice, 1743; *Andrew of Crete, In Dormit. Deiparæ Serm.* iii. p. 115, Paris, 1644; *Mrs. Jameson, Legendæ of the Madonna*, Lond. 1852; *Butler, Lives of the Saints in Aug. 15*; *Dressel, Edita et inedita Epiphaniæ Monachi et Presbyteri*, p. 105, Paris, 1843. [*Tischendorf, Apocalypses Apoc.* Lips. 1866.]

<sup>a</sup> The legend ascribed to Melito makes her soul to be carried to paradise by Gabriel while her Son returns to heaven.

<sup>b</sup> For the story of this *Sacratissimo Cintolo*, still preserved at Prato, see *Mrs. Jameson's Legends of the Madonna*, p. 344, Lond. 1852.

IV. *Jewish traditions respecting her.* — These are of a very different nature from the light-hearted fairy-tale-like stories which we have recounted above. We should expect that the miraculous birth of our Lord would be an occasion of scoffing to the unbelieving Jews, and we find this to be the case. To the Christian believer the Jewish slander becomes in the present case only a confirmation of his faith. The most definite and outspoken of these slanders is that which is contained in the book called יהודות ישוע, or *Toldoth Jesu*.

It was grasped at with avidity by Voltaire, and declared by him to be the most ancient Jewish writing directed against Christianity, and apparently of the first century. It was written, he says, before the Gospels, and is altogether contrary to them (*Lettre sur les Juifs*). It is proved by Ammon (*Biblisch. Theologie*, p. 263, Erlang. 1801) to be a composition of the 13th century, and by Wagenseil (*Teli ignea Satanae; Confut. Libr. Toldos Jeschu*, p. 12, Altorf, 1681) to be irreconcilable with the earlier Jewish tales. In the Gospel of Nicodemus, otherwise called the Acts of Pilate, we find the Jews represented as charging our Lord with illegitimate birth (c. 2). The date of this Gospel is about the end of the third century. The origin of the charge is referred with great probability by Thilo (*Codez Apoc.* p. 527, Lips. 1832) to the circular letters of the Jews mentioned by Grotius (*ad Matt.* xxvii. 63, *et ad Act. Apost.* xxviii. 22; *Op.* ii. 278 and 666, Basil. 1732), which were sent from Palestine to all the Jewish synagogues after the death of Christ, with the view of attacking "the lawless and atheistic sect which had taken its origin from the deceiver Jesus of Galilee" (*Justin. adv. Tryph.*). The first time that we find it openly proclaimed is in an extract made by Origen from the work of Celsus, which he is refuting. Celsus introduces a Jew declaring that the mother of Jesus *ὐπό τοῦ γήμαντος, τέκτονος τὴν τέχνην ὕψτος, ἐξέωσθαι, ἐλεγχθεῖσα ὡς μεμοιχλευμένην* (*Contra Celsum*, c. 28, Origenis Opera, viii. 59, Berlin, 1845). And again, *ἡ τοῦ Ἰησοῦ μήτηρ κούσα, ἐξωσθεῖσα ὐπό τοῦ μηπιστευσαμένου αὐτὴν τέκτονος, ἐλεγχθεῖσα ἐπὶ μοιχεία καὶ τίκτουσα ἀπὸ τινος στρατιώτου Πανθήρα τοῦνομα* (*ibid.* 32). Stories to the same effect may be found in the Talmud — not in the Mishna, which dates from the second century; but in the Gemara, which is of the fifth or sixth (see *Tract. Sanhedrin*, cap. vii. fol. 67, col. 1; *Shabbath*, cap. xii. fol. 104, col. 2; and the *Mishnah Kohelath*, cap. x. 5). Rabanus Maurus, in the ninth century, refers to the same story: "Jesum filium Ethnici ejusdam Pandera adulteri, more latronum punitum esse." We then come to the *Toldoth Jesu*, in which these calumnies were intended to be summed up and harmonized. In the year 4671, the story runs, in the reign of King Jaumeus, there was one Joseph Pandera who lived at Bethlehem. In the same village there was a widow who had a daughter named Miriam, who was betrothed to a God-fearing man named Johanan. And it came to pass that Joseph Pandera meeting with Miriam when it was dark, deceived her into the belief that he was Johanan her husband. And after three months Johanan consulted Rabbi Simeon Shetachides what he should do with Miriam, and the rabbi advised him to bring her before the great council. But Johanan was ashamed to do so, and instead he left his home and went and lived at Babylon; and there

Miriam brought forth a son and gave him the name of Jehoshua. The rest of the work, which has no merit in a literary aspect or otherwise, contains an account of how this Jehoshua gained the art of working miracles by stealing the knowledge of the unmentionable name from the Temple; how he was defeated by the superior magical arts of one Juda; and how at last he was crucified, and his body hidden under a watercourse. It is offensive to make use of sacred names in connection with such tales; but in Wagenseil's quaint words we may recollect, "hæc nomina non attineat ad Servatorem Nostrum aut beatissimam illius matrem ceterosque quos significare videntur, sed designari eis a Diabolo supposita Spectra, Larvas, Lemures, Lamias, Stryges, aut si quid turpiss istis" (*Teli ignea Satanae, Liber Toldos Jeschu*, p. 2, Altorf, 1681). It is a curious thing that a Pandera or Panther has been introduced into the genealogy of our Lord by Epiphanius (*Heres. lxxviii.*) who makes him grandfather of Joseph, and by John of Damascus (*De Fide orthodoxa*, iv. 15), who makes him the father of Barpanther and grandfather of St. Mary.

V. *Mohammedan Traditions.* — These are again cast in a totally different mould from those of the Jews. The Mohammedans had no purpose to serve in spreading calumnious stories as to the birth of Jesus, and accordingly we find none of the Jewish malignity about their traditions. Mohammed and his followers appear to have gathered up the floating oriental traditions which originated in the legends of St. Mary's early years, given above, and to have drawn from them and from the Bible indifferently. It has been suggested that the Koran had an object in magnifying St. Mary, and that this was to insinuate that the Son was of no other nature than the mother. But this does not appear to be the case. Mohammed seems merely to have written down what had come to his ears about her, without definite theological purpose or inquiry.

Mary was, according to the Koran, the daughter of Anram (sur. iii.) and the sister of Aaron (sur. xix.). Mohammed can hardly be absolved from having here confounded Miriam the sister of Moses with Mary the mother of our Lord. It is possible indeed that he may have meant different persons, and such is the opinion of Sale (*Koran*, pp. 38 and 251), and of D'Herbelot (*Bibl. Orient.* in voc. "Miriam"); but the opposite view is more likely (see Guadagnoli, *Apol. pro rel. Christ.* ch. viii. p. 277, Rom. 1631). Indeed, some of the Mohammedan commentators have been driven to account for the chronological difficulty, by saying that Miriam was miraculously kept alive from the days of Moses in order that she might be the mother of Jesus. Her mother Hannah dedicated her to the Lord while still in the womb, and at her birth "commended her and her future issue to the protection of God against Satan." And Hannah brought the child to the Temple to be educated by the priests, and the priests disputed among themselves who should take charge of her. Zacharias maintained that it was his office, because he had married her aunt. But when the others would not give up their claims, it was determined that the matter should be decided by lot. So they went to the river Jordan, twenty-seven of them, each man with his rod; and they threw their rods into the river, and none of them floated save that of Zacharias, whereupon the care of the child was committed to him (Al Beidawi; Jallal'uddin). Then Zacharias placed her in an inner chamber by herself

and though he kept seven doors ever locked upon her,<sup>a</sup> he always found her abundantly supplied with provisions which God sent her from paradise, winter fruits in summer, and summer fruits in winter. And the angels said unto her, "O Mary, verily God hath chosen thee, and hath purified thee, and hath chosen thee above all the women of the world" (*Koran*, sur. iii.). And she retired to a place towards the East, and Gabriel appeared unto her and said, "Verily I am the messenger of thy Lord, and am sent to give thee a holy Son" (sur. xix.). And the angels said, "O Mary, verily God sendeth thee good tidings that thou shalt bear the Word proceeding from Himself: His name shall be Christ Jesus, the son of Mary, honorable in this world and in the world to come, and one of them who approach near to the presence of God: and he shall speak unto men in his cradle and when he is grown up; and he shall be one of the righteous." And she said, "How shall I have a son, seeing I know not a man?" The angel said, "So God createth that which He pleaseth: when He decreeth a thing, He only saith unto it, 'Be,' and it is. God shall teach him the scripture and wisdom, and the law and the gospel, and shall appoint him his apostle to the children of Israel" (sur. iii.). So God breathed of his Spirit into the womb of Mary;<sup>b</sup> and she preserved her chastity (sur. lvi.): for the Jews have spoken against her a grievous calumny (sur. iv.). And she conceived a son, and retired with him apart to a distant place; and the pains of childbirth came upon her near the trunk of a palm-tree; and God provided a rivulet for her, and she shook the palm-tree, and it let fall ripe dates, and she ate and drank, and was calm. Then she carried the child in her arms to her people; but they said that it was a strange thing she had done. Then she made signs to the child to answer them; and he said, "Verily I am the servant of God: He hath given me the book of the gospel, and hath appointed me a prophet; and He hath made me blessed, wheresoever I shall be; and hath commanded me to observe prayer and to give alms so long as I shall live; and He hath made me dutiful towards my mother, and hath not made me proud or unhappy: and peace be on me the day whereon I was born, and the day whereon I shall die, and the day whereon I shall be raised to life." This was Jesus the Son of Mary, the Word of Truth concerning whom they doubt (sur. xix.).

Mohammed is reported to have said that many men have arrived at perfection, but only four women; and that these are, Asia the wife of Pharaoh, Mary the daughter of Amram, his first wife Khadijah, and his daughter Fátima.

The commentators on the *Koran* tell us that every person who comes into the world is touched at his birth by the Devil, and therefore cries out; out that God placed a veil between Mary and her son and the Evil Spirit, so that he could not reach them. For which reason they were neither of them guilty of sin, like the rest of the children of Adam. His privilege they had in answer to Hannah's prayer

for their protection from Satan. (Jallalo'ddin: *Al Beidawi*; *Kitada*.) The Immaculate Conception therefore, we may note, was a Mohammedan doctrine six centuries before any Christian theologians or schoolmen maintained it.

Sale, *Koran*, pp. 39, 79, 250, 458, Lond. 1734 Warner, *Compendium Historicum eorum que Muhammedani de Christo tradiderunt*, Lugd. Bat 1643; Guadagnoli, *Apologia pro Christiana Religione*, Rom. 1631; D'Herbelot, *Bibliothèque Orientale*, p. 583, Paris, 1697; Weil, *Biblische Legenden der Muselmänner*, p. 230, Frankf. 1845.

VI. *Emblems*.—There was a time in the history of the Church when all the expressions used in the book of Canticles were applied at once to St. Mary. Consequently all the eastern metaphors of king Solomon have been hardened into symbols, and represented in pictures or sculpture, and attached to her in popular litanies. The same method of interpretation was applied to certain parts of the book of the Revelation. Her chief emblems are the sun, moon, and stars (Rev. xii. 1; Cant. vi. 10). The name of Star of the Sea is also given her, from a fanciful interpretation of the meaning of her name. She is the Rose of Sharon (Cant. ii. 1), and the Lily (ii. 2), the Tower of David (iv. 4), the Mountain of Myrrh and the Hill of Frankincense (iv. 6), the Garden enclosed, the Spring shut up, the Fountain sealed (iv. 12), the Tower of Ivory (vii. 4), the Palm-tree (vii. 7), the Closed Gate (Ez. xlv. 2). There is no end to these metaphorical titles. See Mrs. Jameson's *Legends of the Madonna*, and the ordinary Litanies of the B. Virgin.

VII. *Cultus of the Blessed Virgin*.—We do not enter into the theological bearings of the worship of St. Mary; but we shall have left our task incomplete if we do not add a short historical sketch of the origin, progress, and present state of the devotion to her. What was its origin? Certainly not the Bible. There is not a word there from which it could be inferred; nor in the Creeds; nor in the Fathers of the first five centuries. We may scan each page that they have left us, and we shall find nothing of the kind. There is nothing of the sort in the supposed works of Hermas and Barnabas, nor in the real works of Clement, Ignatius, and Polycarp: that is, the doctrine is not to be found in the 1st century. There is nothing of the sort in Justin Martyr, Tatian, Athenagoras, Theophilus, Clement of Alexandria, Tertullian: that is, in the 2d century. There is nothing of the sort in Origen, Gregory Thaumaturgus, Cyprian, Methodius, Lactantius: that is, in the 3d century. There is nothing of the sort in Eusebius, Athanasius, Cyril of Jerusalem, Hilary, Macarius, Epiphanius, Basil, Gregory Nazianzen, Ephrem Syrus, Gregory of Nyssa, Ambrose: that is, in the 4th century. There is nothing of the sort in Chrysostom, Augustine, Jerome, Basil of Seleucia, Orosius, Sedulius, Isidore, Theodoret, Prosper, Vincentius Lirinensis, Cyril of Alexandria, Papes Leo, Hilarius, Simplicius, Felix, Gelasius, Anastasius, Symmachus: that is, in the 5th century.<sup>c</sup> Whence, then, did it

<sup>a</sup> Other stories make the only entrance to be by a ladder and a door always kept locked.

<sup>b</sup> The commentators have explained this expression as signifying the breath of Gabriel (Yahya; Jallalo'ddin). But this does not seem to have been Mohammed's meaning.

<sup>c</sup> "Origen's Lament," the "Three Discourses" published by Vossius as the work of Gregory Thaumaturgus, the Homily attributed to St. Athanasius containing an invocation of St. Mary, the Panegyric attributed to St. Epiphanius, the "Christ Suffering," and the Oration containing the story of Justina and St. Cyprian, attributed to Gregory Nazianzen: the Eulogy of the Holy Virgin, and the Prayer attributed to Ephrem Syrus; the Book of Meditations attributed to St. Augustine; the Two Sermons supposed to have

turgus, the Homily attributed to St. Athanasius containing an invocation of St. Mary, the Panegyric attributed to St. Epiphanius, the "Christ Suffering," and the Oration containing the story of Justina and St. Cyprian, attributed to Gregory Nazianzen: the Eulogy of the Holy Virgin, and the Prayer attributed to Ephrem Syrus; the Book of Meditations attributed to St. Augustine; the Two Sermons supposed to have

arise? There is not a shadow of doubt that the origin of the worship of St. Mary is to be found in the apocryphal legends of her birth and of her death which we have given above. There we find the germ of what afterwards expanded into its present portentous proportions. Some of the legends of her birth are as early as the 2d or 3d century. They were the production of the Gnostics, and were unannounced and firmly rejected by the Church of the first five centuries as fabulous and heretical. The Gnostic tradition seems to have been handed on to the Collyridians, whom we find denounced by Epiphanius for worshipping the Virgin Mary. They were regarded as distinctly heretical. The words which this Father uses respecting them were probably expressive of the sentiments of the entire Church in the 4th century. "The whole thing," he says, "is foolish and strange, and is a device and deceit of the Devil. Let Mary be in honor. Let the Lord be worshipped. Let no one worship Mary" (Epiph. *Hær.* lxxxix., Op. p. 1066, Paris, 1622). Down to the time of the Nestorian controversy, the *cultus* of the Blessed Virgin would appear to have been wholly external to the Church, and to have been regarded as heretical. But the Nestorian controversies produced a great change of sentiment in men's minds. Nestorius had maintained, or at least it was the tendency of Nestorianism to maintain, not only that our Lord had two natures, the divine and the human (which was right), but also that He was two persons, in such sort that the child born of Mary was not divine, but merely an ordinary human being, until the divinity subsequently united itself to Him. This was condemned by the Council of Ephesus in the year 431; and the title *Θεοτόκος*, loosely translated "Mother of God," was sanctioned. The object of the Council and of the Anti-Nestorians was in no sense to add honor to the mother, but to maintain the true doctrine with respect to the Son. Nevertheless the result was to magnify the mother, and, after a time, at the expense of the son. For now the title *Θεοτόκος* became a shibboleth; and in art the representation of the Madonna and Child became the expression of orthodox belief. Very soon the purpose for which the title and the picture were first sanctioned became forgotten, and the veneration of St. Mary began to spread within the Church, as it had previously existed external to it. The legends too were no longer treated so roughly as before. The Gnostics were not now objects of dread. Nestorians, and afterwards Iconoclasts, were objects of hatred. The old fables were winked at, and thus they "became the mythology of Christianity, universally credited among the Southern nations of Europe, while many of the dogmas, which they are grounded upon, have, as a natural consequence, crept into the faith" (Lord Lindsay, *Christian Art*, i. p. xi. Lond. 1847). From this time the worship of St. Mary grew apace. It agreed well with many natural aspirations of the heart. To paint the mother of the Saviour an ideal woman,

with all the grace and tenderness of womanhood, and yet with none of its weaknesses, and then to fall down and worship the image which the imagination had set up, was what might easily happen, and what did happen. Evidence was not asked for. Perfection "was becoming" to the mother of the Lord; therefore she was perfect. Adoration "was befitting" on the part of Christians; therefore they gave it. Any tales attributed to antiquity were received as genuine; any revelations supposed to be made to favored saints were accepted as true: and the Madonna reigned as queen in heaven, in earth, in purgatory, and over hell. We learn the present state of the religious regard in which she is held throughout the south of Europe from St. Alfonso de Liguori, whose every word is vouched for by the whole weight of his Church's authority. From the *Glories of Mary*, translated from the original, and published in London in 1852, we find that St. Mary is Queen of Mercy (p. 13) and Mother of all mankind (p. 23), our Life (p. 52), our Protectress in death (p. 71), the Hope of all (p. 79), our only Refuge, Help, and Asylum (p. 81); the Propitiatory of the whole world (p. 81); the one City of Refuge (p. 89); the Comfortress of the world, the Refuge of the Unfortunate (p. 100); our Patroness (p. 106); Queen of Heaven and Hell (p. 110); our Protectress from the Divine Justice and from the Devil (p. 115); the Ladder of Paradise, the Gate of Heaven (p. 121); the Mediatrix of grace (p. 124); the Dispenser of all graces (p. 128); the Helper of the Redemption (p. 133); the Coöperator in our Justification (p. 133); a tender Advocate (p. 145); Omnipotent (p. 146); the singular Refuge of the lost (p. 156); the great Peacemaker (p. 165); the Throne prepared in mercy (p. 165); the Way of Salvation (p. 200); the Mediatrix of Angels (p. 278). In short, she is the Way (p. 200), the Door (p. 588), the Mediator (p. 295), the Intercessor (p. 129), the Advocate (p. 144), the Redeemer (p. 275), the Saviour (p. 343).

Thus, then, in the worship of the Blessed Virgin there are two distinctly marked periods. The first is that which commences with the apostolic times, and brings us down to the close of the century in which the Council of Ephesus was held, during which time the worship of St. Mary was wholly external to the Church, and was regarded by the Church as heretical, and confined to Gnostic and Collyridian heretics. The second period commences with the 6th century, when it began to spread within the Church; and, in spite of the shock given it by the Reformation, has continued to spread, as shown by Liguori's teaching; and is spreading still, as shown by the manner in which the papal decree of December 8, 1854, has been, not universally indeed, but yet generally, received. Even before that decree was issued. The sound of the word "deification" had been heard with reference to St. Mary (Newman, *Essay on Development*, p. 409, Lond. 1846); and she had been placed in "a throne far above all created powers, mediatorial, intercessory;" she had been invested with "a title archetypal; with a crown

been delivered by Pope Leo on the Feast of the Annunciation, — are all spurious. See *Moral and Devotional Theology of the Church of Rome* (Mozley, Lond. 1857). The Oration of Gregory, containing the story of Justina and Cyprian, is retained by the Benedictine editors as genuine; and they pronounce that nowhere else is the protection of the Blessed Virgin Mary so clearly and explicitly commended in the 4th century.

The words are: "Justina . . . meditating on these instances (and beseeching the Virgin Mary to assist a virgin in peril), throws before her the charm of fast ing." It is shown to be spurious by Tyler (*Worship of the Blessed Virgin*, p. 378, Lond. 1844). Even suppose it were genuine, the contrast between the strong est passage of the 4th century and the ordinary language of the 19th would be sufficiently striking

brigt as the morning star; a glory issuing from the Eternal Throne; robes pure as the heavens; and a sceptre over all (*ibid.* p. 406).

VIII. *Her Assumption.*—Not only religious sentiments, but facts grew up in exactly the same way. The Assumption of St. Mary is a fact, or an alleged fact. How has it come to be accepted! At the end of the 5th century we find that there existed a book, *De Transitu Virginis Mariæ*, which was condemned by Pope Gelasius as apocryphal. This book is without doubt the oldest form of the legend, of which the books ascribed to St. Melito and St. John are variations. Down to the end of the 5th century, then, the story of the Assumption was external to the Church, and distinctly looked upon by the Church as belonging to the heretics and not to her. But then came the change of sentiment already referred to, consequent on the Nestorian controversy. The desire to protest against the early fables which had been spread abroad by the heretics was now passed away, and had been succeeded by the desire to magnify her who had brought forth Him who was God. Accordingly a writer, whose date Baronius fixes at about this time (*Ann. Eccl.* i. 347, Lucca, 1738), suggested the possibility of the Assumption, but declared his inability to decide the question. The letter in which this possibility or probability is thrown out came to be attributed to St. Jerome, and may be still found among his works, entitled *Ad Paulam et Eustochium de Assumptione B. Virginis* (v. 82, Paris, 1706). About the same time, probably, or rather later, an insertion (now recognized on all hands to be a forgery) was made in Eusebius' *Chronicle*, to the effect that "in the year A. D. 48 Mary the Virgin was taken up into heaven, as some wrote that they had it revealed to them." Another tract was written to prove that the Assumption was not a thing in itself unlikely; and this came to be attributed to St. Augustine, and may be found in the appendix to his works; and a sermon, with a similar purport, was ascribed to St. Athanasius. Thus the names of Eusebius, Jerome, Augustine, Athanasius, and others, came to be quoted as maintaining the truth of the Assumption. The first writers within the Church in whose extant writings we find the Assumption asserted, are Gregory of Tours in the 6th century, who has merely copied Melito's book, *De Transitu (De Glor. Mart.* lib. i. c. 4; Migne, 71, p. 708); Andrew of Crete, who probably lived in the 7th century; and John of Damascus, who lived at the beginning of the 8th century. The last of these authors refers to the Euthymiac history as stating that Marcian and Pulcheria being in search of the body of St. Mary, sent to Juvenal of Jerusalem to inquire for it. Juvenal replied, "In the holy and divinely inspired Scriptures, indeed, nothing is recorded of the departure of the holy Mary, Mother of God. But from an ancient and most true tradition we have received, that at the time of her glorious falling asleep all the holy Apostles, who were going through the world for the salvation of the nations, borne aloft in a moment of time, came together to Jerusalem: and when they were near her they had a vision of angels, and divine melody was heard; and then with divine and more than heavenly melody she delivered her holy soul into the hands of God in an unspeakable manner. But

that which had borne God, being carried with angelic and apostolic psalmody, with funeral rites was deposited in a coffin at Gethisemane. In this place the chorus and singing of the angels continued three whole days. But after three days, on the angelic music ceasing, those of the Apostles who were present opened the tomb, as one of them, Thomas, had been absent, and on his arrival wished to adore the body which had borne God. But her all glorious body they could not find; but they found the linen clothes lying, and they were filled with an ineffable odor of sweetness which proceeded from them. Then they closed the coffin. And they were astonished at the mysterious wonder; and they came to no other conclusion than that He who had chosen to take flesh of the Virgin Mary, and to become a man, and to be born of her—God the Word, the Lord of Glory—and had preserved her virginity after birth, was also pleased, after her departure, to honor her immaculate and unpolluted body with incorruption, and to translate her before the common resurrection of all men" (St. Joan. Damasc. *Op.* ii. 880, Venice, 1748). It is quite clear that this is the same legend as that which we have before given. Here, then, we see it brought over the borders and planted within the Church, if this "Euthymiac history" is to be accepted as veritable, by Juvenal of Jerusalem in the 5th century, or else by Gregory of Tours in the 6th century, or by Andrew of Crete in the 7th century, or finally, by John of Damascus in the 8th century (see his three *Homilies on the Sleep of the Blessed Virgin Mary*, *Op.* ii. 857–886).<sup>a</sup> The same legend is given in a slightly different form as veritable history by Nicephorus Callistus in the 13th century (*Niceph.* i. 171, Paris, 1630); and the fact of the Assumption is stereotyped in the Breviary Services for August 15th (*Brev. Rom. pars æst.* p. 551, Milan, 1851). Here again, then, we see a legend originated by heretics, and remaining external to the Church till the close of the 5th century, creeping into the Church during the 6th and 7th centuries, and finally ratified by the authority both of Rome and Constantinople. See Baronius, *Ann. Eccl.* (i. 344, Lucca, 1738), and *Martyrologium* (p. 314, Paris, 1607).

IX. *Her Immaculate Conception.*—Similarly with regard to the sinlessness of St. Mary, which has issued in the dogma of the Immaculate Conception. Down to the close of the 5th century the sentiment with respect to her was identical with that which is expressed by theologians of the Church of England (see Pearson, *On the Creed*). She was regarded as "highly favored;" as a woman arriving as near the perfection of womanhood as it was possible for human nature to arrive, but yet liable to the infirmities of human nature, and sometimes led away by them. Thus, in the 2d century, Tertullian represents her as guilty of unbelief (*De carne Christi*, vii. 315, and *Adv. Marcion.* iv. 19, p. 433, Paris, 1695). In the 3d century, Origen interprets the sword which was to pierce her bosom as being her unbelief, which caused her to be offended (*Hom. in Luc.* xvii. iii. 952, Paris, 1733). In the 4th century St. Basil gives the same interpretation of Simeon's words (*Fp.* 260, iii. 400, Paris, 1721); and St. Hilary speaks of her as having to come into the severity of the *finis*

<sup>a</sup> This "Euthymiac History" is involved in the most confusion. Cave considers the Homily proved

spurious by its reference to it. See *Historia Literaria* i. 582, 625. Oxf. 1740.

judgment (*In Ps. cxix.* p. 262, Paris, 1693). In the 5th century St. Chrysostom speaks of the "excessive ambition," "foolish arrogance," and "vain-glory," which made her stand and desire to speak with Hlin (vii. 467, Paris, 1718); and St. Cyril of Alexandria (so entirely is he misrepresented by popular writers) speaks of her as failing in faith when present at the Passion — as being weaker in the spiritual life than St. Peter — as being entrusted to St. John, because he was capable of explaining to her the mystery of the Cross — as inferior to the Apostles in knowledge and belief of the Resurrection (iv. 1064, vi. 391, Paris, 1638). It is plain from these and other passages, which might be quoted, that the idea of St. Mary's exemption from even actual sins of infirmity and imperfection, if it existed at all, was external to the Church. Nevertheless there grew up, as was most natural, a practice of looking upon St. Mary as an example to other women, and investing her with an ideal character of beauty and sweetness. A very beautiful picture of what a girl ought to be is drawn by St. Ambrose (*De Virgin.* ii. 2, p. 164, Paris, 1690), and attached to St. Mary. It is drawn wholly from the imagination (as may be seen by his making one of her characteristics to be that she never went out of doors except when she accompanied her parents to church), but there is nothing in it which is in any way superhuman. Similarly we find St. Jerome speaking of the clear light of Mary hiding the little fires of other women, such as Anna and Elisabeth (vi. 671, Verona, 1734). St. Augustine takes us a step further. He again and again speaks of her as under *original sin* (iv. 241, x. 654, &c., Paris, 1700); but with respect to her *actual sin* he says that he would rather not enter on the question, for it was possible (how could we tell?) that God had given her sufficient grace to keep her free from actual sin (x. 144). At this time the change of mind before referred to, as originated by the Nestorian controversies, was spreading within the Church; and it became more and more the general belief that St. Mary was preserved from actual sin by the grace of God. This opinion had become almost universal in the 12th century. And now a further step was taken. It was maintained by St. Bernard that St. Mary was conceived in original sin, but that before her birth she was cleansed from it, like John the Baptist and Jeremiah. This was the sentiment of the 13th century, as shown by the works of Peter Lombard (*Sentent.* lib. iii. dist. 3), Alexander of Hales (*Sum. Theol.* num. ii. art. 2), Albertus Magnus (*Sentent.* lib. iii. dist. 3), and Thomas Aquinas (*Sum. Theol.* quæst. xxvii. art. 1, and *Comm. in Lib. Sentent.* dist. 3, quæst. 1). Early in the 14th century died J. Duns Scotus, and he is the first theologian or schoolman who threw out as a possibility the idea of an Immaculate Conception, which would exempt St. Mary from original as well as actual sin. This opinion had been growing up for the two previous centuries, having originated apparently in France, and having been adopted, to St. Bernard's indignation, by the canons of Lyons. From this time forward there was a struggle between the maculate and immaculate conceptionists, which has led at length to the decree of December 8, 1854, but which has not ceased with that decree. Here, then, we may mark four distinct theories with respect to the sinlessness of St. Mary. The first is that of the early Church to the close of the 5th century. It taught that St. Mary was born in original sin, was liable to actual sin, and

that she fell into sins of infirmity. The second extends from the close of the 5th to the 12th century. It taught that St. Mary was born in original sin, but by God's grace was saved from falling into actual sins. The third is *pur excellence* that of the 13th century. It taught that St. Mary was conceived in original sin, but was sanctified in the womb before birth. The fourth may be found obscurely existing, but only existing to be condemned, in the 12th and 13th centuries; brought into the light by the speculations of Scotus and his followers in the 14th century; thenceforward running parallel with and struggling with the *sanctificata in utero* theory, till it obtained its apparently final victory, so far as the Roman Church is concerned, in the 19th century, and in the lifetime of ourselves. It teaches that St. Mary was not conceived or born in original sin, but has been wholly exempt from all sin, original and actual, in her conception and birth, throughout her life, and in her death.

Conceptu*, Avenione, 1848; *Christian Remembrancer*, vols. xxiii. and xxxvii.; Bp. Wilberforce, *Rome — her New Dogma, and our Duties*, Oxf. 1855; *Observations Catholiques*, Paris, 1855-60; Fray Morozza, *Examen Bulle Ineffabilis*, Paris, 1858. F. M.

MARY (Rec. Text, with [Sin.] D, *Μαριά*; Laelmann, with A B C, *Μαρία: Maria*), a Roman Christian who is greeted by St. Paul in his Epistle to the Romans (xvi. 6) as having toiled hard for him — or according to some MSS. for them. Nothing more is known of her. But Professor Jowett (*The Epistles of St. Paul, etc. ad loc.*) has called attention to the fact that hers is the only Jewish name in the list. G.

\* MAS'ADA (*Μααδά*) a remarkable Jewish fortress on the western shore of the Dead Sea, a few hours south of Engedi. It is mentioned by Pliny and Strabo, but is not named in the Bible nor in the Books of the Maccabees, although it was first built by Jonathan Maccabæus and was, probably, one of the "strongholds in Judea," (1 Macc. xii. 35), which he consulted with the elders about building. Josephus has given a full description of it, and of the terrible tragedy of which it was the theatre. (*B. J.* vii. 8.) It was an isolated rock, several hundred feet high, and inaccessible except by two paths hewn in its face. The summit was a plain, about three fourths of a mile in length, and a third of a mile in breadth. Herod the Great chose this spot for a retreat in case of danger, built a wall around the top, strengthened the original fortifications, and added a palace, with armories and ample store-houses and cisterns.

After the destruction of Jerusalem and the reduction of the other fortresses, this almost impregnable post was held by a garrison (which included many families) of Jewish zealots under the command of Eleazar, and here was made the last stand against the power of Rome. The Roman general, Flavius Silbon, gathered his forces to this fortress and laid siege to it, building a wall around the entire rock. He then raised his banks against the single narrow promontory by which it can now be climbed, and when, at length, it became evident that he would subdue it, the besieged, and the impassioned harangue of their leader, devoted themselves to self-destruction. Each man, after tenderly

embracing his wife and children, put them to death with his own hand; ten men were then selected by lot to massacre the rest; and one of the survivors, in the same way, to despatch the others and then himself. This frantic resolve was executed, and 960 persons — men, women, and children — lay in their blood. The conqueror, pressing the siege, the next morning, encountered the silence of death, and entering the fortress, met the appalling spectacle. Two women and five children, who had been concealed in a cavern, alone survived.

The spot, thus signalized, was lost to history until the publication of Robinson and Smith's researches. At *'Ain Jidy*, their attention had been attracted to this singular rock with ruins on its

summit, now called *Sebbeh* (سببة), but it was not until they reached Germany, that it occurred to them it must be the ancient Masada (*Bibl. Res.* ii. 240 f.). The writer, in company with an English painter, under the protection of a Bedawy chief, visited the spot in the spring of 1842. Crossing from Hebron the territory which lies between the highlands of Judæa and the Dead Sea — the hills being first succeeded by an undulating country, at that season verdant and forming the principal pasture-ground of the Bedawin, this by a range of white, naked, conical hills, mostly barren, and the latter by a rugged, rocky strip, bordering the sea, and cut through by deep wadies — we reached, across a scorched and desolate tract, the lofty cliffs of *Sebbeh* with its ruins, fronted on the west by precipices of a rich, reddish-brown color, the motionless sea lying far below on the east, and the mountains of Moab towering beyond — the whole region wearing an aspect of lonely and stern grandeur. The identification was complete — the lower part of the entire wall which Herod built around the top, and the entire Roman wall of circumsallation below, with the walls of the Roman camps connected with it, undisturbed for eighteen centuries, remaining as they were left, except as partially wasted by the elements. As we looked down on those lines, they vividly recalled the siege and the day when the crimsoned rock on which we stood bore witness to the fulfilment of the fearful imprecation: — "His blood be on us and on our children!" (*Bibl. Sacra*, 1843, pp. 61-67).<sup>a</sup> S. W.

MAS'ALOTH (Μαισαλωθ [so Sin.]; Alex. Μεσσαλωθ: *Masaloth*), a place in Arbela, which Bacchides and Alcimus, the two generals of Demetrius, besieged and took with great slaughter on their way from the north to Gilgal (1 Macc. ix. 2). Arbela is probably the modern *Irbid*, on the south side of the *Wady el Hāmām*, about 3 miles N. W. of Tiberias, and half that distance from the Lake. The name *Mesaloth* is omitted by Josephus (*Ant.* xii. 11, § 1), nor has any trace of it been since discovered; but the word may, as Robinson (*Bibl. Res.* ii. 398) suggests, have originally signified the "steps" or "terraces" (as if מִסְבֵּילִים). In that case it was probably a name given to the remarkable caverns still existing on the northern side of the same wady, and now called *Kula'at Ibn Ma'an*,

the "fortress of the son of Maan" — caverns which actually stood a remarkable siege of some length by the forces of Herod (*Joseph. B. J.* i. 16, § 4).

A town with the similar name of *MISHAL*, or *MASHIAL*, occurs in the list of the tribe of Asher but whether its position was near that assumed above for *Masaloth*, we have no means of judging. G.

MAS'CHIL (מִשְׁכִּיל: σύνεσις: *intellectus*, but in Ps. liii. *intelligentia*). The title of thirteen psalms; xxxii., xlii., xli., xlv., lii.-lv., lxxiv., lxxviii., lxxxviii., lxxxix., xlii. Jerome in his version from the Hebrew renders it uniformly *evuditio*, "instruction," except in Pss. xlii., lxxxix., where he has *intellectus*, "understanding." The margin of our A. V. has in Pss. lxxiv., lxxviii., lxxxix., "to give instruction;" and in Ps. lxxxviii., xlii., "giving instruction." In other passages in which the word occurs, it is rendered "wise" (*Job* xxii. 2; *Prov.* x. 5, 19, &c.), "prudent" (*1*rov. xix. 14; *Am.* v. 13), "expert" (*Jer.* l. 9), and "skillful" (*Dan.* i. 4). In the Psalm in which it first occurs as a title, the root of the word is found in another form (Ps. xxxii. 8), "I will *instruct* thee," from which circumstance, it has been inferred, the title was applied to the whole psalm as "didactic." But since "Maschil" is affixed to many psalms which would scarcely be classed as didactic, Gesenius (or rather Roediger) explains it as denoting "any sacred song, relating to divine things, whose end it was to promote wisdom and piety" (*Theo.* p. 1330). Ewald (*Dichter d. alt. B.* i. 25) regards Ps. xlvii. 7 (A. V. "sing ye praises with *understanding*;" Heb. *maschil*), as the key to the meaning of *Maschil*, which in his opinion is a musical term, denoting a melody requiring great skill in its execution. The objection to the explanation of Roediger is, that it is wanting in precision, and would allow the term "Maschil" to be applied to every psalm in the Psalter. That it is employed to indicate to the conductor of the Temple choir the manner in which the psalm was to be sung, or the melody to which it was adapted, rather than as descriptive of its contents, seems to be implied in the title of Ps. xlv., where, after "Maschil," is added "a song of loves" to denote the special character of the psalm. Again, with few exceptions, it is associated with directions for the choir, "to the chief musician," etc., and occupies the same position in the titles as *Michtam* (Ps. xvi., li.-lx.), *Mizmor* (A. V. "Psalm;" Ps. iv.-vi., etc.), and *Shiggion* (Ps. vii.). If, therefore, we regard it as originally used, in the sense of "didactic," to indicate the character of one particular psalm, it might have been applied to others as being set to the melody of the original *Maschil*-psalm. But the suggestion of Ewald, given above, has most to commend it. Comparing "Maschil" with the musical terms already alluded to, and observing the different manner in which the character of a psalm is indicated in other instances (1 Chr. xvi. 7; Pss. xxxviii., lxx., titles), it seems probable that it was used to convey a direction to the singers as to the mode in which they were to sing. There appear to have been *Maschils* of different kinds, for in addition to those of David which form the greater

<sup>a</sup> \* This place was visited in 1843 by Lieut. Lynch's party, who describes it, yet without alluding to the previous explorations. We record with pleasure M. de Saucy's acknowledgment that, "the honor of having been the first to visit the ruins of Masada belongs un-

questionably to Messrs. Wolcott and Tipping" (*Narrative of a Journey round the Dead Sea*, i. 191 f.). Von Raumer also refers to Dr. Wolcott's discoveries as settling the question of the identification of Masada with the present *Sebbeh* (see *Palæstina*, p. 212, 4th Aufl.). H

number, there are others of Asaph (Pss lxxiv., xxviii.), Heman the Ezrahite (lxxxviii.), and Ethan (lxxxix.). W. A. W.

**MASH** (מַשׁ; מוֹסֹחַ; *Mes*), one of the sons of Aram, and the brother of Uz, Hul, and Gether (Gen. x. 23). In 1 Chr. i. 17 the name appears as Meshech, and the rendering of the LXX., as above given, leads to the inference that a similar form also existed in some of the copies of Genesis. It may further be noticed that in the Chronicles, Mash and his brothers are described as sons of Shem to the omission of Aram; this discrepancy is easily explained: the links to connect the names are omitted in other instances (comp. ver. 4), the ethnologist evidently assuming that they were familiar to his readers. As to the geographical position of Mash, Josephus (*Ant. i.* 6, § 4) connects the name with *Mesene* in lower Babylonia, on the shores of the Persian Gulf—a locality too remote, however, from the other branches of the Aramaic race. The more probable opinion is that which has been adopted by Boehart (*Phal. ii.* 11), Winer (*Rwb. s. v.*), and Knobel (*Völkert. p.* 237)—namely, that the name Mash is represented by the *Mons Masius* of classical writers, a range which forms the northern boundary of Mesopotamia, between the Tigris and Euphrates (Strab. xi. pp. 506, 527). Knobel reconciles this view with that of Josephus by the supposition of a migration from the north of Mesopotamia to the south of Babylonia, where the race may have been known in later times under the name of Meshech: the progress of the population in these parts was, however, in an opposite direction, from south to north. Kalisch (*Comm. on Gen. p.* 286) connects the names of Mash and Mysia: this is, to say the least, extremely doubtful; both the Mysians themselves and their name (= *Mæsia*) were probably of European origin.

W. L. B.

**MA'SHAL** (מִשָּׁל [comparison, proverb]: Vat.] *Μασσα*; [Rom. *Μασσάλ*: Alex.<sup>2</sup> *Μασσαλ*:] *Mas'al*, the contracted or provincial (Galilean) form in which, in the later list of Levitical cities (1 Chr. vi. 74), the name of the town appears, which in the earlier records is given as MISHEAL and MISHAL. It suggests the MASALOTH of the Macabean history. G.

**MASI'AS** (*Μισαίας* [Vat. *Μει-*]; Alex. *Μασί-ας*: *Malsith*), one of the servants of Solomon, whose descendants returned with Zorobabel (1 Esdr. v. 34).

**MAS'MAN** (*Μασμάν*, [Vat.]; Alex. *Μασσαν*: *Masman*). This name occurs for SHEMALAH in 1 Esdr. viii. 43 (comp. Ezr. viii. 16). The Greek text is evidently corrupt, *Σαυαίας* (A. V. *Mamaias*), which is the true reading, being misplaced in ver. 44 after Alnathan.

\* **MASONS.** [HANDICRAFT, 3.]

**MASORA.** [OLD TESTAMENT.]

**MAS'PHA.** 1. (*Μασσφά*: *Maspha*.) A place opposite to (κατέναντι) Jerusalem, at which Judas Maccabæus and his followers assembled themselves to bewail the desolation of the city and the sanctuary, and to inflame their resentment before the battle of Emmaus, by the sight, not only of the distant city, which was probably visible from its eminence, but also of the Book of the Law mutilated and profaned, and of other objects of secular preciousness and sanctity (1 Macc. iii. 46).

There is no doubt that it is identical with ΜΙΖΠΕΗ of Benjamin, the ancient sanctuary at which Samuel had convened the people on an occasion of equal emergency. In fact, Maspha, or more accurately Massôpha, is merely the form in which the LXX. uniformly render the Hebrew name Mizpeh.

2. (*Μασφά*; [Sin. *Μαφα*; Alex. *Μααφα*]; but Josephus *Μάλληρ*: *Maspha*.) One of the cities which were taken from the Ammonites by Judas Maccabæus in his campaign on the east of Jordan (1 Macc. v. 35). It is probably the ancient city of Mizpeh of Gilead. The Syriac has the curious variation of *Olim*, *ܡܫܦܗ*, "salt." Perhaps Josephus also reads *ܡܫܦܗ*, "salt." G.

**MAS'REKAH** (מִשְׁרֵקָה [place of vines]: *Μασρεκᾶς*, in Chron. *Μασρεκᾶς*, and so Alex. in both: *Masreca*), an ancient place, the native spot of Samlah, one of the old kings of the Edomites (Gen. xxxvi. 36; 1 Chr. i. 47). Interpreted as Hebrew, the name refers to vineyards—as if from *Sarak*, a root with which we are familiar in the "vine of Sorek," that is, the choice vine; and led by this, Knobel (*Genesis*, p. 257) proposes to place Masreka in the district of the Idumæan mountains north of Petra, and along the Hadj route, where Burckhardt found "extensive vineyards," and "great quantities of dried grapes," made by the tribe of the *Re'faya* for the supply of Gaza and for the Mecca pilgrims (Burckhardt, *Syria*, Aug. 21). But this is mere conjecture, as no name at all corresponding with Masreka has been yet discovered in that locality. Schwarz (215) mentions a site called *En-Masrak*, a few miles south of Petra. He probably refers to the place marked *Ain Mafrak* in Palmer's Map, and *Ain el-Usdaka* in Kiepert's (Robinson, *Bibl. Res.* 1856). The versions are unanimous in adhering more or less closely to the Hebrew. G.

**MAS'SA** (מַסָּא [present, tribute]: *Μασση*; [in 1 Chron., Vat. *Μαυασση*:] *Massa*), a son of Ishmael (Gen. xxv. 14; 1 Chr. i. 30). His descendants were not improbably the *Masani*, who are placed by Ptolemy (v. 19, § 2) in the east of Arabia, near the borders of Babylonia.

W. L. B.

\* According to some the proper rendering in Prov. xxx. 1 is "Agur the Massite." It is inferred, therefore, that the above Massa was the name also of the place where the wise Agur lived and where Lemuel reigned as king (Prov. xxxi. 1). In support of this conclusion see Bertheau, *Die Sprüche Salomo's*, p. 15 f. Prof. Stuart adopts this opinion in his notes on the above passages (*Comm. on Proverbs*, pp. 401, 421). That view, says Fürst (*Handc. s. v.*), is a doubtful one. The ordinary signification of מַסָּא, the utterance, proverb (in the A. V. "the prophecy"), is entirely appropriate, and is more generally preferred by commentators. See *Munbreit's Sprüche Salomo's*, p. 392. [Further, see AGUR, LEMUEL, UCAL.] H.

**MAS'SAH** (מִסָּה: *πειρασμός*; [in Deut. xxxiii., *πειρά*: *Tentatio*]), i. e. *temptation*, a name given to the spot, also called MERIBAH, where the Israelites "tempted Jehovah, saying, Is Jehovah among us or not?" (Ex. xvii. 7). [See also Deut. vi. 16, ix. 22, xxxiii. 8.] The name also occurs,

with mention of the circumstances which occasioned it, in Ps. xcv. 8, 9, and its Greek equivalent in Heb. iii. 8.

II. II.

MASSIAS (Μασσίας: [Vat. Ασσειας:] *Hismenis*) = MAASEIAH 3 (1 Esdr. ix. 22; comp. Ezr. x. 22).

\* MAST. [SHIP.]

\* MASTER stands in the A. V. as the representation of several different Hebrew and Greek words, but the principal use of the term which demands notice here is that in which, as in Matt. viii. 19 (διδάσκαλος, given in John i. 38, xx. 16, as equivalent to the Hebrew words Rabbi and Rabboni), it is often applied to our Lord as a title of respect. [RABBI.] It is by a reference to the common application of this term among the Jews, that we must probably explain our Lord's reproof of the person spoken of in Mark x. 17 and Luke xvii. 18 (designated in the latter account as a ruler; the reading of the received text, Matt. xix. 16, is apparently corrupt), for addressing him as "Good Master." The expression, in itself appropriate, was employed improperly by the speaker, who designed nothing more in the use of it than to recognize our Saviour as one who, although perhaps distinguished by preëminent attainments and character, was not essentially different from the ordinary Rabbis. Our Lord applies the term so rendered to Nicodemus (John iii. 10), with special emphasis: "Art thou the master (teacher) of Israel," as expressive probably of the high authority Nicodemus enjoyed among his countrymen as a teacher of religion. This title of "master," as the translation of διδάσκαλος, is given to our Lord about forty times in the Gospels. The sense would often be clearer to the English reader if "teacher" were substituted for it. By "master of the ship" (Acts xxvii. 11), the man at the rudder or the helmsman (κυβερνήτης) is meant. [GOVERNOR, 15.] For the interchange of "master of the house," and "good man of the house," see vol. i. p. 939.

The expression "master and scholar," Mal. ii. 12 (Heb. יָרֵךְ וְעֵבֶר), which suggests a usage somewhat like that so common in the N. T., is probably a mistranslation. The literal meaning seems to be *caller* (or *watcher*) and *answerer*, apparently a proverbial expression for every living person, referring perhaps originally to watchmen calling to and answering one another (comp. Ps. cxxiv. 1; Is. lxii. 6).

The very obscure phrase בְּעֵלֵי הַקְּפֹתָא (Eccl. xii. 11), translated in A. V. "masters of assemblies," is variously explained, as, *e. g.* referring (1) to the *nails driven in*, just spoken of, represented here as *instruments of fastening* (Rosenmüller); (2) to the gathered "words of the wise," *contents of collections* (Ewald, Heiligstedt, Hitzig); (3) to the collectors themselves, either as the masters, authors of the collections (De Wette), or as members of an assembly (Gesenius, Fürst, and Hengstenberg, comp. Jerome in Vulgate). The last view is

perhaps, on the whole, the most probable, especially if we are at liberty, with Kimchi, to supply מְבַרְכֵי before מְבַרְכֵי הַקְּפֹתָא.

D. S. T.

\* MASTERIES is the rendering of ἀθλητὴν in 2 Tim. ii. 5, which is literally "if any one strive," *i. e.* for preëminence as an athlete. The A. V. follows the earlier English versions from Tyndale onward, except the change of "mastery" to "masteries." Further, see GAMES, vol. i. p. 464 a.

II.

MASTICH-TREE (σχίνος, *lentiscus*) occurs only in the Apocrypha (Susan. ver. 54<sup>a</sup>), where the margin of the A. V. has *lentisk*. There is no doubt that the Greek word is correctly rendered, as is evident from the description of it by Theophrastus (*Hist. Plant.* ix. i. §§ 2, 4, § 7, &c.); Pliny (*H. N.* iii. 36, xxiv. 28); Dioscorides (i. 90), and other writers. Herodotus (iv. 177) compares the fruit of the lotus (the *Rhamnus lotus*, Linn., not the Egyptian *Nelumbium speciosum*) in size with the mastich berry, and Babrius (3, 5) says its leaves are browsed by goats. The fragrant resin known in the arts as "mastick," and which is obtained by incisions made in the trunk in the month of August, is the produce of this tree, whose scientific name is *Pistacia lentiscus*. It is used with us to strengthen the teeth and gums, and was so applied by the ancients, by whom it was much prized on this account, and for its many supposed medicinal virtues. Lucian (*Lexiph.* p. 12) uses the term σχινοτρόκτης of one who chews mastich wood in order to whiten his teeth. Martial (*Ép.* xiv. 22) recommends a mastich toothpick (*denticulipium*). Pliny (xxiv. 7) speaks of the leaves of this tree being rubbed on the teeth for toothache. Dioscorides (i. 90) says the resin is often mixed with other materials and used as tooth-powder, and that, if chewed,<sup>b</sup> it imparts a sweet odor to the breath. Both Pliny and Dioscorides state that the best mastich comes from Chios, and to this day the Arabs prefer that which is imported from that island (comp. Niebuhr, *Beschr. von Arab.* p. 144; Galen, *de fac. Simpl.* 7, p. 69). Tournefort (*Voyages*, ii. 58-61, transl. 1741) has given a full and very interesting account of the lentisks or mastich plants of Scio (Chios): he says that "the towns of the island are distinguished into three classes, those *del Campo*, those of *Apenomeria*, and those where they plant *lentisk-trees*, from whence the mastich in tears is produced." Tournefort enumerates several lentisk-tree villages. Of the trees he says, "these trees are very wide spread and circular, ten or twelve feet tall, consisting of several branchy stalks which in time grow crooked. The biggest trunks are a foot in diameter, covered with a bark, grayish, rugged, chapt . . . the leaves are disposed in three or four couples on each side, about an inch long, narrow at the beginning, pointed at their extremity, half an inch broad about the middle. From the junctures of the leaves grow flowers in bunches like grapes (see woodcut); the fruit too grows like bunches of grapes, in each berry whereof is contained a white

<sup>a</sup> This verse contains a happy play upon the word. Under what tree sawest thou them? . . . undea a mastich-tree (ὑπὸ σχίνου). And Daniel said . . . the angel of God hath received the sentence of God to cut thee in two (σχίσσει σε μέσον). This is unfortunately lost in our version; but it is preserved by the Vulgate, "sub schino scindet te;" and by

Luther, "Linde . . . finden." A similar play occurs in vv. 58, 59, between πίνων, and πρίσα σε. For the bearing of these and similar characteristics on the date and origin of the book, see SUSANNA.

<sup>b</sup> Whence the derivation of *mastic*, from μαστίχη the gum of the σχίνος, from μάσταξ, μαστιχώ, μαστομα, "to chew," "to masticate."

cernel. These trees blow in May, the fruit does not ripen but in autumn and winter." This writer gives the following description of the mode in which the mastick gum is procured. "They begin to make incisions in these trees in Scio the first of August, cutting the bark crossways with huge knives, without touching the younger branches; next day the nutritious juice distils in small tears, rich by little and little from the mastick grains;

Mastick (*Pistacia lentiscus*)

they harden on the ground, and are carefully swept up from under the trees. The height of the crop is about the middle of August if it be dry serene weather, but if it be rainy, the tears are all lost. Likewise towards the end of September the same incisions furnish mastick, but in lesser quantities." Besides the uses to which reference has been made above, the people of Scio put grains of this resin in perfumes, and in their bread before it goes to the oven.

Mastick is one of the most important products of the East, being extensively used in the preparation of spirits, as juniper berries are with us, as a sweetmeat, as a masticatory for preserving the gums and teeth, as an antispasmodic in medicine, and as an ingredient in varnishes. The Greek writers occasionally use the word *σχινος* for an entirely different plant, namely, the Squill (*Scilla maritima*) (see Aristoph. *Plut.* p. 715; Sprengel, *Flor. Hippoc.* p. 41; Theophr. *Hist. Plant.* v. 6, § 10). The *Pistacia lentiscus* is common on the shores of the Mediterranean. According to Strand (*Flor. Palest.* No. 559) it has been observed at Joppa, both by Rauwolf and Pöcocke. The mastick-tree belongs to the natural order *Anacardiaceae*.  
W. H.

\* The *Pistacia lentiscus* is found in Syria, on Mt. Lebanon. I am not aware that the gum is extracted from it for purposes of commerce.

G. E. P.

**MATHANIAS** (*Μαθανίας*; [Vat. Βεσκα-*ρασμυς*]: *Mathathias*) = MATTANIAH, a de-

scendant of Pahath-Moab (1 Esdr. ix. 31, comp Ezr. x. 30).

**MATHU'SALA** (*Μαθουσαλα*: *Mathusale*) = MATHUSELAIH, the son of Enoch (Luke iii. 37).

**MATRED** (מַטְרֵד [thrusting forth, repe-  
ling]: *Ματραθ*; Alex. *Ματραθ*: [in 1 Chr., Rom. Vat. omit, Alex. *Ματραδ*]: *Matred*), a daughter of Mezahab, and mother of Mehetabel, who was wife of Hadar (or Hadad) of Pau, king of Edom (Gen. xxxvi. 39; 1 Chr. i. 50). Respecting the kings of Edom, whose records are contained in the chapters referred to, see HADAD, IRAM, etc.

E. S. P.

**MATRI** (מַטְרִי [with the art., properly the *Matvi*: *Ματραρι*; [Vat. *Ματραραι*: Alex. *Ματραραι* and *Ματραραι*: *Matvi*]), a family of the tribe of Benjamin, to which Saul the king of Israel belonged (1 Sam. x. 21).

**MATTAN** (מַטְתָּן [gift]: *Μαθάν*, [Vat. *Μαγθαν*,] Alex. *Μαχαν* in Kings; *Μαθάν* in Chron.: *Mathan*). 1. The priest of Baal slain before his altars in the idol temple at Jerusalem, at the time when Jehoiada swept away idolatry from Judah (2 K. xi. 18; 2 Chr. xxiii. 17). He probably accompanied Athaliah from Samaria, and would thus be the first priest of the Baal-worship which Jehoram king of Judah, following in the steps of his father-in-law Ahab, established at Jerusalem (2 Chr. xxi. 6, 13); Josephus (*Ant.* ix. 7, § 3) calls him *Μααθάν*.

2. (*Νάθαν*.) The father of Shephathiah. (Jer. xxxviii. 1).  
W. A. W.

**MATTANAH** (מַטְתָּנָה [gift]: *Μαθθαναιίν*; Alex. [*Μαθθανιν*,] *Μαθθανειν*: *Maththano*), a station in the latter part of the wanderings of the Israelites (Num. xxi. 18, 19). It lay next beyond the well, or Beer, and between it and Nahaliel: Nahaliel again being but one day's journey from the Bamoth or heights of Moab. Mattanah was therefore probably situated to the S. E. of the Dead Sea, but no name like it appears to have been yet discovered. The meaning at the root of the word (if taken as Hebrew) is a "gift," and accordingly the Targumists—Onkelos as well as Pseudojonathan and the Jerusalem—treat Mattanah as if a synonym for BEER, the well which was "given" to the people (ver. 16). In the same vein they further translate the names in verse 20: and treat them as denoting the valleys (Nahaliel) and the heights (Bamoth), to which the miraculous well followed the camp in its journeyings. The legend is noticed under BEER.<sup>a</sup> By Le Clerc it is suggested that Mattanah may be the same with the mysterious word *Vahab* (ver. 14; A. V. "what he did")—since the meaning of that word in Arabic is the same as that of Mattanah in Hebrew. G.

vah]: *Μαθθανίας*; [Vat. *Μαθθαν*]: Alex. *Μεθ-  
θανίας*: *Maththanas*). 1. The original name of Zedekiah king of Judah, which was changed when Nebuchadnezzar placed him on the throne instead of his nephew Jehoiachin (2 K. xxiv. 17). In like manner Pharaoh had changed the name of his brother Eliakim to Jehoiakim or a similar occa-

<sup>a</sup> Vol. i. p. 264 b. In addition to the authorities here cited, the curious reader who may desire to investigate this remarkable tradition will find it ex-

hausted in Pictorf's *Exercitationes* (No. v. *Hist. Po-  
trae in Deserto*).

son (2 K. xxiii. 34), when he restored the succession to the elder branch of the royal family (comp. 2 K. xxiii. 31, 36).

2. (*Marthavias* in Chr., and Neh. xi. 17; *Marthavia*, Neh. xii. 8, 35; Alex. *Maθθavias*, Neh. xi. 17, *Maθavia*, Neh. xii. 8, *Maθθavia*, Neh. xii. 35; [Vat. in Chr., *Mavθavias*; in Neh. xi. 17, xii. 35, xiii. 13, *Maθavia*; Neh. xii. 8, *Maθavia*; 35, *Naθavia*; Neh. xi. 22, xii. 25, Koum. Vat. Alex. FA. 1 omit;] *Mathanius*, exc. Neh. xii. 8, 35, *Mathanius*.) A Levite singer of the sons of Asaph (1 Chr. ix. 15). He is described as the son of Micah, Micha (Neh. xi. 17), or Michaiah (Neh. xii. 35), and after the return from Babylon lived in the villages of the Netophathites (1 Chr. ix. 16) or Netophathi (Neh. xii. 28), which the singers had built in the neighborhood of Jerusalem (Neh. xii. 29). As leader of the Temple choir after its restoration (Neh. xi. 17, xii. 8) in the time of Nehemiah, he took part in the musical service which accompanied the dedication of the wall of Jerusalem (Neh. xii. 25, 35). We find him among the Levites of the second rank, "keepers of the thresholds," an office which fell to the singers (comp. 1 Chr. xv. 18, 21). In Neh. xii. 35, there is a difficulty, for "Mattaniah, the son of Michaiah, the son of Zaccur, the son of Asaph," is apparently the same with "Mattaniah, the son of Micha, the son of Zabdi the son of Asaph" (Neh. xi. 17), and with the Mattaniah of Neh. xii. 8, 25, who, as in xi. 17, is associated with Bakkukiah, and is expressly mentioned as living in the days of Nehemiah and Ezra (Neh. xii. 26). But, if the reading in Neh. xii. 35 be correct, Zechariah, the great-grandson of Mattaniah (further described as one of "the priests' sons,"<sup>a</sup> whereas Mattaniah was a Levite), blew the trumpet at the head of the procession led by Ezra, which marched round the city wall. From a comparison of Neh. xii. 35 with xii. 41, 42, it seems probable that the former is corrupt, that Zechariah in verses 35 and 41 is the same priest, and that the clause in which the name of Mattaniah is found is to be connected with ver. 36, in which are enumerated his "brethren" alluded to in ver. 8.

3. (*Marthavias*; [Vat. *Mavθavias*;] *Mathanius*.) A descendant of Asaph, and ancestor of Jahaziel the Levite in the reign of Jehoshaphat (2 Chron. xx. 14).

4. (*Marthavia*; [Vat. FA. *Maθavia*;] Alex. *Maθθavia*; *Mathania*.) One of the sons of Elam who had married a foreign wife in the time of Ezra (Ezr. x. 26). In 1 Esdr. ix. 27 he is called MATHANIAS.

5. (*Marthava*; [Vat. *Aθavia*;] Alex. *Maθθava*.) One of the sons of Zattu in the time of Ezra who put away his foreign wife (Ezr. x. 27). He is called ORTHONIAS in 1 Esdr. ix. 28.

6. (*Marthavia*; [Vat. *Auαθavia*;] Alex. *Maθθavia*; *Mathanius*.) A descendant of Pahath-Moab who lived at the same time, and is mentioned under the same circumstances as the two preceding (Ezr. x. 30). In 1 Esdr. ix. 31, he is called MATHANIAS.

7. [*Marthavia*; Vat. FA. *Maθavia*; Alex. *Maθθavia*; *Mathanius*.] One of the sons of Bani, who like the three above mentioned, put away his foreign wife at Ezra's command (Ezr. x. 37). In the

parallel list of Esdr. ix. 34, the names "Matta. jah Mattenai," are corrupted into MAMNITANAIMUS.

8. (*Marthavias*; [Vat. *Naθavia*; FA. \* *Maθavia*;] Alex. *Maθθavias*.) A Levite, father of Zaccur, and ancestor of Hanan the under-treasurer who had charge of the offerings for the Levites in the time of Nehemiah (Neh. xiii. 13).

9. (*מַתְּנַי*) [*gift of Jehovah*]: *Marthavias*; [Vat. *Mavθavias*;] *Mathanius*, 1 Chr. xxv. 4; *Mathanias*, 1 Chr. xxv. 16), one of the fourteen sons of Heman the singer, whose office it was to blow the horns in the Temple service as appointed by David. He was the chief of the 9th division of twelve Levites who were "instructed in the songs of Jehovah."

10. [*Marthavias*; *Mathanias*.] A descendant of Asaph, the Levite minstrel, who assisted in the purification of the Temple in the reign of Hezekiah (2 Chr. xxix. 13). W. A. W.

MAT'TATHA (*Ματταθά*: *Mathatha*), the son of Nathan, and grandson of David in the genealogy of our Lord (Luke iii. 31).

MAT'TATHAH (*מַתְּתָה*) [*gift of Jehovah*, contracted from the above]: *Marthada*; Alex. *Maθθaha*: *Mathatha*), a descendant of Hashum, who had married a foreign wife in the time of Ezra, and was separated from her (Ezr. x. 33). He is called MATTHIAS in 1 Esdr. ix. 33.

MATTATHIAS (*Ματταθίας*: *Mathathias*). 1. = MATTHIAS, who stood at Ezra's right hand when he read the Law to the people (1 Esdr. ix. 43; comp. Neh. viii. 4).

2. (*Mathathias*). The father of the Maccabees (1 Macc. ii. 1, 14, 16, 17, 19, 24, 27, 39, 45, 49, xiv. 29). [MACCABEES, vol. ii. p. 1710 a.]

3. (*Mathathias*). The son of Absalom, and brother of JONATHAN 14 (1 Macc. xi. 70, xiii. 11). In the battle fought by Jonathan the high-priest with the forces of Demetrius on the plain of Nasor (the old Hazor), his two generals Mattathias and Judas alone stood by him, when his army was seized with a panic and fled, and with their assistance the fortunes of the day were restored.

4. (*Mathathias*). The son of Simon Maccabeus, who was treacherously murdered, together with his father and brother, in the fortress of Docus, by Ptolemy the son of Abubus (1 Macc. xvi. 14).

5. (*Matthias*.) One of the three envoys sent by Nicanor to treat with Judas Maccabeus (2 Macc. xiv. 19).

6. (*Mathathias*.) Son of Amos, in the genealogy of Jesus Christ (Luke iii. 25).

7. (*Mathathias*.) Son of Semei, in the same catalogue (Luke iii. 26). W. A. W.

MAT'TENAI [3 syl.] (*מַתְּנַי*) [*gift of Jehovah*, see above]: *Merthavia*; [Vat. FA. *Maθθavia*;] Alex. *Maθθava*; *Mathavai*). 1. One of the family of Hashum, who in the time of Ezra had married a foreign wife (Ezr. x. 33). In 1 Esdr. ix. 33 he is called ALTANEUS.

2. (*Marthava*; [Vat. *Maθavav*; FA. *Maθava*;] Alex. *Maθθava*; *Mathanai*.) A descendant of Bani, who put away his foreign wife at Ezra's command (Ezr. x. 37). The place of this name and of Mattaniah which precedes it is occupied in 1 Esdr. ix. 34 by MAMNITANAIMUS.

<sup>a</sup> The word "priest" is apparently applied in a less restricted sense in later times, for we find in Ezr. viii. 14 Elerebiah and Hashabiah described as among the "chiefs of the priests," whereas, in vv. 18, 19, they

are Merarite Levites; if, as is probable, the same persons are alluded to in both instances. Comp. also Josh. iii. 3 with Num. vii. 9.

3. [Vat. Alex. FA. omit; Rom. *Marθavaλ*.] A priest in the days of Joiakim the son of Jeshua (Neh. xii. 19). He represented the house of Joiarib.

**MATTHAN** (Rec. Text, *Marθάν*, Lachm. [Tisch. Treg.] with B, *Maθθάν*: *Mithon*, *Matthan*). The son of Eleazar, and grandfather of Joseph "the husband of Mary" (Matt. i. 15). He occupies the same place in the genealogy as **MATTHAT** in Luke iii. 24, with whom indeed he is probably identical (Hervey, *Genealogies of Christ*, 129, 134, &c.). "He seems to have been himself descended from Joseph the son of Judah, of Luke iii. 26, but to have become the heir of the elder branch of the house of Abiud on the failure of Eleazar's issue (*ib.* 134).

**MATTHANIAS** (*Marθανίας*; [Vat. *Mat-tan*]) = **MATTANIAS**, one of the descendants of Elian (1 Esdr. ix. 27; comp. Esr. x. 26). In the Vulgate, "Ela, Mathanias," are corrupted into "Jolaman, Chamas," which is evidently a transcriber's error.

**MATTHAT** (*Marθάρ*; but Tisch. [7th ed.] *Maθάρ* [8th edition, *Maθθάρ*): *Muthat*, *Mutlat*, *Matthad*, etc.). 1. Son of Levi and grandfather of Joseph, according to the genealogy of Luke (iii. 24). He is maintained by Lord A. Hervey to have been the same person as the **MATTATHAN** of Matt. i. 15 (see *Genealogies of Christ*, 137, 138, &c.).

2. [Tisch. *Maθθάρ*.] Also the son of a Levi, and progenitor of Joseph, but much higher up in the line, namely, eleven generations from David (Luke iii. 29). Nothing is known of him.

It should be remarked that no fewer than five names in this list are derived from the same Hebrew root as that of their ancestor **NATHAN** the son of David (see Hervey, *Genealogies*, etc., p. 150).

**MATTHELAS** (*Maθήλας*; [Vat. *Maεηλας*.] *Maseus*) = **MAASEIAH** 1 (1 Esdr. ix. 19; comp. Esr. x. 18). The reading of the LXX. which is followed in the A. V. might easily arise from a mistake between the uncial Θ and Σ (C).

**MATTHEW** (Lachm. [Tisch. Treg.] with [Sin.] BD, *Maθθαίος*; AC and Rec. Text, *Marθαίος*: *Matthæus*). Matthew the Apostle and Evangelist is the same as **LEVI** (Luke v. 27-29), the son of a certain Alphaeus (Mark ii. 14). His call to be an Apostle is related by all three Evangelists in the same words, except that Matthew (ix. 9) gives the former, and Mark (ii. 14) and Luke (v. 27) the latter name. If there were two publicans, both called solemnly in the same form at the same place, Capernaum, then one of them became an Apostle, and the other was heard of no more; for Levi is not mentioned again after the feast which he made in our Lord's honor (Luke v. 29). This is most unlikely. Euthymius and many other commentators of note identify Alphaeus the father of Matthew with Alphaeus the father of James the Less. Against this is to be set the fact that in the lists of Apostles (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13), Matthew and James the Less are never named together, like other pairs of brothers in the apostolic body. [See addition to **ALPHÆUS**, Amer. ed.] It may be, as in other cases, but the name Levi was replaced by the name Matthew at the time of the call. According to Gesenius, the names *Matthæus* and *Matthias* are both

contractions of *Mattathias* (= מַתְתִּיָּהוּ, "gift of Jehovah," Θεόδωρος, Θεόδοτος), a common

Jewish name after the exile; but the true derivation is not certain (see Wiener, Lange). The publicans, properly so called (*publicani*), were persons who farmed the Roman taxes, and they were usually, in later times, Roman knights, and persons of wealth and credit. They employed under them inferior officers, natives of the province where the taxes were collected, called properly *portitores*, to which class Matthew no doubt belonged. These latter were notorious for impudent exactions everywhere (Plautus, *Menæch.* i. 2, 5; Cic. *ad Quint. Fr.* i. 1; Plut. *De Curios.* p. 518 e); but to the Jews they were especially odious, for they were the very spot where the Roman chain galled them, the visible proof of the degraded state of their nation. As a rule, none but the lowest would accept such an unpopular office, and thus the class became more worthy of the hatred with which in any case the Jews would have regarded it. The readiness, however, with which Matthew obeyed the call of Jesus seems to show that his heart was still open to religious impressions. His conversion was attended by a great awakening of the outcast classes of the Jews (Matt. ix. 9, 10). Matthew in his Gospel does not omit the title of infamy which had belonged to him (x. 3); but neither of the other Evangelists speaks of "Matthew the publican." Of the exact share which fell to him in preaching the Gospel we have nothing whatever in the N. T., and other sources of information we cannot trust.

Eusebius (*H. E.* iii. 24) mentions that after our Lord's ascension Matthew preached in Judæa (some add for fifteen years; Clem. *Strom.* vi.), and then went to foreign nations. To the lot of Matthew it fell to visit Ethiopia, says Socrates Scholasticus (*H. E.* i. 19; Ruff. *H. E.* x. 9). But Ambrose says that God opened to him the country of the Persians (*In Ps.* 45); Isidore the Maccedonian (Isidore *Hisp. de Sanct.* 77); and others the Parthians, the Medes, the Persians of the Euphrates. Nothing whatever is really known. Heracleon, the disciple of Valentinus (cited by Clemens Alex. *Strom.* iv. 9), describes him as dying a natural death, which Clement, Origen, and Tertullian seem to accept: the tradition that he died a martyr, be it true or false, came in afterwards (Niceph. *H. E.* ii. 41).

If the first feeling on reading these meagre particulars be disappointment, the second will be admiration for those who, doing their part under God in the great work of founding the Church on earth, have passed away to their Master in heaven without so much as an effort to redeem their names from silence and oblivion. (For authorities see the works on the Gospels referred to under **LUKE** and **GOSPELS**; also Fritzsche, *In Matthæum*, Leipzig, 1826; Lange, *Bibelwerk*, part i.) W. T.

**MATTHEW. GOSPEL OF.** The Gospel which bears the name of St. Matthew was written by the Apostle, according to the testimony of all antiquity.

1. *Language in which it was first written.*—We are told on the authority of Papias, Irenæus, Pantænus, Origen, Eusebius, Epiphanius, Jerome, and many other Fathers, that the Gospel was first written in Hebrew, *i. e.* in the vernacular language of Palestine, the Aramaic. (*a.*) Papias of Hierapolis (who flourished in the first half of the 2d century) says, "Matthew wrote the divine oracles (τὰ λόγια) in the Hebrew dialect, and each interpreted them as he was able" (Eusebius, *H. E.* iii. 39). It has

been held that τὰ λόγια is to be understood as a collection of discourses, and that therefore the book here alluded to, contained not the acts of our Lord but his speeches; but this falls through, for Papias applies the same word to the Gospel of St. Mark, and he uses the expression λόγια κυριακά in the title of his own work, which we know from fragments to have contained facts as well as discourses (*Studien und Kritiken*, 1832, p. 735; Meyer, *Einführung*; De Wette, *Einführung*, § 97 a; Alford's *Prolegomena to Gr. Test.* p. 25). Eusebius, indeed, in the same place pronounces Papias to be "a man of very feeble understanding," in reference to some false opinions which he held; but it requires little critical power to bear witness to the fact that a certain Hebrew book was in use. (b.) Irenæus says (iii. 1), that "whilst Peter and Paul were preaching at Rome and founding the Church, Matthew put forth his written Gospel amongst the Hebrews in their own dialect." It is objected to this testimony that Irenæus probably drew from the same source as Papias, for whom he had great respect: this assertion can neither be proved nor refuted, but the testimony of Irenæus is in itself no mere copy of that of Papias. (c.) According to Eusebius (*H. E.* v. 10), Pantenus who flourished in the latter part of the 2d century "is reported to have gone to the Indians" (i. e. to the south of Arabia?), "where it is said that he found the Gospel of Matthew already among some who had the knowledge of Christ there, to whom Bartholomew, one of the Apostles, had preached, and left them the Gospel of Matthew written in Hebrew, which was preserved till the time referred to." We have no writings of Pantenus, and Eusebius recites the story with a kind of doubt. It reappears in two different forms: Jerome and Rufinus say that Pantenus brought back with him this Hebrew Gospel, and Nicephorus asserts that Bartholomew dictated the Gospel of Matthew to the inhabitants of that country. Upon the whole, Pantenus contributes but little to the weight of the argument. (d.) Origen says (*Comment. on Matt.* i. in Eusebius, *H. E.* vi. 25), "As I have learnt by tradition concerning the four Gospels, which alone are received without dispute by the Church of God under heaven: the first was written by St. Matthew, once a tax-gatherer, afterwards an Apostle of Jesus Christ, who published it for the benefit of the Jewish converts, composed in the Hebrew language." The objections to this passage brought by Masch, are disposed of by Michaelis iii. part i. p. 127; the "tradition" does not imply a doubt, and there is no reason for tracing this witness also to Papias. (e.) Eusebius (*H. E.* iii. 24) gives as his own opinion the following: "Matthew having first preached to the Hebrews, delivered to them, when he was preparing to depart to other countries, his Gospel, composed in their native language." Other passages to the same effect occur in Cyril (*Catech.* p. 14), Epiphanius (*Her.* li. 2, 1), Hieronymus (*de Vir. ill.* ch. 3), who mentions the Hebrew original in seven places at least of his works, and from Gregory of Nazianzus, Chrysostom, Augustine, and other later writers. From all these there is no doubt that the old opinion was that Matthew wrote in the Hebrew language. To whom we are to attribute the Greek translation, is not shown; but the quotation of Papias proves that in the time of John the Presbyter, and probably in that of Papias, there was no translation of great authority, and Jerome (*de Vir. ill.* ch. 3) ex-

pressly says that the translator's name was uncertain.

So far all the testimony is for a Hebrew original. But there are arguments of no mean weight in favor of the Greek a very brief account of which may be given here. 1. The quotations from the O. T. in this Gospel, which are very numerous (see below), are of two kinds: those introduced into the narrative to point out the fulfillment of prophecies, etc., and those where in the course of the narrative the persons introduced, and especially our Lord Himself, make use of O. T. quotations. Between these two classes a difference of treatment is observable. In the latter class, where the citations occur in discourses, the Septuagint version is followed, even where it deviates somewhat from the original (as iii. 3, xiii. 14), or where it ceases to follow the very words, the deviations do not come from a closer adherence to the Hebrew O. T.; except in two cases, xi. 10 and xxvi. 31. The quotations in the narrative, however, do not follow the Septuagint, but appear to be a translation from the Hebrew text. Thus we have the remarkable phenomenon that, whereas the Gospels agree most exactly in the speeches of persons, and most of all in those of our Lord, the quotations in these speeches are reproduced not by the closest rendering of the Hebrew, but from the Septuagint version, although many or most of them must have been spoken in the vernacular Hebrew, and could have had nothing to do with the Septuagint. A mere translator could not have done this. But an independent writer, using the Greek tongue, and wishing to conform his narrative to the oral teaching of the Apostles (see vol. ii. p. 948 b), might have used for the quotations the well-known Greek O. T. used by his colleagues. There is an independence in the mode of dealing with citations throughout, which is inconsistent with the function of a mere translator. 2. But this difficulty is to be got over by assuming a high authority for this translation, as though made by an inspired writer; and it has been suggested that this writer was Matthew himself (Bengel, Olshausen, Lee, and others), or at least that he directed it (Guericke), or that it was some other Apostle (Gerhard), or James the brother of the Lord, or John, or the general body of the Apostles, or that two disciples of St. Matthew wrote, from him, the one in Aramaic and the other in Greek! We are further invited to admit, with Dr. Lee, that the Hebrew book "belonged to that class of writings which, although composed by inspired men, were never designed to form part of the Canon" (*On Inspiration*, p. 571). But supposing that there were any good ground for considering these suggestions as facts, it is clear that in the attempt to preserve the letter of the tradition, they have quite altered the spirit of it. Papias and Jerome make a Hebrew original, and dependent translations; the moderns make a Greek original, which is a translation only in name, and a Hebrew original never intended to be preserved. The modern view is not what Papias thought or uttered; and the question would be one of mere names, for the only point worthy of a struggle is this, whether the Gospel in our hands is or is not of apostolic authority, and authentic. 4. Olshausen's remarks, "While all the fathers of the church relate that Matthew has written in Hebrew, yet they universally make use of the Greek text, as a genuine apostolic composition, without remarking what relation the Hebrew Matthew bears to our Greek

**Gospel.** For that the earlier ecclesiastical teachers did not possess the Gospel of St Matthew in any other form than we now have it, is established" (*Echtheit*, p. 35). The original Hebrew of which so many speak, no one of the witnesses ever saw (Jerome, *de Vir. ill.* p. 3, is no exception). And so little store has the church set upon it, that it has utterly perished. 5. Were there no explanation of this inconsistency between assertion and fact, it would be hard to doubt the concurrent testimony of so many old writers, whose belief in it is shown by the tenacity with which they held it in spite of their own experience. But it is certain that a Gospel, not the same as our canonical Matthew, sometimes usurped the Apostle's name; and some of the witnesses we have quoted appear to have referred to this in one or other of its various forms or names. The Christians in Palestine still held that the Mosaic ritual was binding on them, even after the destruction of Jerusalem. At the close of the first century one party existed who held that the Mosaic law was only binding on Jewish converts — this was the Nazarenes. Another, the Ebionites, held that it was of universal obligation on Christians, and rejected St. Paul's Epistles as teaching the opposite doctrine. These two sects, who differed also in the most important tenets as to our Lord's person, possessed each a modification of the same Gospel, which no doubt each altered more and more, as their tenets diverged, and which bore various names — the Gospel of the Twelve Apostles, the Gospel according to the Hebrews, the Gospel of Peter, or the Gospel according to Matthew. Enough is known to decide that the Gospel according to the Hebrews was not identical with our Gospel of Matthew. But it had many points of resemblance to the synoptical gospels, and especially to Matthew. What was its origin it is impossible to say: it may have been a description of the oral teaching of the Apostles, corrupted by degrees; it may have come in its early and pure form from the hand of Matthew, or it may have been a version of the Greek Gospel of St. Matthew, as the Evangelist who wrote especially for Hebrews. Now this Gospel, "the Proteus of criticism" (Thiersch), did exist; is it impossible that when the Hebrew Matthew is spoken of, this questionable document, the Gospel of the Hebrews, was really referred to? Observe that all accounts of it are at second hand (with a notable exception); no one quotes it; in cases of doubt about the text, Origen even does not appeal from the Greek to the Hebrew. All that is certain is, that Nazarenes or Ebionites, or both, boasted that they possessed the original Gospel of Matthew. Jerome is the exception; and him we can convict of the very mistake of confounding the two, and almost on his own confession. "At first he thought," says an anonymous writer (*Edinburgh Review*, 1851, July, p. 39), "that it was the authentic Matthew, and translated it into both Greek and Latin from a copy which he obtained at Berea, in Syria. This appears from his *De Vir. ill.*, written in the year 392. Six years later, in his Commentar on Matthew, he spoke more doubtfully about it, — 'quod vocatur *ϕερικισque* Matthaei authenticum.' Later still, in his book on the Pelagian heresy, written in the year 415, he modifies his account still further, describing the work as the 'Evangelium juxta Hebraeos, quod Chaldaico quidem Syroque *συνταξισque* Hebraicis literis conscriptum est, quo utuntur *ϕερικ* hodie Nazareni secundum Apostolos, sive ut

*ϕερικη autumant juxta* Matthaeum, quod est in Casariensi habetur Bibliotheca." 5. Dr. Lee in his work on Inspiration asserts, by an oversight unusual with such a writer, that the theory of a Hebrew original is "generally received by critics as the only legitimate conclusion." Yet there have pronounced for a Greek original — Erasmus, Calvin, Le Clerc, Fabricius, Lightfoot, Wetstein, Paulus, Lardner, Hey, Hailes, Hug, Schott, De Wette, Moses Stuart, Fritzsche, Credner, Thiersch, and many others. Great names are ranged also on the other side: as Simon, Mill, Michaelis, Marsh, Eichhorn, Storr, Olshausen, and others.

With these arguments we leave a great question unsettled still, feeling convinced of the early acceptance and the Apostolic authority of our "Gospel according to St. Matthew;" and far from convinced that it is a reproduction of another Gospel from St. Matthew's hand. May not the truth be that Papias, knowing of more than one Aramaic Gospel in use among the Judaic sects, may have assumed the existence of a Hebrew original from which these were supposed to be taken, and knowing also the genuine Greek Gospel, may have looked on all these, in the loose uncritical way which earned for him Eusebius' description, the various "interpretations" to which he alludes?

The independence of the style and diction of the Greek Evangelist, will appear from the remarks in the next section.

**BIBLIOGRAPHY.** — Hug's *Einleitung*, with the Notes of Professor M. Stuart, Andover, 1836. Meyer, *Komm. Einleitung*, and the Commentaries of Kuinöl, Fritzsche, Alford, and others. The passages from the Fathers are discussed in Michaelis (ed. Marsh, vol. iii. part i.); and they will be found for the most part in Kirchhofer, *Quellensammlung*; where will also be found the passages referring to the Gospel of the Hebrews, p. 448. Credner's *Einleitung*, and his *Beiträge*; and the often cited works on the Gospels, of Gieseler, Baur, Norton, Olshausen, Weisse, and Hilgenfeld. Also Cureton's *Syriac Gospels*; but the views in the preface must not be regarded as established. Dr. Lee on *Inspiration*, Appendix P., London, 1857.

**I. Style and Diction.** — The following remarks on the style of St. Matthew are founded on those of Credner.

1. Matthew uses the expression "that it might be fulfilled which was spoken of the Lord by the prophet" (i. 22, ii. 15). In ii. 5, and in later passages of Matt. it is abbreviated (ii. 17, iii. 3, iv. 14, viii. 17, xii. 17, xiii. 14, 35, xxi. 4, xxvi. 56, xxvii. 9). The variation *ὑπὸ τοῦ Θεοῦ* in xxii. 31 is notable; and also the *τοῦτο δὲ ὅλον γέγονεν* of i. 22, not found in other Evangelists; but compare Mark xiv. 49; Luke xxiv. 44.

2. The reference to the Messiah under the name "Son of David," occurs in Matthew eight times; and three times each in Mark and Luke.

3. Jerusalem is called "the holy city," "the holy place" (iv. 5, xxiv. 15, xxvii. 53).

4. The expression *συντέλεια τοῦ αἰῶνος* is used five times; in the rest of the N. T. only once, in Ep. to Hebrews.

5. The phrase "kingdom of heaven," about thirty-three times; other writers use "kingdom of God," which is found also in Matthew.

6 "Heavenly Father," used about six times, and "Father in heaven" about sixteen, and with out explanation, point to the Jewish mode of speaking in this Gospel.

7. Matthew alone of the Evangelists uses  $\tau\theta$  *θηθέν, ἐρρέθη* as the form of quotation from O. T. The apparent exception in Mark xiii. 14 is rejected by Tischendorf, etc., as a wrong reading. In Matt. about twenty times.

8. *Ἀναχωρεῖν* is a frequent word for *to retire*. Once in Mark.

9. *Κατ' ὄναρ* used six times; and here only.

10. The use of *προσέρχασθαι* preceding an interview, as in iv. 3, is much more frequent with Matt. than Mark and Luke; once only in John. Compare the same use of *πορεύεσθαι*, as in ii. 8, also more frequent in Matt.

11. *Σφόδρα* after a verb, or participle, six times: the same word used once each by Mark and Luke, but after adjectives.

12. With St. Matthew the particle of transition is usually the indefinite *τότε*; he uses it ninety times, against six times in Mark and fourteen in Luke.

13. *Καὶ ἐγένετο ὅτε*, vii. 28, xi. 1, xiii. 53, xiv. 1, xxvi. 1; to be compared with the *ὅτε ἐγένετο* of Luke.

14. *Ποιεῖν ὡς, ὡσπερ*, etc., is characteristic of Matthew: i. 24, vi. 2, xx. 5, xxi. 6, xxvi. 19, xxviii. 15.

15. *Τάφος* six times in this Gospel, not in the others. They use *μνημεῖον* frequently, which is also found seven times in Matt.

16. *Συμβούλιον λαμβάνειν*, peculiar to Matt. *Συμ. ποιεῖν* twice in Mark; nowhere else.

17. *Μαλακία, μαθητεύειν, σκληριάζεσθαι*, peculiar to Matt. The following words are either used by this Evangelist alone, or by him more frequently than by the others: *φρόνιμος οἰκιακός, ὅσπερον, ἐκείθεν, διατάζειν, καταποντίζεσθαι, μεταρρεῖν, βαπτίζειν, φράζειν, συναίρειν λόγον*.

18. The frequent use of *ἰδοῦ* after a genitive absolute (as i. 20), and of *καὶ ἰδοῦ* when introducing anything new, is also peculiar to St. Matt.

19. Adverbs usually stand after the imperative, not before it; except *οὕτως*, which stands first. Ch. x. 11 is an exception.

20. *Προσκυνεῖν* takes the dative in St. Matt., and elsewhere more rarely. With Luke and John it takes the accusative. There is one apparent exception in Matt. (iv. 10), but it is a quotation from O. T.

21. The participle *λέγων* is used frequently without the dative of the person, as in i. 20, ii. 2. Ch. vii. 21 is an exception.

22. The expression *ὁμῶς ἐν* or *εἰς* is a Hebraism, frequent in Matt., and unknown to the other Evangelists.

23. *Ἱερουσόυμα* is the name of the holy city with Matt. always, except xxiii. 37. It is the same in Mark, with one (doubtful) exception (xi. 1). Luke uses this form rarely; *Ἱερουσαλήμ* frequently.

III. *Citations from O. T.* — The following list is nearly complete: —

Matt.	Is.	Mic.	Hos.	Jer.	Is.	Deut.	Ps.	Lev.	Deut.	Is.

The number of passages in this Gospel which refer to the O. T. is about 65. In St. Luke they are 43. But in St. Matthew there are 43 *verbal citations* of O. T.; the number of these direct appeals to its authority in St. Luke is only about 19. This fact is very significant of the character and original purpose of the two narratives.

IV. *Genuineness of the Gospel.* — Some critics, admitting the apostolic antiquity of a part of the Gospel, apply to St. Matthew as they do to St. Luke (see vol. ii. p. 1695) the gratuitous supposition of a later editor or compiler, who by augmenting and altering the earlier document produced our present Gospel. Hilgenfeld (p. 106) endeavors to separate the older from the newer work, and includes much historical matter in the former: since Schleiermacher, several critics, misinterpreting the *λόγια* of Papias, consider the older document to have been a collection of "discourses" only. We are asked to believe that in the second century for two or more of the Gospels, new works, differing from them both in matter and compass, were substituted for the old, and that about the end of the second century our present Gospels were adopted by authority to the exclusion of all others, and that henceforth the copies of the older works entirely disappeared, and have escaped the keenest research ever since. Eichhorn's notion is that "the Church" sanctioned the four canonical books, and by its authority gave them exclusive currency; but there existed at that time no means for convening a Council; and if such a body could have met and decided, it would not have been able to force on the Churches books discrepant from the older copies to which they had long been accustomed, without discussion, protest, and resistance (see Norton, *Genuineness*, Chap. I.). That there was no such resistance or protest we have ample evidence. Irenæus knows the four Gospels only (*Hær.* iii. ch. i.). Tatian, who died A. D. 170, composed a harmony of the Gospels, lost to us, under the name of *Diatessaron* (*Eus. H. E.* iv. 29). Theophilus, bishop of Antioch, about 168, wrote a commentary on the Gospels (*Hieron. ad Algasium* and *de Vir ill.*). Clement of Alexandria (flourished about 189) knew the four Gospels, and distinguished between

them and the uncanonical Gospel according to the Egyptians. Tertullian (born about 160) knew the four Gospels, and was called on to vindicate the text of one of them against the corruptions of Marcion (see above, LUKE). Origen (born 185) calls the four Gospels the four elements of the Christian faith; and it appears that his copy of Matthew contained the genealogy (*Cum. in Joan.*). Passages from St. Matthew are quoted by Justin Martyr, by the author of the letter to Diognetus (see in Otto's *Justin Martyr*, vol. ii.), by Hegesippus, Irenæus, Tatian, Athenagoras, Theophilus, Clement, Tertullian, and Origen. It is not merely from the matter but the manner of the quotations, from the calm appeal as to a settled authority, from the absence of all hints of doubt, that we regard it as proved that the book we possess had not been the subject of any sudden change. Was there no heretic to throw back with double force against Tertullian the charge of alteration which he brings against Marcion? Was there no orthodox church or member of a church to complain, that instead of the Matthew and the Luke that had been taught to them and their fathers, other and different writings were now imposed on them? Neither the one nor the other appears.

The citations of Justin Martyr, very important for this subject, have been thought to indicate a source different from the Gospels which we now possess: and by the word *ἀπομνημονεύματα* (memoirs), he has been supposed to indicate that lost work. Space is not given here to show that the remains referred to are the Gospels which we possess, and not any one book; and that though Justin quotes the Gospels very loosely, so that his words often bear but a slight resemblance to the original, the same is true of his quotations from the Septuagint. He transposes words, brings separate passages together, attributes the words of one prophet to another, and even quotes the Pentateuch for facts not recorded in it. Many of the quotations from the Septuagint are indeed precise, but these are chiefly in the Dialogue with Trypho, where, reasoning with a Jew on the O. T., he does not trust his memory, but consults the text. This question is disposed of in Norton's *Genuineness*, vol. i., and in Hug's *Einleitung*. [See also Westcott's *Canon of the N. T.*, 2d ed., p. 85 ff.]

The genuineness of the two first chapters of the Gospel has been questioned; but is established on satisfactory grounds (see Fritzsche, *on Matt.*, Excursus iii.; Meyer, *on Matt.*, p. 65). (i.) All the old MSS. and versions contain them; and they are quoted by the Fathers of the 2d and 3d centuries (Irenæus, Clement Alex., and others). Celsus also knew ch. ii. (see Origen cont. Cels. i. 38). (ii.) Their contents would naturally form part of a Gospel intended primarily for the Jews. (iii.) The commencement of ch. iii. is dependent on ii. 23; and in iv. 13 there is a reference to ii. 23. (iv.) In constructions and expressions they are similar to the rest of the Gospel (see examples above, in II. *Style and Diction*). Professor Norton disputes the genuineness of these chapters upon the ground of the difficulty of harmonizing them with St. Luke's narrative, and upon the ground that a large number of the Jewish Christians did not possess them in their version of the Gospel. The former objection is discussed in all the commentaries; the answer would require much space. But, (1.) Such questions are by no means confined to these chapters, but are found in places of which the Apostolic origin is

admitted. (2.) The treatment of St. Luke's Gospel by Marcion (vol. ii. pp. 1694, 1695) suggests how the Jewish Christians dropped out of their version an account which they would not accept. (3.) Prof. N. stands alone, among those who object to the two chapters, in assigning the genealogy to the same author as the rest of the chapters (Hilgenfeld, pp. 46, 47). (4.) The difficulties in the harmony are all reconcilable, and the day has passed, it may be hoped, when a passage can be struck out, against all the MSS. and the testimony of early writers, for subjective impressions about its contents.

On the whole, it may be said that we have for the genuineness and Apostolic origin of our Greek Gospel of Matthew, the best testimony that can be given for any book whatever.

V. *Time when the Gospel was written.* — Nothing can be said on this point with certainty. Some of the ancients think that it was written in the eighth year after the Ascension (Theophylact and Euthymius); others in the fifteenth (Nicephorus, *H. E.* ii. 45); whilst Irenæus says (iii. 1) that it was written "when Peter and Paul were preaching in Rome," and Eusebius (*H. E.* iii. 24), at the time when Matthew was about to leave Palestine. From two passages, xxvii. 7, 8, xxviii. 15, some time must have elapsed between the events and the description of them, and so the eighth year seems out of the question; but a term of fifteen or twenty years would satisfy these passages. The testimony of old writers that Matthew's Gospel is the earliest must be taken into account (Origen in *Eus. H. E.* vi. 25; Irenæus, iii. 1; comp. Muratorian fragment, as far as it remains, in Credner's *Kanon*); this would bring it before A. D. 58–60 (vol. ii. p. 1696); the supposed date of St. Luke. The most probable supposition is that it was written between 50 and 60; the exact year cannot even be guessed at.

VI. *Place where it was written.* — There is not much doubt that the Gospel was written in Palestine. Hug has shown elaborately, from the diffusion of the Greek element over and about Palestine, that there is no inconsistency between the assertions that it was written for Jews in Palestine, and that it was written in Greek (*Einleitung*, ii. ch. i. § 10); the facts he has collected are worth study. [LANGUAGE OF THE N. T., Amer. ed.]

VII. *Purpose of the Gospel.* — The Gospel itself tells us by plain internal evidence that it was written for Jewish converts, to show them in Jesus of Nazareth the Messiah of the O. T. whom they expected Jewish converts over all the world seem to have been intended, and not merely Jews in Palestine (Irenæus, Origen, and Jerome say simply that it was written "for the Hebrews"). Jesus is the Messiah of the O. T., recognizable by Jews from his acts as such (i. 22, ii. 5, 15, 17, iv. 14, viii. 17, xii. 17–21, xiii. 35, xxi. 4, xxvii. 9). Knowledge of Jewish customs and of the country is presupposed in the readers (Matt. xv. 1, 2 with Mark vii. 1–4; Matt. xxvii. 62 with Mark xv. 42; Luke xxiii. 54; John xix. 14, 31, 42, and other places). Jerusalem is the holy city (see above, *Style and Diction*). Jesus is the son of David, of the seed of Abraham (i. 1, ix. 27, xii. 23, xv. 22, xx. 30, xxi. 9, 15); is to be born of a virgin in David's place, Bethlehem (i. 22, ii. 6); must flee into Egypt and be recalled thence (ii. 15, 19); must have a forerunner. John the Baptist (iii. 3, xi. 10); was to labor in the outcast Galilee that sat in darkness (iv. 14 16); his healing was a promised mark of his office (viii. 17, xii. 17); and so was his mode of teaching is

parables (xiii. 14); He entered the holy city as Messiah (xxi. 5-16); was rejected by the people, in fulfillment of a prophecy (xxi. 42); and deserted by his disciples in the same way (xxvi. 31, 56). The Gospel is pervaded by one principle, the fulfillment of the Law and of the Messianic prophecies in the person of Jesus. This at once sets it in opposition to the Judaism of the time; for it rebuked the Pharisaic interpretations of the Law (v., xxiii.), and proclaimed Jesus as the Son of God and the Saviour of the world through his blood, ideas which were strange to the cramped and limited Judaism of the Christian era.

VIII. *Contents of the Gospel.* — There are traces in this Gospel of an occasional superseding of the chronological order. Its principal divisions are — I. The introduction to the Ministry, i.-iv. II. The laying down of the new Law for the Church in the Sermon on the Mount, v.-vii. III. Events in historical order, showing Him as the worker of Miracles, viii. and ix. IV. The appointment of Apostles to preach the kingdom, x. V. The doubts and opposition excited by his activity in divers minds — in John's disciples, in sundry cities, in the Pharisees, xi. and xii. VI. A series of parables on the nature of the Kingdom, xiii. VII. Similar to V. The effects of his ministry on his countrymen, on Herod, the people of Gennesaret, Scribes and Pharisees, and on multitudes, whom He feeds, xiii. 53 - xvi. 12. VIII. Revelation to his disciples of his sufferings. His instructions to them thereupon, xvi. 13 - xviii. 35. IX. Events of a journey to Jerusalem, xix., xx. X. Entrance into Jerusalem and resistance to Him there, and denunciation of the Pharisees, xxi.-xxiii. XI. Last discourses; Jesus as Lord and Judge of Jerusalem, and also of the world, xxiv., xxv. XII. Passion and Resurrection, xxvi.-xxviii.

*Sources.* — The works quoted under LUKE, pp. 1698, 1699; and Norton, *Genuineness of the Gospels*; Fritzsche, *on Matthew*; Lange, *Bibelwerk*; Credner, *Einleitung* and *Beiträge*. W T.

\* *Additional Literature.* — Many of the more important recent works relating to the Gospel of Matthew have been already enumerated in the addition to the article GOSPELS, vol. ii. p. 959 ff. For the sake of brevity we may also pass over the older treatises on the critical questions respecting this gospel: they are referred to with sufficient fullness in such works as the Introductions to the N. T. by Credner, De Wette, Bleek, Reuss, and Guericke, in Meyer's Introduction to his Commentary on the Gospel, and in the bibliographical works of Winer, Danz, and Darling. The following may however be noted, as either comparatively recent, or easily accessible to the English reader: M. Stuart, *Inquiry into the Orig. Language of Matthew's Gospel, and the Genuineness of the first two Chapters of the same*, in the *Amer. Bibl. Repos.* for July and Oct. 1838, xii. 133-179, 315-356, in opposition to Mr. Norton's view (see his *Genuineness of the Gospels*, 2d ed. 1846, vol. i. Addit. Notes, pp. xlv. - lxiv.). G. C. A. Harless, *Fabula de Matthæo Syro-Chaldaico conscripto*, Erlang. 1841, and *De Compositione Evang. quod Matthæo tribuitur*, *ibid.* 1842, the latter trans. by H. B. Smith in the *Bibl. Sacra* for Feb. 1844, i. 86-99. J. P. Tregelles, *The Original Language of St. Matthew's Gospel*, in *Kitto's Journ. of Sacred Lit.* for Jan. 1850, v. 151-186, maintaining the Hebrew original; comp. Dr. W. L. Alexander on

the other side, *ibid.* April, 1850, pp. 499-510. Dr. Tregelles's essay was also published separately C. E. Luthardt, *De Compositione Ev. Matthæi*, Lips. 1861. R. Anger, *latino, qua loci V. T. in Ev. Matth. laudantur, quâ valeat ad illustr. huius Ev. Originem, queritur*, 3 pt. Lips. 1861-62. A. Réville, *Études crit. sur l'Évangile selon St. Matthæu*, Leyde et Paris, 1862. Alex. Roberts, *On the Original Language of Matthew's Gospel*, in his *Discussions on the Gospels*, 2d ed. 1864, pp. 319-448, strongly contending for the Greek. T. Wizenmann, *Die Gesch. Jesu nach Matthæus als Selbstbeweis ihrer Zuverlässigkeit betrachtet, herausg. von Auberlen*, Basel, 1864 (1st ed. 1789). Hilgenfeld, *Ueber Particularismus u. Universalismus in dem Leben Jesu nach Matthæus, zur Verteidigung gegen Hr. Dr. Keim, in his Zeitschr. f. wiss. Theol.* 1865, viii. 43-61, and *Das Matthæus-Evangelium unfr's Neue untersucht*, *ibid.* 1866 and 1867, x. 303-323, 366-447, xi. 22-76. J. H. Scholten, *Het oudste evangelie. Critisch onderzoek naar de zamenstelling . . . de hist. waarde en den oorsprung der evangelien naar Mattheus en Marcus*, Leiden, 1868. Davidson, *Introduct. to the Study of the N. T.*, Lond. 1868, i. 465-520; comp. his earlier *Introduction*, Lond. 1848, i. 1-127, where the subject is treated with greater fullness, from a more conservative "standpoint."

Among the *exegetical works* on the Gospel, we can only glance at the older literature, as the commentaries of Origen, Chrysostom (*Homilies*, best ed. by Field, 3 vols. Cantab. 1839, and Eng. trans. 3 vols. Oxford, 1843-51, in the Oxford Lib. of the Fathers), the author of the *Opus Imperfectum* published with Chrysostom's works (vol. vi. of the Benedictine edition), Theophylact, and Euthymius Zigabenus, among the Greek fathers, and of Hilary of Poitiers, Jerome, Augustine (*Questiones*), Bede, Thomas Aquinas (*Comm. and Catenæ aureæ*), and others, among the Latin; Cramer's *Catenæ Græc. Patrum in Ev. Matthæi et Marci*, Oxon. 1840, and the Greek Scholia published by Card. Mai in his *Class. Auct. e Vaticanis Codd. edit.*, vol. vi. pp. 379-494. These patristic commentaries are generally of little critical value, but are of some interest in their bearing on the history of interpretation and of Christian theology. We must content ourselves with referring to the bibliographical works of Walch, Winer, Danz, and Darling for the older commentaries by Christian divines since the Reformation; those of Calvin and Grotius are the most important. See also the addition to the art. GOSPELS, vol. ii. pp. 960, 961, for the more recent expositions of the Gospels collectively. A few special works on the Gospel of Matthew may be mentioned here by way of supplement, namely: Sir John Cheke, *Translation from the Greek of the Gospel of St. Matthew*, etc. with Notes, etc. edited by J. Goodwin, Lond. (Pickering), 1843. Daniel Scott (author of the *Appendix ad Stephani Thesaurum Græcum*), *New Version of St. Matthew's Gospel, with Select Notes*, Lond. 1741, 4to, of some value for its illustrations of the language from Greek authors. Jac. Elsner, *Comm. crit.-philol. in Evang. Matthæi*, 2 vols. Zwollæ, 1767-69, 4to. Gilb. Wakefield, *New Translation of the Gospel of Matthew, with Notes* Lond. 1782, 4to. A. Gratz (Cath.), *Hist.-krit. Comm. üb. d. Ev. Matth.*, 2 Theile, Tübing. 1821-23. The elaborate commentary of Fritzsche, publ. in 1826, followed by his equally or more thorough works on the Gospel of Mark and the Epistle to the Romans, marks an epoch in the history of the in

erpretation of the New Testament. In connection with Winer, over whom he exerted a great influence, as may be seen by a comparison of the third edition of his N. T. Grammar with the two preceding, he may be regarded as the pioneer of the strict grammatical method of interpretation, in opposition to the loose philology prevalent at the time, as illustrated by Schleuser's Lexicon and the commentary of Kuinoel. This grammatical rigor is sometimes, indeed, carried to an excess, sufficient allowance not being made for the looseness of popular phraseology, and especially for the difference between the classical and the later Greek; but Fritzsche's commentaries will always claim the attention of the critical student. We may further note: James Ford, *The Gospel of St. Matthew illustrated from Ancient and Modern Authors*, Lond. 1848. H. Goodwin, *Commentary on the Gospel of St. Matthew*, Camb. (Eng.), 1857. T. J. Conant, *The Gospel by Matthew, with a Revised Version and Critical and Philological Notes, prepared for the Amer. Bible Union*, N. Y. 1860, 4to. J. H. Morison, *Disquisitions and Notes on the Gospels — Matthew*, 2d ed. Boston, 1861, one of the best of the more popular commentaries, both in plan and execution. J. A. Alexander, *The Gospel of Matthew explained*, N. Y. 1861, posthumous, and embracing only chaps. i. — xvi. with an analysis of the remainder. Lutteroth, *Essai d'interprétation de quelques parties de l'Éc. selon Saint Matthieu*, 3 pt. (ch. i. — xiii.) Paris, 1860 — 67. The recent commentaries of Nast (1864) and Lange, translated by Dr. Schaff (N. Y. 1865), are referred to under the art. GOSPELS. The latter has reached a third edition (4th impression) in Germany (1868). Among the later Roman Catholic commentaries, those of Bucher (2 vol. 1855 — 56), Arnoldi (1856), and Schegg (3 vol. 1856 — 58), may be mentioned. On the Sermon on the Mount we have the masterly commentary of Tholuck, *Die Bergpredigt ausgelegt*, 4e Aufl. Gotha, 1856, translated by R. L. Brown, Phila. 1860; a translation of an earlier edition was published in Edinburgh in 1834 — 37 as a part of the *Biblical Cabinet*. ▲

**MATTHIAS** (*Matthias*; [Tisch. Treg. *Matthias*:] *Matthias*), the Apostle elected to fill the place of the traitor Judas (Acts i. 26). All beyond this that we know of him for certainty is that he had been a constant attendant upon the Lord Jesus during the whole course of his ministry; for such was declared by St. Peter to be the necessary qualification of one who was to be a witness of the resurrection. The name of Matthias occurs in no other place in the N. T. We may accept as probable the opinion which is shared by Eusebius (*H. E.* lib. i. 12) and Epiphanius (i. 20) that he was one of the seventy disciples. It is said that he preached the Gospel and suffered martyrdom in Ethiopia (Niecephor. ii. 60). Cave believes that it was rather in Cappadocia. An apocryphal gospel was published under his name (Euseb. *H. E.* iii. 23), and Clement of Alexandria quotes from the Traditions of Matthias (*Strom.* ii. 163, &c.).

Different opinions have prevailed as to the manner of the election of Matthias. The most natural construction of the words of Scripture seems to be this:

After the address of St. Peter, the whole assembled body of the brethren, amounting in number to about 120 (Acts i. 15), proceeded to nominate two, namely, Joseph surnamed Barsabas, and Matthias, who answered the requirements of the Apostle: the subsequent selection between the two was referred in prayer to Him who, knowing the hearts of men, knew which of them was the fitter to be his witness and apostle. The brethren then, under the heavenly guidance which they had invoked, proceeded to give forth their lots, probably by each writing the name of one of the candidates on a tablet, and casting it into the urn. The urn was then shaken, and the name that first came out decided the election. Lightfoot (*Hor. Heb. Luc.* i. 9) describes another way of casting lots which was used in assigning to the priests their several parts in the service of the Temple. The Apostles, it will be remembered, had not yet received the gift of the Holy Ghost, and this solemn mode of casting the lots, in accordance with a practice enjoined in the Levitical law (Lev. xvi. 8), is to be regarded as a way of referring the decision to God (comp. Prov. xvi. 33). St. Chrysostom remarks that it was never repeated after the descent of the Holy Spirit. The election of Matthias is discussed by Bishop Beveridge, *Works*, vol. i. serm. 2. E. H.—a.

**MATTHIAS** (*Marrathias*; *Matthathias*) = **MATTATHAH**, of the descendants of Hashum (1 Esdr. ix. 33; comp. Ezr. x. 33).

**MATTHITHIAH** (מַתִּיתִיָּהוּ [*gift of Jehovah*]; *Marrathias*; [Vat. Sin.] *Alex. Marrathias*; *Matthathias*). 1. A Levite, the first-born of Shal-lum the Korhite, who presided over the offerings made in the pans (1 Chr. ix. 31; comp. Lev. vi. 20 [12], &c.).

2. (*Marrathias*). One of the Levites of the second rank under Asaph, appointed by David to minister before the ark in the musical service (1 Chr. xvi. 5), "with harps upon Sheminith" (comp. 1 Chr. xv. 21), to lead the choir. See below, 5.

3. (*Marrathias*; [Vat. FA. *Marathias*]; *Alex. Marrathias*). One of the family of Nebo, who had married a foreign wife in the days of Ezra (Ezr. x. 43). He is called **MAZATHIAS** in 1 Esdr. ix. 35.

4. (*Marrathias*; [Vat. FA.<sup>2</sup>] *Alex. Marrathias*). Probably a priest, who stood at the right hand of Ezra when he read the Law to the people (Neh. viii. 4). In 1 Esdr. ix. 43, he appears as **MATTATHIAS**.

5. (מַתִּיתִיָּהוּ): 1 Chr. xv. 18, *Marathia*, [Vat. *Marrathia*, FA. *Alex. Marrathia*; 21, *Marrathias*, [Vat. FA.] *Merrathias*:] xxv. 3, 21, *Marrathias*, [Vat. FA. *Marrathias*;] *Alex. Marrathias*, 1 Chr. xxv. 3; *Marthias*, 1 Chr. xxv. 21). The same as 2, the Hebrew being in the lengthened form. He was a Levite of the second rank, and a doorkeeper of the ark (1 Chr. xv. 18, 21). As one of the six sons of Jeduthun, he was appointed to preside over the 14th division of twelve Levites into which the Temple choir was distributed (1 Chr. xxv. 3, 21).

**MATTOCK**.<sup>a</sup> The tool used in Arabia for loosening the ground, described by Niebuhr, answers generally to our mattock or grubbing-axe, i. e. a single-headed pickaxe, the *sarculus simplex*, as op-

<sup>a</sup> 1. מַצְרֵר; *sarculum*, Is. vii. 25. 2. מַחְרֵשֶׁת, *mer* both from חָרַשׁ, "carve," "engrave," 1 Sam. xiii. 2. Which of these is the ploughshare and which the mattock cannot be ascertained. See Ges. p. 530.

posed to *bicornis*, of Palladius. The ancient Egyptian hoe was of wood, and answered for hoe, spade, and pick. The blade was inserted in the handle, and the two were attached about the centre by a twisted rope. (Palladius, *de Re rust.* i. 43; Niebuhr, *Descr. de l'Ar.* p. 137; Loudon, *Encycl. of Gardening*, p. 517; Wilkinson, *Anc. Eg.* ii. 16, 18, abridgm.: comp. Her. ii. 14; Hasselquist, *Trav.* p. 100.) [HANDICRAFT.] H. W. P.

Egyptian hoed. (From Wilkinson.)

**MAUL** (*i. e.* a hammer: a variation of *mall*, from *malleus*), a word employed by ur translators to render the Hebrew term מַזְזִים. The Hebrew and English alike occur in Prov. xxv. 18 only. But a derivative from the same root, and differing but slightly in form, namely מַזְזֵה, is found in Jer. li. 20, and is there translated by "battle-axe" — how incorrectly is shown by the constant repetition of the verb derived from the same root in the next three verses, and there uniformly rendered "break in pieces." The root מַזְזֵה or מַזְזֵה, has the force of dispersing or smashing, and there is no doubt that some heavy warlike instrument, a mace or club, is alluded to. Probably such as that which is said to have suggested the name of Charles *Mar-tel*.

The mace is frequently mentioned in the accounts of the wars of the Europeans with Saracens, Turks, and other Orientals, and several kinds are still in use among the Bedouin Arabs of remoter parts (Burekhardt, *Notes on Bedouins*, i. 55). In their European wars the Turks were notorious for the use they made of the mace (Knollys's *Hist. of the Turks*).

A similar word is found once again in the original of Ez. ix. 2 פְּלִי מַזְזֵה = weapon of smashing (A. V. "slaughter-weapon"). The sequel shows how terrible was the destruction such weapons could effect. G.

**MAUZZ'IM** (מַזְזִים [see below]: [Theodot.] Μαυζέιμ; Alex. Μαυζέι: *Maozim*). The marginal note to the A. V. of Dan. xi. 38, "the God of forces," gives, as the equivalent of the last word, "Mauzzim, or gods protectors, or munitions." The Geneva version renders the Hebrew as a proper name both in Dan. xi. 38 and 39, where the word

occurs again (margin, of A. V. "munitions"). In the Greek version of Theodotion, given above, it is treated as a proper name, as well as in the Vulgate. The LXX. as at present printed is evidently corrupt in this passage, but μαυζά (ver. 37) appears to represent the word in question. In Jerome's time the reading was different, and he gives "Deum fortissimum" for the Latin translation of it, and "Deum fortitudinum" for that of Aquila. He ridicules the interpretation of Porphyry, who, ignorant of Hebrew, understood by "the god of *Mauzzim*" the statue of Jupiter set up in *Modin*, the city of Mattathias and his sons, by the generals of Antiochus, who compelled the Jews to sacrifice to it, "the god of Modin." Theodoret retains the reading of Theodotion (Μαυζέιμ being evidently for Μαυζέιμ), and explains it of Antichrist, "a god strong and powerful." The Peshito-Syriac has (ܡܙܙܝܡ), "the strong god," and Junius and Tremellius render it "Deum summi roboris," considering the Hebrew plural as intensive, and interpreting it of the God of Israel. There can be little doubt that "Mauzzim" is to be taken in its literal sense of "fortresses," just as in Dan. xi. 19, 39, "the god of fortresses," being then the deity who presided over strongholds. But beyond this it is scarcely possible to connect an appellation so general with any special object of idolatrous worship. Grotius conjectured that Mauzzim was a modification of the name Ἀΐζος, the war-god of the Phœnicians, mentioned in Julian's hymn to the sun. Calvin suggested that it denoted "money," the strongest of all powers. By others it has been supposed to be Mars, the tutelary deity of Antiochus Epiphanes, who is the subject of allusion. The only authority for this supposition exists in two coins struck at Laodicea, which are believed to have on the obverse the head of Antiochus with a radiated crown, and on the reverse the figure of Mars with a spear. But it is asserted on the contrary that all known coins of Antiochus Epiphanes bear his name, and that it is mere conjecture which attributes these to him; and further, that there is no ancient authority to show that a temple to Mars was built by Antiochus at Laodicea. The opinion of Gesenius is more probable, that "the god of fortresses" was Jupiter Capitolinus, for whom Antiochus built a temple at Antioch (Liv. xli. 20). By others it is referred to Jupiter Olympius, to whom Antiochus dedicated the Temple at Jerusalem (2 Macc. vi. 2). But all these are simply conjectures. Fürst (*Handb.* s. v.), comparing Is. xxiii. 4, where the reference is to Tyre, "the fortress of the sea," makes מַזְזִים equivalent to מַזְזֵה, or even proposes to read for the former מַזְזֵה; the god of the "stronghold of the sea" would thus be Melkart, the Tyrian Hercules. A suggestion made by Mr. Layard (*Nin* ii. 456, note) is worthy of being recorded, as being at least as well founded as any already mentioned. After describing Hera, the Assyrian Venus, as "standing erect on a lion, and crowned with a tower or mural coronet, which, we learn from Lucian, was peculiar to the Semitic figure of the goddess," he adds in a note, "May she be connected with the 'El Maozem,' the deity presiding over bulwarks and fortresses, the 'god of forces' of Dan. xi. 38?" Pfeiffer (*Dub. lex.* cent. 4, loc. 72) will only see in it "the idol of the *Muss*!" W. A. W.

**MAZITI'AS** (Μαζίτιας; [Vat. *Zetrias*]: *Miththias*) = MATITHIAH 3 (1 Esdr. ix. 35; comp. *Ezr.* x. 43).

**MAZZAROTH** (מַזְרָרֹת: Μαζουρωθ: *Lucifer*). The margin of the A. V. of Job xxxviii. 32 gives "the twelve signs" as the equivalent of "Mazzaroth," and this is in all probability its true meaning. The Peshito-Syriac renders it by ܐܘܠܘܬܐ, 'ogulto, "the wain" or "Great Bear;"

and J. D. Michaelis (*Suppl. ad Lex. Heb.* No. 1391) is followed by Ewald in applying it to the stars of "the northern crown" (Ewald adds "the southern"), deriving the word from נֶזֶר, *nézer*, "a crown." Fürst (*Monch.* s. v.) understands by Mazzaroth the planet Jupiter, the same as the "star" of Amos v. 26.<sup>a</sup> But the interpretation given in the margin of our version is supported by the authority of Gesenius (*Thes.* p. 869). On

referring to 2 K. xxiii. 5, we find the word מַזְרָרֹת, *mazzâlôth* (A. V. "the planets"), differing only from Mazzaroth in having the liquid *l* for *r*, and rendered in the margin "the twelve signs," as in the Vulgate. The LXX. there also have μαζουρωθ, which points to the same reading in both passages, and is by Suidas explained as "the Zodiac," but by Procopius of Gaza as probably "Lucifer, the morning star," following the Vulgate of Job xxxviii. 32. In later Jewish writings *mazzâlôth* is the signs of the Zodiac, and the singular, *mazzâl*, is used to denote the single sign, as well as the planets, and also the influence which they were believed to exercise upon human destiny (Selden, *De Dis Syr.* Synt. i. c. 1). In consequence of this, Jarchi, and the Hebrew commentators generally, identify *mazzârôth* and *mazzâlôth*, though their interpretations vary. Aben Ezra understands "stars" generally; but R. Levi ben Gershon, "a northern constellation." Gesenius himself is in favor of regarding *mazzârôth* as the older form, signifying strictly "premonitions," and in the concrete sense, "stars that give warnings or presages," from the usage of the root נָזַר, *nâzar*, in Arabic. He deciphered, as he believed, the same word on some Cili'an coins in the inscription על מִזְרָךְ דָּךְ, which he renders as a prayer, "may thy pure star (shine over us)" (*Mon. Phœn.* p. 279, tab. 36). W. A. W.

\* Both Mazzaroth and Arcturus disappear from Job xxxviii. 32 in a more accurate translation. Dr. Couant (*Book of Job*, p. 148) renders the passage thus: "Dost thou lead forth the Signs in their season; and the Bear with her young, dost thou guide them?" He remarks on the words "that the circuit of the year is meant: first, as marked by the succession of the celestial signs; and, second, by the varying position of the great northern constellation, in its annual circuit of the Pole." He defends the view of Gesenius against that of Ewald. H.

<sup>a</sup> A note to the Hexaplar Syriac version of Job (ed. Middeldorp, 1835) has the following: "Some say it is the dog of the giant (Orion, i. e. Canis major), others that it is the Zodiac."

<sup>b</sup> This is the reading of Codex A. Codex B, if we may accept the edition of Mai, has εἶνος; so also the rendering of Aquila and Symmachus, and of Josephus (*Ant.* ii. 5, § 5. Another version, quoted in the

**MEADOW.** This word, so peculiarly English, is used in the A. V. to translate two words which are entirely distinct and independent of each other.

1. Gen. xli. 2 and 18. Here the word in the original is מֵרְעָה (with the definite article), *ha-Achû*. It appears to be an Egyptian term, literally transferred into the Hebrew text, as it is also into that of the Alexandrian translators, who give it as τῶν Ἀχέι.<sup>b</sup> The same form is retained by the Coptic version. Its use in Job viii. 11 (A. V. "flag")—where it occurs as a parallel to *gômé* (A. V. "rush"), a word used in Ex. ii. 3 for the "bulrushes" of which Moses' ark was composed—seems to show that it is not a "meadow," but some kind of reed or water-plant. This the LXX. support, both by rendering in the latter passage βούτροπον, and also by introducing Ἀχέι as the equivalent of the word rendered "paper-reeds" in Is. ix. 7. St. Jerome, in his commentary on the passage, also confirms this meaning. He states that he was informed by learned Egyptians that the word *achi* denoted in their tongue any green thing that grew in a marsh—*omne quod in palude virens nascitur*. But as during high inundations of the Nile—such inundations as are the cause of fruitful years—the whole of the land on either side is a marsh, and as the cultivation extends up to the very lip of the river, is it not possible that *Achu* may denote the herbage of the growing crops? The fact that the cows of Pharaoh's vision were feeding there would seem to be as strong a figure as could be presented to an Egyptian of the extreme fruitfulness of the season: so luxuriant was the growth on either side of the stream, that the very cows fed amongst it unmolested. The lean kine, on the other hand, merely stand on the dry brink. [NILE.] No one appears yet to have attempted to discover on the spot what the signification of the term is. [FLAG, vol. i. p. 830 a and b, Amer. ed.]

2. Judg. xx. 33 only: "the meadows of Gibeah."

Here the word is מַעְרָבָה, *Maureh*, which occurs nowhere else with the same vowels attached to it. The sense is thus doubly uncertain. "Meadows" around Gibeah can certainly never have existed: the nearest approach to that sense would be to take *maureh* as meaning an open plain. This is the dictum of Gesenius (*Thes.* p. 1069), on the authority of the Targum. It is also adopted by De Wette (*die Pläne von G.*). But if an open plain, where could the ambush have concealed itself?

The LXX., according to the Alex. MS.,<sup>c</sup> read a different Hebrew word — מַעְרָבָה — "from the west of Gibeah." Tremellius, taking the root of this word in a figurative sense, reads "after Gibeah had been left open," i. e. by the quitting of its inhabitants — *post demutationem Gibeæ*. This is adopted by Bertheau (*Kurzgef. Handb.* ad loc.). But the most plausible interpretation is that of the Peshito-

fragments of the Hexapla, attempts to reconcile sound and sense by δχθη. The Veneto-Greek has λειμών.

\* Codex B, or the Vat. MS., wants Gen. i.-xlvii. 2; inclusive; this portion is supplied in Mai's edition from a later MS.

<sup>c</sup> The Vatican Codex transfers the word literally — Μαπαργαβέ.

Syriac. which by a slight difference in the vowel-points makes the word *ܡܝܥܘܪܐ*, "the cave;" a suggestion quite in keeping with the locality, which is very suitable for caves, and also with the requirements of the ambush. The only thing that can be said against this is that the liers-in-wait were "set round about" Gibeah, as if not in one spot, but several. [GIBEAH, vol. i. p. 914, note b.]

ME'AH, THE TOWER OF (מִבְּנֵי)

*מִבְּנֵי* [see below]: *πύργος τῶν ἑκατόν*: *turris centum cubitorum, turrim Emeth*, one of the towers of the wall of Jerusalem when rebuilt by Nehemiah (iii. 1, xii. 39). It stood between the tower of Hananeel and the Sheep Gate, and appears to have been situated somewhere at the northeast part of the city, outside of the walls of Zion (see the diagram, vol. ii. p. 1322). The name in Hebrew means "the tower of the hundred," but whether a hundred cubits of distance from some other point, or a hundred in height (Syriac of xii. 39), or a hundred heroes commemorated by it, we are not told or enabled to infer. In the Arabic version it is rendered *Bab-el-bostān*, the Gate of the Garden, which suggests its identity with the "Gate Gennath" of Josephus. But the Gate Gennath appears to have lain further round towards the west, nearer the spot where the ruin known as the *Kasr Jalūd* now stands.

MEALS. Our information on this subject is

but scanty: the early Hebrews do not seem to have given special names to their several meals, for the terms rendered "dine" and "dinner" in the A. V. (Gen. xliii. 16; 1'rov. xv. 17) are in reality general expressions, which might more correctly be rendered "eat" and "portion of food." In the N. T. we have the Greek terms *ἀριστον* and *δεῖπνον*, which the A. V. renders respectively "dinner" and "supper" (Luke xiv. 12; John xxi. 12), but which are more properly "breakfast" and "dinner." There is some uncertainty as to the hours at which the meals were taken: the Egyptians undoubtedly took their principal meal at noon (Gen. xliii. 16): laborers took a light meal at that time (Ruth ii. 14; comp. verse 17); and occasionally that early hour was devoted to excess and reveling (1 K. xx. 16). It has been inferred from those passages (somewhat too hastily, we think) that the principal meal generally took place at noon: the Egyptians do indeed still make a substantial meal at that time (Lane's *Mod. Egypt.* i. 189), but there are indications that the Jews rather followed the custom that prevails among the Bedouins, and made their principal meal after sunset, and a lighter meal at about 9 or 10 A. M. (Burckhardt's *Notes*, i. 64). For instance, Lot prepared a feast for the two angels "at even" (Gen. xix. 1-3): Boaz evidently took his meal late in the evening (Ruth iii. 7): the Israelites ate *flesh* in the evening, and *bread* only, or manna, in the morning (Ex. xvi. 12): the context seems to imply that Jethro's feast was in the evening (Ex. xviii. 12, 14). But, above all, the institution of

An ancient Egyptian dinner party. (Wilkinson.)

a, j, n, r Tables with various dishes. b, p. Figs. d, e, q, and s. Baskets of grapes. Fig. 3 is taking a wing from a goose. Fig. 4 holds a joint of meat. Figs. 5 and 7 are eating fish. Fig. 6 is about to drink water from an earthen vessel.

the Paschal feast in the evening seems to imply that the principal meal was usually taken then; it appears highly improbable that the Jews would have been ordered to eat meat at an unusual time. In the later Biblical period we have clearer notices to the same effect: breakfast took place in the

morning (John xxi. 4, 12), on ordinary days not before 9 o'clock, which was the first hour of prayer (Acts ii. 15), and on the Sabbath not before 12, when the service of the synagogue was completed (Joseph. *Vit.* § 54): the more prolonged and substantial meal took place in the evening (Joseph.

a Possibly from *גַּנְנוֹת*, *gannôth*, "gardens," perhaps alluding to the gardens which lay north of the city.

b The Greek word *δεῖπνον* was used indifferently in

the Homeric age for the early or the late meal, its special meaning being the principal meal. In later times, however, the term was applied exclusively to the late meal — the *δῆπνον* of the Homeric age.

172. § 44; B. J. i. 17, § 4). The general tenor of the parable of the great supper certainly implies that the feast took place in the working hours of the day (Luke xiv. 15-24); but we may regard this perhaps as part of the imagery of the parable, rather than as a picture of real life.

The posture at meals varied at various periods: there is sufficient evidence that the old Hebrews

were in the habit of *sitting* (Gen. xxvii. 19; Judg. xix. 6; 1 Sam. xx. 5, 24; 1 K. xiii. 20); but it does not hence follow that they sat on chairs; they may have squatted on the ground, as was the occasional, though not perhaps the general, custom of the ancient Egyptians (Wilkinson, *Anc. Eg.* i. 58, 181). The table was in this case but slightly elevated above the ground, as is still the case in

Reclining at Table. (Montfaucon.)

gypt. At the same time the chair<sup>a</sup> was not unknown to the Hebrews, but seems to have been regarded as a token of dignity. As luxury increased, the practice of sitting was exchanged for that of reclining: the first intimation of this occurs in the prophecies of Amos, who reprobates those "that lie upon beds of ivory, and stretch themselves upon their couches" (vi. 4), and it appears that the couches themselves were of a costly character—the "corners"<sup>b</sup> or *edges* (iii. 12) being finished with ivory, and the seat covered with silk or damask coverlets.<sup>c</sup> Ezekiel, again, inveighs against one who sat "on a stately bed with a table prepared before it" (xxiii. 41). The custom may have been borrowed in the first instance from the Babylonians and Syrians, among whom it prevailed at an early period (Esth. i. 6, vii. 8). A similar change took place in the habits of the Greeks, who are represented in the Heroic age as *sitting*<sup>d</sup> (*Il.* x. 578; *Od.* i. 145), but who afterwards adopted the habit of reclining, women and children excepted. In the time of our Saviour reclining was the universal custom, as is implied in the terms<sup>e</sup> used for *sitting at meat*, as the A. V. incorrectly has it. The couch itself (*κλίνη*) is only once mentioned (Mark vii. 4; A. V. "tables"), but there can be little doubt that the Roman *triclinium* had been introduced, and that the arrangements of the table resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four or even five. The

couches were provided with cushions on which the left elbow rested in support of the upper part of the body, while the right arm remained free: a room provided with these was described as *ἑστρωμένον*, lit. "spread" (Mark xiv. 15; A. V. "furnished"). As several guests reclined on the same couch, each overlapped his neighbor, as it were, and rested his head on or near the breast of the one who lay behind him: he was then said to "lean on the bosom [strictly recline on the bosom]" of his neighbor (*ἀνακείσθαι ἐν τῷ κόλπῳ*, John xiii. 23, xxi. 20, comp. Plin. *Epist.* iv. 22). The close proximity into which persons were thus brought rendered it more than usually agreeable that friend should be next to friend, and it gave the opportunity of making confidential communications (John xiii. 25). The ordinary arrangement of the couches was in three sides of a square, the fourth being left open for the servants to bring up the dishes. The couches were denominated respectively the highest, the middle, and the lowest couch: the three guests on each couch were also denominated highest, middle, and lowest—the terms being suggested by the circumstance of the guest who reclined on another's bosom always appearing to be *below* him. The *protoklisia* (*πρωτοκλισία*, Matt. xxiii. 6), which the Pharisees so much coveted, was not, as the A. V. represents it, "the uppermost room" ["rooms," A. V.], but the highest seat in the highest couch—the seat numbered 1 in the annexed diagram.<sup>f</sup>

<sup>a</sup> The Hebrew term is *kissē* (כִּסֵּי). There is only one instance of its being mentioned as an article of ordinary furniture, namely, in 2 K. iv. 10, where the A. V. incorrectly renders it "stool." Even there it seems probable that it was placed more as a mark of special honor to the prophet than for common use.

<sup>b</sup> The word is *peah* (פֵּאָה), which will apply to the edge as well as to the angle of a couch. That the seats and couches of the Assyrians were handsomely ornamented, appears from the specimens given by Layard (*Nineveh*, ii. 300-2).

<sup>c</sup> The A. V. has "in Damascus in a couch;" but there can be no doubt that the name of the town was transferred to the silk stuffs manufactured there, which are still known by the name of "Damask."

<sup>d</sup> *Sitting* appears to have been the posture usual among the Assyrians on the occasion of great festivals. A bas-relief on the walls of Khorsabad represents the guests seated on high chairs (Layard, *Nineveh*, ii. 411).

<sup>e</sup> *Ἀνακείσθαι*, *κατακείσθαι*, *ἀνακλίνεσθαι*, *κατακλίνεσθαι*.

<sup>f</sup> The difference between our own and the ancient

Some doubt attends the question whether the females took their meals along with the males. The present state of society in the East throws no light upon this subject, as the customs of the Harem date from the time of Mohammed. The cases of Ruth amid the reapers (Ruth ii. 14), of Elkanah with his wives (1 Sam. i. 4), of Job's sons and daughters (Job i. 4), and the general intermixture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Luke x. 40), they probably took a somewhat irregular and briefer repast.

Before commencing the meal, the guests washed their hands. This custom was founded on natural

Washing before or after a meal. (From Lane's *Modern Egyptians*.)

decorum; not only was the hand the substitute for our knife and fork, but the hands of all the guests were dipped into one and the same dish; uncleanness in such a case would be intolerable. Hence not only the Jews, but the Greeks (*Od.* i. 136), the modern Egyptians (Lane, i. 190), and many other nations, have been distinguished by this practice: the Bedouins in particular are careful to wash their hands *before*, but are indifferent about doing so

custom at meals obscures the sense of several passages as rendered in the A. V. The translation — "many shall come from the east and west and shall sit down with Abraham and Isaac and Jacob, in the kingdom of heaven" (Matt. viii. 11), instead of "shall recline," puts out of sight the figure of a banquet in Paradise of which the guests there partake. Still more perplexed from a similar inaccuracy is the meaning in Luke vii. 36; for if the Saviour "sat at meat" (A. V.) it is inconceivable how the woman who "washed and anointed his feet, and wiped them with the hairs of her head" could have "stood behind him" as she performed this office. Whether the expression in John i. 18 (ὁ ὢν ἐν τῶν κόλπῳ τοῦ πατρὸς) refers to the intimacy of the relation of the Father and

after their meals (Burckhardt's *Notes*, i. 63). The Pharisees transformed this conventional usage into a ritual observance, and overlaid it with burdensome regulations — a willful perversion which our Lord rebukes in the strongest terms (Mark vii. 1-13). Another preliminary step was the grace or blessing, of which we have but one instance in the O. T. (1 Sam. ix. 13), and more than one pronounced by our Lord himself in the N. T. (Matt. xv. 36; Luke ix. 16; John vi. 11); it consisted, as far as we may judge from the words applied to it, partly of a blessing upon the food, partly of thanks to the Giver of it. The Rabbinical writers have, as usual, laid down most minute regulations respecting it, which may be found in the treatise of the Mishna, entitled *Berachoth*, chaps. 6-8.

The mode of taking the food differed in no material point from the modern usages of the East; generally there was a single dish into which each guest dipped his hand (Matt. xxvi. 23); occasionally separate portions were served out to each (Gen. xliii. 34; Ruth ii. 14; 1 Sam. i. 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed *ψαμῶν*, "a sop," John xiii. 26), or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread (Lane, i. 193, 194; Burckhardt's *Notes*, i. 63). It is esteemed an act of politeness to hand over to a friend a delicate morsel (John xiii. 26; Lane, i. 194). In allusion to the above method of eating, Solomon makes it a characteristic of the sluggard, that "he hideth his hand in his bosom and will not so much as bring it to his mouth again" (Prov. xix. 24, xxvi. 15). At the conclusion of the meal, grace was again said in conformity with Deut. viii. 10, and the hands were again washed.

Thus far we have described the ordinary meal: on state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, in connection partly with public, partly with private events: in the first class we may place — the great festivals of the Jews (Deut. xvi.; Tob. ii. 1); public sacrifices (Deut. xii. 7, xxvii. 7; 1 Sam. ix. 13, 22; 1 K. i. 9, iii. 15; Zeph. i. 7); the ratification of treaties (Gen. xxvi. 30, xxxi. 54); the offering of the tithes (Deut. xiv. 26), particularly at the end of each third year (Deut. xiv. 28); in the second class — marriages (Gen. xxix. 22; Judg. xiv. 10; Esth. ii. 18; Tob. viii. 19; Matt. xxii. 2; John ii. 1), birth-days (Gen. xl. 20; Job i. 4; Matt. xiv. 6, 9), burials (2 Sam. iii. 35; Jer. xvi. 7; Hos. ix. 4; Tob. iv. 17), sheep-shearing (1 Sam. xxv. 2, 36; 2 Sam. xiii. 23), the vintage (Judg. ix. 27), laying the foundation stone of a house (Prov. ix. 1-5), the

the Son to each other, as symbolized in the relative position of guests at the table, may be uncertain. The archaeology explains the occurrence between Peter and John at the Last Supper (John xiii. 23-26). John occupied the place of honor next to Jesus (ἐν τῷ κόλπῳ αὐτοῦ). Peter, reclining perhaps on the opposite side of the table, made signs to John to inquire who was to be the traitor; and John then throwing back his head (ἐπιπεσὼν) upon the breast of Jesus (στῆθος here and not κόλπος as before) could ask the question at once without being heard by the others. It is not correct to charge the A. V. with a mistranslation in Matt. xxiii. 6 (see the article above); for in the older English "rooms" often had the sense of "spaces" or "places."

reception of visitors (Gen. xviii. 6-8, xix. 3; 2 Sam. iii. 20, xii. 4; 2 K. vi. 23; Tob. vii. 9; 1 Macc. xvi. 15; 2 Macc. ii. 27; Luke v. 29, xv. 23; John xii. 2), or any event connected with the sovereign (Hos. vii. 5).<sup>a</sup> On each of these occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v. 8; Matt. xxii. 3), and on the day of the feast a second invitation was issued to those that were bidden (Esth. vi. 14; Prov. ix. 3; Matt. xxii. 3). The visitors were received with a kiss (Tob. vii. 6; Luke vii. 45); water was produced for them to wash their feet with (Luke vii.

A party at dinner or supper. (From Lane's *Modern Egyptians*.)

44); the head, the beard, the feet, and sometimes the clothes, were perfumed with ointment (Ps. xxiii. 5; Am. vi. 6; Luke vii. 38; John xii. 3); on special occasions robes were provided (Matt. xxii. 11; comp. Trench on *Parables*, p. 230); and the head was decorated with wreaths<sup>b</sup> (Is. xxviii. 1; Wisd. ii. 7, 8; Joseph. *Ant.* xix. 9, § 1). The regulation of the feast was under the superintendence of a special officer, named ἀρχιτραπεζίτης<sup>c</sup> (John ii. 8; A. V. "governor of the feast"), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Ecclus. xxxii. 1, 2), and might therefore take part in the conversation. The places of the guests were settled according to their respective rank (Gen. xliii. 33; 1 Sam. ix. 22; Luke xiv. 8; Mark xii. 39; John xiii. 23); portions of food were placed before each (1 Sam. i. 4; 2 Sam. vi. 19; 1 Chr. xvi. 3), the most honored guests receiving either larger (Gen. xliii. 34; comp. Herod. vi. 57) or more choice (1 Sam. ix. 24; comp. *Il.*

vii. 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix. 22; 1 Sam. ix. 22; 1 K. i. 9, 25; Luke v. 29, xiv. 16), by the splendor of the vessels (Esth. i. 7), and by the profusion or the excellence of the viands (Gen. xviii. 6, xxvii. 9; Judg. vi. 19; 1 Sam. ix. 24; Is. xxv. 6; Am. vi. 4). The meal was enlivened with music, singing, and dancing (2 Sam. xix. 35; Ps. lxxix. 12; Is. v. 12; Am. vi. 5; Ecclus. xxxii. 3-6; Matt. xiv. 6; Luke xv. 25), or with riddles (Judg. xiv. 12); and amid these entertainments the festival was prolonged for several days (Esth. i. 3, 4). Entertainments designed almost exclusively for drinking were known by the special name of *mishlech*; instances of such drinking-bouts are noticed in 1 Sam. xxv. 36; 2 Sam. xiii. 28; Esth. i. 7; Dan. v. 1; they are reprobated by the prophets (Is. v. 11; Am. vi. 6). Somewhat akin to the *mishlech* of the Hebrews was the *kómos* (κῶμος) of the apostolic age, in which gross licentiousness was added to drinking, and which is frequently made the subject of warning in the Epistles (Rom. xiii. 13; Gal. v. 21; Eph. v. 18; 1 Pet. iv. 3).  
W. L. B.

\* MEAN (Prov. xxii. 29; Is. ii. 9, v. 15, xxxi. 8; Acts xxi. 39; Rom. xii. 16 m.) is repeatedly applied to persons in the sense of "ordinary," "obscure." As originally used it did not contain the idea of baseness which now belongs to the word: a "mean" man was one low in birth or rank.

## II.

ME'ANI (Μαρί; [Vat. Μαρεί; Ahd. Μαρί;] Alex. Μααρι; Μονει). The same as MEHUNIM (1 Esdr. v. 31; comp. Ezr. ii. 50). In the margin of the A. V. it is given in the form "Meunim," as in Neh. vii. 52.

ME'ARAH (מְעָרָה) [*a cave*]: LXX. omit, both MSS.: *Μααρά*, a place named in Josh. xiii. 4 only, in specifying the boundaries of the land which remained to be conquered after the subjugation of the southern portion of Palestine. Its description is "Mearah which is to the Zidonians" (*i. e.* which belongs to — ל: the "beside" of the A. V. is an erroneous translation). The word *me'arah* means in Hebrew a cave, and it is commonly assumed that the reference is to some remarkable cavern in the neighborhood of Zidon; such as that which played a memorable part many centuries afterwards in the history of the Crusades. (See William of Tyre, xix. 11, quoted by Robinson, ii. 474 *note*.) But there is, as we have often remarked, danger in interpreting these very ancient names by the significations which they bore in later Hebrew, and when pointed with the vowels of the still later Masorets. Besides, if a cave were intended, and not a place called Mearah, the name would surely have been preceded by the definite

<sup>a</sup> "The day of the king" in this passage has been variously understood as his birthday or his coronation: 't may, however, be equally applied to any other event similar importance.

<sup>b</sup> This custom prevailed extensively among the Greeks and Romans: not only were chaplets worn on the head, but festoons of flowers were hung over the neck and breast (Plut. *Symp.* iii. 1, § 3; *Maec.* x. 19; *dy Fast.* ii. 73). They were generally introduced after the first part of the entertainment was completed. They are noticed in several familiar passages of the

Latin poets (Hor. *Carm.* ii. 7, 24, *Sat.* ii. 3, 256; *Juv.* v. 35).

<sup>c</sup> The classical designation of this officer among the Greeks was *συνποσιταρχος*, among the Romans *maxister* or *rex convivi*. He was chosen by lot out of the guests (*Dict. of Ant.* p. 925).

<sup>d</sup> מְעָרָה.

<sup>e</sup> The *kómos* resembled the *comissatio* of the Romans. It took place after the supper, and was a mere drinking revel, with only so much food as served to whet the palate for wine (*Dict. of Ant.* p. 271).

article, and would have stood as **הַעֵבֶר**, "the cave."

Reland (*Pal.* p. 896) suggests that Mearah may be the same with Meroth, a village named by Josephus (*Ant.* iii. 3, § 1) as forming the limit of Galilee on the west (see also *Ant.* ii. 20, § 6), and which again may possibly have been connected with the WATERS of MEROM. The identification is not improbable, though there is no means of ascertaining the fact.

A village called *el Mughar* is found in the mountains of Naphtali, some ten miles W. of the northern extremity of the sea of Galilee, which may possibly represent an ancient Mearah (*Rob.* iii. 79, 80; Van de Velde's *map*). G.

**MEASURES.** [WEIGHTS AND MEASURES.]

**MEAT.** It does not appear that the word "meat" is used in any one instance in the Authorized Version of either the Old or New Testament, in the sense which it now almost exclusively bears of animal food. The latter is denoted uniformly by "flesh."

1. The only possible exceptions to this assertion in the O. T. are:—

- (a.) *Gen.* xxvii. 4, &c., "savory meat."
- (b.) *Ib.* xlv. 23, "corn and bread and meat."

But (a) in the former of these two cases the Hebrew word, **מַעֲדָה**, which in this form appears in this chapter only, is derived from a root which has exactly the force of our word "taste," and is employed in reference to the manna. In the passage in question the word "dainties" would be perhaps more appropriate. (b) In the second case the original word is one of almost

equal rarity, **מִנְחָה**; and if the Lexicons did not show that this had only the general force of food in all the other oriental tongues, that would be established in regard to Hebrew by its other occurrences, namely, 2 Chr. xi. 23, where it is rendered "victuals;" and Dan. iv. 12, 21, where the "meat" spoken of is that to be furnished by a tree.

2. The only real and inconvenient ambiguity caused by the change which has taken place in the meaning of the word is in the case of the "meat-offering," the second of the three great divisions into which the sacrifices of the Law were divided—the burnt-offering, the meat-offering, and the peace-offering (*Lev.* ii. 1, &c.)—and which consisted solely of flour, or corn, and oil, sacrifices of flesh being confined to the other two. The word thus translated is **מִנְחָה**, elsewhere rendered "present" and "oblation," and derived from a root which has the force of "sending" or "offering" to a person. It is very desirable that some English term should be proposed which would avoid this ambiguity. "Food-offering" is hardly admissible, though it is perhaps preferable to "unbloody or bloodless sacrifice."

3. There are several other words, which, though entirely distinct in the original, are all translated in the A. V. by "meat;" but none of them present any special interest except **מִנְחָה**. This word,

from a root signifying "to tear," would be perhaps more accurately rendered "prey" or "booty." Its use in *Ps.* cxi. 5, especially when taken in connection with the word rendered "good understanding" in ver. 10, which should rather be, as in the margin, "good success," throws a new and unexpected light over the familiar phrases of that beautiful psalm. It seems to show how inextinguishable was the warlike predatory spirit in the mind of the writer, good Israelite and devout worshipper of Jehovah as he was. Late as he lived in the history of his nation, he cannot forget the "power" of Jehovah's "works" by which his forefathers acquired the "heritage of the heathen;" and to him, as to his ancestors when conquering the country, it is still a firm article of belief that those who fear Jehovah shall obtain most of the spoil of his enemies—those who obey his commandments shall have the best success in the field.

4. In the N. T. the variety of the Greek words thus rendered is equally great; but dismissing such terms as *ἀνακείσθαι* or *ἀναπιπτεῖν*, which are rendered by "sit at meat" — *φαγεῖν*, for which we occasionally find "meat" — *τράπεζα* (*Acts* xvi. 34), the same — *εἰδωλοθύτα*, "meat offered to idols" — *κλάσματα*, generally "fragments," but twice "broken meat" — dismissing these, we have left *τροφή* and *βρώμα* (with its kindred words, *βρώσις*, etc.), both words bearing the widest possible signification, and meaning everything that can be eaten, or can nourish the frame. The former is most used in the Gospels and Acts. The latter is found in *St. John* and in the epistles of *St. Paul*. It is the word employed in the famous sentences, "for meat destroy not the work of God," "if meat make my brother to offend," etc. G.

**MEAT-OFFERING** (**מִנְחָה**: *θῶρον θυσία*, or *θυσία*: *oblatio sacrificii*, or *sacrificium*). The word *Minchah* signifies originally a gift of any kind; and appears to be used generally of a gift from an inferior to a superior, whether God or man. Thus in *Gen.* xxxii. 13 it is used of the present from Jacob to Esau, in *Gen.* xliii. 11 of the present sent to Joseph in Egypt, in 2 *Sam.* viii. 2, 6 of the tribute from Meab and Syria to David, etc., etc.; and in *Gen.* iv. 3, 4, 5 it is applied to the sacrifices to God, offered by Cain and Abel, although Abel's was a whole burnt-offering. Afterwards this general sense became attached to the word "Corban (**קָרְבָּן**):" and the word *Minchah* restricted to an "unbloody offering" as opposed to **קָרְבָּן**, a "bloody" sacrifice. It is constantly spoken of in connection with the DRINK-OFFERING (**שְׂכַר**: *σπονδή*: *libamen*), which generally accompanied it, and which had the same meaning. The law or ceremonial of the meat-offering is described in *Lev.* ii. and vi. 14-23.<sup>b</sup> It was to be composed of fine flour, seasoned with salt, and mixed with oil and frankincense, but without leaven, and it was generally accompanied by a drink-offering of wine. A portion of it, including all the frankincense, was to be burnt on the altar as "a memorial;" the rest belonged to the priest,

<sup>a</sup> **מִנְחָה**, from the obsolete root **מָנַח**, "to distribute" or "to give."  
<sup>b</sup> "Food-offering" would be more correct at

present, since the rendering of **מִנְחָה** by "meat-offering" (*A. V.*) suggests as a part of the sacrifice precisely the part which the sacrifice excluded [MEAT.] H.

but the meat-offerings offered by the priests themselves were to be wholly burnt.

Its meaning (which is analogous to that of the offering of the tithes, the first-fruits, and the shewbread) appears to be exactly expressed in the words of David (1 Chr. xxix. 10-14), "All that is in the heaven and in the earth is Thine . . . . All things come of Thee, and of Thine own have we given Thee." It recognized the sovereignty of the Lord, and his bounty in giving them all earthly blessings, by dedicating to Him the best of his gifts: the flour, as the main support of life; oil, as the symbol of richness; and wine as the symbol of vigor and refreshment (see Ps. civ. 15). All these were unleavened, and seasoned with salt, in order to show their purity, and hallowed by the frankincense for God's special service. This recognition, implied in all cases, is expressed clearly in the form of offering the first-fruits prescribed in Deut. xxvi. 5-11.

It will be seen that this meaning involves neither of the main ideas of sacrifice — the atonement for sin and the self-dedication to God. It takes them for granted, and is based on them. Accordingly, the meat-offering, properly so called, seems always to have been a subsidiary offering, needing to be introduced by the sin-offering, which represented the one idea, and forming an appendage to the burnt-offering, which represented the other.

Thus, in the case of public sacrifices, a "meat-offering" was enjoined as a part of —

(1.) *The daily morning and evening sacrifice* (Ex. xxix. 40, 41).

(2.) *The Sabbath-offering* (Num. xxviii. 9, 10).

(3.) *The offering at the new moon* (Num. xxviii. 11-14).

(4.) *The offerings at the great festivals* (Num. xviii. 20, 28, xxix. 3, 4, 14, 15, &c.).

(5.) *The offerings on the great day of atonement* (Num. xxix. 9, 10).

The same was the case with private sacrifices, as at —

(1.) *The consecration of priests* (Ex. xxix. 1, 2; Lev. vi. 20, viii. 2), and of *Levites* (Num. viii. 8).

(2.) *The cleansing of the leper* (Lev. xiv. 20).

(3.) *The termination of the Nazaritic vow* (Num. vi. 15).

The unbloody offerings offered alone did not properly belong to the regular meat offering. They were usually substitutes for other offerings. Thus, for example, in Lev. v. 11, a tenth of an ephah of flour is allowed to be substituted by a poor man for the lamb or kid of a trespass-offering: in Num. v. 15 the same offering is ordained as the "offering of jealousy" for a suspected wife. The unusual character of the offering is marked in both cases by the absence of the oil, frankincense, and wine. We find also at certain times libations of water poured out before God; as by Samuel's command at Mizpeh during the fast (1 Sam. vii. 6), and by David at Bethlehem (2 Sam. xxiii. 16), and a libation of oil poured by Jacob on the pillar at Bethel (Gen. xxxv. 14). But these have clearly special meanings, and are not to be included in the ordinary drink-offerings. The same remark will apply to the remarkable libation of water customary at the Feast of Tabernacles [TABERNACLES], but not mentioned in Scripture. A. B.

\* MEATS, UNCLEAN. [UNCLEAN MEATS.]

MEBUN'NAI [3 syl.] (מְבֻנָּי) [erected,

strong, Fürst]: עֵק טָוֵן וִיָּוֵן; [Comp. Μεβουнай; Ald. with 10 MSS. Σαβουχαι; other MSS. Σαβουχέ:] *Mobunnai*). In this form appears, in one passage only (2 Sam. xxiii. 27), the name of one of David's guard, who is elsewhere called SIBBECHAI (2 Sam. xxi. 18; 1 Chr. xx. 4) or SIBBECAI (1 Chr. xi. 29, xxvii. 11) in the A. V. The reading "Sibbechai" (סִבְּעַי) is evidently the true one, of which "Mebunnai" was an easy and early corruption, for even the LXX. translators must have had the same consonants before them, though they

pointed thus, סִבְּעַי. It is, curious, however, that the Aldine edition has Σαβουχαι (Kennicott, *Disse.* i. p. 186). W. A. W.

MECHER'ATHITE, THE (מְכַרְאִיתִי): [Rom. Μεχαρθήρι; Vat. Μοχορ; [FA. ο φαρμοχορ;] Alex. φερμεχουραθι: *Mecherathites*], that is, the native or inhabitant of a place called Mecherah. Only one such is mentioned, namely, HEMIER, one of David's thirty-seven warriors (1 Chr. xi. 36). In the parallel list of 2 Sam. xxiii. the name appears, with other variations, as "the Maachathite" (ver. 34). It is the opinion of Kennicott, after a long examination of the passage, that the latter is the correcter of the two; and as no place named Mecherah is known to have existed, while the Maachathites had a certain connection with Israel, and especially with David, we may concur in his conclusion, more especially as his guard contained men of almost every nation round Palestine. G.

MED'ABA (מְדַבָּא: *Madaba*), the Greek form of the name MEDEBA. It occurs only in 1 Macc. ix. 36. G.

ME'DAD. [ELDAD and MEDAD.]

ME'DAN (מְדָן, *strife, contention*, Gen.: *Maḏāl, Maḏām*; [Alex. \* *Maḏam, Maḏan*:] *Madan*), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. i. 32), whose name and descendants have not been traced beyond this record. It has been supposed, from the similarity of the name, that the tribe descended from Medan was more closely allied to *Midian* than by mere blood relation, and that it was the same as, or a portion of, the latter. There is, however, no ground for this theory beyond its plausibility. — The traditional city Medyen of the Arab geographers (the classical city Mediana in Arabia on the eastern shore of the Gulf of Eyleh, must be held to have been Midianite, not Medianite (but *Buansen, Bibbeverk*, suggests the latter identification). It has been elsewhere remarked [KETURAH] that many of the Keturahite tribes seem to have merged in early times into the Ishmaelite tribes. The mention of "Ishmaelite" as a convertible term with "Midianite," in Gen. xxxvii. 28, 36, is remarkable: but the Midianite of the A. V. in ver. 28 is Medianite in the Hebrew (by the LXX. rendered *Μαδιταιοι* and in the Vulgate *Ismaelites* and *Medianites*); and we may have here a trace of the subject of this article, though Midianite appears on the whole to be more likely the correct reading in the passages referred to. [MIDIAN.] E. S. F.

MED'EBΑ (מְדַבָּא: *Maḏaba* and *Mḏaba*: *Medaba*), a town on the eastern side of Jo-

α It may be well to give a collation of the passages in the LXX. in which Medeba occurs in the Hebrew

lan. Taken as a Hebrew word, Me-deba means "waters" of quiet," but except the tank (see below), what waters can there ever have been on that high plain? The Arabic name, though similar in sound, has a different signification.

Medeba is first alluded to in the fragment of a popular song of the time of the conquest, preserved in Num. xxi. (see ver. 30). Here it seems to denote the limit of the territory of Heshbon. It next occurs in the enumeration of the country divided amongst the Transjordanic tribes (Josh. xiii. 9), as giving its name to a district of level downs called "the Mishor of Medeba," or "the Mishor on Medeba." This district fell within the allotment of Reuben (ver. 16). At the time of the conquest Medeba belonged to the Amorites, apparently one of the towns taken from Moab by them. When we next encounter it, four centuries later, it is again in the hands of the Moabites, or which is nearly the same thing, of the Ammonites. It was before the gate of Medeba that Joab gained his victory over the Ammonites, and the horde of Aramites of Maachah, Mesopotamia, and Zobah, which they had gathered to their assistance after the insult perpetrated by Hanun on the messengers of David (1 Chr. xix. 7, compared with 2 Sam. x. 8, 14, &c.). In the time of Ahaz Medeba was a sanctuary of Moab (Is. xv. 2), but in the denunciation of Jeremiah (xlviii.), often parallel with that of Isaiah, it is not mentioned. In the Maccabean times it had returned into the hands of the Amorites, who seem most probably intended by the obscure word *JAMBRI* in 1 Macc. ix. 36. (Here the name is given in the A. V. as *Medaba*, according to the Greek spelling.) It was the scene of the capture, and possibly the death, of John Maccabæus, and also of the revenge subsequently taken by Jonathan and Simon (Joseph. *Ant.* xiii. 1, § 4; the name is omitted in Macc. on the second occasion, see ver. 38). About 110 years b. c. it was taken after a long siege by John Hyrcanus (*Ant.* xiii. 9, § 1; *B. J.* i. 2, § 4), and then appears to have remained in the possession of the Jews for at least thirty years, till the time of Alexander Jannæus (xiii. 15, § 4); and it is mentioned as one of the twelve cities, by the promise of which Aretas, the king of Arabia, was induced to assist Hyrcanus II. to recover Jerusalem from his brother Aristobulus (*Ant.* xiv. 1, § 4).

Medeba has retained its name down to our own times. To Eusebius and Jerome (*Onomast.* "Medaba") it was evidently known. In Christian times it was a noted bishopric of the patriarchate of "Beccra, or Bitira Arabiae," and is named in the Acts of the Council of Chalcedon (A. D. 451) and other Ecclesiastical Lists (Reiland, pp. 217, 223, 226, 893. See also Le Quien, *Oriens Christ.*). Among modern travellers *Mèdeba* has been visited, recognized, and described by Burckhardt (*Syria*, July 13, 1812), Seetzen (i. 407, 408, iv. 223), and Irby (p. 145); see also Porter (*Handbook*, p. 303). It is in the pastoral district of the *Belka*, which probably answers to the Mishor of the Hebrews, 4 miles S. E. of *Heshbân*, and like it lying on a rounded but rocky hill (Burckh., Seetzen). A large tank,

ext, which will show how frequently it is omitted: Num. xxi. 30, ἐπὶ Μωάβ; Josh. xiii. 9, [Rom. Μαδαβάρ, Vat.] Δαδαβάρ, Alex. Μαδαβα; ib. 16. omit, both MSS. [but Comp. Μεδαβαί]; 1 Chr. xix. 7, [Vat.] Μαδαβα, [Rom.] Alex. Μηδαβά; Is. xv. 2, τῆς Μωαβιτιδος.

columns, and extensive foundations are still to be seen; and the remains of a Roman road exist near the town, which seems formerly to have connected it with Heshbon. G.

**MEDES** (𐎠𐎢𐎽: Μῆδοι: *Medi*), one of the most powerful nations of Western Asia in the times anterior to the establishment of the kingdom of Cyrus, and one of the most important tribes composing that kingdom. Their geographical position is considered under the article *MEDIA*. The title by which they appear to have known themselves was *Mada*; which by the Semitic races was made into *Madaï*, and by the Greeks and Romans into *Medi*, whence our "Medes."

1. *Primitive History.*—It may be gathered from the mention of the Medes, by Moses, among the races descended from Japhet [see *MADAI*], that they were a nation of very high antiquity; and it is in accordance with this view that we find a notice of them in the primitive Babylonian history of Berosus, who says that the Medes conquered Babylon at a very remote period (circ. b. c. 2458\*), and that eight Median monarchs reigned there consecutively, over a space of 224 years (Beros. ap. Euseb. *Chron. Can.* i. 4). Whatever difficulties may lie in the way of our accepting this statement as historical—from the silence of other authors, from the affectation of precision in respect of so remote a time, and from the subsequent disappearance of the Medes from these parts, and their reappearance, after 1300 years, in a different locality—it is too definite and precise a statement, and comes from too good an authority, to be safely set aside as unmeaning. There are independent grounds for thinking that an Aryan element existed in the population of the Mesopotamian Valley, side by side with the Cushite and Semitic elements, at a very early date.<sup>b</sup> It is therefore not at all impossible that the Medes may have been the predominant race there for a time, as Berosus states, and may afterwards have been overpowered and driven to the mountains, whence they may have spread themselves eastward, northward, and westward, so as to occupy a vast number of localities from the banks of the Indus to those of the middle Danube. The term Aryans, which was by the universal consent of their neighbors applied to the Medes in the time of Herodotus (*Herod.* vii. 62), connects them with the early Vedic settlers in western Hindustan; the *Mati*-eni of Mount Zagros, the Sauro-*Mate* of the steppe-country between the Caspian and the Euxine, and the *Mate* or *Mæote* of the Sea of Azov, mark their progress towards the north; while the *Mædi* or *Medi* of Thrace seem to indicate their spread westward into Europe, which was directly attested by the native traditions of the Sicyonæ (*Herod.* v. 9).

2. *Connection with Assyria.*—The deepest obscurity hangs, however, over these movements, and indeed over the whole history of the Medes from the time of their bearing sway in Babylonia (b. c. 2458–2234) to their first appearance in the cuneiform inscriptions among the enemies of Assyria about b. c. 880. They then inhabit a portion of

<sup>a</sup> To this Burckhardt seems to allude when he observes (*Syr.* p. 366), "this is the ancient Mèdeba; but there is no river near it."

<sup>b</sup> See the remarks of Sir H. Rawlinson in Rawlinson's *Herodotus*, i. 621, note.

the region which bore their name down to the Mohammedan conquest of Persia; but whether they were recent immigrants into it, or had held it from a remote antiquity, is uncertain. On the one hand it is noted that their absence from earlier cuneiform monuments seems to suggest that their arrival was recent at the date above mentioned; on the other, that Ctesias asserts (ap. Diod. Sic. ii. 1, § 9), and Herodotus distinctly implies (i. 95), that they had been settled in this part of Asia at least from the time of the first formation of the Assyrian Empire (b. c. 1273). However this was, it is certain that at first, and for a long series of years, they were very inferior in power to the great empire established upon their flank. They were under no general or centralized government, but consisted of various petty tribes, each ruled by its chief, whose dominion was over a single small town and perhaps a few villages. The Assyrian monarchs ravaged their lands at pleasure, and took tribute from their chiefs; while the Medes could in no way retaliate upon their antagonists. Between them and Assyria lay the lofty chain of Zagros, inhabited by hardy mountaineers, at least as powerful as the Medes themselves, who would not tamely have suffered their passage through their territories. Media, however, was strong enough, and stubborn enough, to maintain her nationality throughout the whole period of the Assyrian sway, and was never absorbed into the empire. An attempt made by Sargon to hold the country in permanent subjection by means of a number of military colonies planted in cities of his building failed [SARGON]; and both his son Sennacherib, and his grandson Esarhaddon, were forced to lead into the territory hostile expeditions, which however seem to have left no more impression than previous invasions. Media was reckoned by the great Assyrian monarchs of this period as a part of their dominions; but its subjection seems to have been at no time much more than nominal, and it frequently threw off the yoke altogether.

3. *Median History of Herodotus.* — Herodotus represents the decadence of Assyria as greatly accelerated by a formal revolt of the Medes, following upon a period of contented subjection, and places this revolt more than 218 years before the battle of Marathon, or a little before b. c. 708. Ctesias placed the commencement of Median independence still earlier, declaring that the Medes had destroyed Nineveh and established themselves on the ruins of the Assyrian Empire, as far back as b. c. 875. No one now defends this latter statement, which alike contradicts the Hebrew records and the native documents. It is doubtful whether even the calculation of Herodotus does not throw back the independence to too early a date: his chronology of the period is clearly artificial; and the history, as he relates it, is fabulous. According to him the Medes, when they first shook off the yoke, established no government. For a time there was neither king nor prince in the land, and each man did what was right in his own eyes. Quarrels were settled by arbitration, and a certain Deioeces, having obtained a reputation in this way, contrived after a while to get himself elected sovereign. He then built the seven-walled Ecbatana [ECBATANA], established a court after the ordinary oriental model, and had a prosperous and peaceful reign of 53 years. Deioeces was succeeded by his son Phraortes, an ambitious prince, who directly after his accession began a career of conquest, first attacking and subduing

the Persians, then reducing a nation after nation, and finally perishing in an expedition against Assyria, after he had reigned 22 years. Cyaxares, the son of Phraortes, then mounted the throne. Having first introduced a new military system, he proceeded to carry out his father's designs against Assyria, defeated the Assyrian army in the field, besieged their capital, and was only prevented from capturing it on this first attack by an invasion of Scythians, which recalled him to the defense of his own country. After a desperate struggle during eight-and-twenty years with these new enemies, Cyaxares succeeded in expelling them and recovering his former empire; whereupon he resumed the projects which their invasion had made him temporarily abandon, besieged and took Nineveh, conquered the Assyrians, and extended his dominion to the Halys. Nor did these successes content him. Bent on establishing his sway over the whole of Asia, he passed the Halys, and engaged in a war with Alyattes, king of Lydia, the father of Croesus, with whom he long maintained a stubborn contest. This war was terminated at length by an eclipse of the sun, which, occurring just as the two armies were engaged, furnished an occasion for negotiations, and eventually led to the conclusion of a peace and the formation of an alliance between the two powers. The independence of Lydia and the other kingdoms west of the Halys was recognized by the Medes, who withdrew within their own borders, having arranged a marriage between the eldest son of Cyaxares and a daughter of the Lydian king, which assured them of a friendly neighbor upon this frontier. Cyaxares, soon after this, died, having reigned in all 40 years. He was succeeded by his son Astyages, a pacific monarch, of whom nothing is related beyond the fact of his deposition by his own grandson Cyrus, 35 years after his accession — an event by which the Median Empire was brought to an end, and the Persian established upon its ruins.

4. *Its imperfections.* — Such is, in outline, the Median History of Herodotus. It has been accepted as authentic by most modern writers, not so much from a feeling that it is really trustworthy, as from the want of anything more satisfactory to put in its place. That the story of Deioeces is a romance, has been seen and acknowledged (Grote's *Greece*, iii. 307, 308). That the chronological dates are improbable, and even contradictory, has been a frequent subject of complaint. Recently it has been shown that the whole scheme of dates is artificial (Rawlinson's *Herodotus*, i. 421, 422); and that the very names of the kings, except in a single instance, are unhistorical. Though the cuneiform records do not at present supply the actual history of the time, they enable us in a great measure to test the narrative which has come down to us from the Greeks. We can separate in that narrative the authentic portions from those which are fabulous; we can account for the names used, and in most instances for the numbers given; and we can thus rid ourselves of a great deal that is fictitious, leaving a *residuum* which has a fair right to be regarded as truth.

The records of Sargon, Sennacherib, and Esarhaddon clearly show that the Median kingdom did not commence so early as Herodotus imagined. These three princes, whose reigns cover the space extending from b. c. 720 to b. c. 660, all carried their arms deep into Media, and found it, not under the dominion of a single powerful monarch, but

under the rule of a vast number of petty chieftains. It cannot have been till near the middle of the 7th century B. C. that the Median kingdom was consolidated, and became formidable to its neighbors. How this change was accomplished is uncertain: the most probable supposition would seem to be, that about this time a fresh Aryan immigration took place from the countries east of the Caspian, and that the leader of the immigrants established his authority over the scattered tribes of his race, who had been settled previously in the district between the Caspian and Mount Zagros. There is good reason to believe that this leader was the great Cyaxares, whom Diodorus speaks of in one place as the first king (Diod. Sic. ii. 32), and whom Æschylus represents as the founder of the Medo-Persic empire (*Pers.* 761). The Deïoces and Phraortes of Herodotus are thus removed from the list of historical personages altogether, and must take rank with the early kings in the list of Ctesias,<sup>a</sup> who are now generally admitted to be inventions. In the case of Deïoces the very name is fictitious, being the Aryan *dohák*, "biter" or "snake," which was a title of honor assumed by all Median monarchs, but not a proper name of any individual. Phraortes, on the other hand, is a true name, but one which has been transferred to this period from a later passage of Median history, to which reference will be made in the sequel. (Rawlinson's *Herod.* i. 408.)

5. *Development of Median power, and formation of the Empire.*—It is evident that the development of Median power proceeded *pari passu* with the decline of Assyria, of which it was in part an effect, in part a cause. Cyaxares must have been contemporary with the later years of that Assyrian monarch who passed the greater portion of his time in hunting expeditions in Susiana. [ASSYRIA, § 11.] His first conquests were probably undertaken at this time, and were suffered tamely by a prince who was destitute of all military spirit. In order to consolidate a powerful kingdom in the district east of Assyria, it was necessary to bring into subjection a number of Scythic tribes, who disputed with the Aryans the possession of the mountain-country, and required to be incorporated before Media could be ready for great expeditions and distant conquests. The struggle with these tribes may be the real event represented in Herodotus by the Scythic war of Cyaxares, or possibly his narrative may contain a still larger amount of truth. The Scyths of Zagros may have called in the aid of their kindred tribes towards the north, who may have impeded for a while the progress of the Median arms, while at the same time they really prepared the way for their success by weakening the other nations of this region, especially the Assyrians. According to Herodotus, Cyaxares at last got the better of the Scyths by inviting their leaders to a banquet, and there treacherously murdering them. At any rate it is clear that at a tolerably early period of his reign they ceased to be formidable, and he was able to direct his efforts against other enemies. His capture of Nineveh and conquest of Assyria are facts which no skepticism can doubt; and the

date of the capture may be fixed with tolerable certainty to the year B. C. 625. Abydenus (probably following Berosus) informs us that in his Assyrian war Cyaxares was assisted by the Babylonians under Nabopolassar, between whom and Cyaxares an intimate alliance was formed, cemented by a union of their children; and that a result of their success was the establishment of Nabopolassar as independent king on the throne of Babylon, an event which we know to belong to the above-mentioned year. It was undoubtedly after this that Cyaxares endeavored to conquer Lydia. His conquest of Assyria had made him master of the whole country lying between Mount Zagros and the river Halys, to which he now hoped to add the tract between the Halys and the Ægean Sea. It is surprising that he failed, more especially as he seems to have been accompanied by the forces of the Babylonians, who were perhaps commanded by Nebuchadnezzar on the occasion. [NEBUCHADNEZZAR.] After a war which lasted six years he desisted from his attempt, and concluded the treaty with the Lydian monarch, of which we have already spoken. The three great Oriental monarchies, Media, Lydia, and Babylon, were now united by mutual engagements and intermarriages, and continued at peace with one another during the remainder of the reign of Cyaxares, and during that of Astyages, his son and successor.

6. *Extent of the Empire.*—The limits of the Median Empire cannot be definitely fixed; but it is not difficult to give a general idea of its size and position. From north to south its extent was in no place great, since it was certainly confined between the Persian Gulf and the Euphrates on the one side, the Black and Caspian Seas on the other. From east to west it had, however, a wide expansion, since it reached from the Halys at least as far as the Caspian Gates, and possibly further. It comprised Persia, Media Magna, Northern Media, Matiene or Media Mattiana, Assyria, Armenia, Cappadocia, the tract between Armenia and the Caucasus, the low tract along the southwest and south of the Caspian, and possibly some portion of Hyrcania, Parthia, and Sagartia. It was separated from Babylonia either by the Tigris, or more probably by a line running about half way between that river and the Euphrates, and thus did not include Syria, Phœnicia, or Judæa, which fell to Babylon on the destruction of the Assyrian Empire. Its greatest length may be reckoned at 1500 miles from N. W. to S. E., and its average breadth at 400 or 450 miles. Its area would thus be about 600,000 square miles, or somewhat greater than that of modern Persia.

7. *Its character.*—With regard to the nature of the government established by the Medes over the conquered nations, we possess but little trustworthy evidence. Herodotus in one place compares, somewhat vaguely, the Median with the Persian system (i. 134), and Ctesias appears to have asserted the positive introduction of the satrapial organization into the empire at its first foundation by his Arbaces (Diod. Sic. ii. 28); but on the whole it is perhaps most probable that the As-

<sup>a</sup> Ctesias made the Median monarchy commence about B. C. 875, with a certain Arbaces, who headed the rebellion against Sardanapalus, the voluptuary. Arbaces reigned 28 years, and was succeeded by Maniaces, who reigned 50 years. Then followed Sosarmus (30 years), Artias (50 years), Arbianes (22 years),

Arteus (40 years), Artynes (22 years), Astibaras (40 years), and finally Aspadas, or Astyages, the last king (2 years). This scheme appears to be a clumsy extension of the monarchy, by means of repetition, from the data furnished by Herodotus.

rytian organization was continued by the Medes, the subject-nations retaining their native monarchs, and merely acknowledging subjection by the payment of an annual tribute. This seems certainly to have been the case in Persia, where Cyrus and his father Cambyses were monarchs, holding their crown of the Median king, before the revolt of the former; and there is no reason to suppose that the remainder of the empire was organized in a different manner. The satrapial organization was apparently a Persian invention, begun by Cyrus, continued by Cambyses, his son, but first adopted as the regular governmental system by Darius Hystaspis.

8. *Its duration.*—Of all the ancient Oriental monarchies the Median was the shortest in duration. It commenced, as we have seen, after the middle of the 7th century B. C., and it terminated B. C. 558. The period of three quarters of a century, which Herodotus assigns to the reigns of Cyaxares and Astyages, may be taken as fairly indicating its probable length, though we cannot feel sure that the years are correctly apportioned between the monarchs. Two kings only occupied the throne during the period; for the Cyaxares II. of Xenophon is an invention of that amusing writer.

9. *Its final overthrow.*—The conquest of the Medes by a sister-Iranic race, the Persians, under their native monarch Cyrus, is another of those indisputable facts of remote history, which make the inquirer feel that he sometimes attains to solid ground in these difficult investigations. The details of the struggle, which are given partially by Herodotus (i. 127, 128), at greater length by Nicolaus of Damascus (*Fr. Hist. Gr.* iii. 404–406), probably following Ctesias, have not the same claim to acceptance. We may gather from them, however, that the contest was short, though severe. The Medes did not readily relinquish the position of superiority which they had enjoyed for 75 years; but their vigor had been sapped by the adoption of Assyrian manners, and they were now no match for the hardy mountaineers of Persia. After many partial engagements a great battle was fought between the two armies, and the result was the complete defeat of the Medes, and the capture of their king, Astyages, by Cyrus.

10. *Position of Media under Persia.*—The treatment of the Medes by the victorious Persians was not that of an ordinary conquered nation. According to some writers (as Herodotus and Xenophon) there was a close relationship between Cyrus and the last Median monarch, who was therefore naturally treated with more than common tenderness. The fact of the relationship is, however, denied by Ctesias; and whether it existed or not, at any rate the peculiar position of the Medes under Persia was not really owing to this accident. The two nations were closely akin; they had the same Aryan or Iranic origin, the same early traditions, the same language (Strab. xv. 2, § 8), nearly the same religion, and ultimately the same manners and customs, dress, and general mode of life. It is not surprising therefore that they were drawn together, and that, though never actually coalescing, they still formed to some extent a single privileged people. Medes were advanced to stations of high honor and importance under Cyrus and his successors, an advantage shared by no other conquered people. The Median capital was at first the chief royal residence, and always remained one of the places at which the court spent a portion of the

year; while among the provinces Media claimed and enjoyed a precedence, which appears equally in the Greek writers and in the native records. Still, it would seem that the nation, so lately sovereign, was not altogether content with its secondary position. On the first convenient opportunity Media rebelled, elevating to the throne a certain Phraortes (*Fravartish*), who called himself Xathrites, and claimed to be a descendant from Cyaxares. Darius Hystaspis, in whose reign this rebellion took place, had great difficulty in suppressing it. After vainly endeavoring to put it down by his generals, he was compelled to take the field himself. He defeated Phraortes in a pitched battle, pursued, and captured him near Rhages, mutilated him, kept him for a time "chained at his door," and finally crucified him at Ecbatana, executing at the same time his chief followers (see the *Behistun Inscription*, in Rawlinson's *Herodotus*, ii. 601, 602). The Medes hereupon submitted, and quietly bore the yoke for another century, when they made a second attempt to free themselves, which was suppressed by Darius Nothus (*Xen. Hell.* i. 2, § 19). Henceforth they patiently acquiesced in their subordinate position, and followed through its various shifts and changes the fortune of Persia.

11. *Internal Divisions.*—According to Herodotus the Median nation was divided into six tribes (*ἔθνη*), called the Busee, the Paretaceni, the Struchates, the Arizanti, the Budii, and the Magi. It is doubtful, however, in what sense these are to be considered as ethnic divisions. The Paretaceni appear to represent a geographical district, while the Magi were certainly a priest caste; of the rest we know little or nothing. The Arizanti, whose name would signify "of noble descent," or "of Aryan descent," must (one would think) have been the leading tribe, corresponding to the Pasargadee in Persia; but it is remarkable that they have only the fourth place in the list of Herodotus. The Budii are fairly identified with the eastern *Phut*—the *Putiya* of the Persian inscriptions—whom Scripture joins with Persia in two places (*Ez.* xxvii. 10, xxxviii. 5). Of the Busee and the Struchates nothing is known beyond the statement of Herodotus. We may perhaps assume, from the order of Herodotus's list, that the Busee, Paretaceni, Struchates, and Arizanti were true Medes, of genuine Aryan descent, while the Budii and Magi were foreigners admitted into the nation.

12. *Religion.*—The original religion of the Medes must undoubtedly have been that simple creed which is placed before us in the earlier portions of the Zendavesta. Its peculiar characteristic was Dualism, the belief in the existence of two opposite principles of good and evil, nearly if not quite on a par with one another. Ormazd and Ahriman were both self-caused and self-existent, both indestructible, both potent to work their will—their warfare had been from all eternity, and would continue to all eternity, though on the whole the struggle was to the disadvantage of the Prince of Darkness. Ormazd was the God of the Aryans, the object of their worship and trust; Ahriman was their enemy, an object of fear and abhorrence, but not of any religious rite. Besides Ormazd, the Aryans worshipped the Sun and Moon, under the names of Mithra and Homā; and they believed in the existence of numerous spirits or genii, some good, some bad, the subjects and ministers respectively of the two powers of Good and Evil. Their cult was simple consisting

in processions, religious chants and hymns, and a few simple offerings, expressions of devotion and thankfulness. Such was the worship and such the belief which the whole Aryan race brought with them from the remote east when they migrated westward. Their migration brought them into contact with the fire-worshippers of Armenia and Mount Zagros, among whom Magism had been established from a remote antiquity. The result was either a combination of the two religions, or in some cases an actual conversion of the conquerors to the faith and worship of the conquered. So far as can be gathered from the scanty materials in our possession, the latter was the case with the Medes. While in Persia the true Aryan creed maintained itself, at least to the time of Darius Hystaspis, in tolerable purity, in the neighboring kingdom of Media it was early swallowed up in Magism, which was probably established by Cyaxares or his successor as the religion of the state. The essence of Magism was the worship of the elements,

Median Dress. (From Monuments.)

fire, water, air, and earth, with a special preference of fire to the remainder. Temples were not allowed, but fire-altars were maintained on various sacred sites, generally mountain tops, where sacrifices were continually offered, and the flame was never suffered to go out. A hierarchy naturally followed, to perform these constant rites, and the Magi became recognized as a sacred caste entitled to the veneration of the faithful. They claimed in many cases a power of divining the future, and practiced largely those occult arts which are still called by their name in most of the languages of modern Europe. The fear of polluting the elements gave rise to a number of curious superstitions among the professors of the Magian religion (Herod. i. 138); among the rest the strange practice of neither burying nor burning their dead, but exposing them to be devoured by beasts or birds of prey (Herod. i. 140; Strab. xv. 3, § 20). This custom is still observed by their representatives, the modern Parsees.

### 13. Manners, customs, and national character.

—The customs of the Medes are said to have nearly resembled those of their neighbors, the Armenians and the Persians; but they were regarded as the inventors, their neighbors as the copyists (Strab. xi. 13, § 9). They were brave and warlike, excellent riders, and remarkably skillful with the bow. The flowing robe, so well known from the

Persepolitan sculptures, was their native dress, and was certainly among the points for which the Persians were beholden to them. Their whole costume was rich and splendid; they were fond of scarlet, and decorated themselves with a quantity of gold, in the shape of chains, collars, armlets, etc. As troops they were considered little inferior to the native Persians, next to whom they were usually ranged in the battle-field. They fought both on foot and on horseback, and carried, not bows and arrows only, but shields, short spears, and poniards. It is thought that they must have excelled in the manufacture of some kinds of stuffs.

### 14. References to the Medes in Scripture.—

The references to the Medes in the canonical Scriptures are not very numerous, but they are striking. We first hear of certain "cities of the Medes," in which the captive Israelites were placed by "the king of Assyria" on the destruction of Samaria; B. c. 721 (2 K. xvii. 6, xviii. 11). This implies the subjection of Media to Assyria at the time of Shalmaneser, or of Sargon, his successor, and accords (as we have shown) very closely with the account given by the latter of certain military colonies which he planted in the Median country. Soon afterwards Isaiah prophesies the part which the Medes shall take in the destruction of Babylon (Is. xiii. 17, xxi. 2); which is again still more distinctly declared by Jeremiah (li. 11 and 28), who sufficiently indicates the independence of Media in his day (xxv. 25). Daniel relates, as a historian, the fact of the Medo-Persic conquest (v. 28, 31), giving an account of the reign of Darius the Mede, who appears to have been made viceroy by Cyrus (vi. 1-28). In Ezra we have a mention of Achmetha (Ecbatana), "the palace in the province of the Medes," where the decree of Cyrus was found (vi. 2-5) — a notice which accords with the known facts that the Median capital was the seat of government under Cyrus, but a royal residence only and not the seat of government under Darius Hystaspis. Finally, in Esther, the high rank of Media under the Persian kings, yet at the same time its subordinate position, are marked by the frequent combination of the two names in phrases of honor, the precedence being in every case assigned to the Persians.<sup>a</sup>

In the Apocryphal Scriptures the Medes occupy a more prominent place. The chief scene of one whole book (Tobit) is Media; and in another (Judith) a very striking portion of the narrative belongs to the same country. But the historical character of both these books is with reason doubted; and from neither can we derive any authentic or satisfactory information concerning the people. From the story of Tobias little could be gathered, even if we accepted it as true; while the history of Arphaxad (which seems to be merely a distorted account of the struggle between the rebel Phraortes and Darius Hystaspis) adds nothing to our knowledge of that contest. The mention of Rhages in both narratives as a Median town and region of importance is geographically correct; and it is historically true that Phraortes suffered his overthrow in the Rhagian district. But beyond these facts the narratives in question contain little

<sup>a</sup> See Esth. i. 3, 14, 18, and 19. The only passage in Esther where Media takes precedence of Persia is x. 3, where we have a mention of "the book of the chronicles of the kings of Media and Persia." Here the order is chronological. As the Median empire

preceded the Persian, its chronicles came first in "the book." The precedence in Daniel (v. 28, and vi. 5, 12, &c.) is owing to the fact of a Median viceroy being established on the throne.

hat even illustrates the true history of the Median nation. (See the articles on JUDITH and TOBIAS in Winer's *Realwörterbuch*; and on the general subject compare Rawlinson's *Herodotus* i. 401-422; Bosanquet's *Chronology of the Medes*, read before the Royal Asiatic Society, June 5, 1858; Brandis, *Rerum Assyriarum tempora emendata*, pp. 1-14; Grote's *History of Greece*, iii. pp. 301-312; and Hupfeld's *Exercitationum Herodotearum Specimina duo*, p. 56 ff.) G. R.

**MEDIA** (מִדְיָה, *i. e.* Madai: Μηδία: *Media*), a country the general situation of which is abundantly clear, though its limits may not be capable of being precisely determined. Media lay northwest of Persia Proper, south and southwest of the Caspian, east of Armenia and Assyria, west and northwest of the great salt desert of Iram. Its greatest length was from north to south, and in this direction it extended from the 32d to the 40th parallel, a distance of 550 miles. In width it reached from about long. 45° to 53°; but its average breadth was not more than from 250 to 300 miles. Its area may be reckoned at about 150,000 square miles, or three-fourths of that of modern France. The natural boundary of Media on the north was the river *Aras*; on the west Zagros and the mountain-chain which connects Zagros with Ararat; in the south Media was probably separated from Persia by the desert which now forms the boundary between *Farsistan* and *Irak Ajemi*; on the east its natural limit was the desert and the Caspian Gates. West of the Gates, it was bounded, not (as is commonly said) by the Caspian Sea, but by the mountain range south of that sea, which separates between the high and the low country. It thus comprised the modern provinces of *Irak Ajemi*, Persian *Kurdistan*, part of *Luristan*, *Azerbaijan*, perhaps *Talish* and *Ghilan*, but not *Mazanderan* or *Aserabad*.

The division of Media commonly recognized by the Greeks and Romans was that into Media Magna, and Media Atropatene. (Strab. xi. 13, § 1; comp. Polyb. v. 44; Plin. *H. N.* vi. 13; Ptol. vi. 2, &c.) (1.) Media Atropatene, so named from the satrap Atropates, who became independent monarch of the province on the destruction of the Persian empire by Alexander (Strab. *ul. sup.*; Diocl. Sic. xviii. 3), corresponded nearly to the modern *Azerbaijan*, being the tract situated between the Caspian and the mountains which run north from Zagros, and consisting mainly of the rich and fertile basin of Lake *Urumiyeh*, with the valleys of the *Aras* and the *Sefid Rud*. This is chiefly a high tract, varied between mountains and plains, and lying mostly three or four thousand feet above the sea level. The basin of Lake *Urumiyeh* has a still greater elevation, the surface of the lake itself, into which all the rivers run, being as much as 4,200 feet above the ocean. The country is fairly fertile, well-watered in most places, and favorable to agriculture; its climate is temperate, though occasionally severe in winter; it produces rice, corn of all kinds, wine, silk, white wax, and all manner of delicious fruits. *Tabriz*, its modern capital, forms the summer residence of the Persian kings, and is a beautiful place, situated in a forest of orchards. The ancient Atropatene may have included also the countries of *Ghilan* and *Talish*, together with the plain of *Moghan* at the mouth of the combined *Kur* and *Aras* rivers. These tracts are low and **fat**; that of *Moghan* is sandy and sterile; *Talish*

is more productive; while *Ghilan* (like *Mazanderan*) is rich and fertile in the highest degree. The climate of *Ghilan*, however, is unhealthy, and at times pestilential; the streams perpetually overflow their banks; and the waters which escape stagnate in marshes, whose exhalations spread disease and death among the inhabitants. (2.) Media Magna lay south and east of Atropatene. Its northern boundary was the range of *Elburz* from the Caspian Gates to the *Rudbar* pass, through which the *Sefid Rud* reaches the low country of *Ghilan*. It then adjoined upon Atropatene, from which it may be regarded as separated by a line running about S. W. by W. from the bridge of *Menjil* to *Zagros*. Here it touched Assyria, from which it was probably divided by the last line of hills towards the west, before the mountains sink down upon the plain. On the south it was bounded by *Susiana* and Persia Proper, the former of which it met in the modern *Luristan*, probably about lat. 33° 30', while it struck the latter on the eastern side of the *Zagros* range, in lat. 32° or 32° 30'. Towards the east it was closed in by the great salt desert, which Herodotus reckons to *Sagartia*, and later writers to *Parthia* and *Carmania*. Media Magna thus contained great part of *Kurdistan* and *Luristan*, with all *Ardelur* and *Irak Ajemi*. The character of this tract is very varied. Towards the west, in *Ardelan*, *Kurdistan*, and *Luristan*, it is highly mountainous, but at the same time well watered and richly wooded, fertile and lovely; on the north, along the flank of *Elburz*, it is less charming, but still pleasant and tolerably productive; while towards the east and southeast it is bare, arid, rocky, and sandy, supporting with difficulty a spare and wretched population. The present productions of *Zagros* are cotton, tobacco, hemp, Indian corn, rice, wheat, wine, and fruits of every variety: every valley is a garden; and besides valleys, extensive plains are often found, furnishing the most excellent pasturage. Here were nurtured the valuable breed of horses called *Niseean*, which the Persians cultivated with such especial care, and from which the horses of the monarch were always chosen. The pasture-grounds of *Khawah* and *Alishtar* between *Behistan* and *Khorram-abad*, probably represent the "Niseean plain" of the ancients, which seems to have taken its name from a town *Nisea* (*Nisyra*), mentioned in the cuneiform inscriptions. Although the division of Media into these two provinces can only be distinctly proved to have existed from the time of Alexander the Great, yet there is reason to believe that it was more ancient, dating from the settlement of the Medes in the country, which did not take place all at once, but was first in the more northern and afterwards in the southern country. It is indicative of the division, that there were two *Ecbatanas* — one, the northern, at *Takht-i-Suleiman*: the other, the southern, at *Umadan*, on the flanks of Mount *Orontes* (*Ehvanl*) — respectively the capitals of the two districts. [ECBATANA.] Next to the two *Ecbatanas*, the chief town in Media was undoubtedly *Rhages* — the *Ragn* of the inscriptions. Hither the rebel *Phraortes* fled on his defeat by *Darius Hystaspis*, and hither too came *Darius Codomannus* after the battle of *Arbela*, on his way to the eastern provinces (Arr. *Exp. Alex.* iii. 20). The only other place of much note was *Bagisatana*, the modern *Behistan*, which guarded the chief pass connecting Media with the *Mesopotamian* plain.

No doubt both parts of Media were further subdivided into provinces; but no trustworthy account of these minor divisions has come down to us. The tract about Rhages was certainly called Rhagianna; and the mountain tract adjoining Persia seems to have been known as Parætacene, or the country of the Parætace. Ptolemy gives as Median districts Elymais, Choromithrene, Sigrina, Daritis, and Syromedia; but these names are little known to other writers, and suspicions attach to some of them. On the whole it would seem that we do not possess materials for a minute account of the ancient geography of the country, which is very imperfectly described by Strabo, and almost omitted by Pliny.

(See Sir II. Rawlinson's Articles in the *Journal of the Geographical Society*, vol. ix. Art. 2, and vol. x. Articles 1 and 2; and compare Layard's *Nineveh and Babylon*, chap. xvii. and xviii.; Chesney's *Euphrates Expedition*, i. 122, &c.; Kinneir's *Persian Empire*; Ker Porter's *Travels*; and Rawlinson's *Herodotus*, vol. i. Appendix, Essay ix.) [On the geography, see also Ritter's *Erkunde*, viii. and ix., and M. von Niebuhr's *Geschichte Assur's u. Babel's*, pp. 380-314.] G. R.

\* We are now to add to the above sources Prof. Rawlinson's *Ancient Monarchies*, vol. iii., the first part of which (pp. 1-557) is occupied with the history of the Medes. This volume has appeared since the foregoing article was written. On some of the points of contact between Median history and the Bible, see Rawlinson's *Historical Evidences*, lect. v., and the Notes on the text (Bampton Lectures for 1859), and also Niebuhr's *Gesch. Assur's u. Babel's*, pp. 55 f., 144 f., 224, and elsewhere. Arnold comprises the history and the geography of the subject under the one head of "Medien," in Herzog's *Real-Encyk.* ix. 231-234. See in the *Dictionary* the articles on BABYLON, DANIEL, and DARIUS, THE MEDE. H.

**MEDIAN** (מֵדִיָּה; *Keri*, מְדִיָּה; ὁ Μῆδος; *Medus*). Darius, "the son of Ahasuerus, of the seed of the Medes" (Dan. ix. 1) or "the Mede" (xi. 1), is thus described in Dan. v. 31.

**MEDICINE**. I. Next to care for food, clothing, and shelter, the curing of hurts takes precedence even amongst savage nations. At a later period comes the treatment of sickness, and recognition of states of disease; and these mark a nascent civilization. Internal diseases, and all for which an obvious cause cannot be assigned, are in the most early period viewed as the visitation of God, or as the act of some malignant power, human—as the evil eye—or else superhuman, and to be dealt with by sorcery, or some other occult supposed agency. The Indian notion is that all diseases are the work of an evil spirit (Sprengel, *Gesch. der Arzneikunde*, pt. ii. 48). But among a civilized race the preëminence of the medical art is confessed in proportion to the increased value set on human life, and the vastly greater amount of comfort and enjoyment of which civilized man is capable. It would be strange if their close connection historically with Egypt had not imbued

the Israelites with a strong appreciation of the value of this art, and with some considerable degree of medical culture. From the most ancient testimonies, sacred and secular, Egypt, from whatever cause, though perhaps from necessity, was foremost among the nations in this most human of studies purely physical. Again, as the active intelligence of Greece flowed in upon her, and mingled with the immense store of pathological records which must have accumulated under the system described by Herodotus,—Egypt, especially Alexandria, became the medical repository and museum of the world. Thither all that was best worth preserving amid earlier civilizations, whether her own or foreign, had been attracted, and medicine and surgery flourished amidst political decadence and artistic decline. The attempt has been made by a French writer (Renouard, *Histoire de Médecine depuis son Origine*, etc.) to arrange in periods the growth of the medical art as follows: 1st. The Primitive or Instinctive Period, lasting from the earliest recorded treatment to the fall of Troy. 2d. The Sacred or Mystic Period, lasting till the dispersion of the Pythagorean Society, 500 B. C. 3d. The Philosophical Period, closing with the foundation of the Alexandrian Library, B. C. 320. 4th. The Anatomical Period, which continued until the death of Galen, A. D. 200. But these artificial lines do not strictly exhibit the truth of the matter. Egypt was the earliest home of medical and other skill for the region of the Mediterranean basin, and every Egyptian mummy of the more expensive and elaborate sort, involved a process of anatomy. This gave opportunities of inspecting a vast number of bodies, varying in every possible condition. Such opportunities were sure to be turned to account (Pliny, *N. H.* xix. 5) by the more diligent among the faculty—for "the physicians" embalmed (Gen. I. 2). The intestines had a separate receptacle assigned them, or were restored to the body through the ventral incision (Wilkinson, v. 468); and every such process which we can trace in the mummies discovered shows the most minute accuracy of manipulation. Notwithstanding these laborious efforts, we have no trace of any philosophical or rational system of Egyptian origin; and medicine in Egypt was a mere art or profession. Of science the Asclepiade of Greece were the true originators. Hippocrates, who wrote a book on "Ancient Medicine," and who seems to have had many opportunities of access to foreign sources, gives no prominence to Egypt. It was no doubt owing to the repressive influences of her fixed institutions that this country did not attain to a vast and speedy proficiency in medical science, when *post mortem* examination was so general a rule instead of being a rare exception. Still it is impossible to believe that considerable advances in physiology could have failed to be made there from time to time, and similarly, though we cannot so well determine how far, in Assyria.<sup>a</sup> The best guarantee for the advance of medical science is, after all, the interest which every human being has in it; and this is most strongly felt in large grega-

<sup>a</sup> Recent researches at Kouyunjik have given proof, it is said, of the use of the microscope in minute services, and yielded up even specimens of magnifying lenses. A cone engraved with a table of cubes, so small as to be unintelligible without a lens, was brought down by Sir II. Rawlinson, and is now in the British

Museum. As to whether the invention was brought to bear on medical science, proof is wanting. Probably such science had not yet been pushed to the point at which the microscope becomes useful. Only those who have quick keen eyes for the nature-world see the want of such spectacles.

rious masses of population. Compared with the wild countries around them, at any rate, Egypt must have seemed incalculably advanced. Hence the awe, with which Homer's Greeks speak of her wealth,<sup>a</sup> resources, and medical skill; and even the visit of Abraham, though prior to this period, found her no doubt in advance of other countries. Representations of early Egyptian surgery apparently occur on some of the monuments of Beni-Hassan. Flint knives used

for embalming have been recovered — the "Ethiopic stone" of Herodotus (ii. 86; comp. Ex. iv. 25) was probably either black flint or agate; and those who have assisted at the opening of a mummy have noticed that the teeth exhibited a dentistry not inferior in execution to the work of the best modern experts. This confirms the statement of Herodotus that every part of the body was studied by a distinct practitioner. Pliny (vii. 57) asserts that the Egyptians claimed the invention of the healing art, and (xxvi. 1) thinks them subject to many diseases. Their "many medicines" are mentioned (Jer. xlvi. 11). Many valuable drugs may be derived from the plants mentioned by Wilkinson (iv. 621), and the senna of the adjacent interior of Africa still exceeds all other. Athothmes II., king of the country, is said to have written on the subject of anatomy. Hermes (who may perhaps be the same as Athothmes, intellect personified, only disguised as a deity instead of a legendary king), was said to have written six books on medicine; in which an entire chapter was devoted to diseases of the eye (Rawlinson's *Herod.*, note to ii. 84), and the first half of which related to anatomy. The various recipes known to have been beneficial were recorded, with their peculiar cases, in the memoirs of physic, inscribed among the laws, and deposited in the principal temples of the place (Wilkinson, iii. 396, 397). The reputation of its practitioners in historical times was such that both Cyrus and Darius sent to Egypt for physicians or surgeons<sup>b</sup> (Herod. iii. 1, 129-132); and by one of the same country, no doubt, Cambyzes' wound was<sup>c</sup> tended, though not perhaps with much zeal for his recovery.

Of midwifery we have a distinct notice (Ex i. 15), and of women as its practitioners,<sup>d</sup> which fact may also be verified from the sculptures (Rawlinson's note on Herod. ii. 84). The physicians

<sup>a</sup> *Il.* ix. 381; *Od.* iv. 229. See also Herod. ii. 84, and i. 77. The simple heroes had reverence for the healing skill which extended only to wounds. There is hardly any recognition of disease in Homer. There is sudden death, pestilence, and weary old age, but hardly any fixed morbid condition save in a simile *Od.* v. 395). See, however, a letter *De rebus ex Homero medicis*, D. G. Wolf, Wittenberg, 1791.

<sup>b</sup> Comp. the letter of Benhadad to Joram, 2 K. v. 1, to procure the cure of Naaman.

<sup>c</sup> The words of Herod. (iii. 63), *ὡς ἐσφακίλισέ τε τὸ ἰστίον καὶ ὁ μηρὸς τάχιστα ἐσάνη*, appear to indicate medical treatment by the terms employed. It is not

unlike the physician may have taken the opportunity to avenge the wrongs of his nation.

Flint Knives. (Wilkinson.)

under accredited treatment no blame was attached. They treated gratis patients when travelling or on military service. Most diseases were by them ascribed to indigestion and excessive eating (Diod. Sicul.<sup>e</sup> i. 82), and when their science failed them magic<sup>f</sup> was called in. On recovery it was also customary to suspend in a temple an exvoto, which was commonly a model of the part affected; and such offerings doubtless, as in the Coan Temple of Æsculapius, became valuable aids to the pathological

Doctors (or Barbers?) and Patients. (Wilkinson.)

student. The Egyptians who lived in the corn-growing region are said by Herodotus (ii. 77) to have been specially attentive to health. The practice of circumcision is traceable on monuments certainly anterior to the age of Joseph. Its antiquity is involved in obscurity; especially as all we know of the Egyptians makes it unlikely that they would have borrowed such a practice, so late as the period of Abraham, from any mere sojourner among them. Its beneficial effects in the temperature of Egypt and Syria have often been noticed, especially as a preservative of cleanliness, etc. The scrupulous attention paid to the dead was favorable to the health of the living. Such powerful drugs as asphaltum, natron, resin,

unlikely the physician may have taken the opportunity to avenge the wrongs of his nation.

<sup>d</sup> The sex is clear from the Heb. grammatical forms. The names of two, Shiphrah and Puah, are recorded. The treatment of new-born Hebrew infants is mentioned (Ex. xvi. 4) as consisting in washing, salting, and swaddling: this last was not used in Egypt (Wilkinson).

<sup>e</sup> The same author adds that the most common method of treatment was by *κλυσμοῖς καὶ νηστείαις καὶ ἐμέτοις*.

<sup>f</sup> Magicians and physicians both belonged to the priestly caste, and perhaps united their professions in one person.

pure Litumen, and various aromatic gums, suppressed or counteracted all noxious effluvia from a the corpse; even the saw-dust of the floor, on which the body had been cleansed, was collected in small linen bags, which, to the number of twenty or thirty, were deposited in vases near

importance which would tend to check the Jews from sharing this was the ceremonial law, the special reverence of Jewish feeling towards human remains, and the abhorrence of "uncleanness." Yet those Jews — and there were at all times since the Captivity not a few, perhaps — who tended to foreign laxity, and affected Greek philosophy and culture, would assuredly, as we shall have further occasion to notice that they in fact did, enlarge their anatomical knowledge from sources which repelled their stricter brethren, and the result would be apparent in the general elevated standard of that profession, even as practiced in Jerusalem. The diffusion of Christianity in the 3d and 4th centuries exercised a similar but more universal restraint on the dissecting-room, until anatomy as a pursuit became extinct, and the notion of profaneness quelling everywhere such researches, surgical science became stag-

Exvotos. (Wilkinson.)

1. Ivory hand, in Mr. Salt's collection.
2. Stone tablet, dedicated to Amunre, for the recovery of a complaint in the ear; found at Thebes.
3. An ear, of terra cotta, from Thebes, in Sir J. Gardner Wilkinson's possession.

the tomb (Wilkinson, *b* v. 468, 469). For the extent to which these practices were imitated among the Jews, see EMBALMING; at any rate the uncleanness imputed to contact with a corpse was a powerful preservative *c* against the inoculation of the living frame with morbid humors. But, to pursue to later times this merely general question, it appears (Pliny, *N. H.* xix. 5 *d*) that the Ptolemies themselves practiced dissection, and that, at a period when Jewish intercourse with Egypt was complete and reciprocal, *e* there existed in Alexandria a great zeal for anatomical study. The only influence of

nant to a degree to which it had never previously sunk within the memory of human records.

In comparing the growth of medicine in the rest of the ancient world, the high rank of its practitioners — princes and heroes — settles at once the question as to the esteem in which it was held in the Homeric *f* and pre-Homeric *g* period. To descend to the historical, the story of Democedes *h* at the court of Darius illustrates the practice of Greek surgery before the period of Hippocrates; antipating in its gentler waiting upon *i* nature, as compared (Herod. iii. 130) with that of the Per-

*a* "L'Égypte moderne n'en est plus là, et, comme M. Pariset l'*a* si bien signalé, les tombeaux des péres, infiltrés par les eaux du Nil, se convertissent en autant de foyers pestentiels pour leurs enfans" (Michel Lévy, p. 12). This may perhaps be the true account of the production of the modern plague, which, however, disappears when the temperature rises above a given limit, excessive heat tending to dissipate the miasma.

*b* This author further refers to Pettigrew's *History of Egyptian Mummies*.

*c* Dr. Ferguson, in an article on pestilential infection, *Quarterly Review*, vol. xlvii, 1832, insists on actual contact with the diseased or dead as the condition of transmission of the disease. But compare a tract by Dr. Macmichael, *On the Progress of Opinion on the Subject of Contagion*. See also *Essays on State Medicine*, H. W. Rumsey, London, 1856. *ess* iii. p. 130, &c. For ancient opinions on the matter, see *Pauus Ægin.* ed. Sydenham Society, i. 284, &c. Thucydides, in his description of the Athenian plague, is the first who alludes to it, and that inferentially. It seems on the whole most likely that contagiousness *is* a quality of morbid condition which may be present or absent. What the conditions are no one seems able to say. As an instance, elephantiasis was said by early writers (e. g. Aræteus and Rhazes) to be contagious, which some modern authorities deny. The assertion and denial are so clear and circumstantial in either case that no other solution seems open to the question

*d* "Regibus corpora mortuorum ad scrutandos morbos insectantibus."

*e* Cyrene, the well-known Greek African colony, had a high repute for physicians of excellence; and some of its coins bear the impress of the *ὄπός*, or *assafoetida*, a medical drug to which miraculous virtues were ascribed. Now the Cyrenaica was a home for the Jews of the dispersion (Acts ii. 10; *Pau. Ægin.* Sydenham Society, iii. 283).

*f* Galen himself wrote a book, *περὶ τῆς καθ' Ὀμηρον ἱατρικῆς*, quoted by Alexander of Tralles, lib. ix. cap. 4.

*g* The indistinctness with which the medical, the magical, and the poisonous were confounded under the word *φάρμακα* by the early Greeks will escape no one. (So *Ex.* xxii. 18, the Heb. word for "witch" is in the LXX. rendered by *φάρμακός*.) The legend of the Argonauts and Medea illustrates this; the Homeric Moly, and Nephentes, and the whole story of Circe, confirm it.

*h* The fame which he had acquired in Samos had reached Sardis before Darius discovered his presence among the captives taken from Oroetes (Herod. iii. 129).

*i* The best known name amongst the pioneers of Greek medical science is Herodicus of Selymbria, "qui totam gymnasticam medicinam adjunxit;" for which he was censured by Hippocrates (*Biblioth. Script. Med.* s. v.). The alliance, however, of the *ιατρική* with the *γυμναστική* is familiar to us from the *Dialogues* of Plato.

stars and Egyptians, the method and maxims of that Father of phisic, who wrote against the theories and speculations of the so-called philosophical school, and was a true Empiricist before that sect was formularized. The Dogmatic school was founded after his time by his disciples, who departed from his eminently practical and inductive method. It recognized hidden causes of health and sickness arising from certain supposed principles or elements, out of which bodies were composed, and by virtue of which all their parts and members were attempored together and became sympathetic. He has some curious remarks on the sympathy of men with climate, seasons, etc. Hippocrates himself rejected supernatural accounts of disease, and especially demoniacal possession. He refers, but with no mystical sense, to numbers<sup>a</sup> as furnishing a rule for cases. It is remarkable that he extols the discernment of Orientals above Westerns, and of Asiatics above Europeans, in medical diagnosis.<sup>b</sup> The empirical school, which arose in the third century B. C., under the guidance of Acron of Agrigentum, Serapion of Alexandria, and Philinus of Cos,<sup>c</sup> waited for the symptoms of every case, disregarding the rules of practice based on dogmatic principles. Among its votaries was a Zacharias (perhaps Zacharias, and possibly a Jew) of Babylon, who (Pliny, *N. H.* xxxvii. 10, comp. xxxvi. 10) dedicated a book on medicine to Mithridates the Great; its views were also supported<sup>d</sup> by Herodotus of Tarsus, a place which, next to Alexandria, became distinguished for its schools of philosophy and medicine; as also by a Jew named Theodas, or Theudas,<sup>e</sup> of Laodicea, but a student of Alexandria, and the last, or nearly so, of the Empiricists whom its schools produced. The remarks of Theudas on the right method of observing, and the value of experience, and his book on medicine, now lost, in which he arranged his subject under the heads of *indicatoria*, *curatoria*, and *salubria*, earned him high reputation as a champion of Empiricism against the reproaches of the dogmatists, though they were subsequently impugned by Galen and Theodosius of Tripoli. His period was that from Titus to Hadrian. "The empiricists held that observation and the application of known remedies in one case to others presumed to be similar constitute the whole art of cultivating medicine. Though their views were narrow, and their information scanty when compared with some of the chiefs of the other sects, and although they rejected as useless and unattainable all knowledge of the causes and recondit nature of diseases, it is undeniable that, besides personal experience, they freely availed themselves

of historical detail, and of a strict analogy founded upon observation and the resemblance of phenomena" (Dr. Adams, *Paul. Aegin.* ed. Sydenham Soc.).

This school, however, was opposed by another, known as the Methodic, which had arisen under the leading of Themison, also of Laodicea, about the period of Pompey the Great. Asclepiades paved the way for the "method" in question, finding a theoretic basis in the corpuscular or atomic theory of physics which he borrowed from Heraclides of Pontus. He had passed some early years in Alexandria, and thence came to Rome shortly before Cicero's time (comp. *quo nos medico amiceque ususumus*, Crassus, ap. *Cic. de Orat.* i. 14). He was a transitional link between the Dogmatic and Empiric schools and this later or Methodic (Sprengel, *ub. sup.* pt. v. 16), which sought to rescue medicine from the bewildering mass of particulars in which empiricism had plunged it. He reduced diseases to two classes, chronic and acute, and endeavored likewise to simplify remedies. In the mean while the most judicious of medical theorists since Hippocrates, Celsus of the Augustan period, had reviewed medicine in the light which all these schools afforded, and not professing any distinct teaching, but borrowing from all, may be viewed as eclectic. He translated Hippocrates largely *verbatim*, quoting in a less degree Asclepiades and others. Antonius Musa, whose "cold-water cure," after its successful trial on Augustus himself, became generally popular, seems to have had little of scientific basis; but by the usual method, or the usual accidents, became merely the fashionable practitioner of his day in Rome.<sup>f</sup> Attalia, near Tarsus, furnished also, shortly after the period of Celsus, Athenæus, the leader of the last of the schools of medicine which divided the ancient world, under the name of the "Pneumatic," holding the tenet "of an ethereal principle (*πνεῦμα*) residing in the microcosm, by means of which the mind performed the functions of the body." This is also traceable in Hippocrates, and was an established opinion of the Stoics. It was exemplified in the innate heat, *θερμὴ ζῦμπος* (Aret. *de Caus. et Sign. Morb. Chron.* ii. 13), and the *calidum innatum* of modern physiologists, especially in the 17th century (Dr. Adams, *Pref. Aretæus*, ed. Syd. Soc.). It is clear that all these schools may easily have contributed to form the medical opinions current at the period of the N. T., that the two earlier among them may have influenced rabbinical teaching on that subject at a much earlier period, and that especially at the time of Alexander's visit to Jerusa-

<sup>a</sup> Thus the product of seven and forty gives the term of the days of gestation; in his *περὶ νόσων* δ, why men died. *ἐν τῇσι περισσότεραι τῶν ἡμερῶν*, is discussed; so the 4th, 8th, 11th, and 17th, are noted as the critical days in acute diseases.

<sup>b</sup> Sprengel, *ub. sup.* iv. 52-5, speaks of an Alexandrian school of medicine as having carried anatomy, especially under the guidance of Hierophilus, to its highest pitch of ancient perfection. It seems not, however, to have claimed any distinctive principles, but stands chronologically between the Dogmatic and Empiric schools.

<sup>c</sup> The former of these wrote against Hippocrates, the latter was a commentator on him (Sprengel, *ub. sup.* iv. 81).

<sup>d</sup> It treats of a stone called *hematite*, to which the author ascribes great virtues, especially as regards the eye.

<sup>e</sup> The authorities for these statements about Theudas are given by Wunderbar, *Biblich-Talmudische Medicin*, Ites Heft, p. 25. He refers among others to Talmud, *Tr. Nasir*, 52 b; to *Tosiphata Oholoth*, § 1 v.; and to *Tr. Sanhedrin*, 33 a, 93 d; *Echoroth*, 28 b.

<sup>f</sup> "Alia est Hippocratis secta (the Dogmatic), alia Asclepiadis, alia Themisonis" (Seneca, *Epist.* 95; comp. *Juv. Sat.* x. 221).

<sup>g</sup> For his remains see *Asclepiadis Bithynici Fragmenta*, ed. Christ. Gottl. Gumpert, 80. Vinar. 1794.

<sup>h</sup> Female medical aid appears to have been current at Rome, whether in midwifery only (the *obstetric*), or in general practice, as the titles *medica*, *ιατρική*, would seem to imply (see Martial, *Epig.* xi. 72). The Greeks were not strangers to female study of medicine; e. g. some fragments of the famous Aspasia on women's disorders are in Aëtius.

sem, the Jewish people, whom he favored and protected, had an opportunity of largely gathering from the medical lore of the West. It was necessary therefore to pass in brief review the growth of the latter, and especially to note the points at which it intersects the medical progress of the Jews. Greek Asiatic medicine culminated in Galen, who was, however, still but a commentator on his western predecessors, and who stands literally without rival, successor, or disciple of note, till the period when Greek learning was reawakened by the Arabian intellect. Galen himself<sup>a</sup> belongs to the period of the Antonines, but he appears to have been acquainted with the writings of Moses, and to have travelled in quest of medical experience over Egypt, Syria, and Palestine, as well as Greece, and a large part of the West, and, in particular, to have visited the banks of the Jordan in quest of opobalsamum, and the coasts of the Dead Sea to obtain samples of bitumen. He also mentions Palestine as producing a watery wine, suited for the drink of febrile patients.

II. Having thus described the external influences which, if any, were probably most influential in forming the medical practice of the Hebrews, we may trace next its internal growth. The cabalistic legends mix up the names of Shem and Heber in their fables about healing, and ascribe to those patriarchs a knowledge of simples and rare roots, with, of course, magic spells and occult powers, such as have clouded the history of medicine from the earliest times down to the 17th century.<sup>b</sup> So to Abraham is ascribed a talisman, the touch of which healed all disease. We know that such simple surgical skill as the operation for circumcision implies was Abraham's; but severer operations than this are constantly required in the flock and herd, and those who watch carefully the habits of animals can hardly fail to amass some guiding principles applicable to man and beast alike. Beyond this, there was probably nothing but such ordinary obstetrical craft as has always been traditional among the women of rude tribes, which could be classed as medical lore in the family of the patriarch, until his sojourn brought him among the more cultivated Philistines and Egyptians. The only notices which Scripture affords in connection with the subject are the cases of difficult midwifery in the successive households of Isaac,<sup>c</sup> Jacob, and Judah (Gen. xxv. 26, xxxv. 17, xxxviii. 27), and so, later, in that of Phinehas (1 Sam. iv. 19). The

traditional value ascribed to the mandrake, in regard to generative functions, relates to the same branch of natural medicine; but throughout this period occurs no trace of any attempt to study, digest, and systematize the subject. But, as Israel grew and multiplied in Egypt, they derived doubtless a large mental cultivation from their position until cruel policy turned it into bondage; even then Moses was rescued from the lot of his brethren, and became learned in all the wisdom of the Egyptians including, of course, medicine and cognate sciences (Clem. Alex. i. p. 413), and those attainments perhaps became suggestive of future laws. Some practical skill in metallurgy is evident from Ex. xxxi. 20. But, if we admit Egyptian learning as an ingredient, we should also notice how far advanced above it is the standard of the whole Jewish legislative fabric, in its exemption from the blemishes of sorcery and juggling pretenses. The priest, who had to pronounce on the cure, used no means to advance it, and the whole regulations prescribed exclude the notion of trafficking in popular superstition. We have no occult practices reserved in the hands of the sacred caste. It is God alone who doeth great things, working by the wand of Moses, or the brazen serpent; but the very mention of such instruments is such as to expel all pretense of mysterious virtues in the things themselves. Hence various allusions to God's "healing mercy," and the title "Jehovah that healeth" (Ex. xv. 26; Jer. xvii. 14, xxx. 17; Ps. ciii. 3, cxlvii. 3; Is. xxx. 26). Nor was the practice of physic a privilege of the Jewish priesthood. Any one might practice it, and this publicity must have kept it pure. Nay, there was no Scriptural bar to its practice by resident aliens. We read of "physicians," "healing," etc., in Ex. xxi. 19; 2 K. viii. 29; 2 Chr. xvi. 12; Jer. viii. 22. At the same time the greater leisure of the Levites and their other advantages would make them the students of the nation, as a rule, in all science, and their constant residence in cities would give them the opportunity, if carried out in fact, of a far wider field of observation. The reign of peace of Solomon's days must have opened, especially with renewed Egyptian intercourse, new facilities for the study. He himself seems to have included in his favorite natural history some knowledge of the medicinal uses of the creatures. His works show him conversant with the notion of remedial treatment (Prov. iii. 8, vi. 15, xii. 18, xvii. 22, xx. 30, xxix. 1; Eccl. iii. 3); and one passage

<sup>a</sup> The Arabs, however, continued to build wholly upon Hippocrates and Galen, save in so far as their advance in chemical science improved their pharmacopœia: this may be seen on reference to the works of Rhazes, A. D. 930, and Haly Abbas, A. D. 980. The first notion of smallpox is ascribed to Rhazes, who, however, quotes several earlier writers on the subject. Mohammed himself is said to have been versed in medicines and to have compiled some aphorisms upon it; and a herbalist literature was always extensively followed in the East from the days of Solomon downwards (Freund's *History of Medicine*, ii. 5, 27).

<sup>b</sup> See, in evidence of this, *Royal and Practical Chymistry*, in three treatises, London, 1670.

<sup>c</sup> Doubts have been raised as to the possibility of twins being born, one holding the other's heel; but there does not seem any such limit to the operations of nature as any objection on that score would imply. After all, it was perhaps only just such a relative position of the limbs of the infants at the mere moment

of birth as would suggest the "holding by the heel." The midwives, it seems, in case of twins, were called upon to distinguish the first-born, to whom important privileges appertained. The tying on a thread or ribbon was an easy way of preventing mistake, and the assistant in the case of Tamar seized the earliest possible moment for doing it. "When the hand or foot of a living child protrudes, it is to be pushed up . . . and the head made to present" (*Paul. Ægin.* ed. Sydenh. Soc. i. 648, Hippocr. quoted by Dr. Adams). This probably the midwife did; at the same time marking him as first-born in virtue of being thus "presented" first. The precise meaning of the doubtful expression in Gen. xxxviii. 27 and marg. is discussed by Wunderbar, *ub. sup.* p. 50, in reference both to the children and to the mother. Of Rachel a Jewish commentator says, "Multis etiam ex itinere difficultatibus prægressis, viribusque post diu protractos dolores exhaustis, atonia uteri, forsan quidem hæmorrhagia in pariendo mortua est." (*ibid.*)

[see p. 1867 f.] indicates considerable knowledge of anatomy. His repute in magic is the universal theme of eastern story. It has even been thought he had recourse to the shrine of Æsculapius at Sidon, and enriched his resources by its records or relics; but there seems some doubt whether this temple was of such high antiquity. Solomon, however, we cannot doubt, would have turned to the account, not only of wealth but of knowledge, his peaceful reign, wide dominion, and wider renown, and would have sought to traffic in learning, as well as in wheat and gold. To him the Talmudists ascribe a "volume of cures" (ספר רפואות), of which they make frequent mention (Fabricius, *Cod. Pseudep. V. T. i.* 1043 f.). Josephus (*Ant. vii.* 2) mentions his knowledge of medicine, and the use of spells by him to expel demons who cause sicknesses, "which is continued among us," he adds, "to this time." The dealings of various prophets with quasi-medical agency cannot be regarded as other than the mere accidental form which their miraculous gifts took (1 K. xiii. 6, xiv. 12, xvii. 17; 2 K. i. 4, xx. 7; Is. xxxviii. 21). Jewish tradition has invested Elisha, it would seem, with a function more largely medicinal than that of the other servants of God; but the Scriptural evidence on the point is scanty, save that he appears to have known at once the proper means to apply to heal the waters, and temper the noxious pottage (2 K. ii. 21, iv. 39-41). His healing the Shunammite's son has been discussed as a case of suspended animation, and of animal magnetism applied to resuscitate it; but the narrative clearly implies that the death was real. As regards the leprosy, had the Jordan commonly possessed the healing power which Naaman's faith and obedience found in it, would there have been "many lepers in Israel in the days of Eliseus the prophet," or in any other days? Further, if our Lord's words (Luke iv. 27) are to be taken literally, Elisha's reputation could not have been founded on any succession of lepers healed. The washing was a part of the enjoined lustration of the leper after his cure was complete; Naaman was to act as though clean, like the "ten men that were lepers," bidden to "go and show themselves to the priest" — in either case it was "as thou hast believed, so be it done unto thee."

<sup>a</sup> Josephus (*Ant. viii.* 2) mentions a cure of one possessed with a devil by the use of some root, the knowledge of which was referred by tradition to Solomon.

<sup>b</sup> Professor Newman remarks on the manner of Benhadad's recorded death, that "when a man is so near to death that this will kill him, we need good evidence to show that the story is not a vulgar scandal" (*Hebrew Monarchy*, p. 180, note). The remark seems to betray ignorance of what is meant by the crisis of a fever.

<sup>c</sup> Wunderbar, whom the writer has followed in a large portion of this general review of Jewish medicine, and to whom his obligations are great, has here set up a view which appears untenable. He regards the Babylonian Captivity as parallel in its effects to the Egyptian bondage, and seems to think that the people would return debased from its influence. On the contrary, those whom subjection had made ignoble and unpatriotic would remain. If any returned, it was a pledge that they were not so impaired; and, if not impaired, they would be certainly improved by the discipline they had undergone. He also thinks that sorcery had the largest share in any Babylonian or Persian system of medicine. This is assuming too

The sickness of Benhadad is certainly so described as to imply treachery on the part of Hazael (2 K. viii. 15). Yet the observation of Bruce, upon a "cold-water cure" practiced among the people near the Red Sea, has suggested a view somewhat different. The bed-clothes are soaked with cold water, and kept thoroughly wet, and the patient drinks cold water freely. But the crisis, it seems, occurs on the third day, and not till the fifth is it there usual to apply this treatment. If the chamberlain, through carelessness, ignorance, or treachery, precipitated the application, a fatal issue may have suddenly resulted. The "brazen serpent," once the means of healing, and worshipped idolatrously in Hezekiah's reign, is supposed to have acquired those honors under its Æsculapian aspect. This notion is not inconsistent with the Scripture narrative, though not therein traceable. It is supposed that something in the "volume of cures," current under the authority of Solomon, may have conduced to the establishment of these rites, and drawn away the popular homage, especially in prayers during sickness, or thanksgiving after recovery, from Jehovah. The statement that King Asa (2 Chr. xvi. 12) "sought not to Jehovah, but to the physicians," may seem to countenance the notion that a rivalry of actual worship, based on some medical fancies, had been set up, and would so far support the Talmudical tradition.

The Captivity at Babylon brought the Jews in contact with a new sphere of thought. Their chief men rose to the highest honors, and an improved mental culture among a large section of the captives was no doubt the result which they imported on their return.<sup>c</sup> We know too little of the precise state of medicine in Babylon, Susa, and the "cities of the Medes," to determine the direction in which the impulse so derived would have led the exiles; but the confluence of streams of thought from opposite sources, which impregnate each other, would surely produce a tendency to sift established practice and accepted axioms, to set up a new standard by which to try the current rules of art, and to determine new lines of inquiry for any eager spirits disposed to search for truth. Thus the visit of Democedes to the court of Darius, though it

much: there were magicians in Egypt, but physicians also (see above) of high cultivation. Human nature has so great an interest in human life, that only in the savage rudimentary societies is its economy left thus involved in phantasms. The earliest steps of civilization include something of medicine. Of course superstitions are found copiously involved in such medical tenets, but this is not equivalent to abandoning the study to a class of professed magicians. Thus in the *Ueberreste der altbabylonischen Literatur*, p. 123, by D. Chwolson, St. Petersburg. 1859 (the value of which is not however yet ascertained), a writer on poisons claims to have a magic antidote, but declines stating what it is, as it is not his business to mention such things, and he only does so in cases where the charm is in connection with medical treatment and resembles it; the magicians, adds the same writer on another occasion, use a particular means of cure, but he declines to impart it, having a repugnance to witchcraft. So (pp. 125, 126) we find traces of charms introduced into Babylonish treatises on medical science, but apologetically, and as if against sounder knowledge. Similarly, the opinion of fatalism is not without its influence on medicine; but it is chiefly resorted to where, as in pestilence often happens, all known aid seems useless.

seems to be an isolated fact, points to a general opening of oriental manners to Greek influence, which was not too late to leave its traces in some perhaps of the contemporaries of Ezra. That great reformer, with the leaders of national thought gathered about him, could not fail to recognize medicine among the salutary measures which distinguished his epoch. And whatever advantages the Levites had possessed in earlier days were now speedily lost even as regards the study of the divine Law, and much more therefore as regards that of medicine, into which competitors would crowd in proportion to its broader and more obvious human interest, and effectually demolish any narrowing barriers of established privilege, if such previously existed.

It may be observed that the priests in their ministrations, who performed at all seasons of the year barefoot on stone pavement, and without perhaps any variation of dress to meet that of temperature, were peculiarly liable to sickness.<sup>a</sup> Hence the permanent appointment of a Temple physician has been supposed by some, and a certain Ben-Ahijah is mentioned by Wunderbar as occurring in the Talmud in that capacity. But it rather appears as though such an officer's appointment were precarious, and varied with the demands of the ministrants.

The book of Ecclesiasticus shows the increased regard given to the distinct study of medicine, by the repeated mention of physicians, etc., which it contains, and which, as probably belonging to the period of the Ptolemies, it might be expected to show. The wisdom of prevention is recognized in Ecclus. xviii. 19, perhaps also in x. 10. Rank and honor are said to be the portion of the physician, and his office to be from the Lord (xxxviii. 1, 3, 12). The repeated allusions to sickness in vii. 35, xxx. 17, xxxi. 22, xxxvii. 30, xxxviii. 9, coupled with the former recognition of merit, have caused some to suppose that this author was himself a physician. If he was so, the power of mind and wide range of observation shown in his work would give a favorable impression of the standard of practitioners; if he was not, the great general popularity of the study and practice may be inferred from its thus becoming a common topic of general advice offered by a non-professional writer. In Wisd. xvi. 12, plaster is spoken of; anointing, as a means of healing, in Tob. vi. 8.

To bring down the subject to the period of the N. T. St. Luke,<sup>b</sup> "the beloved physician," who practiced at Antioch whilst the body was his care,

<sup>a</sup> Thus we find Kall, *De Morbis Sacerdotum*, II. fn. 1745, referred to by Wunderbar, *Istes Heft*, p. 60.

<sup>b</sup> This is not the place to introduce any discussion on the language of St. Luke; it may be observed, however, that it appears often tinged by his early studies: e. g. v. 18, *παρὰ λήμμερος*, the correct term, instead of the popular *παρὰ λημικός* of St. Matthew and St. Mark; so viii. 44, *ἔστη ἡ ῥύσις*, instead of the apparently Hebraistic phrase *ἐξήρανθη ἡ πύλη* of the latter; so vi. 19, *ἴατο πάντας*, where *διεσώθησαν* and *εἰσώθησαν* are used by the others; and viii. 55, *ἐπέσραψε τὸ πνεῦμα* (the breath?), as though a token of animation returning; and the list might easily be enlarged. St. Luke abounds in the narratives of demoniacs, while Hippocrates repudiates such influence, as producing maniacal and epileptic disorders. See this subject discussed in the Notes on the "Sacred Diseases" in the Sydenh. Soc. ed. of Hippocr. *Areteus*, on the contrary, recognizes the opinion of

could hardly have failed to be conversant with all the leading opinions current down to his own time. Situated between the great schools of Alexandria and Cilicia, within easy sea-transit of both, as well as of the western homes of science, Antioch enjoyed a more central position than any great city of the ancient world, and in it accordingly all the streams of contemporary medical learning may have probably found a point of confluence. The medicine of the N. T. is not solely, nor even chiefly, Jewish medicine; and even if it were, it is clear that the more mankind became mixed by intercourse, the more medical opinion and practice must have ceased to be exclusive. The great number of Jews resident in Rome and Greece about the Christian era, and the successive decrees by which their banishment from the former was proclaimed, must have imported, even into Palestine, whatever from the West was best worth knowing; and we may be as sure that its medicine and surgery expanded under these influences, as that, in the writings of the Talmudists, such obligations would be unacknowledged. But, beyond this, the growth of large mercantile communities such as existed in Rome, Alexandria, Antioch, and Ephesus, of itself involves a peculiar sanitary condition, from the mass of human elements gathered to a focus under new or abnormal circumstances. Nor are the words in which an eloquent modern writer describes the course of this action less applicable to the case of an ancient than to that of a modern metropolis. "Diseases once indigenous to a section of humanity are slowly but surely creeping up to commercial centres from whence they will be rapidly propagated. One form of Asiatic leprosy is approaching the Levant from Arabia. The history of every disease which is communicated from man to man establishes this melancholy truth, that ultimately such maladies overlap all obstacles of climate, and demonstrate a solidarity in evil as well as in good among the brotherhood of nations." <sup>c</sup> In proportion as this "melancholy truth" is perceived, would an inter-communication of medical science prevail also.

The medicine and surgery of St. Luke, then, was probably not inferior to that commonly in demand among educated Asiatic Greeks, and must have been, as regards its basis, Greek medicine, and not Jewish. Hence a standard Gentile medical writer, if any is to be found of that period, would best represent the profession to which the Evangelist belonged. Without absolute certainty as to date,<sup>d</sup> we seem to have such a writer in Aretæus, commonly called "the Cappadocian,"

demoniac agency in disease. His words are: *ἰερὴν κικλήσκουσι τὴν πάθησιν ἀτὰρ καὶ δι' ἄλλας προφασίας, ἢ μέγεθος τοῦ κακοῦ, ἰερὸν γὰρ τὸ μέγα ἢ ἴσιος οὐκ ἀνθρώπινης ἀλλὰ θεϊκῆς ἢ δαίμονος δόξης ἐς τὸν ἄνθρωπον εἰσοῦδο, ἢ ξυμπάντων ἑαυτοῦ, τῆνδε ἐκίλησκον ἰερὴν. Περὶ ἐπιληψίας. (De Caus. et Sign. Morb. Chron. l. 4.)* [See Wetstein's note on Matt. iv. 24.]

<sup>c</sup> Dr. Ferguson, *Pref. Essay to Gooch on Diseases of Women*, New Sydenham Society, London, 1859, p. xvi. He adds, "Such has been the case with small-pox, measles, scarlatina, and the plague. . . The yellow fever has lately ravaged Lisbon under a temperature perfectly similar to that of London or Paris."

<sup>d</sup> The date here given is favored by the introductory review of Aretæus's life and writings prefixed to Boerhaave's edition of his works, and by Dr. Greenhill in Smith's *Dictionary of Biog. and Myth. sub voc. Aretæus*. A view that he was about a century later — a contemporary, in short, of Galen — is ad

who wrote certainly after Nero's reign began, and probably flourished shortly before and after the decade in which St. Paul reached Rome and Jerusalem fell. If he were of St. Luke's age, it is striking that he should also be perhaps the only ancient medical authority in favor of demonical possession as a possible account of epilepsy (see p. 1860, note b). If his country be rightly indicated by his surname, we know that it gave him the means of intercourse with both the Jews and the Christians of the Apostolic period (Acts ii. 9; 1 Pet. i. 1). It is very likely that Tarsus, the nearest place of academic repute to that region, was the scene of at any rate the earlier studies of Aretæus, nor would any chronological difficulty prevent his having been a pupil in medicine there when Paul and also, perhaps, Barnabas were, as is probable, pursuing their early studies in other subjects at the same spot. Aretæus, then, assuming the date above indicated, may be taken as expounding the medical practice of the Asiatic Greeks in the latter half of the first century. There is, however, much of strongly marked individuality in his work, more especially in the minute verbal portraiture of disease. That of pulmonary consumption in particular is traced with the careful description of an eye-witness, and represents with a curious exactness the curved nails, shrunken fingers, slender sharpened nostrils, hollow glazy eye, cadaverous look and hue, the waste of muscle and startling prominence of bones, the scapula standing off like the wing of a bird: as also the habit of body marking youthful predisposition to the malady, the thin veneer-like frames, the limbs like pinions,<sup>a</sup> the prominent throat and shallow chest, with a remark that moist and cold climates are the haunts of it (Aret. *περὶ φθίσεως*). His work exhibits strong traits here and there of the Pneumatic school, as in his statement regarding lethargy, that it is frigidly implanted by nature; concerning elephantiasis even more emphatically, that it is a refrigeration of the innate heat, "or rather a congelation — as it were one great winter of the system."<sup>b</sup> The same views betray themselves in his statement regarding the blood, that it is the warming principle of all the parts; that diabetes is a sort of dropsy, both exhibiting the watery principle; and that the effect of white hellebore is as that of fire: "so that whatever fire does by burning, hellebore effects still more by penetrating inwardly." The last remark shows that he gave some scope to his imagination, which indeed we might illustrate from some of his pathological descriptions, *e. g.* that of elephantiasis, where the resemblance of the beast to the afflicted human being is wrought to a fanciful parallel. Allowing for such overstrained touches here and there, we may say that he generally avoids extravagant crotchets, and rests chiefly on wide observation, and on the common sense which sobers theory and rationalizes facts. He hardly ever quotes an authority; and though much of what he states was taught before it is dealt with as the common property of

science, or as become *sui juris* through being proved by his own experience. The freedom with which he follows or rejects earlier opinions, has occasioned him to be classed by some amongst the eclectic school. His work is divided into — I. the causes and signs of (1) acute, and (2) chronic diseases; and II. the curative treatment of (1) acute, and (2) chronic diseases. His boldness of treatment is exemplified in his selection of the vein to be opened in a wide range of parts, the arm, ankle, tongue, nose, etc. He first has a distinct mention of leeches, which Themison is said to have introduced; and in this respect his surgical resources appear to be in advance of Celsus. He was familiar with the operation for the stone in the bladder, and prescribes, as Celsus also does, the use of the catheter, where its insertion is not prevented by inflammation, then the incision <sup>c</sup> into the neck of the bladder, nearly as in modern lithotomy. His views of the internal economy were a strange mixture of truth and error, and the disuse of anatomy was no doubt the reason why this was the weak point of his teaching. He held that the work of producing the blood pertained to the liver, "which is the root of the veins;" that the bile was distributed from the gall bladder to the intestines; and, if this vesica became gorged, the bile was thrown back into the veins, and by them diffused over the system. He regarded the nerves as the source of sensation and motion; and had some notion of them as branching in pairs from the spine.<sup>d</sup> Thus he has a curious statement as regards paralysis, that in the case of any sensational point below the head, *e. g.* from the membrane of the spinal marrow being affected injuriously, the parts on the right side will be paralyzed if the nerve toward the right side be hurt, and similarly, conversely, of the left side; but that if the head itself be so affected, the inverse law of consequence holds concerning the parts related, since each nerve passes over to the other side from that of its origin, decussating each other in the form of the letter X. The doctrine of the *Pneuma*, or ethereal principle existing in the microcosm by which the mind performs all the functions of the body, holds a more prominent position in the works of Aretæus than in those of any of the other authorities (Dr. Adams' pref. to Aret. pp. x., xi.). He was aware that the nervous function of sensation was distinct from the motive power; that either might cease and the other continue. His pharmacopœia is copious and reasonable, and the limits of the usefulness of this or that drug are laid down judiciously. He makes large use of wine,<sup>e</sup> and prescribing the kind and the number of *cythi* to be taken; and some words of his on stomach disorders (*περὶ καρδιαλγίης*) forcibly recall those of St. Paul to Timothy (1 Tim. v. 23), and one might almost suppose them to have been suggested by the intenser spirituality of his Jewish or Christian patients. "Such disorders," he says, "are common to those who toil in teaching, whose yearning is after divine instruction, who de-

vanced in the Syd. Soc. edition, and ably supported. Till the evidence, being purely negative, is slender, and the opposite arguments are not taken into account.

<sup>a</sup> *Ἱππερυγίδες.*  
<sup>b</sup> *Ψύξις ἐστὶ τοῦ ἐμφύτου θερμοῦ οὐ μικρὰ τε, ἢ καὶ ἀγός, ὡς ἐν τῷ μέγα χεῖμα (De Claus. et Sign. Morb. Ætios. ii. 13).*

<sup>c</sup> *Τάμνειν τὴν τρήδα καὶ τὸν τῆς κύστιδος τράχηλον.*

<sup>d</sup> Sprengel (*ib. sup.* iv. 52-5) thinks that an approximately right conception of the nervous system was attained by Hierophilus of the Alexandrian school of medicine.

<sup>e</sup> Galen (*Hyg.* v.) strenuously recommends the use of wine to the aged, stating the wines best adapted to them. Even Plato (*Leg.* ii.) allows old men thus to restore their youth, and correct the austerity of *αἴμα*

prise delicate and varied diet, whose nourishment is fasting, and whose drink is water." And as a purge of melancholy he prescribes "a little wine, and some other more liberal sustenance." In his essay on *Kausus*, or "brain" fever, he describes the powers acquired by the soul before dissolution in the following remarkable words: "Every sense is pure, the intellect acute, the gnostic powers prophetic; for they prognosticate to themselves in the first place their own departure from life; then they foretell what will afterwards take place to those present, who fancy sometimes that they are delirious: but these persons wonder at the result of what has been said. Others, also, talk to certain of the dead, perchance they alone perceiving them to be present, in virtue of their acute and pure sense, or perchance from their soul seeing beforehand, and announcing the men with whom they are about to associate. For formerly they were immersed in humors, as if in mud and darkness; but when the disease has drained these off, and taken away the mist from their eyes, they perceive those things which are in the air, and through the soul being unencumbered become true prophets." <sup>b</sup> To those who wish further to pursue the study of medicine at this era, the edition of Aretæus by the Sydenham Society, and in a less degree that by Boerhaave (Lugd. Bat. 1735), to which the references have here been made, may be recommended.

As the general science of medicine and surgery of this period may be represented by Aretæus, so we have nearly a representation of its *Materia Medica* by Dioscorides. He too was of the same general region — a Cilician Greek, — and his first lessons were probably learnt at Tarsus. His period is tinged by the same uncertainty as that of Aretæus; but he has usually been assigned to the end of the 1st or beginning of the 2d century (see *Dict. of Biog. and Mythol.* s. v.). He was the first author of high rank who devoted his attention to *Materia Medica*. Indeed, this branch of ancient science remained as he left it till the times of the Arabians; and these, though they enlarged the supply of drugs and pharmacy, yet copy and repeat Dioscorides, as indeed Galen himself often does, on all common subject-matter. Above 90 minerals, 700 plants, and 168 animal substances, are said to be described in the researches of Dioscorides, displaying an industry and skill which has remained the marvel of all subsequent commentators. Pliny, copious, rare, and curious as he is, yet for want of scientific medical knowledge, is little esteemed in this particular branch, save when he follows Dios-

corides. The third volume of *Paulus Aegin.* (ed. Sydenham Soc.) contains a catalogue of medicines simple and compound, and the large proportion in which the authority of Dioscorides has contributed to form it, will be manifest at the most cursory inspection. To abridge such a subject is impossible, and to transcribe it in the most meagre form would be far beyond the limits of this article.

Before proceeding to the examination of diseases in detail, it may be well to observe that the question of identity between any ancient malady known by description, and any modern one known by experience, is often doubtful. Some diseases, just as some plants and some animals, will exist almost anywhere; others can only be produced within narrow limits depending on the conditions of climate, habit, etc.; and were only equal observation applied to the two, the *habitat* of a disease might be mapped as accurately as that of a plant. It is also possible that some diseases once extensively prevalent, may run their course and die out, or occur only casually; just as it seems certain that, since the Middle Ages, some maladies have been introduced into Europe which were previously unknown (*Biblioth. Script. Med. Genev.* 1731, s. v.; Hippocrates, Celsus, Galen; Leclerc's *History of Med. Par.* 1723, transl. Lond. 1699; Freind's *History of Med.*).

Eruptive diseases of the acute kind are more prevalent in the East than in colder climates. They also run their course more rapidly; e. g. common itch, which in Scotland remains for a longer time vesicular, becomes, in Syria, pustular as early sometimes as the third day. The origin of it is now supposed to be an acarus, but the parasite perishes when removed from the skin. Disease of various kinds is commonly regarded as a divine infliction, or denounced as a penalty for transgression; "the evil diseases of Egypt" (perhaps in reference to some of the ten plagues) are especially so characterized (Gen. x. 18; Ex. xv. 26; Lev. xxvi. 16; Deut. vii. 15, xxviii. 60; 1 Cor. xi. 30); so the emerods (see EMERODS) of the Philistines (1 Sam. v. 6); the severe dysentery <sup>d</sup> (2 Chr. xxi. 15, 19) of Jehoram, which was also epidemic [BLOOD, ISSUE OF; and FEVER]; the peculiar symptom of which may perhaps have been *prolapsus ani* (Dr. Mason Good, i. 311–13, mentions a case of the entire colon exposed); or, perhaps, what is known as *diarrhæa tubularis*, formed by the coagulation of fibrine into a membrane discharged from the inner coat of the intestines, which takes the mould of the bowel, and is thus expelled (Kitto, s. v. "Diseases"); so the

<sup>a</sup> So Sir H. Hallford renders it, Essay VI., in which occur some valuable comments on the subject treated by Aretæus.

<sup>b</sup> Aret. de *Sign. et Caus. Morb. Acut.* li. 4.

<sup>c</sup> To the authorities there adduced may be added some remarks by Michel Lévy (*Traité d'Hygiène*, 206–7), who ascribes them to a plethoric state producing a congestion of the veins of the rectum, and followed by piles. Blood is discharged from them periodically or continuously; thus the plethora is relieved, and hence the ancient opinion that hemorrhoids were beneficial. Sanguineous flux of the part may, however, arise from other causes than these *varices* — a. g. ulceration, cancer, etc., of rectum. Wunderbar (*Bib. Talm. Med.* iii. 17 *d*) mentions a bloodless kind, distinguished by the Talmudists as even more dangerous, and these he supposes meant in 1 Sam. v. To

these is added (vi. 5, 11, 18) a mention of עֲבָרִים

(A. V. "mice"); but according to Lichtenstein (in Eichhorn's *Biblioth.* vi. 407–66) a venomous *solpuga* is with some plausibility intended, so large, and so similar in form to a mouse, as to admit of its being denominated by the same word. It is said to destroy and live upon scorpions, and to attack in the parts alluded to. The reference given is Pliny, *H. N.* xxix. 4; but Pliny gives merely the name, "solpuga:" the rest of the statement finds no foundation in him. See below, p. 1897. Wunderbar (3tes *Hef.*, p. 19) has another interpretation of the "mice."

<sup>d</sup> See a singular quotation from the Talmud (*Sabbath*, 82), concerning the effect of tenesmus on the sphincter, Wunderbar, *Bib. Tal. Med.* 3tes *Hef.*, p. 17. The Talmudists say that those who die of such sickness as Jehoram's die painfully, but with full consciousness.

udden deaths of Er, Onan (Gen. xxxviii. 7, 10), the Egyptian first-born (Ex. xi. 4, 5), Nabal, Bathsheba's son, and Jeroboam's (1 Sam. xxv. 38; 2 Sam. xii. 15; 1 K. xiv. 1, 5), are ascribed to action of Jehovah immediately, or through a prophet. Pestilence (Hab. iii. 5) attends his path (comp. 2 Sam. xxiv. 15), and is innocuous to those whom He shelters (Ps. xci. 3-10). It is by Jeremiah, Ezekiel, and Amos associated (as historically in 2 Sam. xxiv. 13) with "the sword" and "famine" (Jer. xiv. 12, xv. 2, xxi. 7, 9, xxiv. 10, xxvii. 8, 13, xxviii. 8, xxix. 17, 18, xxxii. 24, 36, xxxiv. 17, xxxviii. 2, xlii. 17, 22, xlv. 13; Ez. v. 12, 17, vi. 11, 12, vii. 15, xii. 16, xiv. 21, xxxiii. 27; Am. iv. 6, 10). The sicknesses of the widow's son of Zarephath, of Ahaziah, Benhadad, the leprosy of Uzziah, the boil of Hezekiah, are also noticed as diseases sent by Jehovah, or in which He interposed, 1 K. xvii. 17, 20; 2 K. i. 4, xx. 1. In 2 Sam. iii. 29, disease is invoked as a curse, and in Solomon's prayer, 1 K. viii. 37 (comp. 2 Chr. xx. 9), anticipated as a chastisement. Job and his friends agree in ascribing his disease to divine infliction; but the latter urge his sins as the cause. So, conversely, the healing character of God is invoked or promised, Ps. vi. 2, xli. 3, ciii. 3; Jer. xxx. 17. Satanic agency appears also as procuring disease, Job ii. 7; Luke xiii. 11, 16. Diseases are also mentioned as ordinary calamities, e. g. the sickness of old age, headache (perhaps by sunstroke), as that of the Shunammite's son, that of Elisha, and that of Benhadad, and that of Joram, Gen. xlviii. 1; 1 Sam. xxx. 13; 2 K. iv. 20, viii. 7, 29, xiii. 14; 2 Chr. xxii. 6.

Among special diseases named in the O. Test. is ophthalmia (Gen. xxix. 17, מַכְבַּלְלוֹת עֵינַיִם), which is perhaps more common in Syria and Egypt than anywhere else in the world; especially in the fig season,<sup>a</sup> the juice of the newly-ripe fruit having the power of giving it. It may occasion partial or total blindness (2 K. vi. 18). The eye-salve (καλλύριον, Rev. iii. 18; Hor. Sat. i.) was a remedy common to Orientals, Greeks, and Romans (see Hippocr. καλλυριον; Celsus, vi. 8, *de ocolorum morbis*, (2) *de diversis collyriis*). Other diseases are — barrenness of women, which mandrakes were

supposed to have the power of correcting (Gen. xx. 18; comp. xii. 17, xxx. 1, 2, 14-16) — "consumption,"<sup>b</sup> and several, the names of which are derived from various words, signifying to burn or to be hot (Lev. xxvi. 16; Deut. xxviii. 22; see FEVER); compare the kinds of fever distinguished by Hippocrates as *καϊσος* and *πῦρ*. The "burning boil," or "of a boil" (Lev. xiii. 23, בִּשְׂרָפָה הַבֹּרֶה, LXX. οὐλή τοῦ ἔλκουσ), is again merely marked by the notion of an effect resembling that of fire, like the Greek *φλεγμονή*, or our "carbuncle;" it may possibly find an equivalent in the Damascus boil of the present time. The "botch (בִּשְׂרָפָה) of Egypt" (Deut. xxviii. 27) is so vague a term as to yield a most uncertain sense; the plague, as known by its attendant *bubo*, has been suggested by Scheuchzer.<sup>c</sup> It is possible that the *Elephantiasis Græcorum* may be intended by בִּשְׂרָפָה, understood in the widest sense of a continued ulceration until the whole body, or the portion affected, may be regarded as one בִּשְׂרָפָה. Of this disease some further notice will be taken below; at present it is observable that the same word is used to express the "boil" of Hezekiah. This was certainly a single locally confined eruption, and was probably a carbuncle, one of which may well be fatal, though a single "boil" in our sense of the word seldom is so. Dr. Mead supposes it to have been a fever terminating in an abscess. The diseases rendered "scab"<sup>d</sup> and "scurvy" in Lev. xxi. 20, xxii. 22, Deut. xxviii. 27, may be almost any skin disease, such as those known under the names of lepra, psoriasis, pityriasis, ichthyosis, favus, or common itch. Some of these may be said to approach the type of leprosy [LEPROSY] as laid down in Scripture, although they do not appear to have involved ceremonial defilement, but only a blemish disqualifying for the priestly office. The quality of being incurable is added as a special curse, for these diseases are not generally so, or at any rate are common in milder forms. The "running of the reins" (Lev. xv. 2, 3, xxii. 4, marg.) may perhaps mean *gonorrhœa*.<sup>e</sup> If we compare Num. xxv. 1, xxxi. 7 with Josh. xxii. 17, there is ground for thinking

<sup>a</sup> Comp Hippocr. *περὶ ὄψιου*. α. ὀφθαλμίας τῆς ἐπειταίου καὶ ἐνδημίου ξυμφέρει καθαριστὶ κεφαλῆς καὶ τῆς κάτω κοιλίης.

<sup>b</sup> Possibly the pulmonary tuberculation of the West, which is not unknown in Syria, and common enough in Smyrna and in Egypt. The word בִּשְׂרָפָה is from a root meaning "to waste away." In Zech. xiv. 12 a plague is described answering to this meaning — an intense emaciation or atrophy; although no link of causation is hinted at, such sometimes results from severe internal abscesses.

<sup>c</sup> It should be noted that Hippocrates, in his *Epidemics*, makes mention of fevers attended with buboes, which affords presumption in favor of plague being not unknown. It is at any rate as old as the 1st century, A. D. See Littré's *Hippocrates*, tom. ii. p. 585, and iii. p. 5. The plague is referred to by writers of the 1st century, namely, Poseidonius and Rufus.

<sup>d</sup> Their terms in the respective versions are: —

בִּשְׂרָפָה	ψώρα ἀγρία,	scabies jugis.
בִּשְׂרָפָה	λευχρή,	impetigo.

<sup>e</sup> Or more probably *blennorrhœa* (mucous discharge).

The existence of *gonorrhœa* in early times — save in the mild form — has been much disputed. Michel Lévy (*Traité d'Hygiène*, p. 7) considers the affirmative as established by the above passage, and says of syphilis, "Que pour notre part, nous n'avons jamais pu considérer comme une nouveauté du xv. e siècle." He certainly gives some strong historical evidence against the view that it was introduced into France by Spanish troops under Gonzalvo de Cordova on their return from the New World, and so into the rest of Europe, where it was known as the *morbus Gallicus*. He adds, "La syphilis est perdue confusément dans la pathologie ancienne par la diversité de ses symptômes et de ses altérations; leur interprétation collective, et leur redaction en une seule unité morbide, a fait croire à l'introduction d'une maladie nouvelle." See also Freund's *History of Med.*, Dr. Mead, Michaelis, Reinhart (*Bibelkrankheiten*), Schmidt (*Biblischer Med.*), and others. Wunderbar (*Bib.-Talm. Med.* iii. 20, commenting on Lev. xv., and comparing Mishna, *Zabim*, ii. 2, and Maimon. *ad loc.*) thinks that *gonorrhœa benigna* was in the mind of the latter writers. Dr. Adams, the editor of *Paul. Ægin.* (Sydenh. Soc. ii. 14), considers syphilis a modified form of elephantiasis. For all ancient notices of the cognate diseases see that work, i. 693 foll.

that some disease of this class, derived from polluting sexual intercourse, remained among the people. The "issue" of Lev. xv. 19, may be [BLOOD, ISSUET OR] the *menorrhagia*, the duration of which in the East is sometimes, when not checked by remedies, for an indefinite period (Matt. ix. 20), or uterine hemorrhage from other causes. In Deut. xxviii. 35, is mentioned a disease attacking the "knees and legs," consisting in a "sore botch which cannot be healed," but extended, in the sequel of the verse, from the "sole of the foot to the top of the head." The latter part of the quotation would certainly accord with *Elephantiasis Græcorum*; but this, if the whole verse be a mere continuation of one described malady, would be in contradiction to the fact that this disease commences in the face, not in the lower members. On the other hand, a disease which affects the knees and legs, or more commonly one of them only — its principal feature being intumescence, distorting and altering all the proportions — is by a mere accident of language known as *Elephantiasis Arabum*, *Bucnemia Tropica* (Rayer, vol. iii. 820-841), or "Barbadoes leg," from being well known in that island. Supposing, however, that the affection of the knees and legs is something distinct, and that the latter part of the description applies to the *Elephantiasis Græcorum*,<sup>b</sup> the incurable and the all-pervading character of the malady are well expressed by it. This disease is what now passes under the name of "leprosy" (Michaelis, iii. 259) — the lepers, *e. g.*, of the huts near the Zion gate of modern Jerusalem are elephantiasiacs.<sup>c</sup> It has been asserted that there are two kinds, one painful, the other painless; but as regards Syria and the East this is contradicted. There the parts affected are quite benumbed and lose sensation. It is classed as a tubercular disease, not confined to the skin, but pervading the tissues and destroying the bones. It is not confined to any age or either sex. It first appears in general, but not always, about the face, as an indurated nodule (hence it is improperly called tubercular), which gradually enlarges, inflames, and ulcerates. Sometimes it commences in the neck or arms. The ulcers will heal spontaneously, but only after a long period, and after destroying a great deal of the neighboring parts. If a joint be attacked, the ulceration will go on till its destruction is complete, the joints of finger, toe, etc., dropping off one by one. Frightful dreams and fetid breath are symptoms mentioned by some pathologists. More nodules will develop them-

<sup>a</sup> The Arabs call *Elephantiasis Græcorum* جذام.

(*judhām*) = mutilation, from the gradual dropping off of the joints of the extremities. They give to *E. Arabum* the name of داء الفيل, *Di-ul-fil-morbus elephas*, from the leg when swelled resembling that of the animal; but the latter disease is quite distinct from the former.

<sup>b</sup> For its ancient description see Celsus, lili. 25, de *Elephantiasis*. Galen (*de Arte Curatoriā ad G'aucon*, lib. ii. de *Cancro et Eleph.*) recommends viper's flesh, gives anecdotes of cases, and adds that the disorder was common in Alexandria. In Hippocr. (*Prorrhetic. li. ap. fin.*) is mentioned ἡ νόσος ἢ φθινική καλεομένη, but in the glossary of Galen is found, ἢ Φοινικὴ νόσος, κατὰ Φοινικῶν καὶ κατὰ τὰ ἀνατολικὰ μέρη πλεονάζουσα. Δηλοῦσθαι δὲ κἀνατὰθα δοκεὶ ἢ ἐλεφαντίαςις.

<sup>c</sup> Schilling de *Lepra, Animadv. in Oussellum ad xix.* says, "persuasum habeo lepram ad elephantiasin non differre nisi gradu; ad § xxiii. he illustrates Num.

selves; and, if the face be the chief seat of the disease, it assumes a leonine<sup>d</sup> aspect, loathsome and hideous; the skin becomes thick, rugose, and livid; the eyes are fierce and staring, and the hair generally falls off from all the parts affected. When the throat is attacked the voice shares the affection, and sinks to a hoarse, husky whisper. These two symptoms are eminently characteristic. The patient will become bed-ridden, and, though a mass of bodily corruption, seem happy and contented with his sad condition, until sinking exhausted under the ravages of the disease, he is generally carried off, at least in Syria, by diarrhoea. It is hereditary, and may be inoculated, but does not propagate itself by the closest contact; *e. g.* two women in the aforesaid leper-huts remained uncontaminated though their husbands were both affected, and yet the children born to them were, like the fathers, elephantiasiac, and became so in early life. On the children of diseased parents a watch for the appearance of the malady is kept; but no one is afraid of infection, and the neighbors mix freely with them, though, like the lepers of the O. T., they live "in a several house." It became first prevalent in Europe during the crusades, and by their means was diffused, and the ambiguity of designating it leprosy then originated, and has been generally since retained. Pliny (*Nat. Hist. xxvi. 5*) asserts that it was unknown in Italy till the time of Pompey the Great, when it was imported from Egypt, but soon became extinct (*Paul. Ægin. ed. Sydenh. Soc. ii. 6*). It is, however, broadly distinguished from the λέπρα, λέκη, etc. of the Greeks by name and symptoms, no less than by Roman medical and even popular writers; comp. Lucretius, whose mention of it is the earliest —

"Est elephas morbus, qui propter flumina Nilii,  
Gignitur Ægypto in mediā, neque præterea usquam."

It is nearly extinct in Europe, save in Spain and Norway. A case was seen lately in the Crimea, but may have been produced elsewhere. It prevails in Turkey and the Greek Archipelago. One case, however, indigenous in England, is recorded amongst the medical fac-similes at Guy's Hospital. In Granada it was generally fatal after eight or ten years, whatever the treatment.

This favors the correspondence of this disease with one of those evil diseases of Egypt, possibly its "botch," threatened Deut. xxviii. 27, 35. This "botch," however, seems more probably to mean the foul ulcer mentioned by Aretæus (*de Sign. et Caus. Morb. Acut. i. 9*), and called by him ἔφθα

xii. 12, by his own experience, in dissecting a woman dead in childbed, as follows: "Corrupti fetus dimidia pars in utero adhuc hærebat. Aperto utero tam immanis spargebatur fetor, ut non solum omnes adstantes aufugerent," etc. He thinks that the point of Moses' simile is the ill odor, which he ascribes to lepers, *i. e.* elephantiasiacs.

<sup>d</sup> Hence called also *Leontiasis*. Many have attributed to these wretched creatures a *libido inextinguibilis* (see *Proceedings of Med. and Chirurg. Soc. of London*, Jan. 1860, iii. 164, from which some of the above remarks are taken). This is denied by Dr. Robert Sim (from a close study of the disease in Jerusalem), save in so far as idleness and inactivity, with animal want supplied, may conduce to it.

<sup>e</sup> Jahn (*Heb. Ant.* Upham's translation, p. 206 denies this.

<sup>f</sup> The editor of *Paul. Ægin.* (Sydenham Society, 1854) is convinced that the syphilis of modern times is modified form of the elephantiasis

ἢ ἐσάρη. He ascribes its frequency in Egypt to the mixed vegetable diet there followed, and to the use of the turbid water of the Nile, but adds that it is common in Coelo-Syria. The Talmud speaks of the Elephantiasis (*Baba Kama*, 80 b.) as being "moist without and dry within" (Wunderbar, *Biblich-Talmudische Med.* 3tes Heft, 10, 11). Advanced cases are said to have a cancerous aspect, and some even class it as a form of cancer, a disease dependent on faults of nutrition. It has been asserted that this, which is perhaps the most dreadful disease of the East, was Job's malady. Origen, *Hexapla* on Job ii. 7, mentions, that one of the Greek versions gives it, *loc. cit.*, as the affliction which befell him. Wunderbar (*ut sup.* p. 10) supposes it to have been the Tyrian leprosy, resting chiefly on the itching<sup>b</sup> implied, as he supposes, by Job ii. 7, 8. Schmidt (*Biblicher Med.* iv. 4) thinks the "sore boil" may indicate some graver disease, or concurrence of diseases. But there is no need to go beyond the statement of Scripture, which speaks not only of this "boil," but of "skin loathsome and broken," "covered with worms and clods of dust;" the second symptom is the result of the first, and the "worms" are probably the larvæ of some fly, known so to infest and make its nidus in any wound or sore exposed to the air, and to increase rapidly in size. The "clods of dust" would of course follow from his "sitting in ashes." The "breath strange to his wife," if it be not a figurative expression for her estrangement from him, may imply a fetor, which in such a state of body hardly requires explanation. The expression my "bowels boiled" (xxx. 27) may refer to the burning sensation in the stomach and bowels, caused by acrid bile, which is common in ague. Aretæus (*de Cur. Morb. Acut.* ii. 3) has a similar expression, *θερμασίη τῶν σπλάγχων ὄν ἀπὸ πυρός*, as attending syncope.

The "scaring dreams" and "terrifying visions" are perhaps a mere symptom<sup>d</sup> of the state of mind bewildered by unaccountable afflictions. The intense emaciation was (xxxiii. 21) perhaps the mere result of protracted sickness.

The disease of king Antiochus (2 Macc. ix. 5-10, &c.) is that of a boil breaching worms (*ulcus verminosum*). So Sulla, Pherecydes, and Aleman the poet, are mentioned (Plut. *vita Sulle*) as similar cases. The examples of both the Herods (Jos. *Ant.* xvii. 6, § 5, *B. J.* i. 33, § 5) may also be adduced, as that of Pheretime (Herod. iv. 205). There is some doubt whether this disease be not allied to phthiriasis, in which lice are bred, and cause ulcers. This condition may originate either in a sore, or in

a morbid habit of body brought on by uncleanness, suppressed perspiration, or neglect; but the vermination, if it did not commence in a sore, would produce one. Dr. Mason Good (iv. 504-6), speaking of *μάλις, μαλιασμός* = cutaneous vermination, mentions a case in the Westminster Infirmary, and an opinion that universal phthiriasis was no unrequent disease among the ancients; he also states (p. 500) that in gangrenous ulcers, especially in warm climates, innumerable grubs or maggots will appear almost every morning. The camel, and other creatures, are known to be the habitat of similar parasites. There are also cases of vermination without any wound or faulty outward state, such as the *Vena Medinensis*, known in Africa as the Guinea-worm,<sup>e</sup> of which Galen had heard only, breeding under the skin and needing to be drawn out carefully by a needle, lest it break, when great soreness and suppuration succeed (Freind, *Hist. of Med.* i. 49; De Mandelso's *Travels*, p. 4; and *Paul. Ægin.* t. iv. Sydenh. Soc. ed.).

In Deut. xxviii. 65, it is possible that a palpitation of the heart is intended to be spoken of (comp Gen. xlv. 26). In Mark ix. 17 (compare Luke ix. 38) we have an apparent case of epilepsy, shown especially in the foaming, falling, wallowing, and similar violent symptoms mentioned; this might easily be a form of demoniacal manifestation. The case of extreme hunger re-recorded 1 Sam. xiv. was merely the result of exhaustive fatigue; but it is remarkable that the Bulimia of which Xenophon speaks (*Anab.* iv. 5, 7) was remedied by an application in which "honey" (comp. 1 Sam. xiv. 27) was the chief ingredient.

Besides the common injuries of wounding, bruising, striking out eye, tooth, etc., we have in Ex. xxi. 22, the case of miscarriage produced by a blow, push, etc., damaging the fetus.

The plague of "boils and blains" is not said to have been fatal to man, as the murrain preceding was to cattle; this alone would seem to contradict the notion of Shapter (*Medic. Sacra.* p. 113), that the disorder in question was smallpox, which, wherever it has appeared, until mitigated by vaccination, has been fatal to a great part, perhaps a majority of those seized. The smallpox also generally takes some days to pronounce and mature, which seems opposed to the Mosaic account. The expression of Ex. ix. 10, a "boil" <sup>σ</sup> flourishing, or ebullient with blains, may perhaps be a disease analogous to phlegmonous erysipelas, or even common erysipelas, which is often accompanied by vesications such as the word "blains" might fitly describe.<sup>h</sup>

a Such is the opinion of Dr. R. Sim, expressed in a private letter to the writer. But see a letter of his to *Med. Times and Gazette*, April 14, 1860.

b The suppuration, etc., of ulcers, appears at least equally likely to be intended.

c He refers to Hippocr. *Lib. de Med.* tom. viii. *αἰζῶνον ἐστὶ νοσημάτων.*

d Hippocrates mentions, ii. 514, ed. Kühn, Lips. 1826, as a symptom of fever, that the patient *φοβέται ἀπὸ ἐνυπνίων.* See also i. 592, *περὶ ἱερῆς νόσου. . . Σείματα νυκτὸς καὶ φόβοι.*

e Bayer, vol. iii. 808-819, gives a list of parasites, most of them in the skin. This "Guinea-worm," it appears, is also found in Arabia Petraea, on the coasts of the Caspian and Persian Gulf, on the Ganges, in Upper Egypt and Abyssinia (*ib.* 814). Dr. Mead refers Herod's disease to *ἐντοζῶνα*, or intestinal worms. Shapter, without due foundation, objects that the

word in that case should have been not *σκάληξ*, but *εὐλή* (*Medica Sacra*, p. 188).

f It has been much debated whether the smallpox be an ancient disease. On the whole, perhaps, the arguments in favor of its not being such predominate, chiefly on account of the strongly marked character of the symptoms, which makes the negative argument of unusual weight.

g פְּרַחַת אֲבִצְעוֹת וְצִחְוִן.

h This is Dr. Robert Sim's opinion. On comparing, however, the means used to produce the disorder (Ex. ix. 8), an analogy is perceptible to what is called "bricklayer's Itch," and therefore to leprosy. [Leprosy.] A disease involving a white spot breaking forth from a boil related to leprosy, and clean or unclean according to symptoms specified, occurs under the general *locus* of leprosy (Lev. xiii. 18-23).

The "withered hand" of Jeroboam (1 K. xiii. 4-6), and of the man Matt. xii. 10-13 (comp. Luke vi. 10), is such an effect as is known to follow from the obliteration of the main artery of any member, or from paralysis of the principal nerve, either through disease or through injury. A case with a symptom exactly parallel to that of Jeroboam is mentioned in the life of Gabriel, an Arab physician. It was that of a woman whose hand had become rigid in the act of swinging,<sup>a</sup> and remained in the extended posture. The most remarkable feature in the case, as related, is the remedy, which consisted in alarm acting on the nerves, inducing a sudden and spontaneous effort to use the limb—an effort which, like that of the dumb son of Croesus (Herod. i. 85), was paradoxically successful. The case of the widow's son restored by Elisha (2 K. iv. 19) was probably one of sunstroke.

The disease of Asa "in his feet" (Schmidt, *Biblischer Med.* iii. 5, § 2), which attacked him in his old age (1 K. xv. 23; 2 Chr. xvi. 12) and became exceeding great, may have been either *œdema*, swelling, or *podagra*, gout. The former is common in aged persons, in whom, owing to the difficulty of the return upwards of the sluggish blood, its watery part stays in the feet. The latter, though rare in the East at present, is mentioned by the Talmudists (*Sotah*, 10 a, and *Sanhedrin*, 48 b), and there is no reason why it may not have been known in Asa's time. It occurs in Hippoc. *Aphor.* vi., *Prognost.* 15; Celsus, iv. 24; Aretæus, *Morb. Chron.* ii. 12, and other ancient writers.<sup>b</sup>

In 1 Macc. vi. 8, occurs a mention of "sickness of grief;" in Eccles. xxxvii. 30, of sickness caused by excess, which require only a passing mention. The disease of Nebuchadnezzar has been viewed by Jahn as a mental and purely subjective malady. It is not easy to see how this satisfies the plain emphatic statement of Dan. iv. 33, which seems to include, it is true, mental derangement, but to assert a degraded bodily state<sup>c</sup> to some extent, and a corresponding change of habits. We may regard it as Mead (*Med. Sacr.* vii.), following Burton's *Anatomy of Melancholy*, does, as a species of the melancholy known as Lycanthropia<sup>d</sup> (*Pulus Ægin.* iii. 16; *Acicenna*, iii. 1, 5, 22). Persons so affected wander like wolves in sepulchres by night, and imitate the howling of a wolf or a dog. Further, there are well-attested accounts of wild or half-wild human creatures, of either sex, who have lived as beasts, losing human consciousness, and acquiring a superhuman ferocity, activity, and swiftness. Either the lycanthropic patients or these latter may furnish a partial analogy to Nebuchadnezzar, in regard to the various points of modified outward appearance and habits ascribed to him. Nor would

<sup>a</sup> "Inter jactandum se funibus . . . remansit illa (manus) extensa, ita ut retrahere ipsam nequiret (Freind's *Hist. Med.* ii. Append. p. 2).

<sup>b</sup> Seneca mentions it (*Epist.* 95) as an extreme note of the female depravity current in his own time, that even the female sex was become liable to gout.

<sup>c</sup> The "eagles' feathers" and "birds' claws" are probably used only in illustration, not necessarily as describing a new type to which the hair, etc., approximated. Comp. the simile of Ps. ciii. 5, and that of 2 K. v. 12.

<sup>d</sup> Comp. Virg. *Bucol.* viii. 97:—

"Sæpe lupum fieri et se condere silvis."

<sup>e</sup> The Targ. of Jonathan renders the Heb. נִשְׁבָּרִים, 1 Sam. x. 10, by "he was mad or insane" (Jahn, *Upham's* transl. 212-13).

it seem impossible that a sustained lycanthropia might produce this latter condition.

Here should be noticed the mental malady of Saul.<sup>e</sup> His melancholy seems to have had its origin in his sin; it was therefore grounded in his moral nature, but extended its effects, as commonly, to the intellectual. The "evil spirit from God," whatever it meant, was no part of the medical features of his case, and may therefore be excluded from the present notice. Music, which soothed him for a while, has entered largely into the milder modern treatment of lunacy.

The palsy meets us in the N. T. only, and in features too familiar to need special remark. The words "grievously tormented" (Matt. viii. 6) have been commented on by Baier (*de Paral.* 32), to the effect that examples of acutely painful paralysis are not wanting in modern pathology, e. g. when paralysis is complicated with neuralgia. But if this statement be viewed with doubt, we might understand the Greek expression (*βασανίζόμενος*) as used of paralysis agitans, or even of chorea<sup>f</sup> (St. Vitus' dance), in both of which the patient, being never still for a moment save when asleep, might well be so described. The woman's case who was "bowed together" by "a spirit of infirmity," may probably have been paralytic (Luke xiii. 11). If the dorsal muscles were affected, those of the chest and abdomen, from want of resistance, would undergo contraction, and thus cause the patient to suffer as described.

Gangrene (*γάγγραινα*, Celsus, vii. 33, *de gangræna*), or mortification in its various forms, is a totally different disorder from the "canker" of the A. V. in 2 Tim. ii. 17. Both gangrene and cancer were common in all the countries familiar to the Scriptural writers, and neither differs from the modern disease of the same name (Dr. M. Good, ii. 669, &c., and 579, &c.).

In Is. xxvi. 18; Ps. vii. 14, there seems an allusion to false conception, in which, though attended by pains of quasi-labor and other ordinary symptoms, the womb has been found unimpregnated, and no delivery has followed. The medical term (Dr. M. Good, iv. 188) *εμπευμάτωσις*, *mola ven-tosa*, suggests the Scriptural language, "we have as it were brought forth wind;" the whole passage is figurative for disappointment after great effort.<sup>g</sup>

Poison, as a means of destroying life, hardly occurs in the Bible, save as applied to arrows (Job vi. 4). In Zech. xii. 2, the marg. gives "poison" as an alternative rendering, which does not seem preferable; intoxication being probably meant. In the annals of the Hebrews poisons occur as the resource of stealthy murder.<sup>h</sup>

<sup>f</sup> Jahn (Upham's transl. 232) suggests that cramp, twisting the limb round as if in torture, may have been intended. This suits *βασανίζόμενος*, no doubt, but not *παράλυτικός*.

<sup>g</sup> For an account of the complaint, see *Paul Ægin.*, ed. Syd. Soc. i. p. 632.

<sup>h</sup> In Chwolson's *Ueberreste d. Altbab. Literatur*, I. 129, Ibn Wáhschijjah's treatise on poisons contains references to several older writings by authors of other nations on that subject. His commentator, Jârbûqâ, treats of the existence and effects of poisons and antidotes, and in an independent work of his own thus classifies the subject: (1) of poisons which kill at sight (wenn sie man nur ansieht); (2) of those which kill through sound (Schall oder Laut); (3) of those which kill by smelling; (4) of those which kill by reaching the interior of the body; (5) of those which

The bite or sting of venomous beasts can hardly be treated as a disease; but in connection with the fiery (*i. e.* venomous) serpents" of Num. xxi. 6, and the deliverance from death of those bitten, it deserves a notice. Even the Talmud acknowledges that the healing power lay not in the brazen serpent itself, but "as soon as they feared the Most High, and uplifted their hearts to their Heavenly Father, they were healed, and in default of this were brought to nought." Thus the brazen figure was symbolical only; or, according to the lovers of purely natural explanation, was the stage-trick to cover a false miracle. It was customary to consecrate the image of the affliction, either in its cause or in its effect, as in the golden emerods, golden urine, of 1 Sam. vi. 4, 8, and in the ex-votos common in Egypt even before the exodus; and these may be compared with this setting up of the brazen serpent. Thus we have in it only an instance of the current custom, fanciful or superstitious, being sublimed to a higher purpose.

The bite of a white she-mule, perhaps in the rutting season, is according to the Talmudists fatal; and they also mention that of a mad dog, with certain symptoms by which to discern his state (Wunderbar, *ut sup.* 21). The scorpion and centipede are natives of the Levant (Rev. ix. 5, 10), and, with a large variety of serpents, swarm there. To these, according to Lichtenstein, should be added a venomous solpuga,<sup>a</sup> or large spider, similar to the Calabrian Tarantula; but the passage in Pliny<sup>b</sup> adduced (*H. N.* xxix. 29), gives no satisfactory ground for the theory based upon it, that its bite was the cause of the emerods.<sup>c</sup> It is, however, remarkable that Pliny mentions with some fullness, a *mus araneus* — not a spider resembling a mouse, but a mouse resembling a spider — the shrew-mouse, and called *araneus*, Isidorus<sup>d</sup> says from this resemblance, or from its eating spiders. Its bite was venomous, caused mortification of the part, and a spreading ulcer attended with inward gripping pains, and when crushed on the wound was its own best antidote.<sup>e</sup>

The disease of old age has acquired a place in Biblical nosology chiefly owing to the elegant allegory into which "The Preacher" throws the successive tokens of the ravage of time on man (*Ecl.* xii.). The symptoms enumerated have each their significance for the physician, for, though his art can do little to arrest them, they yet mark an

altered condition calling for a treatment of its own. "The Preacher" divides the sum of human existence into that period which involves every mode of growth, and that which involves every mode of decline. The first reaches from the point of birth or even of generation, onwards to the attainment of the "grand climacteric," and the second from that epoch backwards through a corresponding period of decline till the point of dissolution is reached.<sup>f</sup> This latter course is marked in metaphor by the darkening of the great lights of nature, and the ensuing season of life is compared to the broken weather of the wet season, setting in when summer is gone, when after every shower fresh clouds are in the sky, as contrasted with the showers of other seasons, which pass away into clearness. Such he means are the ailments and troubles of declining age, as compared with those of advancing life. The "keepers of the house" are perhaps the ribs which support the frame, or the arms and shoulders which enwrap and protect it. Their "trembling," especially that of the arms, etc., is a sure sign of vigor past. The "strong men" are its supporters, the lower limbs "bowing themselves" under the weight they once so lightly bore. The "grinding" hardly needs to be explained of the teeth now become "few." The "lookers from the windows" are the pupils of the eyes, now "darkened," as Isaac's were, and Eli's; and Moses, though spared the dimness, was yet in that very exemption a marvel (*Gen.* xxvii., comp. *xlvi.* 10; *1 Sam.* iv. 15; *Deut.* xxxiv. 7). The "doors shut" represent the dullness of those other senses which are the portals of knowledge; thus the taste and smell, as in the case of Barzillai, become impaired, and the ears stopped against sound. The "rising up at the voice of a bird" portrays the light, soon-fleeting, easily-broken slumber of the aged man; or possibly, and more literally, actual waking in the early morning, when first the cock crows, may be intended. The "daughters of music brought low," suggest the

— "Big manly voice  
Now turn'd again to childish treble;"

and also, as illustrated again by Barzillai, the failure in the discernment and the utterance of musical notes. The fears of old age are next noticed: "They shall be afraid of *that which is high*;"<sup>g</sup> an

kill by contact, with special mention of the poisoning of garments.

<sup>a</sup> Comp. Lucan, *Pharsalia*, ix. 837-8: "Quis calcare tuas timeat solpuga latebras," etc.

<sup>b</sup> His words are: "Est et formicarum genus venenatum, non fere in Italiâ: solpuga Cicero appellat."

<sup>c</sup> He says that the solpuga causes such swellings on the parts of the female camel, and that they are called by the same word in Arabic as the Heb. עֲפָלִים, which simply means "swellings." He supposes the men might have been "versetzt bei der Befriedigung natürlicher Bedürfnisse." He seems not to have given due weight to the expression of 1 Sam. vi. 5, "mice which mar the land," which seems to distinguish the "land" from the people in a way fatal to the ingenious notion he supports. For the multiplication of these and similar creatures to an extraordinary and fatal degree, comp. Varro, *Fragsm. ap. fin.* "M Varro auctor est, a cuniculis suffossum in Hispaniâ oppidum, talpis in Thessaliâ, ab ranis civitatem in Galliâ pulcram, ab locustis in Africâ, ex Gyaro Cycladum insulâ *meoias a muribus fugatos.*"

<sup>d</sup> His words are: "Mus araneus cujus morsu aranea

moritur est in Sardinia animal perexiguum aranea formâ quæ solifuga dicitur, eo quod diem fugat" (*Orig.* xii. 3).

<sup>e</sup> As regards the scorpion, this belief and practice still prevails in Palestine. Pliny says (*H. N.* xxix. 27), after prescribing the ashes of a ram's hoof, young of a weasel, etc., "si jumenta morderit mus (*i. e.* araneus) recens cum sale imponitur, aut fel respersit ionis ex aceto. Et ipse mus araneus contra se remediis est divulsus et impositus," etc. In cold climates, it seems, the venom of the shrew-mouse is not perceptible.

<sup>f</sup> These are respectively called the עֲלֵי הַיָּמִים

and the יְמֵי הַעֲמִידָה of the Rabbins (Wunderbar 2tes Heft). The same idea appears in Soph. *Trachin.*

<sup>g</sup> Or, even more simply, these words may be understood as meaning that old men have neither vigor nor breath for going up hills, mountains, or anything else that is "high;" nay, for them the plain, even road has its terrors — they walk timidly and cautiously even along that.

obscure expression, perhaps, for what are popularly called "nervous" terrors, exaggerating and magnifying every object of alarm, and "making," as the saying is, "mountains of molehills." "Fear in the way"<sup>a</sup> is at first less obvious; but we observe that nothing unmoves and agitates an old person more than the prospect of a long journey. Thus regarded, it becomes a fine and subtle touch in the description of decrepitude. All readiness to haste is arrested, and a numb despondency succeeds. The "flourishing" of "the almond-tree" is still more obscure; but we observe this tree in Palestine blossoming when others show no sign of vegetation, and when it is dead winter all around — no ill type, perhaps, of the old man who has survived his own contemporaries and many of his juniors.<sup>b</sup> Youthful lusts die out, and their organs, of which "the grasshopper"<sup>c</sup> is perhaps a figure, are relaxed. The "silver cord" may be that of nervous sensation,<sup>d</sup> or motion, or even the spinal marrow itself. Perhaps some incapacity of retention may be signified by the "golden bowl broken;" the "pitcher broken at the well" suggests some vital supply stopping at the usual source — derangement perhaps of the digestion or of the respiration; the "wheel shivered at the cistern," conveys, through the image of the water-lifting process familiar in irrigation, the notion of the blood, pumped, as it were, through the vessels, and fertilizing the whole system; for "the blood is the life."

This careful register of the tokens of decline might lead us to expect great care for the preservation of health and strength; and this indeed is found to mark the Mosaic system, in the regulations concerning diet,<sup>e</sup> the "divers washings," and the pollution imputed to a corpse — nay, even in circumcision itself. These served not only the ceremonial purpose of imparting self-consciousness to the Hebrew, and keeping him distinct from alien admixture, but had a sanitary aspect of rare wisdom, when we regard the country, the climate, and the age. The laws of diet had the effect of tempering by a just admixture of the organic substances of the animal and vegetable kingdoms the regimen of Hebrew families, and thus providing for the vigor of future ages, as well as checking the stimulus which the predominant use of animal food gives to the passions. To these effects may be ascribed the immunity often enjoyed by the Hebrew race,<sup>f</sup> amidst epidemics devastating the countries of their sojourn. The best and often the sole possible exercise of medicine is to prevent disease. Moses could not legislate for cure, but his rules did for the great mass of the people what no therapeutics however consummate could do, — they gave the best security for the public health by provisions incor-

porated in the public economy. Whether we regard the laws which secluded the leper, as designed to prevent infection or repress the dread of it, their wisdom is nearly equal, for of all terrors the imaginary are the most terrible. The laws restricting marriage have in general a similar tendency, degeneracy being the penalty of a departure from those which forbid commixture of near kin. Michel Lévy remarks on the salubrious tendency of the law of marital separation (Lev. xv.) imposed (Lévy, *Traité d'Hygiène*, p. 8). The precept also concerning purity on the necessary occasions in a desert encampment (Deut. xxiii. 12-14), enjoining the return of the elements of productiveness to the soil, would probably become the basis of the municipal regulations having for their object a similar purity in towns. The consequences of its neglect in such encampments is shown by an example quoted by Michel Lévy, as mentioned by M. de Lamartine (*ib.* 8, 9). Length of life was regarded as a mark of divine favor, and the divine legislator had pointed out the means of ordinarily insuring a fuller measure of it to the people at large than could, according to physical laws, otherwise be hoped for. Perhaps the extraordinary means taken to prolong vitality may be referred to this source (1 K. i. 2), and there is no reason why the case of David should be deemed a singular one. We may also compare the apparent influence of vital warmth enhanced to a miraculous degree, but having, perhaps, a physical law as its basis, in the cases of Elijah, Elisha, and the sons of the widow of Zarephath, and the Shunammite. Wunderbar<sup>g</sup> has collected several examples of such influence similarly exerted, which however he seems to exaggerate to an absurd pitch. Yet it would seem not against analogy to suppose, that, as pernicious exhalations, miasmata, etc., may pass from the sick and affect the healthy, so there should be a reciprocal action in favor of health. The climate of Palestine afforded a great range of temperature within a narrow compass, — *e. g.* a long sea-coast, a long deep valley (that of the Jordan), a broad flat plain (Esdrælon), a large portion of table-land (Judah and Ephraim), and the higher elevations of Carmel, Tabor, the lesser and greater Hermon, etc. Thus it partakes of nearly all supportable climates.<sup>h</sup> In October its rainy season begins with moist westerly winds. In November the trees are bare. In December snow and ice are often found, but never lie long, and only during the north wind's prevalence. The cold disappears at the end of February, and the "latter rain" sets in, lasting through March to the middle of April, when thunder-storms are common, torrents swell, and the heat rises in the low grounds. At the end of April the hot season begins, but preserves moderation till

<sup>a</sup> Compare also perhaps the dictum of the slothful man, Prov. xxii. 13, "There is a lion in the way."

<sup>b</sup> In the same strain Juvenal (Sat. x. 243-5) says:

"Hæc data pœna diu viventibus, ut renovatâ  
Semper clade domus, multis in luctibus inque  
Perpetuo marore et nigrâ veste senescant."

<sup>c</sup> Dr. Mead (*Med. Sacr.* vii.) thinks that the scrotum, swollen by a rupture, is perhaps meant to be typified by the shape of the grasshopper. He renders the Hebrew יִסְתַּבֵּל הַחֲרָבִיל after the LXX. ἐναγύθη τὸ ἀκρίς, Vulg. *impinguabitur locusta*. Comp. *id.* *Odes*, ii. xl. 7, 8.

<sup>d</sup> We find hints of the nerves proceeding in pairs from the brain, both in the Talmudical writers and in *Aretæus*. See below in the text.

<sup>e</sup> Michel Lévy quotes Hallé as acknowledging the salutary character of the prohibition to eat pork, which he says is "sujet à une altération du tissu graisseux très analogue à la dégénérescence lépreuse."

<sup>f</sup> This was said of the Jews in London during the cholera attack of 1849.

<sup>g</sup> *Biblisches-Talmud. Med.* 2tes Heft, I. D. pp. 15-17. He speaks of the result ensuing from shaking hands with one's friends, etc.

<sup>h</sup> The possession of an abundance of salt tended to banish much disease (Ps. lx. (title); 2 Sam. viii. 13; 1 Chr. xviii. 12). Salt-pits (Zeph. ii. 9) are still dug by the Arabs on the shore of the Dead Sea. For the use of salt to a new-born infant, Ez. xvi. 4, comp. *Gales de Sanit.* lib. i. cap. 7.

June, thence till September becomes extreme; and during all this period rain seldom occurs, but often heavy dews prevail. In September it commences to be cool, first at night, and sometimes the rain begins to fall at the end of it. The migration with the season from an inland to a sea-coast position, from low to high ground, etc., was a point of social development never systematically reached during the Scriptural history of Palestine. But men inhabiting the same regions for centuries could hardly fail to notice the connection between the air and moisture of a place and human health, and those favored by circumstances would certainly turn their knowledge to account. The Talmudists speak of the north wind as preservative of life, and the south and east winds as exhaustive, but the south as the most insupportable of all, coming hot and dry from the deserts, producing abortion, tainting the babe yet unborn, and corroding the pearls in the sea. Further, they dissuade from performing circumcision or venesection during its prevalence (*Jebamoth*, 72 a, *op.* Wunderbar, 2tes Heft, ii. A.). It is stated that "the marriage-bed placed between north and south will be blessed with male issue" (*Berachoth*, 14, *ib.*), which may, Wunderbar thinks, be interpreted of the temperature when moderate, and in neither extreme (which these winds respectively represent), as most favoring fecundity. If the fact be so, it is more probably related to the phenomena of magnetism, in connection with which the same theory has been lately revived. A number of precepts are given by the same authorities in reference to health, *e. g.* eating slowly, not contracting a sedentary habit, regularity in natural operations, cheerfulness of temperament, due sleep (especially early morning sleep is recommended), but not somnolence by day (Wunderbar, *ut sup.*).

The rite of circumcision, besides its special surgical operation, deserves some notice in connection with the general question of the health, longevity, and fecundity of the race with whose history it is identified. Besides being a mark of the covenant and a symbol of purity, it was perhaps also a protest against the phallus-worship, which has a remote antiquity in the corruption of mankind, and of which we have some trace in the Egyptian myth of Osiris. It has been asserted also (Wunderbar, 3tes Heft, p. 25), that it distinctly contributed to increase the fruitfulness of the race, and to check inordinate desires in the individual. Its beneficial effects in such a climate as that of Egypt and Syria, as tending to promote cleanliness, to prevent or reduce irritation, and thereby to stop the way against various disorders, have been the subject of comment to various writers on hygiene.<sup>a</sup> In particular a troublesome and sometimes fatal kind of boil (*phy-*

*mosis* and *paraphymosis*) is mentioned as occurring commonly in those regions, but only to the uncircumcised. It is stated by Josephus (*Cont. Ap. ii.* 13) that Apion, against whom he wrote, having at first derided circumcision, was circumcised of necessity by reason of such a boil, of which, after suffering great pain, he died. Philo also appears to speak of the same benefit when he speaks of the "anthrax" infesting those who retain the foreskin. Medical authorities have also stated that the capacity of imbibing syphilitic virus is less, and that this has been proved experimentally by comparing Jewish with other, *e. g.* Christian populations (Wunderbar, 3tes Heft, p. 27). The operation itself<sup>b</sup> consisted of originally a mere<sup>c</sup> incision; to which a further stripping<sup>d</sup> off the skin from the part, and a custom of sucking<sup>e</sup> the skin from the wound was in a later period added, owing to the attempts of Jews of the Maccabean period, and later (1 Macc. i. 15; Joseph. *Ant.* xii. 5, § 1: comp. 1 Cor. vii. 18) to cultivate heathen practices. [CIRCUMCISION.] The reduction of the remaining portion of the *preputium* after the more simple operation, so as to cover what it had exposed, known as *epispasmus*, accomplished by the elasticity of the skin itself, was what this anti-Judaic practice sought to effect, and what the later, more complicated and severe, operation frustrated. To these were subjoined the use of the warm-bath, before and after the operation, pounded cummin as a styptic, and a mixture of wine and oil to heal the wound. It is remarkable that the tightly swathed rollers which formed the first covering of the newborn child (Luke ii. 7) are still retained among modern Jews at the circumcision of a child, effectually preventing any movement of the body or limbs (Wunderbar, *op.* p. 29). No surgical operation beyond this finds a place in Holy Scripture, unless indeed that adverted to under the article Eunuch. [EUNUCH.] The Talmudists speak of two operations to assist birth, one known as קריעה

הרובין (*gastrotomia*), and intended to assist parturition, not necessarily fatal to the mother; the other known as קריעת הבטן (*hysterotomia, sectio cesarea*), which was seldom practiced save in the case of death in the crisis of labor, or if attempted on the living, was either fatal, or at least destructive of the powers of maternity. An operation is also mentioned by the same authorities having for its object the extraction piecemeal of an otherwise inextricable fœtus (*ibid.* pp. 53, &c.). Wunderbar enumerates from the Mishna and Talmud fifty-six surgical instruments or pieces of apparatus; of these, however, the following only are at all alluded to in Scripture.<sup>f</sup> A cutting in

<sup>a</sup> See some remarks in Michel Lévy, *Traité d'Hygiène*, Paris, 1850: "Rien de plus rebutant que cette sorte de malpropreté, rien de plus favorable au développement des accidents syphilitiques." Circumcision is said to be also practiced among the natives of Madagascar, "qui ne paraissent avoir aucune notion du judaïsme ni du Mahométisme" (p. 11, note).

<sup>b</sup> There is a good modern account of circumcision in the *Dublin Medical Press*, May 19, 1858, by Dr. Joseph Hirschfeld (from *Oestereich. Zeitschrift*).

<sup>c</sup> Known as the קרוך, a word meaning "cut

<sup>d</sup> Called פריע, from פריע, "to expose."

<sup>e</sup> Called Meziza, from מצץ, "to suck." This counteracted a tendency to inflammation.

<sup>f</sup> This writer gives a full account of the entire process as now in practice, with illustrations from the Turkish mode of operating, gathered, it seems, from a fragment of a rare work on the healing art by an anonymous Turkish author of the 16th century, in the public library at Leipsic. The Persians, Tartars, etc., have furnished him with further illustrations.

<sup>g</sup> Yet it by no means follows that the rest were not known in Scriptural times, "it being a well-known fact in the history of inventions that many useful discoveries have long been kept as family secrets." Thus an obstetrical forceps was found in a house excavated at Pompeii, though the Greeks and Romans, so far as their medical works show, were unacquainted with the instrument (*Paul. Æg.* i. 662, ed. Sydenham Soc.)

strument, called צור, supposed a "sharp stone" (Ex. iv. 25). Such was probably the Ethiopian stone<sup>a</sup> mentioned by Herodotus (ii. 86), and Pliny speaks of what he calls *Testa samia*, as a similar implement. Zipporah seems to have caught up the first instrument which came to hand in her apprehension for the life of her husband. The "knife" (מאכלה) of Josh. v. 2 was probably a more refined instrument for the same purpose. An "awl" (מרצע) is mentioned (Ex. xxi. 6) as used to bore through the ear of the bondman who refused release, and is supposed to have been a surgical instrument.

A seat of delivery called in Scripture זבנים, Ex. i. 16, by the Talmudists משבר (comp. 2 K. ix. 3), "the stools;" but some have doubted whether the word used by Moses does not mean rather the uterus itself as that which moulds and shapes the infant. Delivery upon a seat or stool is, however, a common practice in France at this day, and also in Palestine.

The "roller to bind" of Ez. xxx. 21 was for a broken limb, as still used. Similar bands wound with the most precise accuracy involve the mummies.

A scraper (זרס), for which the "potsherd" of Job was a substitute (Job ii. 8).

Ex. xxx. 23-5 is a prescription in form. It may be worth while also to enumerate the leading substances which, according to Wunderbar, composed the pharmacopœia of the Talmudists—a much more limited one—which will afford some insight into the distance which separates them from the leaders of Greek medicine. Besides such ordinary appliances as water, wine (Luke x. 34), beer, vinegar, honey, and milk, various oils are found; as opobalsamum<sup>b</sup> ("balm of Gilead"), the oil of olive,<sup>c</sup> myrrh, rose, palma christi, walnut, sesamum, colocynth, and fish; figs (2 K. xx. 7), dates, apples (Cant. ii. 5), pomegranates, pistachio-nuts,<sup>d</sup> and almonds (a produce of Syria, but not of Egypt, Gen. xliii. 11); wheat, barley, and various other grains; garlic, leeks, onions, and some other common herbs; mustard, pepper, coriander seed, ginger, preparations of beet, fish, etc., steeped in wine or vinegar; whey, eggs, salt, wax, and suet (in plasters), gall of fish<sup>e</sup> (Tob. vi. 8, xi. 11), ashes, cowdung, etc.; fasting-saliva,<sup>f</sup> urine, bat's blood, and the various rarer herbs, etc.: *ammeisition*, *menta gentilis*, saffron, mandragora, *Lawsonia spinosa* (Arab. *alhenna*), juniper, broom, poppy, acacia, pine, lavender or rosemary, clover-root, jujub, hyssop, fern, *sampsuchum*, milk-thistle, laurel, *Eruca*

<sup>a</sup> In Jer. xviii. 3 the same word appears, rendered "wheels" in the A. V.; margin, "frames or seats;" that which gives shape to the work of the potter.

<sup>b</sup> See Tacit. *Hist.* v. 7, and Orelli's note *ad loc.*

<sup>c</sup> Tacitus, *ibid.* v. 6.

<sup>d</sup> Commended by Pliny as a specific for the bite of a serpent (Plin. *H. N.* xxiii. 78).

<sup>e</sup> Rhazes speaks of a fish named *sabot*, the gall of which healed inflamed eyes (ix. 27); and Pliny says, "Callionymi fel cleatrices sanat et carnes oculorum supervacuas consumit" (*N. H.* xxxii. 24).

<sup>f</sup> Comp. Mark viii. 23, John. ix. 6; also the mention by Tacitus (*Hist.* iv. 81) of a request made of *Verpasian* at Alexandria. Galen (*De Simpl. Facult.*

*maralis*, absynth, jasmine, narcissus, madder, curled mint, fennel, endive, oil of cotton, myrtle, myrrh, aloe, sweet cane (*Acorus calamus*), cinnamon, *canella alba*, cassia, *ladanum*, *galbanum*, frankincense, *storax*, nard, gum of various trees, musk, *blatta byzantina*; and these minerals—bitumen, natrum, borax, alum, clay, *actites*, quicksilver litharge, yellow arsenic. The following preparations were also well known: *Theriaca*, an antidote prepared from serpents; various medicinal drinks, e. g. from the fruit-bearing rosemary; decoction of wine with vegetables; mixture of wine, honey, and pepper; of oil, wine, and water; of asparagus and other roots steeped in wine; emetics, purging draughts, soporifics, potions to produce abortion or fruitfulness; and various salves, some used cosmetically,<sup>h</sup> e. g. to remove hair; some for wounds, and other injuries.<sup>i</sup> The forms of medicaments were cataplasm, electuary, liniment, plaister (Is. i. 6; Jer. viii. 22, xlv. 11, li. 8; Joseph. *B. J.* i. 33, § 5), powder, infusion, decoction, essence, syrup, mixture.

An occasional trace occurs of some chemical knowledge, e. g. the calcination of the gold by Moses; the effect of "vinegar upon nitre"<sup>k</sup> (Ex. xxxii. 20; Prov. xxv. 20; comp. Jer. ii. 22); the mention of "the apothecary" (Ex. xxx. 35; Eccl. x. 1), and of the merchant in "powders" (Cant. iii. 6), shows that a distinct and important branch of trade was set up in these wares, in which, as at a modern druggist's, articles of luxury, etc., are combined with the remedies of sickness; see further, Wunderbar, *Istes Heft*, pp. 73, *ad fin.* Among the most favorite of external remedies has always been the bath. As a preventive of numerous disorders its virtues were known to the Egyptians, and the scrupulous levitical bathings prescribed by Moses would merely enjoin the continuance of a practice familiar to the Jews, from the example especially of the priests in that country. Besides the significance of moral purity which it carried, the use of the bath checked the tendency to become unclean by violent perspirations from within and effluvia from without; it kept the porous system in play, and stopped the outset of much disease. In order to make the sanction of health more solemn, most oriental nations have enforced purificatory rites by religious mandates—and so the Jews. A treatise collecting all the dicta of ancient medicine on the use of the bath has been current ever since the revival of learning, under the title *De Balneis*. According to it Hippocrates and Galen prescribe the bath medicinally in peripneumonia rather than in burning fever, as tending to allay the pain of the sides, chest, and back, promoting various secretions, removing lassitude, and suppling joints. A hot bath is recommended for those suffering

i. 10) and Pliny (*H. N.* xxviii. 7) ascribe similar virtues to it.

<sup>g</sup> Said by Pliny to be a specific against abortion (*N. H.* xxx. 44).

<sup>h</sup> Antimony was and is used as a dye for the eyelids, the *kolhol*. See Rosenmüller in the *Biblical Cabinet*, xxvii. 65.

<sup>i</sup> The Arabs suppose that a cornelian stone (the *Sardius lapis*, Ez. xxviii. 13, but in Joseph. *Ant.* iii. 7, § 5, *Sardonyx*), laid on a fresh wound, will stay hemorrhage.

<sup>k</sup> קרר meaning natron: the Egyptian kind was found in two lakes between Naukratis and Memphis (*Bibl. Cab.* xxvii. p. 7).

from lichen (*De Baln.* 464). Those, on the contrary, who have looseness of the bowels, who are languid, loathe their food, are troubled with nausea or bile, should not use it, as neither should the epileptic. After exhausting journeys in the sun the bath is commended as the restorative of moisture to the frame (456-458). The four objects which ancient authorities chiefly proposed to attain by bathing are — 1, to warm and distil the elements of the body throughout the whole frame, to equalize whatever is abnormal, to rarefy the skin, and promote evacuations through it; 2, to reduce a dry to a moister habit; 3 (the cold-bath), to cool the frame and brace it; 4 (the warm-bath), a sudorific to expel cold. Exercise before bathing is recommended, and in the season from April till November inclusive it is the most conducive to health; if it be kept up in the other months it should then be but once a week, and that fasting. Of natural waters some are nitrous, some saline, some aluminous,<sup>a</sup> some sulphureous, some bituminous, some copperish, some ferruginous, and some compounded of these. Of all the natural waters the power is, on the whole, desiccant and calefacient; and they are peculiarly fitted for those of a humid and cold habit. Pliny (*H. N.* xxxi.) gives the fullest extant account of the thermal springs of the ancients (*Paul. Ægin.* ed. Sydenh. Soc. i. 71). Avicenna gives precepts for salt and other mineral baths; the former he recommends in case of scurvy and itching, as rarefying the skin, and afterwards condensing it. Water medicated with alum, natron, sulphur, naphtha, iron, litharge, vitriol, and vinegar, are also specified by him. Friction and unction are prescribed, and a caution given against staying too long in the water (*ibid.* 338-340; comp. Aëtius, *de Baln.* iv. 484). A sick bather should lie quiet, and allow others to rub and anoint him, and use no strigil (the common instrument for scraping the skin), but a sponge (456). Maimonides chiefly following Galen, recommends the bath, especially for phthisis in the aged, as being a case of dryness with cold habit, and to a hectic fever patient as being a case of dryness with hot habit; also in cases of ephemeral and tertian fevers, under certain restrictions, and in putrid fevers, with the caution not to incur shivering. Bathing is dangerous to those who feel pain in the liver after eating. He adds cautions regarding the kind of water, but these relate chiefly to water for drinking (*De Baln.* 438, 439). The bath of oil was formed, according to Galen and Aëtius, by adding the fifth part of heated oil to a water-bath. Joseph speaks (*B. J. i.* 33, § 5) as though oil had, in Herod's case, been used pure.

There were special occasions on which the bath was ceremonially enjoined, after a leprous eruption healed, after the conjugal act, or an involuntary emission, or any gonorrhœal discharge, after menstruation, child-bed, or touching a corpse; so for the priests before and during their times of office such a duty was prescribed. [BATHS.] The Pharisees and Essenes aimed at scrupulous strictness of all such rules (*Matt.* xv. 2; *Mark* vii. 5;

*Luke* xi. 38). River-bathing<sup>b</sup> was common, but houses soon began to include a bath-room (*Lev.* xv. 13; 2 *K.* v. 10; 2 *Sam.* xi. 2; *Susanna*, p. 15). Vapor-baths, as among the Romans, were latterly included in these, as well as hot and cold-bath apparatus, and the use of perfumes and oils after quitting it was everywhere diffused (*Wunderbar*, 2tes Heft, ii. B.). The vapor was sometimes sought to be inhaled, though this was reputed mischievous to the teeth. It was deemed healthiest after a warm to take also a cold bath (*Paul. Ægin.* ed. Sydenh. Soc. i. 68). The Talmud has it — “Whoso takes a warm-bath, and does not also drink thereupon some warm water, is like a stove hot only from without, but not heated also from within. Whoso bathes and does not withal anoint is like the liquor outside a vat. Whoso having had a warm-bath does not also immediately pour cold water over him, is like an iron made to glow in the fire, but not thereafter hardened in the water.” This succession of cold water to hot vapor is commonly practiced in Russian and Polish baths, and is said to contribute much to robust health (*Wunderbar, ibid.*).

Besides the usual authorities on Hebrew antiquities, Talmudical and modern, *Wunderbar* (1stes Heft, pp. 57-69) has compiled a collection of writers on the special subject of Scriptural etc. medicine, including its psychological and botanical aspects, as also its political relations: a distinct section of thirteen monographs treats of the leprosy; and every various disease mentioned in Scripture appears elaborated in one or more such short treatises. Those out of the whole number which appear most generally in esteem, to judge from references made to them, are the following:—

Rosenmüller's *Natural History of the Bible*, in the *Biblical Cabinet*, vol. xxvii. *De Wette, Hebräisch-jüdische Archäologie*, § 271 b. Calmet, *Augustin, La Médecine et les Médecins des anc. Hébreux*, in his *Comm. littéral*, Paris, 1724, vol. v. *Idem, Dissertation sur la Sueur du Sang*, *Luke* xxii. 43, 44. *Pruner, Krankheiten des Orients*. Sprengel, *Kurt, De medic. Ebræorum*, Halle, 1789, 8vo. Also, *idem, Beiträge zur Geschichte der Medicin*, Halle, 1794, 8vo. *Idem, Versuch einer pragmat. Geschichte der Arzneikunde*, Halle, 1792-1803, 1821. ME'EDA (Meeḏā; [Vat. Δεδδα; Ald. Me-eda;] Meedla) = MEHIDA (1 Esdr. v. 32).

MEGID'DO (מִגִּדּוֹ; in Zech. xii. 11, מִגִּדּוֹ [perh. place of troops, Ges.]: in the LXX. [generally] Μαγεδδῶ or Μαγεδδών, [but with a number of unimportant variations;] in 1 K. ix. 15 it is Μαγδῶ: [Mageddō]) was in a very marked position on the southern rim of the plain of ESDRAELON, on the frontier-line (speaking generally) of the territories of the tribes of ISSACHAR and MANASSEH, and commanding one of those passes from the north into the hill-country which were of such critical importance on various occasions in the history of Judæa (τὰς ἀναβάσεις τῆς ὀρεινῆς, δὲ τὸν ἄντων ἦν ἡ εἰσόδος εἰς τὴν Ἰουδαίαν, Judith v. 7).

Megiddo is usually spoken of in connection with TAANACH, and frequently in connection with BETHSAN and JEZREEL. This combination suggests a wide view alike over Jewish scenery and Jewish history. The first mention occurs in Josh. xii. 21, where Megiddo appears as the city of one

of the "thirty and one kings," or petty chieftains whom Joshua defeated on the west of the Jordan. This was one of the places within the limits of Issachar assigned to Manasseh (Josh. xvii. 11; 1 Chr. vii. 29). But the arrangement gave only an imperfect advantage to the latter tribe, for they did not drive out the Canaanites, and were only able to make them tributary (Josh. xvii. 12, 13, Judg. i. 27, 28). The song of Deborah brings the place vividly before us, as the scene of the great conflict between Sisera and Barak. The chariots of Sisera were gathered "unto the river ['torrent'] of KISHON" (Judg. iv. 13); Barak went down with his men "from Mount TABOR" into the plain (iv. 14); "then fought the kings of Canaan in Taanach by the waters of Megiddo" (v. 19). The course of the Kishon is immediately in front of this position; and the river seems to have been flooded by a storm: hence what follows: "The river ['torrent'] of Kishon swept them away, that ancient river, the river Kishon" (v. 21). Still we do not read of Megiddo being firmly in the occupation of the Israelites, and perhaps it was not really so till the time of Solomon. That monarch placed one of his twelve commissariat officers, named Baana, over "Taanach and Megiddo," with the neighborhood of Beth-shean and Jezreel (1 K. iv. 12). In this reign it appears that some costly works were constructed at Megiddo (ix. 15). These were probably fortifications, suggested by its important military position. All the subsequent notices of the place are connected with military transactions. To this place Ahaziah fled when his unfortunate visit to Joram had brought him into collision with Jehu; and here he died (2 K. ix. 27) within the confines of what is elsewhere called Samaria (2 Chr. xxii. 9).

But the chief historical interest of Megiddo is concentrated in Josiah's death. When Pharaoh-Necho came from Egypt against the King of Assyria, Josiah joined the latter, and was slain at Megiddo (2 K. xxiii. 29), and his body was carried from thence to Jerusalem (ib. 30). The story is told in the Chronicles in more detail (2 Chr. xxxv. 22-24). There the fatal action is said to have taken place "in the valley of Megiddo." The words in the LXX. are, ἐν τῷ πεδίῳ Μαγεδδῶν. This calamity made a deep and permanent impression on the Jews. It is recounted again in 1 Esdr. i. 25-31, where in the A. V. "the plain of Megiddo" represents the same Greek words. The lamentations for this good king became "an ordinance in Israel" (2 Chr. xxxv. 25). "In all Jewry" they mourned for him, and the lamentation was made perpetual "in all the nation of Israel" (1 Esdr. i. 32). "Their grief was no land-flood of present passion, but a constant channel of continued sorrow, streaming from an annual fountain" (Fuller's *Pisgah Sight of Palestine*, p. 165). Thus, in the language of the prophets (Zech. xii. 11), "the mourning of Hadadrimmon in the valley

a This writer has several monographs of much interest on detached points, all to be found in his *Dissertationes Acad. Medic.* Jena, 17th and 18th centuries.

b This writer is remarkable for carefully abstaining from any reference to the O. T., even where such would be most apposite.

c The writer wishes to acknowledge his obligations to Dr. Rolleston, Linacre Professor of Physiology; and Dr. Greenhill of Hastings; Dr. Adams, editor of several

of the Sydenham Society's publications; Mr. H. Rumsey of Cheltenham, and Mr. J. Cooper Forster of Guy's Hospital, London, for their kindness in revising and correcting this article, and that on LEPROSY, in their passage through the press; at the same time that he does not wish to imply any responsibility on their part for the opinions or statements contained in them, save so far as they are referred to by name. Dr. Robert Sim has also greatly assisted him with the results of large actual experience in oriental pathology.

(*μεδίω*, LXX.) of Megiddon" becomes a poetical expression for the deepest and most despairing grief; as in the Apocalypse (Rev. xvi. 16) ARMAGEDDON, in continuance of the same imagery, is presented as the scene of terrible and final conflict. For the Septuagintal version of this passage of Zechariah we may refer to Jerome's note on the passage. "Adadremmon, pro quo LXX. translulerunt *Ῥοῶνος*, urbs est juxta Jesraelem, quæ hoc olim vocabulo nuncupata est, et hodie vocatur Maximianopolis in Campo Mageddon." That the prophet's imagery is drawn from the occasion of Josiah's death there can be no doubt. In Stanley's *S. & P.* (p. 347) this calamitous event is made very vivid to us by an allusion to the "Egyptian archers, in their long array, so well known from their sculptured monuments." For the mistake in the account of Pharaoh-Necho's campaign in Herodotus, who has evidently put Migdol by mistake for Megiddo (ii. 149), it is enough to refer to Bähr's *excursus* on the passage. The Egyptian king may have landed his troops at Acre; but it is far more likely that he marched northwards along the coast-plain, and then turned round Carmel into the plain of Esdraelon, taking the left bank of the Kishon, and that there the Jewish king came upon him by the gorge of Megiddo.

The site thus associated with critical passages of Jewish history from Joshua to Josiah has been identified beyond any reasonable doubt. Robinson did not visit this corner of the plain on his first journey, but he was brought confidently to the conclusion that Megiddo was the modern *el-Lejjûn*, which is undoubtedly the *Legio* of Eusebius and Jerome, an important and well-known place in their day, since they assume it as a central point from which to mark the position of several other places in this quarter (*Bib. Res.* ii. 328-330). Two of the distances are given thus: 15 miles from Nazareth and 4 from Taanach. There can be no doubt that the identification is substantially correct. The *μέγα πεδίον Λεγεῶνος* (*Onomast.* s. v. *Γαβαθών*) evidently corresponds with the "plain (or valley) of Megiddo" of the O. T. Moreover *el-Lejjûn* is on the caravan-route from Egypt to Damascus, and traces of a Roman road are found near the village. Van de Velde visited the spot in 1852, approaching it through the hills from the S. W.<sup>a</sup> He describes the view of the plain as seen from the highest point between it and the sea, and the huge *tells* which mark the positions of the "key-fortresses" of the hills and the plain, *Taanâk* and *el-Lejjûn*, the latter being the most considerable, and having another called *Tell Metzellim*, half an hour to the N. W. (*Syr. & Pal.* i. 350-356). About a month later in the same year Dr. Robinson was there, and convinced himself of the correctness of his former opinion. He too describes the view over the plain, northwards to the wooded hills of Galilee, eastwards to Jezreel, and southwards to Taanach, *Tell Metzellim* being also mentioned as on a projecting portion of the hills which are continuous with Carmel, the Kishon being just below (*Bib. Res.* ii. 116-119). Both writers mention a copious stream flowing down this gorge (March and April), and turning some miles before joining the Kishon. Here are probably the "waters of Megiddo" of *Judg.* v. 19,

though it should be added that by Professor Stanley (*S. & P.* p. 339) they are supposed rather to be "the pools in the bed of the Kishon" itself. The same author regards the "plain (or valley) of Megiddo" as denoting not the whole of the Esdraelon level, but that broadest part of it which is immediately opposite the place we are describing (pp. 335, 336).

The passage quoted above from Jerome suggests a further question, namely, whether Von Raumer is right in "identifying *el-Lejjûn* also with Maximianopolis, which the Jerusalem Itinerary places at 20 miles from Cæsarea and 10 from Jezreel." Van de Velde (*Memoir*, p. 333) holds this view to be correct. He thinks he has found the true Hadadrimmon in a place called *Rummaneh*, "at the foot of the Megiddo-hills, in a notch or valley about an hour and a half S. of *Tell Metzellim*," and would place the old fortified Megiddo on this *tell* itself, suggesting further that its name, "the *tell* of the Governor," may possibly retain a reminiscence of Solomon's officer, Baana the son of Ahilud.

J. S. H.

#### MEGIDDON, THE VALLEY OF

(*בְּקֵעַת מְגִדּוֹן*) [*plain of Megiddo* rather than *valley*]: *πεδίον ἐκκοπτομένου*: *campus Mageddon*). The extended form of the preceding name. It occurs only in *Zech.* xii. 11. In two other cases the LXX. [Vat.] retain the *n* at the end of the name, namely, 2 K. ix. 27, and 2 Chr. xxxv. 22 [Vat. *Μαγεδών*, *Μαγεδων*, but Rom. Alex. in both places *Μαγεδῶν*], though it is not their general custom. In this passage it will be observed that they have translated the word. G.

MEHETABEEL [4 syl.] (*מְהֵטָבֵאל*) [*Cod* (E) *a benefactor*, Fürst]: *Μεταβέηλ*; Alex. *Μεταβηλ*; [Vat. *Μειραηλ*; FA. *Mirraηλ*]: *Metabeel*). Another and less correct form of MEHETABEL. The ancestor of Shemaiah the prophet who was hired against Nehemiah by Tobiah and Sanballat (*Neh.* vi. 10). He was probably of priestly descent; and it is not unlikely that Delaiah, who is called his son, is the same as the head of the 23d course of priests in the reign of David (1 Chr. xxiv. 18).

MEHETABEL (*מְהֵטָבֵאל*) [see above]: Samaritan Cod. *מְהֵטָבֵאל*: *Μετβεηλ*: *Meetabel*). The daughter of Matred, and wife of Hadad, or Hadar, the eighth and last-mentioned king of Edom, who had Pai or Pau for his birthplace or chief city, where royalty was established among the Israelites (*Gen.* xxxvi. 39). Jerome (*de Nom. Hebr.*) writes the name in the form *Mettabel*, which he renders "quam bonus est Deus."

MEHIDA (*מְהִידָא*) [*ovis famous, noble*]: in *Ezr.*, *Μαουδᾶ*, [Comp. Ald.] Alex. *Μειδᾶ*; in *Neb.*, *Μιδᾶ*, [Vat. FA.] Alex. *Μεσιδα*: *Mahida*), a family of Nethinim, the descendants of Mehidâ, returned from Babylon with Zerubbabel (*Ezr.* ii. 52; *Neh.* vii. 54). In 1 Esdr. the name occurs in the form *MEEDA*.

MEHIR (*מְהִיר*) [*price, ransom*]: *Μαχίρ* [Vat.]; Alex. *Μαχειρ*: *Mahir*), the son of Cheleb, the brother of Shuah, or as he is described in

\* The writer of this note had visited the spot ten years before (1842), and confirmed Robinson's conclusion — identifying "the waters of Megiddo," and

the modern remains of the ancient *Legio* (*Bist. Sac.* 1843, p. 77; Ritter's *Geography of Pal.*, Gage's translation, iv. 330). S. W.

the LXX., "Caleb the father of Ascha" (1 Chr. iv. 11). In the Targum of R. Joseph, Mehir appears as "Perug," its Chaldee equivalent, both words signifying "price."

**MEHO'LATHITE, THE** (מְהוֹלָתִית) [patron-]: Alex. ο μοθολαθειτης; [Rom.] Vat. omit; [Comp. Ald. Μολαθιτης:] *Molathite*, a word occurring once only (1 Sam. xviii. 19), as the description of Adriel, son of Barzillai, to whom Saul's daughter Merab was married. It no doubt denotes that he belonged to a place called Meholah, but whether that was Abel-Meholah afterwards the native place of Elisha, or another, is as uncertain as it is whether Adriel's father was the well-known Barzillai the Gileadite or not. G.

**MEHU'JAEEL** (מְהוּיָאֵל and מְהוּיָאֵל) [prob. *smitten of God*]: Μαλεεήλ; [Comp. Ald.] Alex. Μαίηλ: *Maiiæl*, the son of Irad, and fourth in descent from Cain (Gen. iv. 18). Ewald, regarding the genealogies in Gen. iv. and v. as substantially the same, follows the Vat. LXX., considering Mahalaleel as the true reading, and the variation from it the result of careless transcription. It is scarcely necessary to say that this is a gratuitous assumption. The Targum of Onkelos follows the Hebrew even in the various forms which the name assumes in the same verse. The Peshito-Syriac, Vulgate, and a few MSS. retain the former of the two readings; while the Sam. text reads מְהוּאֵל, which appears to have been followed by the Aldine and Complutensian editions, and the Alex. MS. W. A. W.

**MEHU'MAN** (מְהוּמָן) [perh. *true, faithful*]: 'Αμάν: *Maïman*, one of the seven eunuchs (A. V. "chamberlains,") who served before Ahasuerus (Esth. i. 10). The LXX. appear to have read מְהוּמָן for מְהוּמָן.

**MEHU'NIM** (מְהוּנִים, without the article [*inhabitants, dwellers*]: Vat.] *Μανωμενίμ*; [Rom. *Μουούμυμ*: Alex. *Μουουμειμ*: *Mumim*], Ezr. ii. 50. Elsewhere called MEHUNIMS and MEUNIM; and in the parallel list of 1 Esdr. MEANI.

**MEHUNIMS, THE** (מְהוּנִים), i. e. the *Me'unim* [Vat.]: οι Μεινωίτοι [Rom.]; Alex. οι Μεινωίτοι: *Ammonite*, a people against whom king Uziah waged a successful war (2 Chr. xxvi. 7). Although so different in its English *a* dress, yet the name is in the original merely the plural of MAON (מְאוֹן), a nation named amongst those who in

the earlier days of their settlement in Palestine harassed and oppressed Israel. Maon, or the Maonites, probably inhabited the country at the back of the great range of Seir, the modern *esh-Sherah*, which forms the eastern side of the *Wady el-Arabah*, where at the present day there is still a town of the same name<sup>b</sup> (Burckhardt, *Syria*, Aug. 24). And this is quite in accordance with the terms of 2 Chr. xxvi. 7, where the Mehunim are mentioned with "the Arabians of Gur-baal," or, as the LXX. render it, Petra.

Another notice of the Mehunims in the reign of Hezekiah (cir. B. C. 726-697) is found in 1 Chr. iv. 41.<sup>c</sup> Here they are spoken of as a pastoral people, either themselves Hamites or in alliance with Hamites, quiet and peaceable, dwelling in tents. They had been settled from "of old," i. e. aboriginally, at the east end of the Valley of Gedor or Gerar, in the wilderness south of Palestine. A connection with Mount Seir is hinted at, though obscurely (ver. 42). [See vol. i. p. 879 *b*.] Here, however, the A. V. — probably following the translations of Luther and Junius, which in their turns follow the Targum — treats the word as an ordinary noun, and renders it "habitations;" a reading now relinquished by scholars, who understand the word to refer to the people in question (Gesenius, *Thes.* 1002 *a*, and *Notes on Burckhardt*, 1069; Bertheau, *Chronik*).

A third notice of the Mehunim, corroborative of those already mentioned, is found in the narrative of 2 Chr. xx. There is every reason to believe that in ver. 1 "the Ammonites" should be read as "the *d* Maonites," who in that case are the "men of Mount Seir" mentioned later in the narrative (vv. 10, 22).

In all these passages, including the last, the LXX. render the name by οι Μεινωίτοι, — the *Minaeans*, — a nation of Arabia renowned for their traffic in spices, who are named by Strabo, Ptolemy, and other ancient geographers, and whose seat is now ascertained to have been the S. W. portion of the great Arabian peninsula, the western half of the modern Hadramaut (*Dict. of Geography*, "Minaei"). Bochart has pointed out (*Phaleg*. ii. cap. xxii.), with reason, that distance alone renders it impossible that these *Minaeans* can be the Meunim of the Bible, and also that the people of the Arabian peninsula are Shenites, while the Meunim appear to have been descended from Ham (1 Chr. iv. 41). But with his usual turn for etymological speculation he endeavors nevertheless to establish an identity between the two, on the ground that *Carn al-Manasil*, a place two days' journey south of Mecca, one of the towns

<sup>a</sup> The instances of H being employed to render the strange Hebrew guttural *Ain* are not frequent in the A. V. "Hebrew" (עִבְרִית) — which in earlier versions was "Ebrew" (comp. Shakespeare, *Henry IV.* Part I. Act 2, Sc. 4) — is oftener encountered.

<sup>b</sup> معان, *Ma'an*, all but identical with the Hebrew *Maon*.

<sup>c</sup> Here the *Cethib*, or original Hebrew text, has *Meunim*, which is nearer the Greek equivalent than *Meunim* or *Meonim*.

<sup>d</sup> The text of this passage is accurately as follows: "The children of Moab and the children of Ammon, and with them of the Ammonites;" the words "other beside" being interpolated by our translators.

The change from "Ammonites" to "Mehunim" is

not so violent as it looks to an English reader. It is a simple transposition of two letters, מְהוּנִים for

מְהוּנִים; and it is supported by the LXX., and by Josephus (*Ant.* ix. 1, § 2, "Απαδες"); and by modern scholars, as De Wette (*Bibet*), Ewald (*Gesch.* iii. 474, note). A reverse transposition will be found in the Syriac version of Judg. x. 12, where "Ammon" is read for the "Maon" of the Hebrew. The LXX. make the change again in 2 Chr. xxvi. 8; but here there is no apparent occasion for it.

The Jewish gloss on 2 Chr. xx. 1 is curious. "By Ammonites Edomites are meant, who, out of respect for the fraternal relation between the two nation would not come against Israel in their own dress, but disguised themselves as Ammonites." (Jerome, *Quæst. Hebr.* ad loc.)

of the Minæans, signifies the "horn of habitations," and might therefore be equivalent to the Hebrew *Meonim*.

Josephus (*Ant.* ix. 10, § 3) calls them "the Arabs who adjoined Egypt," and speaks of a city built by Uzziath on the Red Sea to overawe them.

Ewald (*Geschichte*, i. 323, note) suggests that the southern Minæans were a colony from the Maonites and Mount Seir, who in their turn he appears to consider a remnant of the Amorites (see the text of the same page).

That the Minæans were familiar to the translators of the LXX. is evident from the fact that they not only introduce the name on the occasions already mentioned, but that they further use it as equivalent to ΝΑΑΜΑΘΗΤΗ. Zophar the Naamathite, one of the three friends of Job, is by them presented as "Sophar the Minean," and "Sophar king of the Minæans." In this connection it is not unworthy of notice that as there was a town called Maon in the mountain-district of Judah, so there was one called Naamah in the lowland of the same tribe. *El-Minydy*, which is, or was, the first station south of Gaza, is probably identical with Minots, a place mentioned with distinction in the Christian records of Palestine in the 5th and 6th centuries (Reland, *Palestina*, p. 899; Le Quien, *Oriens Christ.* iii. 669), and both may retain a trace of the Minæans. BAAL-MEON, a town on the east of Jordan, near Heshbon, still called *Ma'in*, probably also retains a trace of the presence of the Maonites or Mehunim north of their proper locality.

The latest appearance of the name MEHUNIM in the Bible is in the lists of those who returned from the Captivity with Zerubbabel. Amongst the non-Israelites from whom the Nethinim—following the precedent of what seems to have been the foundation of the  $\alpha$  order—were made up, we find their name (Ezr. ii. 50, A. V. "Mehunim;" Neh. vii. 52, A. V. "Meunim"). Here they are mentioned with the Nephishim, or descendants of Naphish, an Ishmaelite people whose seat appears to have been on the east of Palestine (1 Chr. v. 19), and therefore certainly not far distant from *Ma'an* the chief city of the Maonites.

ME-JARKON (מֵי יַרְקוֹן) [see below]: θάλασσα Ἰεράκων: *Aque Jercon* [? Vulg. *Mejarcou*], a town in the territory of Dan (*Josh.* xix. 46 only); named next in order to Gath-rimmon, and in the neighborhood of Joppa or Japho. The lexicographers interpret the name as meaning "the yellow waters." No attempt has been made to identify it with any existing site. It is difficult not to suspect that the name following that of Me-hajarkon, har-Rakon (A. V. Rakkon), is a mere corrupt repetition thereof, as the two bear a very

close similarity to each other, and occur nowhere else.

MEKON'AH (מֶכֶן) [*place, base*]: LXX.

[Rom. Vat. Alex. FA.<sup>1</sup>] omits; [FA.<sup>3</sup> Μαχονα:] *Mochona*, one of the towns which were re-inhabited after the Captivity by the men of Judah (*Neh.* xi. 28). From its being coupled with Ziklag, we should infer that it was situated far to the south, while the mention of the "daughter towns"

(בְּנוֹתַי, A. V. "villages") dependent on it seem to show that it was a place of some magnitude. Mekonah is not mentioned elsewhere, and it does not appear that any name corresponding with it has been yet discovered. The conjecture of Schwarz—that it is identical with the *Mechanum*, whic Jerome (*Onomasticon*, "Bethmachah") locates between Eleutheropolis and Jerusalem, at eight miles from the former—is entirely at variance with the above inference.

MELATY'AH (מֶלַטַיָּה) [*delivered by Jehovah*: Rom.] Μαλτίας; [Vat. Alex. FA. omit:] *Meltias*, a Gibeonite, who, with the men of Gibeon and Mizpah, assisted in rebuilding the wall of Jerusalem under Nehemiah (*Neh.* iii. 7).

MEL'CHI (Μελχι) [in Sin.] Vat. and Alex. MSS.: Μεχλι, Tisch. [in 2d ed., but Μελχι in 7th and 8th eds.]: *Melchi*. 1. The son of Janna, and ancestor of Joseph in the genealogy of Jesus Christ (*Luke* iii. 24). In the list given by Africanus, Melchi appears as the father of Heli, the intervening Levi and Matthat being omitted (*Hervey, Geneal.* p. 137).

2. The son of Addi in the same genealogy (*Luke* iii. 23).

MELCHY'AH (מֶלְכִי־יָה) [*Jehovah's king*]: Μεχχας: *Melchias*, a priest, the father of Pashur (*Jer.* xxi. 1). He is elsewhere called Malchiah and Malchijah. (See MALCHIAH 7, and MALCHIJAH 1.)

MELCHY'AS (Μελχίας: *Melchias*). 1. The same as MALCHIAH 2 (1 Esdr. ix. 26).

2. [Vat. Μεχχίαιας:] = MALCHIAH 3 and MALCHIJAH 4 (1 Esdr. ix. 32).

3. [Vat. Μεχχίαιας:] *Mulchias*. The same as MALCHIAH 6 (1 Esdr. ix. 44).

MEL'CHIEL ([Vat.] Μελχιελ; [Rom. Alex. Sin.<sup>ca</sup> Μελχιήλ; Sin. Σελλημ]). Charmis, the son of Melchiel, was one of the three governors of Bethulia (*Jud.* vi. 15). The Vulgate has a different reading, and the Peshito gives the name *Manshajel*.

MELCHIS'EDEC (Μελχισεδέκ: [*Melchisedech*]), the form of the name MELCHIZEDEK adopted in the A. V. of the New Testament (*Heb.* v., vi., vii.).

<sup>a</sup> The institution of the Nethinim, i. e. "the given ones," seems to have originated in the Midianite war (*Num.* xxxi.), when a certain portion of the captives was "given" (the word in the original is the same) to the Levites who kept the charge of the Sacred Tent (*vv.* 30, 47). The Gibeonites were probably the next occasion, and the invaluable lists of Ezra and Nehemiah alluded to above seem to show that the captives from many a foreign nation went to swell the numbers of the Order. See Meahunim, Nephusim, Harsha, Ulers, and other foreign names contained in these lists.

<sup>b</sup> Our translators have here represented the Hebrew

Caph by K, which they usually reserve for the Koph. Other instances are KITHLISH and KITHIM.

<sup>c</sup> This passage of Jerome is one of those which completely startle the reader, and incline him to mistrust altogether Jerome's knowledge of sacred topography. He actually places the Beth-machah, in which Jacob besieged Sheba the son of Bichri, and which was one of the first places taken by Tiglath-Pileser on his entrance into the north of Palestine, among the mountains of Judah, south of Jerusalem! A mistake of the same kind is found in Benjamin of Tudela and Hap-Pareni, who places the Maon of David's adventures in the neighborhood of Mount Carmel.

MEL'CHI-SHU'A (מֶלְכִי־שׁוּא), *i. e.* Malchishua: [Μελχισά; Vat.] Μελχισσα; Alex. Μελχισουε, [Μελχισουε:] Joseph. Μέλχιος: Melchisau), a son of Saul (1 Sam. xiv. 49, xxxi. 2). An erroneous manner of representing the name, which is elsewhere correctly given MALCHISHUA.

MELCHIZEDEK (מֶלְכִי־צֶדֶק), *i. e.* Melchizedek [king of righteousness]: Μελχισεδέκ: Melchisedech), king of Salem and priest of the Most High God, who met Abram in the Valley of Shaveh [or, the level valley], which is the king's valley, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20). The other places in which Melchizedek is mentioned are Ps. cx. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek," and Heb. v., vi., vii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great length.

There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent references to him. Bearing a title which Jews in after ages would recognize as designating their own sovereign, bearing gifts which recall to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years; and then a few emphatic words for another moment bring him into sight as a type of the coming Lord of David. Once more, after another thousand years, the Hebrew Christians are taught to see in him a proof that it was the consistent purpose of God to abolish the Levitical priesthood. His person, his office, his relation to Christ, and the seat of his sovereignty, have given rise to innumerable discussions, which even now can scarcely be considered as settled.

The faith of early ages ventured to invest his person with superstitious awe. Perhaps it would be too much to ascribe to mere national jealousy the fact that Jewish tradition, as recorded in the Targums of Pseudo-Jonathan and Jerusalem, and in Rashi on Gen. xiv., in some cabalistic (*apud* Bochart, *Phaleg*, pt. 1, b. ii. 1, § 69) and rabbinical (*apud* Schöttgen, *Hebr. Heb.* ii. 645) writers, pronounces Melchizedek to be a survivor of the Deluge, the patriarch Shem, authorized by the superior dignity of old age to bless even the father of the faithful, and entitled, as the paramount lord of Canaan (Gen. ix. 26) to convey (xiv. 19) his right to Abram. Jerome in his *Ep. lxxiii. ad Evangelum* (*Opp.* i. 438), which is entirely devoted to a consideration of the person and dwelling-place of Melchizedek, states that this was the prevailing opinion of the Jews in his time; and it is ascribed to the Samaritans by Epiphanius, *Hebr.* lv. 6, p. 472. It was afterwards embraced by Luther and Melancthon, by our own countrymen, H. Broughton, Selden, Lightfoot (*Chor. Marco præm.* ch. x. 1, § 2), Jackson (*On the Creed*, b. ix. § 2), and by many others. It should be noted that this supposition does not appear in the Targum of Onkelos, — a presumption that it was not received by the Jews till after the Christian era — nor has it found favor with the Fathers. Equally old, per-

haps, but less widely diffused, is the supposition not unknown to Augustine (*Quest. in Gen. lxxii. Opp.* iii. 396), and ascribed by Jerome (*l. c.*) to Origen and Didymus, that Melchizedek was an angel. The Fathers of the fourth and fifth centuries record with reprobation the tenet of the Melchizedekians that he was a Power, Virtue, or Influence of God (August. *de Hæresibus*, § 34, *Opp.* viii. 11; Theodoret, *Hæret. fab.* ii. 6, p. 332; Epiphanius, *Hebr.* lv. 1, p. 468; compare Cyril Alex. *Glaph. in Gen.* ii. p. 57) superior to Christ (Chrysost. *Hom. in Melchiz. Opp.* vi. p. 269), and the not less daring conjecture of Hieracas and his followers that Melchizedek was the Holy Ghost (Epiphanius, *Hebr.* lxxvii. 3, p. 711 and l. 5, p. 472). Epiphanius also mentions (lv. 7, p. 474) some members of the church as holding the erroneous opinion that Melchizedek was the Son of God appearing in human form, an opinion which St. Ambrose (*De Abrah.* i. § 3, *Opp.* t. i. p. 288) seems willing to receive, and which has been adopted by many modern critics. Similar to this was a Jewish opinion that he was the Messiah (*apud* Deyling, *Obs. Sacr.* ii. 73, Schöttgen, *l. c.*; compare the Book Sohar *apud* Wolf, *Curæ Phil.* in Heb. vii. 1). Modern writers have added to these conjectures that he may have been Ham (Jurieu), or a descendant of Japhet (Owen), or of Shem (*apud* Deyling, *l. c.*), or even Enoch (Hulse), or Job (Kohlreis). Other guesses may be found in Deyling (*l. c.*) and in Pfeiffer (*De personâ Melch.* — *Opp.* p. 51). All these opinions are unauthorized additions to Holy Scripture — many of them seem to be irreconcilable with it. It is an essential part of the Apostle's argument (Heb. vii. 6) that Melchizedek is "without father," and that his "pedigree is not counted from the sons of Levi;" so that neither their ancestor Shem, nor any other son of Noah can be identified with Melchizedek; and again, the statements that he fulfilled on earth the offices of Priest and King and that he was "made like unto the son of God" would hardly have been predicated of a Divine Person. The way in which he is mentioned in Genesis would rather lead to the immediate inference that Melchizedek was of one blood with the children of Ham, among whom he lived, chief (like the King of Sodom) of a settled Canaanitish tribe. Perhaps it is not too much to infer from the silence of Philo (*Abraham*, xl.) and Onkelos (*in Gen.*) as to any other opinion, that he held this. It certainly was the opinion of Josephus (*B. J.* vii. 18), of most of the early Fathers (*apud* Jerome, *l. c.*), of Theodoret (*in Gen.* lxxv. p. 77), and Epiphanius (*Hebr.* lxxvii. p. 716), and is now generally received (see Grotius *in Hebr.*; Patrick's *Commentary in Gen.*; Bleek, *Hebræer*, ii. 303; Ebrard, *Hebræer*; Fairbairn, *Typology*, ii. 313, ed. 1854). And as Balaam was a prophet, so Melchizedek was a priest among the corrupted heathen (Philo, *Abrah.* xxxix.; Euseb. *Præp. Evang.* i. 9), not self-appointed (as Chrysostom suggests, *Hom. in Gen.* xxxv. § 5, cf. Heb. v. 4), but constituted by a special gift from God, and recognized as such by Him.

Melchizedek combined the offices of priest and king, as was not uncommon in patriarchal times. Nothing is said to distinguish his kingship from that of the contemporary kings of Canaan; but the emphatic words in which he is described, by a title never given even to Abraham, as a "priest of the most High God," as blessing Abraham and receiving tithes from him, seem to imply that his priesthood

was something more (see Hengstenberg, *Christol.*, c. s. ex.) than an ordinary patriarchal priesthood, such as Abram himself and other heads of families (Job i. 5) exercised. And although it has been observed (Pearson, *On the Creed*, p. 122, ed. 1843) that we read of no other sacerdotal act performed by Melchizedek, but only that of blessing [and receiving tithes, Pfeiffer], yet it may be assumed that he was accustomed to discharge all the ordinary duties of those who are "ordained to offer gifts and sacrifices," Heb. viii. 3; and we might concede (with Philo, Grotius, &c. and others) that his regal hospitality to Abram was possibly preceded by an unrecorded sacerdotal act of oblation to God, without implying that his hospitality was in itself, as recorded in Genesis, a sacrifice.

The "order of Melchizedek," in Ps. cx. 4, is explained by Gesenius and Rosenmüller to mean "manner" = "likeness in official dignity" = a king and priest. The relation between Melchizedek and Christ as type and antitype is made in the Ep. to the Hebrews to consist in the following particulars. Each was a priest, (1) not of the Levitical tribe; (2) superior to Abraham; (3) whose beginning and end are unknown; (4) who is not only a priest, but also a king of righteousness and peace. To these points of agreement, noted by the Apostle, human ingenuity has added others which, however, stand in need of the evidence of either an inspired writer or an eye-witness, before they can be received as facts and applied to establish any doctrine. Thus J. Johnson (*Unbloody Sacrifice*, i. 123, ed. 1847) asserts on very slender evidence, that the Fathers who refer to Gen. xiv. 18, understood that Melchizedek offered the bread and wine to God; and hence he infers that one great part of our Saviour's Melchizedekian priesthood consisted in offering bread and wine. And Bellarmine asks in what other respects is Christ a priest after the order of Melchizedek. Waterland, who does not lose sight of the deep significance of Melchizedek's action, has replied to Johnson in his *Appendix* to "the Christian Sacrifice explained," ch. iii. § 2, *Works*, v. 165, ed. 1843. Bellarmine's question is sufficiently answered by Whitaker, *Disputation on Scripture*, Quest. ii. ch. x. 168, ed. 1849. And the sense of the Fathers, who sometimes expressed themselves in rhetorical language, is cleared from misinterpretation by Bp. Jewel, *Reply to Harding*, art. xvii. (*Works*, ii. 731, ed. 1847). In Jackson on the *Creed*, bk. ix. § 2, ch. vi.-xi. 955 ff., there is a lengthy but valuable account of the priesthood of Melchizedek; and the views of two different theological schools are ably stated by Aquinas, *Summa* iii. 22. § 6, and Turretinus, *Theologia*, vol. ii. p. 443-453.

Another fruitful source of discussion has been found in the site of Salem and Shaveh, which certainly lay in Abram's road from Hobah to the plain of Mamre, and which are assumed to be near to each other. The various theories may be briefly enumerated as follows: (1) Salem is supposed to have occupied in Abraham's time the ground on which afterwards Jebus and then Jerusalem stood; and Shaveh to be the valley east of Jerusalem through which the Kidron flows. This opinion, abandoned by Reland, *Pal.* 833, but adopted by Winer, is supported by the facts that Jerusalem is called Salem in Ps. lxxvi. 2, and that Josephus (*Ant.* i. 10, § 2) and the Targums distinctly assert their identity: that the king's dale (2 Sam. xviii. 18), identified in Gen. xiv. 17 with Shaveh, is

placed by Josephus (*Ant.* vii. 10, § 3), and by mediæval and modern tradition (see Ewald, *Gesch.* iii. 239) in the immediate neighborhood of Jerusalem: that the name of a later king of Jerusalem, Adonizedec (Josh. x. 1), sounds like that of a legitimate successor of Melchizedek: and that Jewish writers (*ap.* Schöttgen, *Hor. Heb.* in Heb. vii. 2) claim Zedek = righteousness, as a name of Jerusalem. (2.) Jerome (*Opp.* i. 446) denies that Salem is Jerusalem, and asserts that it is identical with a town near Scythopolis or Bethshan, which in his time retained the name of Salem, and in which some extensive ruins were shown as the remains of Melchizedek's palace. He supports this view by quoting Gen. xxxiii. 18, where, however, the translation is questioned (as instead of Salem the word may signify "safe"); compare the mention of Salem in Judith iv. 4, and in John iii. 23. (3.) Professor Stanley (*S. of P.* pp. 237, 238) is of opinion that there is every probability that Mount Gerizim is the place where Melchizedek, the priest of the Most High, met Abram. Eupolemus (*ap.* Euseb. *Præp. Evang.* ix. 17), in a confused version of this story, names Argerzim, the mount of the Most High, as the place in which Abram was hospitably entertained. (4.) Ewald (*Gesch.* iii. 239) denies positively that it is Jerusalem, and says that it must be north of Jerusalem on the other side of Jordan (i. 410): an opinion which Rüdiger (*Gesen. Thesaurus*, 1422 b) condemns. There too Professor Stanley thinks that the king's dale was situated near the spot where Absalom fell.

Some Jewish writers have held the opinion that Melchizedek was the writer and Abram the subject of Ps. cx. See Deyling, *Obs. Sacr.* iii. 137.

It may suffice to mention that there is a fabulous life of Melchizedek printed among the spurious works of Athanasius, vol. iv. p. 189.

Reference may be made to the following works in addition to those already mentioned: two tracts on Melchizedek by M. J. II. von Elswick, in the *Thesaurus Novus Theolog.-philologicus*; L. Borgisius, *Historia Critica Melchisedeci*, 1706; Gailard, *Melchisedecus Christus*, etc., 1686; M. C. Hoffman, *De Melchisedeco*, 1669; H. Broughton, *Treatise of Melchizedek*, 1591. See also J. A. Fabricius, *Cod. Pseudepigr.* V. T.; P. Molinæus, *Vates*, etc., 1640, iv. 11; J. II. Heidegger, *Hist. Sacr. Patriarcharum*, 1671, ii. 288; Hottinger, *Ennead. Disput.*; and P. Cænæus, *De Republ. Heb.* iii. 3, apud *Crit. Sacr.* vol. v.

W. T. B.

**MELËA** (Μελέα [Tisch. Μελέα]: *Melen*). The son of Menai, and ancestor of Joseph in the genealogy of Jesus Christ (Luke iii. 31).

**MELËCH** (מֶלֶךְ = *king*: in 1 Chr. viii. 35, Μελάχ, [Vat. Μελαχλα.] Alex. Μαλωθ; in 1 Chr. ix. 41, Μαλάχ, Alex. Μαλωχ: *Melech*). The second son of Micah, the son of Merib-baal or Mephibosheth, and therefore great-grandson of Jonathan the son of Saul.

**MELICU** (מִלְכִי; *Keri*, מִלְכִי; *Amal-*ούχ; [Vat.] Alex. Μαλουχ; *Milicho*). The same as MALLUCH 6 (Neh. xii. 14; comp. ver. 2).

**MELITA** (Μελίτη: [*Melita*]), Acts xxviii. 1, the modern *Malta*. This island has an illustrious place in Scripture, as the scene of that shipwreck of St. Paul which is described in such minute detail in the Acts of the Apostles. An attempt has been made, more than once, to connect this

occurrence with another island, bearing the same name, in the Gulf of Venice; and our best course here seems to be to give briefly the points of evidence by which the true state of the case has been established.

(1.) We take St. Paul's ship in the condition in which we find her about a day after leaving FAIR HAVENS, *i. e.* when she was under the lee of CLAUDA (Acts xxvii. 16), laid-to on the starboard tack, and strengthened with "undergirders" [SHIP], the boat being just taken on board, and the gale blowing hard from the E. N. E. [EUROCLYDON.] (2.) Assuming (what every practiced sailor would allow) that the ship's direction of drift would be about W. by N., and her rate of drift about a mile and a half an hour, we come at once to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the thirteenth day (see ver. 27). (3.) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come to that spot on the coast without touching any other part of the island previously. The coast, in fact, trends from this bay to the S. E. This may be seen on consulting any map or chart of Malta. (4.) On Koura Point, which is the southeasterly extremity of the bay, there must infallibly have been breakers, with the wind blowing from the N. E. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which became sensible to the quick ear of the "sailors." (5.) Yet the vessel did not strike; and this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6.) Off this point of the coast the soundings are 20 fathoms (ver. 28), and a little further, in the direction of the supposed drift, they are 15 fathoms (*ib.*). (7.) Though the danger was imminent, we shall find from examining the chart that there would still be time to anchor (ver. 29) before striking on the rocks ahead. (8.) With bad holding ground there would have been great risk of the ship dragging her anchors. But the bottom of St. Paul's Bay is remarkably tenacious. In Purdy's *Sailing Directions* (p. 180) it is said of it that "while the cables hold there is no danger, as the anchors will never start." (9.) The other geological characteristics of the place are in harmony with the narrative, which describes the creek as having in one place a sandy or muddy beach (*κόλπον ἔχοντα αἰγιαλόν*, ver. 39), and which states that the bow of the ship was held fast in the shore, while the stern was exposed to the action of the waves (ver. 41). For particulars we must refer to the work (mentioned below) of Mr. Smith, an accomplished geologist. (10.) Another point of local detail is of considerable interest — namely, that as the ship took the ground, the place was observed to be *διθάλασος*, *i. e.* a connection was noticed between two apparently separate pieces of water. We shall see, on looking at the chart, that this would be the case. The small island of Salmonetta would at first appear to be a part of Malta itself; but the passage would open on the right as the vessel passed to the place of shipwreck. (11.) Malta is in the track of ships between Alexandria and Puteoli; and this corresponds with the fact that the "Castor and Pollux," an Alexandrian vessel which ultimately conveyed St. Paul to Italy, had wintered in the island (Acts xxviii. 11). (12.)

Finally, the course pursued in this conclusion of the voyage, first to Syracuse and then to Rhegium, contributes a last link to the chain of arguments by which we prove that Melita is *Malta*.

The case is established to demonstration. Still it may be worth while to notice one or two objections. It is said, in reference to xxvii. 27, that the wreck took place in the Adriatic, or Gulf of Venice. It is urged that a well-known island like Malta could not have been unrecognized (xxvii. 39), nor its inhabitants called "barbarous" (xxviii. 2). [BARBAROUS, Amer. ed.] And as regards the occurrence recorded in xxviii. 3, stress is laid on the facts that Malta has no poisonous serpents, and hardly any wood. To these objections we reply at once that ADRIA, in the language of the period, denotes not the Gulf of Venice, but the open sea between Crete and Sicily; that it is no wonder if the sailors did not recognize a strange part of the coast on which they were thrown in stormy weather and that they did recognize the place when they

did leave the ship (xxviii. 1) <sup>a</sup>; that the kindness recorded of the natives (xxviii. 2, 10) shows they were not "barbarians" in the sense of being savages, and that the word denotes simply that they did not speak Greek; and lastly, that the population of Malta has increased in an extraordinary manner in recent times, that probably there was abundant wood there formerly, and that with the destruction of the wood many indigenous animals would disappear.<sup>b</sup>

In adducing positive arguments and answering objections, we have indirectly proved that Melita in the Gulf of Venice was not the scene of the shipwreck. But we may add that this island could not have been reached without a miracle under the circumstances of weather described in the narrative; that it is not in the track between Alexandria and Puteoli; that it would not be natural to proceed

from it to Rome by means of a voyage embracing Syracuse; and that the soundings on its shore do not agree with what is recorded in the Acts.

An amusing passage in Coleridge's *Table Talk* (p. 185) is worth noticing as the last echo of what is now an extinct controversy. The question has been set at rest forever by Mr. Smith of Jordan Hill, in his *Voyage and Shipwreck of St. Paul*, the first published work in which it was thoroughly investigated from a sailor's point of view. It had, however, been previously treated in the same manner, and with the same results, by Admiral Penrose, and copious notes from his MSS. are given in *The Life and Epistles of St. Paul*. In that work (2d ed. p. 426 note) are given the names of some of those who carried on the controversy in the last century. The ringleader on the Adriatic side of the question, not unnaturally was Padre Georgi, a

St. Paul's Bay.

Benedictine monk connected with the Venetian or Austrian *Meleda*, and his *Paulus Naufragus* is extremely curious. He was, however, not the first to suggest this untenable view. We find it, at a much earlier period, in a Byzantine writer, Const. Porphyrog. *De Adm. Imp.* (c. 36, v. iii. p. 164 of the Bonn ed.).

As regards the condition of the island of Melita, when St. Paul was there, it was a dependency of the Roman province of Sicily. Its chief officer

(under the governor of Sicily) appears from inscriptions to have had the title of *πρῶτος Μελιταίων*, or *Primus Melitensium*, and this is the very phrase which St. Luke uses (xxviii. 7). [PUBLIUS.] Mr. Smith could not find these inscriptions. There seems, however, no reason whatever to doubt their authenticity (see Bochart, *Opera*, i. 502; Abela, *Descr. Melite*, p. 146, appended to the last volumes of the *Antiquities of Graevius*; and Boeckh, *Corp. Insc.* vol. iii. 5754). Melita, from its position in

<sup>a</sup> \* It may have been, as far as respects the verb (*ἐπέγνωσαν* or probably *ἐπέγνωμεν*), by recognition or by information that they learnt on what island they were cast. In this instance as what they learned was not that "the island is Melita" but "is called (*καλεῖται*) Melita," they were probably told this by the people whom the wreck of the ship had brought down on the coast. If "the sailors" as distinguished from the others "recognized the land" it would naturally have been the sea-view which was familiar to them, and yet they had failed to recognize the island from the sea, though they had seen it in full daylight (ver. 23) before landing. II.

<sup>b</sup> \* There is a passage in another of Dean Howson's works respecting these verifications of Luke's accuracy which belongs also to this place. "Nothing is more certain than that the writer was on board that ship and that he tells the truth. It might be thought strange that so large a space, in a volume which we believe to be inspired, should contain so much circumstantial detail with so little of religious exhortation

and precept. The chapter might seem merely intended to give us information concerning the ships and sea-faring of the ancient world; and certainly nothing in the whole range of Greek and Roman literature does teach us so much on these subjects. What if it was divinely ordained that there should be one large passage in the New Testament — one, and just one — that could be minutely tested in the accuracy of its mere circumstantial particulars — and that it should have been so tested and attested just at the time when such accuracy is most searchingly questioned?" (*Lectures on the Character of St. Paul*, Hulsean Lectures for 1864.)

The particulars in which this accuracy of the narrative shows itself are well enumerated in J. R. Oertel's *Paulus in der Apostelgeschichte*, pp. 107-110 (Halle, 1868). Klostermann (*Viniciae Lucanæ seu de itinerarii in libro Actuum assertiva auctore*, Götting, 1866) argues from internal characteristics that the writer of this itinerary (Acts xxvii. and xxviii.) must have been an eye-witness, and was the Luke who wrote the other parts of the book. B

the Mediterranean, and the excellence of its harbors, has always been important both in commerce and war. It was a settlement of the Phœnicians at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day. (Gesenius, *Versuch üb. die mult. Sprache*, Leipz. 1810.)<sup>a</sup> From the Carthaginians it passed to the Romans in the Second Punic War. It was famous for its honey and fruits, for its cotton fabrics, for excellent building-stone, and for a well-known breed of dogs. A few years before St. Paul's visit, corsairs from his native province of Cilicia made Melita a frequent resort; and through subsequent periods of its history, Vandal and Arabian, it was often associated with piracy. The Christianity, however, introduced by St. Paul was never extinct. This island had a brilliant period under the knights of St. John, and it is associated with the most exciting passages of the struggle between the French and English at the close of the last century and the beginning of the present. No island so small has so great a history, whether Biblical or political. J. S. H.

**MELONS** (מלון, <sup>b</sup> *abattichim*; πέπωνες: *pepones*) are mentioned only in the following verse: "We remember the fish, which we did eat in Egypt freely; the cucumbers, and the melons," etc. (Num. xi. 5); by the Hebrew word we are probably to understand both the melon (*Cucumis melo*) and the water-melon (*Cucurbita citrullus*), for the Arabic

*Cucurbita citrullus.*

noun singular, *batekh*, which is identical with the Hebrew word, is used generally, as we learn from Prosper Alpinus, who says (*Reverend Egypt. Hist.* i. 17) of the Egyptians, "they often dine and sup on

<sup>a</sup> \* For the results of this investigation see also Ersch and Gruber's *Encyclopadie*, art. "Arabien." The Maltese language approaches so nearly to the Arabic that the islanders are readily understood in all the ports of Africa and Syria. At the time of the Saracen irruption Malta was overrun by Arabs from whom the common people of the island derive their origin. Their dialect is a corrupt Arabic, interwoven at the same time with many words from the Italian, Spanish, and other European languages. Although the ancestral pride of the Maltese may dispose them to trace back

fruits alone, such as cucumbers, pumpkins, melons, which are known by the generic name *batech*." The Greek πέπων, and the Latin *pepo*, appear to be also occasionally used in a generic sense. According to Forskål (*Descr. plant.* p. 167) and Hasselquist (*Trav.* 255), the Arabs designated the water-

Melon. (*Cucumis melo*.)

melon *batech*, while the same word was used with some specific epithet to denote other plants belonging to the order *Cucurbitaceæ*. Though the water-melon is now quite common in Asia, Dr. Royle thinks it doubtful whether it was known to the ancient Egyptians, as no distinct mention of it is made in Greek writers; it is uncertain at what time the Greeks applied the term ἀγγούριον (*anguria*) to the water-melon, but it was probably at a comparatively recent date. The modern Greek word for this fruit is ἀγγούρι. Galen (*de Fac. Alim.* ii. 567) speaks of the common melon (*Cucumis melo*) under the name μηλοπέπων. Serapion, according to Sprengel (*Comment. in Dioscor.* ii. 162), restricts the Arabic *batekh* to the water-melon. The water-melon is by some considered to be indigenous to India, from which country it may have been introduced into Egypt in very early times; according to Prosper Alpinus, medical Arabic writers sometimes use the term *batekh-Indi*, or *anguria Indica*, to denote this fruit, whose common Arabic name is according to the same authority, *batekh el-Maawi* (water); but Hasselquist says (*Trav.* 256) that this name belongs to a softer variety, the juice of which, when very ripe, and almost putrid, is mixed with rose-water and sugar and given in fevers; he observes that the water-melon is cultivated on the banks of the Nile, on the rich clayey earth after the inundations, from the beginning of May to the end of July, and that it serves the Egyptians for meat, drink, and physic; the fruit, however, he says, should be eaten "with great circumspection, for if it be taken in the heat of the day when the body is warm, bad consequences often ensue." This observation

their language to the old Punic, yet it contains nothing which may not far more naturally be explained out of the modern Arabic. The Maltese Arabic is such that travellers in Arabia and Palestine often obtain their guides in Malta. H.

<sup>b</sup> From root מלך, transp. for מלך (طبخ), "to cook." Precisely similar is the derivation of πέπων, from πέπω. Gesenius compares the Spanish *bullicas*, the French *pastèques*.

no doubt applies only to persons before they have become acclimatized, for the native Egyptians eat the fruit with impunity. The common melon (*Cucumis melo*) is cultivated in the same places and ripens at the same time with the water-melon; but the fruit in Egypt is not so delicious as in this country (see Somnini's *Travels*, ii. 328); the poor in Egypt do not eat this melon. "A traveller in the East," says Kitto (note on Num. xi. 5), "who recollects the intense gratitude which a gift of a slice of melon inspired while journeying over the hot and dry plains, will readily comprehend the regret with which the Hebrews in the Arabian desert looked back upon the melons of Egypt." The water-melon, which is now extensively cultivated all over India and the tropical parts of Africa and America, and indeed in hot countries generally, is a fruit not unlike the common melon, but the leaves are deeply lobed and gashed, the flesh is pink or white, and contains a large quantity of cold watery juice without much flavor; the seeds are black. The melon is too well known to need description. Both these plants belong to the order *Cucurbitaceæ*, the Cucumber family, which contains about sixty known genera and 300 species — *Cucurbita*, *Bryonia*, *Momordica*, *Cucumis*, are examples of the genera. [CUCUMBER; GOURD.] W. H.

\* Had the faith of the children of Israel been such as it ought to have been they needed not to have murmured at the loss of the Egyptian melons, inasmuch as Palestine and Syria are capable of producing the best species of them. Water-melons are now cultivated all through Palestine, and those of Jaffa are famous for their lusciousness. They are carried to all points on the coast, and transported to the inland towns on camels as far as Hums and Hamath and Aleppo, before the season when they ripen in those districts. They are among the cheapest and most widely diffused of all the fruits of the East. In most parts of Syria

melons go by the generic name of بطيخ, *Bottikh*,

while their specific names are yellow *Bottikh* for the *musk-melon*, *Jaffa Bottikh* for those from that city, green *Bottikh* for the water-melon. It is not, however, the custom to name other plants of the *cucurbitaceæ* "Bottikh." The cucumber, and the *Elaterium*, etc. have all their appropriate generic names. G. E. P.

MEL'ZAR (מֶלְזָר [overseer]). The A. V. is wrong in regarding Melzar as a proper name; it is rather an official title, as is implied in the addition of the article in each case where the name occurs (Dan. i. 11, 16); the marginal reading, "the steward," is therefore more correct. The LXX. rather, Theodotion] regards the article as a part of the name, and renders it Ἀμερσάρ [so Alex.; Rom. Vat. Αμερσάρ; the LXX. read Ἀβιερσπί]; the Vulgate, however, has *Melazar*. The *melzar* was subordinate to the "master of the eunuchs;" his office was to superintend the nurture and education of the young; he thus combined the duties of the Greek παιδαγωγός and τροφός, and more nearly resembles our "tutor" than any other officer. As to the origin of the term, there is some doubt; it is generally regarded as of Persian origin, the words *mal çara* giving the sense of "head cup-bearer;"

Fürst (Lex. s. v.) suggests its connection with the Hebrew *nazar*, "to guard." W. L. B.

MEMMIUS, QUINTUS (Κόιντος Μემμίου), 2 Macc. xi. 34. [MANLIUS, T.]

MEMPHIS, a city of ancient Egypt, situated on the western bank of the Nile, in latitude 30° 6' N. It is mentioned by Isaiah (xix. 13), Jeremiah (ii. 16, xlv. 14, 19), and Ezekiel (xxx. 13, 16), under the name of *NOPIH*; and by Hosea (ix. 6) under the name of *MORH* in Hebrew, and *MEMPHIS* in our English version [LXX. Μέμφις, Vulg. *Memphis*]. The name is compounded of two hieroglyphics "*Men*" = foundation, station; and "*Nofre*" = good. It is variously interpreted; e. g. "haven of the good;" "tomb of the good man" — Osiris; "the abode of the good;" "the gate of the blessed." Gesenius remarks upon the two interpretations proposed by Plutarch (*De Isid. et Os.* 20) — namely, ἄρμος ἀγαθῶν, "haven of the good," and τάφος Ὀσιρίδος, "the tomb of Osiris" — that "both are applicable to Memphis as the sepulchre of Osiris, the Necropolis of the Egyptians, and hence also the haven of the blessed, since the right of burial was conceded only to the good." Bunsen, however, prefers to trace in the name of the city a connection with Menes, its founder. The Greek coins have *Memphis*; the Coptic is *Memfi* or *Menfi* and *Menfi*; Hebrew, sometimes *Moph* (*Mph*), and sometimes *Noph*; Arabic *Memf* or *Menf* (Bunsen, *Egypt's Place*, vol. ii. 53). There can be no question as to the identity of the *Noph* of the Hebrew prophets with *Memphis*, the capital of lower Egypt.

Though some regard Thebes as the more ancient city, the monuments of Memphis are of higher antiquity than those of Thebes. Herodotus dates its foundation from Menes, the first really historical king of Egypt. The era of Menes is not satisfactorily determined. Birch, Kenrick, Poole, Wilkinson, and the English school of Egyptologists generally, reduce the chronology of Manetho's lists, by making several of his dynasties contemporaneous instead of successive. Sir G. Wilkinson dates the era of Menes from B. C. 2690; Mr. Stuart Poole, B. C. 2717 (Rawlinson, *Herod.* ii. 342; Poole, *Howe Egypt.* p. 97). The German Egyptologists assign to Egypt a much longer chronology. Bunsen fixes the era of Menes at B. C. 3643 (*Egypt's Place*, vol. ii. 579); Brugsch at B. C. 4455 (*Histoire d'Egypte*, i. 287); and Lepsius at B. C. 3892 (*Königsbuch der alten Ägypter*). Lepsius also registers about 18,000 years of the dynasties of gods, demigods, and prehistoric kings, before the accession of Menes. But indeterminate and conjectural as the early chronology of Egypt yet is, all agree that the known history of the empire begins with Menes, who founded Memphis. The city belongs to the earliest periods of authentic history.

The building of Memphis is associated by tradition with a stupendous work of art which has permanently changed the course of the Nile and the face of the Delta. Before the time of Menes the river emerging from the upper valley into the neck of the Delta, bent its course westward toward the hills of the Libyan desert, or at least discharged a large portion of its waters through an arm in that direction. Here the generous flood whose yearly inundation gives life and fertility to Egypt, was largely absorbed in the sands of the desert, or wasted in stagnant morasses. It is even conjectured that up to the time of Menes the whole Delta was

an uninhabitable marsh. The rivers of Damascus, the *Barada* and *'Awy*, now lose themselves in the same way in the marshy lakes of the great desert plain southeast of the city. Herodotus informs us, upon the authority of the Egyptian priests of his time, that Menes "by banking up the river at the bend which it forms about a hundred furlongs south of Memphis, laid the ancient channel dry, while he dug a new course for the stream half-way between the two lines of hills. To this day," he continues, "the elbow which the Nile forms at the point where it is forced aside into the new channel is guarded with the greatest care by the Persians, and strengthened every year; for if the river were to burst out at this place, and pour over the mound, there would be danger of Memphis being completely overwhelmed by the flood. Mên, the first king, having thus, by turning the river, made the tract where it used to run, dry land, proceeded in the first place to build the city now called Memphis, which lies in the narrow part of Egypt; after which

he further excavated a lake outside the town, to the north and west, communicating with the river, which was itself the eastern boundary" (Herod. ii. 99). From this description it appears, that—like Amsterdam dyked in from the *Zuyder Zee*, or *St. Petersburg* defended by the mole at *Cronstadt* from the Gulf of Finland, or more nearly like *New Orleans* protected by its levee from the freshets of the Mississippi, and drained by *Lake Pontchartrain*,—Memphis was created upon a marsh reclaimed by the dyke of Menes and drained by his artificial lake. *New Orleans* is situated on the left bank of the Mississippi, about 90 miles from its mouth, and is protected against inundation by an embankment 15 feet wide and 4 feet high, which extends from 120 miles above the city to 40 miles below it. *Lake Pontchartrain* affords a natural drain for the marshes that form the margin of the city upon the east. The dyke of Menes began 12 miles south of Memphis, and deflected the main channel of the river about two miles to the eastward. Upon the

The Sphinx and Pyramids at Memphis.

rise of the Nile, a canal still conducted a portion of its waters westward through the old channel, thus irrigating the plain beyond the city in that direction, while an inundation was guarded against on that side by a large artificial lake or reservoir at *Abousir*. The skill in engineering which these works required, and which their remains still indicate, argues a high degree of material civilization, at least in the mechanic arts, in the earliest known period of Egyptian history.

The political sagacity of Menes appears in the location of his capital where it would at once command the Delta and hold the key of upper Egypt, controlling the commerce of the Nile, defended upon the west by the Libyan mountains and desert, and on the east by the river and its artificial embankments. The climate of Memphis may be inferred from that of the modern Cairo—about 10 miles to the north—which is the most equable that Egypt affords. The city is said to have had a circumference of about 19 miles (Diod. Sic. i. 50), and

the houses or inhabited quarters, as was usual in the great cities of antiquity, were interspersed with numerous gardens and public areas.

Herodotus states, on the authority of the priests, that Menes "built the temple of *Hephestus*, which stands within the city, a vast edifice, well worthy of mention" (ii. 99). The divinity whom Herodotus thus identifies with *Hephestus* was *Ptah*, "the creative power, the maker of all material things" (Wilkinson in Rawlinson's *Herod.* ii. 289; Bunsen, *Egypt's Place*, i. 367, 384). *Ptah* was worshipped in all Egypt, but under different representations in different Nomes: ordinarily "as a god holding before him with both hands the *Nilometer*, or emblem of stability, combined with the sign of life" (Bunsen, i. 382). But at Memphis his worship was so prominent that the primitive sanctuary of his temple was built by Menes; successive monarchs greatly enlarged and beautified the structure, by the addition of courts, porches, and colossal ornaments. Herodotus and *Diodorus*

describe several of these additions and restorations, but nowhere give a complete description of the temple with measurements of its various dimensions (Herod. ii. 99, 101, 108-110, 121, 136, 153, 176; Diod. Sic. i. 45, 51, 62, 67). According to these authorities, Moeris built the northern gateway; Sesostris erected in front of the temple colossal statues (varying from 30 to 50 feet in height) of himself, his wife, and his four sons; Rhampsinitus built the western gateway, and erected before it the colossal statues of Summer and Winter; Asychis built the eastern gateway, which "in size and beauty far surpassed the other three;" Psammetichus built the southern gateway; and Amosis presented to this temple "a recumbent colossus 75 feet long, and two upright statues, each 20 feet high." The period between Menes and Amosis, according to Brugsch, was 3731 years; but according to Wilkinson only about 2100 years; but upon either calculation, the temple as it appeared to Strabo was the growth of many centuries. Strabo (xvii. 807) describes this temple as "built in a very sumptuous manner, both as regards the size of the Naos and in other respects." The Dromos, or grand avenue leading to the temple of Ptah, was used for the celebration of bull-fights, a sport pictured in the tombs. But these fights were probably between animals alone — no captive or gladiator being compelled to enter the arena. The bulls having been trained for the occasion, were brought face to face and goaded on by their masters; — the prize being awarded to the owner of the victor. But though the bull was thus used for the sport of the people, he was the sacred animal of Memphis.

Apis was believed to be an incarnation of Osiris. The sacred bull was selected by certain outward symbols of the indwelling divinity; his color being black, with the exception of white spots of a peculiar shape upon his forehead and right side. The temple of Apis was one of the most noted structures of Memphis. It stood opposite the southern portico of the temple of Ptah; and Psammetichus, who built that gateway, also erected in front of the sanctuary of Apis a magnificent colonnade, supported by colossal statues or Osiride pillars, such as may still be seen at the temple of Medenet Habou at Thebes (Herod. ii. 153). Through this colonnade the Apis was led with great pomp upon state occasions. Two stables adjoined the sacred vestibule (Strab. xvii. 807). Diodorus (i. 85) describes the magnificence with which a deceased Apis was interred and his successor installed at Memphis. The place appropriated to the burial of the sacred bulls was a gallery some 2000 feet in length by 20 in height and width, hewn in the rock without the city. This gallery was divided into numerous recesses upon each side; and the embalmed bodies of the sacred bulls, each in its own sarcophagus of granite, were deposited in these "sepulchral stalls." A few years since, this burial-place of the sacred bulls was discovered by M. Mariette, and a large number of the sarcophagi have already been opened. These catacombs of mummied bulls were approached from Memphis by a paved road, having colossal lions upon either side.

At Memphis was the reputed burial-place of Isis (Diod. Sic. i. 22); it had also a temple to that "myriad-named" divinity, which Herodotus (ii. 176) describes as "a vast structure, well worthy of notice," but inferior to that consecrated to her in Busiris, a chief city of her worship (ii. 59). Memphis had also its Serapeium, which probably stood

in the western quarter of the city, toward the desert; since Strabo describes it as very much exposed to sand-drifts, and in his time partly buried by masses of sand heaped up by the wind (xvii. 807). The sacred cubit and other symbols used in measuring the rise of the Nile were deposited in the temple of Serapis.

Herodotus describes "a beautiful and richly ornamented inclosure," situated upon the south side of the temple of Ptah, which was sacred to Proteus, a native Memphite king. Within this inclosure there was a temple to "the foreign Venus" (Astarte?), concerning which the historian narrates a myth connected with the Grecian Helen. In this inclosure was "the Tyrian camp" (ii. 112). A temple of Ra or Phre, the Sun, and a temple of the Cabeiri, complete the enumeration of the sacred buildings of Memphis.

The mythological system of the time of Menes is ascribed by Bunsen to "the amalgamation of the religion of Upper and Lower Egypt;" — religion: having "already united the two provinces before the power of the race of This in the Thebaid extended itself to Memphis, and before the giant work of Menes converted the Delta from a desert, checkered over with lakes and morasses, into a blooming garden." The political union of the two divisions of the country was effected by the builder of Memphis. "Menes founded the *Empire of Egypt*, by raising the people who inhabited the valley of the Nile from a little provincial station to that of an historical nation" (*Egypt's Place*, i. 441, ii. 409).

The Necropolis, adjacent to Memphis, was on a scale of grandeur corresponding with the city itself. The "city of the pyramids" is a title of Memphis in the hieroglyphics upon the monuments. The great field or plain of the Pyramids lies wholly upon the western bank of the Nile, and extends from *Abou-Roûsh*, a little to the northwest of Cairo, to *Meydoom*, about 40 miles to the south, and thence in a southwesterly direction about 25 miles further, to the pyramids of *Houara* and of *Bihmû* in the *Fayoua*. Lepsius computes the number of pyramids in this district at sixty-seven; but in this he counts some that are quite small, and others of a doubtful character. Not more than half this number can be fairly identified upon the whole field. But the principal seat of the pyramids, the Memphite Necropolis, was in a range of about 15 miles from *Sakkara* to *Gizeh*, and in the groups here remaining nearly thirty are probably tombs of the imperial sovereigns of Memphis (Bunsen, *Egypt's Place*, ii. 88). Lepsius regards the "Pyramid fields of Memphis" as a most important testimony to the civilization of Egypt (*Letters*, Bohn, p. 25; also *Chronologie der Aegypter*, vol. i.). These royal pyramids, with the subterranean halls of Apis, and numerous tombs of public officers erected on the plain or excavated in the adjacent hills, gave to Memphis the preëminence which it enjoyed as "the haven of the blessed."

Memphis long held its place as a capital; and for centuries a Memphite dynasty ruled over all Egypt. Lepsius, Bunsen, and Brugsch, agree in regarding the 3d, 4th, 6th, 7th, and 8th dynasties of the Old Empire as Memphite, reaching through a period of about a thousand years. During a portion of this period, however, the chain was broken, or there were contemporaneous dynasties in other parts of Egypt.

The overthrow of Memphis was distinctly predicted by the Hebrew prophets. In his "burden

of Egypt," Isaiah says, "The princes of Zoan are become fools, the princes of Noph are deceived" (Is. xix. 13). Jeremiah (xvi. 19) declares that "Noph shall be waste and desolate without an inhabitant." Ezekiel predicts: "Thus saith the Lord God: I will also destroy the idols, and I will cause [their] images to cease out of Noph; and there shall be no more a prince of the land of Egypt." The latest of these predictions was uttered nearly 600 years before Christ, and half a century before the invasion of Egypt by Cambyzes (cir. B. C. 525). Herodotus informs us that Cambyzes, enraged at the opposition he encountered at Memphis, committed many outrages upon the city. He killed the sacred Apis, and caused his priests to be scourged. "He opened the ancient sepulchres, and examined the bodies that were buried in them. He likewise went into the temple of Hephæstus (Ptah) and made great sport of the image. . . . He went also into the temple of the Cabeiri, which it is unlawful for any one to enter except the priests, and not only made sport of the images but even burnt them" (Her. iii. 37). Memphis never recovered from the blow inflicted by Cambyzes. The rise of Alexandria hastened its decline. The Caliph conquerors founded Fostat (Old Cairo) upon the opposite bank of the Nile, a few miles north of Memphis, and brought materials from the old city to build their new capital (A. D. 638). The Arabian physician, Abd-el-Latif, who visited Memphis in the 13th century, describes its ruins as then marvelous beyond description (see De Sacy's translation, cited by Brugsch, *Histoire d'Égypte*, p. 18). Abulfeda, in the 14th century, speaks of the remains of Memphis as immense; for the most part in a state of decay, though some sculptures of variegated stone still retained a remarkable freshness of color (*Descriptio Ægypti*, ed. Michaelis, 1776). At length so complete was the ruin of Memphis, that for a long time its very site was lost. Pococke could find no trace of it. Recent explorations, especially those of Messrs. Mariette and Linant, have brought to light many of its antiquities, which have been dispersed to the museums of Europe and America. Some specimens of sculpture from Memphis adorn the Egyptian hall of the British Museum; other monuments of this great city are in the Abbott Museum in New York. The dykes and canals of Menes still form the basis of the system of irrigation for Lower Egypt; the insignificant village of Meet Raheeneh occupies nearly the centre of the ancient capital. Thus the site and the general outlines of Memphis are nearly restored; but "the images have ceased out of Noph, and it is desolate, without inhabitant."

J. P. T.

\* In the six years which have elapsed since the preceding article was written, much has been brought to light concerning the antiquities of Memphis, both by exploration and by discussion, and there is hardly a point in the topography or the history of the city which remains in obscurity. The illustrated work of Mariette-Bey, embodying the results of his excavations, when completed, will restore the first capital of Egypt, in great part, to its original grandeur.

Memphis appears upon the monuments under three distinct names: the first its name as the capital of the corresponding *Nome* or district; the second its profane, and the third its sacred name. The first, *Sebt-h'et*, is literally "the City of White Walls" — a name originally given to

the citadel (*Herodotus*, iii. c. 91), and especially to that part of the fortifications within which was inclosed the temple of the chief divinity of the city. Osiris is sometimes styled "the great king in the chief city of the Nome of the white walls."

The second, which was the more common name of the city, *Men-nefir*, signifies literally *mañsic bona*. Brugsch regards the commonly-received analogy of this with the *Moph* or *Noph* of the Hebrew Scriptures as of slight authority, and prefers to identify *Noph* with *Edfu*, which appears in the hieroglyphics under the form of "the city of *Nepu* or *Nup*" (*Geograph. Inschriften*, i. 166 and 235).

The sacred name of the city was *Ha-ptah* or *Pa-ptah*, "the House or City of Ptah" — *Hephestopolis*.

Another name frequently given to Memphis on the monuments is *Tapanch*; this was particularly applied to the sacred quarter of the goddess *Bast*, and signifies "the World of Life." Brugsch traces here a resemblance to the second clause in the surname of Joseph given by Pharaoh (Gen. xli. 45), which the LXX. render by *φανήχ*. Brugsch reads this title as equivalent to *ns pen-ta-panch*, which means "this is the Governor of *Tapanch*," Joseph being thus invested with authority over that sacred quarter of the capital, and bearing from it the title "Lord of the World of Life."

The royal grandeur of Memphis is attested by the groups of pyramids that mark the burial-place of her lines of kings; but a rich discovery has now brought to light a consecutive list of her sovereigns in almost unbroken continuity from Menes. This is the "New Table of Abydos" which Mariette-Bey came upon in 1865, in the course of his explorations at that primitive seat of monarchy, and which Dimichen has faithfully reproduced in his work. Inscriptions upon the great temple of Abydos show that this was erected by Sethos I. and further ornamented by his son, who is known in history as the second Rameses. Upon one lobby of the temple Sethos and Rameses are depicted as rendering homage to the Gods; and in the inscription appear 130 proper names of divinities, together with the names of the places where these divinities were particularly worshipped. Upon the opposite lobby the same persons, the king and his son, are represented in the act of homage to their royal predecessors, and an almost perfect list is given, embracing seventy-six kings from Menes to Sethos. This discovery has important bearings upon the chronology of the Egyptian Pharaonic dynasties. There are now four monumental lists of kings which serve for comparison with the lists of Manetho and the Turin Papyrus: (1.) The Tablet of Karnak, on which Tuthmosis III. appears sacrificing to his predecessors, sixty-one of whom are represented by their portraits and names. (2.) The Tablet of Abydos, now in the British Museum, which represents Rameses-Sesothis receiving congratulations from his royal predecessors, fifty in number. (3.) The Tablet of Saqqarah, discovered by Mariette in 1864, in a private tomb in the necropolis of Memphis, which represents a royal scribe in the act of adoration before a row of fifty-eight royal cartouches. (4.) The new Tablet of Abydos described above. When these four monumental lists are tabulated with one another, and with the lists of Manetho and the Turin Papyrus, the correspondences of names and dynasties are so many and so minute as to prove that they all stand related to

some traditional series of kings which was of common authority. Their variations may be owing in part to diversities of reading, and in part to a preference for particular kings or lists of kings in contemporary dynasties; so that while, in some instances, contemporary dynasties have been drawn upon by different authorities, no Tablet incorporates contemporary dynasties into one. Now, since the date of Sethos I. falls within the fifteenth century, B. C., it is obvious that to allow for a succession of seventy-six Memphite kings from Menes to Sethos I., and for the growth of the mechanic arts and the national resources up to the point indicated at the consolidation of the empire under Menes, the received Biblical chronology between the Flood and the Exodus must be somewhat extended. We await some more definite determination of the Hyksos period, as a fixed point of calculation for the preceding dynasties. Bunsen (vol. v. pp. 58, 77, and 103) fixes the era of Menes at 3059 B. C. — "the beginning of chronological time in Egypt, by the settlement of the system of the vague solar year;" this is a reduction of about 600 years, for in vol. iv. p. 490, he placed Menes at 3623 B. C., and he also demanded at least 6000 years before Menes, for the settlement of Egypt and the development of a national life. This, however, is not history but conjecture; but the new Table of Abydos is a tangible scale of history. (For a comparison of these several tablets, see the *Revue Archéologique*, 1864 and 1865, Rougé, *Recherches sur les Monuments Historiques*, and Dümichen, *Zeitschrift für Ägypt. Sprache*, 1864.) J. P. T.

**MEMUCAN** (מִמֻּעַן) [a Persian title]: Μουμυκανος: *Mamuchan*). One of the seven princes of Persia in the reign of Ahasuerus, who "saw the king's face," and sat first in the kingdom (Esth. i. 14). They were "wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state; Josephus says that one of their offices was that of interpreting the laws (*Ant.* xi. 6, § 1). This may also be inferred from the manner in which the royal question is put to them when assembled in council; "According to law what is to be done with the queen Vashti?" Memucan was either the president of the council on this occasion, or gave his opinion first in consequence of his acknowledged wisdom, or from the respect allowed to his advanced age. Whatever may have been the cause of this priority, his sentence for Vashti's disgrace was approved by the king and princes, and at once put into execution; "and the king did according to the word of Memucan" (Esth. i. 16, 21). The Targum of Esther identifies him with "Haman the grandson of Agag." The reading of the *Cethib*, or written text, in ver. 16 is מִמֻּעַן. W. A. W.

**MEN'AHM** (מְנַחֵם) [*consoler*, whence MANAEN, Acts xiii. 1]: Μαναήμ; [Alex. Μαναην, etc. in ver. 14:] *Manahem*), son of Gadi, who <sup>a</sup> slew the usurper Shallum and seized the vacant throne

of Israel, B. C. 772. His reign, which lasted ten years, is briefly recorded in 2 K. xv. 14-22. It has been inferred from the expression in verse 14, "from Tirzah," that Menahem was a general under Zechariah stationed at Tirzah, and that he brought up his troops to Samaria and avenged the murder of his master by Shallum (*Joseph. Ant.* ix. 11, § 1; Keil, *Thenius*).

In religion Menahem was a steadfast adherent of the form of idolatry established in Israel by Jeroboam. His general character is described by Josephus as rude and exceedingly cruel. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralization, and feebleness of Israel; and Ewald adds to their testimony some doubtful references to Isaiah and Zechariah.

In the brief history of Menahem, his ferocious treatment of Tiphshah occupies a conspicuous place. The time of the occurrence, and the site of the town have been doubted. Keil says that it can be no other place than the remote Thapsacus on the Euphrates, the northeast boundary (1 K. iv. 24) of Solomon's dominions; and certainly no other place bearing the name is mentioned in the Bible. Others suppose that it may have been some town which Menahem took in his way as he went from Tirzah to win a crown in Samaria (Ewald); or that it is a transcriber's error for Tappuah (*Josh.* xvii. 8), and that Menahem laid it waste when he returned from Samaria to Tirzah (Theinus). No sufficient reason appears for having recourse to such conjectures where the plain text presents no insuperable difficulty. The act, whether perpetrated at the beginning of Menahem's reign or somewhat later, was doubtless intended to strike terror into the hearts of reluctant subjects throughout the whole extent of dominion which he claimed. A precedent for such cruelty might be found in the border wars between Syria and Israel, 2 K. viii. 12. It is a striking sign of the increasing degradation of the land, that a king of Israel practices upon his subjects a brutality from the mere suggestion of which the unscrupulous Syrian usurper recoiled with indignation.

But the most remarkable event in Menahem's reign is the first appearance of a hostile force of Assyrians on the northeast frontier of Israel. King Pul, however, withdrew, having been converted from an enemy into an ally by a timely gift of 1000 talents of silver, which Menahem exacted by an assessment of 50 shekels a head on 60,000 Israelites. It seems perhaps too much to infer from 1 Chr. v. 26, that Pul also took away Israelite captives. The name of Pul (LXX. Phaloch or Phalos) appears according to Rawlinson (*Bampton Lectures* for 1859, Lect. iv. p. 133) in an Assyrian inscription of a Ninevite king, as Phalukha, who took tribute from Beth Khumri (= the house of Omri = Samaria) as well as from Tyre, Sidon, Damascus, Idumaea, and Philistia; the king of Damascus is set down as giving 2300 talents of silver besides gold and copper, but neither the name of Menahem, nor the

<sup>a</sup> Ewald (*Gesch. Isr.* iii. 598), following the LXX., would translate the latter part of 2 K. xv. 10, "And Kobolam (or Keblaam) smote him and slew him, and reigned in his stead." Ewald considers the fact of such a king's existence a help to the interpretation of Zech. xi. 8; and he accounts for the silence of Scripture as to his end by saying that he may have thrown himself across the Jordan, and disappeared

among the subjects of king Uzziiah. It does not appear, however, how such a translation can be made to agree with the subsequent mention (ver. 13) of Shallum, and with the express ascription of Shallum's death (ver. 14) to Menahem. Theinus excuses the translation of the LXX. by supposing that their MSS. may have been in a defective state, but ridicules the theory of Ewald.

amount of his tribute is stated in the inscription. Rawlinson also says that in another inscription the name of Menahem is given, probably by mistake of the stone-cutter, as a tributary of Tiglath-pileser.

Menahem died in peace, and was succeeded by his son Pekahiah.

W. T. B.

\* **ME'NAM**, the reading of the A. V. ed. 1611 and other early eds. in Luke iii. 31 for **MENAN**, which see. A.

**ME'NAN** (Μεννά; [Rec. Text, Μαῖναν; Tisch. Treg. with Sin. BLX Μεννά; Lachm. Μεννά in brackets (A omits it); Erasmus, Ald., Gerbelius, Colinaeus, Μενάμ, whence the reading **MENAM**, A. V. ed. 1611; Bogardus (1543), Μενάν, like A. V. in later editions:] *Menna*). The son of Mattatha, one of the ancestors of Joseph in the genealogy of Jesus Christ (Luke iii. 31). This name and the following Melea are omitted in some Latin MSS., and are believed by Ld. A. Hervey to be corrupt (*Genealogies*, p. 88).

**MENE** (מנע: Μανή, Theodot.: *Mane*). The first word of the mysterious inscription written upon the wall of Belshazzar's palace, in which Daniel read the doom of the king and his dynasty (Dan. v. 25, 26). It is the Peal past participle of the Chaldee ܡܢܥܐ, *menâh*, "to number," and therefore signifies "numbered," as in Daniel's interpretation, "God hath numbered (ܡܢܥܐ, *menâh*) thy kingdom and finished it." W. A. W.

**MENELA'US** (Μενέλαος), a usurping high-priest who obtained the office from Antiochus Epiphanes (cir. n. c. 172) by a large bribe (2 Macc. iv. 23-25), and drove out Jason, who had obtained it not long before by similar means. When he neglected to pay the sum which he had promised, he was summoned to the king's presence, and by plundering the Temple gained the means of silencing the accusations which were brought against him. By a similar sacrilege he secured himself against the consequences of an insurrection which his tyranny had excited, and also procured the death of Onias (vv. 27-34). He was afterwards hard pressed by Jason, who, taking occasion from his unpopularity, attempted unsuccessfully to recover the high-priesthood (2 Macc. v. 5-10). For a time he then disappears from the history (yet comp. ver. 23), out at last he met with a violent death at the hands of Antiochus Eupator (cir. b. c. 163), which seemed in a peculiar manner a providential punishment of his sacrilege (xiii. 3, 4).

According to Josephus (*Ant.* xii. 5, § 1) he was a younger brother of Jason and Onias, and, like Jason, changed his proper name Onias for a Greek name. In 2 Maccabees, on the other hand, he is called a brother of Simon the Benjamite (2 Macc. iv. 23), whose treason led to the first attempt to plunder the Temple. If this account be correct, the profanation of the sacred office was the more marked by the fact that it was transferred from the family of Aaron. B. F. W.

**MENESTHEUS** [3 syl.] (Μενεσθεός; Alex. Μενεσθεος.: *Mnestheus*). The father of **APOLONIUS** 3 (2 Macc. iv. 21).

α Κληροί της τύχης και του δαιμονος σημαίνουσιν ελπίον τε και ζελήγηνη. The order of the words here seems to favor the received reading of the LXX.;

**ME'NI**. The last clause of Is. lxx 11 is rendered in the A. V. "and that furnish the drink-

offering unto that number" (מני), the marginal reading for the last word being "Meni." That the word so rendered is a proper name, and also the proper name of an object of idolatrous worship cultivated by the Jews in Babylon, is a supposition which there seems no reason to question, as it is in accordance with the context, and has every probability to recommend it. But the identification of Meni with any known heathen god is still uncertain. The versions are at variance. In the LXX. the word is rendered η τύχη, "fortune" or "luck." The old Latin version of the clause is "impleti demoni potionem;" while Symmachus (as quoted by Jerome) must have had a different reading, מני: *mini*, "without me," which Jerome interprets as signifying that the act of worship implied in the drink-offering was not performed for God, but for the daemon ("ut doceat non sibi fieri sed demoni"). The Targum of Jonathan is very vague—"and mingle cups for their idols;" and the Syriac translators either omit the word altogether, or had a different reading, perhaps למב, *lámô*, "for them." Some variation of the same kind apparently gave rise to the *super eam* of the Vulgate, referring to the "table" mentioned in the first clause of the verse. From the old versions we come to the commentators, and their judgments are equally conflicting. Jerome (*Comm. in Is.* lxx. 11) illustrates the passage by reference to an ancient idolatrous custom which prevailed in Egypt, and especially at Alexandria, on the last day of the last month of the year, of placing a table covered with dishes of various kinds, and a cup mixed with mead, in acknowledgment of the fertility of the past year, or as an omen of that which was to come (comp. Virg. *Æn.* ii. 763). But he gives no clew to the identification of Meni, and his explanation is evidently suggested by the renderings of the LXX. and the old Latin version; the former, as he quotes them, translating *Gad* by "fortune," and *Meni* by "daemon," in which they are followed by the latter. In the later mythology of Egypt, as we learn from Macrobius (*Saturn.* i. 19), *Δαίμων* and *Τύχη* were two of the four deities who presided over birth, and represented respectively the Sun and Moon. A passage quoted by Selden (*de Dis Syris, Synt.* i. c. 1) from a MS. of Vettius Valens of Antioch, an ancient astrologer, goes also to prove that in the astrological language of his day the sun and moon were indicated by *δαίμων* and *τύχη*, as being the arbiters of human destiny.<sup>a</sup> This circumstance, coupled with the similarity between *Meni* and *Μήν* or *Μήνη*, the ancient name for the moon, has induced the majority of commentators to conclude that *Meni* is the Moon god or goddess, the *Deus Lunus*, or *Dea Luna* of the Romans; masculine as regards the earth which she illuminates (*terre maritus*), feminine with respect to the sun (*Solis uxor*), from whom she receives her light. This twofold character of the moon is thought by David Millius to be indicated in the two names *Gad* and *Meni*, the former feminine, the latter masculine (*Diss.* v. § 23); but as both are mascu-

while the reading given by Jerome is supported by the fact that, in Gen. xxx. 11, מני, *gad*, is rendered *τύχη*.

ine in Hebrew, his speculation falls to the ground. Le Moyno, on the other hand, regarded both words as denoting the sun, and his double worship among the Egyptians: *Gad* is then the goat of Mendes, and *Meni* = Mnevis worshipped at Heliopolis. The opinion of Huetius that the *Meni* of Isaiah and the *Mην* of Strabo (xii. c. 31) both denoted the sun was refuted by Vitringa and others. Among those who have interpreted the word literally "number," may be reckoned Jarchi and Abarbanel, who understand by it the "number" of the priests who formed the company of revelers at the feast, and later Hoheisel (*Obs. ad diffic. Jes. loca*, p. 349) followed in the same track. Kimchi, in his note on Is. lxx. 11. says of *Meni*, "it is a star, and some interpret it of the stars which are numbered, and they are the seven stars of motion," i. e. the planets. Buxtorf (*Lex. Hebr.*) applies it to the "number" of the stars which were worshipped as gods; Schindler (*Lex. Pentagl.*) to "the number and multitude" of the idols, while according to others it refers to "Mercury the god of numbers;" all which are mere conjectures, *quot homines, tot sententiae*, and take their origin from the play upon the word *Meni*, which is found in the verse next following that in which it occurs ("therefore will I number (יִמְנֶנִּי, *ámánithí*) you to the sword"), and which is supposed to point to its derivation from the verb מָנָה, *mánáh*, to number. But the origin of the name of Noah, as given in Gen. v. 29,<sup>a</sup> shows that such plays upon words are not to be depended upon as the bases of etymology. On the supposition, however, that in this case the etymology of *Meni* is really indicated, its meaning is still uncertain. Those who understand by it the moon, derive an argument for their theory from the fact, that anciently years were numbered by the courses of the moon. But Gesenius (*Comm. üb. d. Jesaia*), with more probability, while admitting the same origin of the word, gives to the root *mánáh* the sense of assigning, or distributing,<sup>b</sup> and connects it with *manáh*,<sup>c</sup> one of the three idols worshipped by the Arabs before the time of Mohammed, to which reference is made in the Koran (Sura 53), "What think ye of Allat, and Al-Uzzah, and *Manah*, that other third goddess?" *Manah* was the object of worship of "the tribes of *Hudheyl* and *Khuzá'ah*, who dwelt between Mekkeh and El-Medeeneh, and as some say, of the tribes of Ows, El-Khazraj, and Thakeek also. This idol was a large stone, demolished by one Saad, in the 8th year of the Flight, a year so fatal to the idols of Arabia" (Lane's *Sel. from the Kur an*, pref. pp. 30, 31, from Pococke's *Spec. Hist. Ar.* p. 93, ed. White). But Al-Zamakshari, the commentator on the Koran, derives *Manah* from the root مَنَى, "to flow," because of the blood which flowed at the sacrifices to this idol, or, as Millius

explains it, because the ancient idea of the moon was that it was a star full of moisture, with which it filled the sublunary regions.<sup>d</sup> The etymology given by Gesenius is more probable; and *Meni* would then be the personification of fate or destiny, under whatever form it was worshipped.<sup>e</sup> Whether this form, as Gesenius maintains, was the planet Venus, which was known to Arabic astrologers as "the lesser good fortune" (the planet Jupiter being the "greater"), it is impossible to say with certainty; nor is it safe to reason from the worship of *Manah* by the Arabs in the times before Mohammed to that of *Meni* by the Jews more than a thousand years earlier. But the coincidence is remarkable, though the identification may be incomplete. W. A. W.

\* MEN-PLEASERS (ἀνθρωπάρεσκοι) is a word which came into use with Tyndale's translation (Ep. vi. 6; Col. iii. 22). It is like "easervice" in this respect, which occurs in the same passages. H.

\* MENU'CHAH (מְנוּחָה) ἀπό Νουά: Alex. and Vulg. translate freely) in Judg. xx. 43 has been regarded by some critics as the name of a place, and is put as such in the margin of the A. V., but in the text is rendered "with ease." First takes it to be the same as Manahath in 1 Chr. viii. 6, whence the patronymic Manabethites, 1 Chr. ii. 54. If a town be meant, it was in the tribe of Benjamin, and on the line of the retreat of the Benjamites before the other tribes at the siege of Gibeah (comp. Judg. xx. 41 ff.). It is held to be a proper name in Luther's version. But the word has more probably its ordinary signification: either "with ease" (literally "quiet" as the opposite of toil, trouble), with reference to the almost unresisted victory of the other tribes over the panic-stricken Benjamites; or "place of rest," i. e. in every such place where the men of Benjamin halted for a moment, their pursuers fell upon them and trampled them to pieces (חֲרִירֵי יַרְוֵהוּ), like grapes in the wine-press.

It should be said that the name reappears in the margin of the A. V., Jer. li. 59: "Seraiah was a prince of Menucha, or chief chamberlain," where the text reads "was a quiet prince." The Bishops' Bible (connecting the word with the previous verb) translates "chased them diligently" or (margin) "from their rest." On the whole, it appears to the writer not easy to discover any better sense than that suggested in the A. V. H.

MEONENIM, THE PLAIN OF (מְנוּנִים)

מְנוּנִים [see below]: [Vat.] Ηλωνμαωνενιμ; [Rom.] Ηλωνμαωνενιμ; Alex. and Aquila, δρεδς αποβλεπορτων: *quæ respicit quercum*, an oak, or terebinth, or other great tree — for the translation of the Hebrew *Elon* by "plain" is most probably incorrect, as will be shown under the head of

<sup>a</sup> "And he called his name Noah (נֹחַ), saying, this one shall comfort us," etc. (נַחַחְנוּ, *yénachá-nénú*). Yet no one would derive נֹחַ *nách*, from נָחַח, *nácham*. The play on the word may be retained without detriment to the sense if we render *Meni* "destiny," and the following clause, "therefore will I testify you for the sword."

<sup>b</sup> Like the Arab. مَنَى, *mana*, whence مَنَا, "death," مَنِيَّة, "fate," "destiny." <sup>c</sup> مَنَاة. <sup>d</sup> — "The moist star Upon whose influence Neptune's empire stands." SHAKESP. *Ham.* l. 1. <sup>e</sup> The presence of the article seems to indicate that "Meni" was originally an appellative.

PLAIN — which formed a well-known object in central Palestine in the days of the Judges. It is mentioned — at least under this name — only in Judg. ix. 37, where Gaal ben-Ebed standing in the gateway of Shechem sees the ambushes of Abimelech coming towards the city, one by the middle [literally, “navel”] of the land, and another “by the way (מִן־הַדֶּרֶךְ) of Elon-Meonenim,” that is, the road leading to it. In what direction it stood with regard to the town we are not told.

The meaning of Meonenim, if interpreted as a Hebrew word, is enchanters,<sup>a</sup> or “observers of times,” as it is elsewhere rendered (Deut. xviii. 10, 14; in Mic. v. 12 it is “soothsayers”). This connection of the name with magical arts has led to the suggestion<sup>b</sup> that the tree in question is identical with that beneath which Jacob hid the foreign idols and amulets of his household, before going into the presence of God at the consecrated ground of Bethel (Gen. xxxv. 4). But the inference seems hardly a sound one, for *meonenim* does not mean “enchantments” but “enchanters,” nor is there any ground for connecting it in any way with amulets or images; and there is the positive reason against the identification that while this tree seems to have been at a distance from the town of Shechem, that of Jacob was in it, or in very close proximity to it (the Hebrew particle used is עַם, which implies this).

Five trees are mentioned in connection with Shechem: —

1. The oak (not “plain” as in A. V.) of Moreh, where Abram made his first halt and built his first altar in the Promised Land (Gen. xii. 6).
2. That of Jacob, already spoken of.
3. “The oak which was in the holy place of Jehovah” (Josh. xxiv. 26), beneath which Joshua set up the stone which he assured the people had heard all his words, and would one day witness against them.
4. The Elon-Muttsab, or “oak (not ‘plain,’ as in A. V.) of the pillar in Shechem,” beneath which Abimelech was made king (Judg. ix. 6).
5. The Elon-Meonenim.

The first two of these may, with great probability, be identical. The second, third, and fourth, agree in being all specified as in or close to the town. Joshua’s is mentioned with the definite article — “the oak” — as if well known previously. It is therefore possible that it was Jacob’s tree, or its successor. And it seems further possible that during the confusions which prevailed in the country after Joshua’s death, the stone which he had erected beneath it, and which he invested, even though only in metaphor, with qualities so like those which the Canaanites attributed to the stones they worshipped — that during these confused times this famous block may have become sacred among the Canaanites, one of their “mattebahs” [see IDOL, vol. ii. p. 1119 *b*], and thus the tree have acquired the name of “the oak of Muttsab” from the fetish below it.

<sup>a</sup> Gesenius (*Thes.* 51 *b*), *incantatores* and *Zauberer*; *diehælis* and *Fürst*, *Wahrsager*. The root of the word is עָנַן, probably connected with עַי, the eye, which bears so prominent a part in Eastern magic. Of this there is a trace in the *respicit* of the Vulgate. (See *Thesen.* *Thes.* 1072, 1053; also *DIVINATION*, vol. i. pp. 216, 607.)

That Jacob’s oak and Joshua’s oak were the same tree seems still more likely, when we observe the remarkable correspondence between the circumstances of each occurrence. The point of Joshua’s address — his summary of the early history of the nation — is that they should “put away the foreign gods which were among them, and incline their hearts to Jehovah the God of Israel.” Except in the mention of Jehovah, who had not revealed Himself till the Exodus, the words are all but identical with those in which Jacob had addressed his followers; and it seems almost impossible not to believe that the coincidence was intentional on Joshua’s part, and that such an allusion to a well-known passage in the life of their forefather, and which had occurred on the very spot where they were standing, must have come home with peculiar force to his hearers.

But while four of these were thus probably one and the same tree, the oak of Meonenim for the reasons stated above seems to have been a distinct one.

It is perhaps possible that Meonenim may have originally been Maonim, that is Maonites or Mehunim; a tribe or nation of non-Israelites elsewhere mentioned. If so it furnishes an interesting trace of the presence at some early period of that tribe in Central Palestine, of which others have been noticed in the case of the Ammonites, Avites, Zemarites, etc. [See vol. i. p. 277, note *b*.] G.

MEON’OTHAI [4 syl.] מְעוֹנוֹתַי [*my dwellings*, Ges.: see Fürst]: *Mavaθi*; [Vat. *Mavaθei*; Comp. *Mawaθei*:] *Maonathi*. One of the sons of Othniel, the younger brother of Caleb (1 Chr. iv. 14). In the text as it now stands there is probably an omission, and the true reading of vv. 13 and 14 should be, as the Vulgate and the Complutensian edition of the LXX. give it, “and the sons of Othniel, Hathath and *Meonothai*; and Meonothai begat Ophrah.” It is not clear whether this last phrase implies that he founded the town of Ophrah or not: the usage of the word “father” in the sense of “founder” is not uncommon.

MEPHA’ATH (מֵפְחָאֵת) [*height*, Fürst; *beauty*, Ges.]: in Chron. and Jerem. מֵפִיעֵת; in the latter the *Cethib*, or original text, has מופעת: *Μαυφααθ*; Alex.<sup>c</sup> *Μηφααθ*: *Mephaath*, *Mephaat*, a city of the Reubenites, one of the towns dependent on Heshbon (Josh. xiii. 18), lying in the district of the Mishor (comp. 17, and Jer. xlvi. 21, A. V. “plain”), which probably answered to the modern *Belka*. It was one of the cities allotted with their suburbs to the Merarite Levites (Josh. xxi. 37; 1 Chr. vi. 79; the former does not exist in the Rec. Hebr. Text). At the time of the conquest it was no doubt, like Heshbon, in the hands of the Amorites (Num. xxi. 26), but when Jeremiah delivered his denunciations it had been recovered by its original possessors, the Moabites (xlviii. 21).

Mephaath is named in the above passages with

<sup>b</sup> See Stanley, *S. & P.*, p. 142.

<sup>c</sup> The name is given in the LXX. as follows: Josh. xiii. 18, *Μαυφααθ*, Alex. *Μηφααθ*; xxi. 37, *την Μαφᾶ* Alex. *τ. Μαφᾶ*; 1 Chr. vi. 79, *την Μαεφᾶ*, Alex. *τ. Φααθ*; Jer. xlviii. (xxx.) 21, *Μωφᾶς*, Alex. *Νωφᾶ* [? *Μωφᾶθ*, according to Baber].

Dibon, Jahazah, Kirjathaim, and other towns, which have been identified with tolerable certainty on the north of the Arnon (*Wady Mujeb*); but no one appears yet to have discovered any name at all resembling it, and it must remain for the further investigation of those interesting and comparatively unrotten districts. In the time of Eusebius (*Onomast.* Μηφῶθ) it was used as a military post for keeping in check the wandering tribes of the desert, which surrounded, as it still surrounds, the cultivated land of this district.

The extended, and possibly later, form of the name which occurs in Chronicles and Jeremiah, as *f Mei Phaaith*, "waters of Phaaith," may be, as in other cases, an attempt to fix an intelligible meaning on an archaic or foreign word. G.

**MEPHIBOSHETH** (מִיפְּיֹשֶׁתַי) [per. *id.* exterminator, Sim., Ges.; but see Fürst] *Μεμφιβοσθῆ*; [Alex. *Μεμφιβοσθαί*, exc. 2 Sam. ix. 11, 13;] Joseph. *Μεμφιβοσθος*: *Miphibosheth*), the name borne by two members of the family of Saul — his son and his grandson.

The name itself is perhaps worth a brief consideration. Bosheth appears to have been a favorite appellation in Saul's family, for it forms a part of the names of no fewer than three members of it — Ish-bosheth and the two Mephibosheths. But in the genealogies preserved in 1 Chronicles these names are given in the different forms of Esh-baal and Merib-baal. The variation is identical with that of Jerub-baal and Jerub-besheth, and is in accordance with passages in Jeremiah (xi. 13) and Hosea (ix. 10), where Baal and Bosheth<sup>a</sup> appear to be convertible, or at least related, terms, the latter being used as a contemptuous or derisive synonym of the former. One inference from this would be that the persons in question were originally<sup>b</sup> named Baal; that this appears in the two fragments of the family records preserved in Chronicles; but that in Samuel the hateful heathen name has been uniformly erased, and the nickname Bosheth substituted for it. It is some support to this to find that Saul had an ancestor named BAAL, who appears in the lists of Chronicles only (1 Chr. viii. 30, ix. 36). But such a change in the record supposes an amount of editing and interpolation which would hardly have been accomplished without leaving more obvious traces, in reasons given

<sup>a</sup> Translated in A. V. "shame."

<sup>b</sup> Some of the ancient Greek versions of the Hexapla give the name in Samuel as Memphi-baal (see Bahrdt's *Hexapla*, pp. 594, 599, 614). Also Procopius *Gazæus*, *Scholion* on 2 Sam. xvi. No trace of this, however, appears in any MS. of the Hebrew text.

<sup>c</sup> There is no doubt about this being the real meaning

of the word מַחֲרִיץ, translated here and in Num. xxv. 4 "hanged up." (See Michaelis's *Supplement*, No. 1046; also Gesenius, *Thes.* 620; and Fürst, *Handwb.* 539.) Aquila has ἀναρτήσασθε, understanding them to have been not crucified but impaled. The Vulgate reads *crucifixerunt* (ver. 9), and *qui affixi fuerant* (13).

The Hebrew term מַחֲרִיץ is entirely distinct from מַחֲרִיץ, also rendered "to hang" in the A. V., which is its real signification. It is this latter word which is employed in the story of the five kings at Makkedah; in the account of the indignities practiced on Saul's body, 2 Sam. xxi. 12, on Baanah and Rechab by David, 2 Sam. iv. 12; and elsewhere

<sup>d</sup> This follows from the statement that they hung *from* barley harvest (April) till the commencement of

for the change, etc. How different it is, for example, from the case of Jerub-besheth, where the alteration is mentioned and commented on. Still the facts are as above stated, whatever explanation may be given of them.

1. Saul's son by Rizpah the daughter of Aiab, his concubine (2 Sam. xxi. 8). He and his brother Armoni were among the seven victims who were surrendered by David to the Gibeonites, and by them crucified<sup>e</sup> in sacrifice to Jehovah, to avert a famine from which the country was suffering. The seven corpses, protected by the tender care of the mother of Mephibosheth from the attacks of bird and beast, were exposed on their crosses to the fierce sun<sup>f</sup> at least five of the midsummer months, on the sacred eminence of Gibeah. At the end of that time the attention of David was called to the circumstance, and also possibly to the fact that the sacrifice had failed in its purpose. A different method was tried: the bones of Saul and Jonathan were disinterred from their resting-place at the foot of the great tree at Jabesh-Gilead, the blanched and withered remains of Mephibosheth, his brother, and his five relatives, were taken down from the crosses, and father, son, and grandsons found at last a resting-place together in the ancestral cave of Kish at Zelah. When this had been done, "God was entreated for the land," and the famine ceased. [RIZPAH.]

2. The son of Jonathan, grandson of Saul, and nephew of the preceding.

1. His life seems to have been, from beginning to end, one of trial and discomfort. The name of his mother is unknown. There is reason to think that she died shortly after his birth, and that he was an only child. At any rate we know for certain that when his father and grandfather were slain on Gilboa he was an infant of but five years old. He was then living under the charge of his nurse, probably at Gibeah, the regular residence of Saul. The tidings that the army was destroyed, the king and his sons slain, and that the Philistines, spreading from hill to hill of the country, were sweeping all before them, reached the royal household. The nurse fled, carrying the child on her shoulder.<sup>g</sup> But in her panic and hurry she stumbled, and Mephibosheth was precipitated to the ground with such force as to deprive him for life of the use of both feet (2 Sam. iv. 4). These early misfor-

the rains (October); but it is also worthy of notice that the LXX. have employed the word ἐξηλιάσειν, "to expose to the sun." It is also remarkable that on the only other occasion on which this Hebrew term is used — Num. xxv. 4 — an express command was given that the victims should be crucified "in front of the sun."

<sup>e</sup> This is the statement of Josephus — ἀπὸ τῶν ὤμων (*Ant.* vii. 5, § 5); but it is hardly necessary, for in the East children are always carried on the shoulder. See the woodcut in Lane's *Mod. Egyptians*, ch. 1 p. 52.

<sup>f</sup> It is a remarkable thing, and very characteristic of the simplicity and unconsciousness of these ancient records, of which the late Professor Blunt has happily illustrated so many other instances, that this information concerning Mephibosheth's childhood, which contains the key to his whole history, is inserted, almost as if by accident, in the midst of the narrative of his uncle's death, with no apparent reason for the insertion, or connection between the two, further than that of their being relatives and having somewhat similar names.

tunes threw a shade over his whole life, and his personal deformity — as is often the case where it has been the result of accident — seems to have exercised a depressing and depreciatory influence on his character. He can never forget that he is a poor lame slave (2 Sam. xix. 26), and unable to walk: a dead dog (ix. 8); that all the house of his father were dead (ix. 28); that the king is an angel of God (*ib.* 27), and he his a'bject dependent (ix. 6, 8). He receives the slanders of Ziba and the harshness of David alike with a submissive equanimity which is quite touching, and which effectually wins our sympathy.

2. After the accident which thus embittered his whole existence, Mephibosheth was carried with the rest of his family beyond the Jordan to the mountains of Gilead, where he found a refuge in the house of Machir ben-Ammiel, a powerful Gadite or Manassite sheykh at Lo-debar, not far from Mahanaim, which during the reign of his uncle Ishbosheth was the head-quarters of his family. By Machir he was brought up (*Jos. Ant.* vii. 5, § 5), there he married, and there he was living at a later period, when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to claims of other and hardly less pressing descriptions. The solemn oath which he had sworn to the father of Mephibosheth at their critical interview by the stone Ezel, that he "would not cut off his kindness from the house of Jonathan for ever: no! not when Jehovah had cut off the enemies of David each one from the face of the earth" (1 Sam. xx. 15); and again, that "Jehovah should be between Jonathan's seed and his seed for ever" (ver. 42), was naturally the first thing that occurred to him, and he eagerly inquired who was left of the house of Saul, that he might show kindness to him for Jonathan's sake (2 Sam. ix. 1). So completely had the family of the late king vanished from the western side of Jordan, that the only person to be met with in any way related to them was one ZIBA, formerly a slave of the royal house, but now a freed man, with a family of fifteen sons, who by arts which, from the glimpse we subsequently have of his character, are not difficult to understand, must have acquired considerable substance, since he was possessed of an establishment of twenty slaves of his own. [ZIBA.] From this man David learnt of the existence of Mephibosheth. Royal messengers were sent to the house of Machir at Lo-debar in the mountains of Gilead, and by them the prince and his infant son MICHA were brought to Jerusalem. The interview with David was marked by extreme kindness on the part of the king, and on that of Mephibosheth by the fear and humility which has been pointed out as characteristic of him. He leaves the royal presence with all the property of his grandfather restored to him, and with the whole family and establishment of Ziba as his slaves, to cultivate the land and harvest the produce. He himself is to be a daily guest at David's table. From this time forward he resided at Jerusalem.

<sup>a</sup> The word used both in xvi. 1, 2, and xix. 26, is רֶמֶשׁ, *i. e.* the strong he-ass, a farm animal, as opposed to the she-ass, more commonly used for riding. For the first see ISSACHAR, vol. ii. p. 1180 *a*; for the second, ELSHA, vol. i. p. 717 *a*.

<sup>b</sup> The same mourning as David for his child (xii. 10).

<sup>c</sup> A singular Jewish tradition is preserved by Jerome

3. An interval of about seventeen years: *ow p. 1880.* and the crisis of David's life arrives. Of Mephibosheth's behavior on this occasion we possess two accounts — his own (2 Sam. xix. 24-30), and that of Ziba (xvi. 1-4). They are naturally at variance with each other. (1.) Ziba meets the king on his flight at the most opportune moment, just as David has undergone the most trying part of that trying day's journey, has taken the last look at the city so peculiarly his own, and completed the hot and toilsome ascent of the Mount of Olives. He is on foot, and is in want of relief and refreshment. The relief and refreshment are there. There stand a couple of strong he-asses ready saddled for the king or his household to make the descent upon; and there are bread, grapes, melons, and a skin of wine; and there — the donor of these welcome gifts — is Ziba, with respect in his look and sympathy on his tongue. Of course the whole, though offered as Ziba's, is the property of Mephibosheth. the asses are his, one of them his own <sup>a</sup> riding animal: the fruits are from his gardens and orchards. But why is not their owner here in person? Where is the "son of Saul"? He, says Ziba, is in Jerusalem, waiting to receive from the nation the throne of his grandfather, that throne from which he has been so long unjustly excluded. It must be confessed that the tale at first sight is a most plausible one, and that the answer of David is no more than was to be expected. So the base ingratitude of Mephibosheth is requited with the ruin he deserves, while the loyalty and thoughtful courtesy of Ziba are rewarded by the possessions of his master, thus once more reinstating him in the position from which he had been so rudely thrust on Mephibosheth's arrival in Judah. (2.) Mephibosheth's story — which, however, he had not the opportunity of telling until several days later, when he met David returning to his kingdom at the western bank of Jordan — was very different to [from] Ziba's. He had been desirous to fly with his patron and benefactor, and had ordered Ziba to make ready his ass that he might join the cortège. But Ziba had deceived him, had left him, and not returned with the asses. In his helpless condition he had no alternative, when once the opportunity of accompanying David was lost, but to remain where he was. The swift pursuit which had been made after Ahimaaz and Jonathan (2 Sam. xvii.) had shown what risks even a strong and able man must run who would try to follow the king. But all that he could do under the circumstances he had done. He had gone into the deepest mourning possible <sup>b</sup> for his lost friend. From the very day that David left he had allowed his beard to grow ragged, his crippled feet were unwashed <sup>c</sup> and untended, his linen remained unchanged. That David did not disbelieve this story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole

in his *Querst. Heb.* on this passage, to the effect that the correct reading of the Hebrew is not "undressed," but rather "ill-made" — *non illotis pedibus, sed pedibus infertis* — alluding to false wooden feet which he was accustomed to wear. The Hebrew word — the same to both feet and beard, though rendered in A. V. "dressed" and "trimmed" — is רָמַדְתִּי, answering to our word "done."

ransaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Shall then any man be put to death this day?" is the key-note of the whole proceeding. Ziba probably was a rascal, who had done his best to injure an innocent and helpless man: but the king had passed his word that no one was to be made unhappy on this joyful day; and so Mephibosheth, who believed himself ruined, has half his property restored to him, while Ziba is better off than he was before the king's flight, and far better off than he deserved to be.

4. The writer is aware that this is not the view generally taken of Mephibosheth's conduct, and in particular the opposite side has been maintained with much cogency and ingenuity by the late Professor Blunt in his *Undesigned Coincidences* (part ii. § 17). But when the circumstances on both sides are weighed, there seems to be no escape from the conclusion come to above. Mephibosheth could have had nothing to hope for from the revolution. It was not a mere anarchical scramble in which all had equal chances of coming to the top, but a civil war between two parties, led by two individuals, Absalom on one side, David on the other. From Absalom, who had made no vow to Jonathan, it is obvious that he had nothing to hope. Moreover, the struggle was entirely confined to the tribe of Judah, and, at the period with which alone we are concerned, to the chief city of Judah. What chance could a Benjamite have had there? — more especially one whose very claim was his descent from a man known only to the people of Judah as having for years hunted their darling David through the hills and woods of his native tribe; least of all when that Benjamite was a poor, nervous, timid cripple, as opposed to Absalom, the handsomest, readiest, and most popular man in the country. Again, Mephibosheth's story is throughout valid and consistent. Every tie, both of interest and of gratitude, combined to keep him faithful to David's cause. As not merely lame, but deprived of the use of both feet, he must have been entirely dependent on his ass and his servant: a position which Ziba showed that he completely appreciated by not only making off himself, but taking the asses and their equipments with him. Of the impossibility of flight, after the king and the troops had gone, we have already spoken. Lastly, we have, not his own statement, but that of the historian, to the fact that he commenced his mourning, not when his supposed designs on the throne proved futile, but on the very day of David's departure (xix. 24).

So much for Mephibosheth. Ziba, on the other hand, had everything to gain and nothing to lose by any turn affairs might take. As a Benjamite and an old adherent of Saul all his tendencies must have been hostile to David. It was David, moreover, who had thrust him down from his independent position, and brought himself and his fifteen sons back into the bondage from which they had before escaped, and from which they could now be delivered only by the fall of Mephibosheth. He had thus every reason to wish his master out of the way, and human nature must be different to what it is if we can believe that either his good offices to David or his accusation of Mephibosheth was the result of anything but calculation and interest.

With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is most natural — at any rate it is quite allow-

able — to suppose that, in the interval of eight years which elapsed between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him.

\* The arguments which favor the side of Mephibosheth on this question of veracity between him and Ziba are somewhat fully stated above. It is due to an impartial view of the case to mention also some of the considerations on the other side, to which the reader's attention has not been called. Josephus supports this view, which was probably prevalent among the Jews of his day. Jerome names it as the early Christian tradition; and modern commentators (Henry, Jamieson, Kitto, and others) urge the same opinion. No tradition, of course, reaches back to the period, and any inference is legitimate which is fairly deducible from the record itself. We offer a few considerations to balance some of the preceding.

(1.) The relation of Ziba to Mephibosheth could not have been degrading and trying. It would have been a poor return for the information which enabled the king to reach the object of his favor, to inflict an injury on the informer. In delegating to an old servant of Saul the care of his late royal master's grandson with his restored estate — making him the steward of his property and (in his helplessness) the virtual guardian of his person, David conferred an honorable trust, and placed Ziba in a more important post than he occupied before. The novel suggestion that the king "rudely thrust" him from a better position, and that he harbored rancor as one who had been "thrust down" and "brought into bondage" from which he sought escape, has no apparent basis.

(2.) The open kindness which Ziba rendered king David was not only most opportune, but was also bestowed at an hour when there was no prospect of reward, if it did not even involve some risk. He could not have reasonably anticipated that the monarch, in his own extremity, would confiscate his master's estate (against whom he volunteered no charge) and announce its transfer to himself. If, withal, what was "offered as Ziba's" was "the property of Mephibosheth," would not the king know it? And would the servant be so presuming if the fact were so patent? And what is there in all his conduct to countenance the conjecture of "tendencies hostile to David"?

(3.) It would be natural for Mephibosheth (as David's ready credence shows) to imagine that dissension in the royal family and civil war might result in bringing him to the throne. As between David and Absalom, he had nothing to hope from the latter and much from the former; but this deadly breach between them may have awakened hopes of his own — and these failing, the counter-charge against Ziba would be the natural cover and defense of his course, if the charge of the latter were true.

(4.) The proposal of Mephibosheth, when half the estate was restored to him, to allow Ziba to keep the whole — a token of his indifference to property, from genuine joy at his benefactor's safe return — will not, of itself, mislead any one who is familiar with eastern phrases and professions of friendship. The speech was purely oriental — as was Ziba's previous acknowledgment.

(5.) Aside from the charge of Mephibosheth,

made in self-exculpation, the character of Ziba is unimpeached, and there is no indication that David withdrew his confidence from him.

(6.) The final award of David is far more reconcilable with his belief of Mephibosheth's guilt, than of Ziba's. To pity the son of Jonathan, in his abject destitution, and permit him to retain half of his forfeited possessions, would accord with David's known magnanimity and befit his day of triumph. "The key-note of the whole proceeding," to which Mr. Grove properly refers, is certainly not less in harmony with this construction than with the other. It would be the reverse of magnanimous, and positively wrong, to reward the "treachery" of Ziba, and permit him to hold half of his master's estate as the fruit of falsehood and fraud of which he had been convicted. Nothing could justify or excuse this decision but the innocence of Ziba, or doubt in the king's mind between the conflicting stories — which is a possible supposition.

(7.) The argument of Prof. Blunt (see above) based on the omission of Mephibosheth's name from the dying messages of David, is not fully met by the suggestion that the former may have died "in the interval of eight years" — though known to be living some four years after (2 Sam. xxi. 1, 7) — for even if he were dead, he had left a son and grandsons (1 Chron. viii. 34, 35) and David's covenant with Jonathan pledged him to protect his offspring "for ever." If Mephibosheth proved faithful when rebellion was rife, whether he were now living or dead, it would be difficult to account for the omission of any allusion to this tender trust in the parting charge to Solomon. It is to be noted, moreover, that on his return to the capital David appears simply to have forgiven Mephibosheth and remitted half the penalty of confiscation. There is no evidence that from this time the latter was a guest at the royal table as he had been before.

In view of this difference of opinion between writers on the subject, and in the absence of all evidence in the premises except that of the unsupported testimony of the parties at variance, our conclusion is that we cannot safely pronounce either of them "a rascal" — though it is evident enough that there was rascality between them. S. W.

**MERAB** (מֶרַב) [*increase, growth*]: מֶרַב, Alex. also Μερᾶβ; Joseph. Μερῶβη; *Merob*), the eldest daughter, possibly the eldest child, of King Saul (1 Sam. xiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (1 Sam. xviii. 2), and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engagement with Goliath (xvii. 25), Saul betrothed Merab to David (xviii. 17), but it is evidently implied that one object of thus rewarding his valor was to incite him to further feats, which might at last lead to his death by the Philistines. David's hesitation looks as if he did not much value the honor — at any rate before the marriage Merab's younger sister Michal had displayed her attachment for David, and Merab was then married to Adriel the Me-

holathite, who seems to have been one of the wealthy sheikhs of the eastern part of Palestine, with whom the house of Saul always maintained an alliance. To Adriel she bore five sons, who formed five of the seven members of the house of Saul who were given up to the Gibeonites by David, and by them crucified to Jehovah on the sacred hill of Gibeah (2 Sam. xxi. 8). [RIZPAH.]

The Authorized Version of this last passage is an accommodation. The Hebrew text has "the five sons of Michal, daughter of Saul, which she bare to Adriel" [in the A. V. "whom she brought up for Adriel"], and this is followed in the LXX. and Vulgate. The Targum explains the discrepancy thus: "The five sons of Merab (which Michal, Saul's daughter, brought up) which she bare," etc. The Peshito substitutes Merab (in the present state of the text "Nadab") for Michal. J. H. Michaelis, in his Hebrew Bible (2 Sam. xxi. 10), suggests that there were two daughters of Saul named Michal, as there were two Elishamas and two Eliphalets among David's sons. Probably the most feasible solution of the difficulty is that "Michal" is the mistake of a transcriber for "Merab." But if so it is manifest from the agreement of the versions and of Josephus (*Ant.* vii. 4, § 30) with the present text, that the error is one of very ancient date.

Is it not possible that there is a connection between Merab's name and that of her nephew MERIB-BAL, or Mephibosheth as he is ordinarily called? G.

**MERAIAH** [3 syl.] (מֵרַיָּה) [*rebellion, obstinacy*, Ges.]: 'Αμαρία; [Vat. Μαρεα:] FA. Μαρεα: *Maravia*). A priest in the days of Joiakim, the son of Jeshua. He was one of the "heads of the fathers," and representative of the priestly family of Seraiiah, to which Ezra belonged (Neh. xii. 12). The reading of the LXX. — 'Αμαρία, is supported by the Peshito-Syriac.

**MERATOTH** [3 syl.] (מֵרַתֹּת) [*rebellions, contumacies*]: Μαρήλ, [Vat. Μαρεηλ,] in 1 Chr. vi. 6, 7, 52; Μαρεῖδθ, [Vat. Μαρωθ,] 1 Chr. ix. 11; Μαρεῖθ, [Vat. Μαρερωθ,] Ezr. vii. 3; Μαρεῖθ, Neh. xi. 11; Alex. Μαρωθ, 1 Chr. vi. 6, 7, Ezr. vii. 3; Μερωθ, 1 Chr. vi. 52; Μαρωθ, 1 Chr. ix. 11, Neh. xi. 11; *Meraioth*, except 1 Chr. ix. 11, Ezr. vii. 3, *Maraioth*). 1. A descendant of Eleazar the son of Aaron, and head of a priestly house. It was thought by Lightfoot that he was the immediate predecessor of Eli in the office of high-priest, and that at his death the high-priesthood changed from the line of Eleazar to the line of Ithamar (*Temple Service*, iv. § 1). Among his illustrious descendants were Zadok and Ezra. He is called elsewhere MEREMOTH (1 Esdr. vii. 2), and MARI-MOTH (2 Esdr. i. 2). It is apparently another Meraioth who comes in between Zadok and Ahitub in the genealogy of Azariah (1 Chr. ix. 11, Neh. xi. 11), unless the names Ahitub and Meraioth are transposed, which is not improbable.

2. (Μαρεῖθ; [Vat. Alex. FA. omit:] *Maraioth*.) The head of one of the houses of priests, which in the time of Joiakim the son of Jeshua was represented by Helkai (Neh. xii. 15). He is else-

<sup>2</sup> The omission of the name in the LXX. is remarkable. In the Vatican Codex it occurs in 1 Sam. xiv. 49 only. The Alexandrine MS. omits it there, and inserts it in xviii. 17 and 19.

<sup>b</sup> \* Keil decides (*Bibl. Comm. üb. das A. T.* in loc.)

that Michal in the present text must be an error of memory or a copyist's mistake. H. A. Perret-Gentil substitutes Merab for Michal in his version published by the Société Biblique Protestante de Paris (1866).

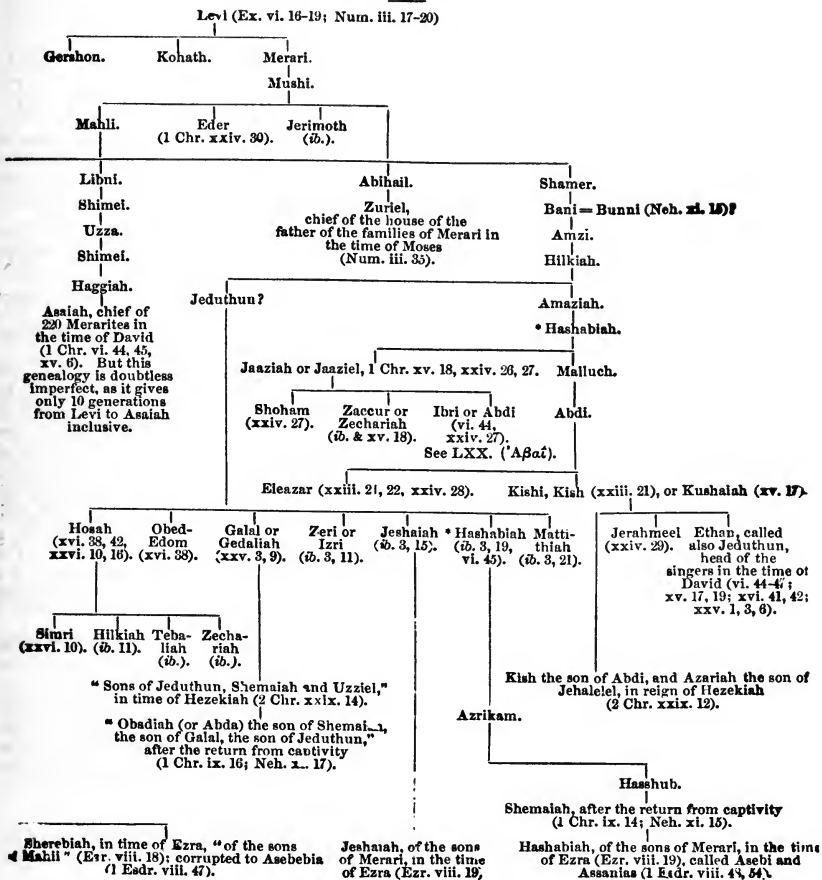

where called MEREMOTH (Neh. xii 7), a confusion being made between the letters מ and מ. The Peshito-Syriac has *Marmuth* in both passages.  
W. A. W.

**ME'RAN** (Μερράν: *Merrha*). The merchants of Meran and Theman are mentioned with the Hagarenes (Bar. iii. 23) as "searchers out of understanding." The name does not occur elsewhere, and is probably a corruption of "Medan" or "Midian." Junius and Tremellius give *Medanaei*, and their conjecture is supported by the appearance of the Midianites as nomade merchants in Gen. xxxvii. Both Medan and Midian are enumerated among the sons of Keturah in Gen. xxv. 2, and are closely connected with the Dedanim, whose "travelling companies," or caravans, are frequently alluded to (Is. xxi. 13; Ez. xxvii. 15). Fritzsche suggests that it is the *Marane* of Pliny (vi. 28, 32).  
W. A. W.

**MERA'RI** (מֵרָרִי) [*unhappy, sorrowful, or, my sorrow, i. e. his mother's*]: Μεραρι; [Vat. Μεραπει, Meppapei, and once Μαπαπει; Alex. sometimes Μεπαπει: *Merari*], third son of Levi,

and head of the third great division (מֵרָרִי וְאֶתְנָחֵם וְאֶתְרַחֵם) of the Levites, THE MERARITES, whose designation in Hebrew is the same as that of their progenitor, only with the article prefixed, namely, מֵרָרִי וְאֶתְנָחֵם וְאֶתְרַחֵם. Of Merari's personal history, beyond the fact of his birth before the descent of Jacob into Egypt, and of his being one of the seventy who accompanied Jacob thither, we know nothing whatever (Gen. xvi. 8, 11). At the time of the Exodus, and the numbering in the wilderness, the Merarites consisted of two families, the Mahlites and the Mushites, Mabli and Mushi being either the two sons, or the son and grandson, of Merari (1 Chr. vi. 19, 47). Their chief at that time was Zuriel, and the whole number of the family, from a month old and upwards, was 6,200; those from 30 years old to 50 were 3,200. Their charge was the boards, bars, pillars, sockets, pins, and cords of the tabernacle and the court, and all the tools connected with setting them up. In the encampment their place was to the north of the tabernacle; and both they and the Gershonites were "under the hand" of Ithamar the son of Aaron. Owing to the heavy

TABLE OF THE MERARITES.

nature of the materials which they had to carry, four wagons and eight oxen were assigned to them; and in the march both they and the Gershonites followed immediately after the standard of Judah, and before that of Reuben, that they might set up the Tabernacle against the arrival of the Kohathites (Num. iii. 20, 33-37, iv. 29-33, 42-45, vii. 8, x. 17, 21). In the division of the land by Joshua, the Merarites had twelve cities assigned to them, out of Reuben, Gad, and Zebulun, of which one was Ramoth-Gilead, a city of refuge, and in later times a frequent subject of war between Israel and Syria (Josh. xxi. 7, 34-40; <sup>a</sup> 1 Chr. vi. 63, 77-81). In the time of David Asaiah was their chief, and assisted with 220 of his family in bringing up the ark (1 Chr. xv. 6). Afterwards we find the Merarites still sharing with the two other Levitical families the various functions of their caste (1 Chr. xxiii. 6, 21-23). Thus a third part of the singers and musicians were Merarites, and Ethan or Jeduthun was their chief in the time of David.

[JEDUTHUN.] A third part of the door-keepers were Merarites (1 Chr. xxiii. 5, 6, xxvi. 10, 19), unless indeed we are to understand from ver. 19 that the doorkeepers were all either Kohathites or Merarites, to the exclusion of the Gershonites, which does not seem probable. In the days of Hezekiah the Merarites were still flourishing, and Kish the son of Abdi, and Azariah the son of Jehalelel, took their part with their brethren of the two other Levitical families in promoting the reformation, and purifying the house of the Lord (2 Chr. xxix. 12, 15). After the return from captivity Shemaiah represents the sons of Merari, in 1 Chr. ix. 14, Neh. xi. 15, and is said, with other chiefs of the Levites, to have "had the oversight of the outward business of the house of God." There were also at that time sons of Jeduthun under Obadiah or Abda, the son of Shemaiah (1 Chr. ix. 16; Neh. xi. 17). A little later again, in the time of Ezra, when he was in great want of Levites to accompany him on his journey from Babylon to Jerusalem, "a man of good understanding of the sons of Mahli" was found, whose name, if the text here and at ver. 24 is correct, is not given. "Jeshaiiah also of the sons of Merari," with twenty of his sons and brethren, came with him at the same time (Ezr. viii. 18, 19). But it seems pretty certain that Sherebiah, in ver. 18, is the name of the Mahlite, and that both he and Hashabiah, as well as Jeshaiiah, in ver. 19, were Levites of the family of Merari, and not, as the actual text of ver. 24 indicates, priests. The copulative  $\wedge$  has fallen out before their names in ver. 24, as appears from ver. 30 (see also 1 Chr. ix. 14; Neh. xii. 24).

The preceding table gives the principal descents, as far as it is possible to ascertain them. But the true position of Jaaziah, Mahli, and Jeduthun is doubtful. Here too, as elsewhere, it is difficult to decide when a given name indicates an individual, and when the family called after him, or the head of that family. It is sometimes no less difficult to decide whether any name which occurs repeatedly designates the same person, or others of the family who bore the same name, as *e. g.* in the case of Mahli, Hilkiah, Shimri, Kishi or Kish, and others. As regards the confusion between Ethan and Jedu-

thun, it may perhaps be that Jeduthun was the patronymic title of the house of which Ethan was the head in the time of David. Jeduthun might have been the brother of one of Ethan's direct ancestors before Hashabiah, in which case Hashabiah in 1 Chr. xxv. 3, 19 might be the same as Hashabiah in vi. 45. Hosah and Obad-edom seem to have been other descendants or clansmen of Jeduthun, who lived in the time of David; and if we may argue from the names of Hosah's sons, Simri and Hilkiah, that they were descendants of Shamer and Hilkiah, in the line of Ethan, the inference would be that Jeduthun was a son either of Hilkiah or Amaziah, since he lived after Hilkiah, but before Hashabiah. The great advantage of this supposition is, that while it leaves to Ethan the patronymic designation Jeduthun, it draws a wide distinction between the term "sons of Jeduthun" and "sons of Ethan," and explains how in David's time there could be sons of those who are called sons of Jeduthun above thirty years of age (since they filled offices, 1 Chr. xxvi. 10), at the same time that Jeduthun was said to be the chief of the singers. In like manner it is possible that Jaaziah may have been a brother of Malluch or of Abdi, and that if Abdi or Ibri had other descendants besides the lines of Kish and Eleazar, they may have been reckoned under the headship of Jaaziah. The families of Merari which were so reckoned were, according to 1 Chr. xxiv. 27, Shoham, Zaaccur (apparently the same as Zechariah in 1 Chr. xv. 12, where we probably ought to read "Z. son of Jaaziah," and xxvi. 11), and Ibri, where the LXX. have  $\nu\beta\delta\acute{\iota}$ ,  $\lambda\beta\alpha\acute{\iota}$ , and  $\lambda\beta\delta\acute{\iota}$ . A. C. H.

2. (Μεραρί; [Vat. Μεραρεί; Sin.] Alex. in Jud. viii. 1, Μεραρεί; [Sin. in xvi. 7, Μαραρεί:] Merari.) The father of Judith (Jud. viii. 1, xvi. 7).

\* MERA'RITES (מְרָרִי: Μεραρί, Vat. -pei: Merariæ), descendants of Merari, Num. xxvi. 57. [MERARI 1.] A.

MERATHA'IM, THE LAND OF (מְרָתַיִם; מֵרָתַיִם: terra dominantium), that is, of double rebellion (a dual form from the root מָרָה; Gesenius, *Thees.* p. 819 a; Fürst, *Hdwb.* p. 791 b), alluding to the country of the Chaldeans, and to the double captivity which it had inflicted on the nation of Israel (Jer. 1. 21). This is the opinion of Gesenius, Fürst, Michaelis (*Bibel für Ungelehrten*), etc., and in this sense the word is taken by all the versions which the writer has consulted, excepting that of Junius and Tremellius, which the A. V. — as in other instances — has followed here. The LXX., ἐπι τῆς γῆς, λέγει κύριος. πικρῶς ἐπιβῆθι, etc., take the root in its second sense of "bitter." G.

MERCURIUS (Ἑρμῆς: Mercurius), [Acta xiv. 12,] properly Hermes, the Greek deity, whom the Romans identified with their Mercury the god of commerce and bargains. In the Greek mythology Hermes was the son of Zeus and Maia the daughter of Atlas, and is constantly represented as the companion of his father in his wanderings upon earth. On one of these occasions they were trav-

<sup>a</sup> Their cities were Jokneam, Kartah, Dimnah, Nabala<sup>1</sup>, in Zebulun; Bezer, Jahazah, Kedemoth, Mephasch, in Reuben; Ramoth, Mahanaim, Heshbon,

and Jazer, in Gad. But in 1 Chr. vi., instead of the four in Zebulun, only Rimmon and Tabor are named though the total is given as twelve in ver. 63

ing in Phrygia, and were refused hospitality by all save Baucis and Philemon, the two aged peasants of whom Ovid tells the charming episode in his *Metam.* viii. 620-724, which appears to have formed part of the folk-lore of Asia Minor, and strikingly illustrates the readiness with which the simple people of Lystra recognized in Barnabas and Paul the gods who, according to their wont, had come down in the likeness of men (Acts xiv. 11). They called Paul "Hermea, because he was the chief speaker," identifying in him as they supposed by this characteristic, the herald of the gods (Hom. *Od.* v. 28; *Hym. in Herm.* p. 3), and of Zeus (*Od.* i. 38, 84; *Il.* xxiv. 333, 461), the eloquent orator (*Od.* i. 86; *Hor.* *Od.* i. 10, 1), inventor of letters, music, and the arts. He was usually represented as a slender beardless youth, but in an older Pelasgic figure he was bearded. Whether St. Paul wore a beard or not is not to be inferred from this, for the men of Lystra identified him with their god Hermes, not from any accidental resemblance in figure or appearance to the statues of that deity, but because of the act of healing which had been done upon the man who was lame from his birth. [JUPITER, Amer. ed.] W. A. W.

**MERCY-SEAT** (מִסְפָּה): *ἰλαστήριον: propitiatorium*). This appears to have been merely the lid of the Ark of the Covenant, not another surface affixed thereto. It was that whereon the blood of the yearly atonement was sprinkled by the high-priest; and in this relation it is doubtful whether the sense of the word in the Hebrew is based on the material fact of its "covering" the Ark, or from this notion of its reference to the "covering" (*i. e.* atonement) of sin. But in any case the notion of a "seat," as conveyed by the name in English, seems superfluous and likely to mislead. Jehovah is indeed spoken of as "dwelling" and even as "sitting" (Ps. lxxx. 1, xcix. 1) between the cherubim, but undoubtedly his seat in this conception would not be on the same level as that on which they stood (Ex. xxv. 18), and an enthronement in the glory above it must be supposed. The idea with which it is connected is not merely that of "mercy," but of formal atonement made for the breach of the covenant (Lev. xvi. 14), which the Ark contained in its material vehicle—the two tables of stone. The communications made to Moses are represented as made "from off the Mercy-Seat that was upon the Ark of the Testimony" (Num. vii. 89; comp. Ex. xxv. 22, xxx. 6); a sublime illustration of the moral relation and responsibility into which the people were by covenant regarded as brought before God. H. H.

**MERED** (מֵרֵד) [*defection, rebellion*]: *Μερωδ* [Vat. *Μερωδ*], 1 Chr. iv. 17; *Μερωδ*, 1 Chr. iv. 18: *Merod*). This name occurs in a fragmentary genealogy in 1 Chr. iv. 17, 18, as that of one of the sons of Ezra. He is there said to have taken to wife BITHIAH the daughter of Pharaoh, who is enumerated by the Rabbins among the nine who entered Paradise (Hottinger, *Smegma Orientale*, p. 315), and in the Targum of R. Jcseph on *Chronicles* is said to have been a proselyte. In the same Targum we find it stated that Caleb the son of Jephunneh, was called Mered because he understood or rebelled against (מֵרֵד) the counsel of the spies, a tradition also recorded by Jarchi. But another and very curious tradition is preserved

in the *Questiones in libr. Paral.*, attributed to Jerome. According to this, Ezra was Amram; his sons Jether and Mered were Aaron and Moses; Ephraim was Eldad, and Jalon Medad. The tradition goes on to say that Moses, after receiving the Law in the desert, enjoined his father to put away his mother because she was his aunt, being the daughter of Levi: that Amram did so, married again, and begat Eldad and Medad. Bithiah, the daughter of Pharaoh, is said, on the same authority, to have been "taken" by Moses, because she forsok idols, and was converted to the worship of the true God. The origin of all this seems to have been the occurrence of the name "Miriam" in 1 Chr. iv. 17, which was referred to Miriam the sister of Moses. Rabbi D. Kimchi would put the first clause of ver. 18 in a parenthesis. He makes Bithiah the daughter of Pharaoh the first wife of Mered, and mother of Miriam, Shammal, and Ishbah; Jehudijah, or "the Jewess," being his second wife. But the whole genealogy is so intricate that it is scarcely possible to unravel it.

W. A. W.

**MEREMOTH** (מֵרְמוֹת) [*heights*]: *Μερεμώθ*, [Vat. *Μερεμωθ*]; Alex. *Μαριμώθ*, Ezr. viii. 33; *Ραμώθ*, Neh. iii. 4; *Μεραμώθ*, Neh. iii. 21: *Meremoth*, [*Marimuth*, *Merimuth*]). 1. Son of Uriah, or Urijah, the priest, of the family of Koz or Hakkoz, the head of the seventh course of priests as established by David. On the return from Babylon the children of Koz were among those priests who were unable to establish their pedigree, and in consequence were put from the priesthood as polluted (Ezr. ii. 61, 62). This probably applied to only one family of the descendants of Koz, for in Ezr. viii. 33, Meremoth is clearly recognized as a priest, and is appointed to weigh and register the gold and silver vessels belonging to the Temple, which Ezra had brought from Babylon, a function which priests and Levites alone were selected to discharge (Ezr. viii. 24-30). In the rebuilding of the wall of Jerusalem under Nehemiah we find Meremoth taking an active part, working between Meshullam and the sons of Hassenah who restored the Fish Gate (Neh. iii. 4), and himself restoring the portion of the Temple wall on which abutted the house of the high-priest Eliashib (Neh. iii. 21). Burrington (*Genealogies*, ii. 154) is inclined to consider the two mentioned in Neh. iii. by the same name as distinct persons, but his reasons do not appear sufficient.

In 1 Esdr. viii. 62, he is called "MARMOTH the son of Iri."

\* The A. V. ed. 1611 follows the Geneva version in reading Merimoth in Neh. iii. 4, 21; comp. MEREMOTH 3 The Bishops' Bible also reads Merimoth in Neh. iii. 21 and xii. 3. A.

2. (*Μερεμώθ*; [Vat. *Ιεραμωθ*; FA. *Χαιεραμωθ*]; *Marimuth*.) A layman of the sons of Bani, who had married a foreign wife after the return from Babylon and put her away at Ezra's bidding (Ezr. x. 36).

3. (*Μεραμώθ*; [Vat. *Αμεραμωθ*; FA. *Εραμωθ*; in xii. 3, Rom. Vat. Alex. FA.<sup>1</sup> omit, FA.<sup>3</sup> *Μαριμωθ*] *Merimuth*.) A priest, or more probably a family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). The latter supposition is more probable, because in Neh. xii. 3 the name occurs, with many others of the same list, among those who went up with Zerubbabel a century

before. In the next generation, that is, in the days of Joiakim the son of Jeshua, the representative of the family of Meremoth was Helkai (Neh. xii. 15), the reading Meraioth in that passage being an error. [MERAIOTH 2.] The A. V. of 1611 had "Merimoth" in Neh. [x. 5 and] xii. 3, like the Geneva version. [MEREMOTH 1.] W. A. W.

**MÉRĒS** (מֶרֶס): [Vat. Alex. F.A. omit; Comp. *Mépes*:] *Mares*. One of the seven counsellors of Ahasuerus king of Persia, "wise men which knew the times" (Esth. i. 14). His name is not traceable in the LXX., which in this passage is corrupt. Benfey (quoted by Gesenius, *Theo. s. v.*) suggests that it is derived from the Sanskrit *mārsha*, "worthy," which is the same as the Zend *meresh*, and is probably also the origin of *Mar-sena*, the name of another Persian counsellor.

W. A. W.

**MERTBAH** (מֶרְיָבָה [*quarrel, strife*]): *λοιδορησις* Ex. xvii. 7; *ἀντιλογία* Num. xx. 13, xxvii. 14; Deut. xxxii. 51; *λοιδορία* Num. xx. 24; *contradictio*. In Ex. xvii. 7 we read, "he called the name of the place Massah and Meribah,"<sup>a</sup> where the people murmured, and the rock was smitten. [For the situation see REPHIDIM.] The name is also given to Kadesh (Num. xx. 13, 24, xxvii. 14; Deut. xxii. 51 ["Meribah-kadesh"]), because there also the people, when in want of water, strove with God. There, however, Moses and Aaron incurred the Divine displeasure because they "believed not," because they "rebelled," and "sanctified not God in the midst" of the people. Impatience and self-willed assumption of plenary power are the prominent features of their behavior in Num. xx. 10; the "speaking to the rock" (which perhaps was to have been in Jehovah's name) was neglected, and another symbol, suggestive rather of themselves as the source of power, was substituted. In spite of these plain and distinctive features of difference between the event at Kadesh and that at Rephidim some commentators have regarded the one as a mere duplicate of the other, owing to a mixture of earlier and later legend.

H. H.

**MERTB-BA'AL** (מֶרְיָבָאֵל, except on its fourth occurrence, and there less accurately מֶרְיָבָעֵל, *i. e.* Meri-baal [*strife against Baal*]), though in many MSS. the fuller form is preserved: *Μερίβααλ*; [in 1 Chr. ix. 40, Vat.] *Μαριββααλ*, [Sin. *Μαριβαλ, Μαριββααλ*]; Alex. *Μεφριβααλ, Μεχριβααλ*; *Meri-baal*], son of Jonathan the son of Saul (1 Chr. viii. 34, ix. 40), doubtless the same person who in the narrative of 2 Samuel is called ΜΕΡΗΙ-ΒΟΣΗΘΗ. The reasons for the identification are, that in the history no other son but Mephibosheth is ascribed to Jonathan; that Mephibosheth, like Merib-baal, had a son named Micah; and that the terms "bosheth" and "baal" appear from other examples (*e. g.* Esh-Baal = Ish-bosheth) to be convertible. What is the significance of the change in the former part of the name, and whether it is more than a clerical error between the two Hebrew letters **ב** and **ו**, does not appear to have been ascertained. It is perhaps in favor

of the latter explanation that in some of the Greek versions of 1 Chr. viii. and ix. the name is given as Memphi-baal. A trace of the same thing is visible in the reading of the Alex. LXX. given above. If it is not a mere error, then there is perhaps some connection between the name of Merib-baal and that of his aunt Merab.

Neither is it clear why this name and that of Ishbosheth should be given in a different form in these genealogies to what they are in the historical narrative. But for this see ISH-BOSHETH and ΜΕΡΗΙ-ΒΟΣΗΘΗ. G.

\* **MERIMOTH** is the reading of the A. V. ed. 1611 in Neh. iii. 4, 21, x. 5, and xii. 3, for which the more correct form, "Meremoth" has been substituted in later editions. [MEREMOTH 1 and 3.] A.

**MERO'DACH** (מֶרֶדָּח [see below]: *Μαιρωδάχ*; [Vat. *Μαιωδακ*; Alex. F.A. *Μεωδαχ*]; *Mero-dach*) is mentioned once only in Scripture, namely, in Jer. l. 2, where Bel and Merodach are coupled together, and threatened with destruction in the fall of Babylon. It has been commonly concluded from this passage that Bel and Merodach were separate gods; but from the Assyrian and Babylonian inscriptions it appears that this was not exactly the case. Merodach was really identical with the famous Babylonian Bel or Belus, the word being probably at first a mere epithet of the god, which by degrees superseded his proper appellation. Still a certain distinction appears to have been maintained between the names. The golden image in the great Temple at Babylon seems to have been worshipped distinctly as Bel rather than Merodach, while other idols of the god may have represented him as Merodach rather than Bel. It is not known what the word Merodach means, or what the special aspect of the god was, when worshipped under that title. In a general way Bel-Merodach may be said to correspond to the Greek Jupiter. He is "the old man of the gods," "the judge," and has the gates of heaven under his especial charge. Nebuchadnezzar calls him "the great lord, the senior of the gods, the most ancient," and Neriglissar "the first-born of the gods, the layer-up of treasures." In the earlier period of Babylonian history he seems to share with several other deities (as Nebo, Nergal, Bel-Nimrod, Anu, etc.) the worship of the people, but in the later times he is regarded as the source of all power and blessings, and thus concentrates in his own person the greater part of that homage and respect which had previously been divided among the various gods of the Pantheon. Astrologically he is identified with the planet Jupiter. His name forms a frequent element in the appellations of Babylonian kings, *e. g.* Merodach-Baladan, Evil-Merodach, Merodach-adin-akhi, etc.; and is found in this position as early as B. C. 1650. (See the *Essay* by Sir H. Rawlinson "On the Religion of the Babylonians and Assyrians," in Rawlinson's *Herodotus*, i. 627-631.) G. R.

**MERO'DACH-BAL'ADAN** (מֶרֶדָּח בַּלְאֲדָן

מֶרֶדָּח בַּלְאֲדָן: *Μαρωδάχ Βαλαδάν*; [Vat. *Μαιωδαχ*; Vat. and Alex. omit *Βαλαδάν*]; *Merodach-Baladan*) is mentioned as king of Babylon in the days of Hezekiah, both in the second book of Kings (xx. 12) and in Isaiah (xxxix. 1). In the former place he is called BERODACH-BALADAN, by the ready interchange of the letters **ב** and **ו**, which

<sup>a</sup> Chiding, or strife, מֶרֶס יְמִיבָה; *πειρασμός* *rei* *λοιδορησις*, also *ἀντιλογία*; marg. "temptation," *Out.* xxxiii. 8.

as familiar to the Jews, as it has been to many other nations. The orthography "Merodach" is, however, to be preferred; since this element in the king's name is undoubtedly identical with the appellation of the famous Babylonian deity, who is always called "Merodach," both by the Hebrews and by the native writers. The name of Merodach-Baladan has been clearly recognized in the Assyrian inscriptions. It appears under the form of Marudachus-Baldanes, or Marudach-Baldan, in a fragment of Polyhistor, preserved by Eusebius (*Chron. Ccn. pars i. v. 1*); and under that of Mardoc-empad (or rather Mardoc-empal<sup>a</sup>) in the famous "Canon of Ptolemy." Josephus abbreviates it still more, and calls the monarch simply "Baladas" (*Ant. Jud. x. 2, § 2*).

The Canon gives Merodach-Baladan (*Mardoc-empad*) a reign of 12 years — from B. C. 721 to B. C. 709 — and makes him *uen* succeeded by a certain Arceanus. Polyhistor assigns him a six months' reign, immediately before Elibus, or Belibus, who (according to the Canon) ascended the throne B. C. 702. It has commonly been seen that these must be two different reigns, and that Merodach-Baladan must therefore have been deposed in B. C. 709, and have recovered his throne in B. C. 702, when he had a second period of dominion lasting half a year. The inscriptions contain express mention of both reigns. Sargon states that in the twelfth year of his own reign he drove Merodach-Baladan out of Babylon, after he had ruled over it for twelve years; and Sennacherib tells us that in his first year he defeated and expelled the same monarch, setting up in his place "a man named Belib." Putting all our notices together, it becomes apparent that Merodach-Baladan was the head of the popular party, which resisted the Assyrian monarchs, and strove to maintain the independence of the country. It is uncertain whether he was self-raised or was the son of a former king. In the second Book of Kings he is styled "the son of Baladan;" but the inscriptions call him "the son of *Yagin*;" whence it is to be presumed that Baladan was a more remote ancestor. *Yagin*, the real father of Merodach-Baladan, is possibly represented in Ptolemy's Canon by the name Jugæus — which in some copies replaces the name Elulæus, as the appellation of the immediate predecessor of Merodach-Baladan. At any rate, from the time of Sargon, Merodach-Baladan and his family were the champions of Babylonian independence and fought with spirit the losing battle of their country. The king of whom we are here treating sustained two contests with the power of Assyria, was twice defeated, and twice compelled to fly his country. His sons, supported by the king of Elam, or Susiana, continued the struggle, and are found among the adversaries of Esar-Haddon, Sennacherib's son and successor. His grandsons contend against *Ashur-bani-pal*, the son of Esar-Haddon. It is not till the fourth generation that the family seems to become extinct, and the Babylonians, having no champion to maintain their cause, contentedly acquiesce in the yoke of the stranger.

There is some doubt as to the time at which Merodach-Baladan sent his ambassadors to Hezekiah, for the purpose of inquiring as to the astronomical marvel of which Judæa had been the scene (2 Chr. xxxii. 31). According to those commentators who connect the illness of Hezekiah with one or other of Sennacherib's expeditions against him, the embassy has to be ascribed to Merodach-Baladan's second or shorter reign, when alone he was contemporary with Sennacherib. If however we may be allowed to adopt the view that Hezekiah's illness preceded the first invasion of Sennacherib by several years (see above, *ad voc. HEZEKIAH*, and compare Rawlinson's *Herodotus*, i. 479, note 2), synchronizing really with an attack of Sargon, we must assign the embassy to Merodach-Baladan's earlier reign, and bring it within the period, B. C. 721-709, which the Canon assigns to him. Now the 14th year of Hezekiah, in which the embassy should fall (2 K. xx. 6; Is. xxxviii. 5), appears to have been B. C. 713. This was the year of Merodach-Baladan's first reign.

The increasing power of Assyria was at this period causing alarm to her neighbors, and the circumstances of the time were such as would tend to draw Judæa and Babylonia together, and to give rise to negotiations between them. The astronomical marvel, whatever it was, which accompanied the recovery of Hezekiah, would doubtless have attracted the attention of the Babylonians; but it was probably rather the pretext than the motive for the formal embassy which the Chaldean king dispatched to Jerusalem on the occasion. The real object of the mission was most likely to effect a league between Babylon, Judæa, and *Egypt* (Is. xx. 5, 6), in order to check the growing power of the Assyrians.<sup>b</sup> Hezekiah's exhibition of "all his precious things" (2 K. xx. 13) would thus have been, not a mere display, but a mode of satisfying the Babylonian ambassadors of his ability to support the expenses of a war. The league, however, though designed, does not seem to have taken effect. Sargon, acquainted probably with the intentions of his adversaries, anticipated them. He sent expeditions both into Syria and Babylonia — seized the stronghold of Ashdod in the one, and completely defeated Merodach-Baladan in the other. That monarch sought safety in flight, and lived for eight years in exile. At last he found an opportunity to return. In B. C. 703 or 702, Babylonia was plunged in anarchy — the Assyrian yoke was thrown off, and various native leaders struggled for the mastery. Under these circumstances the exiled monarch seems to have returned, and recovered his throne. His adversary, Sargon, was dead or dying, and a new and untried prince was about to rule over the Assyrians. He might hope that the reins of government would be held by a weaker hand, and that he might stand his ground against the son, though he had been forced to yield to the father. In this hope, however, he was disappointed. Sennacherib had scarcely established himself on the throne, when he proceeded to engage his people in wars; and it seems that his very first step was to invade the kingdom of Babylon. Merodach-

<sup>a</sup> In the uncial writing  $\Lambda$  is very liable to be mistaken for  $\Delta$ , and in the ordinary manuscript character  $\Lambda$  is not unlike  $\delta$ . M. Bunsen was (we believe) the first to suggest that there had been a substitution of the  $\delta$  for the  $\Lambda$  in this instance. See his work, *Egypt's Place in Universal History*, vcl. i. p. 726, E. T. The

abbreviation of the name has many parallels. (See Rawlinson's *Herodotus*, vol. i. p. 436, note 1.)

<sup>b</sup> Josephus expressly states that Merodach-Baladan sent the ambassadors in order to form an alliance with Hezekiah (*Ant. Jud. x. 2, § 2*).

Baladan had obtained a body of troops from his ally, the king of Susiana; but Sennacherib defeated the combined army in a pitched battle; after which he ravaged the entire country, destroying 79 walled cities and 820 towns and villages, and carrying vast numbers of the people into captivity. Merodach-Baladan fled to "the islands at the mouth of the Euphrates" (Fox Talbot's *Assyrian Texts*, p. 1) — tracts probably now joined to the continent — and succeeded in eluding the search which the Assyrians made for him. If we may believe Polyhistor however, this escape availed him little. That writer relates (*cp.* Euseb. *Chron. Can.* i. 5), that he was soon after put to death by Elibus, or Belibus, the viceroy whom Sennacherib appointed to represent him at Babylon. At any rate he lost his recovered crown after wearing it for about six months, and spent the remainder of his days in exile and obscurity. G. R.

### MEROM, THE WATERS OF (מֵרוֹם)

מֵרוֹם [*waters of the height, or from above*]: ἡ δὲ ὕδωρ Μαρόων [Vat. *Μαρρών*, and so Alex. ver. 7]; Alex. in ver. 5, *Μερρών*; *aque Merom*), a place memorable in the history of the conquest of Palestine. Here, after Joshua had gained possession of the southern portions of the country, a confederacy of the northern chiefs assembled under the leadership of Jabin, king of Hazor (Josh. xi. 5), and here they were encountered by Joshua, and completely routed (ver. 7). The battle of Merom was to the north of Palestine what that of Beth-horon had been to the south, — indeed more, for there do not appear to have been the same number of important towns to be taken in detail after this victory that there had been in the former case.

The name of Merom occurs nowhere in the Bible but in the passage above<sup>a</sup> mentioned; nor is it found in Josephus. In his account of the battle (*Ant.* v. 1, § 18), the confederate kings encamp "near Beroth, a city of upper Galilee, not far from Kedès;" nor is there any mention of water. In the *Onomasticon* of Eusebius the name is given as "Merran," and it is stated to be "a village twelve miles distant from Sebaste (Samaria), and near Dothaim." It is a remarkable fact that though by common consent the "waters of Merom" are identified with the lake through which the Jordan runs between Banias and the Sea of Galilee — the Semechonitis<sup>b</sup> of Josephus, and *Bahr el-Hüleh* of the modern Arabs — yet that identity cannot be proved by any ancient record. The nearest approach to proof is an inference from the statement

of Josephus (*Ant.* v. 5, § 1), that the second Jabin (Judg. iv., v.) "belonged to the city Asor (Hazor) which lay above the lake of Semechonitis." There is no reason to doubt that the Hazor of the first and the Hazor of the second Jabin were one and the same place; and as the waters of Merom are named in connection with the former it is allowable to infer that they are identical with the lake of Semechonitis. But it should be remembered that this inference is really all the proof we have, while against it we have to set the positive statements of Josephus and Eusebius just quoted; and also the fact that the Hebrew word *Me* is not that commonly used for a large piece of standing water, but rather *Yam*, "a sea," which was even employed for so small a body of water as the artificial pond or tank in Solomon's Temple. This remark would have still more force if, as was most probably the case, the lake was larger in the time of Joshua than it is at present. Another and greater objection; which should not be overlooked, is the difficulty attendant on a flight and pursuit across a country so mountainous and impassable to any large numbers, as the district which intervenes between the *Hüleh* and Sidon. The tremendous ravine of the *Litány* and the height of *Kalut es-Shukif* are only two of the obstacles which stand in the way of a passage in this direction. As, however, the lake in question is invariably taken to be the "waters of Merom," and as it is an interesting feature in the geography of the upper part of the Jordan, it may be well here to give some account of it.

The region to which the name of *Hüleh* is attached — the *Ard el-Hüleh* — is a depressed plain or basin, commencing on the north of the foot of the slopes which lead up to the *Merj Aytún* and *Tell el-Rady*, and extending southwards to the bottom of the lake which bears the same name — *Bahr el-Hüleh*. On the east and west it is inclosed between two parallel ranges of hills; on the west the highlands of Upper Galilee — the *Jebel Safat*; and on the east a broad ridge or table-land of basalt, thrown off by the southern base of Hermon, and extending downwards beyond the *Hüleh* till lost in the high ground east of the lake of Tiberias. The latter rises abruptly from the low ground, but the hills on the western side break down more gradually, and leave a tract of undulating table-land of varying breadth between them and the plain. This basin is in all about 15 miles long and 4 to 5 wide, and thus occupies an area about equal to that of the lake of Tiberias. It is the receptacle for the drainage of the highlands on each

<sup>a</sup> The mention of the name in the Vulgate of Judg. v. 18 — in *regione Merome* — is only apparent. It is a literal transference of the words מֵרוֹמֵי שָׂדֵד, rightly rendered in the A. V. "in the high places of the field," and has no connection with Merom.

<sup>b</sup> Ἡ Σεμεχωνίτις, or Σεμεχωνιτών, λίμνη (*Ant.* v. 5, § 1; *B. J.* iii. 10, § 7, iv. 1, § 1). This name does not occur in any part of the Bible; nor has it been discovered in any author except Josephus. For the possible derivations of it, see *Reland (Pal. 262-264)*, and the summary of Stanley (*S. & P.* p. 391 note). To this it should be added that the name *Semakh* is confined to this lake. A wady of that name is the principal torrent on the east of the Sea of Tiberias.

<sup>c</sup> *El-Hüleh*, الحولة, is probably a very ancient

name derived from or connected with Hul, or more accurately Chul, who appears in the lists of Gen. x. as one of the sons of Aram (Syria, ver. 23). In the Arabic version of Saadiah of this passage, the name of Hul is given exactly in the form of the modern name — el-Hüleh. Josephus (*Ant.* i. 6, § 4), in his account of the descendants of Noah, gives Hul as Οὐλος, while he also calls the district in question Οὐλάθα (*Ant.* x. 10, § 3). The word both in Hebrew and Arabic seems to have the force of depression — the low land (see *Michaelis, Suppl.* Nos. 687, 720); and Michaelis most ingeniously suggests that it is the root of the name Κόλανησσία, although in its present form it may have been sufficiently modified to transform it into an intelligible Greek word (*Idem, Spicilegium*, li. 17

ide, but more especially for the waters of the *Merj Ayân*, an elevated plateau which lies above it amongst the roots of the great northern mountains of Palestine. In fact the whole district is an enormous swamp, which, though partially solidified at its upper portion by the gradual deposit of detritus from the hills, becomes more swampy as its length is descended, and at last terminates in the lake or pool which occupies its southern extremity. It was probably at one time all covered with water, and even now in the rainy seasons it is mostly submerged. During the dry season, however, the upper portions, and those immediately at the foot of the western hills, are sufficiently firm to allow the Arabs to encamp and pasture their cattle, but the lower part, more immediately bordering on the lake, is absolutely impassable, not only on account of its increasing marshiness, but also from the very dense thicket of reeds which covers it. At this part it is difficult to say where the swamp terminates and the lake begins, but further down on both sides the shores are perfectly well defined.

In form the lake is not far from a triangle, the base being at the north and the apex at the south. It measures about 3 miles in each direction. Its level is placed by Van de Velde at 120 feet above the Mediterranean. That of *Tell el-Kady*, 20 miles above, is 647 feet, and of the Lake Tiberias, 20 miles below, 653 feet, respectively above and below the same datum (Van de Velde, *Memoir*, 181). Thus the whole basin has a considerable slope southwards. The *Hasbany* river, which falls almost due south from its source in the great *Wady et-Teim*, is joined at the northeast corner of the *Ard el-Hüleh* by the streams from *Banias* and *Tell el-Kady*, and the united stream then flows on through the morass, rather nearer its eastern than its western side, until it enters the lake close to the eastern end of its upper side. From the apex of the triangle at the lower end the Jordan flows out. In addition to the *Hasbany* and to the innumerable smaller watercourses which filter into it the waters of the swamp above, the lake is fed by independent springs on the slopes of its inclosing mountains. Of these the most considerable is the *Ain el-Melaluh*,<sup>a</sup> near the upper end of its western side, which sends down a stream of 40 or 50 feet in width. The water of the lake is clear and sweet; it is covered in parts by a broad-leaved plant, and abounds in water-fowl. Owing to its triangular form a considerable space is left between the lake and the mountains, at its lower end. This appears to be more the case on the west than on the east, and

the rolling plain thus formed is very fertile, and cultivated to the water's edge.<sup>b</sup> This cultivated district is called the *Ard el-Khait*, perhaps "the undulating land," *el-Khait*<sup>c</sup> being also the name which the Arabs call the lake (Thomson, *Bibl. Sacra*, 199; *Rob. Bibl. Res.* 1st ed. iii. App. 135, 136). In fact the name *Hüleh* appears to belong rather to the district, and only to the lake as occupying a portion thereof. It is not restricted to this spot, but is applied to another very fertile district in northern Syria lying below *Hamah*. A town of the same name is also found south of and close to the *Kasimiyeh* river a few miles from the castle of *Huin*.

Supposing the lake to be identical with the "waters of Merom," the plain just spoken of on its southwestern margin is the only spot which could have been the site of Joshua's victory, though, as the Canaanites chose their own ground, it is difficult to imagine that they would have encamped in a position from which there was literally no escape. But this only strengthens the difficulty already expressed as to the identification. Still the district of the *Hüleh* will always possess an interest for the Biblical student, from its connection with the Jordan, and from the cities of ancient fame which stand on its border — *Kedesh*, *Hazor*, *Dan*, *Laish*, *Cæsarea*, *Philippi*, etc.

The above account is compiled from the following sources: *The Sources of the Jordan*, etc. by Rev. W. M. Thomson, in *Bibl. Sacra*, Feb. 1846, pp. 198–201; *Robinson's Bibl. Res.* (1st ed. iii. 341–343, and App. 135), ii. 435, 436, iii. 395, 396; *Wilson, Lands*, etc., ii. 316; Van de Velde, *Syria and Pal.* ii. 416; *Stanley, S. & P.* chap. xi. [To these add *Tristram's Land of Israel*, 2d ed., pp. 582–595.]

The situation of the *Beroth*, at which Josephus (as above) places Joshua's victory, is debated at some length by Michaelis (*Alg. Bibliothek*, etc., No. 84), with a strong desire to prove that it is *Berytus*, the modern *Beirut*, and that *Kedesh* is on the Lake of *Hums* (*Emessa*). His argument is grounded mainly on an addition of Josephus (*Ant.* v. 1, § 18) to the narrative as given both by the Hebrew and LXX., namely, that it occupied Joshua five days to march from *Gilgal* to the encampment of the kings. For this the reader must be referred to Michaelis himself. But Josephus elsewhere mentions a town called *Meröth*, which may possibly be the same as *Beroth*. This seems to have been a place naturally strong, and important as a military post (*Vita*, § 37; *B. J.* ii. 20, § 6), and moreover

<sup>a</sup> This name seems sometimes to have been applied to the lake itself. See the quotation from William of Tyre, — "lacum Meleha" — in *Rob.* ii. 435, note. *Burckhardt* did not visit it, but, possibly guided by the meaning of the Arabic word (salt), says that "the S. W. shore bears the name of *Melaha* from the ground being covered with a saline crust" (*June* 20, 1812). The same thing seems to be affirmed in the *Talmud* (*Ahaloth*, end of chap. iii. quoted by *Schwarz*, p. 42 note); but nothing of the kind appears to have been observed by other travellers. See especially *Wilson, Lands*, etc., ii. 168. By *Schwarz* (p. 29) the name is given as "Ein al-Malcha, the King's spring." If this could be substantiated, it would be allowable to see in it a traditional reference to the encampment of the Kings. *Schwarz* also mentions (pp. 41, 42, note) the following names for the lake: "Sibchi," perhaps a mistake for "Somcho," i. e. *Semechonitis*; "Ka. isyeh," the high, identical with the Hebrew *Merom*;

"*Yam Chavilah*, ים חוילה;" though this may merely be his translator's blunder for *Chnileh*, i. e. *Hüleh*.

<sup>b</sup> This undulating plain appears to be of volcanic origin. Van de Velde (*Syr. and Pal.* 415, 416), speaking of the part below the *Wady Feraim*, a few miles only S. of the lake, calls it "a plain entirely composed of lava;" and at the *Jisr-Benat-Yakub* he speaks of the "black lava sides" of the Jordan. *Wilson*, however, (ii. 316), calls the soil of the same part the "debris of basaltic rocks and dykes."

<sup>c</sup> The writer has not succeeded in ascertaining the signification of this Arabic word. By *Schwarz* (p. 47) it is given as "*Bachr Chit*, 'wheat sea,' because much wheat is sown in its neighborhood." This is probably what *Prof. Stanley* alludes to when he reports the name as *Bahr Hit* or "sea of wheat" (*S. & P.* 391 note).

was the western limit of Upper Galilee (*B. J.* iii. 3, § 1). This would place it somewhere about the plain of *Akko*, much more suitable ground for the chariots of the Canaanites than any to be found near the *Haleh*, while it also makes the account of the pursuit to Sidon more intelligible. G.

### MERONOTHITE, THE (מֵרוֹנוֹתִי)

[gentilic]: δ ἐκ Μερωνῶν, *Alex. Μαρθων*; in *Neh. δ Μερωνωθίτης*, [*Vat. -θείτης*, *Alex. F.A. omitted*]: *Meronthites*), that is, the native of a place called probably Meronoth, of which, however, no further traces have yet been discovered. Two Meronothites are named in the Bible: (1.) *JEHONATHAN*, who had the charge of the royal asses of King David (*1 Chr. xxvii. 30*); and (2.) *JADON*, one of those who assisted in the repair of the wall of Jerusalem after the return from the Captivity (*Neh. iii. 7*). In the latter case we are possibly afforded a clew to the situation of Meronoth by the fact that *Jadon* is mentioned between a Gibeonite and the men of Gibeon, who again are followed by the men of Mizpah; but no name like it is to be found among the towns of that district, either in the lists of *Joshua* (*xviii. 11-28*), of *Nehemiah* (*xi. 31-35*), or in the catalogue of modern towns given by *Robinson* (*Bibl. Res. 1st ed. iii. Append. 121-125*). For this circumstance compare *MECHERATHITE*. G.

**MEROZ** (מְרוֹז) [*prob. refuge, Ges.*]: *Μηρώζ*; *Alex. Μαζαρ*: *terra Meroz*), a place mentioned only in the Song of Deborah and Barak in *Judg. v. 23*, and there denounced because its inhabitants had refused to take any part in the struggle with *Sisera*: —

"Curse ye Meroz, said the messenger of Jehovah,  
Curse ye, curse ye, its inhabitants;  
Because they came not to the help of Jehovah,  
To the help of Jehovah against the mighty."

The denunciation of this faint-heartedness is made to form a pendant to the blessing proclaimed on the prompt action of *Jael*.

*Meroz* must have been in the neighborhood of the *Kishon*, but its real position is not known: possibly it was destroyed in obedience to the curse. A place named *Merius* (but *Eusebius* *Μερίδαν*) is named by *Jerome* (*Onom.* "Merrom") as 12 miles north of *Sebaste*, near *Dothain*, but this is too far south to have been near the scene of the conflict. Far more feasible is the conjecture of *Schwarz* (168, and see 36), that *Meroz* is to be found at *Merasas* — more correctly *el-Murassus* — a ruined site about 4 miles N. W. of *Beisan*, on the southern slopes of the hills, which are the continuation of the so-called "Little Hermon," and form the northern side of the valley (*Wady Jalud*) which leads directly from the plain of *Jezreel* to the *Jordan*. The town must have commanded the Pass, and if any of *Sisera's* people attempted, as the *Midianites* did when routed by *Gideon*, to escape in that direction, its inhabitants might no doubt have prevented their going so, and have slaughtered them. *el-Murassus* is mentioned by *Burekhardt* (*July 2*: he calls it *Meraszrasz*), *Robinson* (*ii. 356*), and others.

*Fürst* (*Handb. 786 a*) suggests the identity of *Meroz* with *Merom*, the place which may have given its name to the waters of *Merom*, in the neighborhood of which *Kedesh*, the residence of *Jael*, where *Sisera* took refuge, was situated. But putting aside the fact of the non-existence of any town named *Meroz* there is against this suggestion the

consideration that *Sisera* left his army and fled alone in another direction.

In the Jewish traditions preserved in the Commentary on the Song of Deborah attributed to *St. Jerome*, *Meroz*, which may be interpreted as *secret*, is made to signify the evil angels who led on the Canaanites, who are cursed by *Michael*, the angel of *Jehovah*, the leader of the Israelites. G.

\* The scene of the battle was near the *Kishon*; but nothing in *Deborah's* ode or the narrative obliges us to find *Meroz* in just that neighborhood. The combatants were summoned from all parts of the land. *Thomson* raises the question whether *Meroz* may not be the present *Meirôn*, the place of the famous Jewish cemetery, about 6 miles west of *Safed*. It would be on the way between *Kedesh* (*Kades*), where *Barak* dwelt (*Judg. iv. 12*), and *Tabor*, so that as he marched thither from the north he would naturally summon the *Merozites* to join his standard (*Land and Book, i. 424*). This argument may be better than that furnished by the slight resemblance of the names, but it does not prove much. Yet the Jews have given *Deborah's* name to a fountain near *Meirôn* (*DEBORAH*, vol. i. p. 576, note). Probably *Meirôn* is *MEROH*, a place mentioned by *Josephus* and fortified by him. See *Raumer's Palästina*, p. 133 (4<sup>te</sup> Aufl.). H.

**MERUTH** (Ἐμμηρούθ; [*Vat. Εμμηρου*; *Ald. ἐκ Μηρούθ*]: *Fimerus*). A corruption of *IMMER 1*, in *Ezr. ii. 37* (1 *Esd. v. 24*).

**MESECH** [*A. V. Ps. cxx. 5*, for *MESHECH*, which see].

**MESHĀ** (מֵשָׁא, perhaps = מֵשָׁא, *retreat*, *Ges.*: *Μασση*; [*Alex. Μασσηε*]: *Messa*), the name of one of the geographical limits of the *Joktanites* when they first settled in Arabia: "And their dwelling was from *Mesha* (מֵשָׁא בְּאֶרֶץ)

(מֵשָׁא בְּאֶרֶץ מֵשָׁא), [as thou goest] unto *Sephar*, a mount of the East" (*Gen. x. 30*). The position of the early *Joktanite* colonists is clearly made out from the traces they have left in the ethnology, language, and monuments of Southern Arabia; and without putting too precise a limitation on the possible situation of *Mesha* and *Sephar*, we may suppose that these places must have fallen within the southwestern quarter of the peninsula; including the modern *Yemen* on the west, and the districts of *'Omán*, *Mahreh*, *Shihr*, etc., as far as *Hadraniáwt*, on the east. These general boundaries are strengthened by the identification of *Sephar* with the port of *Zufári*, or *Dhofári*; though the site of *Sephar* may possibly be hereafter connected with the old *Himyarite* metropolis in the *Yemen* [see *ARABIA*, vol. i. p. 140, and *SEPHAR*], but this would not materially alter the question. In *Sephar* we believe we have the eastern limit of the early settlers, whether its site be the seaport or the inland city; and the correctness of this supposition appears from the Biblical record, in which the migration is apparently from west to east, from the probable course taken by the immigrants, and from the greater importance of the known western settlements of the *Joktanites*, or those of the *Yemen*.

If then *Mesha* was the western limit of the *Joktanites*, it must be sought for in northwestern *Yemen*. But the identifications that have been proposed are not satisfactory. The seaport called *Μούσα* or *Μούζα*, mentioned by *Ptolemy*, *Pliny* *Arrian*, and others (see the *Dictionary of Geography*

a. v. *Muza*) presents the most probable site. It was a town of note in classical times, but has since fallen into decay, if the modern *Moosá* be the same place. The latter is situate in about 13° 40' N. lat., 43° 20' E. long., and is near a mountain called the *Three Sisters*, or *Jebel Moosá*, in the Admiralty Chart of the Red Sea, drawn from the surveys of Captain Pullen, R. N. Gesenius thinks this identification probable, but he appears to have been unaware of the existence of a modern site called *Moosá*, saying that *Muza* was nearly where now is *Mawshid*. Bochart, also, holds the identification with *Muza* (*Phaleg*, xxx.) *Mesha* may possibly have lain inland, and more to the northwest of *Sephar* than the position of *Moosá* would indicate; but this is scarcely to be assumed. There is, however, a Mount *Moosh*,<sup>a</sup> situate in *Nejd*, in the territory of the tribe of *Teiyi* (*Marsáid* and *Mushtarak*, s. v.). There have not been wanting writers among the late Jews to convert *Mesha* and *Sephar* into *Mekkah* and *El-Medeneh* (*Phaleg*, l. c.).

E. S. P.

**ME'SHA** (מֵשָׁא) [*deliverance*]: *Mwsá*; *Jos.*

*Misán*: *Mesa*). 1. The king of Moab in the reigns of Ahab and his sons Ahaziah and Jehoram, kings of Israel (2 K. iii. 4), and tributary to the first. Probably the allegiance of Moab, with that of the tribes east of Jordan, was transferred to the northern kingdom of Israel upon the division of the monarchy, for there is no account of any subjugation of the country subsequent to the war of extermination with which it was visited by David, when Benaiah displayed his prowess (2 Sam. xxii. 20), and "the Moabites became David's servants, bearers of gifts" (2 Sam. viii. 2). When Ahab had fallen in battle at Ramoth Gilead, *Mesha* seized the opportunity afforded by the confusion consequent upon this disaster, and the feeble reign of Ahaziah, to shake off the yoke of Israel and free himself from the burdensome tribute of "a hundred thousand wethers and a hundred thousand rams with their wool." The country east of the Jordan was rich in pasture for cattle (Num. xxxii. 1), the chief wealth of the Moabites consisted in their large flocks of sheep, and the king of this pastoral people is described as *nókéd* (נֹקֵד), "a sheep-master," or owner of herds.<sup>b</sup> About the signification of this word *nókéd* there is not much doubt, but its origin is obscure. It occurs but once besides, in Am. i. 1, where the prophet Amos is described as "among the herdmen (נֹקְדִים, *nókédim*) of Tekoah." On this Kimchi remarks that a herdman was called *nókéd*, because most cattle have black or white spots (comp. נֹקֵד, *nákéd*, Gen. xxx. 32, A. V. 'speckled'), or, as Buxtorf explains it, because sheep are generally marked with certain signs so as

to be known. But it is highly improbable that any such etymology should be correct, and Fürst's conjecture that it is derived from an obsolete root, signifying to keep or feed cattle, is more likely to be true (*Concord.* s. v.).

When, upon the death of Ahaziah, his brother Jehoram succeeded to the throne of Israel, one of his first acts was to secure the assistance of Jehoshaphat, his father's ally, in reducing the Moabites to their former condition of tributaries. The united armies of the two kings marched by a circuitous route round the Dead Sea, and were joined by the forces of the king of Edom. [JEHORAM.] The disordered soldiers of Moab, eager only for spoil, were surprised by the warriors of Israel and their allies, and became an easy prey. In the panic which ensued they were slaughtered without mercy, their country was made a desert, and the king took refuge in his last stronghold and defended himself with the energy of despair. With 700 fighting men he made a vigorous attempt to cut his way through the beleaguering army, and when beaten back, he withdrew to the wall of his city, and there, in sight of the allied host, offered his first-born son, his successor in the kingdom, as a burnt-offering to Chemosh, the ruthless fire-god of Moab. His bloody sacrifice had so far the desired effect that the besiegers retired from him to their own land. There appears to be no reason for supposing that the son of the king of Edom was the victim on this occasion, whether, as R. Joseph Kimchi supposed, he was already in the power of the king of Moab, and was the cause of the Edomites joining the armies of Israel and Judah; or whether, as R. Moses Kimchi suggested, he was taken prisoner in the sally of the Moabites, and sacrificed out of revenge for its failure. These conjectures appear to have arisen from an attempt to find in this incident the event to which allusion is made in Am. ii. 1, where the Moabite is charged with burning the bones of the king of Edom into lime. It is more natural, and renders the narrative more vivid and consistent, to suppose that the king of Moab, finding his last resource fail him, endeavored to avert the wrath and obtain the aid of his god by the most costly sacrifice in his power. [MOAB.]

2. מֵשָׁא: *Mwsá*; [Vat. *Mapeusa*]; Alex. *Μαρισας*; [Comp. *Mwsá*; Ald. *Masá*]: *Mesa*.) The eldest son of Caleb the son of Hezron by his wife Azubah, as Kimchi conjectures (1 Chr. ii. 42). He is called the father, that is the prince or founder, of Ziph. Both the Syriac and Arabic versions have "Elishamai," apparently from the previous verse, while the LXX., unless they had a different reading *Μωρασα*, seem to have repeated "Marehah" which occurs immediately afterwards.

3. מֵשָׁא [retreat, Ges., firmness, Fürst] *Mwsá*; Alex. *Μωσα*: *Mosa*.) A Benjamite, son of

origin, which denotes an inferior kind of sheep, ugly and little valued except for its wool. The keeper of

such sheep is called *نَكَدَان*, *nakkán*, which Bochart identifies with *nókéd*. But if this be the case, it is a little remarkable that the Arabic translator should have passed over a word apparently so appropriate, and followed the version of the Targum, "an owner of flocks." Gesenius and Lee, however, accept this as the solution.

<sup>a</sup> موش.

The LXX. leave it untranslated (*νοκῆδ*, Alex. *νοκῆθ*), as does the Peshito Syriac; but Aquila renders it *πομνιστρόφος*, and Symmachus *τρέφων βοσκίαστα*, following the Targum and Arabic, and themselves followed in the margin of the Hexaplar Syriac. In Am. i. 1, Symmachus has simply *πομῆν*. The *Kamoos*, as quoted by Bochart (*Hieroz.* i. c. 44), gives

an Arabic word, *نَكَد*, *nakad*, not traced to any

Shaharaim, by his wife Hodesh, who bare him in the land of Moab (1 Chr. viii. 9). The Vulgate and Alex. MS. must have had the reading מְשַׁח.

W. A. W.

**MESHACH** (מְשַׁח) [see below]: *Μισάχ*; Alex. *Μισακ*: *Misach*. The name given to Mishael, one of the companions of Daniel, and like him of the blood-royal of Judah, who with three others was chosen from among the captives to be taught "the learning and the tongue" of the Chaldeans (Dan. i. 4), so that they might be qualified to "stand before" king Nebuchadnezzar (Dan. i. 5) as his personal attendants and advisers (i. 20). During their three years of preparation they were maintained at the king's cost, under the charge of the chief of the eunuchs, who placed them with "the Melzar," or chief butler. The story of their simple diet is well known. When the time of their probation was ended, such was "the knowledge and skill in all learning and wisdom" which God had given them, that the king found them "ten times better than all the magicians and astrologers that were in his realm" (i. 20). Upon Daniel's promotion to be "chief of the magicians," his three companions, by his influence, were set "over the affairs of the province of Babylon" (ii. 49). But, notwithstanding their Chaldean education, these three young Hebrews were strongly attached to the religion of their fathers; and their refusal to join in the worship of the image on the plain of Dura gave a handle of accusation to the Chaldeans, who were jealous of their advancement, and eagerly reported to the king the heretical conduct of these "Jewish men" (iii. 12) who stood so high in his favor. The rage of the king, the swift sentence of condemnation passed upon the three offenders, their miraculous preservation from the fiery furnace heated seven times hotter than usual, the king's acknowledgment of the God of Shadrach, Meshach, and Abednego, with their restoration to office, are written in the 3d chapter of Daniel, and there the history leaves them. The name "Meshach" is rendered by Fürst (*Hindw.*) "a ram," and derived from the Sanskrit *mēshach*. He goes on to say that it was the name of the Sun-god of the Chaldeans, without giving any authority, or stopping to explain the phenomenon presented by the name of a Chaldean divinity with an Aryan etymology. That Meshach was the name of some god of the Chaldeans is extremely probable, from the fact that Daniel, who had the name of Belteshazzar, was so called after the god of Nebuchadnezzar (Dan. iv. 8), and that Abednego was named after Nego, or Nebo, the Chaldean name for the planet Mercury.

W. A. W.

**MESHACH** (מְשַׁח) [*draving or sowing, possession*]: *Μοσάχ*, [*Μεσάχ*]; Alex. *Μοσοχ*, once *Μοσοκ*; in Ps. cxx. 5, and Ez. xxvii. 13 LXX. translate: *Mosoch*], [*Mesech*, A. V. Ps. cxx. 5,] a son of Japheth (Gen. x. 2; 1 Chr. i. 5), and the pro-

genitor of a race frequently noticed in Scripture in connection with Tubal, Magog, and other northern nations. They appear as allies of Gog (Ez. xxxviii. 2, 3, xxxix. 1), and as supplying the Tyrians with copper and slaves (Ez. xxvii. 13); in Ps. cxx. 5, they are noticed as one of the remotest, and at the same time rudest nations of the world. Both the name and the associations are in favor of the identification of Meshech with the *Moschi*: the form of the name adopted by the LXX. and the Vulg. approaches most nearly to the classical designation, while in Procopius (*B. G.* iv. 2) we meet with another form (*Μέσχοι*) which assimilates to the Hebrew. The position of the *Moschi* in the age of Ezekiel was probably the same as is described by Herodotus (iii. 94), namely, on the borders of Colchis and Armenia, where a mountain chain connecting Anti-Taurus with Caucasus was named after them the *Moschici Montes*, and where was also a district named by Strabo (xi. 497-499) *Moschice*. In the same neighborhood were the *Tibareni*, who have been generally identified with the Biblical Tubal. The Colchian tribes, the Chalybes more especially, were skilled in working metals, and hence arose the trade in the "vessels of brass" with Tyre; nor is it at all improbable that slaves were largely exported thence as now from the neighboring district of Georgia. Although the *Moschi* were a comparatively unimportant race in classical times, they had previously been one of the most powerful nations of Western Asia. The Assyrian monarchs were engaged in frequent wars with them, and it is not improbable that they had occupied the whole of the district afterwards named Cappadocia. In the Assyrian inscriptions the name appears under the form of *Muskai*: a somewhat similar name, *Mushkoosh*, appears in an Egyptian inscription, which commemorates the achievements of the third Rameses (Wilkinson, *Anc. Eg.* i. 398, Abridg.). The subsequent history of Meshech is unknown; Knobel's attempt to connect them with the Ligurians (*Völkertuf.* p. 119, &c.) is devoid of all solid ground. As far as the name and locality are concerned, *Muscovite* is a more probable hypothesis (Rawlinson, *Herod.* i. 652, 653).

W. L. B.

**MESHELEMAH** (מִשְׁלֵמָה) [*whom Jehovah recompenses*]: *Μοσολλαμί*: [*Vat. Μοσολλαμί*]; Alex. *Μοσολλαμ*: *Mosollamia*, 1 Chr. ix. 21; *מִשְׁלֵמָה*: *Μοσελλεμία*, [*Μοσολλαμία* Vat. *Μοσολλαμ*, *Μοσαληα*, *Μοσομαειδ*]; Alex. *Μοσολλαμ*, *Μοσελλαμια*, *Μεσολλαμια*: *Meselemia*, 1 Chr. xxvi. 1, 2, 9. A Korhite, son of Kore, of the sons of Asaph, who with his seven sons and his brethren, "sons of might," were porters or gate-keepers of the house of Jehovah in the reign of David. He is evidently the same as SHELEMAH (1 Chr. xxvi. 14), to whose custody the East Gate, or principal entrance, was committed, and whose son Zechariah was a wise counsellor

<sup>a</sup> The expression *כָּל סֵפֶר הַלְשׁוֹן* includes the whole of the Chaldean literature, written and spoken.

<sup>b</sup> Various explanations have been offered to account for the juxtaposition of two such remote nations as Mesech and Kedar in this passage. The LXX. does not recognize it as a proper name, but renders it *μακρόνθη*. Hitzig suggests the identity of *Mesech* with *Dammesech*, or Damascus. It is, however, quite pos-

sible that the Psalmist selects the two nations for the very reason which is regarded as an objection, namely their remoteness from each other, though at the same time their wild and uncivilized character may have been the ground of the selection, as Hengstenberg (*Comm.* in loc.) suggests. We have already had to notice Knobel's idea, that the Mesech in this passage is the Meshech of 1 Chr. i. 5, and the Babylonian Mesene. [MASH.]

and had charge of the north gate "SHALLUM the son of Kore, the son of Ebiasaph, the son of Korah" (1 Chr. ix. 19), who was chief of the porters (17), and who gave his name to a family which performed the same office, and returned from the Captivity with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), is apparently identical with Shelemiah, Mesheleiah, and Meshullam (comp. 1 Chr. ix. 17, with Neh. xii. 25).

W. A. W.

**MESHEZ'ABEEL** [4 syl.] (משׁזבאל) [*deliverer of God*]: Μαζεβήλ; [Vat. omits;] Alex. Μασσεζειηλ; FA. Μασσεζεβηλ; *Mesezebel*.)

1. Ancestor of Meshullam, who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 4). He was apparently a priest.

2. (Μεσωζεβήλ; *Mesizabel*.) One of the "heads of the people," probably a family, who sealed the covenant with Nehemiah (Neh. x. 21).

3. (Βασηζά; FA. 3d hand, Βασηζαβηλ; *Mesezebel*.) The father of Pethahiah, and descendant of Zerach the son of Judah (Neh. xi. 24).

\* In Neh. xi. 24 the A. V. ed. 1611 has the more correct form, Meshezabel.

A.

**MESHIL'LEMITH** (משׁלמית) [see next word]: Μασελαμωθ; Alex. Μοσολλαμωθ; *Mosollemith*.) The son of Immer, a priest, and ancestor of Amashai or Maasiai, according to Neh. xi. 13, and of Pashur and Adaiak, according to 1 Chr. ix. 12. In Neh. xi. 13 he is called MESHILLEMOTH.

**MESHIL'LEMOTH** (משׁלמות) [*retributions, requitals*]: Μωσολαμωθ; [Vat. Μωσολαμωθ;] Alex. Μωσολλαμωθ; *Mosollamoth*.) An Ephraimite, ancestor of Berechiah, one of the chiefs of the tribe in the reign of Pekah (2 Chr. xxviii. 12).

2. (Μεσαριμωθ; [Vat. Alex. FA.<sup>1</sup> omit; FA.<sup>3</sup> Μασαλιμωθ;] Neh. xi. 13. The same as MESHILLEMITH.)

**MESHUL'LAM** (משׁלם) [*friend, associate*]. 1. (Μεσολλάμ; Alex. Μεσσαλην; *Messulam*.) Ancestor of Shaphan the scribe (2 K. xii. 3).

2. (Μοσολλάμ; [Vat. Μωσολοαμος;] Alex. Μωσολλαμος; *Mosollum*.) The son of Zerubbabel (1 Chr. iii. 19).

3. (Vat. [rather, Rom.] and Alex. Μωσολλαμ; [Vat. Μωσολαμ;]) A Gadite, one of the chief men of the tribe, who dwelt in Bashan at the time the genealogies were recorded in the reign of Jotham king of Judah (1 Chr. v. 13).

4. [Μοσολλάμ.] A Benjamite, of the sons of Elpaal (1 Chr. viii. 17).

5. ([In 1 Chr., Μωσολλάμ, Vat. Μωσολλαμ; in Neh.] Μεσουλάμ; FA. Αμσουλαμ.) A Benjamite, the son of Hodaviah or Joed, and father of Sallu, one of the chiefs of the tribe who settled at Jerusalem after the return from Babylon (1 Chr. ix. 7; Neh. xi. 7).

6. ([Μωσολλάμ; Vat. Μασεαλην;] Alex. Μασαλαμ.) A Benjamite, son of Shephathiah, who lived at Jerusalem after the Captivity (1 Chr. ix. 8).

7. ([In 1 Chr. Μωσολλάμ, Vat. Μωσολλου;] in Neh. Μεσουλάμ; [Vat. Μεισουλαμ;] Alex. Μωσολλαμ.) The same as SHALLUM, who was high-priest probably in the reign of Amon, and father of Hiskiah (1 Chr. ix. 11; Neh. xi. 11).

His descent is traced through Zadok and Meraioth to Ahitub; or, as is more probable, the names Meraioth and Ahitub are transposed, and his descent is from Meraioth as the more remote ancestor (comp. 1 Chr. vi. 7).

8. [Μωσολλαμ.] A priest, son of Meshillemith, or Meshillemoth, the son of Immer, and ancestor of Maasiai or Amashai (1 Chr. ix. 12; comp. Neh. xi. 13). His name does not occur in the parallel list of Nehemiah, and we may suppose it to have been omitted by a transcriber in consequence of the similarity of the name which follows; or in the passage in which it occurs it may have been added from the same cause.

9. [Μωσολλάμ.] A Kohathite, or family of Kohathite Levites, in the reign of Josiah, who were among the overseers of the work of restoration in the Temple (2 Chr. xxxiv. 12).

10. (Μεσολλάμ; [Vat. Μεσουαμ;]) One of the "heads" (A. V. "chief men") sent by Ezra to Iddo "the head," to gather together the Levites to join the caravan about to return to Jerusalem (Ezr. viii. 16). Called MOSOLLAMON in 1 Esdr. viii. 44.

11. (Alex. Μετασολλαμ; [Vat. FA. Μεσουγαμ;] *Mesollum*.) A chief man in the time of Ezra, probably a Levite, who assisted Jonathan and Jahaziah in abolishing the marriages which some of the people had contracted with foreign wives (Ezr. x. 15). Also called MOSOLLAM in 1 Esdr. ix. 14.

12. (Μωσολλάμ; [Vat. with following word, Μελουσαμολουμ;] *Mosollum*.) One of the descendants of Bani, who had married a foreign wife and put her away (Ezr. x. 29). OLAMUS in 1 Esdr. ix. 30 is a fragment of this name.

13. ([Μωσολλάμ, Neh. iii. 3, but Vat. omits;] Μεσουλάμ, Neh. iii. 30, vi. 18.) The son of Berechiah, who assisted in rebuilding the wall of Jerusalem (Neh. iii. 4), as well as the Temple wall, adjoining which he had his "chamber" (Neh. iii. 30). He was probably a priest, and his daughter was married to Johanan the son of Tobiah the Ammonite (Neh. vi. 18).

14. (Μεσουλάμ.) The son of Besodeiah; he assisted Jehoiada the son of Paseah in restoring the old gate of Jerusalem (Neh. iii. 6).

15. (Μεσολλάμ; [Vat. FA.<sup>1</sup> omit; FA.<sup>3</sup>] Alex. Μωσολλαμ.) One of those who stood at the left hand of Ezra when he read the law to the people (Neh. viii. 4).

16. (Μεσουλάμ.) A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 7).

17. (Μεσουλλάμ; [Vat. FA.] Alex. Μεσουλαμ.) One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 20).

18. (Μεσουλάμ.) A priest in the days of Joiakim the son of Jeshua, and representative of the house of Ezra (Neh. xii. 13).

19. (Μεσουλάμ; [Vat. FA.<sup>1</sup> Alex. omit; FA.<sup>3</sup> Μωσολλαμ;]) Likewise a priest at the same time as the preceding, and head of the priestly family of Ginnethon (Neh. xii. 16).

20. (Omitted in LXX. [but FA.<sup>3</sup> Μωσολλαμ;]) A family of porters, descendants of Meshullam (Neh. xii. 25), who is also called Mesheleiah (1 Chr. xxvi. 1), Shelemiah (1 Chr. xxvi. 14), and Shallum (Neh. vii. 45).

21. (Μεσουλάμ; [Vat. Μεσουλαμ; FA.<sup>1</sup> Μεσουλα, VA.<sup>3</sup> Μεσουλλαμ;] Alex. Μωσολλαμ;)

One of the princes of Judah who were in the right hand company of those who marched on the wall of Jerusalem upon the occasion of its solemn dedication (Neh. xii. 33). W. A. W.

**MESHUL'LEMETH** (מְשֻׁלֵּמֶת) [*a pious one*]: Μεσολλάμη; Alex. Μεσολαμειθ: *Messolameth*. The daughter of Haruz of Jobah, wife of Manasseh king of Judah, and mother of his successor Amon (2 K. xxi. 19).

**MESOBAITE**, THE (הַמְצֹבָיִת, *i. e.* "the Metsobayah" [see below]: [Vat. FA.] ο Μεσολαμία; [Rom.] Alex. Μεσολαμία: *Mesobaita*), a title which occurs only once, and then attached to the name of JASIEL, the last of David's guard in the extended list of 1 Chron. (xi. 47). The word retains strong traces of ZOBAB, one of the petty Aramite kingdoms, in which there would be nothing surprising, as David had a certain connection with these Aramite states, while this very catalogue contains the names of Moabites, Ammonites, and other foreigners. But on this it is impossible to pronounce with any certainty, as the original text of the passage is probably in confusion. Kennicott's conclusion (*Dissertation*, pp. 233, 234) is that originally the word was "the Metzobaites" (הַמְצֹבָיִת), and applied to the three names preceding it.

It is an unusual thing in the A. V. to find צ (ts) rendered by s, as in the present case. Another instance is STON. G.

\* It cannot be "the Mesobaites" (A. V.), as this Hebrew ending is not strictly patronymic. (See Ges. *Lehrgebäude*, p. 504 f.) If we abide by the reading, it must be a compound name = Jasiel-Metsovajah. The latter may take the article in Hebrew from its appellative force. The name of the place is unknown. Fürst supposes it to mean "the gathering-place of Jehovah." Different readings have been suggested (see Bertheau, *Bücher der Chronik*). H.

**MESOPOTAMIA** (הַמְּצֹבָיִת) [*high land of two rivers*]: Μεσοποταμία: *Mesopotamia*) is the ordinary Greek rendering of the Hebrew *Aram-Naharain*, or "Syria of the two rivers," whereof we have frequent mention in the earlier books of Scripture (Gen. xxiv. 10; Deut. xxiii. 4; Judg. iii. 8, 10). It is also adopted by the LXX. to represent the מְצֹבָיִת פְּדָן (Paddan-Aram) of the Hebrew text, where our translators keep the term used in the original (Gen. xxv. 20, xxviii. 2, 5, etc.).

If we look to the signification of the name, we must regard Mesopotamia as the entire country between the two rivers — the Tigris and the Euphrates. This is a tract nearly 700 miles long, and from 20 to 250 miles broad, extending in a southeasterly direction from *Telek* (lat. 38° 23', long. 39° 18') to *Kurnah* (lat. 31°, long. 47° 30'). The Arabian geographers term it "the Island," a name which is almost literally correct, since a few miles only intervene between the source of the Tigris and the Euphrates at *Telek*. It is for the most part a vast plain, but is crossed about its centre by the range of the *Sinjar* hills, running nearly east and west from about Mosul to a little below *Rakkeh*; and in its northern portion it is even mountainous, the upper Tigris valley being separated from the Mesopotamian plain by an im-

portant range, the Mons Masius of Strabo (xi. 12 § 4; 14, § 2, &c.), which runs from *Birehjik* to *Jezeveh*. This district is always charming; but the remainder of the region varies greatly according to circumstances. In early spring a tender and luxuriant herbage covers the whole plain, while flowers of the most brilliant hues spring up in rapid succession, imparting their color to the landscape, which changes from day to day. As the summer draws on, the verdure recedes towards the streams and mountains. Vast tracts of arid plain, yellow, parched, and sapless, fill the intermediate space, which ultimately becomes a bare and uninhabitable desert. In the *Sinjar*, and in the mountain-tract to the north, springs of water are tolerably abundant, and corn, vines, and figs are cultivated by a stationary population; but the greater part of the region is only suited to the nomadic hordes, which in spring spread themselves far and wide over the vast flats, so utilizing the early verdure, and in summer and autumn gather along the banks of the two main streams and their affluents, where a delicious shade and a rich pasture may be found during the greatest heats. Such is the present character of the region. It is thought, however, that by a careful water-system, by deriving channels from the great streams or their affluents, by storing the superfluous spring-rains in tanks, by digging wells, and establishing *kandts*, or subterraneous aqueducts, the whole territory might be brought under cultivation, and rendered capable of sustaining a permanent population. That some such system was established in early times by the Assyrian monarchs seems to be certain, from the fact that the whole level country on both sides of the *Sinjar* is covered with mounds marking the sites of cities, which, wherever opened, have presented appearances similar to those found on the site of Nineveh. [ASSYRIA.] If even the more northern portion of the Mesopotamian region is thus capable of being redeemed from its present character of a desert, still more easily might the southern division be reclaimed and converted into a garden. Between the 35th and 34th parallels, the character of the Mesopotamian plain suddenly alters. Above, it is a plain of a certain elevation above the courses of the Tigris and Euphrates, which are separated from it by low lime-stone ranges; below, it is a mere alluvium, almost level with the rivers, which frequently overflow large portions of it. Consequently, from the point indicated, canalization becomes easy. A skillful management of the two rivers would readily convey abundance of the life-giving fluid to every portion of the Mesopotamian tract below the 34th parallel. And the innumerable lines of embankment, marking the course of ancient canals, sufficiently indicate that in the flourishing period of Babylonia a network of artificial channels covered the country. [BABYLONIA.]

To this description of Mesopotamia in the most extended sense of the term, it seems proper to append a more particular account of that region, which bears the name *par excellence*, both in Scripture, and in the classical writers. This is the northwestern portion of the tract already described or the country between the great bend of the Euphrates (lat. 35° to 37° 30') and the upper Tigris (See particularly Ptolem. *Geograph.* v. 12, and compare Eratosth. ap. Strab. ii. 1, § 29; Arr. *Exp. Al.* iii. 7; *Deasipp. Fr.* p. 1, &c.) It consists of the mountain country extending from *Birehjik* to

*Jesireh* upon the north; and, upon the south, of the great undulating Mesopotamian plain, as far as the Sinjar hills, and the river *Khabour*. The northern range, called by the Arabs *Karajah Dagh* towards the west and *Jebel Tur* towards the east, does not attain to any great elevation. It is in places rocky and precipitous, but has abundant springs and streams which support a rich vegetation. Forests of chestnuts and pistachio-trees occasionally clothe the mountain sides; and about the towns and villages are luxuriant orchards and gardens, producing abundance of excellent fruit. The vine is cultivated with success; wheat and barley yield heavily; and rice is grown in some places. The streams from the north side of this range are short, and fall mostly into the Tigris. Those from the south are more important. They flow down at very moderate intervals along the whole course of the range, and gradually collect into two considerable rivers — the *Belik* (ancient *Bilichus*), and the *Khabour* (Habor or Chaboras) — which empty themselves into the Euphrates. [HABOR.] South of the mountains is the great plain already described, which between the *Khabour* and the Tigris is interrupted only by the *Sinjar* range, but west of the *Khabour* is broken by several spurs from the *Karajah Dagh*, having a general direction from north to south. In this district are the two towns of *Orfu* and *Harran*, the former of which is thought by many to be the native city of Abraham, while the latter is on good grounds identified with Haran, his resting place between Chaldea and Palestine. [HARRAN.] Here we must fix the Padan-Aram of Scripture — the “plain Syria,” or “district stretching away from the foot of the hills” (Stanley’s *S. & P.* p. 129 note), without, however, determining the extent of country thus designated. Besides *Orfu* and *Harran*, the chief cities of modern Mesopotamia are *Mardin* and *Nisibin*, south of the *Jebel Tur*, and *Diarbekr*, north of that range, upon the Tigris. Of these places two, *Nisibin* and *Diarbekr*, were important from a remote antiquity, *Nisibin* being then Nisibis, and *Diarbekr* Amida.

We first hear of Mesopotamia in Scripture as the country where Nahor and his family settled after quitting Ur of the Chaldees (Gen. xxiv. 10). Here lived Bethuel and Laban; and hither Abraham sent his servant, to fetch Isaac a wife “of his own kindred” (*ib.* ver. 38). Hither too, a century later, came Jacob on the same errand; and hence he returned with his two wives after an absence of 21 years. After this we have no mention of Mesopotamia, till, at the close of the wanderings in the wilderness, Balak the king of Moab sends for Balaam “to Pethor of Mesopotamia” (Deut. xxiii. 4), which was situated among “the mountains of the east” (Num. xxiii. 7), by a river (*ib.* xxii. 5), probably the Euphrates. About half a century later, we find, for the first and last time, Mesopotamia the seat of a powerful monarchy. Chushan-Rishatha’im, king of Mesopotamia, establishes his dominion over Israel shortly after the death of Joshua (Judg. iii. 8), and maintains his authority for the space of eight years, when his yoke is broken by Othniel, Caleb’s nephew (*ib.* vv. 9, 10). Finally, the children of Ammon, having provoked a war with David, “sent a thousand talents of silver to hire them chariots and horsemen out of Mesopotamia, and out of Syria-Maachah, and out of Zobah” (1 Chr. xix. 6). It is uncertain whether the Mesopotamians were persuaded to

lend their aid at once. At any rate, after the first great victory of Joab over Ammon and the Syrians who took their part, these last “drew forth the Syrians that were beyond the river” (*ib.* ver. 16), who participated in the final defeat of their fellow-countrymen at the hands of David. The name of Mesopotamia then passes out of Scripture, the country to which it had applied becoming a part, first of Assyria, and afterwards of the Babylonian empire.

According to the Assyrian inscriptions, Mesopotamia was inhabited in the early times of the empire (B. C. 1200–1100) by a vast number of petty tribes, each under its own prince, and all quite independent of one another. The Assyrian monarchs contended with these chiefs at great advantage, and by the time of Jehu (B. C. 880) had fully established their dominion over them. The tribes were all called “tribes of the Nairi,” a term which some compare with the *Naharaim* of the Jews, and translate “tribes of the stream-lands.” But this identification is very uncertain. It appears, however, in close accordance with Scripture, first, that Mesopotamia was independent of Assyria till after the time of David; secondly, that the Mesopotamians were warlike and used chariots in battle; and thirdly, that not long after the time of David they lost their independence, their country being absorbed by Assyria, of which it was thenceforth commonly reckoned a part.

On the destruction of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babylonians. The conquests of Cyrus brought it wholly under the Persian yoke; and thus it continued to the time of Alexander, being comprised (probably) in the ninth, or Assyrian satrapy. At Alexander’s death, it fell to Seleucus, and formed a part of the great Syrian kingdom till wrested from Antiochus V. by the Parthians, about B. C. 160. Trajan conquered it from Parthia in A. D. 115, and formed it into a Roman province; but in A. D. 117 Adrian relinquished it of his own accord. It was afterwards more than once reconquered by Rome, but never continued long under her sceptre, and finally reverted to the Persians in the reign of Jovian, A. D. 363.

(See Quint. Curt. v. 1; Dio Cass. lxxviii. 22–26; Amm. Marc. xv. 8, &c.; and for the description of the district, compare C. Niebuhr’s *Voyage en Arabie*, &c., vol. ii. pp. 300–334; Pococke’s *Description of the East*, vol. ii. part i. ch. 17; and Layard’s *Nineveh and Babylon*, chs. xi.–xv.).

G. R.

**MESSIAH.** This word (מָשִׁיחַ, *Māshīach*), which answers to the word *Χριστός* in the N. T., means *anointed*; and is applicable in its first sense to any one anointed with the holy oil. It is applied to the high priest in Lev. iv. 3, 5, 16; and possibly to the shield of Saul in a figurative sense in 2 Sam. i. 21. The kings of Israel were called *anointed*, from the mode of their consecration (1 Sam. i. 10, 35, xii. 3, 5, xvi. 6, xxiv. 6, 10, xxvi. 9, 11, 23; 2 Sam. i. 14, 16, xix. 21, xxiii. 1).

This word also refers to the expected Prince of the chosen people who was to complete God’s purposes for them, and to redeem them, and of whose coming the prophets of the old covenant in all time spoke. It is twice used in the N. T. of Jesus (John i. 41, iv. 25, A. V. “Messias”); but the Greek equivalent, the *Christ*, is constantly applied, at first

with the article as a title, exactly *the Anointed One*, but later without the article, as a proper name, *Jesus Christ*.

Three points belong to this subject: 1. The expectation of a Messiah among the Jews; 2. The expectation of a suffering Messiah; 3. The nature and power of the expected Messiah. Of these the second will be discussed under SAVIOUR, and the third under SON OF GOD. The present article will contain a rapid survey of the first point only. The interpretation of particular passages must be left in a great measure to professed commentators.

The earliest gleam of the Gospel is found in the account of the fall, where it is said to the serpent "I will put enmity between thee and the woman, and between thy seed and her seed: it shall bruise thy head, and thou shalt bruise his heel" (Gen. iii. 15). The tempter came to the woman in the guise of a serpent, and the curse thus pronounced has a reference both to the serpent which was the instrument, and to the tempter that employed it; to the natural terror and enmity of man against the serpent, and to the conflict between mankind redeemed by Christ its Head, and Satan that deceived mankind. Many interpreters would understand by the seed of the woman, the Messiah only; but it is easier to think with Calvin that mankind, after they are gathered into one army by Jesus the Christ, the Head of the Church, are to achieve a victory over evil. The Messianic character of this prophecy has been much questioned by those who see in the history of the Fall nothing but a fable; to those who accept it as true, this passage is the primitive germ of the Gospel, the protevangelium.

The blessings in store for the children of Shem are remarkably indicated in the words of Noah, "Blessed be the Lord God of Shem," or (lit.) "Blessed be Jehovah the God of Shem" (Gen. ix. 26), where instead of blessing Shem, as he had cursed Canaan, he carries up the blessing to the great fountain of the blessings that shall follow Shem. Next follows the promise to Abraham, wherein the blessings to Shem are turned into the narrower channel of one family — "I will make of thee a great nation, and I will bless thee, and make thy name great; and thou shalt be a blessing; and I will bless them that bless thee and curse him that curseth thee; and in thee shall all families of the earth be blessed" (Gen. xii. 2, 3). The promise is still indefinite; but it tends to the undoing of the curse of Adam, by a blessing to all the earth through the seed of Abraham, as death had come on the whole earth through Adam. When our Lord says, "Your father Abraham rejoiced to see my day, and he saw it and was glad" (John viii. 56), we are to understand that this promise of a real blessing and restoration to come hereafter was understood in a spiritual sense, as a leading back to God, as a coming nearer to Him, from whom the promise came; and he desired with hope and rejoicing ("gestivit cum desiderio," *Bengel*) to behold the day of it.

A great step is made in Gen. xlix. 10, "The sceptre shall not depart from Judah, nor a law-giver from between his feet, until Shiloh come; and unto him shall the gathering of the people be."

The derivation of the word Shiloh (שִׁילֹחַ) is probably from the root שָׁלַח; and if so, it means *rest*, or, as Hengstenberg argues, it is for Shiloh,

and is a proper name, *the man of peace or rest, the peace-maker*. For other derivations and interpretations see Gesenius (*Thesaurus*, sub voc.) and Hengstenberg (*Christologie*, vol. i.). Whilst *man of peace* is far the most probable meaning of the name, those old versions which render it "He to whom the sceptre belongs," see the Messianic application equally with ourselves. This then is the first case in which the promises distinctly centre in one person; and He is to be a man of peace; He is to wield and retain the government, and the nations shall look up to Him and obey Him. [For a different view, see the art. SHILOH in this Dictionary.]

The next passage usually quoted is the prophecy of Balaam (Num. xxiv. 17-19). The *star* points indeed to the glory, as the sceptre denotes the power, of a king. And Onkelos and Jonathan (Pseudo) see here the Messiah. But it is doubtful whether the prophecy is not fulfilled in David (2 Sam. viii. 2, 14); and though David is himself a type of Christ, the direct Messianic application of this place is by no means certain.

The prophecy of Moses (Deut. xviii. 18), "I will raise them up a prophet from among their brethren, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him," claims attention. Does this refer to the Messiah? The reference to Moses in John v. 45-47 — "He wrote of me," seems to point to this passage; for it is a cold and forced interpretation to refer it to the whole types and symbols of the Mosaic Law. On the other hand, many critics would fain find here the divine institution of the whole prophetic order, which if not here, does not occur at all. Hengstenberg thinks that it does promise that an order of prophets should be sent, but that the singular is used in direct reference to the greatest of the prophets, Christ himself, without whom the words would not have been fulfilled. "The Spirit of Christ spoke in the prophets, and Christ is in a sense the only prophet." (1 Pet. i. 11.) Jews in earlier times might have been excused for referring the words to this or that present prophet; but the Jews whom the Lord rebukes (John v.) were inexcusable; for, having the words before them, and the works of Christ as well, they should have known that no prophet had so fulfilled the words as He had.

The passages in the Pentateuch which relate to "the Angel of the Lord" have been thought by many to bear reference to the Messiah.

The second period of Messianic prophecy would include the time of David. In the promises of a kingdom to David and his house "for ever" (2 Sam. vii. 13), there is more than could be fulfilled save by the eternal kingdom in which that of David merged; and David's last words dwell on this promise of an everlasting throne (2 Sam. xxiii.). Passages in the Psalms are numerous which are applied to the Messiah in the N. T.: such are Ps. ii., xvi., xxii., xl., cx. Other psalms quoted in the N. T. appear to refer to the actual history of another king; but only those who deny the existence of types and prophecy will consider this as an evidence against an ulterior allusion to Messiah: such psalms are xlv., lxxviii., lxxix., lxxxii. The advance in clearness in this period is great. The name of Anointed, *i. e.* King, comes in, and the Messiah is to come of the lineage of David. He is described in his exaltation, with his great kingdom that shall be spiritual rather than temporal. Ps. ii., xxi., xl.

ix. In other places he is seen in suffering and humiliation, Ps. xxii., xvi., xl.

After the time of David the predictions of the Messiah ceased for a time; until those prophets arose whose works we possess in the canon of Scripture. They nowhere give us an exact and complete account of the nature of Messiah; but different aspects of the truth are produced by the various needs of the people, and so they are led to speak of Him now as a Conqueror or a Judge, or a Redeemer: from sin; it is from the study of the whole of them that we gain a clear and complete image of His Person and kingdom. This third period lasts from the reign of Uzziah to the Babylonish Captivity. The Messiah is a king and Ruler of David's house, who should come to reform and restore the Jewish nation and purify the church, as in Is. xl., xl.-lxvi. The blessings of the restoration, however, will not be confined to Jews; the heathen are made to share them fully (Is. ii., lxvi.). Whatever theories have been attempted about Isaiah liii., there can be no doubt that the most natural is the received interpretation that it refers to the suffering Redeemer; and so in the N. T. it is always considered to do. The passage of Micah v. 2 (comp. Matt. ii. 6) left no doubt in the mind of the Sanhedrim as to the birthplace of the Messiah. The lineage of David is again alluded to in Zechariah xii. 10-14. The time of the second Temple is fixed by Haggai ii. 9 for Messiah's coming; and the coming of the Forerunner and of the Anointed are clearly revealed in Mal. iii. 1, iv. 5, 6.

The fourth period after the close of the canon of the O. T. is known to us in a great measure from allusions in the N. T. to the expectation of the Jews. From such passages as Ps. ii. 2, 6, 8; Jer. xxiii. 5, 6; Zech. ix. 9, the Pharisees and those of the Jews who expected Messiah at all, looked for a temporal prince only. The Apostles themselves were infected with this opinion, till after the Resurrection, Matt. xx. 20, 21; Luke xxiv. 21; Acts i. 6. Gleams of a purer faith appear, Luke ii. 30, xxiii. 42; John i. 25. On the other hand there was a skeptical school which had discarded the expectation altogether. No mention of Messiah appears in the Book of Wisdom, nor in the writings of Philo; and Josephus avoids the doctrine. Intercourse with heathens had made some Jews ashamed of their fathers' faith.

The expectation of a golden age that should return upon the earth, was common in heathen nations (Hesiod, *Works and Days*, 109; Ovid, *Met.* i. 89; Virg. *Ecl.* iv.; and passages in Euseb. *Præp. Ev.* i. 7, xii. 13). This hope the Jews also shared; but with them it was associated with the coming of a particular Person, the Messiah. It has been asserted that in Him the Jews looked for an earthly king, and that the existence of the hope of a Messiah may thus be accounted for on natural grounds and without a divine revelation. But the prophecies refute this: they hold out not a Prophet only, but a King and a Priest, whose business it should be to set the people free from sin, and to teach them the ways of God, as in Ps. xxii., xl., ix.; Is. ii., xi., liii. In these and other places too the power of the coming One reaches beyond the Jews and embraces all the Gentiles, which is contrary to the exclusive notions of Judaism. A fair consideration of all the passages will convince that the growth of the Messianic idea in the prophecies is owing to revelation from God. The witness of the

N. T. to the O. T. prophecies can bear no other meaning; it is summed up in the words of Peter; — "We have also a more sure word of prophecy; whereunto ye do well that ye take heed, as unto a light that shineth in a dark place, until the day dawn, and the day-star arise in your hearts: knowing this first, that no prophecy of the Scripture is of any private interpretation. For the prophecy came not in old time by the will of man: but holy men of God spake as they were moved by the Holy Ghost" (2 Pet. i. 19-21; compare the elaborate essay on this text in Knapp's *Opusculum*, vol. i.). Our Lord affirms that there are prophecies of the Messiah in O. T., and that they are fulfilled in Him, Matt. xxvii. 54; Mark ix. 12; Luke xviii. 31-33, xxii. 37, xxiv. 27; John v. 39, 46. The Apostles preach the same truth, Acts ii. 16, 25, viii. 28-35, x. 43, xiii. 23, 32, xxvi. 22, 23; 1 Pet. i. 11; and in many passages of St. Paul. Even if internal evidence did not prove that the prophecies were much more than vague longings after better times, the N. T. proclaims everywhere that although the Gospel was the sun, and O. T. prophecy the dim light of a candle, yet both were light, and both assisted those who heeded them, to see aright; and that the prophets interpreted, not the private longings of their own hearts but the will of God, in speaking as they did (see Knapp's Essay for this explanation) of the coming kingdom.

Our own theology is rich in prophetic literature; but the most complete view of this whole subject is found in Hengstenberg's *Christologie*, the second edition of which, greatly altered, is translated in Clark's Foreign Theological Library. See as already mentioned, SAVIOUR; SON OF GOD.

\* A full critical history of the Jewish expectation of a Messiah, with particular reference to the opinions prevalent at the time of Christ, is a desideratum. The subject is attended with great difficulties. The date of some of the most important documents bearing upon it is still warmly debated by scholars. See, *e. g.*, in this Dictionary, the articles DANIEL, BOOK OF; ENOCH, BOOK OF; MACCABEES (THE), vol. ii. pp. 1713, 1714, and note (on the so-called "Psalms of Solomon"); MOSES (addition in Amer. ed. on the recently discovered "Assumption of Moses"); and VERSIONS, ANCIENT (*Targum*). Most of the older works on the later opinions of the Jews (as those of Allix and Schöttgen) were written with a polemic aim, in an uncritical spirit, and depend largely upon untrustworthy authorities, making extensive use, for example, of the book Zohar, now proved to be a forgery of the thirteenth century. (See Ginsburg, *The Kabbalah*, etc. Lond. 1865.)

Besides the books of the Old and New Testament and the Greek Apocrypha, the principal original sources of information on the subject are the Septuagint Version; the Jewish portion of the Sibylline Oracles, particularly Lib. III. 97-817, about 140 B. C. (best editions by Friedlieb, Leipz. 1852, and Alexandre, 2 vols. in 4 parts, Paris, 1841-56; comp. the dissertations of Bleek, Lücke, Hilgenfeld, and Ewald); the book of Enoch; the Psalms of Solomon (see reference above); the Assumption of Moses (see above); the works of Philo and Josephus (which contain very little); the Book of Jubilees or Little Genesis (trans. from the Ethiopic by Dillmann in Ewald's *Jahrb. f. Bibl. wiss.* 1849, pp. 230-256, and 1850, pp. 1-96); the Second (Fourth) Book of Esdras (Ezra); the Apocalypse of Baruch (publ. in Syriac with a Latin translation by Ceriani

in his *Monumenta sacra et profana ex Codd. Bibl. Ambrosiane*, tom. i. fasc. 1, 2, Mediolani, 1861-66); the Mishna (which does not contain much; ed. with Lat. version and the comm. of Maimonides and Bartenora by Surenhusius, 6 vols. fol. 1698-1703, Germ. trans. by Rabe, 1760-63, and by Jost, in Hebrew letters, Berl. 1832-34; eighteen treatises in English by De Sola and Raphall, Lond. 1845); the Targums (see reference above); the Targums of Onkelos and Pseudo-Jonathan on the Pentateuch trans. by Etheridge, 2 vols. Lond. 1862-65); the earliest Midrashim (*Mechilta*, *Siphra*, *Siphri*, on Exod., Levit., Num., and Deut., publ. with a Lat. version in Ugolini's *Thesaurus*, tom. xiv., xv.); the Jerusalem and Babylonian Gemara, and other Rabbinical writings. There is no complete translation of the Talmud; but 20 treatises out of the 39 in the Jerusalem Gemara are published with a Latin version in Ugolini's *Thesaurus* (tom. xvii., xviii., xx., xxv., xxx.), and three of the Babylonian (tom. xix., xxv.). Something on the opinions of the later Jews may be gathered from the Christian fathers, particularly Justin Martyr (*Dial. c. Tryph.*), Origen, and Jerome; and the early Christians appear to have transferred many of the Jewish expectations concerning the Messiah to their doctrine of the Second Advent of Christ, e. g. with reference to the appearance of ELLIAH as his precursor (see vol. i. p. 710, note, and add the full illustration of this point by Thilo, *Codex Apoc. N. T.* p. 761 ff.).

On the Messianic prophecies of the Old Testament the more important literature is referred to by Hase in his *Leben Jesu*, § 36 (4<sup>e</sup> Aufl.). See also Knobel, *Prophetismus d. Hebr.*, Bresl. 1837, i. 311 note, 328 note, and Diestel, *Gesch. d. A. Test. in d. christl. Kirche*, Jena, 1869, p. 770 ff. With Hengstenberg's *Christology* should be compared his *Comm. on the Psalms*, in which his former views are considerably modified. See also Dr. Noyes's review of the first edition of the *Christology*, in the *Christ. Exam.* for July, 1834, xvi. 321-364, and the Introduction to his *New Trans. of the Heb. Prophets*, 3d ed. Bost. 1866. Hengstenberg's essay on the *Godhead of the Messiah in the Old Test.* was translated from his *Christology* in the *Bibl. Repos.* for 1833, iii. 653-683, and reviewed by Dr. Noyes in the *Christian Examiner* for January, May, and July, 1836, the last two articles relating to the "Angel of Jehovah." See, further, J. Pye Smith, *Script. Testimony to the Messiah*, 5th ed. 2 vols. Edin. 1859; J. J. Stähelin, *Die messian. Weissagungen des A. T.*, Berl. 1847; Rev. David Green, *The Knowledge and Faith of the O. T. Saints respecting the Promised Messiah*, in the *Bibl. Sacra* for Jan. 1857, xiv. 166-199; Prof. S. C. Bartlett, *Theories of Messianic Prophecy*, in the *Bibl. Sacra* for Oct. 1861, xviii. 724-770; and Ed. riehm, *Zur Charakteristik d. messian. Weissagung*, in the *Theol. Stud. u. Krit.* 1865, pp. 3-71, 125-189, and 1869, pp. 209-284.

On the general subject of the Jewish opinions concerning the Messiah the following works may be referred to. Buxtorf, *Lex. Chald. Talm. et Rabbinicum*, Basil. 1640, fol., espec. coll. 1267 ff. and 221 ff.; also his *Synagoga Judaica*, c. 50, "De venturo Iud. Messia." Ant. Hulsius, *Theol. Judaica*, Bredæ, 1653, 4to. Ed. Pocock, *Portu Mosis*, etc. (of Maimonides), Oxon. 1654, see cap. vi. of the *Notæ Miscellanæ*, "In quo variæ Judæorum de Resur. Mort. Sententiæ variantur;" also in his *Theol. Works*, i. 159-213. W. Schickel, *Jus Regium Hebr. cum Not's Corporei* (1674).

theor. xx. ad fin., reprinted in Ugolini's *Thes.* xxiv. 792-824. Joh. a Lent, *Schediasma hist.-phil. de Judæorum Pseudo-Messias*, in Ugolini's *Thes.* xxiii. 1019-90. MESSIAS (Μεσσίας; *Messias*), the Greek form of MESSIAH (John i. 41; iv. 25).

**METALS.** The Hebrews, in common with other ancient nations, were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is that which describes the country of Havilah as the land which abounded in gold, and the gold of which was good (Gen. ii. 11, 12). The first artist in metals was a Cainite, Tubal Cain, the son of Lamech, the forger or sharpener of every instrument of copper (A. V. "brass") and iron (Gen. iv. 22). "Abram was very rich in cattle, in silver, and in gold" (Gen. xiii. 2); silver, as will be shown hereafter, being the medium of commerce, while gold existed in the shape of ornaments, during the patriarchal ages. Tin is first mentioned among the spoils of the Midianites which were taken when Balaam was slain (Num. xxxi. 22), and lead is used to heighten the imagery of Moses' triumphal song (Ex. xv. 10). Whether the ancient Hebrews were acquainted with steel, properly so called, is uncertain; the words so rendered in the A. V. (2 Sam. xxii. 35; Job xx. 24; Ps. xviii. 34; Jer. xv. 12) are in all other passages translated brass, and would be more correctly copper. The "northern iron" of Jer. xv. 12 is believed by commentators to be iron hardened and tempered by some peculiar process, so as more nearly to correspond to what we call steel [STEEL]; and the "flaming torches" of Nah. ii. 3 are probably the flashing steel scythes of the war-chariots which should come against Nineveh. Besides the simple metals, it is supposed that the Hebrews used the mixture of copper and tin known as bronze, and probably in all cases in which copper is mentioned as in any way manufactured, bronze is to be understood as the metal indicated. But with regard to the *chashmal* (A. V. "amber") of Ez. i. 4, 27, viii. 2, rendered by the LXX. *ἤλεκτρον*, and the Vulg. *electrum*, by which our translators were misled, there is considerable difficulty. Whatever be the meaning of *chashmal*, for which no satisfactory etymology has been proposed, there can be but little doubt that by *ἤλεκτρον* the LXX. translators intended, not the fossil resin known by that name to the Greeks and to us as "amber," but the metal so called, which consisted of a mixture of four parts of gold with one of silver, described by

Pliny (xxxiii. 23) as more brilliant than silver by lamp-light. There is the same difficulty attending the *χαλκολίβανον* (Rev. i. 15, ii. 18, A. V. "fine brass"), which has hitherto successfully resisted all the efforts of commentators, but which is explained by Suidas as a kind of *electron*, more precious than gold. That it was a mixed metal of great brilliancy is extremely probable, but it has hitherto been impossible to identify it. In addition to the metals actually mentioned in the Bible, it has been supposed that *mercury* is alluded to in Num. xxxi. 23, as "the water of separation," being "looked upon as the mother by which all the metals were fructified, purified, and brought forth," and on this account kept secret, and only mysteriously hinted at (Napier, *Metal of the Bible*, Intr. p. 6). Mr. Napier adds, "there is not the slightest foundation for this supposition."

With the exception of iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply, and as it is found most frequently in alluvial soil among the débris of rocks washed down by the torrents, it was known at a very early period, and was procured with little difficulty. The existence of gold and the prevalence of gold ornaments in early times are no proof of a high state of civilization, but rather the reverse. Gold was undoubtedly used before the art of working copper or iron was discovered. We have no indications of gold streams or mines in Palestine. The Hebrews obtained their principal supply from the south of Arabia, and the commerce of the Persian Gulf. The ships of Hiram king of Tyre brought it for Solomon (1 K. ix. 11, x. 11), and at a later period, when the Hebrew monarch had equipped a fleet and manned it with Tyrian sailors, the chief of their freight was the gold of Ophir (1 K. ix. 27, 28). It was brought thence in the ships of Tarshish (1 K. xxii. 48), the Indiamen of the ancient world; and Parvaim (2 Chr. iii. 6), Raamah (Ez. xxvii. 22), Sheba (1 K. x. 2, 10; Ps. lxxii. 15; Is. lx. 6; Ez. xxvii. 22), and Uphaz (Jer. x. 9), were other sources of gold for the markets of Palestine and Tyre. It was probably brought in the form of ingots (Josh. vii. 21; A. V. "wedge," lit. "tongue"), and was rapidly converted into articles of ornament and use. Ear-rings, or rather nose-rings, were made of it, those given to Rebecca were half a shekel ( $\frac{1}{2}$  oz.) in weight (Gen. xxiv. 22), bracelets (Gen. xxiv. 22), chains (Gen. xli. 42), signets (Ex. xxxv. 22), *bullets* or spherical ornaments suspended from the neck (Ex. xxxv. 22), and chains for the legs (Num. xxxi. 50; comp. Is. iii. 18; Plin. xxxiii. 12). It was used in embroidery (Ex. xxxix. 3; 2 Sam. i. 24; Plin. viii. 74); the decorations and furniture of the tabernacle were enriched with the gold of the ornaments which the Hebrews willingly offered (Ex. xxxv.-xl.); the same precious metal was lavished upon the Temple (1 K. vi., vii.); Solomon's throne was overlaid with gold (1 K. x. 18), his drinking-cups and the vessels of the house of the forest of Lebanon were of pure gold (1 K. x. 21), and the neighboring princes brought him as presents vessels of gold and of silver (1 K. x. 25). So plentiful indeed was the supply of the precious metals during his reign that silver was esteemed of little worth (1 K. x. 21, 27). Gold and silver were devoted to the fashioning of idolatrous images (Ex. xx. 23, xxxii. 4; Deut. xxix. 17; 1 K. xii. 28). The crown on the head of Malcham (A. V. "their king"), the idol of the Ammonites at Rabbah, weighed a talent

of gold, that is 125 lbs. troy, a weight so great that it could not have been worn by David among the ordinary insignia of royalty (2 Sam. xii. 30). The great abundance of gold in early times is indicated by its entering into the composition of every article of ornament and almost all of domestic use. Among the spoils of the Midianites taken by the Israelites, in their bloodless victory when Balaam was slain, were ear-rings and jewels to the amount of 16,750 shekels of gold (Num. xxxi. 48-54), equal in value to more than 30,000*l.* of our present money. 1700 shekels of gold (worth more than 3000*l.*) in nose jewels (A. V. "ear-rings") alone were taken by Gideon's army from the slaughtered Midianites (Judg. viii. 26). These numbers, though large, are not incredibly great, when we consider that the country of the Midianites was at that time rich in gold streams which have been since exhausted, and that like the Malays of the present day, and the Peruvians of the time of Pizarro, they carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war, is so enormous, that we are tempted to conclude the numbers exaggerated. From the gold shields of Hadadezer's army of Syrians and other sources he had collected, according to the chronicler (1 Chr. xxii. 14), 100,000 talents of gold, and 1,000,000 talents of silver; to these must be added his own contribution of 3,000 talents of gold and 7,000 of silver (1 Chr. xxix. 2-4), and the additional offerings of the people, the total value of which, estimating the weight of a talent to be 125 lbs. Troy, gold at 73*s.* per oz., and silver at 4*s.* 4*d.* per oz., is reckoned by Mr. Napier to be 939,929,687*l.* Some idea of the largeness of this sum may be formed by considering that in 1855 the total amount of gold in use in the world was calculated to be about 820,000,000*l.* Undoubtedly the quantity of the precious metals possessed by the Israelites might be greater in consequence of their commercial intercourse with the Phœnicians, who were masters of the sea; but in the time of David they were a nation struggling for political existence, surrounded by powerful enemies, and without the leisure necessary for developing their commercial capabilities. The numbers given by Josephus (*Ant.* vii. 14. § 2) are only one tenth of those in the text, but the sum, even when thus reduced, is still enormous.<sup>a</sup> But though gold was thus common, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephron's field by Abraham for 400 shekels of silver (Gen. xxiii. 16); slaves were bought with silver (Gen. xvii. 12); silver was the money paid by Abimelech as a compensation to Abraham (Gen. xx. 16); Joseph was sold to the Ishmaelite merchants for twenty pieces of silver (Gen. xxxvii. 28); and generally in the Old Testament, "money" in the A. V. is literally silver. The first payment in gold is mentioned in 1 Chr. xxi. 25, where David buys the threshing-floor of Ornan, or Araunah, the Jebusite, for six hundred shekels of gold by weight.<sup>b</sup> But in the parallel narrative of the transaction in 2 Sam. xxiv. 24, the price paid for the threshing-floor and the oxen is fifty shekels of silver. An attempt has been made

<sup>a</sup> As an illustration of the enormous wealth which it was possible for one man to collect, we may quote from Herodotus (vii. 28) the instance of Pythius the Lydian, who placed at the disposal of Xerxes, on his

by Keil to reconcile these two passages by supposing that in the former the purchase referred to was that of the entire hill on which the threshing-floor stood, and in the latter that of the threshing-floor itself. But the close resemblance between the two narratives renders it difficult to accept this explanation and to imagine that two different circumstances are described. That there is a discrepancy between the numbers in 2 Sam. xxiv. 9 and 1 Chr. xxi. 5 is admitted, and it seems impossible to avoid the conclusion that the present case is but another instance of the same kind. With this one exception there is no case in the O. T. in which gold is alluded to as a medium of commerce; the Hebrew coinage may have been partly gold, but we have no proof of it.

Silver was brought into Palestine in the form of plates from Tarshish, with gold and ivory (1 K. x. 22; 2 Chr. ix. 21; Jer. x. 9). The accumulation of wealth in the reign of Solomon was so great that silver was but little esteemed; "the king made silver to be in Jerusalem as stones" (1 K. x. 21, 27). With the treasures which were brought out of Egypt, not only the ornaments but the ordinary metal-work of the tabernacle were made. Silver was employed for the sockets of the boards (Ex. xxvi. 19, xxxvi. 24), and for the hooks of the pillars and their fillets (Ex. xxxviii. 10). The capitals of the pillars were overlaid with it (Ex. xxxviii. 17), the chargers and bowls offered by the princes at the dedication of the tabernacle (Num. vii. 13, &c.), the trumpets for marshalling the host (Num. x. 2), and some of the candlesticks and tables for the Temple were of silver (1 Chr. xxviii. 15, 16). It was used for the setting of gold ornaments (Prov. xxv. 11) and other decorations (Cant. i. 11), and for the pillars of Solomon's gorgeous chariot or palanquin (Cant. iii. 10).

From a comparison of the different amounts of gold and silver collected by David, it appears that the proportion of the former to the latter was 1 to 9 nearly. Three hundred talents of silver and thirty talents of gold were demanded of Hezekiah by Sennacherib (2 K. xviii. 14); but later, when Pharaoh-nechoh took Jehoahab prisoner, he imposed upon the land a tribute of 100 talents of silver, and only one talent of gold (2 K. xxiii. 33). The difference in the proportion of gold to silver in these two cases is very remarkable, and does not appear to have been explained.

Brass, or more properly copper, was a native product of Palestine, "a land whose stones are iron, and out of whose hills thou mayest dig copper" (Deut. viii. 9; Job xxviii. 2). It was so plentiful in the days of Solomon that the quantity employed in the Temple could not be estimated, it was so great (1 K. vii. 47). Much of the copper which David had prepared for this work was taken from the Syrians after the defeat of Hadadezer (2 Sam. viii. 8), and more was presented by Toi, king of Hamath. The market of Tyre was supplied with vessels of the same metal by the merchants of Javan, Tubal, and Meshech (Ez. xxvii. 13). There is strong reason to believe that brass, a mixture of copper and zinc, was unknown to the ancients. To the latter metal no allusion is found. But tin was well known, and from the difficulty which attends

way to Greece, 2,000 talents of silver, and 3,998,000 gold darics; a sum which in these days would amount to about 54 millions of pounds sterling.

<sup>b</sup> Literally, "shekels of gold, a weight of 600"

the toughening pure copper so as to render it fit for hammering, it is probable that the mode of de-oxidizing copper by the admixture of small quantities of tin had been early discovered. "We are inclined to think," says Mr. Napier, "that Moses used no copper vessels for domestic purposes, but bronze, the use of which is less objectionable. Bronze, not being so subject to tarnish, takes on a finer polish, and, besides, [its] being much more easily melted and cast would make it to be more extensively used than copper alone. These practical considerations, and the fact of almost all the antique castings and other articles in metal that are preserved from these ancient times being composed of bronze, prove in our opinion that where the word 'brass' occurs in Scripture, except where it refers to an ore, such as Job xxviii. 2 and Deut. viii. 9, it should be translated bronze" (*Metal. of the Bible*, p. 66). Arms (2 Sam. xxi. 16; Job xx. 24; Ps. xviii. 34) and armor (1 Sam. xvii. 5, 6, 38) were made of this metal, which was capable of being so wrought as to admit of a keen and hard edge. The Egyptians employed it in cutting the hardest granite. The Mexicans, before the discovery of iron, "found a substitute in an alloy of tin and copper; and with tools made of this bronze could cut not only metals, but, with the aid of a siliceous dust, the hardest substances, as basalt, porphyry, amethysts, and emeralds" (Prescott, *Conq. of Mexico*, ch. 5). The great skill attained by the Egyptians in working metals at a very early period throws light upon the remarkable facility with which the Israelites, during their wanderings in the desert, elaborated the works of art connected with the structure of the Tabernacle, for which great acquaintance with metals was requisite. In the troublous times which followed their entrance into Palestine this knowledge seems to have been lost, for when the Temple was built the metal-workers employed were Phœnicians.

Iron, like copper, was found in the hills of Palestine. The "iron mountain" in the trans-Jordanic region is described by Josephus (*B. J.* iv. 8, § 2), and was remarkable for producing a particular kind of palm (Mishna, *Succa*, ed. Dachs, p. 182). Iron mines are still worked by the inhabitants of *Kefr Hâneh* in the S. of the valley *Zuharâni*; smelting works are found at *Shemuster*, 3 hours W. of Baalbek, and others in the oak-woods at *Masbek* (Ritter, *Erkunde*, xvii. 73, 201); but the method employed is the simplest possible, like that of the old Samothracians, and the iron so obtained is chiefly used for horse-shoes.

Tin and lead were both known at a very early period, though there is no distinct trace of them in Palestine. The former was among the spoils of the Midianites (Num. xxxi. 22), who might have obtained it in their intercourse with the Phœnician merchants (comp. Gen. xxxvii. 25, 36), who themselves procured it from Tarshish (Ez. xvii. 12) and the tin countries of the west. The allusions to it in the Old Testament principally point to its admixture with the ores of the precious metals (Is. i. 25; Ez. xxii. 18, 20). It must have occurred in the composition of bronze: the Assyrian bowls and

dishes in the British Museum are found to contain one part of tin to ten of copper. "The tin was probably obtained from Phœnicia, and consequently that used in the bronzes in the British Museum may actually have been exported, nearly three thousand years ago, from the British Isles" (Layard, *Nin. and Bab.* p. 191).

Antimony (2 K. ix. 30; Jer. iv. 30, A. V. "painting"), in the form of powder, was used by the Hebrew women, like the *kohl* of the Arabs, for coloring their eyelids and eyebrows. [PAINT.]

Further information will be found in the articles upon the several metals, and whatever is known of the metallurgy of the Hebrews will be discussed under MINING. W. A. W.

\* METAPHORS OF PAUL. [GAMES; JAMES, EPISTLE OF.]

METERUS (*Ματρηρός*: [Ald. *Μετρήρος*]). According to the list in 1 Esdr. v. 17, "the sons of Meterus" returned with Zorobabel. There is no corresponding name in the lists of Ezr. ii. and Neh. vii., nor is it traceable in the Vulgate.

METHEG-AMMAH (*מֵתֶג אֲמָחַ*) [see below]: *τὴν ἀφορισμένην*: *Frænum tribulati*, a place which David took from the Philistines, apparently in his last war with them (2 Sam. viii. 1). In the parallel passage of the Chronicles (1 Chr. xviii. 1), "Gath and her daughter-towns" is substituted for Metheg-ha-Ammah.

The renderings are legion, almost each translator having his own; "but the interpretations may be reduced to two: 1. That adopted by Gesenius (*Thesaur.* 113) and Fürst (*Handb.* 102 b), in which Ammah is taken as meaning "mother-city" or "metropolis" (comp. 2 Sam. xx. 19), and Metheg-ha-Ammah "the bridle of the mother-city" — namely of Gath, the chief town of the Philistines. If this is correct, the expression "daughter-towns" in the corresponding passage of Chronicles is a closer parallel, and more characteristic, than it appears at first sight to be. 2. That of Ewald (*Gesch.* iii. 190), who, taking Ammah as meaning the "forearm," treats the words as a metaphor to express the perfect manner in which David had smitten and humbled his foes, had torn the bridle from their arm, and thus broken forever the dominion with which they curbed Israel, as a rider manages his horse by the rein held fast on his arm.

The former of these two has the support of the parallel passage in Chronicles; and it is no valid objection to it to say, as Ewald in his note to the above passage does, that Gath cannot be referred to, because it had its own king still in the days of Solomon, for the king in Solomon's time may have been, and probably was, tributary to Israel, as the kings "on this side the Euphrates" (1 K. iv. 24) were. On the other hand, it is an obvious objection to Ewald's interpretation that to control his horse a rider must hold the bridle not on his arm but fast in his hand. G.

METHUSAEI (*מְתוּשָׁאֵל*) *man of God*: *Μαθουσαῖλα*: *Mathusaël*), the son of Mehujael,

a A large collection of these will be found in *Glasgow Philologia Sacra* (lib. iv. tr. 3, obs. 17), together with a singular Jewish tradition bearing upon the point. The most singular rendering, perhaps, is that of Aquila, *χαλιὸς τοῦ ὑδραγωγίου*, "the bridle of the squeegee," perhaps with some reference to the irriga-

tion of the rich district in which Gath was situated. *Aqueeduct* is derived from the Chaldee version, *מֵתָחַ*, which has that signification amongst others. Aquila adopts a similar rendering in the case of the hill AMMAH.

fourth in descent from Cain, and father of Lamech (Gen. iv. 18). A. B.

**METHU'SELAH** (מֶתוּשֶׁלַח, *man of off-spring*, or possibly *man of a divt*: *α Μαθουσάλα: Mathusalai*), the son of Enoch, sixth in descent from Seth, and father of Lamech. The resemblance of the name to the preceding, on which (with the coincidence of the name Lamech in the next generation in both lines) some theories have been formed, seems to be apparent rather than real. The life of Methuselah is fixed by Gen. v. 27 at 969 years, a period exceeding that of any other patriarch, and, according to the Hebrew chronology, bringing his death down to the very year of the Flood. The LXX. reckoning makes him die six years before it; and the Samaritan, although shortening his life to 720 years, gives the same result as the Hebrew. [CHRONOLOGY.] On the subject of Longevity, see PATRIARCHS. A. B.

\* **METE-YARD**, Lev. xix. 35. [MEASURE.]

**MEUNIM** (מְעֻנִים) [*habitation*]: [Rom. *Meiunon*; Vat. *Μεσεινωμ*; [FA. *Μεσσεινωμ*]; Alex. *Μεσεινωμ*; *Munime*], Neh. vii. 52. Elsewhere given in A. V. as MEHUNIM and MEHUNIMS.

**MEZ'AHAB** (מֵי זָהָב) [see below]: *Μαζωσάβ*; Alex. *Μεζωσβ* in Gen., but omits in 1 Chr.; [in Chr., Comp. *Μεζαβ*:] *Mezabab*. The father of Matred and grandfather of Mehetabel, who was wife of Hadar or Hadad, the last named king of Edom (Gen. xxxvi. 39; 1 Chr. i. 50). His name, which, if it be Hebrew, signifies "waters of gold," has given rise to much speculation. Jarchi renders it, "what is gold?" and explains it, "he was a rich man, and gold was not valued in his eyes at all." Abarbanel says he was "rich and great, so that on this account he was called Mezahab, for the gold was in his house as water." "Haggæon" (writes Aben Ezra) "said he was a refiner of gold, but others said that it pointed to those who make gold from brass." The Jerusalem Targum of course could not resist the temptation of punning upon the name, and combined the explanations given by Jarchi and Haggæon. The latter part of Gen. xxxvi. 39 is thus rendered: "the name of his wife was Mehetabel, daughter of Matred, the daughter of a refiner of gold, who was wearied with labor (מְטַרְחֵל, *matredâ*) all the days of his life; after he had eaten and was filled, he turned and said, what is gold? and what is silver?" A somewhat similar paraphrase is given in the Targum of the Pseudo-Jonathan, except that it is there referred to Matred, and not to Mezahab. The Arabic Version translates the name "water of gold," which must have been from the Hebrew, while in the Targum of Onkelos it is rendered "a refiner of gold," as in the *Questiones Hebraicæ in Paralip.*,

<sup>α</sup> There is some difficulty about the derivation of this name. The latter portion of the root is certainly נִשְׁלַח (from שָׁלַח, "to send"), used for a "misdeed" in 2 Chr. xxxii. 5. Joel ii. 8, and for a "branch" in Cant. iv. 13, Is. xvi. 8. The former portion is derived by many of the older Hebraists from בּוֹרַח, "to flee," and various interpretations given accordingly. See in Leusden's *Onomasticon*, "mortem suam misit," mortis suæ arma," etc. Others make it "he dies, and it [i. e. the Flood] is sent," supposing it either a

attributed to Jerome, and the traditioes given above; which seems to indicate that originally there was something in the Hebrew text, now wanting, which gave rise to this rendering, and of which the present reading, מֵי, *mé*, is an abbreviation.

W. A. W.

**MI'AMIN** (מִיָּמִין) [*on the right hand*, or perhaps *son of the right hand*]: *Μεαμίν*; [Vat. FA. *Μαμμειν*]; Alex. *Μεαμμ*: *Mivmin*. 1. A layman of Israel of the sons of Parosh, who had married a foreign wife and put her away at the bidding of Ezra (Ezr. x. 25). He is called MAELUS in 1 Esdr. ix. 26.

2. (Omitted in Vat. MS., [also in Rom. Alex. FA.]; FA. <sup>3</sup>] *Μειμιν*: *Miamin*.) A priest or family of priests who went up from Babylon with Zerubbabel (Neh. xii. 5); probably the same as MIJAMIN in Neh. x. 7. In Neh. xii. 17 the name appears in the form MINIAMIN.

**MIB'HAR** (מִיבְּחַר) [*choice*, and hence *chosen*, *best*]: *Μεβαράλ*; Alex. *Μαβαρ*: *Mibahar*. "Mibhar the son of Haggeri" is the name of one of David's heroes in the list given in 1 Chr. xi. The verse (38) in which it occurs appears to be corrupt, for in the corresponding catalogue of 2 Sam. xxiii. 36 we find, instead of "Mibhar the son of Haggeri," "of Zobah, Bani the Gadite." It is easy to see,

if the latter be the true reading, how בְּנֵי הַגִּרִּי, *Bani Haggadi*, could be corrupted into בְּנֵי הַגִּרִּי, *ben-haggeri*; and הגרר is actually the reading of three of Kennicott's MSS. in 1 Chr., as well as of the Syriac and Arab. versions, and the Targum of R. Joseph. But that "Mibhar" is a corruption of מִיבְּחַר (or מִיבְּבַח, acc. to some MSS.), *mistsobâh*, "of Zobah," as Kennicott (*Dissert.* p. 215) and Cappellus (*Crit. Sacr.* i. c. 5) conclude, is not so clear, though not absolutely impossible. It would seem from the LXX. of 2 Sam., where, instead of "Zobah" we find *πολυδυνάμειος*, that both readings originally co-existed, and were read by the LXX. מִיבְּחַר הַגִּרִּי, *mibchar hatsobâb*, "choice of the host." If this were the case, the verse in 1 Chr. would stand thus: "Igal the brother of Nathan, flower of the host; Bani the Gadite." W. A. W.

**MIB'SAM** (מִיבְּשָׁם, *sweet odor*, Ges.: *Μαρσάμ*; [in 1 Chr., Vat. *Μασσα*, Alex. *Μαβσαν*, Ald. *Μαβσάμ*]; *Malsam*). 1. A son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), not elsewhere mentioned. The signification of his name has led some to propose an identification of the tribe sprung from him with some one of the Abrahamic tribes settled in Arabia aromatifera, and a connection with the balsam of Arabia is suggested (Bunsen, *Bibcl-*

name given afterwards from the event, or one given in prophetic foresight by Enoch. The later Hebraists (see Ges. *Lex.*) derive it from מִבְּרַח, the constructive form of בָּרַח, "man," the obsolete singular, of which the plural מִבְּרַחִים is found. This gives one or other of the interpretations in the text. We can only decide between them (if at all) by internal probability, which seems to incline to the former.

verk, Kalisch, Gen. 183). The situation of Mekkeh is well adapted for his settlements, surrounded as it is by traces of other Ishmaelite tribes; nevertheless the identification seems fanciful and far-fetched.

2. [Μαβαράδου; Alex. Μαβαρῶν: *Mapsam.*] A son of Simeon (1 Chr. iv. 25), perhaps named after the Ishmaelite Mibsam, for one of his brothers was named MISHMA, as was one of those of the older Mibsam. E. S. P.

MIB'ZAR (מִבְצָר [fortress]: in Gen. Μαζάρ; in 1 Chr., Βαβζάρ; [Vat. Μαζάρ]; Alex. Μαβζαρ: *Mabsar.*) One of the phylarchs or "dukes" of Edom (1 Chr. i. 53) or Esau (Gen. xxxvi. 42) after the death of Hadad or Hadar. They are said to be enumerated "according to their settlements in the land of their possession;" and Knobel (*Genesis*), understanding Mibzar (lit. "fortress") as the name of a place, has attempted to identify it with the rocky fastness of Petra, "the strong city" (עִיר מִבְצָר, *ir mibtsar*, Ps. cviii. 10; comp. Ps. lx. 9), "the cliff," the chasms of which were the chief stronghold of the Edomites (Jer. xlix. 16; Obad. 3). W. A. W.

MICAH (מִיכָה, but in vv. 1 and 4, מִיכָהּ, i. e. Micāyēhu [*who is like Jehovah*]: Μιχαίας, but [Vat.] once [or more, Mai] Μειχαίας; Alex. Μειχα, but once [twice] Μιχα: *Michas, Micha*), an Israelite whose familiar story is preserved in the xviii and xviii chapters of Judges. That it is so preserved would seem to be owing to Micah's accidental connection with the colony of Danites who left the original seat of their tribe to conquer and found a new Dan at Laish—a most happy accident, for it has been the means of furnishing us with a picture of the "interior" of a private Israelite family of the rural districts, which in many respects stands quite alone in the sacred records, and has probably no parallel in any literature of equal age.<sup>a</sup>

But apart from this the narrative has several points of special interest to students of Biblical history in the information which it affords as to the condition of the nation, of the members of which Micah was probably an average specimen.

We see (1.) how completely some of the most solemn and characteristic enactments of the Law had become a dead letter. Micah was evidently a devout believer in Jehovah. While the Danites in their communications use the general term *Elohim*, "God" ("ask counsel of God," xviii. 5; "God hath given it into your hands," ver. 10), with

Micah and his household the case is quite different. His one anxiety is to enjoy the favor of Jehovah<sup>b</sup> (xvii. 13); the formula of blessing used by his mother and his priest invokes the same awful name (xvii. 2, xviii. 6); and yet so completely ignorant is he of the Law of Jehovah, that the mode which he adopts of honoring Him is to make a molten and a graven image, teraphim or images of domestic gods, and to set up an unauthorized priesthood, first in his own family (xvii. 5), and then in the person of a Levite not of the priestly line (ver. 12)—thus disobeying, in the most flagrant manner, the second of the Ten Commandments, and the provisions for the priesthood—both laws which lay in a peculiar manner at the root of the religious existence of the nation. Gideon (viii. 27) had established an ephod; but here was a whole chapel of idols, a "house of gods" (xvii. 5), and all dedicated to Jehovah.

(2.) The story also throws a light on the condition of the Levites. They were indeed "divided in Jacob and scattered in Israel" in a more literal sense than that prediction is usually taken to contain. Here we have a Levite belonging to Bethlehem-judah, a town not allotted to the Levites, and with which they had, as far as we know, no connection; next wandering forth, with the world before him, to take up his abode wherever he could find a residence; then undertaking, without hesitation, and for a mere pittance, the charge of Micah's idol-chapel; and lastly, carrying off the property of his master and benefactor, and becoming the first priest to another system of false worship, one too in which Jehovah had no part, and which ultimately bore an important share in the disruption of the two kingdoms.<sup>c</sup>

But the transaction becomes still more remarkable when we consider (3.) that this was no obscure or ordinary Levite. He belonged to the chief family in the tribe, nay, we may say to the chief family of the nation, for though not himself a priest, he was closely allied to the priestly house, and was the grandson of no less a person than the great Moses himself. For the "Manasseh" in xviii. 30 is nothing else than an alteration of "Moses" to shield that venerable name from the discredit which such a descendant would cast upon it. [MANASSEH, vol. ii. p. 1776 a.] In this fact we possibly have the explanation of the much-debated passage, xviii. 3: "they knew the voice<sup>d</sup> of the young man the Levite." The grandson of the Lawgiver was not unlikely to be personally known to the Danites; when they heard his voice (whether in casual speech or in loud devotion we

<sup>a</sup> \* For one of Stanley's finest sketches (drawn out of the incidents relating to this Micah), see his *Jewish Church*, i. 327-332. The fragment is invaluable as an illustration of the social and religious condition of the Hebrews in that rude age. Nothing so primitive in Greek or Roman literature reveals to us "such details of the private life" of those nations. For some of the practical teachings of this singular episode for all times, see Bishop Hall's *Contemplations*, bk. x. 6. H.

<sup>b</sup> One of a thousand cases in which the point of the sentence is lost by the translation of "Jehovah" by the LORD.<sup>2</sup>

<sup>c</sup> It does not seem at all clear that the words "molten image" and "graven image" accurately express the original words *Pesel* and *Massekah*. [Dool., cl. ii. p. 112.] As the Hebrew text now stands, the "graven image" only was carried off to Laish, and the "molten" one remained behind with Micah (xviii. 20,

3); comp. 18). True the LXX. add the molten image in ver. 20, but in ver. 30 they agree with the Hebrew text.

<sup>d</sup> קוֹל = voice. The explanation of J. D. Michaels (*Bibel für Ungelehrten*) is that they remarked that he did not speak with the accent of the Ephraimites. But Gesenius rejects this notion as repugnant alike to "the expression and the connection," and adopts the explanation given above (*Gesch. der hebr. Sprache*, § 15, 2, p. 55).

\* Professor Cassel (*Richter und Ruth*, p. 161) offers another explanation of this "voice." He understands that it was the sound of the bells attached to the Levite's sacerdotal vestments, which notified the hearers of his entering the sanctuary for worship. See Ex. xxviii. 35. H.

are not told) they recognized it, and their inquiries as to who brought him hither, what he did there, and what he had there, were in this case the eager questions of old acquaintances long separated.

(4.) The narrative gives us a most vivid idea of the terrible anarchy in which the country was placed, when "there was no king in Israel, and every man did what was right in his own eyes," and shows how urgently necessary a central authority had become. A body of six hundred men completely armed, besides the train of their families and cattle, traverses the length and breadth of the land, not on any mission for the ruler or the nation, as on later occasions (2 Sam. ii. 12, &c., xx. 7, 14), but simply for their private ends. Entirely disregarding the rights of private property, they burst in wherever they please along their route, and plundering the valuables and carrying off persons, reply to all remonstrances by taunts and threats. The Turkish rule, to which the same district has now the misfortune to be subjected, can hardly be worse.

At the same time it is startling to our Western minds — accustomed to associate the blessings of order with religion — to observe how religious were these lawless freebooters: "Do ye know that in these houses there is an ephod, and teraphim, and a graven image, and a molten image? Now therefore consider what ye have to do" (xviii. 14), "Hold thy peace, and go with us, and be to us a father and a priest" (*ib.* 19).

As to the date of these interesting events, the narrative gives us no direct information beyond the fact that it was before the beginning of the monarchy; but we may at least infer that it was also before the time of Samson, because in this narrative (xviii. 12) we meet with the origin of the name of Mahaneh-dan, a place which already bore that name in Samson's childhood (xiii. 25, where it is translated in the A. V. "the camp of Dan"). That the Danites had opponents to their establishment in their proper territory before the Philistines enter the field is evident from Judg. i. 34. Josephus entirely omits the story of Micah, but he places the narrative of the Levite and his concubine, and the destruction of Gibeah (chaps. xix., xx., xxi.) — a document generally recognized as part of the same <sup>a</sup> with the story of Micah, and that document by a different hand to the previous portions of the book — at the very beginning of his account of the period of the Judges, before Deborah or even Ehud. (See *Ant.* v. 2, § 8-12.) The writer is not aware that this arrangement has been found in any MS. of the Hebrew or LXX. text of the book of Judges: but the fact of its existence in Josephus has a certain weight, especially considering the accuracy of that writer when his interests or prejudices are not concerned; and it is supported by the mention of Phinehas the grandson of Aaron in xx. 28. An argument against the date being before the time of Deborah is drawn by Bertheau (p. 197) from the fact that at that time the north of Palestine was in the possession of the Canaanites — "Jabin king of Canaan, who reigned in Hazor," in the immediate

neighborhood of Laish. The records of the southern Dan are too scanty to permit of our fixing the date from the statement that the Danites had not yet entered on their <sup>b</sup> allotment — that is to say, the allotment specified in Josh. xix. 40-48. But that statement strengthens the conclusion arrived at from other passages, that these lists in Joshua contain the towns *allotted*, but not therefore necessarily *possessed* by the various tribes. "Divide the land first, in confidence, and then possess it afterwards," seems to be the principle implied in such passages as Josh. xiii. 7 (comp. 1); xix. 49, 51 (LXX. "so they went to take possession of the land").

The date of the record itself may perhaps be more nearly arrived at. That, on the one hand, it was after the beginning of the monarchy is evident from the references to the ante-monarchical times (xviii. 1, xix. 1, xxi. 25); and, on the other hand, we may perhaps infer from the name of Bethlehem being given as "Bethlehem-Judah," — that it was before the fame of David had conferred on it a notoriety which would render any such affix unnecessary. The reference to the establishment of the house of God in Shiloh (xviii. 31) seems also to point to the early part of Saul's reign, before the incursions of the Philistines had made it necessary to remove the Tabernacle and Ephod to Nob, in the vicinity of Gibeah, Saul's head-quarters. G.

MICAIAH (מִיכָיָהוּ, מִיכָיָהוּ<sup>c</sup> Cethib, Jer. xxvi. 18 [*who as Jehovah*]). Μιχαίας; [FA. in Jer. Μιχαίας; Vat. in Mic. Μεχαιας:] *Micheas*. The sixth in order of the minor prophets, according to the arrangement in our present canon; in the LXX. he is placed third, after Hosea and Amos. To distinguish him from Micaiah the son of Imlah, the contemporary of Elijah, he is called the MORASTHITE, that is, a native of Moresbeth, or some place of similar name, which Jerome and Eusebius call Morasthi and identify with a small village near Eleutheropolis to the east, where formerly the prophet's tomb was shown, but which in the days of Jerome had been succeeded by a church (*Epist. Paulæ*, c. 6). As little is known of the circumstances of Micah's life as of many of the other prophets. Pseudo-Epiphanius (*Op.* ii. p. 245) makes him, contrary to all probability, of the tribe of Ephraim; and besides confounding him with Micaiah the son of Imlah, who lived more than a century before, he betrays additional ignorance in describing Abah as king of Judah. For rebuking this monarch's son and successor Jehoram for his impieties, Micah, according to the same authority, was thrown from a precipice, and buried at Morathi in his own country, hard by the cemetery of Enakim (Ἐνακείμ, a place which apparently exists only in the LXX. of Mic. i. 10), where his sepulchre was still to be seen. The Chronicon Paschale (p. 148 c) tells the same tale. Another ecclesiastical tradition relates that the remains of Habakkuk and Micah were revealed in a vision to Zebennus bishop of Eleutheropolis, in the reign of Theodosius the Great, near a place called Berath

<sup>a</sup> The proofs of this are given by Bertheau in his Commentary on the Book in the *Kurzgef. exeget. Handb.* (iii. § 2; p. 192).

<sup>b</sup> xviii. 1. It will be observed that the words "all their" are interpolated by our translators.

<sup>c</sup> The full form of the name is מִיכָיָהוּ, *Micâyâhû*, who is like *Jehovah*," which is found in 2 Chr.

xiii. 2, xvii. 7. This is abbreviated to מִיכָיָהוּ

*Micâyâhû*, in Judg. xvii. 1, 4; still further to מִיכָיָהוּ

*Micâyâhû* (Jer. xxxvi. 11), מִיכָיָהוּ, *Micâyâhû* (1 K

xxii. 13); and finally to מִיכָיָהוּ, *Micâh*, or מִיכָיָהוּ *Micâ* (2 Sam. ix. 12).

atia, which is apparently a corruption of Morasthi (Sozomen, *H. E.* vii. 29; Nicephorus, *H. E.* xii. 48). The prophet's tomb was called by the inhabitants *Nephameumani*, which Sozomen renders *νημα πιστόν*.

The period during which Micah exercised the prophetic office is stated, in the superscription to his prophecies, to have extended over the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah, giving thus a maximum limit of 59 years (B. C. 756-697), from the accession of Jotham to the death of Hezekiah, and a minimum limit of 16 years (B. C. 742-726), from the death of Jotham to the accession of Hezekiah. In either case he would be contemporary with Hosea and Amos during part of their ministry in Israel, and with Isaiah in Judah. According to Rabbinical tradition he transmitted to the prophets Joel, Nahum, and Habakkuk, and to Seriah the priest, the mysteries of the Kabbala, which he had received from Isaiah (R. David Ganz, *Tsemach David*), and by Syncellus (*Chronogr.* p. 199 c) he is enumerated in the reign of Jotham as contemporary with Hosea, Joel, Isaiah, and Oded. With respect to one of his prophecies (iii. 12) it is distinctly assigned to the reign of Hezekiah (Jer. xxvi. 18), and was probably delivered before the great passover which inaugurated the reformation in Judah. The date of the others must be determined, if at all, by internal evidence, and the periods to which they are assigned are therefore necessarily conjectural. Reasons will be given hereafter for considering that none are later than the sixth year of Hezekiah. Bertholdt, indeed, positively denies that any of the prophecies can be referred to the reign of Hezekiah, and assigns the two earlier of the four portions into which he divides the book to the time of Ahaz, and the two later to that of Manasseh (*Eindeitung*, § 411), because the idolatry which prevailed in their reigns is therein denounced. But in the face of the superscription, the genuineness of which there is no reason to question, and of the allusion in Jer. xxvi. 18, Bertholdt's conjecture cannot be allowed to have much weight. The time assigned to the prophecies by the only direct evidence which we possess, agrees so well with their contents that it may fairly be accepted as correct. Why any discrepancy should be perceived between the statement in Jeremiah, that "Micah the Morasthite prophesied in the days of Hezekiah king of Judah," and the title of his book which tells us that the word of the Lord came to him "in the days of Jotham, Ahaz, and Hezekiah," it is difficult to imagine. The former does not limit the period of Micah's prophecy, and at most applies only to the passage to which direct allusion is made. A confusion appears to have existed in the minds of those who see in the prophecy in its present form a connected whole, between the actual delivery of the several portions of it, and their collection and transcription into one book. In the case of Jeremiah we know that he dictated to Baruch the prophecies which he had delivered in the interval between the 13th year of Josiah and the 4th of Jehoiakim, and that, when thus committed to writing, they were read before the people on the fast day (Jer. xxxvi. 2, 4, 6). There is reason to believe that a similar process took place

with the prophecies of Amos. It is, therefore, conceivable, to say the least, that certain portions of Micah's prophecy may have been uttered in the reigns of Jotham and Ahaz, and for the probability of this there is strong internal evidence, while they were collected as a whole in the reign of Hezekiah and committed to writing. Caspari (*Micah*, p. 78) suggests that the book thus written may have been read in the presence of the king and the whole people, on some great fast or festival day, and that this circumstance may have been in the minds of the elders of the land in the time of Jehoiakim, when they appealed to the impunity which Micah enjoyed under Hezekiah.<sup>a</sup> It is evident from Mic. i. 6, that the section of the prophecy in which that verse occurs must have been delivered before the destruction of Samaria by Shalmaneser, which took place in the 6th year of Hezekiah (cir. B. C. 722), and, connecting the "high-places" mentioned in i. 5 with those which existed in Judah in the reign of Ahaz (2 K. xvi. 4; 2 Chr. xxviii. 4, 25) and Jotham (2 K. xv. 35), we may be justified in assigning ch. i. to the time of one of these monarchs, probably the latter; although, if ch. ii. be considered as part of the section to which ch. i. belongs, the utter corruption and demoralization of the people there depicted agree better with what history tells us of the times of Ahaz. Caspari maintains that of the two parallel passages, Mic. iv. 1-5, Is. ii. 2-5, the former is the original and the latter belongs to the times of Uzziah and Jotham.<sup>b</sup> The denunciation of the horses and chariots of Judah (v. 10) is appropriate to the state of the country under Jotham, after the long and prosperous reign of Uzziah, by whom the military strength of the people had been greatly developed (2 Chr. xxvi. 11-15, xxvii. 4-6). Compare Is. ii. 7, which belongs to the same period. Again, the forms in which idolatry manifested itself in the reign of Ahaz correspond with those which are threatened with destruction in Mic. v. 12-14, and the allusions in vi. 16 to the "statutes of Omri," and the "works of the house of Ahab" seem directly pointed at the king, of whom it is expressly said that "he walked in the way of the kings of Israel" (2 K. xvi. 3). It is impossible in dealing with internal evidence to assert positively that the inferences deduced from it are correct; but in the present instance they at least establish a probability, that in placing the period of Micah's prophetic activity between the times of Jotham and Hezekiah the superscription is correct. In the first years of Hezekiah's reign the idolatry which prevailed in the time of Ahaz was not eradicated, and in assigning the date of Micah's prophecy to this period there is no anachronism in the allusions to idolatrous practices. Maurer contends that ch. i. was written not long before the taking of Samaria, but the 3d and following chapters he places in the interval between the destruction of Samaria and the time that Jerusalem was menaced by the army of Sennacherib in the 14th year of Hezekiah. But the passages which he quotes in support of his conclusion (iii. 12, iv. 9, &c., v. 5, &c., vi. 9, &c., vii. 4, 12, &c.) do not appear to be more suitable to that period than to the first years of Hezekiah, while the context in many cases requires a still

<sup>a</sup> Knobel (*Prophetismus*, ii. § 20) imagines that the prophecies which remain belong to the time of Hezekiah, and that those delivered under Jotham and Ahaz have perished.

<sup>b</sup> Mic. iv. 1-4 may possibly, as Ewald and others have suggested, be a portion of an older prophecy current at the time, which was adopted both by Micah and Isaiah (Is. ii. 2-4).

earlier date. In the arrangement adopted by Wells (pref. to Micah, § iv.-vi.) ch. i. was delivered in the contemporary reigns of Jotham king of Judah and of Pekah king of Israel; ii. 1-iv. 8 in those of Ahaz, Pekah, and Hosea; iii. 12 being assigned to the last year of Ahaz, and the remainder of the book to the reign of Hezekiah.

But, at whatever time the several prophecies were first delivered, they appear in their present form as an organic whole, marked by a certain regularity of development. Three sections, omitting the superscription, are introduced by the same phrase, **שְׁמַעוּ**, "hear ye," and represent three natural divisions of the prophecy — i., ii., iii. — v., vi. — vii. — each commencing with rebukes and threatenings and closing with a promise. The first section opens with a magnificent description of the coming of Jehovah to judgment for the sins and idolatries of Israel and Judah (i. 2-4), and the sentence pronounced upon Samaria (5-9) by the Judge Himself. The prophet, whose sympathies are strong with Judah, and especially with the lowlands which gave him birth, sees the danger which threatens his country, and traces in imagination the devastating march of the Assyrian conquerors from Samaria onward to Jerusalem and the south (i. 9-16). The impending punishment suggests its cause, and the prophet denounces a woe upon the people generally for the corruption and violence which were rife among them, and upon the false prophets who led them astray by pandering to their appetites and luxury (ii. 1-11). The sentence of captivity is passed upon them (10) but is followed instantly by a promise of restoration and triumphant return (ii. 12, 13). The second section is addressed especially to the princes and heads of the people, their avarice and rapacity are rebuked in strong terms, and as they have been deaf to the cry of the suppliants for justice, they too "shall cry unto Jehovah, but He will not hear them" (iii. 1-4). The false prophets who had deceived others should themselves be deceived. "the sun shall go down over the prophets, and the day shall be dark over them" (iii. 6). For this perversion of justice and right, and the covetousness of the heads of the people who judged for reward, of the priests who taught for hire, and of the prophets who divined for money, Zion should "be ploughed as a field," and the mountain of the Temple become like the uncultivated woodland neights (iii. 9-12). But the threatening is again succeeded by a promise of restoration, and in the glories of the Messianic kingdom the prophet loses sight of the desolation which should befall his country. Instead of the temple mountain covered with the wild growth of the forest, he sees the mountain of the house of Jehovah established on the top of the mountains, and nations flowing like rivers unto it. The reign of peace is inaugurated by the recall from Captivity, and Jehovah sits as king in Zion, having destroyed the nations who had rejoiced in her overthrow. The predictions in this section form the climax of the book, and Ewald arranges them in four strophes, consisting of from seven to eight verses each (iv. 1-8, v. 9-v. 2, v. 3-9, v. 10-15), with the exception of the last, which is shorter, and in which the prophet everts to the point whence he started: all objects

of politic and idolatrous confidence must be removed before the grand consummation. In the last section (vi., vii.) Jehovah, by a bold poetical figure, is represented as holding a controversy with his people, pleading with them in justification of his conduct towards them and the reasonableness of his requirements. The dialogue form in which chap. vi. is cast renders the picture very dramatic and striking. In vi. 3-5 Jehovah speaks; the inquiry of the people follows in ver. 6, indicating their entire ignorance of what was required of them; their inquiry is met by the almost impatient rejoinder, "Will Jehovah be pleased with thousands of rams, with myriads of torrents of oil?" The still greater sacrifice suggested by the people, "Shall I give my firstborn for my transgression?" calls forth the definition of their true duty, "to do justly, and to love mercy, and to walk humbly with their God." How far they had fallen short of this requirement is shown in what follows (9-12), and judgment is pronounced upon them (13-16). The prophet acknowledges and bewails the justice of the sentence (vii. 1-6), the people in repentance patiently look to God, confident that their prayer will be heard (7-10), and are reassured by the promise of deliverance announced, as following their punishment (11-13), by the prophet, who in his turn presents his petition to Jehovah for the restoration of his people (14, 15). The whole concludes with a triumphal song of joy at the great deliverance, like that from Egypt, which Jehovah will achieve, and a full acknowledgment of his mercy and faithfulness to his promises (16-20). The last verse is reproduced in the song of Zacharias (Luke i. 72, 73).<sup>a</sup>

The predictions uttered by Micah relate to the invasions of Shalmaneser (i. 6-8; 2 K. xvii. 4, 6) and Sennacherib (i. 9-16; 2 K. xviii. 13), the destruction of Jerusalem (iii. 12, vii. 13), the Captivity in Babylon (iv. 10), the return (iv. 1-8, vii. 11), the establishment of a theocratic kingdom in Jerusalem (iv. 8), and the Ruler who should spring from Bethlehem (v. 2). The destruction of Assyria and Babylon is supposed to be referred to in v. 5, 6, vii. 8, 10. It is remarkable that the prophecies commence with the last words recorded of the prophet's namesake, Micaiah the son of Imlah, "Hearken, O people, every one of you" (1 K. xxii. 28). From this, Bleek (*Einleitung*, p. 539) concludes that the author of the history, like the ecclesiastical historians, confounded Micah the Morasthite with Micaiah; while Hengstenberg (*Christology*, i. 409, Eng. tr.) infers that the coincidence was intentional on the part of the later prophet, and that "by this very circumstance he gives intimation of what may be expected from him, shows that his activity is to be considered as a continuation of that of his predecessor, who was so jealous for God, and that he had more in common with him than the mere name." Either conclusion rests on the extremely slight foundation of the occurrence of a formula which was at once the most simple and most natural commencement of a prophetic discourse.

The style of Micah is best compared with that of Hosea and Isaiah. The similarity of their subject may account for many resemblances in language with the latter prophet, which were almost unavoidable (comp. Mic. i. 2 with Is. i. 2; Mic. ii

<sup>a</sup> Ewald now maintains that Mic. vi., vii. is by another hand; probably written in the course of the

7th cent. B. C., and that v. 9-14 is the original conclusion of Micah's prophecy (*J. Heb.* xi. p. 29).

with Is. v. 8; Mic. ii. 6, 11 with Is. xxx. 10; Mic. ii. 12 with Is. x. 20-22; Mic. vi. 6-8 with Is. l. 11-17). The diction of Micah is vigorous and forcible, sometimes obscure from the abruptness of its transitions, but varied and rich in figures derived from the pastoral (i. 8, ii. 12, v. 4, 5, 7, 8, vii. 14) and rural life of the lowland country (i. 6, iii. 12, iv. 3, 12, 13, vi. 15), whose vines and olives and fig-trees were celebrated (1 Chr. xxvii. 27, 28), and supply the prophet with so many striking allusions (i. 6, iv. 3, 4, vi. 15, vii. 1, 4) as to suggest that, like Amos, he may have been either a herdsman or a vine-dresser, who had heard the howling of the jackals (i. 8, A. V. "dragons") as he watched his flocks or his vines by night, and had seen the lions slaughtering the sheep (v. 8). One peculiarity which he has in common with Isaiah is the frequent use of paronomasia; in i. 10-15 there is a succession of instances of this figure in the plays upon words suggested by the various places enumerated (comp. also ii. 4) which it is impossible to transfer to English, though Ewald has attempted to render them into German (*Propheten des A. B.* i. 329, 330). The poetic vigor of the opening scene and of the dramatic dialogue sustained throughout the last two chapters has already been noticed.

The language of Micah is quoted in Matt. ii. 5, 6, and his prophecies alluded to in Matt. x. 35, 36; Mark xiii. 12; Luke xii. 53; John vii. 42.

\* The more important older writers on Micah are Chyträus (1565), Calvin (1671), Pocock (1677), Schnurrer (1783), Justi (1799), Hartmann (1800). The later writers are Theiner, Hitzig, Maurer, Umbreit, Ewald, Keil, Henderson, Pusey, Noyes, Cowles. (For the titles of their works see AMOS; JOEL; MALACHI.) Add to these Caspari, *Ueber Micha den Morasthiten u. seine Schrift* (1852), and the articles of Nägelsbach in *Herzog's Real-Encycl.* ix. 517 ff., and of Wunderlich in *Zeller's Bibl. Wörterb.* ii. 122. The best introduction to Micah in the English language is that of Dr. Pusey, prefixed to his Commentary. Part xiv. of Lange's *Bibelwerk des A. Test.*, by Dr. Paul Kleinert (1863), comprises Obadiah, Jonah, Micah, Nahum, and Habakkuk. It contains a well classified list of the principal commentators of all periods on all the minor prophets. For the Messianic passages in Micah see the writers on Christology (Hengstenberg, Hävernick, Tholuck, Stähelin, Hofmann, J. Pye Smith). [MALACHI.] On the prophet's personal appearance, and the general scope of his predictions, see especially Stanley (*Lectures on the Jewish Church*, ii. 492-494). Micah's "last words are those which, centuries afterwards, were caught up by the aged priest, whose song unites the Old and New Testaments together. 'Thou wilt perform the truth to Jacob, and the mercy to Abraham, which thou hast sworn;' to send forth a second David, the mighty child, whose unknown mother is already traveling for his birth (Mic. vii. 18-20; Luke i. 72, 73)."

A certain minuteness characterizes some of Micah's predictions, not always found or to be expected in the fulfillment of prophecy. It is he who mentioned beforehand the name of the place where the Messiah was to be born; and, accordingly, on Herod's proposing his question as to this point to the Jewish scribes and priests, they were ready at once with the answer that Micah had declared that Bethlehem was to be made memorable by that event (Matt. ii. 3-6). He foretold

"that Zion should be ploughed as a field and Jerusalem become heaps;" and the traveller at the present day sees oxen ploughing and fields of grain ripening on the slopes of the sacred mount. Of the doom of Samaria he said in the glory and pride of that city: "I will make Samaria as an heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof" (i. 6). The site of Samaria has now been ploughed for centuries. Its terraces are covered with grain and fruit-trees. The stones which belonged to the town and walls have rolled down the sides of the hill, or have been cast over the brow of it, and lie scattered along the edge of the valley. Yet we are not to insist on such circumstantiality (as in the last two cases) as essential to the truth of prophecy. It is a law of prophetic representation that it often avails itself of specific traits and incidents as the drapery only of the general occurrence or truth contemplated by the sacred writer. What is peculiar in the above instances is that the form and the reality of the predictions so strikingly agree. Many of the popular treatises on prophecy (that of Dr. Keith is not exempt from this fault) carry this idea of a *literal* fulfillment too far. H.

2. (ΜΙΧΑ; [Vat. ΗΧΑ:] *Micha*.) A descendant of Joel the Reubenite [JOEL, 5], and ancestor of Beerah, who was prince of his tribe at the time of the captivity of the northern kingdom (1 Chr. v. 5).

3. [In 1 Chr. viii., Vat. ΜΕΧΙΑ; ix., Vat. FA. ΜΕΙΧΑ.] The son of Merib-baal, or Mephibosheth, the son of Jonathan (1 Chr. viii. 34, 35, ix. 40, 41) In 2 Sam. ix. 12 he is called MICHA.

4. [ΜΙΧΑ; Vat. ΜΕΙΧΑΣ.] A Kohathite Levite, eldest son of Uzziel the brother of Amram, and therefore cousin to Moses and Aaron (1 Chr. xxiii. 20). In Ex. vi. 22 neither Micah nor his brother Jesiah, or Issiah, appears among the sons of Uzziel, who are there said to be Michael, Elzaphan, and Zithri. In the A. V. of 1 Chr. xxiv. 24, 25, the names of the two brothers are written MICIAH and ISSIAH, though the Hebrew forms are the same as in the preceding chapter. This would seem to indicate that cc. xxiii., xxiv., were translated by different hands.

5. (ΜΙΧΑΪΑΣ; [Vat. ΜΕΙΧΑΪΑΣ.] The father of Abdon, a man of high station in the reign of Josiah. In 2 K. xxii. 12 he is called "MICIAIAH the father of Achbor." W. A. W.

MICAHIAH [3 syl.] (מִיכָיָהוּ [who as *Jehovah*]; ΜΙΧΑΪΑΣ; [Vat. ΜΕΙΧΑΪΑΣ:] *Michaias*.) There are seven persons of this name in the O. T. besides Micah the Levite, to whom the name is twice given in the Hebrew (Judg. xvii. 1, 4); Micah and Micahiah meaning the same thing, "Who like Jehovah?" In the A. V. however, with the one exception following, the name is given as MICIAIAH.

The son of Inlah, a prophet of Samaria, who, in the last year of the reign of Ahab, king of Israel, predicted his defeat and death, B. C. 897. The circumstances were as follows: Three years after the great battle with Benhadad, king of Syria, in which the extraordinary number of 100,000 Syrian soldiers is said to have been slain without reckoning the 27,000 who, it is asserted, were killed by the falling of the wall at Aphek, Ahab proposed to Jehoshaphat king of Judah that they should jointly go up to battle against Ramoth Gilead:

which Benhadad was, apparently, bound by treaty to restore to Ahab. Jehoshaphat, whose son Jehoram had married Athaliah, Ahab's daughter, assented in cordial words to the proposal; but suggested that they should first "inquire at the word of Jehovah." Accordingly, Ahab assembled 400 prophets, while, in an open space at the gate of the city of Samaria, he and Jehoshaphat sat in royal robes to meet and consult them. The prophets unanimously gave a favorable response; and among them, Zedekiah, the son of Chenaanah, made horns of iron as a symbol, and announced, from Jehovah, that with those horns Ahab would push the Syrians till he consumed them. For some reason which is unexplained, and can now only be conjectured, Jehoshaphat was dissatisfied with the answer, and asked if there was no other prophet of Jehovah at Samaria. Ahab replied that there was yet one — Micaiah, the son of Imlah; but, in words which obviously call to mind a passage in the *Iliad* (i. 106), he added, "I hate him, for he does not prophecy good concerning me, but evil." Micaiah was, nevertheless, sent for; and after an attempt had in vain been made to tamper with him, he first expressed an ironical concurrence with the 400 prophets, and then openly foretold the defeat of Ahab's army and the death of Ahab himself. And in opposition to the other prophets, he said, that he had seen Jehovah sitting on his throne, and all the host of Heaven standing by Him, on his right hand and on his left: that Jehovah said, Who shall persuade Ahab to go up and fall at Ramoth Gilead? that a Spirit<sup>a</sup> came forth and said that he would do so; and on being asked, Wherewith? he answered, that he would go forth and be a lying spirit in the mouth of all the prophets. Irritated by the account of this vision, Zedekiah struck Micaiah on the cheek, and Ahab ordered Micaiah to be taken to prison, and fed on bread and water, till his return to Samaria. Ahab then went up with his army to Ramoth Gilead; and in the battle which ensued, Benhadad, who could not have failed to become acquainted with Micaiah's prophecy, uttered so publicly, which had even led to an act of public, personal violence on the part of Zedekiah, gave special orders to direct the attack against Ahab, individually. Ahab, on the other hand, requested Jehoshaphat to wear his royal robes, which we know that the king of Judah had brought with him to Samaria (1 K. xxii. 10); and then he put himself into disguise for the battle; hoping thus, probably, to baffle the designs of Benhadad, and the prediction of Micaiah — but he was, nevertheless, struck and mortally wounded in the combat by a random arrow. See 1 K. xxii. 1-35; and 2 Chr. xviii. — the two accounts in which are nearly word for word the same.

Josephus dwells emphatically on the death of Ahab, as showing the utility of prophecy, and the impossibility of escaping destiny, even when it is revealed beforehand (*Ant.* viii. 15, § 6). He says that it steals on human souls, flattering them with cheerful hopes, till it leads them round to the point whence it will gain the mastery over them. This was a theme familiar to the Greeks in many

tragic tales, and Josephus uses words in unison with their ideas. (See Euripides, *Hippolyt.* 1256 and compare Herodot. vii. 17, viii. 77, i. 91. From his interest in the story, Josephus relates several details not contained in the Bible, some of which are probable, while others are very unlikely; but for none of which does he give any authority. Thus, he says, Micaiah was already in prison, when sent for to prophesy before Ahab and Jehoshaphat, and that it was Micaiah who had predicted death by a lion to the son of a prophet, under the circumstances mentioned in 1 K. xx. 35, 36; and had rebuked Ahab after his brilliant victory over the Syrians for not putting Benhadad to death. And there is no doubt that these facts would be not only consistent with the narrative in the Bible, but would throw additional light upon it; for the rebuke of Ahab in his hour of triumph, on account of his forbearance, was calculated to excite in him the intensest feelings of displeasure and mortification; and it would at once explain Ahab's hatred of Micaiah, if Micaiah was the prophet by whom the rebuke was given. And it is not unlikely that Ahab in his resentment might have caused Micaiah to be thrown into prison, just as the princes of Judah, about 300 years later, maltreated Jeremiah in the same way (*Jer.* xxxvii. 15). But some other statements of Josephus cannot so readily be regarded as probable. Thus he relates that when Ahab disguised himself, he gave his own royal robes to be worn by Jehoshaphat, in the battle of Ramoth Gilead — an act, which would have been so unreasonable and cowardly in Ahab, and would have shown such singular complaisance in Jehoshaphat, that, although supported by the translation in the Septuagint, it cannot be received as true. The fact that some of the Syrian captains mistook Jehoshaphat for Ahab is fully explained by Jehoshaphat's being the only person, in the army of Israel, who wore royal robes. Again, Josephus informs us that Zedekiah alleged, as a reason for disregarding Micaiah's prediction, that it was directly at variance with the prophecy of Elijah, that dogs should lick the blood of Ahab, where dogs had licked the blood of Naboth, in the city of Samaria: inasmuch as Ramoth Gilead, where, according to Micaiah, Ahab was to meet his doom, was distant from Samaria a journey of three days. It is unlikely, however, that Zedekiah would have founded an argument on Elijah's insulting prophecy, even to the meekest of kings who might have been the subject of it; but that, in order to prove himself in the right as against Micaiah, he should have ventured on such an allusion to a person of Ahab's character, is absolutely incredible.

It only remains to add, that, besides what is dwelt on by Josephus, the history of Micaiah offers several points of interest, among which the two following may be specified: 1st. Micaiah's vision presents what may be regarded as transitional ideas of one origin of evil actions. In Exodus, Jehovah Himself is represented as directly hardening Pharaoh's heart (vii. 3, 13, xiv. 4, 17, x. 20, 27). In the Book of Job, the name of Satan is mentioned; but he is admitted without rebuke, among the sons of God, into the presence of Jehovah (Job

<sup>a</sup> As the definite article is prefixed in Hebrew, The-nus, Bertheau, and Bunsen translate the Spirit, and understand a personification of the Spirit of Prophecy. But the original words seem to be merely an extreme instance of the Hebrews conceiving as definite what

would be indefinite in English. (See Gesen. *Gram.* § 107, and 1 K. iii. 24.) The Spirit is conceived as definite from its corresponding to the requirements in the preceding question of Jehovah.

1. 6-12' After the Captivity, the idea of Satan, as an independent principle of evil, in direct opposition to goodness, becomes fully established (1 Chr. xxi. 1; and compare Wisd. ii. 24). [SATAN.] Now the ideas presented in the vision of Micaiah are different from each of these three, and occupy a place of their own. They do not go so far as the Book of Job — much less so far as the ideas current after the Captivity; but they go farther than Exodus. See Ewald, *Poet. Bücher*, 3ter Theil, 65. 2dly. The history of Micaiah is an exemplification in practice, of contradictory predictions being made by different prophets. Other striking instances occur in the time of Jeremiah (xiv. 13, 14; xxviii. 15, 16; xxxiii. 16, 25, 26). The only rule bearing on the judgment to be formed under such circumstances seems to have been a negative one, which would be mainly useful after the event. It is laid down in Deut. xviii. 21, 22, where the question is asked, how the children of Israel were to know the word which Jehovah had not spoken. And the solution is, that "if the thing follow not, nor come to pass, that is the thing which Jehovah has not spoken." E. T.

**MICHA** (מִיכָא) [*who is like God, Fürst*]; *Michá*; [Vat. *Meixag*:] *Micha*. 1. The son of Mephibosheth (2 Sam. ix. 12); elsewhere (1 Chr. ix. 40) called MICAH.

2. [Vat. FA. omits.] A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 11).

3. [Neh. xi. 17, Vat. FA. *Maxa*; 22, Vat. FA.<sup>3</sup> *Meixa*, FA.<sup>1</sup> *Amexa*.] The father of Mataniah, a Gershonite Levite and descendant of Asaph (Neh. xi. 17, 22). He is elsewhere called MICAH (1 Chr. ix. 15) and MICAHIAH (Neh. xii. 35).

4. (*Michá*; [Vat. Sin. *Meixag*]; Alex. *Xeima*: *Micha*.) A Simeonite, father of Ozias, one of the three governors of the city of Bethulia in the time of Judith (Jud. vi. 15). His name is remarkable as being connected with one of the few specific allusions to the ten tribes after the Captivity.

**MICHAEL** (מִיכָאֵל) [as above]; [Vat. *Meixaghl*:] *Michiél*. 1. *Micháhl*; an Asherite, father of Sethur, one of the twelve spies (Num. xiii. 13).

2. [*Micháhl*.] The son of Abihail, one of the Gadites who settled in the land of Bashan (1 Chr. v. 13).

3. [Vat. *Meixaghl*.] Another Gadite, ancestor of Abihail (1 Chr. v. 14).

4. [Vat. *Meixaghl*.] A Gershonite Levite, ancestor of Asaph (1 Chr. vi. 40).

5. [Vat. *Meixaghl*.] One of the five sons of Izrahiah of the tribe of Issachar, "all of them chiefs," who with their "troops of the battle-host" mustered to the number of 36,000 in the days of David (1 Chr. vii. 3).

6. [Vat. *Meixaghl*.] A Benjaminite of the sons of Beriah (1 Chr. viii. 16).

7. [Vat. *Meixaghl*.] One of the captains of the "thousands" of Manasseh who joined the fortunes of David at Ziklag (1 Chr. xii. 20).

8. [Vat. *Meixaghl*.] The father, or ancestor of Omri, chief of the tribe of Issachar in the reign

of David (1 Chr. xxvii. 18); possibly the same as No. 5.

9. [Vat. *Meixaghl*, Alex. *Mixaghl*.] One of the sons of Jehoshaphat who were murdered by their elder brother Jehoram (2 Chr. xxi. 2, 4).

10. [In Ezr., Vat. *Meixaghl*, Alex. *Maxaghl*: in 1 Esdr., *Micháhl*, Vat. *Meixaghl*:] *Michiél*, *Michelus*.] The father or ancestor of Zebadiah of the sons of Shephathiah who returned with Ezra (Ezr. viii. 8; 1 Esdr. viii. 34). W. A. W.

11. "One," or "the first of the chief princes or archangels (Dan. x. 13; comp. *ὁ ἀρχάγγελος* in Jude 9), described in Dan. x. 21 as the "prince" of Israel, and in xii. 1 as "the great prince which standeth" in time of conflict "for the children of thy people." All these passages in the O. T. belong to that late period of its Revelation when, to the general declaration of the angelic office, was added the division of that office into parts, and the assignment of them to individual angels. [See ANGELS, vol. i. p. 97 a.] This assignment served, not only to give that vividness to man's faith in God's supernatural agents, which was so much needed at a time of captivity, during the abeyance of his local manifestations and regular agencies, but also to mark the finite and ministerial nature of the angels, lest they should be worshipped in themselves. Accordingly, as Gabriel represents the ministration of the angels towards man, so Michael is the type and leader of their strife, in God's name and his strength, against the power of Satan. In the O. T. therefore he is the guardian of the Jewish people in their antagonism to godless power and heathenism. In the N. T. (see Rev. xii. 7) he fights in heaven against the dragon — "that old serpent called the Devil and Satan, which deceiveth the whole world:" and so takes part in that struggle, which is the work of the Church on earth. The nature and method of his war against Satan are not explained, because the knowledge would be unnecessary and perhaps impossible to us: the fact itself is revealed rarely, and with that mysterious vagueness which hangs over all angelic ministration, but yet with plainness and certainty.

There remains still one passage (Jude 9; comp. 2 Pet. ii. 11) in which we are told that "Michael the archangel, when, contending with the Devil, he disputed about the body of Moses, durst not bring against him a railing accusation, but said, The Lord rebuke thee." The allusion seems to be to a Jewish legend attached to Deut. xxxiv. 6. The Targum of Jonathan attributes the burial of Moses to the hands of the angels of God, and particularly of the archangel Michael, as the guardian of Israel. Later traditions (see Ecumen. in *Jud.* cap. i.) set forth how Satan disputed the burial, claiming for himself the dead body because of the blood of the Egyptian (Ex. ii. 12) which was on Moses' hands. The reply of Michael is evidently taken from Zech. iii. 1, where, on Satan's "resisting" Joshua the high-priest, because of the filthy garments of his iniquity, Jehovah, or "the angel of Jehovah" (see vol. i. p. 95 b), said unto Satan, "Jehovah rebuke thee, O Satan! Is not this a brand plucked from the fire?" The spirit of the answer is the reference to God's mercy alone for our justification, and the leaving of all vengeance and rebuke to Him; and in this spirit it is quoted by the Apostle.<sup>a</sup>

<sup>a</sup> From an unwillingness to acknowledge a reference to a mere Jewish tradition (in spite of vv. 14, 15), some have supposed St. Jude's reference to be to Zech. iii.

1, and explained the "body of Moses" to be the Jewish, as the "body of Christ" is the Christian, Church. The whole explanation is forced; but the

The Rabbinical traditions about Michael are very numerous. They oppose him constantly to Sammael, the accuser and enemy of Israel, as disputing for the *soul* of Moses; as bringing the ram the substitute for Isaac, which Sammael sought to keep back, etc., etc.: they give him the title of the "great high-priest in heaven," as well as that of the "great prince and conqueror;" and finally lay it down that "whenever Michael is said to have appeared, there the glory of the Shechinah is intended." It is clear that the sounder among them, in making such use of the name, intended to personify the Divine Power, and typify the Messiah (see Schoettgen, *Hor. Hebr.* i. 1079, 1119, ii. 8, 15, ed. Dresd. 1742). But these traditions, as usual, are erected on very slender Scriptural foundation.

A. B.

**MICHAH** (מִיכָה) [as above]: *Μιχαδ*; [Vat. *Μειχαα*:] *Micha*, eldest son of Uzziel, the son of Kohath (1 Chr. xxiv. 24, 25), elsewhere (1 Chr. xxiii. 20) called *Μιχαη*.

**MICHAIAH** [3 syl.] (מִיכָיָהוּ) [*who as Jehovah*]: *Μιχαίας*; [Vat. *Μειχαιας*:] *Micha*. The name is identical with that elsewhere rendered Micaiah. 1. The father of Achbor, a man of high rank in the reign of Josiah (2 K. xxii. 12). He is the same as *Μιχαη* the father of Abdon (2 Chr. xxxiv. 20).

2. (*Μιχαα*; Alex. *Μιχαα*; [Vat. FA. *Μειχαα*:] *Micha*.) The son of Zaacur, a descendant of Asaph (Neh. xii. 35). He is the same as *Μιχαη* the son of Zichri (1 Chr. ix. 15) and *Μιχαη* the son of Zabdi (Neh. xi. 17).

3. (Omitted in Vat. MS. [also Rom. Alex. FA.]; Alex. [rather, FA.]; *Μιχαας*: *Michea*.) One of the priests who blew the trumpets at the dedication of the wall of Jerusalem by Nehemiah (Neh. xii. 41).

4. (מִיכָיָהוּ) [*who like Jehovah*]: *Μααχδ* [*who like Jehovah*]: *Micha*. The daughter of Uriel of Gibeah, wife of Rehoboam, and mother of Abijah king of Judah (2 Chr. xiii. 2). She is elsewhere called "Maachah the daughter of Abishalom" (1 K. xv. 2), or "Abisalom" (2 Chr. xi. 20), being, in all probability, his granddaughter, and daughter of Tamar according to Josephus. [*MAACHAH*, 3.] The reading "Maachah" is probably the true one, and is supported by the LXX. and Peshito-Syriac.

5. (*Μιχαα*; [Vat. *Μειχαα*:] *Michea*.) One of the princes of Jehoshaphat whom he sent with certain priests and Levites to teach the law of Jehovah in the cities of Judah (2 Chr. xvii. 7).

W. A. W.

6. (מִיכָיָהוּ) [as above]: *Μιχαας*; [Vat. *Μειχαιας*:] FA. *Μιχαιας*: *Micheas*. The son of Gemariah. He is only mentioned on one occasion. After Baruch had read, in public, prophecies of Jeremiah announcing imminent calamities, Michajah went and declared them to all the princes assembled in king Zedekiah's house; and the princes

forthwith sent for Baruch to read the prophecies to them (Jer. xxxvi. 11-14). Michajah was the third in descent of a princely family, whose names are recorded in connection with important religious transactions. His grandfather Shaphan was the scribe, or secretary of king Josiah, to whom Hilkiah the high priest first delivered the book of the law which he said he had found in the House of Jehovah — Shaphan first perusing the book himself and then reading it aloud to the youthful king (2 K. xxii. 10). And it was from his father Gemariah's chamber in the Temple, that Baruch read the prophecies of Jeremiah, in the ears of all the people. Moreover, Gemariah was one of the three who made intercession to king Zedekiah, although in vain, that he would not burn the roll containing Jeremiah's prophecies. E. T.

**MICHAL** (מִיכָל) [*who like God*]: *Μεαχδα*; [2 Sam. xxi. 8, Rom. Vat. *Μιχαδα*]; Joseph. *Μιχαδα*: *Michol*, the younger of Saul's two daughters (1 Sam. xiv. 49). The king had proposed to bestow on David his eldest daughter MERAB; but before the marriage could be arranged an unexpected turn was given to the matter by the behavior of Michal, who fell violently in love with the young hero. The marriage with her elder sister was at once put aside. Saul eagerly caught at the opportunity which the change afforded him of exposing his rival to the risk of death. The price fixed on Michal's hand was no less than the slaughter of a hundred Philistines.<sup>a</sup> For these the usual "dowry" by which, according to the custom of the East, from the time of Jacob down to the present day, the father is paid for his daughter, was relinquished. David by a brilliant feat doubled the tale of victims, and Michal became his wife. What her age was we do not know — her husband cannot have been more than sixteen.

It was not long before the strength of her affection was put to the proof. They seem to have been living at Gibeah, then the head-quarters of the king and the army. After one of Saul's attacks of frenzy, in which David had barely escaped being transfixed by the king's great spear, Michal learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack her husband as he left his door (xix. 11). That the intention was real was evident from the behavior of the king's soldiers, who paraded round and round the town, and "returning" to the house "in the evening," with loud cries, more like the yells of the savage dogs of the East than the utterances of human beings, "belched out" curses and lies against the young warrior who had so lately slayed them all (1s. lix.<sup>b</sup> 3, 6, 7, 12). Michal seems to have known too well the vacillating and ferocious disposition of her father when in these demoniacal moods. The attack was ordered for the morning; but before the morning arrives the king will probably have changed his mind and hastened his stroke. So, like a true soldier's wife, she meets stratagem by stratagem.

analogy on which the last part is based is absolutely unwarrantable; and the very attempt to draw it shows the forgetfulness of the true meaning of that communion with Christ, which is implied by the latter expression.

<sup>a</sup> Perhaps nothing in the whole Bible gives so complete an example of the gap which exists between Eastern and Western ideas, as the manner in which the tale of these uncircumcised enemies of Israel was

to be counted. Josephus softens it by substituting heads for foreskins, but it is obvious that heads would not have answered the same purpose. The LXX., who often after obnoxious expressions, adhere to the Hebrew text.

<sup>b</sup> This Psalm, by its title in the Hebrew, LXX Vulgate, and Targum, is referred to the event in question, a view strenuously supported by Hengstenberg.

She first provided for David's safety by lowering him out of the window: to gain time for him to reach the residence of Samuel she next dressed up the bed as if still occupied by him: the teraphim, or household god, was laid in the bed, its head enveloped, like that of a sleeper, in the usual net<sup>a</sup> of goat's hair for protection from gnats, the rest of the figure covered with the wide *beyel* or plaid. [DAVID, vol. i. p. 567 *a.*] It happened as she had feared; Saul could not delay his vengeance till David appeared out of doors, but sent his people into the house. The reply of Michal is that her husband is ill and cannot be disturbed. At last Saul will be balked no longer: his messengers force their way into the inmost apartment and there discover the deception which has been played off upon them with such success. Saul's rage may be imagined: his fury was such that Michal was obliged to fabricate a story of David's having attempted to kill her.

This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michal was married to another man, Phalti or Phaltiel of Gallim (1 Sam. xxv. 44; 2 Sam. iii. 15), a village probably not far from Gibeah. After the death of her father and brothers at Gilboa, Michal and her new husband appear to have betaken themselves with the rest of the family of Saul to the eastern side of the Jordan. If the old Jewish tradition inserted by the Targum in 2 Sam. xxi. may be followed, she was occupied in bringing up the sons of her sister Merab and Adriel of Meholah. At any rate, it is on the road leading up from the Jordan Valley to the Mount of Olives that we first encounter her with her husband—Michal under the joint escort of David's messengers and Abner's twenty men, *en route* to David at Hebron, the submissive Phaltiel behind, bewailing the wife thus torn from him. It was at least fourteen years since David and she had parted at Gibeah, since she had watched him disappear down the cord into the darkness and had perilled her own life for his against the rage of her insane father. That David's love for his absent wife had undergone no change in the interval seems certain from the eagerness with which he reclaims her as soon as the opportunity is afforded him. Important as it was to him to make an alliance with Ishbosheth and the great tribe of Benjamin, and much as he respected Abner, he will not listen for a moment to any overtures till his wife is restored. Every circumstance is fresh in his memory. "I will not see thy face except thou first bring Saul's daughter . . . my wife Michal whom I espoused to me for a hundred foreskins of the Philistines" (2 Sam. iii. 13, 14). The meeting took place at Hebron. How Michal comported herself in the altered circumstances of

David's household, how she received or was received by Abigail and Ahinoam, we are not told; but it is plain from the subsequent occurrences that something had happened to alter the relations of herself and David. They were no longer what they had been to each other. The alienation was probably mutual. On her side must have been the recollection of the long contests which had taken place in the interval between her father and David; the strong anti-Saulite and anti-Benjamite feeling prevalent in the camp at Hebron, where every word she heard must have contained some distasteful allusion, and where at every turn she must have encountered men like Abiathar the priest, or Ishaiah the Gibeonite (1 Chr. xii. 4; comp. 2 Sam. xxi. 2), who had lost the whole or the greater part of their relatives in some sudden burst of her father's fury. Add to this the connection between her husband and the Philistines who had killed her father and brothers; and, more than all perhaps, the inevitable difference between the boy-husband of her recollections and the matured and occupied warrior who now received her. The whole must have come upon her as a strong contrast to the affectionate husband whose tears had followed her along the road over Olivet [2 Sam. iii. 16], and to the home over which we cannot doubt she ruled supreme. On the side of David it is natural to put her advanced years, in a climate where women are old at thirty, and probably a petulant and jealous temper inherited from her father, one outburst of which certainly produced the rupture between them which closes our knowledge of Michal.

It was the day of David's greatest triumph, when he brought the Ark of Jehovah from its temporary resting-place to its home in the newly-acquired city. It was a triumph in every respect peculiarly his own. The procession consisted of priests, Levites, the captains of the host, the elders of the nation; and conspicuous in front, "in the midst of the damsels playing on the timbrels,"<sup>b</sup> was the king dancing and leaping. Michal watched this procession approach from the window of her apartments in the royal harem; the motions of her husband shocked her as undignified and indecent—"she despised him in her heart." It would have been well if her contempt had rested there; but it was not in her nature to conceal it, and when, after the exertions of the long day were over, the last burnt-offering and the last peace-offering offered, the last portion distributed to the crowd of worshippers the king entered his house to bless his family, he was received by his wife not with the congratulations which he had a right to expect and which would have been so grateful to him, but with a bitter taunt which showed how incapable she was of appreciating either her husband's temper or the service in which he had been engaged. David's

<sup>a</sup> פְּבִיר עֲזִים. This is Ewald's explanation of a term which has puzzled all other commentators (*Gesch.* iii. 101). For פְּבִיר, the LXX. seem to have

read פֶּבֶד, a liver; since they state that Michal "put the liver of a goat at David's head." For an ingenious suggestion founded on this, see *Μασις*, vol. ii. p. 174 *a.*

<sup>b</sup> No doubt a similar procession to that alluded to in Ps. lxxviii. 25, where it will be observed that the words interpolated by our translators—"among them were the damsels"—alter the sense. The presence

of the women as stated above is implied in the words of Michal in 2 Sam. vi. 20, when compared with the statement of Ps. lxxviii.

<sup>c</sup> It seems from the words of Michal (vi. 20), which must be taken in their literal sense, coupled with the statement of 1 Chr. xv. 27, that David was clad in nothing but the ephod of this linen. So it is understood by Procopius of Gaza (*in* 1 Chr. xv.). The ephod seems to have been a kind of tippet which went over the shoulders (ἐπιμαυίς), and cannot have afforded much protection to the person, especially of a man in violent action.

retort was a tremendous one, conveyed in words which once spoken could never be recalled. It gathered up all the differences between them which made sympathy no longer possible, and we do not need the assurance of the sacred writer that "Michal had no child unto the day of her death," to feel quite certain that all intercourse between her and David must have ceased from that date. Josephus (*Ant.* vii. 4, § 3) intimates that she returned to Phaltiel, but of this there is no mention in the records of the Bible; and, however much we may hesitate at doubting a writer so accurate as Josephus when his own interests are not concerned, yet it would be difficult to reconcile such a thing with the known ideas of the Jews as to women who had once shared the king's bed.<sup>a</sup> See RIZPAH, ABISHAG, ADONIJAH.

Her name appears but once again (2 Sam. xxi. 8) as the bringer-up, or more accurately the mother, of five of the grandchildren of Saul who were sacrificed to Jehovah by the Gibeonites on the hill of Gibeah. But it is probably more correct to substitute Merab for Michal in this place, for which see p. 1892.

G.  
MICHE'AS (*Michas*), the prophet Micah the Morasthite (2 Esdr. i. 39).

MICH'MAS (מִיכָמָשׁ): [in Ezr.] Μαχμάς; Alex. Χαμμάς; [in Neh., Μαχεμάς:] *Machmas*), a variation, probably a later<sup>b</sup> form, of the name MICHMASH (Ezr. ii. 27; Neh. vii. 31). In the parallel passage of 1 Esdras it is given as MACALON. See the following article.

G.  
MICH'MASH (מִיכָמָשׁ) [*something hidden, treasure*, Ges.; *place of Chemosh*, Fürst]: Μαχμάς; [Vat. in 1 Sam. xiii. 11, 22, 23, xiv. 31, Μαχεμάς:] *Machmas*), a town which is known to us almost solely by its connection with the Philistine war of Saul and Jonathan (1 Sam. xiii., xiv.). It has been identified with great probability in a village which still bears the name of *Mikhmas*, and stands at about 7 miles north of Jerusalem, on the northern edge of the great *Wady Suweinit* — in some Maps *W. Fuwar* — which forms the main pass of communication between the central highlands on which the village stands, and the Jordan valley at Jericho. Immediately facing *Mukhmas*, on the opposite side of the ravine, is the modern representative of Geba; and behind this again are Ramah and Gibeah — all memorable names in the long struggle which has immortalized Michmah. Bethel is about 4 miles to the north of Michmah, and the interval is filled up by the heights of *Burka*, *Deir Diwan*, *Tell el-Hajar*, etc., which appear to have constituted the "Mount Bethel" of the nar-

rative (xiii. 2). So much is necessary to make the notices of Michmah contained in the Bible intelligible.

The place was thus situated in the very middle of the tribe of Benjamin. If the name be, as some scholars assert (Fürst, *Handb.* 600 b, 732 b), compounded from that of Chemosh, the Moabite deity, it is not improbably a relic of some incursion or invasion of the Moabites, just as *Chephar-haammonai*, in this very neighborhood, is of the Ammonites. But though in the heart of Benjamin, it is not named in the list of the towns of that tribe (comp. Josh. xviii.), but first appears as one of the chief points of Saul's position at the outbreak of the war. He was occupying the range of heights just mentioned, one end of his line resting on Bethel, the other at Michmah (1 Sam. xiii. 2). In Geba, close to him, but separated by the wide and intricate valley, the Philistines had a garrison, with a chief<sup>c</sup> officer. The taking of the garrison or the killing of the officer by Saul's son Jonathan was the first move. The next was for the Philistines to swarm up from their sea-side plain in such numbers, that no alternative was left for Saul but to retire down the wady to Gilgal, near Jericho, that from that ancient sanctuary he might collect and reassure the Israelites. Michmah was then occupied by the Philistines, and was their furthest post to the East.<sup>d</sup> But it was destined to witness their sudden overthrow. While he was in Geba, and his father in Michmah, Jonathan must have crossed the intervening valley too often not to know it thoroughly; and the intricate paths which render it impossible for a stranger to find his way through the mounds and hummocks which crowd the bottom of the ravine — with these he was so familiar — the "passages" here, the "sharp rocks" there — as to be able to traverse them even in the dark. It was just as the day dawned (Joseph. *Ant.* vi. 6, § 2) that the watchers in the garrison at Michmah descried the two Hebrews clambering up the steep beneath. We learn from the details furnished by Josephus, who must have had an opportunity of examining the spot when he passed it with Titus on their way to the siege of Jerusalem (see *B. J.* v. 2, § 1), that the part of Michmah in which the Philistines had established themselves consisted of three summits, surrounded by a line of rocks like a natural entrenchment, and ending in a long and sharp precipice believed to be impregnable. Finding himself observed from above, and taking the invitation as an omen in his favor, Jonathan turned from the course which he was at first pursuing, and crept up in the direction of the point reputed impregnable. And it was there, according to Jose-

<sup>a</sup> The Jewish tradition, preserved in the Targum on Ruth iii. 8, states that Phaltiel had from the first acted in accordance with the idea alluded to in the text. He is placed in the same rank with Joseph, and is commemorated as "Phaltiel, son of Laish, the pious (פְּחַלְתִּיֵּל), the word used for the Puritans of the New Testament times), who placed a sword between himself and Michal, Saul's daughter, lest he should go in unto her." [ASSIDÆANS.]

<sup>b</sup> The change of מ into כ is frequent in the later Hebrew (see Ges. *Thes.* 931 b).

<sup>c</sup> The Hebrew word מַגִּיב, or מַגִּיב, means both an officer and a garrison (Ges. *Thes.* 908). It is rendered in the A. V. by the former in 1 K. iv. 19, and

by the latter in the passage in question. Ewald (*Gesch.* iii. 41) affirms unhesitatingly that the former is correct; but not so Michaelis, Zunz, and De Wette, in their translations, or Gesenius as above. The English word "post" embraces some of the significations of *Netsib*.

<sup>d</sup> See xiv. 31, where Michmah is named as the point on the east at which the slaughter began, and Ajalon, on the west, that at which it terminated. Unlike the Canaanites (Josh. x.), who probably made off in the direction of Phenicia, and therefore chose the upper road by the two Beth-horons, the Philistines when they reached Gibeon took the left hand and lower road, by the *Wady Suleiman* — where *Yalo* still exists — the most direct access to their own maritime plain.

ous, that he and his armor-bearer made their entrance to the camp (Joseph. *Ant.* vi. 6, § 2). [GIBEAH, vol. ii. p. 915; JONATHAN.]

Unless MAKAZ be Michmah — an identification for which we have only the authority of the LXX. — we hear nothing of the place from this time till the invasion of Judah by Sennacherib in the reign of Hezekiah, when it is mentioned by Isaiah (x. 28). He is advancing by the northern road, and has passed Ai and Migron. At Michmah, on the further side of the almost impassable ravine, the heavy baggage (A. V. "carriages," see vol. i. p. 392 a) is deposited, but the great king himself crosses the pass, and takes up his quarters for the night at Geba. All this is in exact accordance with the indications of the narrative of 1 Samuel, and with the present localities.

After the Captivity, the men of the place returned, 122 in number (Ezr. ii. 27; Neh. vii. 31; in both these the name is slightly altered to MICHMAS), and reoccupied their former home (Neh. xi. 31).

At a later date it became the residence of Jonathan Maccabeus, and the seat of his government (1 Macc. ix. 73, "Machmas;" Joseph. *Ant.* xiii. 1, § 6). In the time of Eusebius and Jerome (*Onomasticon*, "Machmas") it was "a very large village retaining its ancient name, and lying near Ramah in the district of Elia (Jerusalem), at 9 miles distance therefrom."

Later still it was famed for the excellence of its corn. See the quotation from the Mishna (*Menachoth*) in Reland (*Palestina*, p. 897), and Schwarz (p. 181). Whether this excellence is still maintained we do not know. There is a good deal of cultivation in and amongst groves of old olives in the broad shallow wady which slopes down to the north and east of the village; but *Mukmas* itself is a very poor place, and the country close to it has truly "a most forbidding aspect." "Huge gray rocks raise up their bald crowns, completely hiding every patch of soil, and the gray huts of the village, and the gray ruins that encompass them can hardly be distinguished from the rocks themselves." There are considerable remains of massive foundations, columns, cisterns, etc., testifying to former prosperity, greater than that of either Anathoth or Geba (Porter, *Handbk.* 215, 216).

Immediately below the village, the great wady spreads out to a considerable width — perhaps half a mile; and its bed is broken up into an intricate mass of hummocks and mounds, some two of which, before the torrents of 3,000 winters had reduced and rounded their forms, were probably the two "teeth of cliff" — the Bozez and Seneh of Jonathan's adventure. Right opposite is *Jeba*, on a curiously terraced hill. To the left the wady contracts again, and shows a narrow black gorge of almost vertical limestone rocks pierced with mysterious caverns and fissures, the resort, so the writer was assured, of hyenas, porcupines, and eagles. In the wet season the stream is said to be often deeper than a man's neck, very strong, and of a bright yellow color.

In the Middle Ages *el-Birch* was believed to be Michmah (see Maundrell, March 25; and the copious details in Quaresmius, *Elucidatio*, ii. 786, 787). But *el-Birch* is now ascertained on good grounds to be identical with BEEROTH. G.

MICHMETHAH (מִיכְמֶתַח, i. e. the Micmethath: Ἰκασμῶν, Ἀγλανάθ; Alex. Μαχῶθ,

in both cases: *Machmethath*), a place which formed one of the landmarks of the boundary of the territories of Ephraim and Manasseh on the western side of Jordan. (1.) It lay "facing (פָּנֵי) Shechem;" it also was the next place on the boundary west of ASHER<sup>a</sup> (Josh. xvii. 7), if indeed the two are not one and the same place — ham-Micmethath a distinguishing affix to the commoner name of Asher. The latter view is taken by Reland (*Palestina*, p. 596) — no mean authority — and also by Schwarz (p. 147), but it is not supported by the Masoretic accents of the passage. The former is that of the Targum of Jonathan, as well as our own A. V. Whichever may ultimately be found correct, the position of the place must be somewhere on the east of and not far distant from Shechem. But then (2.) this appears quite inconsistent with the mention of the same name in the specification of a former boundary (Josh. xvi. 6). Here the whole description seems to relate to the boundary between Benjamin and Ephraim (i. e. Ephraim's southern boundary), and Micmethath follows Beth-horon the upper, and is stated to be on its west or seaward side. Now Beth-horon is at least 20 miles, as the crow flies, from Shechem, and more than 30 from Asher. The only escape from such hopeless contradictions is the belief that the statements of chap. xvi. have suffered very great mutilation, and that a gap exists between verses 5 and 6, which if supplied would give the landmarks which connected the two remote points of Beth-horon and Micmethath. The place has not been met with nor the name discovered by travelers, ancient or modern. G.

MICH'RI (מִיכְרִי) [perh. *purchased, valuable*, Ges.]: Μαχίρ; [Vat. Μαχίρι;] Alex. Μοχοροφ. *Mochori*). Ancestor of Elah, one of the heads of the fathers of Benjamin (1 Chr. ix. 8) after the Captivity.

MIGHTAM (מִיכְתָּם; σηλογραφία: *tituli inscriptio*). This word occurs in the titles of six Psalms (xvi., lvi.-lx.), all of which are ascribed to David. The marginal reading of our A. V. is "a golden psalm," while in the Geneva version it is described as "a certain tune." From the position which it occupies in the title, compared with that of *Mizmor* (A. V. "Psalm," Ps. iv.-vi., etc.), *Maschil* (Ps. xxxii., etc.), and *Shiggaion* (Ps. vii.), the first of which certainly denotes a song with an instrumental accompaniment (as distinguished from *shir*, a song for the voice alone), we may infer that *michtam* is a term applied to these psalms to denote their musical character, but beyond this everything is obscure. The very etymology of the word is uncertain. I. Kimchi and Aben Ezra, among Rabbinical writers, trace it to the root מִתְּחַם, *catham*, as it appears in מִתְּחַם, *cethem*, which is rendered in the A. V. "gold" (Job xxviii. 16), "pure gold" (Job xxviii. 19), "fine gold" (Job xxxi. 24); because the palm was to David precious as fine gold. They have been followed by the translators in the margin of our version, and the *Michtam* Psalms have been compared with the "Golden Sayings" of Pythagoras and the Proverbs of Ali. Others have thought the epithet "golden" was applied to these psalms, because they were

<sup>a</sup> For the situation of the town of ASHER see note to MANASSEH, vol. ii. p. 1170.

written in letters of gold and suspended in the Sanctuary or elsewhere, like the *Moullakât*, or suspended poems of Mecca, which were called *Moul-hahabât*, or "golden," because they were written in gold characters upon Egyptian linen. There is, however, no trace among the Hebrews of a practice analogous to this. Another interpretation, based upon the same etymology of the word, is given to *Michtam* by an unknown writer quoted by Jarchi (*P's.* xvi. 1). According to this, it signifies "a crown," because David asked God for his protection, and He was as a crown to him (*P's.* v. 12).

2. In Syriac the root in conj. *Pacl*, ܡܚܬܡܐ, *zathem*, signifies "to stain," hence "to defile," the primary meaning in *Pacl* being probably "to spot, mark with spots," whence the substantive is in common use in Rabbinical Hebrew in the sense of "spot" or "mark" (comp. Künchli, *on Am.* i. 1). In this sense the Niphal participle occurs in Jer. ii. 22, "thine iniquity is spotted before me," which makes the parallelism more striking than the "marked" of *cur A. V.* From this etymology the meanings have been given to *Michtam* of "a noted song" (Junius and Tremellius, *insignis*), or a song which was *graven* or carved upon stone, a monumental inscription; the latter of which has the merit of antiquity in its favor, being supported by the renderings of the LXX., Theodotus, the Chaldee Targum, and the Vulgate. (See Michaelis, *Suppl. ad Lex. Heb.* No. 1242.) There is nothing in the character of the psalms so designated to render the title appropriate; had the Hebrews been acquainted with musical notes, it would be as reasonable to compare the word *Michtam* with the old English "prick-song,"<sup>a</sup> a song *pricked* or *noted*. In the utter darkness which envelopes it, any conjecture is worthy of consideration; many are valueless as involving the transference to one language of the metaphors of another.

3. The corresponding Arab. كَتَمَ, *catama*, "to conceal, repress," is also resorted to for the explanation of *Michtam*, which was a title given to certain psalms, according to Hezel, because they were written while David was in concealment. This, however, could not be appropriate to *P's.* lviii., lx. From the same root Heigstenberg attributes to them a *hidden*, mystical import, and renders *Michtam* by *Geheimniss*, which he explains as "ein Lied tiefen Sinnes." Apparently referring the word to the same origin, Ewald (*Jahrb.* viii. p. 68) suggests that it may designate a song accompanied by bass instruments, like "the cymbals of trumpet-sound" of *P's.* cl. 5, which would be adapted to the plaintive character of *P's.* xvi. and others of the series to which it is applied. The same mournful tone is also believed to be indicated in *Michtam* as derived

from a root analogous to the Arab. كَتَمَ, *catama*, which in conj. vii. signifies "to be sad," in which case it would denote "an elegy."

<sup>a</sup> Shakespeare, *Rom. and Jul.* ii. 4: "He fights as you sing *prick-song*, keeps time, distance, and proportion."

<sup>b</sup> Τοῦ ταπεινόφρονος καὶ ἀπλοῦ τοῦ Δαυὶδ.

<sup>c</sup> Ταπεινόφρονος καὶ ἀπλοῦ.

<sup>d</sup> "Humilis et simplicis David."

<sup>e</sup> The notion that there were two peoples called *Mid-ean*, founded on the supposed shortness of the interval

4. But the explanation which is most approved by Rosenmüller and Gesenius is that which finds in *Michtam* the equivalent of מִיִּחְתָּם, *michtab*; a word which occurs in Is. xxxviii. 9 (*A. V.* "writing"), and which is believed by Capellus (*Crit. Sacr.* iv. 2, § 11) to have been the reading followed by the LXX. and Targum. Gesenius supports his decision by instances of similar interchanges of מ and ח in roots of cognate meaning. In accordance with this De Wette renders "Schrift."

5. For the sake of completeness another theory may be noticed, which is quite untenable in itself, but is curious as being maintained in the versions of Aquila<sup>b</sup> and Symmachus,<sup>c</sup> and of Jerome<sup>e</sup> according to the Hebrew, and was derived from the Rabbinical interpreters. According to these, מִיִּחְתָּם is an enigmatic word equivalent to מִיִּחְתָּם (מִיִּחְתָּם), "humble and perfect," epithets applied to David himself.

It is evident from what has been said, that nothing has been really done to throw light upon the meaning of this obscure word, and there seems little likelihood that the difficulty will be cleared away. Beyond the general probability that it is a musical term, the origin of which is uncertain and the application lost, nothing is known. The subject will be found discussed in Rosenmüller's *Scholæia* (*Psalms.* vol. i. *explic. titul.* xlii.-xlv.), and by Hupfeld (*Die Psalmen*, i. 308-311), who has collected all the evidence bearing upon it, and adheres to the rendering *kleinod* (jewel, treasure), which Luther also gives, and which is adopted by Hitzig and Mendelssohn.

W. A. W.

MID'DIN (מִדְיָן) [*reach, extension*]: Αἰώδις: [Alex.] Μαδων; [Comp. Μαδδῖν:] *Meddin*, a city of Judah (*Josh.* xv. 61), one of the six specified as situated in the district of "the midbar" (*A. V.* "wilderness"). This midbar, as it contained Beth ha-Arabah, the city of Salt, and Engedi, must have embraced not only the waste lands on the upper level, but also the cliffs themselves and the strip of shore at their feet, on the edge of the lake itself. Middin is not mentioned by Eusebius or Jerome, nor has it been identified or perhaps sought for by later travellers. By Van de Velde (*Memoir*, 256, and *Map*) mention is made of a valley on the southwestern side of the Dead Sea, below Masada, called *Um el-Bedun*, which may contain a trace of the ancient name. G.

\* MIDDLE-WALL. [PARTITION, WALL OF, Amer. ed.]

MID'IAN (מִדְיָן), *strife, contention*, Ges.: Μαδιάν [occasionally Μαδιάν]: *Madian*, a son of Abraham and Keturah (*Gen.* xxv. 2; 1 *Chr.* i. 32); progenitor of the Midianites, or Arabians dwelling principally in the desert north of the peninsula of Arabia.<sup>e</sup> Southwards they extended along the eastern shore of the Gulf of Eyleh (*Sinus*

for any considerable multiplication from Abraham to Moses, and on the mention of Moses' Cushite wife, the writer thinks to be untenable. Even conceding the former objection, which is unnecessary, one tribe has often become merged into another, and older one, and only the name of the later retained. See below and Moses

*Elamitic*); and northwards they stretched along the eastern frontier of Palestine; while the oases in the peninsula of Sinai seem to have afforded them pasture grounds, and caused it to be included in the "land of Midian" (but see below on this point). The people is always spoken of, in the Hebrew, as "Midian," מִדְיָנִי, except in Gen. xxxvii. 36; Num. xxv. 17, xxxi. 2, where we find the pl. מִדְיָנִים.

In Gen. xxxvii. 28, the form מִדְיָנִים occurs, rendered in the A. V. as well as in the Vulg.<sup>a</sup> "Midianites;" and this is probably the correct rendering, since it occurs in ver. 36 of the same chap.; though the people here mentioned may be descendants of MEDAN (which see). The gentilic form מִדְיָנִי, "Midianite," occurs once, Num. x. 29.

After the chronological record of Midian's birth, with the names of his sons, in the xxvth chapter of Genesis, the name disappears from the Biblical history until the time of Moses; Midian is first mentioned, as a people, when Moses fled, having killed the Egyptian, to the "land of Midian" (Ex. ii. 15), and married a daughter of a priest of Midian (21). The "land of Midian," or the portion of it specially referred to, was probably the peninsula of Sinai, for we read in the next chapter (ver. 1) that Moses led the flock of Jethro his father-in-law, the priest of Midian, "to the backside of the desert, and came to the mountain of God, even Horeb," and this agrees with a natural supposition that he did not flee far beyond the frontier of Egypt (compare Ex. xviii. 1-27, where it is recorded that Jethro came to Moses to the mount of God after the Exodus from Egypt; but in v. 27 "he went his way into his own land:" see also Num. x. 29, 30). It should, however, be remembered that the name of Midian (and hence the "land of Midian") was perhaps often applied, as that of the most powerful of the northern Arab tribes, to the northern Arabs generally, i. e. those of Abrahamic descent (comp. Gen. xxxvii. 28, but see respecting this passage above; and Judg. viii. 24); just as BENE-KEDEM embraced all those peoples, and, with a wider signification, other Eastern tribes. If this reading of the name be correct, "Midian" would correspond very nearly with our modern word "Arab;" limiting, however, the modern word to the Arabs of the northern and Egyptian deserts: all the Ishmaelite tribes of those deserts would thus be Midianites, as we call them Arabs, the desert being their "land." At least, it cannot be doubted that the descendants of Hagar and Keturah intermarried; and thus the Midianites are apparently called Ishmaelites, in Judg. viii. 24, being connected, both by blood and national customs, with the father of the Arabs. The wandering habits of nomadic tribes must also preclude our arguing from the fact of Moses' leading his father's flock to Horeb, that Sinai was necessarily more than a station of Midian: those tribes annually traverse a great extent of country in search of pasturage, and have their established summer and winter pastures. The Midianites were mostly (not always) dwellers in tents, not towns; and Sinai has not sufficient pasture to support more than a small, or a moving people. But it must be remembered that perhaps

(or we may say *probably*) the peninsula of Sinai has considerably changed in its physical character since the time of Moses; for the adjacent isthmus has since that period, risen many feet, so that "the tongue of the Egyptian Sea" has "dried up;" and this supposition would much diminish the difficulty of accounting for the means of subsistence found by the Israelites in their wanderings in the wilderness, when not miraculously supplied. Apart from this consideration, we knew that the Egyptians afterwards worked mines at *Soräbet el-Khätim* and a small mining population may have found sufficient sustenance, at least in some seasons of the year, in the few watered valleys, and wherever ground could be reclaimed: rock-inscriptions (though of later date) testify to the number of at least passers-by; and the remains of villages of a mining population have been recently discovered. Whatever may have been the position of Midian in the Sinaitic peninsula, if we may believe the Arabian historians and geographers, backed as their testimony is by the Greek geographers, the city of Midian was situate on the opposite, or Arabian, shore of the Arabian gulf, and thence northwards and spreading east and west we have the true country of the wandering Midianites. See further in SINAI.

The next occurrence of the name of this people in the sacred history marks their northern settlements on the border of the Promised Land, "on this side Jordan [by] Jericho" in the plains of Moab (Num. xxiii. 1-4), when Balak said, of Israel, to the elders (אֱלֵדִים), or "old men," the same as the Arab "sheykhs") of Midian, "Now shall this company lick up all [that are] round about us, as the ox licketh up the grass of the field." In the subsequent transaction with Balaam, the elders of Midian went with those of Moab, "with the rewards of divination in their hand" (7); but in the remarkable words of Balaam, the Midianites are not mentioned. This might be explained by the supposition that Midian was a wandering tribe, whose pasture-lands reached wherever, in the Arabian desert and frontier of Palestine, pasture was to be found, and who would not feel, in the same degree as Moab, Amalek, or the other more settled and agricultural inhabitants of the land allotted to the tribes of Israel, the arrival of the latter. But the spoil taken in the war that soon followed, and more especially the mention of the dwellings of Midian, render this suggestion very doubtful, and point rather to a considerable pastoral settlement of Midian in the trans-Jordanic country. Such settlements of Arabs have, however, been very common. In this case the Midianites were evidently tributary to the Amorites, being "dukes of Sihon, dwelling in the country" (יְשֵׁבֵי הָאָרֶץ): this inferior position explains their omission from Balaam's prophecy. It was here, "on this side Jordan," that the chief doings of the Midianites with the Israelites took place. The latter, while they abode in Shittim, "joined themselves unto Baal-Peor" (Num. xxv. 1, &c.) — apparently a Midianite as well as a Moabitish deity — the result of the sin of whoredom with the Moabitish women; and when "the anger of the Lord was kindled against Israel . . . and the congregation of the children of Israel [were] weeping [before] the door of the tabernacle of the congregation," an Israelite brought a Midianitish woman openly into the camp. The

<sup>a</sup> The LXX. have here Μιδιταιῶτες, which seems to be an unusual mode of writing the name of the people descended from Μεδίαν. The Samaritan has מִדְיָנִים.

rank of this woman Cozbi, that of a daughter of Zur, who was "head over a people, of a chief house in Midian,"<sup>a</sup> throws a strange light over the obscure page of that people's history. The vices of the Canaanites, idolatry and whoredom, had infected the descendants of Abraham, doubtless connected by successive intermarriages with those tribes; and the prostitution of this chief's daughter, caught as it was from the customs of the Canaanites, is evidence of the etimological type of the latter tribes. Some African nations have a similar custom: they offer their unmarried daughters to show hospitality to their guests. Zur was one of the five "kings" (מְלָכֵי) slain in the war with Midian, recorded in ch. xxxi.

The influence of the Midianites on the Israelites was clearly most evil, and directly tended to lead them from the injunctions of Moses. Much of the dangerous character of their influence may probably be ascribed to the common descent from Abraham. While the Canaanitish tribes were abhorred, Midian might claim consanguinity, and more readily seduce Israel from their allegiance. The events at Shittim occasioned the injunction to vex Midian and smite them — "for they vex you with their wives, wherewith they have beguiled you in the matter of Peor and in the matter of Cozbi, the daughter of a prince of Midian, their sister, which was slain in the day of the plague for Peor's sake" (Num. xxv. 18); and further on, Moses is enjoined, "Avenge the children of Israel of the Midianites: afterward shalt thou be gathered unto thy people" (xxxv. 2). Twelve thousand men, a thousand from each tribe, went up to this war, a war in which all the males of the enemy were slain, and the five kings of Midian — Evi, Rekem, Zur, Hur, and Reba, together with Balaam; and afterwards, by the express command of Moses, only the virgins and female infants, of the captives brought into the camp, were spared alive. The cities and castles of the vanquished, and the spoil taken, afford facts to which we shall recur. After a lapse of some years (the number is very doubtful, see CHRONOLOGY), the Midianites appear again as the enemies of the Israelites. They had recovered from the devastation of the former war, probably by the arrival of fresh colonists from the desert tracts over which their tribes wandered; and they now were sufficiently powerful to become the oppressors of the children of Israel. The advocates of a short chronology must, however unwillingly, concede a considerable time for Midian thus to recover from the severe blow inflicted by Moses. Allied with the Amalekites, and the *Bene-Kedem*, they drove them to make dens in the mountains and caves and strongholds, and wasted their crops even to Gaza, on the Mediterranean coast, in the land of Simeon. The judgship of Gideon was the immediate consequence of these calamities; and with the battle he fought in the valley of Jezreel, and his pursuit of the flying enemy over Jordan to Karkor, the power

of Midian seems to have been broken. It is written "Thus was Midian subdued before the children of Israel, so that they lifted up their heads no more" (Judg. vii. 28). The part taken by Gideon in this memorable event has been treated of elsewhere, but the Midianite side of the story is pregnant with interest. [GIDEON.]

Midian had oppressed Israel for seven years. As a numberless eastern horde they entered the land with their cattle and their camels. The imagination shows us the green plains of Palestine sprinkled with the black goat's-hair tents of this great Arab tribe, their flocks and herds and camels let loose in the standing corn, and foraging parties of horsemen driving before them the possessions of the Israelites; for "they came like locusts (A. V. 'grasshoppers,'

מְצָרֵי) for multitude" (Judg. vi. 5), and when the "angel of the Lord" came to Gideon, so severe was the oppression that he was threshing wheat by the wine-press to *hide it from the Midianites* (11). When Gideon had received the Divine command to deliver Israel, and had thrown down the altar of Baal, we read, "Then all the Midianites and the Amalekites and the Bene-Kedem were gathered together, and went over," descended from the desert hills and crossed Jordan, "and pitched in the Valley of Jezreel" (33) — part of the Plain of Esdraelon, the battle-field of Palestine — and there, from "the gray, bleak crowns of Gilboa," where Saul and Jonathan perished, did Gideon, with the host that he had gathered together of Israel, look down on the Midianites, who "were on the north side of them, by the hill of Moreh, in the valley" (vii. 1). The scene over that fertile plain, dotted with the enemies of Israel, "the Midianites and the Amalekites and all the Bene-Kedem, [who] lay along in the valley like locusts for multitude, and their camels were without number, as the sand by the sea-side for multitude" (vii. 12), has been picturesquely painted by Professor Stanley (*S. & P.*).

The descent of Gideon and his servant into the camp, and the conversation of the Midianite watch forms a vivid picture of Arab life. It does more; it proves that as Gideon, or Phurah, his servant, or both, understood the language of Midian, the Semitic languages differed much less in the 14th or 13th century B. C. than they did in after times [see ARABIA, vol. i. p. 142]; and we besides obtain a remarkable proof of the consanguinity of the Midianites, and learn that, though the name was probably applied to all or most of the northern Abrahamitic Arabs, it was not applied to the Canaanites, who certainly did not then speak a Semitic language that Gideon could understand.

The stratagem of Gideon receives an illustration from modern oriental life. Until lately the police in Cairo were accustomed to go their rounds with a lighted torch thrust into a pitcher, and the pitcher was suddenly withdrawn when light was required (Lane's *Mod. Eg.* 5th ed. p. 120) — a custom affording an exact parallel to the ancient

<sup>a</sup> רֹאשׁ אֲמֹרֹת בֵּיתֵי אָב, "head of families of a patriarchal house;" afterwards in ver. 18, called prince, נְשִׂיָא. (See next note.)

<sup>b</sup> These are afterwards (Josh. xiii. 21) called princes" (נְשִׂיָא), which may also be rendered the leader or captain of a tribe, or even of a family (Ges.), and "dukes" (דְּסִיָּיָא, not the word rendered

duke in the enumeration of the "dukes of Edom"), "one anointed, a prince consecrated by anointing" (Ges.) of Sihon king of the Amorites; apparently lieu tenants of the Amorite, or princes of his appointing [HUR; IRAM.]

<sup>c</sup> Prof. Stanley reads here "wrapt in sleep." Though the Heb. will bear this interpretation, Gesenius has "encamped."

expedient adopted by Gideon. The consequent panic of the great multitude in the valley, if it has no parallels in modern European history, is consistent with oriental character. Of all peoples, the nations of the East are most liable to sudden and violent emotions; and a panic in one of their heterogeneous, undisciplined, and excitable hosts has always proved disastrous. In the case of Gideon, however, the result of his attack was directed by God, the Divine hand being especially shown in the small number of Israel, 300 men, against 135,000 of the enemy. At the sight of the 300 torches, suddenly blazing round about the camp in the beginning of the middle-watch (which the Midianites had newly set), with the confused din of the trumpets, "for the three companies blew the trumpets, and brake the pitchers, and held the tamps in their left hands, and the trumpets in their right hands to blow [withal], and they cried, [The sword] of the Lord and of Gideon" (vii. 20), "all the host ran, and cried, and fled" (21). The panic-stricken multitude knew not enemy from friend, for "the Lord set every man's sword against his fellow even throughout all the host" (22). The rout was complete, the first places made for being Beth-shittah ("the house of the acacia") in Zereth, and the "border" [פְּרִיָה] of Abel-meholah, "the meadow of the dance," both being probably down the Jordan Valley, unto Tabbath, shaping their flight to the ford of Beth-barah, where probably they had crossed the river as invaders. The flight of so great a host, encumbered with slow-moving camels, baggage, and cattle, was calamitous. All the men of Israel, out of Naphtali, and Asher, and Manasseh, joined in the pursuit; and Gideon roused the men of Mount Ephraim to "take before" the Midianites "the waters unto Beth-barah and Jordan" (23, 24). Thus cut off, two princes, Oreb and Zeeb (the "raven," or, more correctly "crow," and the "wolf"), fell into the hands of Ephraim, and Oreb they slew at the rock Oreb, and Zeeb they slew at the wine-press of Zeeb (vii. 25; comp. Is. x. 26, where the "slaughter of Midian at the rock Oreb" is referred to).<sup>a</sup> But though we have seen that many joined in a desultory pursuit of the rabble of the Midianites, only the 300 men who had blown the trumpets in the Valley of Jezreel crossed Jordan with Gideon, "faint yet pursuing" (viii. 4). With this force it remained for the liberator to attack the enemy on his own ground, for Midian had dwelt on the other side Jordan since the days of Moses. Fifteen thousand men, under the "kings" [מְלָכָי] of Midian, Zebah and Zalmunna, were at Karkor, the sole remains of 135,000, "for there fell an hundred and twenty thousand men that drew sword" (viii. 10). The assurance of God's help encouraged the weary three hundred, and they ascended from the plain (or ghór) to the higher country by a ravine or torrent-bed in the hills, "by the way of them that dwell in tents [that is, the pastoral or wandering people as distinguished from towns-people], on the east of Nobah and Jogbehah, and smote the host, for the host was secure" (viii. 11) — secure in that wild country,

on their own ground, and away from the frequent haunts of man. A sharp pursuit seems to have followed this fresh victory, ending in the capture of the kings and the final discomfiture of the Midianites. The overthrow of Midian in its encampment, when it was "secure," by the exhausted companies of Gideon (they were "faint," and had been refused bread both at Succoth and at Penuel, viii. 5-9), sets the seal to God's manifest hand in the deliverance of his people from the oppression of Midian. Zebah and Zalmunna were slain, and with them the name itself of Midian almost disappears from sacred history. That people never afterwards took up arms against Israel, though they may have been allied with the nameless hordes who under the common designation of "the people of the East," Bene-Kedem, harassed the eastern border of Palestine.

Having traced the history of Midian, it remains to show what is known of their condition and customs, etc., besides what has already been incidentally mentioned. The whole account of their doings with Israel — and it is only thus that they find a place in the sacred writings, plainly marks them as characteristically Arab. We have already stated our opinion that they had intermarried with Ishmael's descendants, and become nationally one people, so that they are apparently called Ishmaelites; and that, conversely, it is most probable their power and numbers, with such intermarriages, had caused the name of Midian to be applied to the northern Abrahamic Arabs generally. They are described as true Arabs — now Bedawees, or "people of the desert;" anon pastoral, or settled Arabs — the flock" of Jethro; the cattle and flocks of Midian, in the later days of Moses; their camels without number, as the sand of the sea-side for multitude when they oppressed Israel in the days of the Judges — all agree with such a description. Like Arabs, who are predominantly a nomadic people, they seem to have partially settled in the land of Moab, under the rule of Sihon the Amorite, and to have adapted themselves readily to the "cities" (עִירֵיהֶם), and forts? (A. V. "goodly castles,"

עִירֵיהֶם), which they did not build, but occupied, retaining even then their flocks and herds (Num. xxxi. 9, 10), but not their camels, which are not common among settled Arabs, because they are not required, and are never, in that state, healthy.<sup>b</sup> Israel seems to have devastated that settlement, and when next Midian appears in history it is as a desert-horde, pouring into Palestine with innumerable camels; and, when routed and broken by Gideon, fleeing "by the way of them that dwell in tents" to the east of Jordan. The character of Midian we think is thus unmistakably marked. The only glimpse of their habits is found in the vigorous picture of the camp in the Valley of Jezreel, when the men talked together in the camp, and one told how he had dreamt that "a cake of barley-bread tumbled into the host of Midian, and came into a tent, and smote it that it fell, and overturned it, that the tent lay along" (Judg. vii. 13).

We can scarcely doubt, notwithstanding the dis-

<sup>a</sup> It is added, in the same verse, that they pursued Midian, and brought the heads of the princes to Gideon "on the other side Jordan." This anticipates the account of his crossing Jordan (viii. 4), but such transpositions are frequent, and the Hebrew may be read "on this side Jordan."

<sup>b</sup> Thus an Arab, believing in contagious diseases, asked Mohammed why camels in the desert ate like gazelles, and become mangy as soon as they mix with camels in towns. The prophet answered, "Who made the first camel mangy?"

putes of antiquaries, that the more ancient of the remarkable stone buildings in the *Lejáh*, and stretching far away over the land of Moab, are at least as old as the days of Sihon; and reading Mr. Porter's descriptions of the wild old-world character of the scenery, the "cities," and the "goodly castles," one may almost fancy himself in presence of the hosts of Midian. (See *Handbook*, 501, 508, 523, &c.)

The spoil taken in both the war of Moses and that of Gideon is remarkable. On the former occasion, the spoil of 575,000 sheep, 72,000 beeves, and 61,000 asses, seems to confirm the other indications of the then pastoral character of the Midianites; the omission of any mention of camels has been already explained. But the gold, silver, brass, iron, tin, and lead (Num. xxxi. 22), the "jewels of gold, chains, and bracelets, rings, earrings, and tablets" (50) — the offering to the Lord being 16,750 shekels (52) — taken by Moses, is especially noteworthy; and it is confirmed by the booty taken by Gideon; for when he slew Zebah and Zalmunna he "took away the ornaments that [were] on their camels' necks" (Judg. viii. 21), and (24-26) he asked of every man the earrings of his prey, "for they had golden earrings, because they [were] Ishmaelites." "And the weight of the golden earrings that he requested was a thousand and seven hundred [shekels] of gold; besides ornaments and collars, and purple raiment that [was] on the kings of Midian, and beside the chains that [were] about their camels' necks." (The rendering of A. V. is sufficiently accurate for our purpose here, and any examination into the form or character of these ornaments, tempting though it is, belongs more properly to other articles.) We have here a wealthy Arab nation, living by plunder, delighting in finery (especially their women, for we may here read "nose-ring"); and, where forays were impossible, carrying on the traffic southwards into Arabia, the land of gold — if not naturally, by trade — and across to Chaldaea; or into the rich plains of Egypt.<sup>a</sup>

Midian is named authentically only in the Bible. It has no history elsewhere. The names of places and tribes occasionally throw a feeble light on its past dwellings; but the stories of Arabian writers, borrowed, in the case of the northern Arabs, too frequently from late and untrustworthy Jewish writers, cannot be seriously treated. For reliable facts we must rest on the Biblical narrative. The city of "Medyen [say the Arabs] is the city of the people of Shu'eyb, and is opposite Tabook, on the shore of Bahr el-Kulzum [the Red Sea]; between these is six days' journey. It [Medyen] is larger than Tabook; and in it is the well from which Moses watered the flock of Shu'eyb" (*Marásid*, s. v.). El-Makreezee (in his *Khúat*) enters into

<sup>a</sup> \* Modern travellers confirm this Biblical account of the fertility and wealth of Midian. "We succeeded," says Tristram, "in reaching *Et Taiyibeh* just as the sun went down. We had magnificent views over the east as far as Jebel Hauran. Great was our astonishment to find, as we turned our glasses on Bozrah, that all the vast blank space on the map which lies between Gilead and Bozrah, instead of being desert, was one boundless corn or grass plain, covered with crops. It is, in fact, the granary of North Arabia. Here was the wealth of Roman Syria, and the source of its population; and here the swarming Midianites, like the Beni Sakk'r of to-day, pastured their thousands of camels." (*Land of Israel*, 2d ed., p. 486.) H.

مديان.

considerable detail respecting this city and people. The substance of his account, which is full of incredible fables, is as follows: Medyen are the people of Shu'eyb, and are the offspring of Medyán (Midian), son of Abraham, and their mother was Kantoora, the daughter of Yuktán [Joktan] the Canaanite: she bare him eight children, from whom descended peoples. He here quotes the passage above cited from the *Marásid* almost *verbatim*, and adds, that the Arabs dispute whether the name be foreign or Arabic, and whether Medyen spoke Arabic, so-called. Some say that they had a number of kings, who were respectively named Abjad, Hawwez, Huttee, Kelemen, Saafas, and Karasheet. This absurd enumeration forms a sentence common in Arabic grammars, which gives the order of the Hebrew and ancient Arabic alphabets, and the numerical order of the letters. It is only curious as possibly containing some vague reference to the language of Midian, and it is therefore inserted here. These kings are said to have ruled at Mekkeh, Western Nejd, the Yemen, Medyen, and Egypt, etc., contemporaneously. That Midian penetrated into the Yemen is, it must be observed, extremely improbable, as the writer of this article has remarked in ARABIA, notwithstanding the hints of Arab authors to the contrary, Yákoob, in the *Moajam* (cited in the *Journal of the Deutsch. Morgenl. Gesellschaft*), saying that a southern Arabian dialect is of Midian; and El-Mes'oodee (*op. Schultens*, pp. 158, 159) inserting a Midianite king among the rulers of the Yemen: the latter being, however, more possible than the former, as an accidental and individual, not a national occurrence. The story of Shu'eyb is found in the Kur-án. He was sent as a prophet to warn the people of Midian, and being rejected by them, they were destroyed by a storm from heaven (Sale's *Kur-án*, vii. and xi.). He is generally supposed to be the same as Jethro, the father-in-law of Moses; but some, as Sale informs us, deny this; and one of these says "that he was first called Buyoon, and afterwards Shu'eyb, that he was a comely person, but spare and lean, very thoughtful, and of few words." The whole Arab story of Medyen and Shu'eyb, even if it contain any truth, is encumbered by a mass of late Rabbinical myths.

El-Makreezee tells us that in the land of Midian were many cities, of which the people had disappeared, and the cities themselves had fallen to ruin; that when he wrote (in the year 825 of the Flight) forty cities remained, the names of some being known, and of others lost. Of the former, he says, there were, between the Hijáz and Palestine and Egypt, sixteen cities; and ten of these in the direction of Palestine. They were El-Khalasah, Es-Sanectab, El-Medereh, El-Minyeh, El-Aawaj, El-Khuweyrak, El-Beeryn, El-Má-eyn, El-Seba, and El-Mu'allak.<sup>c</sup> The most important of these cities

الْخَلَصَة،  
الْمِنِيَّة، الْمَدْرَةَ، السَّنِيْطَةَ،  
الْبَيْتْرِيْنَ، الْخَوَيْرِقَ، الْأَعْوَجَ،  
الْمُعَلَّقَ، السَّبْعَ، الْمَاءِيْنَ.

were El-Khalasah<sup>a</sup> and El-Saneetah; the stones of many of them had been removed to El-Ghazzah (Gaza) to build with them. This is, however, must be taken with caution.

In the A. V. of Apoc. and N. T. the name is given as M<sup>A</sup>D<sup>I</sup>A<sup>N</sup>. E. S. P.

\* MIDIANITE. [MIDIAN.]

MIDWIFE.<sup>b</sup> Parturition in the East is usually easy.<sup>c</sup> The office of a midwife is thus, in many eastern countries, in little use, but is performed, when necessary, by relatives (Chardin, *Voy.* vii. 23; Harmer, *Obs.* iv. 425). [CHILDREN.] It may be for this reason that the number of persons employed for this purpose among the Hebrews was so small, as the passage Ex. i. 19 seems to show; unless, as Knobel and others suggest, the two named were the principal persons of their class.

In the description of the transaction mentioned in Ex. i., one expression, "upon the stools," receives remarkable illustration from modern usage. Gesenius doubts the existence of any custom such as the direct meaning of the passage implies, and suggests a wooden or stone trough for washing the new-born child. But the modern Egyptian practice, as described by Mr. Lane, exactly answers to that indicated in the book of Exodus. "Two or three days before the expected time of delivery, the *Layeh* (midwife) conveys to the house the *kursee elwiddah*, a chair of a peculiar form, upon which the patient is to be seated during the birth" (Lane, *Mod. Egypt.* iii. 142).

The moral question arising from the conduct of the midwives does not fall within the scope of the present article. The reader, however, may refer to St. Augustine, *Contr. mendacium*, ch. xv. 32, and *Quest. in Hept.* ii. 1; also Corn. a Lap. *Com. on Ex.* i.

When it is said, "God dealt well with the midwives, and built them houses," we are probably to understand that their families were blessed either in point of numbers or of substance. Other explanations of inferior value have been offered by Kimchi, Calvin, and others (Calmet, *Com. on Ex.* i.; Patrick; Corn. a Lap.: Knobel; Schleusner, *Lex. V. T. oikta*; Ges. p. 193; *Crit. Sacr.*).

It is worth while to notice only to refute on its own ground the Jewish tradition which identified Shiphrah and Puah with Jochebed and Miriam, and interpreted the "houses" built for them as the so-called royal and sacerdotal families of Caleb and Moses (Joseph. *Ant.* iii. 2, § 4; Corn. a Lap. and

*Crit. Sacr.* l. c.; Schöttgen, *Hor. Hebr.* ii. 450 *De Mess. c. iv.*).

H. W. P.

MIGDAL-EL' (מִגְדָּל־אֵל) [tower of God Rom. Μεγαλααριμ; Vat.] Μεγαλααριμ; Alex. Μαγδαλιθωραμ — both including the succeeding name: *Magdal-El*], one of the fortified towns of the possession of Naphtali (Josh. xix. 38 only), named between IRON and HOREM, possibly deriving its name from some ancient tower — the "tower of El, or God." In the present unexplored condition of the part of Palestine allotted to Naphtali, it is dangerous to hazard conjectures as to the situations of the towns: but if it be possible that *Iurrah* is Horem and *Yarūn* Iron, the possibility is strengthened by finding a *Mejdel*, at no great distance from them, namely, on the left bank of the *Wady Kerkerah*, 8 miles due east of the *Ras en-Nakurah*, 6 miles west of *Hurrah* and 8 of *Yarūn* (see Van de Velde's Map, 1858). At any rate the point is worth investigation.

By Eusebius (*Onomasticon*, Μαγδῆλ) it is spoken of as a large village lying between Dora (*Tantura*) and Ptolemais (*Akka*) at 9 miles from the former, that is just about *Ahhit*, the ancient "Castellum peregrinorum." No doubt the Castellum was anciently a migdol e or tower: but it is hard to locate a town of Naphtali below Carmel, and at least 25 miles from the boundaries of the tribe. For a similar reason *Mejdel* by Tiberias, on the shore of the Lake of Genesaret, is not likely to be Migdal-el (Rob. *Bibl. Res.* ii. 397), since it must be outside the ancient limits of Naphtali and within those of Zebulun. In this case, however, the distance is not so great.

Schwarz (184), reading Migdal-el and Horem as one word, proposes to identify it with *Mejdel' el-Kerem*, a place about 12 miles east of *Akka*.

A *Mejdel* is mentioned by Van de Velde (*Sys. and Pal.* ii. 307) in the central mountains of Palestine, near the edge of the *Ghor*, at the upper end of the *Wady Fusail*, and not far from *Daumeh*, the ancient Edmia. This very possibly represents an ancient Migdal, of which no trace has yet been found in the Bible. It was also visited by Dr. Robinson (*Bibl. Res.* iii. 295), who gives good reasons for accepting it as the Magdal-senna mentioned by Jerome (*Onomast.* "Senna") as seven miles north of Jericho, on the border of Judæa. Another Migdal probably lay about two miles south of Jerusalem, near the Bethlehem road, where the cluster of ruins called *Kūbet Um-Moghdata* is now situated (Tobler, *Dritte Wanderung*, p. 81).

<sup>a</sup> El-Khalasah (sometimes written El-Khulusah, and El-Khulshah), or Dhu-l-Khalasah, possessed an idol-temple, destroyed by order of Mohammed; the idol being named El-Khalasah, or the place, or "growing-place" of El-Khalasah. The place is said to be four days' journey from Mekkeh, in the 'Ablā, and called "the southern Kaabeh," El-Kaabeh el-Yemāneeyeh (*Marāsīd*, s. v., and El-Bekree, and the *Kāmoos* there cited). El-Medereh seems also to be the same as Dhu-l-Medereh (*Marāsīd*, s. v.), and therefore (from the same) probably the site of an idol temple also.

<sup>b</sup> מִלְּוֹתָ, part in P. of לָוִי, "to bring forth": *saia*: *obstetrix*. It must be remarked that לִוְיִת, A. V., Ex. i. 19, "lively," is also in Rabbinical Hebrew "midwives," an explanation which appears to have been had in view by the Vulg., which interprets *mayoth* by "ipse obstetricandi habent scientiam." It is also rendered "living creatures," implying that

the Hebrew women were, like animals, quick in parturition. Gesenius renders "vividæ, robustæ," p. 468. In any case the general sense of the passage Ex. i. 19 is the same, namely, that the Hebrew women stood in little or no need of the midwives' assistance.

<sup>c</sup> See an illustration of Cant. viii. 5, suggested in *Mishna, Pesach*, x. 3.

<sup>d</sup> מִגְדָּל־אֵל, rendered in the LXX. *σαν ὥσιν πρὸς τὴν τίκτειν*; Vulg. *quum partus tempus advenierit*.

<sup>e</sup> May this not be the Magdōlus named by Herodotus, ii. 159, as the site of Pharaoh Necho's victory over Josiah. (See Rawlinson's *Herod.* ii. 24f, note.) But this was not the only Migdal along this coast. The *Στρατόνιο πύργος*, or "Strato's tower," must have been another, and a third possibly stood near *Ashkelon*. [MIGIDDO; MIGDAL-GAD.]

The Migdal-Euer, at which Jacob halted on his way from Bethlehem to Hebron, was a short distance south of the former. [EDAR, TOWER OF.] G.

**MIGDAL-GAD'** (מִגְדַּל-גָּד) [*tower of Gad*]: [Iom. Μαγαδαλαγὰδ; Vat.] Μαγαδαγαδ; Alex. Μαγαδαλαγὰδ: *Migdall-Gad*], a city of Judah (Josh. xv. 37); in the district of the *Shefelah*, or maritime lowland; a member of the second group of cities, which contained amongst others LACHISH, EGLON, and MAKKEDAM. By Eusebius and Jerome in the *Onomasticon*, it appears to be mentioned as "Magdala," but without any sign of its being actually known to them. A village called *el Medjel* lies in the maritime plain, a couple of miles inland from Ascalon, 9 from *Um Lakhis*, and 11 from *Ajlm*. So far this is in support of Van de Velde's identification (*Syr. & Pal.* ii. 237, 238; *Memoir*, p. 334; Rob. 1st ed. vol. iii. Appendix, p. 118 b) of the place with Migdal-gad, and it would be quite satisfactory if we were not uncertain whether the other two places are Lachish and Eglon. Makkedah at any rate must have been much farther north. But to appreciate these conditions, we ought to know the principles on which the groups of towns in these catalogues are arranged, which as yet we do not. Migdal-gad was probably dedicated to or associated with the worship of the ancient deity Gad, another of whose sanctuaries lay at the opposite extremity of the country at BAAL-GAD under Mount Hermon.

G.

**MIGDOL** (מִגְדֹּל, מִגְדָּל) [*tower, castle*]: Μαγδαλων, or Μαγδαλον: *Magdalu*], proper name of one or two places on the eastern frontier

of Egypt, cognate to מִגְדָּל, which appears properly to signify a military watch-tower, as of a town (2 K. ix. 17), or isolated (xvii. 9), and the look-out of a vineyard (Is. v. 2: comp. Matt. xxi. 33, Mark xii. 1), or a shepherd's look-out, if we may judge

from the proper name, מִגְדָּל צֶרֶר, "the tower of the flock," in which, however, it is possible that the second word is a proper name (Gen. xxxv. 21; and comp. Mic. iv. 8, where the military signification seems to be implied, though perhaps rhetorically only). This form occurs only in Egyptian geography, and it has therefore been supposed by Champollion to be substituted for an Egyptian name of similar sound, the Coptic equivalent in the Bible, ⲙⲉⲣⲧⲱⲗ, ⲙⲉⲁⲧⲱⲗ (Sah.), being, according to him, of Egyptian origin (*L'Égypte sous les Pharaons*, ii. 79, 80; comp. 69). A native etymology has been suggested, giving the signification "multitude of hills" <sup>a</sup> (*Thes.* s. v.). The ancient Egyptian form of Migdol having, however, been found, written in a manner rendering it not improbable that it was a foreign word,<sup>b</sup> MAKTUR or MAKTERU, as well as so used that it must be of similar meaning to the Hebrew מִגְדָּל, and the Coptic equivalent occur-

<sup>a</sup> The derivation is from ⲙⲉⲣⲧⲱⲗ, "multitude," and ⲑⲉⲗ, ⲧⲉⲗ (Sah.) "a hill," which is daring, notwithstanding the instability of the vowels in Coptic. The form ⲙⲉⲣⲧⲱⲗⲉⲗ would better suit this etymology, were there not other reasons than its

ring in a form, ⲙⲉⲑⲧⲱⲗ (Sah.), slightly differing from that of the geographical name, with the significations "a circuit, citadels, towers, bulwarks," a point hitherto strangely overlooked, the idea of the Egyptian origin and etymology of the latter must be given up.

Another name on the frontier, Baal-zephon, appears also to be Hebrew or Semitic, and to have a similar signification. [BAAL-ZEPHON.] The ancient Egyptian name occurs in a sculpture on the outer side of the north wall of the great hypostyle hall of the Temple of El-Karnak at Thebes, where a fort, or possibly fortified town, is represented, with the name PA-MAKTUR EN RA-MA-MEN, "the tower of Pharaoh, establisher of justice;" the last four words being the prenomens of Sethee I. (B. C. cir. 1322). The sculpture represents the king's triumphal return to Egypt from an eastern expedition, and the place is represented as if on a main road, to the east of Leontopolis.

1. A Migdol is mentioned in the account of the Exodus. Before the passage of the Red Sea the Israelites were commanded "to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Ex. xiv. 2). In Numbers we read, "And they removed from Etham, and turned again unto Pi-hahiroth, which [is] before Baal-zephon: and they pitched before Migdol. And they departed from before Pi-hahiroth, and passed through the midst of the sea into the wilderness" (xxxiii. 7, 8). We suppose that the position of the encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Baal-zephon and the sea, these places being near together. The place of the encampment and of the passage of the sea we believe to have been not far from the Persepolitan monument, which is made in Linnant's map the site of the Serapeum. [EXODUS, THE.]

2. A Migdol is spoken of by Jeremiah and Ezekiel. The latter prophet mentions it as a boundary-town, evidently on the eastern border, corresponding to Seveneh, or Syene, on the southern. He prophesies the desolation of Egypt "from Migdol to Seveneh even unto the border of Cush;" מִמְּגִדֹּל כְּנָנָה (xxix. 10), and predicts slaughter "from Migdol to Seveneh" (xxx. 6). That the eastern border is that on which Migdol was situated is shown not only by this being the border towards Palestine, and that which a conqueror from the east would pass, but also by the notices in the book of Jeremiah, where this town is spoken of with places in Lower Egypt. In the prophecy to the Jews in Egypt they are spoken of as dwelling at Migdol, Tahpanhes, and Noph, and in the country of Pathros (Jer. xliv. 1), and in that foretelling, apparently, an invasion of Egypt by Nebuchadnezzar, Migdol, Noph, and Tahpanhes are again mentioned together (xvi. 14). It seems plain, from its being spoken of with Memphis, and from Jews dwelling there, that this Migdol was an important town, and not a mere fort, or even military

rashness against it. Forster (J. R.) gives it, on what authority we know not: perhaps it is a misprint (*Epist. ad Michaelis*, p. 29).

<sup>b</sup> Foreign words are usually written with all or most of the vowels in ancient Egyptian: native words rarely.

settlement.<sup>a</sup> After this time there is no notice of any place of this name in Egypt, excepting of Magdolos, by Hecataeus of Miletus,<sup>b</sup> and in the *Itinerary of Antoninus*, in which *Magdolo* is placed twelve Roman miles to the southward of Pelusium, in the route from the Serapeum to that town.<sup>c</sup> This latter place most probably represents the Migdol mentioned by Jeremiah and Ezekiel. Its position on the route to Palestine would make it both strategically important and populous, neither of which would be the case with a town in the position of the Migdol of the Pentateuch. Gesenius, however, holds that there is but one Migdol mentioned in the Bible (*Lex.* s. v.). Lepsius distinguishes two Migdols, and considers Magdolo to be the same as the Migdol of Jeremiah and Ezekiel. He supposes the name to be only the Semitic rendering of "the Camp," *Στρατόπεδα*, the settlement made by Psammetichus I. of Ionian and Carian mercenaries on the Pelusiac branch of the Nile.<sup>d</sup> He ingeniously argues that Migdol is mentioned in the Bible at the time of the existence — he rather loosely says foundation — of this settlement, but omitted by the Greek geographers — he should have said after Hecataeus of Miletus — the mercenaries having been removed by Amasis to Memphis (ii. 154), and not afterwards noticed excepting in the *Itinerary of Antoninus* (*Chronologie der Aegypter*, i. 340, and note 5). The Greek and Hebrew or Semitic words do not however offer a sufficient nearness of meaning, nor does the Egyptian usage appear to sanction any deviation in this case; so that we cannot accept this supposition, which, moreover, seems repugnant to the fact that Migdol was a town where Jews dwelt. Champollion (*L'Égypte sous les Pharaons*, ii. 69-71) and others (Ewald, *Geschichte*, 2d ed., ii. 7 note; Schleiden, *Die Landenge von Sués*, pp. 140, 141) have noticed the occurrence of Arabic names which appear to represent the ancient name Migdol, and to be derived from its Coptic equivalent. These names, of which the most common form appears to be Mashtool,<sup>e</sup> are found in the Census of El-Melek en Násir (Mohammad Ibn Kaláoun), given by De Saey in his translation of 'Abd el-Lateef's History of Egypt. Their frequency favors the opinion that Migdol was a name commonly given in Egypt to forts, especially on or near the eastern frontier. Dr. Schleiden (*l. c.*) objects that Mashtool has an Arabic derivation; but we reply that the modern geography of Egypt

offers examples that render this by no means serious difficulty.

It has been conjectured that the *Μάγδαλον* mentioned by Herodotus, in his reference to an expedition of Necho's (ii. 159), supposed to be that in which he slew Josiah, is the Migdol of the prophets (Mannert, *Afrika*, i. 489), and it has even been proposed to read in the Heb. text Migdol for Megiddo (Harenberg, *Bibl. Brem.* vi. 281, ff.; Rosenmüller, *Alterth.* ii. 99); but the latter idea is unworthy of modern scholarship. R. S. P.

\* Mons. Chabas finds traces of Migdol in the itinerary of an Egyptian grandee who visited Phœnicia, Palestine, and Syria, in the 14th century B. C. In crossing the eastern frontier of Egypt the traveller came to the house of *Ovati* erected by Rameses, to mark his victories. This *Ovati* was "the goddess of the North," answering to *Beel-Tsephon*, "the lord of the North." Rameses had probably appropriated by his own cartouche the fortress of *Ovati* already erected by Sethee I. Of this mention is made in one of the pictorial representations of the wars of Sethee I. — a sort of chart, indicating the last stations of this Pharaoh on his return from Asia to Egypt. These are, (1.) The *Ovati of Sethee I.* represented as a fortress near a reservoir of water: (2.) *The Mikul of Sethee I.*, a fort with a well near by: (3.) *The House of the Lion*, a much larger fortress situated near a pond with trees upon either side: (4.) *The fortress of Djor*, consisting of several large buildings, separated by a canal, which connects with a lake filled with crocodiles, and which Brugsch identifies as lake Timsah.

From this sketch, the border of Egypt towards Palestine and Idumea appears to have been lined with forts, each of which, like the modern Suez, was furnished with a reservoir of sweet water (Chabas, *Voyage d'un Égyptien*, etc. p. 287).

The specification of a fortress of Sethee I. favors the opinion of Ewald that Migdol was a common name of frontier towers. Brugsch makes the *Maktir* or Migdol of Sethee I. identical with the *Magdolo* of the Itin. Anton., with the *Migdol-Magdolon* of Jeremiah and Ezekiel and the Migdol of the Books of Moses. (*Geog. Inschrift.* i. 261.)

MIGRON (מִגְרוֹן) [*precipice*, or (Fürst) *land-slip*]: [Rom. *Μαγδών*, Vat.] *Magron*; in Isai. [Rom. *Μαγγεδώ*, Sin.<sup>1</sup> *Μακεδω*, Sin.<sup>ea</sup>, Vat.] *Μαγεδω*, and Alex. *Μαγεδδω*: *Magron*),<sup>f</sup> a town,

<sup>a</sup> We have no account of Jews in the Egyptian military service as early as this time; but it is not impossible that some of the fugitives who took Jeremiah with them may have become mercenaries in Pharaoh Hophra's army.

<sup>b</sup> Steph. Byz. s. v., comp. *Fragmenta Historicorum Græcorum*, i. 20. If the latter part of the passage be from Hecataeus, the town was important in his time. *Μαγδωλός, πόλις Αιγύπτου*. Έκαταίος περιγίγσει τὸ θικὸν Μαγδωλίτης, κ. τ. λ.

<sup>c</sup> The route is as follows: "a Serapiu Pelusio ppm 1x Thaubasio vill Sile xxviii Magdolo xii Pelusio xii" (Ed. Parthey et Pinder, p. 76). These distances would place the Serapeum somewhat further southward than the site assigned to it in Linant's map [see *Exodus*, viii], unless the route were very indirect, which in the desert might well be the case.

<sup>d</sup> Herodotus describes "the Camps" as two places, one on either side of the Nile, and puts them "near the sea, a little below the city Bubastis, on the mouth

of the Nile called the Pelusiac." *Εἰσὶ δὲ οὗτοι οἱ χώροι πρὸς θαλάσσης ὀλίγον ἔνευθε Βουβάστιος πόλιος, ἐπὶ τῷ Πηλουσίῳ καλεούμενῳ στόματι τοῦ Νελοῦ* (ii. 154). This statement is contradictory, as Bubastis is far from the Pelusiac mouth or the sea. Lepsius (*l. c.*) merely speaks of this settlement as near Pelusium, on the Pelusiac mouth below Bubastis, citing the last clause of the following passage of Diodorus Siculus, who gives but a loose repetition of Herodotus, and is not to be taken, here at least, as an independent authority, besides that he may fix the position of a territory only, and not of "the Camp." *Τοὺς δὲ μισθοφόρους . . . τὰ καλούμενα στρατόπεδα τόπων (κατ. τοῖς καλούμενοις στρατοπέδοις τόπων) οἰκεῖν ἔδωκε, καὶ χώραν πολλὰν κατεκλήροσυχησε κερὸν ἐπάρω τοῦ Πηλουσιακοῦ στόματι* (i. 67).

<sup>e</sup> *مشتول*.

<sup>f</sup> Or in some MSS. in *agrum Gabaa*

or a spot — for there is nothing to indicate which — in the neighborhood of Saul's city, Gibeah, on the very edge of the district belonging to it (1 Sam. xiv. 2), distinguished by a pomegranate-tree, under which, on the eve of a memorable event, we discover Saul and Abiah surrounded by the poor remnants of their force. Josephus (*Ant.* vi. 6, § 2) presents it as a high hill (*βουνός ύψηλός*), from which there was a wide prospect over the district devastated by the Philistines. But this gives no clew, for Palestine is full of elevated spots commanding wide prospects.

Migron is presented to our view only once again, namely, in the invaluable list of the places disturbed by Sennacherib's approach to Jerusalem (*Is.* x. 28). But here its position seems a little further north than that indicated in the former passage — supposing, that is, that Gibeah was at *Tulcil el-Ful*. It here occurs between Aiath — that is Ai — and Michmash, in other words was on the north of the great ravine of the *Wady-Suweinit*, while Gibeah was more than 2 miles to the south thereof. [GIBEAH, vol. ii. p. 916.] In Hebrew, *Migron* may mean a "precipice," a frequent feature of the part of the country in question, and it is not impossible therefore that two places of the same name are intended — a common occurrence in primitive countries and tongues where each rock or ravine has its appellation, and where no reluctance or inconvenience is found in having places of the same name in close proximity. As easily two Migrons, as two Gibeahs, or two Shochohs.

The LXX. seem to have had MEGIDDO in their intentions, but this is quite inadmissible. (See Josephus, *Ant.* vi. 6, § 2.) G.

MI'JAMIN (מִימִינֵי) [on the right hand, or = *Benjamin*]: *Μεΐαμιν*; [Vat. *Beniamin*; Ald. *Beniamin*;] Alex. *Μεΐαμιν*; (*Maiman*). 1. The chief of the sixth of the 24 courses of priests established by David (1 Chr. xxiv. 9).

2. (*Μιαμιν*; [Vat.] Alex. *Μιαμιν*; FA. *Μιαμιν*;] *Miamin*. A family of priests who signed the covenant with Nehemiah (*Neh.* x. 7); probably the descendants of the preceding, and the same as MIAMIN 2 and MINIAMIN 2.

MIK'LOTH (מִקְלוֹתַי) [staves, Ges.; branches or sticks, Fürst: in 1 Chr. viii., Vat. Alex. *Μακαλωθ*, Rom. *Μακελώθ*; in 1 Chr. ix., Alex. *Μακεδωθ*, [Vat. Sin. *Μακελλωθ*.] *Macelloth*). 1. One of the sons of Jehiel, the father or prince of Gibeon, by his wife Manchah (1 Chr. viii. 32, ix. 37, 38). His son is variously called Shimeah or Shimeam.

2. (*Μακελλωθ*; [Vat. omits.]) The leader (*נָגִיד*, *nâgid*) of the second division of David's army (1 Chr. xxvii. 4), of which Dodai the Ahohite was captain (*נֹרָא*, *sur*). The *nâgid*, in a military sense, appears to have been an officer superior in rank to the captains of thousands and the captains of hundreds (1 Chr. xiii. 1).<sup>a</sup>

MIKNE'IAH [3 syl.] (מִיכְנֵי־יָהּ) [*possession of Jehovah*]: *Μακελλία*, [Vat. *Μακελλεια*,] Alex. *Μακενια*, FA. *Μακελλια*, 1 Chr. xv. 18; *Μακενια*, Alex. *Μακενια*, 1 Chr. xv. 21; *Maccenias*). One of the Levites of the second rank, gatekeepers of

<sup>a</sup> This verse should be rendered, "And David cometh with the captains of thousands and hundreds, belonging to each leader" (*nâgid*).

the ark, appointed by David to play in the Temple band "with harps upon Sheminith."

MIL'ALAI [3 syl.] (מִלְאֵי) [*eloquent*]: om in LXX.: *Milalai*. Probably a Gershonite Levite of the sons of Asaph, who, with Ezra at their head, played "the musical instruments of David the man of God" in the solemn procession round the walls of Jerusalem which accompanied their dedication (*Neh.* xii. 36). [MATTANIAH 2.]

MIL'CAH (מִלְכָּה) [*counsel*]: *Μελχά*: *Melcha*). 1. Daughter of Haran and wife of her uncle Nahor, Abraham's brother, to whom she bare eight children: the youngest, Bethuel, was the father of Rebekah (*Gen.* xi. 29, xxii. 20, 23, xxiv. 15, 24, 47). She was the sister of Lot, and her son Bethuel is distinguished as "Nahor's son, whom Milcah bare unto him," apparently to indicate that he was of the purest blood of Abraham's ancestry, being descended both from Haran and Nahor.

2. The fourth daughter of Zelophehad (*Num.* xxvi. 33, xxvii. 1, xxxvi. 11; *Josh.* xvii. 3).

MIL'COM (מִלְכָּם) [*their king*]: *δ βασιλεύς αὐτῶν*, [Comp. *Μελχόμ*,] *Moloch*, 1 K. xi. 5, 33; *ὁ Μολόχ*, [Vat. Ald. *Μολόδα*,] Alex. *Αμελχομ*, *Melchom*, 2 K. xxiii. 13). The "abomination" of the children of Ammon, elsewhere called MOLECH (1 K. xi. 7, &c.) and MALCHAM (*Zeph.* i. 5, marg. "their king"), of the latter of which it is probably a dialectical variation. Movers (*Phönizier*, i. 358) calls it an Aramaic pronunciation.

MILE (Μίλιον), the Greek form of the Latin *milliarium*, a Roman measure of length equal to 1618 English yards. It is only once noticed in the Bible (*Matt.* v. 41), the usual method of reckoning both in it and in Josephus being by the stadium. The Roman system of measurement was fully introduced into Palestine, though probably at a later date; the Talmudists admitted the term "mile"

(מִיל) into their vocabulary: both Jerome (in his *Onomasticon*) and the Itineraries compute the distances in Palestine by miles; and to this day the old milestones may be seen, here and there, in that country (*Robinson's Bib. Res.* ii. 161 note, iii. 306). The mile of the Jews is said to have been of two kinds, long or short, dependent on the length of the pace, which varied in different parts, the long pace being double the length of the short one (*Carpov's Apparatus*, p. 679). [DAY'S JOURNEY, Amer. ed.] W. L. B.

\* MILE'TUM, 2 Tim. iv. 20, for Miletus. The A. V. follows here the older versions, except Wycliffe, who writes "Milete." The early English often inflected such names after the analogy of the Greek and Latin, though on this principle it would have been strictly *Mileto* in the above passage. See Trench, *Authorized Version*, p. 79 (ed. 1859). H.

MILE'TUS (Μίλητος: *Miletus*), Acts xx. 15, 17, less correctly called MILETUM in 2 Tim. iv. 20. The first of these passages brings before us the scene of the most pathetic occasion of St. Paul's life; the second is interesting and important in reference to the question of the Apostle's second imprisonment.

St. Paul, on the return voyage from his third missionary journey, having left Philippi after the passover (Acts xx. 8), and desirous, if possible, to

be in Jerusalem at Pentecost (*ib.* 16), determined to pass by Ephesus. Wishing, however, to communicate with the church in which he had labored so long, he sent for the presbyters of Ephesus to meet him at Miletus. In the context we have the geographical relations of the latter city brought out as distinctly as if it were St. Luke's purpose to state them. In the first place it lay on the coast to the S. of Ephesus. Next, it was a day's sail from Trogyllium (*ver.* 15). Moreover, to those who are sailing from the north, it is in the direct line for Cos. We should also notice that it was near enough to Ephesus by land communication, for the message to be sent and the presbyters to come within a very narrow space of time. All these details correspond with the geographical facts of the case. As to the last point, Ephesus was by land only about 20 or 30 miles distant from Miletus. There is a further and more minute topographical coincidence, which may be seen in the phrase, "They accompanied him to the ship," implying as it does that the vessel lay at some distance from the town. The site of Miletus has now receded ten miles from the coast, and even in the Apostle's time it must have lost its strictly maritime position.

This point is noticed by Prof. Hackett in his *Comm. on the Acts* (2d ed. p. 344); compare Acts xxi. 5. In each case we have a low flat shore as a marked and definite feature of the scene.

The passage in the second Epistle to Timothy, where Miletus is mentioned, presents a very serious difficulty to the theory that there was only one Roman imprisonment. When St. Paul visited the place on the occasion just described, Trophimus was indeed with him (Acts xx. 4); but he certainly did not "leave him sick at Miletus;" for at the conclusion of the voyage we find him with the Apostle at Jerusalem (Acts xxi. 29). Nor is it possible that he could have been so left on the voyage from Caesarea to Rome: for in the first place there is no reason to believe that Trophimus was with the Apostle then at all; and in the second place the ship was never to the north of Cnidus (Acts xxvii. 7). But, on the hypothesis that St. Paul was liberated from Rome and revisited the neighborhood of Ephesus, all becomes easy, and consistent with the other notices of his movements in the Pastoral Epistles. Various combinations are possible. See *Life and Epistles of St. Paul*, ch. xxvii. and Birks, *Illove Apostolicae*.

Temple of Apollo at Miletus.

As to the history of Miletus itself, it was far more famous five hundred years before St. Paul's day, than it ever became afterwards. In early times it was the most flourishing city of the Ionian Greeks. The ships which sailed from it were celebrated for their distant voyages. Miletus suffered in the progress of the Lydian kingdom and became tributary to Cræsus. In the natural order of events, it was absorbed in the Persian empire: and, revolting, it was stormed and sacked. After a brief period of spirited independence, it received a blow from which it never recovered, in the siege conducted by Alexander when on his Eastern campaign. But still it held, even through the Roman period, the rank of a second-rate trading town, and Strabo mentions its four harbors. At this time it was politically in the province of ASIA, though

CARIA was the old ethnological name of the district in which it was situated. Its preëminence on this coast had now long been yielded up to EPHESUS. These changes can be vividly traced by comparing the whole series of coins of the two places. In the case of Miletus, those of the autonomous period are numerous and beautiful, those of the imperial period very scanty. Still Miletus was for some time an episcopal city of Western Asia. Its final decay was doubtless promoted by that silting up of the Mæander, to which we have alluded. No remains worth describing are now found in the swamps which conceal the site of the city of Thales and Hecateus. J. S. H.

**MILK.** As an article of diet, milk holds a more important position in Eastern countries than with us. It is not a mere adjunct in cookery, or

restricted to the use of the young, although it is naturally the characteristic food of childhood, both from its simple and nutritive qualities (1 Pet. ii. 2), and particularly as contrasted with meat (1 Cor. iii. 2; Heb. v. 12); but beyond this it is regarded as substantial food adapted alike to all ages and classes. Hence it is enumerated among "the principal things for the whole use of a man's life" (Eccles. xxxix. 26), and it appears as the very emblem of abundance<sup>a</sup> and wealth, either in conjunction with honey (Ex. iii. 8; Deut. vi. 3, xi. 9) or wine (Is. lv. 1), or even by itself (Job xxi. 24<sup>b</sup>): hence also to "suck the milk" of an enemy's land was an expression betokening its complete subjection (Is. lk. 16; Ez. xxv. 4). Not only the milk of cows, but of sheep (Deut. xxxii. 14), of camels (Gen. xxxii. 15), and of goats (Prov. xxvii. 27) was used; the latter appears to have been most highly prized. The use of camel's milk still prevails among the Arabs (Burckhardt's *Notes*, i. 44).

Milk was used sometimes in its natural state, and sometimes in a sour, coagulated state: the former was named *kháláb*,<sup>c</sup> and the latter *khemah*.<sup>d</sup> In the A. V. the latter is rendered "butter," but there can be no question that in every case (except perhaps Prov. xxx. 33) the term refers to a preparation of milk well known in Eastern countries under the name of *leben*. [BUTTER, Amer. ed.] The method now pursued in its preparation is to boil the milk over a slow fire, adding to it a small piece of old *leben* or some other acid, in order to make it coagulate (Russell, *Ant. Syria*, i. 118, 370; Burckhardt, *Arabia*, i. 60). The refreshing draught which Jael offered "in a lordly dish" to Sisera (Judg. v. 25) was *leben*, as Josephus particularly notes (γᾶλα διαφθορῆς ἥδη, *Ant.* v. 5, § 4): it was produced from one of the goatskin bottles which are still used for the purpose by the Bedouins (Judg. iv. 19; comp. Burckhardt's *Notes*, i. 45). As it would keep for a considerable time, it was particularly adapted to the use of travellers (2 Sam. xvii. 29). The amount of milk required for its production was of course considerable; and hence in Is. vii. 22 the use of *leben* is predicted as a consequence of the depopulation of the land, when all agriculture had ceased, and the fields were covered with grass. In Job xx. 17, xxix. 6, the term is used as an emblem of abundance in the same sense as milk. *Leben* is still extensively used in the East; at certain seasons of the year the poor almost live upon it, while the upper classes eat it with salad or meat (Russell, i. 18). It is still offered in hospitality to the passing stranger, exactly as of old in Abraham's tent (Gen. xviii. 8; comp. Robinson, *Bibl. Res.* i. 571, ii. 70, 211), so freely indeed that in some parts of Arabia it would be regarded a scandal if money were received in return (Burckhardt's *Arabia*, i. 120, ii. 106). Whether milk was used instead of water for the purpose of boiling meat, as is at

<sup>a</sup> This is expressed in the Hebrew term for milk, *halab*, the etymological force of which is "fatness." We may compare with the Scriptural expression, "a and flowing with milk and honey," the following passages from the classical writers:—

Ῥεῖ δὲ γάλακτι πέδον,  
Ῥεῖ δ' οἶνον, ῤεῖ δὲ μελισσῶν  
Νέκταρι. — EURIP. *Bacch.* 142.

"Flumina jam lactis, jam flumina nectaris ibant:  
Flavaque de viridi stillabant ilice mella."  
Ov. *Met.* i. 111.

<sup>b</sup> In this passage the marginal reading, "milk pails," is preferable to the text, "breasts." The Hebrew word

present not unusual among the Bedouins, is uncertain. [COOKING.] The prohibition against seething a kid in its mother's milk (occurring as it does amid the regulations of the harvest festival, Ex. xxiii. 19, xxiv. 26; Deut. xiv. 21) was probably directed against some heathen usage practiced at the time of harvest. W. L. B.

**MILL.** The mills (מִלִּים, *rechain*)<sup>e</sup> of the ancient Hebrews probably differed but little from those at present in use in the East. These consist of two circular stones, about 18 in. or two feet in diameter, the lower of which (Lat. *meta*) is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone (Lat. *catillus*). The latter, called by the Hebrews *receb* (רֶכֶב), "chariot," and by the Arabs *rekab*, "rider," has a hole in it through which the grain passes, immediately above a pivot or shaft which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle fixed near the edge. It is worked by women, sometimes singly and sometimes two together, who are usually seated on the bare ground (Is. xlvi. 1, 2) "facing each other; both have hold of the handle by which the upper is turned

Women grinding corn with the hand-mill of modern Syria.

round on the 'nether' millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round, and then the other seizes the handle. This would be slow work, and would give a spasmodic motion to the stone. Both retain their hold, and pull *to*, or push *from*, as men do with the whip or cross-cut saw. The proverb of our Saviour (Matt. xxiv. 41) is true to life, for *women* only grind. I cannot recall an instance in which men were at the mill" (Thomson, *Land and Book*, ch. 34). The labor is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xi. 5; comp. Plaut. *Merc.* ii. 3), and

does not occur elsewhere, and hence its meaning is doubtful. Perhaps its true sense is "farm-yard" or "fold."

• מִלִּים.

• מִלִּים.

• Compare Arabic رَحِيَان, *rahayān*, the dual of

رَحِي, *raha*, a mill. The dual form of *raha* refers to the pair of stones composing the mill

captives (Judg. xvi. 21; Job xxxi. 10, Is. xlvi. 1, 2; Lam. v. 13; comp. Hom. *Od.* vii. 103; Suet. *Tib.* c. 51).<sup>a</sup> So essential were mill-stones for daily domestic use, that they were forbidden to be taken in pledge (Deut. xxiv. 6; Jos. *Ant.* iv. 8, § 26), in order that a man's family might not be deprived of the means of preparing their food. Among the Fellahs of the Hauran one of the chief articles of furniture described by Burekhardt (*Syria*, p. 292) is the "hand-mill which is used in summer when there is no water in the wadies to drive the mills." The sound of the mill is the indication of peaceful household life, and the absence of it is a sign of desolation and abandonment, "When the sound of the mill is low" (Ecc. xii. 4). No more affecting picture of utter destruction could be imagined than that conveyed in the threat denounced against Judah by the mouth of the prophet Jeremiah (xxv. 10), "I will take from them the voice of mirth, and the voice of gladness, the voice of the bridegroom and the voice of the bride, the sound of the mill-stones, and the light of the candle" (comp. Rev. xviii. 22). The song of the women grinding is supposed by some to be alluded to in Ecc. xii. 4, and it was evidently so understood by the LXX.<sup>b</sup>; but Dr. Robinson says (i. 485), "we heard no song as an accompaniment to the work," and Dr. Hackett (*Bibl. Illust.* p. 49, Amer. ed.) describes it rather as shrieking than singing. It is alluded to in Homer (*Od.* xx. 105-119); and Athenæus (xiv. p. 519 a) refers to a peculiar chant which was sung by women winnowing corn and mentioned by Aristophanes in the *Thesmophoriazuse*.

The hand-mills of the ancient Egyptians appear to have been of the same character as those of their descendants, and like them were worked by women (Wilkinson, *Anc. Eg.* ii. p. 118, &c.). "They had also a large mill on a very similar principle; but the stones were of far greater power and dimensions; and this could only have been turned by cattle or asses, like those of the ancient Romans, and of the modern Cairenes." It was the millstone of a mill of this kind, driven by an ass,<sup>c</sup> which is alluded to in Matt. xviii. 6 (*μύλος ὄνου*), to distinguish it, says Lightfoot (*Hor. Hebr.* in loc.), from those small mills which were used to grind spices for the wound of circumcision, or for the delights of the Sabbath, and to which both Kimchi and Jarchi find a reference in Jer. xxv. 10. Of a married man with slender means it is said in the Talmud (*Kilthushin*, p. 29 b), "with a millstone on his neck he studies the law," and the expression is still proverbial (Tendlau, *Sprichwörter*, p. 181).

It was the movable upper millstone of the hand-mill with which the woman of Thebez broke Abimelech's skull (Judg. ix. 53). It is now generally made, according to Dr. Thomson, of a porous lava brought from the Hauran, both stones being of the same material, but, says the same traveller, "I have seen the *nether* made of a compact sandstone, and quite thick, while the *upper* was of this lava, probably because from its lightness it is the

more easily driven round with the hand" (*Lanc. and Book*, ch. 34). The porous lava to which he refers is probably the same as the black tufa mentioned by Burekhardt (*Syria*, p. 57), the blocks of which are brought from the Lejah, and are fashioned into millstones by the inhabitants of Ezra, a village in the Hauran. "They vary in price according to their size, from 15 to 60 piastres, and are preferred to all others on account of the hardness of the stone."

The Israelites, in their passage through the desert, had with them hand-mills, as well as mortars [MORTAR], in which they ground the manna (Num. xi. 8). One passage (Lam. v. 13) is deserving of notice, which Iloheisel (*de Molis Manual. Vet.* in Ugolini, vol. xxix) explains in a manner which gives it a point which is lost in our A. V. It may be rendered, "the choice (men) bore the mill (*טחון*, *techôn*),<sup>d</sup> and the youths stumbled beneath the wood;" the wood being the woodwork or shaft of the mill, which the captives were compelled to carry. There are, besides, allusions to other apparatus connected with the operation of grinding, the sieve, or bolter (*נָפֵף*, *nâphâh*, Is. xxx. 28; or *פְּבֵרָה*, *pebârâh*, Am. ix. 9), and the hopper, though the latter is only found in the Mishna (*Zubin*, iv. 3), and was a late invention. We also find in the Mishna (*Demai*, iii. 4) that mention is made of a miller (*טוחן*, *tôchen*), indicating that grinding corn was recognized as a distinct occupation. Wind-mills and water-mills are of more recent date. W. A. W.

\* Some other allusions to the mill and its uses deserve explanation. The common millstone rarely exceeds two feet in diameter, and hence its size fitted it to be used as an instrument of punishment. It was sometimes fastened to the necks of criminals who were to be drowned. The Saviour refers to this practice in Mark ix. 42, where he says: Sooner than "offend one of these little ones, it were better for a man that a millstone were hanged about his neck, and he were cast into the sea." See also Matt. xviii. 6; and Luke xvii. 2. It is stated that this mode of execution is not unknown in the East at the present day. As those who grind, in whatever order they may sit, have the mill before them, it becomes natural, in describing their position with reference to the mill, to speak of their being behind it. Hence it is said in Ex. xi. 5 that the pestilence which was to be sent on the Egyptians should "destroy from the first-born of Pharaoh that sitteth upon his throne, even unto the first-born of the maid-servant that is behind the mill."

The fact that grinding at the mill was looked upon as so ignoble (see above), shows how extreme was the degradation to which the Philistines subjected Samson. It is said (Judg. xvi. 21) that the Philistines "put out" (strictly, "dug out" in the Hebrew)

<sup>a</sup> Grinding is reckoned in the Mishna (*Shabbath*, vi. 2) among the chief household duties, to be performed by the wife unless she brought with her one servant (*Sethuboth*, v. 5); in which case she was relieved from grinding, baking, and washing, but was still obliged to suckle her child, make her husband's bed, and work in wool.

<sup>b</sup> *Ἐν ἀσθενείᾳ φωνῆς τῆς ἀληθοῦσος*, reading *תַּחֲנוֹן*,

<sup>d</sup> Compare the Arabic *طاحون*, *tahoon*, a mill

"the eyes of Samson, and made him grind in the prison-house;" that is, he was confined in prison, and required to grind there, by turning a hand-mill, such as has been described above. It was the great humiliation of his captivity. He who had been the hero of Israel, who had possessed the strength of a giant, was compelled to sit on the ground and work at the mill, like a woman or a slave. The blinding was sometimes inflicted to prevent the giddiness liable to arise from the circular motion (Herod. iv. 2). At the same time it was a frequent barbarity of ancient warfare (Jer. lii. 11).

Possibly the woman of Thebez who threw the upper stone of the mill, the "rider" or "runner," on the head of Abimelech (see above) was occupied in grinding at the moment. She had only to lift the upper stone from its pedestal, and would then have at once an effectual weapon for her purpose. The A. V. erroneously suggests that it was "a piece" or fragment of the stone which she hurled at Abimelech. See the allusion to this incident in 2 Sam. xii. 21. The permanent or lower stone was called *בִּלְחָה הַתַּחְתִּיתִים*, Job xii. 16. Some of the larger mills in Syria at the present day are turned by mules and asses, as in ancient times (Matt. xviii. 6). The time of grinding would be regulated by the wants of the family, but from the nature of the case as a rule it would be one of the daily occupations. At Jerusalem one may see at night-fall the open ground on Bezetha alive with women performing this labor. The water-mills at present at *Nábulus* (Shechem) are somewhat noted. II.

**MILLET** (*דֹּחָן*,<sup>a</sup> *dóchan*: *κέγχρος*: *mílum*). In all probability the grains of *Panicum miliaceum* and *italicum*, and of the *Holcus sorghum*, Linn. (the *Sorghum vulgare* of modern writers), may all be comprehended by the Hebrew word. Mention of millet occurs only in Ez. iv. 9, where it is enumerated together with wheat, barley, beans, lentils, and fitches, which the prophet was ordered to make into bread. Celsius (*Hierob.* i. 454) has given the names of numerous old writers who are in favor of the interpretation adopted by the LXX. and Vulg.; the Chaldee, Syriac, and Arabic versions have a word identical with the Hebrew. That "millet" is the correct rendering of the original word there can be no doubt; the only question that remains for consideration is, what is the particular species of millet intended: is it the *Panicum miliaceum*, or the *Sorghum vulgare*, or may both kinds be denoted? The Arabs to this day apply the term *dukhan* to the *Panicum miliaceum*, but Forskál (*Descr. Plant.* p. 174) uses the name of the *Holcus dochna*, "a plant," says Dr. Royle (*Kitto's Cyc. art.* "Dokhan"), "as yet unknown to botanists." The *Holcus durrha* of Forskál, which he says the Arabs call *táam*, and which he distinguishes from the *H. dochna*, appears to be identical with the *dourra*, *Sorghum vulgare*, of modern botanists. It is impossible, in the case of these and many other cereal grains, to say to what countries they are indigenous. Sir G. Wilkinson enumerates wheat, beans, lentiles, and *dourra*, as being preserved by seeds, or by representation on the ancient tombs of Egypt, and has no doubt that the *Holcus sorghum* was known to the ancient inhabitants of

that country. Dr. Royle maintains that the true *dukhan* of Arab authors is the *Panicum miliaceum*.

*Sorghum vulgare.*

which is universally cultivated in the East. Celsius (*Hierob.* l. c.) and Hiller (*Hierophyl.* ii. 124, give *Panicum* as the rendering of *Dochan*; the

*Panicum miliaceum.*

<sup>a</sup> From root *דָּחַן*, "to be dusky," in allusion to the color of the seeds.

LXX. word *κέγχρος* in all probability is the *Panicum italicum*, a grass cultivated in Europe as an article of diet. There is, however, some difficulty

in identifying the precise plants spoken of by the Greeks and Romans under the names of *κέρχρος*, *ἔλυμος*, *panicum*, *miliun*, etc.

The *Panicum miliaceum* is cultivated in Europe and in tropical countries, and, like the *dourra*, is often used as an ingredient in making bread; in India it is cultivated in the cold weather with wheat and barley. Tournefort (*Voyage*, ii. 95) says that the poor people of Samos make bread by mixing half wheat and half barley and white millet. The seeds of millet in this country are, as is well known, extensively used as food for birds. It is probable that both the *Sorghum vulgare* and the *Panicum miliaceum* were used by the ancient Hebrews and Egyptians, and that the Heb. *Dochan* may denote either of these plants. Two cultivated species of *Panicum* are named as occurring in Palestine, namely, *P. miliaceum* and *P. italicum* (Strand's *Flor. Palest.* Nos. 35, 37). The genera *Sorghum* and *Panicum* belong to the natural order *Gramineae*, perhaps the most important order in the vegetable kingdom. W. H.

**MILLO** (מִלּוֹ): always with the definite article [see below] *ἡ ἄκρα*, once *τὸ ἀνάλημμα*; Alex. in 1 K. ix. [24] only, *η μελω*: *Mello*, a place in ancient Jerusalem. Both name and thing seem to have been already in existence when the city was taken from the Jebusites by David. His first occupation after getting possession was to build "round about, from the Millo and to the house" (A. V. "inward"; 2 Sam. v. 9): or as the parallel passage has it, "he built the city round about, and from the Millo round about" (1 Chr. xi. 8). Its repair or restoration was one of the great works for which Solomon raised his "levy" (1 K. ix. 15, 24, xi. 27); and it formed a prominent part of the fortifications by which Hezekiah prepared for the approach of the Assyrians (2 Chr. xxxii. 5). The last passage seems to show that "the Millo" was part of the "city of David," that is of Zion, a conclusion which is certainly supported by the singular passage, 2 K. xii. 20, where, whichever view we take of Silla, the "house of Millo" must be in the neighborhood of the Tyropeon valley which lay at the foot of Zion. More than this it seems impossible to gather from the notices quoted above — all the passages in which the name is found in the O. T.

If "Millo" be taken as a Hebrew word, it would be derived from a root which has the force of "filling" (see Gesenius, *Thes.* pp. 737, 739). This notion has been applied by the interpreters after their custom in the most various and opposite ways: a rampart (*agger*); a mound; an open space used for assemblies, and therefore often filled with people; a ditch or valley; even a trench filled with water. It has led the writers of the Targums to render Millo by מְלִיָּה, *i. e.* *Milletha*, the term by which in other passages they express the Hebrew, כְּלִיָּה, *sol'lah*, the mound which in ancient warfare was used to besiege a town. But unfortunately none of these guesses enable us to ascertain what Millo really was, and it would prob-

ably be nearer the truth — it is certainly safer — to look on the name as an ancient or archaic term, Jebusite, or possibly even still older, adopted by the Israelites when they took the town, and incorporated into their own nomenclature.<sup>a</sup> That it was an ante-Hebraic term is supported by its occurrence in connection with Shechem, so eminently a Canaanite place. (See the next article.) The only ray of light which we can obtain is from the LXX. Their rendering in every case (excepting<sup>b</sup> only 2 Chr. xxxii. 5) is *ἡ ἄκρα*, a word which they employ nowhere else in the O. T. Now *ἡ ἄκρα* means "the citadel," and it is remarkable that it is the word used with unvarying persistence throughout the Books of Maccabees for the fortress on Mount Zion, which was occupied throughout the struggle by the adherents of Antiochus, and was at last razed and the very hill leveled by Simon.<sup>c</sup> [JERUSALEM, vol. ii. pp. 1293 f, 1295, &c.] It is therefore perhaps not too much to assume that the word *millo* was employed in the Hebrew original of 1 Maccabees. The point is exceedingly obscure, and the above is at the best little more than mere conjecture, though it agrees so far with the slight indications of 2 Chr. xxxii. 5, as noticed already. G.

#### MILLO, THE HOUSE OF. 1. (מִלּוֹ)

מִלּוֹ: *οἶκος Βηθμααλώ* [Vat. -*αλων* and *αλων*]; Alex. *οικος Μααλων*: *urbis Mello*; *oppidum Mello*.) Apparently a family or clan, mentioned in Judg. ix. 6, 20 only, in connection with the men or lords of Shechem, and concerned with them in the affair of Abimelech. No clew is given by the original or any of the versions as to the meaning of the name.

2. (מִלּוֹ): *οἶκος Μααλώ*; [Vat. Alex. *Μααλώ*.] *domus Mello*.) The "house of Millo that goeth down to Silla" was the spot at which king Joash was murdered by his slaves (2 K. xii. 20). There is nothing to lead us to suppose that the murder was not committed in Jerusalem, and in that case the spot must be connected with the ancient Millo (see preceding article). Two explanations have been suggested of the name SILLA. These will be discussed more fully under that head, but whichever is adopted would equally place Beth Millo in or near the Tyropeon, taking that to be where it is shown in the plan of Jerusalem, at vol. ii. p. 1312. More than this can hardly be said on the subject in the present state of our knowledge. G.

**MINES, MINING.** "Surely there is a source for the *silver*, and a place for the *gold* which they refine. *Iron* is taken out of the soil, and stone man melts (for) copper. He hath put an end to darkness, and to all perfection (*i. e.*, most thoroughly) he searcheth the stone of thick darkness and of the shadow of death. He hath sunk a shaft far from the wanderer; they that are forgotten of the foot are suspended, away from man they waver to and fro. (As for) the earth, from her cometh forth bread, yet her nethermost parts are upturned as (by) fire. The place of sapphire (are) her stones, and dust of gold is his. A track which the bird of prey hath not known, nor the

<sup>a</sup> Just as the Knichtena-guild Lane of Saxon London became Nightingale Lane, as the Saxon name grew unintelligible.

<sup>b</sup> Here, and here only, the LXX. have *τὸ ἀνάλημμα*, perhaps the "foundation" or "substruction"; though Schleusner gives also the meaning *altitudo*.

<sup>c</sup> The name Mount Zion was never applied to the above eminence by any ancient writer, and when *that* hill had been "leveled," the simile of the Psalmist was still fresh and forcible: "as Mount Zion, which cannot be removed, but abideth forever." [JERUSALEM vol. ii. 1293 a, 1295 b.] S W

eye of the falcon glared upon; which the sons of pride (*i. e.* wild beasts) have not trodden, nor the roaring lion gone over; in the flint man hath thrust his hand, he hath overturned mountains from the root; in the rocks he hath cleft channels,<sup>a</sup> and every rare thing hath his eye seen: the streams hath he bound that they weep not, and that which is hid he bringeth forth to light" (Job xxviii. 1-11). Such is the highly poetical description given by the author of the book of Job of the operations of mining as known in his day, the only record of the kind which we inherit from the ancient Hebrews. The question of the date of the book cannot be much influenced by it; for indications of a very advanced state of metallurgical knowledge are found in the monuments of the Egyptians at a period at least as early as any which would be claimed for the author. Leaving this point to be settled independently, therefore, it remains to be seen what is implied in the words of the poem.

It may be fairly inferred from the description that a distinction is made between gold obtained in the manner indicated, and that which is found in the natural state in the alluvial soil, among the débris washed down by the torrents. This appears to be implied in the expression "the gold they refine," which presupposes a process by which the pure gold is extracted from the ore, and separated from the silver or copper with which it may have been mixed. What is said of gold may be equally applied to silver, for in almost every allusion to the process of refining the two metals are associated. In the passage of Job which has been quoted, so far as can be made out from the obscurities with which it is beset, the natural order of mining operations is observed in the description. The whole point is obviously contained in the contrast, "Surely there is a source for the silver, and a place for the gold which men refine,—but where shall wisdom be found, and where is the place of understanding?" No labor is too great for extorting from the earth its treasures. The shaft is sunk, and the adventurous miner, far from the haunts of men, hangs in mid-air (*v. 4*): the bowels of the earth—which in the course of nature grows but corn—are overthrown as though wasted by fire. The path which the miner pursues in his underground course is unseen by the keen eye of the falcon, nor have the boldest beasts of prey traversed it, but man wins his way through every obstacle, hews out tunnels in the rock, stops the water from flooding his mine, and brings to light the precious metals as the reward of his adventure. No description could be more complete. The poet might have had before him the copper mines of the Sinaitic peninsula. In the Wady Maghârah, "the valley of the Cave," are still traces of the Egyptian colony of miners who settled there for the purpose of extracting copper from the freestone rocks, and left their hieroglyphic inscriptions upon the face of the cliff. That these inscriptions are of great antiquity there can be little doubt, though Lepsius may not be justified in placing them at a date *B. C.* 4000. "Already, under the fourth dynasty of Manetho," he says, "the same which erected the great pyramids of Gizeh, 4000 *B. C.*, copper mines had been discovered in this desert, which were worked by a colony. The peninsula was then

inhabited by Asiatic, probably Semitic races, therefore do we often see in those rock sculptures the triumphs of Pharaoh over the enemies of Egypt. Almost all the inscriptions belong to the Old Empire, only one was found of the co-regency of Tuthmosis III. and his sister" (*Letters from Egypt*, p. 346, Eng. tr.). In the Maghârah tablets Mr. Drew (*Scripture Lands*, p. 50, note) "saw the cartouche of Saphis, the builder of the Great Pyramid, and on the stones at Sûrâbit el Khâdim there are those of kings of the eighteenth and nineteenth dynasties." But the most interesting description of this mining colony is to be found in a letter to the Athenæum (June 4, 1859, No. 164), p. 747, signed M. Δ. and dated from "Sarabut el Khadem, in the Desert of Sinai, May, 1859." The writer discovered on the mountain exactly opposite the caves of Maghârah, traces of an ancient fortress intended, as he conjectures, for the protection of the miners. The hill on which it stands is about 1000 feet high, nearly insulated, and formed of a series of precipitous terraces, one above the other, like the steps of the pyramids. The uppermost of these was entirely surrounded by a strong wall within which were found remains of 140 houses, each about ten feet square. There were, besides, the remains of ancient hammers of green porphyry, and reservoirs "so disposed that when one was full the surplus ran into the other, and so in succession, so that they must have had water enough to last for years." The ancient furnaces are still to be seen, and on the coast of the Red Sea are found the piers and wharves whence the miners shipped their metal in the harbor of Abu Zelimeh. Five miles from Sarabut el Khadem the same traveller found the ruins of a much greater number of houses, indicating the existence of a large mining population, and, besides, five immense reservoirs formed by damming up various wadies. Other mines appear to have been discovered by Dr. Wilson in the granite mountains east of the Wady Mokatteb. In the Wady Nasb the German traveller Ruppell, who was commissioned by Mohammed Ali, the Viceroy of Egypt, to examine the state of the mines there, met with remains of several large smelting furnaces, surrounded by heaps of slag. The ancient inhabitants had sunk shafts in several directions, leaving here and there columns to prevent the whole from falling in. In one of the mines he saw huge masses of stone rich in copper (Ritter, *Erdkunde*, xiii. 786). The copper mines of Phœno in Idumæa, according to Jerome, were between Zoar and Petra: in the persecution of Diocletian the Christians were condemned to work them.

The gold mines of Egypt in the Bishâree desert, the principal station of which was Eshuranib, about three days' journey beyond Wady Allaga, have been discovered within the last few years by M. Linant and Mr. Bonomi, the latter of whom supplied Sir G. Wilkinson with a description of them, which he quotes (*Anc. Eg.* iii. 229, 230). Ruins of the miners' huts still remain as at Sûrâbit el-Khâdim. "In those nearest the mines lived the workmen who were employed to break the quartz into small fragments, the size of a bean, from whose hands the pounded stone passed to the persons who ground it in hand-mills, similar to those

<sup>a</sup> It is curious that the word *יָבֵר*, *yêbr*, here used, is apparently Egyptian in origin, and if so may have

been a technical term among the Egyptian miners of the Sinaitic peninsula.

now used for corn in the valley of the Nile made of granitic stone; one of which is to be found in almost every house at these mines, either entire or broken. The quartz thus reduced to powder was washed on inclined tables, furnished with two cisterns, all built of fragments of stone collected there; and near these inclined planes are generally found little white mounds, the residue of the operation." According to the account given by Diodorus Siculus (iii. 12-14), the mines were worked by gangs of convicts and captives in fetters, who were kept day and night to their task by the soldiers set to guard them. The work was superintended by an engineer, who selected the stone and pointed it out to the miners. The harder rock was split by the application of fire, but the softer was broken up with picks and chisels. The miners were quite naked, their bodies being painted according to the color of the rock they were working, and in order to see in the dark passages of the mine they carried lamps upon their heads. The stone as it fell was carried off by boys, it was then pounded in stone mortars with iron pestles by those who were over 30 years of age till it was reduced to the size of a lentil. The women and old men afterwards ground it in mills to a fine powder. The final process of separating the gold from the pounded stone was entrusted to the engineers who superintended the work. They spread this powder upon a broad slightly inclined table, and rubbed it gently with the hand, pouring water upon it from time to time so as to carry away all the earthy matter, leaving the heavier particles upon the board. This was repeated several times; at first with the hand and afterwards with fine sponges gently pressed upon the earthy substance, till nothing but the gold was left. It was then collected by other workmen, and placed in earthen crucibles with a mixture of lead and salt in certain proportions, together with a little tin and some barley bran. The crucibles were covered and carefully closed with clay, and in this condition baked in a furnace for five days and nights without intermission. Of the three methods which have been employed for refining gold and silver, 1, by exposing the fused metal to a current of air; 2, by keeping the alloy in a state of fusion and throwing nitre upon it; and 3, by mixing the alloy with lead, exposing the whole to fusion upon a vessel of bone-ashes or earth, and blowing upon it with bellows or other blast; the latter appears most nearly to coincide with the description of Diodorus. To this process, known as the cupelling process [LEAD], there seems to be a reference in Ps. xii. 6; Jer. vi. 28-30; Ez. xxii. 18-22, and from it Mr. Napier (*Met. of the Bible*, p. 24) deduces a striking illustration of Mal. in. 2, 3, "he shall sit as a refiner and purifier of silver," etc. "When the alloy is melted . . . upon a cupell, and the air blown upon it, the surface of the melted metals has a deep orange-red color, with a kind of flickering wave constantly passing over the surface . . . As the process proceeds the heat is increased . . . and in a little the color of the fused metal becomes lighter. . . . At this stage the refiner watches the operation, either standing or sitting, with the greatest earn-

estness, until all the orange color and shading disappears, and the metal has the appearance of a highly-polished mirror, reflecting every object around it; even the refiner, as he looks upon the mass of metal, may see himself as in a looking-glass, and thus he can form a very correct judgment respecting the purity of the metal. If he is satisfied, the fire is withdrawn, and the metal removed from the furnace; but if not considered pure more lead is added and the process repeated."

Silver mines are mentioned by Diodorus (i. 33) with those of gold, iron, and copper, in the island of Meroe, at the mouth of the Nile. But the chief supply of silver in the ancient world appears to have been brought from Spain. The mines of that country were celebrated (1 Macc. viii. 3). Mt. Orospeida, from which the Guadalquivir, the ancient Baltes, takes its rise, was formerly called "the silver mountain," from the silver-mines which were in it (Strabo, iii. p. 148). Tartessus, according to Strabo, was an ancient name of the river, which gave its name to the town which was built between its two mouths. But the largest silver-mines in Spain were in the neighborhood of Carthago Nova from which, in the time of Polybius, the Roman government received 25,000 drachmae daily. These, when Strabo wrote, had fallen into private hands, though most of the gold-mines were public property (iii. p. 148). Near Castulo there were lead-mines containing silver, but in quantities so small as not to repay the cost of working. The process of separating the silver from the lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then sifted through sieves into water. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off, the remainder of the ore melted, the lead poured away and the silver left pure. If Tartessus be the Tarshish of Scripture, the metal workers of Spain in those days must have possessed the art of hammering silver into sheets, for we find in Jer. x. 9, "silver spread into plates is brought from Tarshish, and gold from Uphaz."

We have no means of knowing whether the gold of Ophir was obtained from mines or from the washing of gold-streams.<sup>a</sup> Pliny (vi. 32), from Juba, describes the *littus Hammeum* on the Persian Gulf as a place where gold-mines existed, and in the same chapter alludes to the gold-mines of the Sabæans. But in all probability the greater part of the gold which came into the hands of the Phœnicians and Hebrews was obtained from streams; its great abundance seems to indicate this. At a very early period Jericho was a centre of commerce with the East, and in the narrative of its capture we meet with gold in the form of ingots (Josh. vii. 21, A. V. "wedge," lit. "tongue"),<sup>b</sup> in which it was probably cast for the convenience of traffic. That which Achan took weighed 25 oz.

As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from 2 per cent. to 30 per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them, an operation performed in modern times by boiling the metal in nitric or

<sup>a</sup> The Hebrew  $\text{בֶּטֶסֶר}$ , *betsar* (Job xxii. 24, 25), or  $\text{בֶּטְסָר}$  *betsâr* (Job xxxvi. 19), which is rendered "gold" in the A. V., and is mentioned in the first-

quoted passage in connection with Ophir, is believed to signify gold and silver ore.

<sup>b</sup> Compare the Fr. *lingot*, which is from Lat. *lingva*, and is said to be the origin of *ingot*

sulphuric acid. To some process of this kind it has been imagined that reference is made in Prov. xvii. 3, "The *fining-pot* is for silver, and the *furnace* for gold;" and again in xxvii. 21. "If, for example," says Mr. Napier, "the term *fining-pot* could refer to the vessel or pot in which the silver is dissolved from the gold in parting, as it may be called with propriety, then these passages have a meaning in our modern practice" (*Met. of the Bible*, p. 28); but he admits this is at best but plausible, and considers that "the constant reference to certain qualities and kinds of gold in Scripture is a kind of presumptive proof that they were not in the habit of perfectly purifying or separating the gold from the silver."

A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals is found by some in the destruction of the golden calf in the desert by Moses. "And he took the calf which they had made, and burnt it in fire, and ground it to powder, and strawed it upon the water, and made the children of Israel drink" (Ex. xxxii. 20). As the highly malleable character of gold would render an operation like that which is described in the text almost impossible, an explanation has been sought in the supposition that we have here an indication that Moses was a proficient in the process known in modern times as calcination. The object of calcination being to oxidize the metal subjected to the process, and gold not being affected by this treatment, the explanation cannot be admitted. M. Goguet (quoted in Wilkinson's *Anc. Eg.* iii. 221) confidently asserts that the problem has been solved by the discovery of an experienced chemist that "in the place of tartaric acid, which we employ, the Hebrew legislator used natron, which is common in the East." The gold so reduced and made into a draught is further said to have a most detestable taste. Goguet's solution appears to have been adopted without examination by more modern writers, but Mr. Napier ventured to question its correctness, and endeavored to trace it to its source. The only clew which he found was in a discovery by Stahl, a chemist of the 17th century, "that if 1 part gold, 3 parts potash, and 3 parts sulphur are heated together, a compound is formed which is partly soluble in water. If," he adds, "this be the discovery referred to, which I think very probable, it certainly has been made the most of by Biblical critics" (*Met. of the Bible*, p. 49). The whole difficulty appears to have arisen from a desire to find too much in the text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and all this might have been done without any refined chemical process like that referred to. The calf was first heated in the fire to destroy its shape, then beaten and broken up by hammering or filing into small pieces, which were thrown into the water, of which the people were made to drink as a symbolical act. "Moses threw the atoms into the water as an emblem of the perfect annihilation of the calf, and he gave the Israelites that water to drink, not only to impress upon them the abomination and despicable character of the image which they had made, but as a symbol of purification, to remove the object of the transgression by those

very persons who had committed it" (Dr. Kalisch, *Comm. on Ex.* xxxii. 20).

How far the ancient Hebrews were acquainted with the processes at present in use for extracting copper from the ore it is impossible to assert, as there are no references in Scripture to anything of the kind, except in the passage of Job already quoted. Copper smelting, however, is in some cases attended with comparatively small difficulties, which the ancients had evidently the skill to overcome. Ore composed of copper and oxygen mixed with coal and burnt to a bright red heat, leaves the copper in the metallic state, and the same result will follow if the process be applied to the carbonates and sulphurets of copper. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working iron in great perfection at a very early time, and much of the knowledge of metals which the Israelites had must have been acquired during their residence among them.

Of tin there appears to have been no trace in Palestine. That the Phœnicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt, and it is suggested that even the Egyptians may have procured it from the same source, either directly or through the medium of the former. It was found among the possessions of the Midianites, to whom it might have come in the course of traffic; but in other instances in which allusion is made to it, tin occurs in conjunction with other metals in the form of an alloy. The lead mines of Gebel e' Rossass, near the coast of the Red Sea, about half way between Berenice and Kossayr (Wilkinson, *Handb. for Egypt*, p. 403), may have supplied the Hebrews with that metal, of which there were no mines in their own country, or it may have been obtained from the rocks in the neighborhood of Sinai. The hills of Palestine are rich in iron, and the mines are still worked there [METALS] though in a very simple rude manner, like that of the ancient Samothracians: of the method employed by the Egyptians and Hebrews we have no certain information. It may have been similar to that in use throughout the whole of India from very early times, which is thus described by Dr. Ure (*Dict. of Arts*, etc., art. *Steel*). "The furnace or bloomery in which the ore is smelted is from four to five feet high; it is somewhat pear-shaped, being about five feet wide at bottom and one foot at top. It is built entirely of clay . . . There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually made of a goat's skin . . . The bamboo nozzles of the bellows are inserted into tubes of clay, which pass into the furnace . . . The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal, but without any flux whatever, is laid on the top of the coals and covered with charcoal to fill up the fur-

<sup>a</sup> This uncertainty might have been at once removed by a reference to Goguet's *Origine des Lois*, etc. (ii. 1, 2, c. 4), where Stahl (*Vitulus aureus*; Opusc.

chym. phys. med. p. 585) is quoted as the authority for the statement.

face. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace."

It has seemed necessary to give this account of a very ancient method of iron smelting, because, from the difficulties which attend it, and the intense heat which is required to separate the metal from the ore, it has been asserted that the allusions to iron and iron manufacture in the Old Testament are anachronisms. But if it were possible among the ancient Indians in a very primitive state of civilization, it might have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron furnaces of Egypt (comp. Deut. iv. 20).

The question of the early use of iron among the Egyptians, is fully disposed of in the following remarks of Sir Gardner Wilkinson (*Ancient Egyptians*, ii. pp. 154-156):—

"In the infancy of the arts and sciences, the difficulty of working iron might long withhold the secret of its superiority over copper and bronze; but it cannot reasonably be supposed that a nation so advanced, and so eminently skilled in the art of working metals as the Egyptians and Sidonians, should have remained ignorant of its use, even if we had no evidence of its having been known to the Greeks and other people; and the constant employment of bronze arms and implements is not a sufficient argument against their knowledge of iron, since we find the Greeks and Romans made the same things of bronze long after the period when iron was universally known. . . . To conclude, from the want of iron instruments, or arms, bearing the names of early monarchs of a Pharaonic age, that bronze was alone used is neither just nor satisfactory; since the decomposition of that metal, especially when buried for ages in the nitrous soil of Egypt, is so speedy as to preclude the possibility of its preservation. Until we know in what manner the Egyptians employed bronze tools for cutting stone, the discovery of them affords no additional light, nor even argument; since the Greeks and Romans continued to make bronze instruments of various kinds so long after iron was known to them; and Herodotus mentions the iron tools used by the builders of the Pyramids. Iron and copper mines are found in the Egyptian desert, which were worked in old times; and the monuments of Thebes, and even the tombs about Memphis, dating more than 4000 years ago, represent butchers sharpening their knives on a round bar of metal attached to their apron, which from its blue color can only be steel; and the distinction between the bronze and iron weapons in the tomb of Remeses III., one painted red, the other blue, leaves no doubt of both having been used (as in Rome) at the same periods. In Ethiopia iron was much more abundant than in Egypt, and Herodotus states that copper was a rare metal there; though we may doubt his assertion of prisoners in that country having been bound with fetters of gold. The speedy decomposition of iron

would be sufficient to prevent our finding implements of that metal of an early period, and the greater opportunities of obtaining copper ore, added to the facility of working it, might be a reason for preferring the latter whenever it answered the purpose instead of iron." [Iron, Amer. ed.]

W. A. W.

#### MINGLED PEOPLE. This phrase

(מְעָרָב, *hā'ereb*), like that of "the mixed multitude," which the Hebrew closely resembles, is applied in Jer. xxv. 20, and Ez. xxx. 5, to denote the miscellaneous foreign population of Egypt and its frontier-tribes, including every one, says Jerome, who was not a native Egyptian, but was resident there. The Targum of Jonathan understands it in this passage as well as in Jer. l. 37, of the foreign mercenaries, though in Jer. xxv. 24, where the word again occurs, it is rendered "Arabs." It is difficult to attach to it any precise meaning, or to identify with the mingled people any race of which we have knowledge. "The kings of the mingled people that dwell in the desert"<sup>a</sup> are the same apparently as the tributary kings (A. V. "kings of Arabia") who brought presents to Solomon (1 K. x. 15);<sup>b</sup> the Hebrew in the two cases is identical. These have been explained (as in the Targum on 1 K. x. 15) as foreign mercenary chiefs who were in the pay of Solomon, but Thenius understands by them the sheykhs of the border tribes of Bedouins, living in Arabia Deserta, who were closely connected with the Israelites. The "mingled people" in the midst of Babylon (Jer. l. 37) were probably the foreign soldiers or mercenary troops, who lived among the native population, as the Targum takes it. Kimchi compares Ex. xii. 38, and explains *hā'ereb* of the foreign population of Babylon<sup>c</sup> generally, "foreigners who were in Babylon from several lands," or it may, he says, be intended to denote the merchants, *'ereb* being thus connected with the מְעָרָב, *'orēbē m'arābēc*, of Ez. xxvii. 27, rendered in the A. V. "the occupiers of thy merchandise." His first interpretation is based upon what appears to be the primary signification of the root מְעָרָב, *'arab*, to mingle, while another meaning, "to pledge, guarantee," suggested the rendering of the Targum "mercenaries,"<sup>d</sup> which Jarchi adopts in his explanation of "the kings of *hā'ereb*," in 1 K. x. 15, as the kings who were pledged to Solomon and dependent upon him. The equivalent which he gives is apparently intended to represent the Fr. *garantie*.

The rendering of the A. V. is supported by the LXX. *σὺμμικτός* in Jer., and *ἐπιμικτός* in Ezekiel.

W. A. W.

MIN'IAMIN (מִינִימִין) [on the right, or son of the right hand]: Βενιαμίν; [Vat.] Alex. Βαγιαμειν; Benjamin). 1. One of the Levites in the reign of Hezekiah appointed to the charge of the freewill offerings of the people in the cities of the priests, and to distribute them to their brethren (2 Chr. xxxi. 15). The reading "Benjamin" of

<sup>a</sup> Kimchi observes that these are distinguished from the mingled people mentioned in ver. 20 by the addition, "that dwell in the desert."

<sup>b</sup> In the parallel passage of 2 Chr. ix. 14 the reading

מְעָרָב, *'arab*, or Arabia.

<sup>c</sup> The same commentator refers the expression in Is. xiii. 14, "they shall every man turn to his own people," to the dispersion of the mixed population of Babylon at its capture.

<sup>d</sup> מְרַמְיָאָה

the LXX. and Vulg. is followed by the Peshito Syriac.

2. (*Μιαίνω*; [Vat. Alex. FA.<sup>1</sup> omit; FA.<sup>3</sup> *Βεβαιμειν*:] *Μιαμίν*.) The same as ΜΙΑΜΙΝ 2 and MIJAMIN 2 (Neh. xii. 17).

3. ([Ald.] *Βεβαιμίν*; [Rom. Vat. Alex. FA.<sup>1</sup> omit; FA.<sup>3</sup>] *Βεβαιμειν*; [Comp. *Μιαίνω*.]) One of the priests who blew the trumpets at the dedication of the wall of Jerusalem (Neh. xii. 41).

\* **MINISH** occurs (Ex. v. 19; 1's. cvii. 39) in the sense of our present "lessen" or "diminish." It comes from the Latin *minuere* through the old French *menuiser*. It now appears only as "diminish," which has taken its place. The old form is found in Wycliffe's translation of John iii. 30: "It behoveth him for to waxe, forsoth me to be *menusid*, or maad lesse." H.

**MIN'NI** (מִנִּי: *Menni*), a country mentioned in connection with Ararat and Ashchenaz (Jer. li. 27). The LXX. erroneously renders it *παρ' ἑμοῦ*. It has been already noticed as a portion of Armenia. [ARMENIA.] The name may be connected with the *Mingys* noticed by Nicolaus of Damascus (Joseph. Ant. i. 3, § 6), with the *Minnai* of the Assyrian inscriptions, whom Rawlinson (*Herod.* i. 464) places about lake *Uruntiyeh*, and with the *Minaus* who appears in the list of Armenian kings in the inscription at *Wan* (Layard's *Nin. and Bab.* p. 401). At the time when Jeremiah prophesied, Armenia had been subdued by the Median kings (*Herod.* i. 103, 177). W. L. B.

**MINISTER.** This term is used in the A. V. to describe various officials of a religious and civil character. In the O. T. it answers to the Hebrew *meshàreth*,<sup>a</sup> which is applied (1), to an attendant upon a person of high rank, as to Joshua in relation to Moses (Ex. xxiv. 13; Josh. i. 1), and to the attendant on the prophet Elisha (2 K. iv. 43); (2) to the *attachés* of a royal court (1 K. x. 5, where, it may be observed, they are distinguished from the "servants" or officials of higher rank, answering to our *ministers*, by the different titles of the chambers assigned to their use, the "sitting" of the servants meaning rather their *abode*, and the "attendance" of the ministers the ante-room in which they were stationed); persons of high rank held this post in the Jewish kingdom (2 Chron. xxii. 8); and it may be in this sense, as the attendants of the King of Kings, that the term is applied to the angels (1's. civ. 4); (3) to the Priests and Levites, who are thus described by the prophets and later historians (Is. lxi. 6; Ez. xliv. 11; Joel i. 9, 13; Ezr. viii. 17; Neh. x. 36), though the verb, whence *meshàreth* is derived, is not uncommonly used in reference to their services in the earlier books (Ex. xxviii. 43; Num. iii. 31; Deut. xviii. 5, *al.*). In the N. T. we have three terms each with its distinctive meaning—*leitourgids*, *ὑπηρέτης*, and *διάκονος*. The first answers most nearly to the Hebrew *meshàreth* and is usually employed in the LXX. as its equivalent. It betokens a subordinate public administrator, whether civil or sacerdotal,

and is applied in the former sense to the *magistrates* in their relation to the Divine authority (Rom. xiii. 6), and in the latter sense to our Lord in relation to the Father (Heb. viii. 2), and to St. Paul in relation to Jesus Christ (Rom. xv. 16), where it occurs among other expressions of a sacerdotal character, "ministering" (*ἰερούργουντα*, "offering up" (*προσφορά*, etc.). In all these instances the original and special meaning of the word, as used by the Athenians,<sup>b</sup> is preserved, though this comes, perhaps, yet more distinctly forward in the cognate terms *leitourgia* and *leitourgein*, applied to the sacerdotal office of the Jewish priest (Luke i. 23; Heb. ix. 21, x. 11), to the still higher priesthood of Christ (Heb. viii. 6), and in a secondary sense to the Christian priest who offers up to God the faith of his converts (Phil. ii. 17, *leitourgia τῆς πίστεως*), and to any act of public self-devotion on the part of a Christian disciple (Rom. xv. 27; 2 Cor. ix. 12; Phil. ii. 30). The second term, *ὑπηρέτης*, differs from the two others in that it contains the idea of actual and personal attendance upon a superior. Thus it is used of the attendant in the synagogue, the *khazan*<sup>c</sup> of the Talmudists (Luke iv. 20), whose duty it was to open and close the building, to produce and replace the books employed in the service, and generally to wait on the officiating priest or teacher<sup>d</sup> (Carpzov, *Apparat.* p. 314). It is similarly applied to Mark, who, as the attendant on Barnabas and Saul (Acts xiii. 5), was probably charged with the administration of baptism and other assistant duties (De Wette, *in loc.*); and again to the subordinates of the high-priests (John vii. 32, 45, xviii. 3, *al.*), or of a jailer (Matt. v. 25 = *πράκτωρ* in Luke xii. 58; Acts v. 22). The idea of *personal attendance* comes prominently forward in Luke i. 2; Acts xxvi. 16, in both of which places it is alleged as a ground of trustworthy testimony (*ipsi viderunt, et, quod plus est, ministrarunt*, Bengel). Lastly, it is used interchangeably with *διάκονος* in 1 Cor. iv. 1 compared with iii. 5, but in this instance the term is designed to convey the notion of subordination and humility. In all these cases the etymological sense of the word (*ὑπό, ἑρέτης*, literally a "sub-rouer," one who rows under command of the steersman) comes out. The term that most adequately represents it in our language is "attendant." The third term, *διάκονος*, is the one usually employed in relation to the ministry of the Gospel: its application is twofold, in a general sense to indicate ministers of any order, whether superior or inferior, and in a special sense to indicate an order of inferior ministers. In the former sense we have the cognate term *διακονία* applied in Acts vi. 1, 4, both to the ministrations of tables and to the higher ministrations of the word, and the term *διάκονος* itself applied, without defining the office, to Paul and Apollos (1 Cor. iii. 5), to Tychicus (Eph. vi. 21; Col. iv. 7), to Epaphras (Col. i. 7), to Timothy (1 Thes. iii. 2), and even to Christ himself (Rom. xv. 8; Gal. ii. 17). In the latter sense it is applied in the passages where the *διάκονος* is contradistinguished from the Bishop, as

<sup>a</sup> מְשָׁרֵת.

<sup>b</sup> The term is derived from *λείτων ἔργον*, "public work," and the *leitourgia* was the name of certain personal services which the citizens of Athens and some other states had to perform gratuitously for the public good. From the sacerdotal use of the word in the N. T., it obtained the special sense of a "public divine service," which is perpetuated in our word "liturgy."

The verb *leitourgein* is used in this sense in Acts xiii. 2.

<sup>c</sup> קָזָן.

<sup>d</sup> The *ὑπηρέτης* of ecclesiastical history occupied precisely the same position in the Christian Church that the *khazan* did in the synagogue; in Latin he was styled *sub-diaconus*, or *sub-deacon* (Bingham, *Ant.* iii. 2).

Phil. i. 1; 1 Tim. iii. 8-13. It is, perhaps, worthy of observation that the word is of very rare occurrence in the LXX. (Esth. i. 10, ii. 2, vi. 3), and then only in a general sense; its special sense, as known to us in its derivative "deacon," seems to be of purely Christian growth. [DEACON.] W. L. B.

**MIN'NITH** (מִנִּינִית) [perh. *given, allotted*]: ἕχθρις Ἀρνῶν; Alex. εἰς Σεμωεθ; <sup>a</sup> Joseph. πῶλις Μαλαδάθης; Pesh. Syriac, *Machir*; Vulg. *Mennith*), a place on the east of the Jordan, named as the point to which Jephthah's slaughter of the Ammonites extended (Judg. xi. 33). "From Aroer to the approach to Minnith" (עַד בּוֹאֵהָהּ מִן) seems to have been a district containing twenty cities. Minnith was in the neighborhood of Abel-Ceramim, the "meadow of vineyards." Both places are mentioned in the Onomasticon — "Mennith" or "Maanith" as 4 miles from Heshbon, on the road to Philadelphia (*Ammán*), and Abel as 6 or 7 miles from the latter, but in what direction is not stated. A site bearing the name *Menjah* is marked in Van de Velde's Map, perhaps on the authority of Buckingham, at 7 Roman miles east of Heshbon on a road to *Ammán*, though not on the frequented track. But we must await further investigation of these interesting regions before we can pronounce for or against its identity with Minnith.

The variations of the ancient versions as given above are remarkable, but they have not suggested anything to the writer. Schwarz proposes to find Minnith in *MAGED*, a trans-Jordanic town named in the Maccabees, by the change of מ to נ. An episcopal city of "Palestina secunda," named *Mennith*, is quoted by Reland (*Palestina*, p. 211), but with some question as to its being located in this direction (comp. 209).

The "wheat of Minnith" is mentioned in Ez. xxvii. 17, as being supplied by Judah and Israel to Tyre; but there is nothing to indicate that the same place is intended, and indeed the word is thought by some not to be a proper name. Philistia and Sharon were the great corn-growing districts of Palestine — but there were in these eastern regions also "fat of kidneys of wheat, and wine of the pure blood of the grape" (Deut. xxiii. 14). Of that cultivation Minnith and Abel-Ceramim may have been the chief seats.

In this neighborhood were possibly situated the vineyards in which Balaam encountered the angel on his road from Mesopotamia to Moab (Num. xxii. 24). G.

**MINSTREL.** The Hebrew word in 2 K. iii.

15 (מְנַגֵּנִים, *menaggén*) properly signifies a player upon a stringed instrument like the harp or *kinnor* [חַלְמַי], whatever its precise character may have been, on which David played before Saul (1 Sam. xvi. 16, xviii. 10, xix. 9), and which the harlots of the great cities used to carry with them as they walked to attract notice (Is. xxiii. 16). The passage in which it occurs has given rise to much conjecture; Elisha, upon being consulted by Jehoram as to the issue of the war with Moab, at first indignantly refuses to answer, and is only induced to do so by the presence of Jehoshaphat. He calls for

a harper, apparently a camp follower (one of the Levites according to Procopius of Gaza),<sup>b</sup> "And now bring me a harper; and it came to pass as the harper harped that the hand of Jehovah was on him." Other instances of the same divine influence or impulse connected with music, are seen in the case of Saul and the young prophets in 1 Sam. x. 5, 6, 10, 11. In the present passage the reason of Elisha's appeal is variously explained. Jarohi says that "on account of anger the Shechinah had departed from him;" Ephrem Syrus, that the object of the music was to attract a crowd to hear the prophecy; J. H. Michaelis, that the prophet's mind, disturbed by the impiety of the Israelites, might be soothed and prepared for divine things by a spiritual song. According to Keil (*Comm. on Kings*, i. 359, Eng. tr.), "Elisha calls for a minstrel, in order to gather in his thoughts by the soft tones of music from the impression of the outer world, and by repressing the life of self and of the world to be transferred into the state of internal vision by which his spirit would be prepared to receive the Divine revelation." This in effect is the view taken by Josephus (*Ant.* ix. 3, § 1), and the same is expressed by Maimonides in a passage which embodies the opinion of the Jews of the Middle Ages. "All the prophets were not able to prophesy at any time that they wished; but they prepared their minds, and sat joyful and glad of heart, and abstracted; for prophecy dwelleth not in the midst of melancholy nor in the midst of apathy, but in the midst of joy. Therefore the sons of the prophets had before them a psalter, and a tabret, and a pipe, and a harp and (thus) sought after prophecy" (or prophetic inspiration), (*Yad ha-chazakah*, vii. 5, Bernard's *Creed and Ethics of the Jews*, p. 16; see also note to p. 114). Kimchi quotes a tradition to the effect that, after the ascension of his master Elijah, the spirit of prophecy had not dwelt upon Elisha because he was mourning, and the spirit of holiness does not dwell but in the midst of joy. In 1 Sam. xviii. 10, on the contrary, there is a remarkable instance of the employment of music to still the excitement consequent upon an attack of frenzy, which in its external manifestations at least so far resembled the rapture with which the old prophets were affected when delivering their prophecies, as to be described by the same term. "And it came to pass on the morrow, that the evil spirit from God came upon Saul, and he prophesied in the midst of the house: and David played with his hand as at other times." Weemse (*Christ. Synagogue*, ch. vi. § 3, par. 6, p. 143) supposes that the music appropriate to such occasions was "that which the Greeks called *ἀρμονίαν*, which was the greatest and the saddest, and settled the affections."

The "minstrels" in Matt. ix. 23 were the flute-players who were employed as professional mourners, to whom frequent allusion is made (Eccl. xii. 5; 2 Chr. xxxv. 25; Jer. ix. 17-20), and whose representatives exist in great numbers to this day in the cities of the East. [MOURNING.]

W. A. W.

**MINT** (ἄδύσσιμον: *mentha*) occurs only in Matt. xxiii. 23 and Luke xi. 42, as one of those

<sup>a</sup> ἕως του ελθειν εις σεμωεθ is the reading of the Alex. Codex, ingeniously corrected by Grabe to ἕως του ελθειν σε εις Μωαβ.

<sup>b</sup> The Targum translates, "and now bring me a

man who knows how to play upon the harp, and it came to pass as the harper harped there rested upon him the spirit of prophecy from before Jehovah"

herbs the title of which the Jews were most scrupulously exact in paying. Some commentators have supposed that such herbs as mint, anise (dill), and cummin, were not titheable by law, and that the Pharisees, solely from an overstrained zeal, paid tithes for them; but as dill was subject to tithe (*Massroth*, cap. iv. § 5), it is most probable that the other herbs mentioned with it were also tithed, and this is fully corroborated by our Lord's own words: "these ought ye to have done." The Pharisees therefore are not censured for paying tithes of things untitheable by law, but for paying more regard to a scrupulous exactness in these minor duties than to important moral obligations.

There cannot be the slightest doubt that the A. V. is correct in the translation of the Greek word, and all the old versions are agreed in understanding some species of mint (*Mentha*) by it. Dioscorides (iii. 36, ed. Sprengel) speaks of ἡδύσσοον ἡμερον (*Mentha sativa*); the Greeks used the terms μίνθα, or μίνθη and μίνθος for mint, whence the derivation of the English word; the Romans have *mentha*, *menta*, *mentastrum*. According to Pliny (*H. N.* xix. 8) the old Greek word for mint was μίνθα, which was changed to ἡδύσσομον ("the sweet smelling"), on account of the fragrant prop-

*Mentha sylvestris.*

erties of this plant. Mint was used by the Greeks and Romans both as a carminative in medicine and a condiment in cookery. Apicius mentions the use of fresh (*viridis*) and dried (*arida*) mint. Compare also Pliny, *H. N.* xix. 8, xx. 14; Dioscor. iii. 36; the *Epityrum* of the Romans had mint as one of its ingredients (Cato, *de Re Rus.* § 120). Martial, *Epig.* x. 47, speaks of "ructatrix mentha," mint being an excellent carminative. "So amongst the Jews," says Celsius (*Hierob.* i. 547), "the Talmudical writers manifestly declare that mint was used with their food." (Tract. *Shem. Ve Jobel*, ch. vii. § 2, and Tr. *Oketzin*, ch. i. § 2; *Sheb.* ch. 7, § 1. Lady Calcott, (*Script. Herb.* p. 280) makes the following ingenious remark: "I know not whether mint was originally one of the bitter herbs with which the Israelites eat the Paschal lamb, but

our use of it with roast lamb, particularly about Easter time, inclines me to suppose it was." The same writer also observes that the modern Jews eat horse-radish and chervil with lamb. The woodcut represents the horse-mint (*M. sylvestris*) which is common in Syria, and according to Russell (*Hist. of Aleppo*, p. 39) found in the gardens at Aleppo; *M. sativa* is generally supposed to be only a variety of *M. arvensis*, another species of mint; perhaps all these were known to the ancients.<sup>a</sup> The mints belong to the large natural order *Labiata*.

W. H.

**MIPH'KAD, THE GATE** (מִפְּחָדֵי הַשַּׁעַר)

[Gate of the census, or of appointment, *Gen.*: πύλη τοῦ Μαφεκάδ: *porta judicialis*], one of the gates of Jerusalem at the time of the rebuilding of the wall after the return from Captivity (*Neb.* iii. 31). According to the view taken in this work of the topography of the city, this gate was probably not in the wall of Jerusalem proper, but in that of the city of David, or Zion, and somewhere near to the junction of the two on the north side (see vol. ii. p. 1322). The name may refer to some memorable census of the people, as for instance that of David, 2 Sam. xxiv. 9, and 1 Chr. xxi. 5 (in each of which the word used for "number" is *miph'kad*), or to the superintendents of some portion of the worship (*Pekdim*, see 2 Chr. xxxi. 13). G.

**MIRACLES.** The word "miracle" is the ordinary translation, in our authorized English version, of the Greek *σημεῖον*. Our translators did not borrow it from the Vulgate (in which *signum* is the customary rendering of *σημεῖον*), but, apparently, from their English predecessors, Tyndale, Coverdale, etc.; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. The Latin *miraculum*, from which it is merely accommodated to an English termination, corresponds best with the Greek *θαῦμα*, and denotes any object of wonder, whether supernatural or not. Thus the "Seven Wonders of the World" were called *miracula*, though they were only miracles of art. It will perhaps be found that the habitual use of the term "miracle" has tended to fix attention too much on the physical strangeness of the facts thus described, and to divert attention from what may be called their *signality*. In reality, the practical importance of the *strangeness* of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reasonable to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the *mode* in which that phenomenon was produced become of comparatively little practical value, and are only serviceable as helping our conceptions. In the case of such signs, when they vary from the ordinary course of nature, we may conceive of them as immediately wrought by the authorized intervention of some angelic being merely exerting invisibly his natural powers; or as the result of a provision made in the original scheme of the universe, by

<sup>a</sup> "There are various species," says Tristram (*Nat. Hist. of the Bible*, p. 471), "wild and cultivated, in Palestine. The common wild mint of the country is

*Mentha sylvestris*, which grows on all the hills, and much larger than our garden mint (*Mentha sativa*)." II.

which such an occurrence was to take place at a given moment; <sup>a</sup> or as the result of the interference of some higher law with subordinate laws; or as a change in the ordinary working of God in that course of events which we call nature; or as a suspension by his immediate power of the action of certain forces which He had originally given to what we call natural agents. These may be hypotheses more or less probable of the mode in which a given phenomenon is to be conceived to have been produced; but if all the circumstances of the case taken together make it reasonable to understand that phenomenon as a Divine sign, it will be of comparatively little practical importance which of them we adopt. Indeed, in many cases, the phenomenon which constitutes a Divine sign may be one not, in itself, at all varying from the known course of nature. This is the common case of prophecy: in which the fulfillment of the prophecy, which constitutes the sign of the prophet's commission, may be the result of ordinary causes, and yet, from being incapable of having been anticipated by human sagacity, it may be an adequate mark or sign of the Divine sanction. In such cases, the miraculous or wonderful element is to be sought not in the fulfillment, but in the prediction. Thus, although we should suppose, for example, that the destruction of Sennacherib's army was accomplished by an ordinary simoom of the desert, called figuratively the Angel of the Lord, it would still be a sign of Isaiah's prophetic mission, and of God's care for Jerusalem. And so, in the case of the passage of the Red Sea by the Israelites under Moses, and many other instances. Our Lord's prediction of the destruction of Jerusalem is a clear example of an event brought about in the ordinary course of things, and yet being a sign of the Divine mission of Jesus, and of the just displeasure of God against the Jews.

It would appear, indeed, that in almost all cases of signs or evidential miracles something prophetic is involved. In the common case, for example, of healing sickness by a word or touch, the word or gesture may be regarded as a *prediction* of the cure; and then, if the whole circumstances be such as to exclude just suspicion of (1) a *natural* anticipation of the event, and (2) a casual coincidence, it will be indifferent to the signalness of the cure whether we regard it as effected by the operation of ordinary causes, or by an immediate interposition of the Deity reversing the course of nature. Hypotheses by which such cures are attempted to be accounted for by ordinary causes are indeed generally wild, improbable, and arbitrary, and are (on that ground) justly open to objection; but, if the miraculous character of the predictive antecedent be admitted, they do not tend to deprive the phenomenon of its *signalness*: and there are minds which, from particular associations, find it easier to conceive a miraculous agency operating in the region of mind, than one operating in the region of matter.

It may be further observed, in passing, that the proof of the actual occurrence of a sign, when in itself an ordinary event, and invested with signalness only by a previous prediction, may be, in some

respects, better circumstanced than the proof of the occurrence of a miraculous sign. For the prediction and the fulfillment may have occurred at a long distance of time the one from the other, and be attested by separate sets of independent witnesses, of whom the one was ignorant of the fulfillment, and the other ignorant, or incredulous, of the prediction. As each of these sets of witnesses are deposing to what is to them a mere ordinary fact, there is no room for suspecting, in the case of those witnesses, any coloring from religious prejudice, or excited feeling, or fraud, or that craving for the marvelous which has notoriously produced many legends. But it must be admitted that it is only *such* sources of suspicion that are excluded in such a case; and that whatever inherent improbability there may be in a fact considered as *miraculous*—or varying from the ordinary course of nature—remains still: so that it would be a mistake to say that the two facts *together*—the prediction and the fulfillment—required no stronger evidence to make them credible than *any two* ordinary facts. This will appear at once from a parallel case. That A B was seen walking in Bond Street, London, on a certain day, and at a certain hour, is a common ordinary fact, credible on very slight evidence. That A B was seen walking in Broadway, New York, on a certain day, and at a certain hour, is, when taken by itself, similarly circumstanced. But if the day and hour assigned in both reports be the same, the case is altered. We conclude, at once, that one or other of our informants was wrong, or both, until convinced of the correctness of their statements by evidence much stronger than would suffice to establish an ordinary fact. This brings us to consider the peculiar improbability supposed to attach to *miraculous* signs, as such.

The peculiar improbability of *Miracles* is resolved by Hume, in his famous Essay, into the circumstance that they are "contrary to experience." This expression is, as has often been pointed out, strictly speaking, incorrect. In strictness, that only can be said to be contrary to experience, which is contradicted by the immediate perceptions of persons present at the time when the fact is alleged to have occurred. Thus, if it be alleged that *all* metals are ponderous, this is an assertion contrary to experience; because daily actual observation shows that the metal potassium is *not* ponderous. But if any one were to assert that a particular piece of potassium, which we had never seen, was ponderous, our experiments on other pieces of the same metal would not prove his report to be, in the same sense, contrary to our experience, but only contrary to the *analogy* of our experience. In a looser sense, however, the terms "contrary to experience" are extended to this secondary application; and it must be admitted that, in this latter, less strict sense, miracles are contrary to general experience, *so far as their mere physical circumstances, visible to us, are concerned*. This should not only be admitted, but strongly insisted upon, by the maintainers of miracles, because it is an essential element of their *signal* character. It is only the analogy of general experience (necessarily

<sup>a</sup> This is said by Maimonides (*Morah Nevochim*, part ii. c. 29) to have been the opinion of some of the *lder Rabbins*: "Nan dicunt, quando Deus O. M. hanc existentiam creavit, illum tum unicuique entitaturam suam ordinasse et determinasse, illisque na-

turs virtutem indidisse miracula illa producendi: et signum prophetæ nihî. aliud esse, quam quod Deus significavit prophetis tempus quo dicere hoc illud debeant," etc

narrow as all human experience is) that convinces us that a word or a touch has no efficacy to cure diseases or still a tempest. And, if it be held that the analogy of daily experience furnishes us with no measure of probability, then the so-called miracles of the Bible will lose the character of marks of the Divine Commission of the workers of them. They will not only become as probable as ordinary events, but they will assume the character of ordinary events. It will be just as credible that they were wrought by enthusiasts or impostors, as by the true Prophets of God, and we shall be compelled to own that the Apostles might as well have appealed to any ordinary event in proof of Christ's mission as to his resurrection from the dead. It is so far, therefore, from being true, that (as has been said with something of a sneer) "religion, following in the wake of science, has been compelled to acknowledge the government of the universe as being on the whole carried on by general laws, and not by special interpositions," that religion, considered as standing on miraculous evidence, necessarily presupposes a fixed order of nature, and is compelled to assume that, not by the discoveries of science, but by the exigency of its own position; and there are few books in which the general constancy of the order of nature is more distinctly recognized than the Bible. The witnesses who report to us miraculous facts are so far from testifying to the absence of general laws, or the instability of the order of nature, that, on the contrary, their whole testimony implies that the miracles which they record were at variance with their own general experience — with the general experience of their contemporaries — with what they believed to have been the general experience of their predecessors, and with what they anticipated would be the general experience of posterity. It is upon the very ground that the apparent *natural* causes, in the cases to which they testify, are known by uniform experience to be incapable of producing the effects said to have taken place, that *therefore* these witnesses refer those events to the intervention of a *supernatural* cause, and speak of these occurrences as Divine Miracles.

And this leads us to notice one grand difference between Divine Miracles and other alleged facts, that seem to vary from the ordinary course of nature. It is manifest that there is an essential difference between alleging a case in which, all the real antecedents or causes being similar to those which we have daily opportunities of observing, a consequence is said to have ensued quite different from that which general experience finds to be uniformly conjoined with them, and alleging a case in which there is supposed and *indicated by all the circumstances*, the intervention of an invisible antecedent, or cause, which we know to exist, and to be adequate to the production of such a result; for the special operation of which, in this case, we can assign probable reasons, and also for its not generally operating in a similar manner. This latter is the case of the Scripture miracles. They are wrought under a solemn appeal to God, in proof of a revelation worthy of Him, the scheme of which may be shown to bear a striking analogy to the constitution and order of nature; and it is manifest that, in order to make them fit *signs* for attesting revelation, they *ought* to be phenomena capable of being shown by a full induction to vary from what is known to us as the ordinary course of nature.

To this it is sometimes replied that, as we collect the existence of God from the course of nature, we have no right to assign to Him powers and attributes in any higher degree than we find them in the course of nature; and consequently neither the power nor the will to alter it. But such persons must be understood *verbis ponere Deum, re tollere*; because it is impossible really to assign Power, Wisdom, Goodness, etc., to the first cause, as an inference from the course of nature, without attributing to Him the power of making it otherwise. There can be no design, for example, or anything analogous to design, in the Author of the Universe, unless out of other *possible* collocations of things, He *selected* those fit for a certain purpose. And it is, in truth, a violation of all analogy, and an utterly wild and arbitrary chimera, to infer, without the fullest evidence of such a *limitation*, the existence of a Being possessed of such power and intelligence as we see manifested in the course of nature, and yet unable to make one atom of matter move an inch in any other direction than that in which it actually does move.

And even if we do not regard the existence of God (in the proper sense of that term) as proved by the course of nature, still if we admit his existence to be in any degree probable, or even possible, the occurrence of miracles will not be incredible. For it is surely going too far to say, that, because the ordinary course of nature leaves us in doubt whether the author of it be able or unable to alter it, or of such a character as to be disposed to alter it for some great purpose, it is *therefore* incredible that He should ever have actually altered it. The true philosopher, when he considers the narrowness of human experience, will make allowance for the possible existence of many causes not yet observed by man, so as that their operation can be reduced to fixed laws understood by us; and the operation of which, therefore, when it reveals itself, must seem to vary from the ordinary course of things. Otherwise, there could be no new discoveries in physical science itself. It is quite true that such forces as magnetism and electricity are *now* to a great extent reduced to known laws: but it is equally true that no one would have taken the trouble to find out the laws, if he had not *first* believed in the facts. Our knowledge of the law was not the ground of our belief of the fact; but our belief of the fact was that which set us on investigating the law. And it is easy to conceive that there may be forces in nature, unknown to us, the regular periods of the recurrence of whose operations within the sphere of our knowledge (if they ever occur at all) may be immensely distant from each other in time — (as, *e. g.* the causes which produce the appearance or disappearance of stars) — so as that, when they occur, they may seem wholly different from all the rest of man's present or past experience. Upon such a supposition, the *rarity* of the phenomenon should not make it incredible, because such a rarity would be involved in the conditions of its existence. Now this is analogous to the case of miracles. Upon the supposition that there is a God, the immediate volition of the Deity, determined by Wisdom, Goodness, etc., is a *VERA CAUSA*; because all the phenomena of nature have, on that supposition, such volitions as at least their ultimate antecedents; and that physical effect, whatever it may be, that stands next the Divine volition, is a case of a physical effect having such a volition so determined, for its immediate antecedent. **AN.**

is for the unusualness of the way of acting, that involved in the very conditions of the hypothesis, because this very *unusualness* would be necessary to fit the phenomenon for a miraculous sign.

In the foregoing remarks, we have endeavored to avoid all metaphysical discussions of questions concerning the nature of causation — the fundamental principle of induction, and the like; not because they are unimportant, but because they could not be treated of satisfactorily within the limits which the plan of this work prescribes. They are, for the most part, matters of an abstruse kind, and much difficultly; but (fortunately for mankind) questions of great practical moment may generally be settled, for practical purposes, without solving those higher problems — i. e. they may be settled on principles which will hold good, whatever solution we may adopt of those abstruse questions. It will be proper, however, to say a few words here upon some popular forms of expression which tend greatly to increase, in many minds, the natural prejudice against miracles. One of these is the usual description of a miracle, as, "a *violation of the laws of nature.*" This metaphorical expression suggests directly the idea of natural agents breaking, of their own accord, some rule which has the authority and sanctity of a law to them. Such a figure can only be applicable to the case of a supposed *causeless* and arbitrary variation from the uniform order of sequence in natural things, and is wholly inapplicable to a change in that order caused by God Himself. The word "law," when applied to material things, *ought* only to be understood as denoting a number of observed and anticipated sequences of phenomena, taking place with such a resemblance or analogy to each other *as if* a rule had been laid down, which those phenomena were constantly observing. But the *rule*, in this case, is nothing different from the actual order itself; and there is no cause of these sequences but the will of God choosing to produce those phenomena, and choosing to produce them in a certain order.

Again, the term "nature" suggests to many persons the idea of a great system of things endowed with powers and forces of its own — a sort of machine, set a-going originally by a first cause, but continuing its motions *of itself*. Hence we are apt to imagine that a change in the motion or operation of any part of it by God, would produce the same disturbance of the other parts, as such a change would be likely to produce in them, if made by us, or any other natural agent. But if the motions and operations of material things be produced really by the Divine will, then his choosing to change, for a special purpose, the ordinary motion of one part, does not necessarily, or probably, infer his choosing to change the ordinary motions of other parts in a way not at all requisite for the accomplishment of that special purpose. It is as easy for Him to continue the ordinary course of the rest, with the change of one part, as of all the phenomena without any change at all. Thus, though the stoppage of the motion of the earth in the ordinary course of nature, would be attended with terrible convulsions, the stoppage of the earth *miraculously*, for a special purpose to be served by *that only*, would not, of itself, be followed by any such consequences.

From the same conception of nature, as a machine, we are apt to think of interferences with the ordinary course of nature as implying some imper-

fection in it. Because machines are considered more and more perfect in proportion as they less and less need the interference of the workman. But it is manifest that this is a false analogy; for, the reason why machines are made is, to save us trouble: and, therefore, they are more perfect in proportion as they answer this purpose. But no one can seriously imagine that the universe is a machine for the purpose of saving trouble to the Almighty.

Again, when miracles are described as "interferences with the laws of nature," this description makes them appear improbable to many minds, from their not sufficiently considering that the laws of nature interfere with one another; and that we cannot get rid of "interferences" upon any hypothesis consistent with experience. When organization is superinduced upon inorganic matter, the laws of inorganic matter are interfered with and controlled; when animal life comes in, there are new interferences; when reason and conscience are superadded to will, we have a new class of controlling and interfering powers, the laws of which are *moral* in their character. Intelligences of pure speculation, who could do nothing but observe and reason, surveying a portion of the universe — such as the greater part of the material universe may be — wholly destitute of living inhabitants, might have reasoned that such powers as active beings possess were incredible — that it was incredible that the Great Creator would suffer the majestic uniformity of laws which He was constantly maintaining through boundless space and innumerable worlds, to be controlled and interfered with at the caprice of such a creature as man. Yet we know by experience that God has enabled us to control and interfere with the laws of external nature for our own purposes: nor does this seem less improbable beforehand (but rather more), than that He should Himself interfere with those laws for our advantage. This, at least, is manifest — that the purposes for which man was made, whatever they are, involve the necessity of producing a power capable of controlling and interfering with the laws of external nature; and consequently that those purposes involve in some sense the necessity of interferences with the laws of nature external to man: and how far that necessity may reach — whether it extend only to interferences proceeding from man himself, or extend to interferences proceeding from other creatures, or immediately from God also, it is impossible for reason to determine beforehand.

Furthermore, whatever ends may be contemplated by the Deity for the laws of nature in reference to the rest of the universe — (in which question we have as little information as interest) — we know that, in respect of us, they answer discernible moral ends — that they place us, practically, under government, conducted in the way of rewards and punishment — a government of which the *tendency* is to encourage virtue and repress vice — and to form in us a certain character by discipline; which character our moral nature compels us to consider as the highest and worthiest object which we can pursue. Since, therefore, the laws of nature have, in reference to us, moral purposes to answer, which (as far as we can judge) they have not to serve in other respects, it seems not incredible that these peculiar purposes should occasionally require modifications of those laws in relation to us, which are not necessary in relation to other parts of the universe. For we see — as has been just observed —

that the power given to man of modifying the laws of nature by which he is surrounded, is a power directed by moral and rational influences, such as we do not find directing the power of any other creature that we know of. And how far, in the nature of things, it would be possible or eligible, to construct a system of material laws which should at the same time, and by the same kind of operations, answer the other purposes of the Creator, and also all his moral purposes with respect to a creature endowed with such faculties as free-will, reason, conscience, and the other peculiar attributes of man, we cannot be supposed capable of judging. And as the regularity of the laws of nature in themselves is the very thing which makes them capable of being usefully controlled and interfered with by man — (since, if their sequences were irregular and capricious we could not know how or when to interfere with them) — so that same regularity is the very thing which makes it possible to use Divine interferences with them as attestations of a supernatural revelation from God to us; so that, in both cases alike, the usual regularity of the laws, in themselves, is not superfluous, but necessary in order to make the interferences with that regularity serviceable for their proper ends. In this point of view, miracles are to be considered as cases in which a higher law interferes with and controls a lower: of which circumstance we see instances around us at every turn.

It seems further that, in many disquisitions upon this subject, some essentially distinct operations of the human mind have been confused together in such a manner as to spread unnecessary obscurity over the discussion. It may be useful, therefore, briefly to indicate the mental operations which are chiefly concerned in this matter.

In the first place there seems to be a law of our mind, in virtue of which, upon the experience of any new external event, any phenomenon limited by the circumstances of time and place, we refer it to a cause, or powerful agent producing it as an effect. The relative idea involved in this reference appears to be a simple one, incapable of definition, and is denoted by the term *efficiency*.

From this conception it has been supposed by some that a scientific proof of the stability of the laws of nature could be constructed; but the attempt has signally miscarried. Undoubtedly, while we abide in the strict metaphysical conception of a cause as such, the axiom that "similar causes produce similar effects" is intuitively evident; but it is so because, in that point of view, it is merely a barren truism. For my whole conception, within these narrow limits, of the cause of the given phenomenon B is that it is the cause or power producing B. I conceive of that cause merely as the term of a certain relation to the phenomenon; and therefore my conception of a cause similar to it, precisely as a cause, can only be the conception of a cause of a phenomenon similar to B.

But when the original conception is enlarged into affording the wider maxim, that causes similar to things, considered in themselves, and not barely in relation to the effect, are similar in their effects also, the case ceases to be not equally clear.

And, in applying even this to practice, we are met with insuperable difficulties.

For, first, it may reasonably be demanded, on what scientific ground we are justified in assuming that any one material phenomenon or substance is, in this proper sense, the cause of any given material

phenomenon? It does not appear at all self-evident, *à priori*, that a material phenomenon must have a material cause. Many have supposed the contrary, and the phenomena of the apparent results of our own volitions upon matter seem to indicate that such a law should not be hastily assumed. Upon the possible supposition, then, that the material phenomena by which we are surrounded are the effects of spiritual causes — such as the volitions of the Author of Nature — it is plain that these are causes of which we have no direct knowledge, and the similarities of which to each other we can, without the help of something more than the fundamental axiom of cause and effect, discover only from the effects, and only so far as the effects carry us in each particular.

But, even supposing it conceded that material effects must have material causes, it yet remains to be settled upon what ground we can assume that we have ever yet found the true material cause of any effect whatever, so as to justify us in predicting that, wherever it recurs, a certain effect will follow. All that our abstract axiom tells us is, that if we have the true cause we have that which is always attended with the effect: and all that experience can tell us is that A has, so far as we can observe, been always attended by B: and all that we can infer from these premises, turn them how we will, is merely this: that the case of A and B is, so far as we have been able to observe, like a case of true causal connection; and beyond this we cannot advance a step towards proving that the case of A and B is a case of causal connection, without assuming further another principle (which would have saved us much trouble if we had assumed it in the beginning), that *likeness* or *resemblance* is a ground of belief, gaining strength in proportion to the closeness and constancy of the resemblance.

Indeed, physical analysis, in its continual advance, is daily teaching us that those things which we once regarded as the true causes of certain material phenomena are only marks of the presence of other things which we now regard as the true causes, and which we may hereafter find to be only assemblages of adjacent appearances, more or less closely connected with what may better claim that title. It is quite possible, for example, that gravitation may at some future time be demonstrated to be the result of a complex system of forces, *residing* (as some philosophers love to speak) in material substances hitherto undiscovered, and as little suspected to exist as the gases were in the time of Aristotle.

(2.) Nor can we derive much more practical assistance from the maxim, that similar antecedents have similar consequents. For this is really no more than the former rule. It differs therefrom only in dropping the idea of efficiency or causal connection: and, however certain and universal it may be supposed in the abstract, it fails in the concrete just at the point where we most need assistance. For it is plainly impossible to demonstrate that any two actual antecedents are precisely similar in the sense of the maxim; or that any one given apparent antecedent is the true unconditional antecedent of any given apparently consequent phenomenon. Unless, for example, we know the whole nature of a given antecedent A, and also the whole nature of another given antecedent B, we cannot, by comparing them together, ascertain their precise similarity. They may be similar in all respects that we have hitherto observed, and yet in

the very essential quality which may make A the unconditional antecedent of a given effect C, in this respect A and B may be quite dissimilar.

It will be found, upon a close examination of all the logical canons of inductive reasoning that have been constructed for applying this principle, that such an assumption — of the real similarity of things apparently similar — pervades them all. Let us take, *e. g.*, what is called the first canon of the "Method of Agreement," which is this: "If two or more instances of the phenomenon under investigation have *only one* circumstance in common, the circumstance in *which alone* all the instances agree, is the cause (or effect) of the given phenomenon." Now, in applying this to any practical case, how can we be possibly certain that any two instances have *only one* circumstance in common? We can remove, indeed, by nicely varied experiments, all the different agents known to us from contact with the substances we are examining, except those which we choose to employ; but how is it possible that we can remove unknown agents, if such exist, or be sure that no agents do exist, the laws and periods of whose activity we have had hitherto no means of estimating, but which may reveal themselves at any moment, or upon any unlooked-for occasion? It is plain that, unless we can know the whole nature of all substances present at every moment and every place that we are concerned with in the universe, we cannot *know* that any two phenomena have *but one* circumstance in common. All we can say is, that unknown agencies count for nothing in practice; or (in other words) we must assume that things which appear to us similar *are* similar.

This being so, it becomes a serious question whether such intuitive principles as we have been discussing are of any real practical value whatever in mere physical inquiries. Because it would seem that they cannot be made use of without bringing in another principle, which seems quite sufficient without them, that the *likeness* of one thing to another in observable respects, is a ground for presuming likeness in other respects — a ground strong in proportion to the apparent closeness of the resemblances, and the number of times in which we have found ourselves right in acting upon such a presumption. Let us talk as we will of theorems deduced from intuitive axioms, about true causes or antecedents, still all that we can know in fact of any particular case is, that, *as far as we can observe*, it *resembles* what reason teaches us would be the case of a true cause or a true antecedent: and if this justifies us in drawing the inference that it is such a case, then certainly we must admit that *resemblance* is a just ground in itself of inference in practical reasoning.

And "therefore, even granting," it will be said, "the power of the Deity to work miracles, we can have no better grounds of determining how He is likely to exert that power, than by observing how He has actually exercised it. Now we find Him, y experience, by manifest traces and records, through countless ages, and in the most distant regions of space, continually — (if we do but set aside these comparatively few stories of miraculous interpositions) — working according to what we call, and rightly call, a settled order of nature, and we observe Him constantly preferring an adherence to this order before a departure from it, even in circumstances in which (apart from experience) we could suppose that his goodness would lead Him

to vary from that order. In particular, we find that the greatest part of mankind have been left wholly in past ages, and even at present, without the benefit of that revelation which you suppose Him to have made. Yet it would appear that the multitudes who are ignorant of it needed it, and deserved it, just as much as the few who have been made acquainted with it. And thus it appears that experience refutes the inference in favor of the likelihood of a revelation, which we might be apt to draw from the mere consideration of his goodness, taken by itself." It cannot be denied that there seems to be much real weight in some of these considerations. But there are some things which diminish that weight: 1. With respect to remote ages, known to us only by physical traces, and distant regions of the universe, we have no record or evidence of the *moral* government carried on therein. We do not know of any. And, if there be or was any, we have no evidence to determine whether it was or was not, is or is not, connected with a system of miracles. There is no shadow of a presumption that, if it be or were, we should have records or traces of such a system. 2. With respect to the non-interruption of the course of nature, in a vast number of cases, where goodness would seem to require such interruptions, it must be considered that the very vastness of the number of such occasions would make such interruptions so frequent as to destroy the whole scheme of governing the universe by general laws altogether, and consequently also any scheme of attesting a revelation by miracles — *i. e.* facts varying from an established general law. This, therefore, is rather a presumption against God's interfering so often as to destroy the scheme of general laws, or make the sequences of things irregular and capricious, than against his interfering by miracles to attest a revelation, which, after that attestation, should be left to be propagated and maintained by ordinary means; and the very manner of the attestation of which (*i. e.* by miracles) implies that there is a regular and uniform course of nature, to which God is to be expected to adhere in all other cases. 3. It should be considered whether the just conclusion from the rest of the premises be (not so much this — that it is unlikely God would make a revelation — as) this — that it is likely that, if God made a revelation, He would make it subject to similar conditions to those under which He bestows his other *special* favors upon mankind — *i. e.* bestow it first directly upon some small part of the race, and impose upon them the responsibility of communicating its benefits to the rest. It is thus that He acts with respect to superior strength and intelligence, and in regard to the blessings of civilization and scientific knowledge, of which the greater part of mankind have always been left destitute.

Indeed, if by "the course of nature" we mean the whole course and series of God's government of the universe carried on by fixed laws, we cannot at all determine beforehand that miracles (*i. e.* occasional deviations, under certain moral circumstances, from the mere *physical* series of causes and effects) are not a part of the course of nature in that sense; so that, for aught we *know*, beings with a larger experience than ours of the history of the universe, might be able confidently to predict, from that experience, the occurrence of such miracles in a world circumstanced like ours. In this point of view, as Bishop Butler has truly said, nothing less than knowledge of another world

placed in circumstances similar to our own, can furnish an argument from analogy against the credibility of miracles.

And, again, for aught we know, *personal* intercourse, or what Scripture seems to call "seeing God face to face," may be to myriads of beings the normal condition of God's intercourse with his intelligent and moral creatures; and to them the state of things in which we are, debarred from such direct perceptible intercourse, may be most contrary to their ordinary experience; so that what is to us miraculous in the history of our race may seem most accordant with the course of nature, or their customary experience, and what is to us most natural may appear to them most strange.

After all deductions and abatements have been made, however, it must be allowed that a certain antecedent improbability must always attach to miracles, considered as events varying from the ordinary experience of mankind as known to us: because likelihood, *verisimilitude*, or resemblance to what we know to have occurred, is, by the constitution of our minds, the very ground of probability; and, though we can perceive reasons, from the moral character of God, for thinking it likely that He may have wrought miracles, yet we know too little of his ultimate designs, and of the best mode of accomplishing them, to argue confidently from his character to his acts, except where the connection between the character and the acts is demonstrably indissoluble — as in the case of acts rendered necessary by the attributes of veracity and justice. Miracles are, indeed, in the notion of them, no breach of the high generalization that "similar antecedents have similar consequents;" nor, necessarily, of the maxim that "God works by general laws;" because we can see some laws of miracles (as *e. g.* that they are infrequent, and that they are used as attesting signs of, or in conjunction with, revelations), and may suppose more; but they do vary, when taken apart from their proper evidence, from this rule, that "what a general experience would lead us to regard as similar antecedents *are* similar antecedents;" because the only assignable specific difference observable by us in the antecedents in the case of miracles, and in the case of the experiments from the analogy of which they vary in their physical phenomena, consists in the moral antecedents; and these, in cases of physical phenomena, we generally throw out of the account; nor have we grounds *à priori* for concluding *with confidence* that these are not to be thrown out of the account here also, although we can see that the moral antecedents here (such as the fitness for attesting a revelation like the Christian) are, in many important respects, different from those which the analogy of experience teaches us to disregard in estimating the probability of physical events.

But, in order to form a fair judgment, we must take in all the circumstances of the case, and, amongst the rest, the *testimony* on which the miracle is reported to us.

Our belief, indeed, in human testimony seems to rest upon the same sort of instinct on which our belief in the testimony (as it may be called) of nature is built, and is to be checked, modified, and confirmed by a process of experience similar to that which is applied in the other case. As we learn, by extended observation of nature and the comparison of analogies, to distinguish the real laws of physical sequences from the casual conjunctions of

phenomena, so are we taught in the same manner to distinguish the circumstances under which human testimony is certain or incredible, probable or suspicious. The circumstances of our condition force us daily to make continual observations upon the phenomena of human testimony; and it is a matter upon which we can make such experiments with peculiar advantage, because every man carries within his own breast the whole sum of the ultimate motives which can influence human testimony. Hence arises the aptitude of human testimony for overcoming, and more than overcoming, almost any antecedent improbability in the thing reported.

"The conviction produced by testimony," says Bishop Young, "is capable of being carried much higher than the conviction produced by experience: and the reason is this, because there may be concurrent testimonies to the truth of one individual fact; whereas there can be no concurrent experiments with regard to an individual experiment. There may, indeed, be *analogous* experiments, in the same manner as there may be analogous testimonies; but, in any course of nature, there is but one continued series of events: whereas in testimony, since the same event may be observed by different witnesses, their *concurrence* is capable of producing a conviction more cogent than any that is derived from any other species of events in the course of nature. In material phenomena the probability of an expected event arises solely from analogous experiments made previous to the event; and this probability admits of indefinite increase from the unlimited increase of the number of these previous experiments. The credibility of a witness likewise arises from our experience of the veracity of previous witnesses in similar cases, and admits of unlimited increase according to the number of the previous witnesses. But there is another source of the increase of testimony, likewise unlimited, derived from the number of *concurrent* witnesses. The evidence of testimony, therefore, admitting of unlimited increase on two different accounts, and the physical probability admitting only of one of them, the former is capable of indefinitely surpassing the latter."

It is to be observed also that, in the case of the Christian miracles, the truth of the facts, varying as they do from our ordinary experience, is far more credible than the falsehood of a testimony so circumstanced as that by which they are attested; because of the former strange phenomena — the miracles — a reasonable known cause may be assigned adequate to the effect — namely, the will of God producing them to accredit a revelation that seems not unworthy of Him; whereas of the latter — the falsehood of such testimony — no adequate cause whatever can be assigned, or reasonably conjectured.

So manifest, indeed, is this inherent power of testimony to overcome antecedent improbabilities, that Hume is obliged to allow that testimony may be so circumstanced as to require us to believe, in some cases, the occurrence of things quite at variance with general experience; but he pretends to show that testimony to such facts *when connected with religion* can never be so circumstanced. The reasons for this paradoxical exception are partly general remarks upon the proneness of men to believe in portents and prodigies; upon the temptations to the indulgence of pride, vanity, ambition, and such like passions which the human mind is

subject to in religious matters, and the strange mixture of enthusiasm and knavery, sincerity and craft, that is to be found in fanatics, and partly particular instances of confessedly false miracles that seem to be supported by an astonishing weight of evidence — such as those alleged to have been wrought at the tomb of the Abbé Paris.

But (1) little weight can be attached to such general reflections, as discrediting any particular body of evidence, until it can be shown in detail that they apply to the special circumstances of that particular body of evidence. In reality, most of his general objections are, at bottom, objections to human testimony itself — *i. e.* objections to the medium by which alone we can know what is called the general experience of mankind, from which general experience it is that the only considerable objection to miracles arises. Thus, by general reflections upon the proverbial fallaciousness of "travellers' stories" we might discredit all antecedently improbable relations of the manners or physical peculiarities of foreign lands. By general reflections upon the illusions, and even temptations to fraud, under which scientific observers labor, we might discredit all scientific observations. By general reflections upon the way in which supine credulity, and passion, and party-interest have discolored civil history, we might discredit all antecedently improbable events in civil history — such as the conquests of Alexander, the adventures of the Buonaparte family, or the story of the late mutiny in India. (2.) The same experience which informs us that credulity, enthusiasm, craft, and a mixture of these, have produced many false religions and false stories of miracles, informs us also *what sort* of religions, and *what sort* of legends, these causes have produced, and are likely to produce; and, if, upon a comparison of the Christian religion and miracles with these products of human weakness or cunning, there appear specific differences between the two, unaccountable on the hypothesis of a common origin, this not only diminishes the presumption of a common origin, but raises a distinct presumption the other way — a presumption strong in proportion to the extent and accuracy of our induction. Remarkable specific differences of this kind have been pointed out by Christian apologists in respect of the nature of the religion — the nature of the miracles — and the circumstances of the evidence by which they are attested.

Of the first kind are, for instance, those assigned by Warburton, in his *Divine Legation*; and by Archbp. Whately, in his *Essays on the Peculiarities of the Christian Religion*, and on *Romanism*.

Differences of the second and third kind are largely assigned by almost every writer on Christian evidences. We refer, specially, for sample's sake, to Leslie's *Short Method with the Deists* — to Bishop Douglas's *Criterion*, in which he fully examines the pretended parallel of the cures at the tomb of Abbé Paris — and to Paley's *Evidences*, which may be most profitably consulted in the late edition by Archbp. Whately.

Over and above the direct testimony of human witnesses to the Bible-miracles, we have also what may be called the indirect testimony of events confirming the former, and raising a distinct presumption that some such miracles must have been wrought. Thus, for example, we know, by a copious induction, that, in no nation of the ancient world, and in no nation of the modern world

unacquainted with the Jewish or Christian revelation, has the knowledge of the one true God as the Creator and Governor of the world, and the public worship of Him, been kept up by the mere light of nature, or formed the groundwork of such religions as men have devised for themselves. Yet we do find that, in the Jewish people, though no way distinguished above others by mental power or high civilization, and with as strong natural tendencies to idolatry as others, this knowledge and worship was kept up from a very early period of their history, and, according to their uniform historical tradition, kept up by revelation attested by undeniable miracles.

Again, the existence of the Christian religion, as the belief of the most considerable and intelligent part of the world, is an undisputed fact; and it is also certain that this religion originated (as far as human means are concerned) with a bandful of Jewish peasants, who went about preaching — on the very spot where Jesus was crucified — that He had risen from the dead, and had been seen by, and had conversed with them, and afterwards ascended into heaven. This miracle, attested by them as eye-witnesses, was the very ground and foundation of the religion which they preached, and it was plainly one so circumstanced that, if it had been false, it could easily have been proved to be false. Yet, though the preachers of it were everywhere persecuted, they had gathered, before they died, large churches in the country where the facts were best known, and through Asia Minor, Greece, Egypt, and Italy; and these churches, notwithstanding the severest persecutions, went on increasing till, in about 300 years after, this religion — *i. e.* a religion which taught the worship of a Jewish peasant who had been ignominiously executed as a malefactor — became the established religion of the Roman empire, and has ever since continued to be the prevailing religion of the civilized world.

It would plainly be impossible, in such an article as this, to enumerate all the various lines of confirmation — from the prophecies, from the morality, from the structure of the Bible, from the state of the world before and after Christ, etc. — which all converge to the same conclusion. But it will be manifest that almost all of them are drawn ultimately from the analogy of experience, and that the conclusion to which they tend cannot be rejected without holding something contrary to the analogies of experience from which they are drawn. For, it must be remembered, that *disbelieving* one thing necessarily involves *believing its contradictory*.

It is manifest that, if the miraculous facts of Christianity did not really occur, the stories about them must have originated either in fraud, or in fancy. The course explanation of them by the hypothesis of unlimited fraud, has been generally abandoned in modern times: but, in Germany especially, many persons of great acuteness have long labored to account for them by referring them to fancy. Of these there have been two principal schools — the *Naturalistic*, and the *Mythic*.

1. The Naturalists suppose the miracles to have been natural events, more or less unusual, that were mistaken for miracles, through ignorance or enthusiastic excitement. But the result of their labors in detail has been (as Strauss has shown in his *Leben Jesu*) to turn the New Testament, as interpreted by them, into a narrative far less credible than any narrative of miracles could be: just as a

novel, made up of a multitude of surprising natural events crowded into a few days, is less consistent with its own data than a tale of genii and enchanters. "Some infidels," says Archbishop Whately, "have labored to prove, concerning *some one* of our Lord's miracles that it might have been the result of an accidental conjuncture of natural circumstances; and they endeavor to prove the same concerning *another*, and so on; and thence infer that *all* of them, occurring as a series, might have been so. They might argue, in like manner, that, because it is not very improbable one may throw sixes in any one out of a hundred throws, therefore it is no more improbable that one may throw sixes a hundred times running." The truth is, that everything that is improbable in the mere *physical strangeness* of miracles applies to such a series of odd events as these explanations assume; while the hypothesis of their non-miraculous character deprives us of the means of *accounting for them* by the extraordinary interposition of the Deity. These and other objections to the thorough-going application of the naturalistic method, led to the substitution in its place of

2. The Mythic theory — which supposes the N. T. Scripture-narratives to have been legends, not stating the grounds of men's belief in Christianity, but springing out of that belief, and embodying the idea of what Jesus, if he were the Messiah, must have been conceived to have done in order to fulfill that character, and was therefore supposed to have done. But it is obvious that this leaves the origin of the belief, that a man who *did not fulfill* the idea of the Messiah in any one remarkable particular, *was* the Messiah — wholly unaccounted for. It begins with assuming that a person of mean condition, who was publicly executed as a malefactor, and who wrought no miracles, was so earnestly believed to be their Messiah by a great multitude of Jews, who expected a Messiah that *was* to work miracles, and was *not* to die, but to be a great conquering prince, that they modified their whole religion, in which they had been brought up, into accordance with that new belief, and imagined a whole cycle of legends to embody their idea, and brought the whole civilized world ultimately to accept their system. It is obvious, also, that all the arguments for the genuineness and authenticity of the writings of the N. T. bring them up to a date when the memory of Christ's real history was so recent, as to make the substitution of a set of mere legends in its place utterly incredible; and it is obvious, also, that the gravity, simplicity, historical decorum, and consistency with what we know of the circumstances of the times in which the events are said to have occurred, observable in the narratives of the N. T., make it impossible reasonably to accept them as mere *myths*. The same appears from a comparison of them with the style of writings really mythic — as the Gospels of the infancy, of Nicodemus, etc. — and with heathen or Mohammedan legends; and from the omission of matters which a mythic fancy would certainly have fastened on. Thus, though John Baptist was typified by Elijah, the great wonder-worker of the Old Testament, there are no miracles ascribed to John Baptist. There are no miracles ascribed to Jesus during his infancy and youth. There is no description of his personal appearance; no account of his adventures in the world of spirits; no miracles ascribed to the Virgin Mary, and very little said about her at all; no account of the

martyrdom of any Apostle, but of one, and that given in the driest manner, etc. — and so in a hundred other particulars.

It is observable that, in the early ages, the fact that extraordinary miracles were wrought by Jesus and his Apostles, does not seem to have been generally denied by the opponents of Christianity. They seem always to have preferred adopting the expedient of ascribing them to art, magic, and the power of evil spirits. This we learn from the N. T. itself; from such Jewish writings as the *Sepher Toldoth Jeshu*; from the Fragments of Celsus, Porphyry, Hierocles, Julian, etc., which have come down to us, and from the popular objections which the ancient Christian Apologists felt themselves concerned to grapple with. We are not to suppose, however, that this would have been a solution which, even in those days, would have been naturally preferred to a denial of the facts, if the facts could have been plausibly denied. On the contrary it was plainly, even then, a forced and improbable solution of *such* miracles. For man did not commonly ascribe to magic or evil demons an *unlimited* power, any more than we ascribe an *unlimited* power to mesmerism, imagination, and the occult and irregular forces of nature. We know that in two instances, in the Gospel narrative — the cure of the man born blind and the Resurrection — the Jewish priests were unable to pretend such a solution, and were driven to maintain unsuccessfully a charge of fraud; and the circumstances of the Christian miracles were, in almost all respects, so utterly unlike those of any pretended instances of magical wonders, that the Apologists have little difficulty in refuting this plea. This they do generally from the following considerations.

(1.) The greatness, number, completeness, and publicity of the miracles. (2.) The natural beneficial tendency of the doctrine they attested. (3.) The connection of them with a whole scheme of revelation extending from the first origin of the human race to the time of Christ.

It is also to be considered that the circumstance that the world was, in the times of the Apostles, full of Thaumaturgists, in the shape of exorcists, magicians, ghost-seers, etc., is a strong presumption that, in order to command any special attention and gain any large and permanent success, the Apostles and their followers must have exhibited works quite different from any wonders which people had been accustomed to see. This presumption is confirmed by what we read, in the Acts of the Apostles, concerning the effect produced upon the Samaritans by Philip the Evangelist in opposition to the prestiges of Simon Magus.

This evasion of the force of the Christian miracles, by referring them to the power of evil spirits, has seldom been seriously recurred to in modern times; but the English infidels of the last century employed it as a kind of *argumentum ad hominem*, to tease and embarrass their opponents — contending that, as the Bible speaks of "lying wonders" of Antichrist, and relates a long contest of apparent miracles between Moses and the Egyptian magicians, Christians could not *on their own principles*, have any certainty that miracles were not wrought by evil spirits.

In answer to this, some divines (as Bishop Fleetwood in his *Dialogues on Miracles*) have endeavored to establish a distinction in the nature of the works themselves, between the *seeming* miracles within the reach of intermediate spirits, — and the *true*

miracles, which can only be wrought by God — and others (as Bekker, in his curious work *Le Monde Enchanté*, and Farmer, in his *Case of the Demoniacs*) have entirely denied the power of intermediate spirits to interfere with the course of nature. But, without entering into these questions, it is sufficient to observe —

(1.) That the light of nature gives us no reason to believe that there are any evil spirits having power to interfere with the course of nature at all.

(2.) That it shows us that, if there be, they are continually controlled from exercising any such power.

(3.) That the records we are supposed to have of such an exercise in the Bible, show us the power here spoken of, as exerted completely under the control of God, and in such a manner as to make it evident to all candid observers where the advantage lay, and to secure all well-disposed and reasonable persons from any mistake in the matter.

(4.) That the circumstances alleged by the early Christian Apologists — the number, greatness, beneficence, and variety of the Bible miracles — their connection with prophecy and a long scheme of things extending from the creation down — the character of Christ and his Apostles — and the manifest tendency of the Christian religion to serve the cause of truth and virtue — make it as incredible that the miracles attesting it should have been wrought by evil beings, as it is that the order of nature should proceed from such beings. For, as we gather the character of the Creator from his works, and the moral instincts which He has given us; so we gather the character of the author of revelation from his works, and from the drift and tendency of that revelation itself. This last point is sometimes shortly and unguardedly expressed by saying, that “the doctrine proves the miracles:” the meaning of which is *not* that the particular doctrines which miracles attest must first be proved to be *true aliunde*, before we can believe that any such works were wrought — (which would, manifestly, be making the miracles *no attestation* at all) — but the meaning *is* that the whole body of doctrine in connection with which the miracles are alleged, and its tendency, if it were divinely revealed, to answer visible good ends, makes it reasonable to think that the miracles by which it is attested were, if they were wrought at all, wrought by God.

Particular theories as to the manner in which miracles have been wrought are matters rather curious than practically useful. In all such cases we must bear in mind the great maxim *SUBTILITAS NATURÆ LONGE SUPERAT SUBTILITATEM MENTIS HUMANÆ*. Malebranche regarded the Deity as the sole agent in nature, acting always by *general laws*; but he conceived those general laws to contain the original provision that the manner of the Divine acting should modify itself, under certain conditions, according to the particular volitions of finite intelligences. Hence, he explained *man's* apparent power over external nature; and hence also he regarded miracles as the result of particular volitions of angels, employed by the Deity in the government of the world. This was called the system of *occasional causes*.

The system of Clarke allowed a proper real, though limited, efficiency to the wills of inferior intelligences, but denied any true *powers* to matter. Hence he referred the phenomena of the course of material nature immediately to the will of God as

their cause; making the distinction between natural events and miracles consist in this, that the former happen according to what is, relatively to us, God's *usual* way of working, and the latter according to his *unusual* way of working.

Some find it easier to conceive of miracles as not really taking place in the external order of nature, but in the impressions made by it upon our minds. Others deny that there is, in any miracle, the production of anything new or the alteration of any natural power; and maintain that miracles are produced solely by the *intensifying* of known natural powers already in existence.

It is plain that these various hypotheses are merely ways in which different minds find it more or less easy to conceive the mode in which miracles may have been wrought.

Another question more curious than practical, is that respecting the precise period when miracles ceased in the Christian Church. It is plain, that, whenever they ceased in point of fact, they ceased *relatively to us* wherever a sufficient attestation of them to our faith fails to be supplied.

It is quite true, indeed, that a real miracle, and one sufficiently marked out to the spectators as a real miracle, may be so imperfectly reported to us, as that, if we have only that imperfect report, there may be little to show conclusively its miraculous character; and that, therefore, in rejecting accounts of miracles so circumstanced, we *may possibly* be rejecting accounts of what were real miracles. But this is an inconvenience attending *probable* evidence from its very nature. In rejecting the improbable testimony of the most mendacious of witnesses, we *may*, almost always, be rejecting something which is really true. But this would be a poor reason for acting on the testimony of a notorious liar to a story antecedently improbable. The narrowness and imperfection of the human mind is such that our wisest and most prudent calculations are continually baffled by unexpected combinations of circumstances, upon which we *could not* have reasonably reckoned. But this is no good ground for not acting upon the calculations of wisdom and prudence; because, after all, such calculations are in the long run our surest guides.

It is quite true, also, that several of the Scripture miracles are so circumstanced, that if the reports we have of them stood alone, and came down to us only by the channel of ordinary history, we should be without adequate evidence of their miraculous character; and therefore those particular miracles are not to us (though they doubtless were to the original spectators, who could mark all the circumstances), by themselves and taken alone, *signal* — or proper *evidences* of revelation. But, then, they may be very proper *objects* of faith, though not the grounds of it. For (1.) these incidents are really reported to us as parts of a course of things which we *have* good evidence for believing to have been miraculous; and, as Bishop Butler justly observes — “supposing it acknowledged, that our Saviour spent some years in a course of working miracles, there is no more peculiar presumption worth mentioning, against his having exerted his miraculous powers in a certain degree greater, than in a certain degree less; in one or two more instances, than in one or two fewer: in this, than in another manner.” And (2.) these incidents are reported to us by writers whom we have good reasons for believing to have been, not ordinary historians, but persons specially assisted by the Divine Spirit, for the purpose of

giving a correct account of the ministry of our Lord and his Apostles.

In the case of the Scripture miracles, we must be careful to distinguish the *particular occasions* upon which they were wrought, from their *general purpose* and design; yet not so as to overlook the connection between these two things.

There are but few miracles recorded in Scripture of which the whole character was merely evidential — few, that is, that were merely displays of a supernatural power made for the sole purpose of attesting a Divine Revelation. Of this character were the change of Moses' rod into a serpent at the burning bush, the burning bush itself, the going down of the shadow upon the sun-dial of Ahaz, and some others.

In general, however, the miracles recorded in Scripture have, besides the ultimate purpose of affording evidence of a Divine interposition, some immediate temporary purposes which they were apparently wrought to serve — such as the curing of diseases, the feeding of the hungry, the relief of innocent, or the punishment of guilty persons. These immediate temporary ends are not without value in reference to the ultimate and general design of miracles, as providing evidence of the truth of revelation; because they give a *moral character* to the works wrought, which enables them to display not only the power, but the other attributes of the agent performing them. And, in some cases, it would appear that miraculous works of a particular kind were selected as emblematic or typical of some characteristic of the revelation which they were intended to attest. Thus, *e. g.*, the cure of bodily diseases not only indicated the general benevolence of the Divine Agent, but seems sometimes to be referred to as an emblem of Christ's power to remove the disorders of the soul. The gift of tongues appears to have been intended to manifest the universality of the Christian dispensation, by which all languages were consecrated to the worship of God. The casting out of demons was a type and pledge of the presence of a Power that was ready to "destroy the works of the devil," in every sense.

In this point of view, Christian miracles may be fitly regarded as *specimens* of a Divine Power, alleged to be present — specimens so circumstanced as to make obvious, and bring under the notice of common understandings, the operations of a Power — the gift of the Holy Ghost — which was really supernatural, but did not, in its moral effects, reveal itself externally as supernatural. In this sense, they seem to be called the *manifestation* or *exhibition* of the Spirit — outward phenomena which manifested sensibly his presence and operation in the Church: and the record of these miracles becomes evidence to us of the invisible presence of Christ in his Church, and of his government of it through all ages; though that presence is of such a nature as not to be immediately distinguishable from the operation of known moral motives, and that government is carried on so as not to interrupt the ordinary course of things.

In the case of the Old Testament miracles, again, in order fully to understand their evidential character, we must consider the general nature and design of the dispensation with which they were connected. The general design of that dispensation appears to have been to keep up in one particular race a knowledge of the one true God, and of the promise of a Messiah in whom "all the families

of the earth" should be "blessed." And in order to this end, it appears to have been necessary that, for some time, God should have assumed the character of the local Tutelary Deity and Prince of that particular people. And from this peculiar relation in which He stood to the Jewish people (aptly called by Josephus a THEOCRACY) resulted the necessity of frequent miracles, to manifest and make sensibly perceptible his actual presence among and government over them. The miracles, therefore, of the Old Testament are to be regarded as evidential of the theocratic government; and this again is to be conceived of as subordinate to the further purpose of preparing the way for Christianity, by keeping up in the world a knowledge of the true God and of his promise of a Redeemer. In this view, we can readily understand why the miraculous administration of the theocracy was withdrawn, as soon as the purpose of it had been answered by working deeply and permanently into the mind of the Jewish people the two great lessons which it was intended to teach them; so that they might be safely left to the ordinary means of instruction, until the publication of a fresh revelation by Christ and his Apostles rendered further miracles necessary to attest their mission. Upon this view also we can perceive that the miracles of the Old Testament, upon whatever immediate occasions they may have been wrought, were subordinate (and, in general, necessary) to the design of rendering possible the establishment in due time of such a religion as the Christian; and we can perceive further that, though the Jewish theocracy implied in it a continual series of miracles, yet — as it was only temporary and local — those miracles did not violate God's general purpose of carrying on the government of the world by the ordinary laws of nature; whereas if the Christian dispensation — which is *permanent* and *universal* — necessarily implied in it a series of constant miracles, that would be inconsistent with the general purpose of carrying on the government of the world by those ordinary laws.

With respect to the *character* of the Old Testament miracles, we must also remember that the whole structure of the Jewish economy had reference to the peculiar exigency of the circumstances of a people imperfectly civilized, and is so distinctly described in the New Testament, as dealing with men according to the "hardness of their hearts," and being a system of "weak and beggarly elements," and a rudimentary instruction for "children" who were in the condition of "slaves." We are not, therefore, to judge of the probability of the miracles wrought in support of that economy (so far as the *forms* under which they were wrought are concerned) as if those miracles were immediately intended for ourselves. We are not justified in arguing either that those miracles are incredible because wrought in such a manner as that, if addressed to us, they would lower our conceptions of the Divine Being; or, on the other hand, that because those miracles — wrought under the circumstances of the Jewish economy — are credible and ought to be believed, there is therefore no reason for objecting against stories of similar miracles alleged to have been wrought under the quite different circumstances of the Christian dispensation.

In dealing with human testimony, it may be further needful to notice (though very briefly) some refined subtleties that have been occasionally introduced into this discussion.

It has been sometimes alleged that the freedom of the human will is a circumstance which renders reliance upon the stability of laws in the case of human conduct utterly precarious. "In arguing," it is said, "that human beings cannot be supposed to have acted in a particular way, because that would involve a violation of the analogy of human conduct, so far as it has been observed in all ages, we tacitly assume that the human mind is unalterably determined by fixed laws, in the same way as material substances. But this is not the case on the hypothesis of the freedom of the will. The very notion of a free will is that of a faculty which determines itself; and which is capable of choosing a line of conduct quite repugnant to the influence of any motive, however strong. There is therefore no reason for expecting that the operations of human volition will be conformable throughout to any fixed rule or analogy whatever."

In reply to this far-sought and barren refinement, we may observe — 1. That, if it be worth anything, it is an objection not merely against the force of human testimony in religious matters, but against human testimony in general, and, indeed, against all calculations of probability in respect of human conduct whatsoever. 2. That we have already shown that, even in respect of material phenomena, our practical measure of probability is not derived from any scientific axioms about *cause* and *effect*, or antecedents and consequences, but simply from the likeness or unlikeness of one thing to another; and therefore, not being deduced from premises which assume *causality*, cannot be shaken by the denial of causality in a particular case. 3. That the thing to be accounted for, on the supposition of the falsity of the testimony for Christian miracles, is not accounted for by any such capricious principle as the arbitrary freedom of the human will; because the thing to be accounted for is *the agreement* of a number of witnesses in a falsehood, for the propagation of which they could have no intelligible influence. Now, if we suppose a *number* of independent witnesses to have determined themselves by rational motives, then, under the circumstances of this particular instance, their *agreement* in a *true* story is sufficiently accounted for. But, if we suppose them to have each determined themselves by mere whim and caprice, then their *agreement* in the same false story is not accounted for at all. The concurrence of such a number of *chances* is utterly incredible. 4. And finally we remark that no sober maintainers of the freedom of the human will claim for it any such unlimited power of self-determination as this objection supposes. The freedom of the human will exhibits itself either in cases where there is no motive for selecting one rather than another among many possible courses of action that lie before us — in which cases it is to be observed that there is nothing *moral* in its elections whatsoever; — or in cases in which there is a conflict of motives, and, *e. g.*, passion and appetite, or custom or temporal interest, draw us one way, and reason or conscience another. In these latter cases the maintainers of the freedom of the will contend that, under certain limits, we can determine ourselves (not by no motive at all, but) by *either* of the motives actually operating upon our minds. Now it is manifest that if, in the case of the witnesses to Christianity, we can show that theirs was a case of a conflict of motives (as it clearly was), and can show, further, that their conduct is inconsistent with one set of motives, the

reasonable inference is that they determined themselves, in point of fact, by the other. Thus, though in the case of a man strongly tried by a conflict of motives, we might not, even with the fullest knowledge of his character and circumstances, have been able to predict beforehand how he *would* act, that would be no reason for denying that, after we had come to know how he *did* act, we could tell by what motives he had determined himself in choosing that particular line of conduct.

It has been often made a topic of complaint against Hume that, in dealing with testimony as a medium for proving miracles, he has resolved its force entirely into our *experience* of its veracity, and omitted to notice that, antecedently to all experience, we are predisposed to give it credit by a kind of natural instinct. But, however metaphysically erroneous Hume's analysis of our belief in testimony may have been, it is doubtful whether, in this particular question, such a mistake is of any great practical importance. Our original predisposition is doubtless (whether *instinctive* or not) a predisposition to believe all testimony indiscriminately: but this is so completely checked, modified, and controlled, in after-life, by experience of the circumstances under which testimony can be safely relied upon, and of those in which it is apt to mislead us, that, practically, our experience in these respects may be taken as a not unfair measure of its value as rational evidence. It is also to be observed that, while Hume has omitted this original instinct of belief in testimony, as an element in his calculations, he has also omitted to take into account, on the other side, any original *instinctive* belief in the constancy of the laws of nature, or expectation that our future experiences will resemble our past ones. In reality, he seems to have resolved both these principles into the mere association of ideas. And, however theoretically erroneous he may have been in this, still it seems manifest that, by making the same mistake on both sides, he has made one error compensate another; and so — as far as this branch of the argument is concerned — brought out a practically correct result. As we can only learn by various and repeated experiences under what circumstances we can safely trust our expectation of the recurrence of apparently similar phenomena, that expectation, being thus continually checked and controlled, modifies itself into accordance with its rule, and ceases to spring at all where it would be manifestly at variance with its director. And the same would seem to be the case with our belief in testimony.

The argument, indeed, in Hume's celebrated *Essay on Miracles*, was very far from being a new one. It had, as Mr. Coleridge has pointed out, been distinctly indicated by South in his sermon on the incredulity of St. Thomas; and there is a remarkable statement of much the same argument put into the mouth of Woolston's Advocate, in Sherlock's *Trial of the Witnesses*. The restatement of it, however, by a person of Hume's abilities, was of service in putting men upon a more accurate examination of the true nature and measure of probability; and it cannot be denied that Hume's bold statement of his unbounded skepticism had, as he contended it would have, many useful results in stimulating inquiries that might not otherwise have been suggested to thoughtful men, or, at least, not prosecuted with sufficient zeal and patience.

Bishop Butler seems to have been very sensible of the imperfect state, in his own time, of the logic

of probability; and, though he appears to have formed a more accurate conception of it than the Scotch school of Philosophers who succeeded and undertook to refute Hume, yet there is one passage in which we may perhaps detect a misconception of the subject in the pages of even this great writer.

"There is," he observes, "a very strong presumption against common speculative truths, and against the most ordinary facts, before the proof of them, which yet is overcome by almost any proof." There is a presumption of millions to one against the story of Caesar or any other man. For, suppose a number of common facts so and so circumstanced, of which one had no kind of proof, should happen to come into one's thoughts; every one would, without any possible doubt, conclude them to be false. And the like may be said of a single common fact. And from hence it appears that the question of importance, as to the matter before us, is, concerning the degree of the peculiar presumption against miracles: not, whether there be any peculiar presumption at all against them. For if there be a presumption of millions to one against the most common facts, what can a small presumption, additional to this, amount to, though it be peculiar? It cannot be estimated, and is as nothing." (*Analogy*, part 2, c. ii.)

It is plain that, in this passage, Butler lays no stress upon the peculiarities of the story of Caesar, which he casually mentions. For he expressly adds "or of any other man;" and repeatedly explains that what he says applies equally to any ordinary facts, or to a single fact; so that, whatever be his drift (and it must be acknowledged to be somewhat obscure), he is not constructing an argument similar to that which has been pressed by Archbishop Whately, in his *Historic Doubts respecting Napoleon Bonaparte*. And this becomes still more evident, when we consider the extraordinary medium by which he endeavors to show that there is a presumption of millions to one against such "common ordinary facts" as he is speaking of. For the way in which he proposes to estimate the presumption against ordinary facts is, by considering the likelihood of their being anticipated beforehand by a person guessing at random. But, surely, this is not a measure of the likelihood of the facts considered in themselves, but of the likelihood of the coincidence of the facts with a rash and arbitrary anticipation. The case of a person guessing beforehand, and the case of a witness reporting what has occurred, are essentially different. In the common instance, for example, of an ordinary die, before the cast, there is nothing to determine my mind, with any probability of a correct judgment, to the selection of any one of the six faces rather than another; and, therefore, we rightly say that there are five chances to one against any one side, considered as thus arbitrarily selected. But when a person, who has had opportunities of observing the cast, reports to me the presentation of a particular face, there is evidently no such presumption against the coincidence of his statement and the actual fact; because he has, by the supposition, had ample means of ascertaining the real state of the occurrence. And it seems plain that, in the case of a credible witness, we should as readily believe his report of the cast of a die with a million of sides, as of one with only six; though in respect of a random guess beforehand, the chances against the correctness of the guess would be vastly greater in the former case, than in that of an ordinary cube.

Furthermore, if any common by-stander were to report a series of successive throws, as having taken place in the following order — 1, 6, 3, 5, 6, 2 — no one would feel any difficulty in receiving his testimony; but if we further become aware that he, or anybody else, had beforehand professed to guess or predict that precise series of throws upon that particular occasion, we should certainly no longer give his report the same ready and unhesitating acquiescence. We should at once suspect, either that the witness was deceiving us, or that the die was loaded, or tampered with in some way, to produce a conformity with the anticipated sequence. These places in a clear light the difference between the case of the coincidence of an ordinary event with a random predetermination, and the case of an ordinary event considered in itself.

The truth is, that the chances to which Butler seems to refer as a presumption against ordinary events, are not in ordinary cases overcome by testimony at all. The testimony has nothing to do with them; because they are chances against the event considered as the subject of a random vaticination, not as the subject of a report made by an actual observer. It is possible, however, that, throughout this obscure passage, Butler is arguing upon the principles of some objector unknown to us; and, indeed, it is certain that some writers upon the doctrine of chances (who were far from friendly to revealed religion) have utterly confounded together the questions of the chances against the coincidence of an ordinary event with a random guess, and of the probability of such an event considered by itself.

But it should be observed that what we commonly call the chances against an ordinary event are not *specific*, but *particular*. They are chances against *this* event, not against *this kind* of event. The chances, in the case of a die, are the chances against a particular face; not against the coming up of some face. The coming up of some face is not a thing subject to random anticipation, and, therefore, we say that there are no chances against it at all. But, as the presumption that some face will come up is a *specific* presumption, quite different from the presumption against any particular face; so the presumption against no face coming up (which is really the same thing, and equivalent to the presumption against a miracle, considered merely in its physical strangeness) must be *specific* also, and different from the presumption against any particular form of such a miracle selected beforehand by an arbitrary anticipation. For miraculous facts, it is evident, are subject to the doctrine of chances, each in particular, in the same way as ordinary facts. Thus, *e. g.* supposing a miracle to be wrought, the cube might be changed into any geometrical figure: and we can see no reason for selecting one rather than another, or the substance might be changed from ivory to metal, and then one metal would be as likely as another. But no one, probably, would say that he would believe the specific fact of such a miracle upon the same proof, or anything like the same proof, as that on which, such a miracle being supposed, he would believe the report of any particular form of it — such form being just as likely beforehand as any other.

Indeed, if "almost any proof" were capable of overcoming presumptions of millions to one against a fact, it is hard to see how we could reasonably

reject any report of anything, on the ground of antecedent presumptions against its credibility.

The *Ecclesiastical Miracles* are not delivered to us by inspired historians; nor do they seem to form any part of the same series of events as the miracles of the New Testament.

The miracles of the New Testament (setting aside those wrought by Christ Himself) appear to have been worked by a power conferred upon particular persons according to a regular law, in virtue of which that power was ordinarily transmitted from one person to another, and the only persons privileged thus to transmit that power were the *Apostles*. The only exceptions to this rule were, (1) the Apostles themselves, and (2) the family of Cornelius, who were the first-fruits of the Gentiles. In all other cases, miraculous gifts were conferred only by the laying on of the *Apostles'* hands. By this arrangement, it is evident that a provision was made for the total ceasing of that miraculous dispensation within a limited period: because, on the death of the last of the Apostles, the ordinary channels would be all stopped through which such gifts were transmitted in the Church.

Thus, in Acts viii., though Philip is described as working many miracles among the Samaritans, he does not seem to have ever thought of imparting the same power to any of his converts. That is reserved for the Apostles Peter and John, who confer the miraculous gifts by the imposition of their hands: and this power, of imparting miraculous gifts to others, is clearly recognized by Simon Magus as a distinct privilege belonging to the Apostles, and quite beyond anything that He had seen exercised before. "When Simon saw that through laying on of the *Apostles'* hands the Holy Ghost was given, he offered them money, saying, Give me also this power, that on whomsoever I lay hands, he may receive the Holy Ghost."

This separation of the Rite by which miraculous gifts were conferred from Baptism, by which members were admitted into the Church, seems to have been wisely ordained for the purpose of keeping the two ideas, of ordinary and extraordinary gifts, distinct, and providing for the approaching cessation of the former without shaking the stability of an institution which was designed to be a permanent Sacrament in the kingdom of Christ.

And it may also be observed in passing, that this same separation of the effects of these two Rites, affords a presumption that the miraculous gifts, bestowed, as far as we can see, only in the former, were not merely the result of highly raised enthusiasm; because experience shows that violent symptoms of enthusiastic transport would have been much more likely to have shown themselves in the first ardor of conversion than at a later period — in the very crisis of a change, than after that change had been confirmed and settled.

One passage has, indeed, been appealed to as seeming to indicate the permanent residence of miraculous powers in the Christian Church through all ages, Mark xvi. 17, 18. But —

(1.) That passage itself is of doubtful authority, since we know that it was omitted in most of the Greek MSS. which Eusebius was able to examine in the 4th century: and it is still wanting in some of the most important that remain to us.

(2.) It does not necessarily imply more than a promise that such miraculous powers should exhibit themselves among the immediate converts of the *Apostles*.

And (3) this latter interpretation is supported by what follows — "And they went forth, and preached everywhere, the Lord working with them, and confirming the word with the accompanying signs."

It is, indeed, confessed by the latest and ablest defenders of the ecclesiastical miracles that the great mass of them were essentially a new dispensation; but it is contended, that by those who believe in the Scripture miracles no strong antecedent improbability against such a dispensation can be reasonably entertained; because, for them, the Scripture miracles have already "borne the brunt" of the infidel objection, and "broken the ice."

But this is wholly to mistake the matter.

If the only objection antecedently to proof against the ecclesiastical miracles were a presumption of their *impossibility* or *incredibility* — simply as *miracles*, this allegation might be pertinent; because he that admits that a miracle has taken place, cannot consistently hold that a *miracle as such* is impossible or incredible. But the antecedent presumption against the ecclesiastical miracles rises upon four distinct grounds, no one of which can be properly called a ground of *infidel* objection.

(1.) It arises from the very nature of probability, and the constitution of the human mind, which compels us to take the analogy of general experience as a measure of likelihood. And this presumption it is manifest is neither religious nor irreligious, but antecedent to, and involved in, all probable reasoning.

A miracle may be said to take place when, under certain moral circumstances, a physical consequent follows upon an antecedent which general experience shows to have no natural aptitude for producing such a consequent; or, when a consequent fails to follow upon an antecedent which is always attended by that consequent in the ordinary course of nature. A blind man recovering sight upon his touching the bones of SS. Gervasius and Protasius, is an instance of the former. St. Alban, walking after his head was cut off, and carrying it in his hand, may be given as an example of the latter kind of miracle. Now, though such occurrences cannot be called impossible, because they involve no self-contradiction in the notion of them, and we know that there is a power in existence quite adequate to produce them, yet they must always remain antecedently improbable, unless we can see reasons for expecting that that power will produce them. The invincible original instinct of our nature — without reliance on which we could not set one foot before another — teaches as its first lesson to expect similar consequents upon what seem similar physical antecedents; and the results of this instinctive belief, checked, modified, and confirmed by the experience of mankind in countless times, places, and circumstances, constitutes what is called our knowledge of the laws of nature. Destroy, or even shake, this knowledge, as applied to practice in ordinary life, and all the uses and purposes of life are at an end. If the real sequences of things were liable, like those in a dream, to random and capricious variations, on which no one could calculate beforehand, there would be no measures of probability or improbability. If *e. g.* it were a measuring case whether, upon immersing a lighted candle in water, the candle should be extinguished, or the water ignited, — or, whether inhaling the common air should support life or produce death —

It is plain that the whole course of the world would be brought to a stand-still. There would be no order of nature at all; and all the rules that are built on the stability of that order, and all the measures of judgment that are derived from it, would be worth nothing. We should be living in fairy-land, not on earth.

(2.) This general antecedent presumption against miracles, as varying from the analogy of general experience, is (as we have said) neither religious nor irreligious — neither rational nor irrational — but springs from the very nature of probability; and it cannot be denied without shaking the basis of all probable evidence whether for or against religion.

Nor does the admission of the existence of the Deity, or the admission of the actual occurrence of the Christian miracles, tend to remove this antecedent improbability against miracles circumstanced as the ecclesiastical miracles generally are.

If, indeed, the *only* presumption against miracles were one against their *possibility* — this might be truly described as an atheistic presumption; and then the proof, from natural reason, of the existence of a God, or the proof of the actual occurrence of any one miracle would *wholly* remove that presumption; and, upon the removal of that presumption, there would remain none at all against miracles, however frequent or however strange; and miraculous occurrences would be as easily proved, and also as likely *beforehand*, as the most ordinary events; so that there would be no improbability of a miracle being wrought at any moment, or upon any conceivable occasion; and the slightest testimony would suffice to establish the truth of any story, however widely at variance with the analogy of ordinary experience.

But the true presumption against miracles is not against their *possibility*, but their *probability*. And this presumption cannot be wholly removed by showing an adequate cause; unless we hold that *all* presumptions drawn from the analogy of experience or the assumed stability of the order of nature are removed by showing the existence of a cause capable of changing the order of nature — *i. e.* unless we hold that the admission of God's existence involves the destruction of *all* measures of probability drawn from the analogy of experience. The ordinary sequences of nature are, doubtless, the result of the Divine will. But to suppose the Divine will to vary its mode of operation in conjunctures upon which it would be impossible to calculate, and under circumstances apparently similar to those which are perpetually recurring, would be to suppose that the course of things is (to all intents and purposes of human life) as mutable and capricious as if it were governed by mere chance.

Nor can the admission that God *has* actually wrought such miracles as attest the Christian religion, remove the general presumption against miracles as improbable occurrences. The evidence on which revelation stands has proved that the Almighty has, under special circumstances and for special ends, exerted his power of changing the ordinary course of nature. This may be fairly relied on as mitigating the presumption against miracles *under the same circumstances* as those which it has established: but miracles which cannot avail themselves of the benefit of that *law* (as it may be called) of miracles, which such conditions indicate, are plainly involved in all the antecedent difficulties which attach to miracles in general, as

varying from the *law of nature*, besides the special difficulties which belong to them as varying from the *law of miracles*, so far as we know anything of that law. And it is vain to allege that God *may* have other ends for miracles than those plain ones for which the Scripture miracles were wrought. Such a plea can be of no weight, unless we can change at pleasure the "*may*" into a "*must*" or "*has*." Until the design *appears*, we cannot use it as an element of probability; but we must, in the mean while, determine the question by the ordinary rules which regulate the proof of facts. A mere "*may*" is counterbalanced by a "*may not*." It cannot surely be meant that miracles have, by the proof of a revelation, ceased to be miracles — *i. e.* rare and wonderful occurrences — so as to make the chances equal of a miracle and an ordinary event. And if this be not held, then it must be admitted that the laws which regulate miracles are, in some way or other, laws which render them essentially *strange* or unusual events, and insure the *general stability* of the course of nature. Whatever other elements enter into the law of miracles, a necessary *infrequency* is one of them: and until we *can see* some of the positive elements of the law of miracles in operation (*i. e.* some of the elements which do not check, but require miracles) this negative element, which we do see, must act strongly against the probability of their recurrence.

It is indeed quite true that Christianity has revealed to us the permanent operation of a supernatural order of things actually going on around us. But there is nothing in the notion of *such* a supernatural system as the Christian dispensation is, to lead us to expect continual interferences with the common course of nature. Not the necessity of *proving* its supernatural character: for (1.) that has been sufficiently proved once for all, and the proof sufficiently attested to us, and (2.) it is not pretended that the mass of legendary miracles are, in this sense, evidential. Nor are such continual miracles involved in it by express promise, or by the very frame of its constitution. For they manifestly are not. "So is the kingdom of God, as if a man should cast seed into the ground, and should sleep and rise, night and day, and the seed should spring and grow up he knoweth not how," etc. — the parable manifestly indicating that the ordinary visible course of things is only interfered with by the Divine husbandman, in *planting* and *reaping* the great harvest. Nor do the answers given to prayer, or the influence of the Holy Spirit on our minds, interfere *discoverably* with any one law of outward nature, or of the inward economy of our mental frame. The system of grace is, indeed, *supernatural*, but, in no sense and in no case, *preternatural*. It disturbs in no way the regular sequences which all men's experience teaches them to anticipate as not improbable.

(3.) It is acknowledged by the ablest defenders of the ecclesiastical miracles that, for the most part, they belong to those classes of miracles which are described as *ambiguous* and *tentative* — *i. e.* they are cases in which the effect (if it occurred at all) *may* have been the result of natural causes, and where, upon the application of the same means, the desired effect was only sometimes produced. These characters are always highly suspicious marks. And though it is quite true — as has been remarked already — that real miracles, and such as were clearly discernible as such to the original spectators, may be so imperfectly reported to us as to wear an

ambiguous appearance — it still remains a violation of all the laws of evidence to admit a narrative which leaves a miracle ambiguous as the *ground* of our belief that a miracle has really been wrought. If an *inspired* author declare a particular effect to have been wrought by the immediate interposition of God, we then admit the miraculous nature of that event on *his authority*, though his description of its outward circumstances may not be full enough to enable us to form such a judgment of it from the report of those circumstances alone: or if, amongst a series of indubitable miracles, some are but hastily and loosely reported to us, we may safely admit them as a part of that series, though if we met them in any other connection we should view them in a different light. Thus, if a skillful and experienced physician records his judgment of the nature of a particular disorder, well known to him, and in the diagnosis of which it was almost impossible for him to be mistaken, we may safely take his word for that, even though he may have mentioned only a few of the symptoms which marked a particular case: or, if we knew that the plague was raging at a particular spot and time, it would require much less evidence to convince us that a particular person had died of that distemper there and then, than if his death were attributed to that disease in a place which the plague had never visited for centuries before and after the alleged occurrence of his case.

(4) Though it is not true that the Scripture miracles have so "borne the brunt" of the *à priori* objection to miracles as to remove all peculiar presumption against them as improbable events, there is a sense in which they may be truly said to have prepared the way for those of the ecclesiastical legends. But it is one which aggravates, instead of extenuating, their improbability. The narratives of the Scripture miracles may very probably have tended to raise an expectation of miracles in the minds of weak and credulous persons, and to encourage designing men to attempt an imitation of them. And this suspicion is confirmed when we observe that it is precisely those instances of Scripture miracles which are most easily imitable by fraud, or those which are most apt to strike a wild and mythical fancy, which seem to be the types which — with extravagant exaggeration and distortion — are principally copied in the ecclesiastical miracles. In this sense it may be said that the Scripture narratives "broke the ice," and prepared the way for a whole succession of legends; just as any great and striking character is followed by a host of imitators, who endeavor to reproduce him, not by copying what is really essential to his greatness, but by exaggerating and distorting some minor peculiarities in which his great qualities may sometimes have been exhibited.

But — apart from any leading preparation thus afforded — we know that the ignorance, fraud, and enthusiasm of mankind have in almost every age and country produced such a numerous spawn of curious prodigies, as to make false stories of miracles, under certain circumstances, a thing to be naturally expected. Hence, unless it can be distinctly shown, from the nature of the case, that narratives of miracles are *not attributable* to such causes — that they are *not* the offspring of such a parentage — the reasonable rules of evidence seem to require that we should refer them to their usual best known causes.

Nor can there be, as some weak persons are apt

to imagine, any *impiety* in such a course. On the contrary, true piety, or religious reverence of God, requires us to abstain with scrupulous care from attributing to Him any works which we have not good reason for believing Him to have wrought. It is not piety, but profane audacity, which ventures to refer to God that which, according to the best rules of probability which He has Himself furnished us with, is most likely to have been the product of human ignorance, or fraud, or folly.

On the whole, therefore, we may conclude that the mass of the ecclesiastical miracles do not form any part of the same series as those related in Scripture, which latter are, therefore, unaffected by any decision we may come to with respect to the former; and that they are pressed by the weight of three distinct presumptions against them — being improbable (1) as varying from the analogy of nature; (2) as varying from the analogy of the Scripture-miracles; (3) as resembling those legendary stories which are the known product of the credulity or imposture of mankind.

The controversy respecting the possibility of miracles is as old as philosophic literature. There is a very clear view of it, as it stood in the Pagan world, given by Cicero in his books *de Divinatione*. In the works of Josephus there are, occasionally, suggestions of naturalistic explanations of O. T. miracles: but these seem rather thrown out for the purpose of gratifying skeptical Pagan readers than as expressions of his own belief. The other chief authorities for Jewish opinion are, Maimonides, *Moreh Nebochim*, lib. 2, c. 35, and the *Pirke Aboth*, in Surenhusius's *Mishna*, tom. iv. p. 469, and Abarbanel, *Miphaloth Elohim*, p. 93. It is hardly worth while noticing the extravagant hypothesis of Cardan (*De contradictione Medicorum*, l. 2, tract. 2) and of some Italian atheists, who referred the Christian miracles to the influence of the stars. But a new era in the dispute began with Spinoza's *Tractatus Theologico-politicus*, which contained the germs of almost all the infidel theories which have since appeared. A list of the principal replies to it may be seen in Fabricius, *Delectus Argumentorum*, etc., c. 43, p. 697, Hamburg, 1725.

A full account of the controversy in England with the deists, during the last century, will be found in Leland's *View of the Deistical Writers*, reprinted at London, 1836.

The debate was renewed, about the middle of that century, by the publication of Hume's celebrated essay — the chief replies to which are: Principal Campbell's *Dissertation on Miracles*; Bp. Elrington's *Donnellon Lectures*, Dublin, 1796; Dr. Thomas Brown, *On Cause and Effect*; Paley's *Evidences* (Introduction); Archbp. Whately, *Logic* (Appendix), and his *Historic Doubts respecting Napoleon Bonaparte* (the argument of which the writer of this article has attempted to apply to the objections of Strauss in *Historic Certainties*, or the *Chronicles of Eowarf*, Parker, London, 1862). See also an interesting work by the late Dean Lyall, *Propædia Prophetica*, reprinted 1854, Rivington, London. Compare also Bp. Douglas, *Criterion, or Miracles Examined*, etc., London, 1754.

Within the last few years the controversy has been reopened by the late Professor Baden Powell in *The Unity of Worlds*, and some remarks on the study of evidences published in the now celebrated volume of *Essays and Reviews*. It would be pre-

nature, at present, to give a list of the replies to so recent a work.

The question of the ecclesiastical miracles was slightly touched by Spencer in his notes on Origen against Celsus, and more fully by Le Moine; but did not attract general attention till Middleton published his famous *Free Enquiry*, 1748. Several replies were written by Dodwell (junior), Chapman, Church, etc., which do not seem to have attracted much permanent attention. Some good remarks on the general subject occur in Jortin's *Remarks on Ecclesiastical History*, and in Warburton's *Julinus*. This controversy also has of late years been reopened by Dr. Newman, in an essay on miracles originally prefixed to a translation of Fleury's *Ecclesiastical History*, and since republished in a separate form. Dr. Newman had previously, while a Protestant, examined the whole subject of miracles in an article upon Apollonius Tyanaeus in the *Encyclopaedia Metropolitana*.

W. F.

\* The differences of opinion in regard to the reality of miracles arise often from differences of opinion in regard to the meaning of the word; and the differences in regard to the word "miracles," arise often from differences in regard to the meaning of the term "laws of nature." Therefore we inquire:—

A. What are the laws of nature?

One definition involving several others is this: the forces and tendencies essential to material substances and the finite minds of the world, and so adjusted to each other in a system as, in their established mode of operation, to necessitate uniform phenomena. We speak of these forces and tendencies not as accidental but as *essential*; not as essential to matter *as such*, but to the different species of matter; not to *all* finite minds, but to those of which we are informed by reason as distinct from revelation. When the angel is described (Bel, 36) as carrying Habbacuc by the hair of the head to Babylon, he is not described as complying with the laws of nature, although he may have complied with a law of the angels. On the preceding definition of the laws of nature both an atheist and a theist can unite in discussing the question of miracles. Still, from those laws a theist infers that there is a law-giver and a law-administrator; from the system of natural forces and tendencies he infers the existence of a mind who once created and now preserves them. Believing that they are only the instruments by which God uniformly causes or occasions the phenomena which take place, a theist is correct when he defines the laws of nature in their ultimate reference as "the established method of God's operation." It may seem, but it is far from being, needless to add, that the phrase, laws of nature, is a figure of speech, and gives rise to other figures. Derived from the Saxon *lagu*, *lag*, *lah*, the word law suggests that which is (1) laid, fixed, settled (Gesetz, something laid down); (2) laid down by a superior being; (3) so fixed as to make uniform sequences necessary. In its literal use it denotes such a command of a superior as is addressed to the conscience and will, and is accompanied with a threat making obedience necessary in relation to happiness. In its figurative use the command is the system of natural forces and tendencies; the obedience is the course of natural phenomena which are necessary not in the relative but in the absolute sense. God said: "Let the earth bring forth grass"; he spake to the animals

and said: "Be fruitful and multiply." The legal words which he spoke in the creation he continues to speak in the preservation of the natural forces and tendencies; and they being, as it were, mandatory words, are followed by events which are, as it were, obedient acts.

B. What is a miracle?

Of this term various definitions may be given, each of them correct, one of them more convenient for one use, another for a different use.

1. A general definition, comprehending many specific statements, and appropriate to a miracle considered as an event, as a phenomenon, is this: a manifest violation of laws of nature in reference to the results dependent upon them. It is objected to this definition that it supposes all the laws of nature to be violated, whereas in a miracle some of these laws are complied with (B. 5-8). But the definition teaches only that laws, not all the laws, of nature are prevented, by some other than natural force, from producing the effects which, when they are not interfered with, they produce uniformly. It is again objected, that the definition supposes the laws of nature to be violated in all their relations. Just the reverse; it does not suppose these laws to be violated in their reference to a supposed or imagined power on which they depend, but only in reference to the results which almost uniformly depend upon them; not in respect of any thing which is above and before them, but merely in respect of events which are beneath and after them. It is again objected, that there is no power above the laws of nature, and therefore these laws cannot be violated (*ris, violare*). But the objector has no right to assume that there is no superior force able to control the physical forces and tendencies. An objector adds: If the laws of nature be laws of God, they cannot be broken down by a created power, and will not be broken down by himself; he will not break through his own ordinances. But here again is a *Petitio Principii*, a mere assumption that while for one purpose the author of nature sustains its laws, he will not for another purpose interfere with their usual sequences. An objector says: The word *violation* is too figurative to be used in defining a miracle. But it is a mere drawing out of the figure involved in the phrase "nature's laws." It gives consistency and completeness to the metaphor which suggests it. (A.) When the customary sequences of physical laws are suspended by some force which is not one of those laws, then the laws are said to be rebuffed, as when the Saviour "rebuked" the fever, and "rebuked" the winds, and said to the sea: "Peace, be still" (Matt. viii. 26; Mark iv. 39; Luke viii. 24, iv. 39). It is again objected that a violation of natural laws is a miracle, whether the violation be manifest or not. "This alters not its nature and essence" (Hume). But we do not care to include in our definition such imaginary events as never occurred, and we do not believe that there have been violations of natural law unless they have been manifest. Besides, if secret violations of this law have occurred, they excite no theological interest, and are not within the pale of our theological discussion. In proportion as men fail to see evidence that a physical law was violated in the phenomenon described as Joshua's "stopping the sun," just in that proportion do men lose their special motives for proving that the narrative is fabulous, or poetical, or a true history. A secret miracle belongs to a secret revelation, but a the

dogian, as such, does not care for things "done in a corner." A true miracle is proved to be such by its own nature, and not by the mere testimony of the person who works it. Usage and convenience permit our limiting the word to those supernatural phenomena which give in themselves proof of their contrariety to natural law. Mohammed and his prophets may affirm the Koran to be a miracle; but we cannot take their word for it; the book does not, more than the Iliad or the Æneid, present obvious signs of a power going beyond the human. It is further objected, that as the phrase, violation of nature's laws, may imply something more than a miracle, even an impossibility, so it may denote something less than a miracle. Thus we say that a clumsy mechanic *violates* the laws of the screw, lever, etc., when he breaks them by a violent use for which they were never adapted; a student violates the laws of the eye; an orator violates the laws of the larynx; a debauchee violates the laws of his constitution. But in these and similar instances the laws of nature are regarded in reference to their *uses*; in a miracle, they are regarded in reference to the results which would ensue from them if they were not suspended by a foreign power.

2. The general definition may be explained by a specific one; a miracle is a phenomenon which, occurring without regularity of time and place, and in manifest violation of nature's laws as they commonly operate, could not have been definitely foreseen and calculated upon by the man who pretends that it was wrought in his behalf. If it did not occur without regularity of time and place, it could not occur in *manifest* violation of the laws of nature. Many writers (like an Edinburgh Reviewer in No. 254) describe miracles as "the arrangements by which, at crossing places in their orbits, man's world is met and illumined by phenomena belonging to another zone and moving in another plane"; but such phenomena, like the appearance of a comet once in six hundred years, are still regular, and therefore are not *obvious* contractions of nature's laws, and of course do not baffle the precise calculations of men.

3. If there are laws which, as ordinarily preserved, necessitate uniform phenomena, and if they are in a miracle as forcibly suspended as the general definition indicates, then the suspension must be a striking prodigy (hence the words, *miraculum miror*; θαῦμα, θαυμάσιον, παράδοξον); must excite the emotion of wonder (Mark i. 27; iii. 12, iv. 41, vi. 51; Luke xxiv. 12, 41; Acts iii. 10, 11); and, arousing the minds of men, will lead them to anticipate some message connected with it. The kingdom of nature, *as nature*, "suffereth violence"; and why? John Foster describes the phenomenon as the ringing of the great bell of the universe calling the multitudes to hear the sermon. Therefore one specific definition of a miracle may be: a phenomenon which occurs in violation of the laws of nature as they commonly operate, and which is designed to attest the divine authority of the messenger in whose behalf it occurs. *Indirectly* the miracle indicates the truth of the message (1 K. xvii. 24; Coleridge's Works, i. p. 323); *directly* it is intended to indicate the divine sanction of the messenger (Ex. vii. 9, 10; 1 K. xiii. 3-6). If a man pretend to have received a new revelation from Heaven, we may say to him, as Talleyrand said to Lepaux: The Founder of the Christian system suffered himself to be crucified and He rose again:

you should try and do as much." This second definition is a decisive one; because the characteristics of a miracle are learned from the design of it. If the miracle be intended to signify the divine authority of the worker, it must be an event which, in and of itself, gives evidence of its not being the effect of natural causes. This intent of the miracle is not essential to its *abstract nature*, but is always connected with its actual occurrence. Without such an intent an obvious violation of nature's laws would be a miracle; but without such an intent there never is such a violation. Therefore the Bible, as a *practical* volume, gives prominence to the end for which the miracle is wrought; see Exodus iii. 2 ff., iv. 1-9; 2 K. i. 10; Matt. xi. 3-5; Mark ii. 10, 11; John ii. 23, iii. 2, v. 36, 37, ix. 16, 30-33, x. 25, 38, xi. 4, 40, 42, xii. 30, xiv. 10, 11, xx. 30, 31; Acts ii. 22, x. 37-43; Heb. ii. 3, 4.

4. If the material and mental forces and tendencies receive so violent a shock as is implied in the general definition, the miracle will lead men to infer: "This is the finger of God" (Ex. viii. 19). Even if it be performed *instrumentally* by an angel or any superhuman creature, still it is God who sustains that creature, and gives him power and opportunity to perform the miracle. Preserving the laws of nature, God also compels them to produce their effects. No created power can counteract his compulsory working. If he choose to intermit that working, and allow an angel to prevent the sequences of the law which God preserves, then it is God who works the miracle by means of an angel who is divinely permitted to come through the opened gates of nature. "Qui facit per alium," etc. Therefore another specific definition of a miracle may be: a work wrought by God interposing and manifestly violating laws of nature as they are viewed in reference to their ordinary results. It is not a mere "event" or "phenomenon," it is a "work," a work wrought by God (the Spirit of God, Matt. xii. 28); a work wrought by God interposing (the finger of God, Luke xi. 20). If the laws of nature be obviously violated (B. 1) there is a miracle, whether they be violated by a created or an uncreated cause, or by no cause at all. Still, in point of fact they never *have* been violated except by the divine interposition; not even by demons unless God first interposed, and opened the door of the world, and let them pass through, and perform the lesser works in order that he may at once overpower them by the greater. Even if the laws of nature were violated without the divine interposition, the irregularity would not fulfill the main design of a miracle (B. 4), and therefore should be distinguished by the word prodigy, or by a synonym ("mirabile non miraculum"). Hence it is the prevailing style of the Bible, to connect the miraculous phenomenon with the interposed power of Jehovah; see Exodus iv. 11, 12; Ps. cxvi. 8; Matt. xii. 24, 28; John iii. 2, ix. 33, x. 21; Acts x. 38, 40, and passages under B. 2.

5. In order to make the truth more prominent that the forces and tendencies which our unaided reason reveals to us are not thwarted in *all*, but only in *some* of their relations; that they are not made (as Spinoza thinks them to be) inconsistent with themselves, and that their Preserver intercalates a new force preventing their usual sequences, another specific definition of a miracle is: A work wrought by the divine power interposed *between* certain natural laws and the results which they

must have produced if they had not been violated by that power. It is often said, that the creation of the world was a miracle; but before the creation no laws of nature had been established, and of course no power was interposed (as a sign B. 3) between non-existing laws and their normal results. So it is said that the creation of new species of plants and animals was a miracle; but it was not, unless the pre-established laws of some other substances were violated by the creating act interposed (as a sign) between those laws and their legitimate results. It is said again, that the preservation of the world is a constant miracle; but what forces and tendencies are there which must be resisted by a preserving energy interposed (as a sign) between them and their otherwise uniform effects?

6. Since the phrase, "violation of nature's laws," is condemned sometimes as expressing too much, and sometimes as expressing too little, it may give place to a synonymous phrase, and a miracle may be defined: A work wrought by God interposing and producing what otherwise the laws of nature *must* (not merely *would*) have prevented, or preventing (Dan. iii. 27) what otherwise the laws of nature *must* (not merely *would*) have produced. Thus the non-occurrence as well as the occurrence of a phenomenon may be a miracle (see B. 7), and thus also a miraculous is distinguished from a supernatural event (C. 7).

7. As we sometimes overlook the truth that all the laws of nature are constantly upheld and controlled by God, and in this sense are his established method of operation (A), and as we accordingly imagine that when they are violently broken over his power is counteracted, and an event takes place arbitrarily and wildly, another of the specific definitions, harmonizing in fact though not in phrase with all the preceding, may be: A miracle is an effect which, unless it had been produced by an interposition of God, would have been a violation of the laws of nature as they are related to Him and to their established sequences. If we suppose that a human body is thrown into a furnace heated as Daniel iii. 21-30 describes it, the law of fire is to consume that body. If the forces and tendencies of the fire are preserved, and if no volition of God be intercalated to resist them, and if in these circumstances the body remains uninjured, then the law of the fire is violated. If, however, God intercalates his volition and thwarts the action of the fire, He does not violate its laws in their relation to him, for it *has* no laws which can produce or prevent any phenomena in opposition to his interposed will (Brown on *Cause and Effect*). A miracle is natural to the supernatural act of God choosing to produce it.

8. Since the laws of nature are often supposed to include all existing forces, and are thus confounded (even by Dr. Thomas Brown) with the laws of the universe (B. 4), still another of the specific definitions, illustrating each of the preceding, may be: A miracle is a phenomenon which, if not produced by the interposition of God, would be a violation of the laws of the *universe*. In the universe God himself is included; it is no violation of any law in his nature that He is perfectly benevolent; it is in unison with all the laws of his being that He perform all those outward acts which perfect benevolence requires, and consequently that He put forth a volition for a miracle when the general good demands it. As it is consonant with the laws of God to choose the occurrence of a

needed miracle, so it is consonant with the laws of matter and finite mind to obey his volitions. It would be a violation of their laws if He should exert his omnipotence upon his creatures and they should effectually resist it. Since then it is his invariable method of action to do all which the well-being of his universe demands, and to make that effect necessary which He wills to make so, and since it is the invariable order of sequence that matter and finite mind yield to the fiat of their Maker, it follows that a miracle (even as defined in B. 1) may not only be in harmony with the laws of the *created* universe as they are related to the divine will, but may be actually required by the laws of the *entire* universe, and while abnormal in their lower, may be normal in their higher relations (D. 1, c. d).

C. What are the distinctions between a miracle and other real or imagined phenomena?

1. A miracle is not an event without an adequate cause. The atheist and pantheist, believing that there is no personal author of nature, and that a miracle has no cause in the forces of nature, are misled to believe that it can have no cause at all.

2. A miracle is not an interposition amending or rectifying the laws of nature. Some (Spinoza, Schleiermacher) have regarded the common definitions of a miracle as implying that the courses of nature are imperfect and need to be set right. M. Renan describes a miracle as a special intervention "like that of a clock-maker putting his fingers in to remedy the defects of his wheels;" and Alexandre Dumas, borrowing an Italian epigram, describes a miracle as "the *coup d'état* of the Deity." By no means, however, is it an after-thought of God; by no means the result of a discovery that the laws of nature are not fitted to fulfill their design. Those laws were planned for the miracle as much as the miracle was planned for them. It would not be of use, unless they were essentially what they are. It is performed not because the works of God need to be supplemented, but because men will not make the right use of his works. It is prompted not by a desire to improve what He has done, but by his condescending pity for men who willfully pervert what He has done. It does not imply that the uniformity of nature is a mistake, but that it is a wise arrangement — so wise that it enables him by a sudden deviation from it to give an emphatic proof of his grace. It does not imply that the constitution of the human mind in expecting this uniformity is wrong, but that it is right, and specially right as it prepares the mind to be impressed because startled by the miraculous sign of superhuman love.

3. A miracle is not a counteraction of *some* laws by *other* laws of nature. Dynamic forces counteract the mechanical; vital forces counteract the chemical; voluntary forces counteract the physical. This counteraction of one force by another is not even supernatural, still less miraculous (B. 6, C. 7). It would not take place unless natural laws were uniform; it is a compliance with the law counteracted, as well as with the law counteracting; not only is it produced by nature, but *must* be produced, unless a power be interposed thwarting nature. A chemist, like Prof. Faraday cannot prove his divine commission by his novel experiments of one chemical law resisting another. In such resistance lies one secret of various magi

al arts; of the feats, for example, which the Egyptians performed "by their enchantments." A miraculous is distinguished from a magical wonder partly by its being such a "mighty work" (*δύναμις*) as transcends all created energy; such a work as science in its progressive tendencies becomes less and less able to explain by natural causes.

4. A miracle is not merely a sign of divine authority. It is a "sign" (*σημεῖον, τέρας; monstrum, monstrans*), but it is more. If we could make exact distinctions between the nearly synonymous words of the Bible, we might say that miracles are signs, and wonderful signs, and such wonderful signs as could not have been wrought by finite power (Acts ii. 22; 2 Cor. xii. 12; 2 Thess. ii. 9). Mr. Webster, in his eulogy on Adams and Jefferson, speaks of their dying on the same fourth day of July as a sign from heaven; many persons regard many remarkable events as tokens of the divine will; many divines regard the internal worth of the Bible as an indication of its celestial origin; controversialists may believe in all these phenomena and yet not believe in them as signs; or may believe in them as signs *præter-natural* and even *super-natural*, but not miraculous. The convenience of scientific inquiry demands a distinction between that which is *aside from* nature, that which is *above* nature, and that which is *against* nature as such.

5. A miracle is not precisely defined as "an exception" to, or a "deviation" from "the laws of nature," "from some of the laws of nature," "from the uniform manner in which God exercises his power throughout the world;" "from the uniform method in which second causes produce their effects." Some writers teach that if an event be "simply inexplicable by any known laws of nature" it is a miracle in the *negative* sense; if it be also a "distinct sign by which the divine power is made known" in favor of a religious system, it is a miracle in the *positive* sense. But it is a common belief of theologians that the divine process of sanctifying the soul (Heb. xiii. 20, 21) is not miraculous, and yet is "an exception to, or deviation from some laws of nature." It is common, moreover, to speak of physical events as *præter-natural*, when the speaker does not imagine them to be even *supernatural*. One of the chaplains to Archbishop Sancroft was born with two tongues; but this "deviation from ordinary phenomena" was not a "sign" that his faith had or had not the divine approval. True, in the large view of mere nature (C. 3), such phenomena are not real but only apparent deviations from nature's laws, for they result normally from peculiar combinations of these laws. Still they are familiarly called "deviations from nature," and for the sake of precision ought to be distinguished from miracles. A miracle is indeed a wonder (B. 3), but we may conceive of wonders which are not miracles, and are on the whole stranger than miracles (D. 2).

6. A miracle is not (as Schleiermacher supposes to be) a phenomenon produced by an occult law of nature. The following beautiful illustration of this theory is quoted by Dr. J. F. Clarke (*Orthodoxy, etc.*, pp. 64, 65) from Dr. Ephraim Peabody: "A story is told of a clock on one of the high cathedral towers of the older world, so constructed that at the close of a century it strikes the years as it ordinarily strikes the hours. As a hundred years come to a close, suddenly, in the immense

mass of complicated mechanism, a little wheel turns, a pin slides into the appointed place, and in the shadows of the night the bell tolls a requiem over the generations which during a century have lived and labored and been buried around it. One of these generations might live and die, and witness nothing peculiar. The clock would have what we call an established order of its own; but what should we say when, at the midnight which brought the century to a close, it sounded over a sleeping city, rousing all to listen to the world's age? Would it be a violation of law? No; only a variation of the accustomed order, produced by the intervention of a force always existing, but never appearing in this way until the appointed moment had arrived. The tolling of the century would be a variation from the observed order of the clock; but to an artist, in constructing it, it would have formed a part of that order. So a miracle is a variation of the order of nature as it has appeared to us; but to the Author of nature it was a part of that predestined order — a part of that order of which he is at all times the immediate Author and Sustainer; miraculous to us, seen from our human point of view, but no miracle to God; to our circumscribed vision a violation of law, but to God only a part in the great plan and progress of the law of the universe." We reply: If such a marvelous phenomenon be, like the blooming of the century plant, a result of physical laws as already defined (A.), we cannot be certain that some philosophers have not detected these laws, as some have proved the existence of a particular planet before that planet had been detected by the eye. We cannot be certain that these sagacious philosophers have not waited for the foreseen phenomenon and delivered their message in connection with it, as some deceitful navigators have uttered their threats to a savage king a few hours before a solar or lunar eclipse, and have represented the eclipse as giving a divine authority for those threats. If a miracle is wrought at all, it is wrought for an end; if for an end, then for a special sign of the divine will (B. 3); if for a sign of the divine will, then probably not by an occult law of nature; for if it be wrought by an occult law, then it becomes the less decisive as a sign, less conducive to its end. Therefore the antecedent presumptions for a miracle (D. 1, e. d.) are presumptions for it as the result of a force other than a natural law. It may be rejoined, however, that the Deity has at the creation inserted in matter or spirit certain exceptional forces, having no uniform activity, and becoming operative only at irregular and exceptional emergencies, for no other purpose than that of giving to certain teachers an exceptional divine authority. But forces like these are not in the system of uniform agencies, but out of it, consequently they are not laws of nature (A.); their existence is at least as difficult to prove as is the occurrence of transient divine volitions; they, as *mediate*, represent and are equivalent to the *immediate* interpositions of God's will; no essential advantage can be gained, and in some cases perhaps no *essential* (but only a rhetorical) advantage is lost, by referring the miracle to these special and abnormal forces, instead of referring it to the bare and immediate *ictus* of the divine volition.

7. A miracle is not a *merely* supernatural phenomenon. The supernatural is the genus, including all events produced by a power above the natural laws (B. 6). Of these events the *merely*

supernatural is *one* species including those only which are *not* violations, the miraculous is *another* species including those only which *are* violations, of the natural laws. The renewal of the soul as described in John i. 12, 13, iii. 3-8; Eph. ii. 4-10, is *merely* supernatural, and not (as Coleridge terms it) miraculous; for the *essential* tendencies of the soul, the laws *essential* to its being a soul (A) are not manifestly violated when they are rectified; neither is the occurrence so irregular as to defy all possibility of anticipating definite examples of it (B. 2). So it *might* be maintained, consistently with the *strict* meaning of the terms, that Jesus performed his first *miracle* at the wedding of Cana (John ii. 11), and his second *miracle* upon the son of the Capernaum nobleman (John iv. 47-54); and still before the *first* of these miracles he had given *supernatural* signs of his Messiahship (John i. 48), and before the *second* he had given many such signs, as in his calling of the Apostles, his conversation with the Samaritan woman, his predictions, etc.; and Nicodemus (in John iii. 2) referred not merely to the miraculous but also to other supernatural "signs" that Jesus had a divine authority.

D. What is the difference between the proof of the *Biblical* and the proof of *other* alleged miracles?

1. There is a difference between the antecedent presumptions in regard to the *Biblical*, and the antecedent presumptions in regard to other miracles.

a. There is a strong presumption against all miracles considered *merely* as *violations of physical law*. At the outset of our inquiries we presume that the course of events will be as it has been; that it has been in the past ages as it is in the present age; and of course that no event *viewed simply as an event* has occurred in contrariety to this uniform order. While the testimony for common events is to be credited at once without strong reasons for rejecting it, the testimony for miracles *as mere phenomena* is to be rejected at once without strong reasons for crediting it. When divines refuse to say that a miracle is a violation of physical laws (B. 1) because the term *violation* makes the miracle appear intrinsically improbable, they seem to forget that so far as a miracle in itself, *i. e.* viewed as a mere phenomenon, is improbable, just so far does it become useful in proving that God has interposed in behalf of his revealed word; and so far as a miracle, in itself, and apart from its relations to a special divine intention, is probable, just so far does it lose its usefulness as a sign of God's interest in that word. The Christian apologist contends against his own cause, when he contends against Hume's doctrine that a miracle is a mere event is contrary to experience: for if it were not contrary to experience it could be calculated on (B. 2), and would thus lose its power to surprise and convince. He injures his own cause when he asserts, in opposition to Hume, that a miracle as a mere event is conformed to experience; for if an event be conformed to experience, then it is conformed to the general truth learned from experience, that physical changes have physical or finite causes; and if it be conformed to this truth then it is no miracle (B. 4-8). Let us represent the number of alleged miracles by the figure 1,000; whether these have been actually wrought is the question; at the outset we cannot say that they have been, or have not been; we cannot beg the question in the affirmative or in the negative; we

can say, however, that leaving out of account the disputed number 1,000, we have never experienced, and no other men have experienced the phenomenon of a physical change without a physical or a finite cause. Thus the miracle is contrary to experience and to *all* experience (Mark i. 27, ii. 12; Luke v. 26; John ix. 32, xv. 24). It is therefore intrinsically improbable. Whether we suppose (with Reid Stewart, Campbell) that we have a constitutional tendency to believe the course of events to be uniform; or (with Mill, McCosh) that this belief results from experience; or, that it is both intuitive and confirmed by experience, it is a *firm* belief of all men. Because it is deep-seated, the presumption against miracles as mere phenomena is strong, and therefore when miracles are wrought they become the more startling and convincing, and are regarded not as mere phenomena but as divine signals.

b. Against the great majority of alleged miracles the presumption remains un rebutted. Some of them are connected with no apparent design good or bad; some with a design to commend a system of morals or religion which is false and injurious. No amount of testimony is strong enough to give us rest in believing that God has interposed and checked the operation of his own laws without any design, without a good design, without a great and good design. The presumption *against* such miracles as are said to have been wrought at the tomb of the Abbé Paris, or upon the daughter of Pascal, cannot be invalidated by the witnesses for them. "I should not believe such a story were it told me by Cato." We need not deny that the witnesses were honest, that they actually saw wonderful and even inexplicable phenomena; but they drew a wrong inference; they did not refer the phenomena to the real, though concealed causes; they mistook a monstrosity for a miracle: the amazing operation of *some one* law, as of electricity, oyle, concealed mental forces, for the palpable violation of the *laws* of nature.

c. Against the *Biblical* miracles, however, the antecedent presumption does not remain un rebutted; for they are not mere physical phenomena; for, first, they were wrought by a Mind infinitely desirous of the spiritual and eternal welfare of men (see Dr. Channing, iii. p. 118); secondly, they were *needed* for attesting a revelation which was *imminently* and *deplorably* needed; thirdly, the revelation was grand enough to deserve such miracles ("Nec Deus interisit," etc.), and the miracles were noble enough to fit such a revelation. If, as Paley says, the one message recorded in John v. 28, 29, was "well worthy of that splendid apparatus" of miracles which accompanied it, how much more worthy was such a condensed treatise as our Lord's discourse to Nicodemus? That discourse is a gem; there is an antecedent presumption that it will have a costly setting. The inspired word is called by Locke a telescope for the mind: there is an antecedent presumption that it will be mounted on a strong frame work. Miracles are the setting and the frame-work for the Gospel. There is an antecedent presumption that the Father who is "very pitiful" will interpose for the children whom He loves with infinite tenderness, will reveal to them the truth which is essential to their peace, and will confirm it by miracles which are needed for its appropriate influence. Our conclusion then is exactly opposite to that of Hume. He says (whatever he means) that a miracle may possibly be proved, but

not "so as to be the foundation of a system of religion;" we say that we have heard of no miracle which can be proved *unless it be* the foundation of a system of religion. The presumption against miracles as mere physical phenomena is rebutted by the presumption in favor of miracles as related to infinite Benevolence. The antecedent improbability of their occurring as violations of physical law is counterbalanced by the antecedent probability of their occurring as attestations of religious truth. The favorable presumption offsetting the antagonistic one prepares us to examine the testimony for miracles with as little impulse to reject it as if the testimony related to an ordinary event. In the logical order our belief in their necessity, fitness, worthiness, may be either the *conditio precedens* or the *conditio subsequens* of our belief in their actual occurrence, but in the chronological order the testimony for them may be so overwhelming as to convince us of their occurrence and their worthiness at one and the same time.

d. In favor of the Biblical miracles there is not only one presumption which equals and thus rebuts, but there is another presumption which more than equals, which overpowers the presumption against them, and thus not only prepares but also predisposes us to credit the testimony in their favor. The religious system in behalf of which they were wrought involves internal marks of its having been revealed by God, but from that system the Biblical miracles are inseparable. (1.) We may take a particular view of this argument. According to the belief of many divines, some of the most important parts of the Christian system are in themselves miraculous phenomena. "Miracles and prophecies are not adjuncts appended from without to a revelation in itself independent of them, but constitutive elements of the revelation itself" (Rothe). He who believes in the general resurrection of the dead believes in the certainty of a future miracle far more stupendous than the resurrection of the widow's only son; how, then, can he *a priori* hesitate to believe in that past miracle? He who accepts the doctrine of the Incarnation as revealed in John i. 1-14, assents to a miracle far more astonishing than the appearance of the angels to the shepherds, and of the star to the Magi; how then can he be reluctant to receive the narrative of the less astonishing miracles? For a man to believe that a child was born in whom dwelt "all the fullness of the Godhead bodily" (Col. ii. 9), and at the same time to demur at the statement that the child who was named "The Wonderful" performed wonders which were miraculous, is as illogical as for a man to believe in the possibility of a sun, but not in the possibility of planets revolving around it. "Revelation itself is miraculous, and miracles are the proof of it." (Bp. Butler.) (2.) We may take a more general view of this argument. The supernatural truths of the Bible prompt us to believe that miracles have been wrought in attestation of them. Miracles are to such truths what the polish is to the agate, what the aroma is to the flower, what music is to the march of a triumphant army. It would be strange if tax-gatherers and publicans recorded sublimer truths than were recorded by Plato and Aristotle, and did not also attest them by miracles; if men received a supernatural inspiration, and did not record such truths as imply a miraculous interposition. Why were they inspired if they were not to reveal doctrines which transcended the human power of discovery, and did not confirm

them by wonders which transcended the human power of wonder? Should we hear a man like Jesus Christ announce for the first time that he would cause the spiritually blind and deaf and dead to see and hear and live spiritually, we should expect that He would accompany his announcement with the miraculous gift of sight, hearing, life, to the corporeally blind, deaf, and dead. If we should hear Him predict the new creation of souls "unto good works" we should expect that He would illustrate his prediction by some miraculous control over nature. In themselves the miracles are improbable; in itself the revelation of such truths is improbable; but if such truths are to be revealed for the first time, then the miracles are to be expected; if the one improbability become a reality, we are to presume that the other will. The supernatural truths of the Bible are efflorescent, and miracles have been happily called their "efflorescence." They are so fit an accompaniment and so important a part of the truths connected with them that Dr. Channing (Memoir, ii. 442) goes so far as to say: "They are so involved in all his [Christ's] teachings and acts, that in taking them away we have next to nothing left;" and he says also (Works, iii. 119; see also iv. 392) as Augustine and others have said before him, that, on the whole, the wonder is not that any but that so few miracles have been wrought. (3.) We may take a still more general view of this argument. The miracles of the Bible are so interwoven with its didactic system, that if it stands, they stand; if they fall, it does not utterly fall, but it loses one strong prop; the intrinsic evidence in its favor becomes then a positive evidence in their favor. For example: the resurrection of Christ is an appropriate appendage to his atoning work. It is probable that if He died as our sacrifice, He rose from the dead; and if He rose from the dead, He died as our sacrifice; if He ascended to the throne, He rose from the grave; and if He rose from the grave, He ascended to the throne. In various other methods is his resurrection interlocked with the main teachings as well as with the personal character of his Apostles. Now the resurrection of Christ was an actual event, or it was not. If it were not, the narratives of it are not true; and if these narratives are not true, then the general system with which they are interlaced becomes the less probable. But that system is true; it so commends itself to our religious nature as to prove its divine original. Then the narratives of Christ's resurrection which are so inextricably intertwined with the system are true. To strike out those narratives from the New Testament and to retain the remainder, is like blotting out the figure of the Virgin from the Sistine Madonna.

The old objection arises: You prove the miracles by the doctrine, but you profess to prove the doctrine by the miracles. We do both. Each of the arguments lends aid to the other. Our Saviour did not perform his miracles as an anatomist conducts his demonstrations, by appealing to the intellect alone; but he required faith, or a right moral state, as a condition for his miraculous works; and on the other hand his miraculous works corroborated the moral faith (Mark vi. 5; Matt. xiii. 58). M. Renan mistakes the logical characteristics of the Bible, when he supposes that the resurrection of Lazarus should have been inquired into by a college of physicians relying on their anatomical instruments and demonstrating their conclusions. This might have been done safely; but the Bible

does not profess to be a treatise on naked science; it relies not on *demonstrative* but on *moral* reasoning, and makes our intellectual pursuits a means of moral probation. We are predisposed by our proper reverence for the doctrine to believe in the miracles, which, however, are commended to us by their own independent proof (John v. 36, x. 25, 38, xiv. 10, 11); and we are predisposed by the miracles to believe in the doctrine, which, in its turn, is commended to us by its own independent evidence. The doctrine is the title-deed, and is *essential* to the significance of the seal attached to it. The miracle is the seal and is *important* for the authority of the title-deed. The seal torn away from the parchment cannot fulfill its main design, and the parchment with the seal cut out is lessened in value (Gerhard). The doctrine is the soul and is *essential* to the life of the body; the miracle is the body and is *important* for the full development of the soul. "Miracles test doctrine, and doctrine tests miracles" (Pascal).

2. There is a difference between the testimony in favor of the Biblical, and that in favor of other alleged miracles. Under the following seven heads are classified *some* of the peculiar evidences from testimony for the miracles of the Old and New Testaments; and it is easy to see that *all* these evidences are *not combined* in support of Pagan, Mohammedan, post-apostolic, or any other than the Scriptural miracles.

1. The nature of the miracles. (a.) They were such as could be judged by the senses (John xi.; Luke xxiv. 39). (b.) Many of them are not ambiguous; for how can we explain the resurrection of the dead by any natural law? (c.) They were not tentative; for we hear of no one who *faithfully* attempted to perform any miracle which he was authorized to perform, and who failed in the attempt. *All* who applied to Jesus were healed by his word (Matt. iv. 23, 24, viii. 16, ix. 35, xii. 15, xiv. 14; Mark vi. 56; Luke iv. 40, vi. 19). (d.) The alleged miracles were obviously connected with the volition of the person who professed to perform them, and were not, like the tentative works performed at the tombs and altars of saints, apparently independent of any particular volition producing them. (e.) They were connected *immediately* with the volition to produce them; a distant sufferer is instantly relieved by the spoken word (Matt. xxi. 19, 20; John iv. 47-53). (f.) Many of them were of such a nature as cannot be explained by the acting of the imagination. The miracles of Christ were not like the cures effected by the touch of a *king*, but were wrought by a Galilean peasant in whose personal appearance we do not know that there was anything remarkable. In such methods as the preceding are the Biblical miracles distinguished from mere wonders, and the testimony in their favor from simply marvelous tales.

2. The circumstances in which they were performed. (a.) They were wrought at such times and places as favored the thorough examination of them: in broad daylight; in close contiguity to the observers (Luke xxiv. 39; John xx. 27). (b.) They were performed not privately, not before packed companies, but before promiscuous multitudes who could not be induced to combine in a stratagem (John ix.; Acts iii. 7 ff.). (c.) They were not performed by a band of artists or experts who remained together, and might cover each other's failings, and who were superintended by a skillful manager; but the Apostles separated from each

other, did not act in concert, manifested no solicitude for each other's proceedings, imparted the miraculous gifts to men of different characteristics who were selected not for their dexterity but for their moral worth (Acts xviii. 14-23, xix. 6; 1 Cor. xii. 7-11).

3. The character of the men on whose testimony we accept the miracles. (a.) Some of them were personal observers, eye and ear witnesses; John xv. 27; Acts ii. 32, iii. 15, iv. 20, v. 29-32, x. 39-41, xiii. 31; 2 Peter i. 16-18; 1 John i. 1-3. (b.) Whether personal witnesses or not, they were *able* to know the truth; men of sound and stable sense; practical men, like Mark, and Luke the physician, not credulous, not fanciful, not easily excited and beguiled (Mark xvi. 14; John xx. 24-29). If they had been poetical instead of prosaic, scholars instead of business men, politicians instead of tax-gatherers they would have wanted one sign of credibility. (c.) They were *disposed* to utter the exact truth. They have such an air of veracity as cannot be mistaken. This air is made up (1) sometimes of childlike statements, as in Isaiah xxxviii. 21; (2) sometimes of omissions to ascribe miracles to particular men, as to Abraham, to Jacob, to David, to Solomon, to the Baptist (John x. 41), who however were special favorites of the historians, and would have been celebrated for their miraculous achievements, if the historians had indulged in mythical or fanciful narratives; (3) sometimes of incidental allusions to the labor of scrutinizing the reported facts, Luke i. 1-4; (4) sometimes of confessions of incipient incredulity, as in Matt. xxviii. 17; Mark xvi. 11, 13, 14; Luke xxiv. 11, 25; (5) sometimes of obvious freedom from anxiety to make out a consistent narrative. The reporters, seeming to be entirely at their ease, have admitted into their records unimportant discrepancies, which are apparent; and unimportant coincidences, which are occult. If their narratives had been written with a dishonest aim, the discrepancies would have been carefully concealed, and the coincidences would have been openly paraded. (6.) Sometimes their constitutional faults give an air of truthfulness to the Biblical narrators. Such an open-hearted man as Simon Peter could never have held out in a conspiracy to deceive the public. Such a skeptic as Thomas could never have united with him in so bold an enterprise. (d.) The historians were sure that their statements were correct. They appealed to their *interested* contemporaries. They challenged investigation. John x. 37; Acts ii. 22. (e.) Although able and disposed to give a true record, they were not able, had they been disposed, to *fabricate* such a record as they have given. Some of them, as Matthew, were deficient in genius, and this is an argument *for* rather than *against* their exact truthfulness. How could these men have invented a record of Christ's miracles so consonant with the principles of the divine administration, with the character of Christ, with the spirit of his Gospel? The great forces which God employs, gravitation for example, are noiseless. Christ's miracles were in the solitudes of Palestine. Christ was meek and lowly; he was born not in Rome but in Bethlehem, and dwelt not in the palace but in the cottage; so he did not perform his miracles upon consuls and prætors, but upon the little daughter of Jairus and upon the woman who was "bowed together." The spirit of his Gospel is that of mercy and grace; his miracles were wrought for the hungry, the epileptic, the paralytic, *braggars*

and sick children. Whose exuberant imagination invented this series of apposite wonders?

4. The circumstances in which the original narrators gave their testimony. (a.) They gave it at the time when the miracles were performed, not as the original reporters of many Pagan and Romish wonders, after the lapse of centuries from the performance of the exploits. (b.) There is reason to believe (Douglas's *Criterion*, pp. 80, 286-294) that the testimony for the Biblical miracles was first given at the place where they were performed (the Gospel of Jesus risen from the dead was first preached at Jerusalem), and not like the testimony for the miracles of Loyola and Xavier, at distant localities where the local evidence against them could not be scrutinized.

5. The effect of the miracles. (a.) They were partly the means of overcoming the opposition of the original narrators. The disciples of Christ were expecting him to be a temporal king, were looking forward to their own princely honors, and were hostile to the lowly and spiritual character of his mission. His miracles helped to break down their hostility. They were changed from enemies to friends partly by the *σημεία* which they described (Heb. ii. 4), and which they would, if they could, have rejected. (b.) The miracles were partly the means of turning masses of the people from a decided anti-Christian to a Christian belief (John ii. 23, iii. 2, vii. 31). (c.) Their converting influence is the more decisive sign of their reality, because every believer in them knew that he would be called by his faith to a continuous course of hard, self-denying, and often self-sacrificing work. Not without the most rigid scrutiny will men assent to a proposition which requires them to go through toil not only arduous but persevering, not only attended with habitual self-denial, but liable to end in the utter sacrifice of earthly good (John xi. 47-57). The alleged miracles of Pagans and Romanists have been performed among persons previously favorable to them, or liable to be imposed upon by excited fancy and feeling, and have not been connected with rigorous and repulsive exactions. (d.) A new religion was founded on the first Christian miracles. Men have a strong presumption against a faith not only exacting but new, and will disbelieve, if they can, in any miracles corroborating it. In order that the alleged miracles at the tomb of the Abbé Paris might be compared with the Biblical wonders, some instrumental worker of the miracles should have *appeared*, and should have declared his design in working them, and that design should have been to attest before unbelievers a novel as well as humiliating system of religious truth. (e.) External institutions (as the Passover, the Eucharist, the Lord's Day) were founded on, or in intimate connection with the Biblical miracles, and were established at the time and place when and where the miracles were said to have been wrought. Men who are to pay the cost have an economical objection to the rearing of expensive monuments for commemorating scenes of recent occurrence in their own neighborhood, when there is not clear proof that the scenes did occur. (f.) Not only the nature, but the degree of the influence exerted by the Biblical miracles is a proof of their reality. Against the selfishness and the prejudices of men the Christian system, originating with a few persons who were despised in Galilee, which was itself despised throughout Judæa, which in its turn was despised in other countries, fought its own way into

the favor of the most enlightened nations, and partly by the aid of pretended miracles which, if they had been merely pretended, might have been shown to be such.

6. The testimony of persistent enemies. Men who denied the Biblical truths admitted the reality of the Biblical miracles. True, they ascribed the phenomena to magic; but this proves that they could not ascribe them to the working of natural law. True, they admitted the miraculous agency of all other religionists; but they had not the same motive for admitting the Christian miracles which they had for admitting others. The Christian system was exclusive, and would thus impel them to disprove it if they could; almost every Pagan system was liberal, and was thereby saved from arraying objectors in personal hostility to it. It is said, that the early *opponents* of the Gospel confessed its miraculous attestation, because they were weak and credulous? But is it not said by the same objectors, that the early *friends* of the Gospel were weak and credulous? Why then did the alleged friends of the Gospel deny the miracles, "lying wonders," of heathenism? "The more weak and credulous any man is, the harder it is to convince him of anything that is opposite to his habits of thought and his inclinations. He will readily receive without proof anything that falls in with his prejudices, and will be disposed to hold out against any evidence that goes against them" (Whately's *Introductory Lessons*, p. 219, *Cam. ed.*).

7. The general coincidences of the Biblical narratives. (a.) The witnesses who recorded the Christian miracles differed from each other in personal character and style, and still agree with each other in the substance of their narratives. Their substantial concurrence is a sign, additional to every *individual* mark, that their narratives are true. (b.) The coincidence of the miraculous attestations with the internal character of the Biblical system (which moreover is itself composed of harmonizing doctrines, all of them witnesses concurring to recommend it, D. 1, d) forms another comprehensive sign that the simple-hearted men who recorded the miracles uttered the truth. (c.) The coincidence of the Biblical narratives with many general facts of history makes these narratives the more plausible. Miracles were *expected* by the nations to whom the Biblical theology was preached. Such an expectation is a correlate to the presumption that a benevolent God will interpose in behalf of such a theology (D. 1, c. d.). It is natural to think that the expectation would be met by the original preachers (Mark xvi. 20; Acts xiv. 3; Rom. xv. 18, 19), or that the hearers would have complained of the preachers, and the preachers would have apologized for their failure to meet it. Where are the complaints? Where are the apologies? Again, the Jews were an ignorant nation, but they retained their belief in one infinite God, who was to be worshipped spiritually; why did they cling to this sublime faith, while more cultivated nations, Egyptians, Greeks, Romans, did not rise above polytheism and idolatry? Had they more refined intuitions, or more logical skill than the masters of the Lyceum and Academy?

We have, then, a constitutional tendency to believe that as the original narrators of the Christian miracles were plain, sound, apparently ingenuous but not ingenuous men, their narratives are true. Our experience favors this belief. The falsehood

or this testimony, as mere testimony, would be a monstrous deviation from the ordinary course of phenomena. The concurrence of all the preceding marks of truth in such a falsehood would be a still more monstrous deviation from the course of nature. It would be a deviation more monstrous than are the Biblical miracles themselves. It would be not only a marvel, but a mere marvel, for which there is no good moral reason; therefore it would be a mere monstrosity; but the miracles are not mere marvels, there is a good moral reason for them. We can see no adequate natural, and of course no supernatural cause of the mere monstrosity, but we can see an efficient cause of the miracles and an adorable one. The mere monstrosity has nothing to recommend it in its agreement with the laws of the universe; the miracles have much (B. 7, 8). If now there be two contradictory hypotheses both of which are marvelous, but one of them more unaccountable, more unreasonable, and thus more monstrous than the other, we are bound to reject the greater monstrosity.

Christian apologists have often adopted the maxim of Hume: Of two miracles, reject the greater; and they have said that if testimony having the preceding signs of trustworthiness were false the falsehood would be more miraculous than the miracles attested. But no; the falsehood of testimony which appears credible may be more wonderful than a miracle, and yet be in itself no miracle at all. While it may be difficult to account for the falsehood, it is absolutely impossible to account for the miracle, on any known principle of human or physical nature (B). Except in a few disputed cases there has never been an approximation to the phenomenon of raising the dead, but in numerous cases there has been an approximation to the phenomenon of false testimony which had all the appearance of being true. The falsehood of such testimony, then, must be less contrary to experience than the miracle, the very nature of which requires that, except in the few disputed instances, it be contrary to all, *i. e.* to the analogy of all experience (D. 1, a). Experience, however, is not our only guide. Antecedently to experience we have two contrary presumptions, and of these two the stronger prompts us to believe in such miracles as are recorded in the Bible (B. 5-8, C. 5, D. 1, c. d.). The character of God and his relations to men make it more rational to suppose that a wonderful event has occurred for which we can see a moral reason and an efficient cause, than that a monstrous event has occurred for which we see no moral reason and no natural cause.

E. The proper time for discussing the Question of Miracles.

In some rare cases it may be needful to discuss the question with an atheist, pantheist, or skeptic. In these cases the definitions of a miracle under B. 1, 2, are appropriate. As at the outset we cannot require him to assert, and he cannot require us to deny the existence of God, so these definitions neither assert nor deny it. A more appropriate, as well as a more common time, however, for discussing the question of miracles is after we have proved the existence and attributes of God. The discussion is between the Christian and the Deist, oftener than between the Theist and the Atheist. But the most appropriate time for the discussion is after we have proved man's need of a revelation and the fitness of the Biblical revelation to supply that need. The internal evidence of the inspiration

of the Bible removes the obstacles which obstruct the proof of miracles, and also lends additional force to that proof and forms a part of it. E. A. P.

MIR'AM (מִרְיָם, *their rebellion*: LXX. Μαριάμ; hence Joseph. Μαριάμην; in the N. T. Μαριάμ or Μαρία, Μαριάμ being the form always employed for the nominative case of the name of the Virgin Mary, though it is declined Μαρίασ; Μαρία; while Μαρία is employed in all cases for the three other Marias). The name in the O. T. is given to two persons only: the sister of Moses, and a descendant of Caleb. At the time of the Christian era it seems to have been common. Amongst others who bore it was Herod's celebrated wife and victim, Mariamne. And through the Virgin Mary, it has become the most frequent female name in Christendom.

I. MIRIAM, the sister of Moses, was the eldest of that sacred family; and she first appears, probably as a young girl, watching her infant brother's cradle in the Nile (Ex. ii. 4), and suggesting her mother as a nurse (*ib.* 7). The independent and high position given by her superiority of age she never lost. "The sister of Aaron" is her Biblical distinction (Ex. xv. 20). In Num. xii. 1 she is placed before Aaron; and in Mic. vi. 4 reckoned as amongst the Three Deliverers — "I sent before thee Moses and Aaron and Miriam." She is the first personage in that household to whom the prophetic gifts are directly ascribed — "Miriam the Prophetess" is her acknowledged title (Ex. xv. 20). The prophetic power showed itself in her under the same form as that which it assumed in the days of Samuel and David, — poetry, accompanied with music and processions. The only instance of this prophetic gift is when, after the passage of the Red Sea, she takes a cymbal in her hand, and goes forth, like the Hebrew maidens in later times after a victory (Judg. v. 1, xi. 34; 1 Sam. xviii. 6; Ps. lxxviii. 11, 25), followed by the whole female population of Israel, also beating their cymbals and striking their guitars (מְהַלְלִים, mistranslated "dances"). It does not appear how far they joined in the whole of the song (Ex. xv. 1-19); but the opening words are repeated again by Miriam herself at the close, in the form of a command to the Hebrew women. "She answered them, saying, Sing ye to JEHOVAH, for He hath triumphed gloriously: the horse and his rider hath He thrown into the sea."

She took the lead, with Aaron, in the complaint against Moses for his marriage with a Cushite. [ZIPPORAH.] "Hath JEHOVAH spoken by Moses? Hath He not also spoken by us?" (Num. xii. 1, 2). The question implies that the prophetic gift was exercised by them; while the answer implies that it was communicated in a less direct form than to Moses. "If there be a prophet among you, I JEHOVAH will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so. . . . With him will I speak mouth to mouth, even apparently, and not in dark speeches" (Num. xii. 6-8). A stern rebuke was administered in front of the sacred Tent to both Aaron and Miriam. But the punishment fell on Miriam, as the chief offender. The hateful Egyptian leprosy, of which for a moment the sign had been seen on the hand of her younger brother, broke out over the whole person of the proud prophetess. How grand was her

position, and how heavy the blow, is implied in the cry of anguish which goes up from both her brothers — "Alas, my lord! . . . Let her not be as one dead, of whom the flesh is half consumed when he cometh out of his mother's womb. . . . Heal her now, O God: I beseech thee." And it is not less evident in the silent grief of the nation: "The people journeyed not till Miriam was brought in again" (Num. xii. 10-15). The same feeling is reflected, though in a strange and distorted form, in the ancient tradition of the drying-up and re-flooding of the marvelous well of the Wanderings. [BEER, vol. i. p. 264 a.]

This stroke, and its removal, which took place at Hazerth, form the last public event of Miriam's life. She died towards the close of the wanderings at Kadesh, and was buried there (Num. xx. 1). Her tomb was shown near Petra in the days of Jerome (*De Loc. Heb.* in voce "*Cades Barnea*"). According to the Jewish tradition (Joseph. *Ant.* iv. 4, § 6), her death took place on the new moon of the month Xanthicus (*i. e.* about the end of February); which seems to imply that the anniversary was still observed in the time of Josephus. The burial, he adds, took place with great pomp on a mountain called Zin (*i. e.* the wilderness of Zin); and the mourning — which lasted, as in the case of her brothers, for thirty days — was closed by the institution of the purification through the sacrifice of the heifer (Num. xix. 1-10), which in the Pentateuch immediately precedes the story of her death.

According to Josephus (*Ant.* iii. 2, § 4, and 6, § 1), she was married to the famous HUR, and, through him, was grandmother of the architect BEZALEEL.

In the Koran (ch. iii.) she is confounded with the Virgin Mary; and hence the Holy Family is called the Family of Amram, or Imran. (See also D'Herbelot, *Bibl. Orient.* "*Zakaria*.") In other Arabic traditions her name is given as *Koltham* (see Weil's *Bibl. Legends*, p. 101).

2. (Both Vat. and Alex. *τον Μερων*; [Rom. *Μαρών*; Comp. *Μαριάμ*:] *Mariam*). A person — whether man or woman does not appear — mentioned in the genealogies of the tribe of Judah and house of Caleb (1 Chr. iv. 17); but in the present state of the Hebrew text it is impossible to say more than that Miriam was sister or brother to the founder of the town of Eshtemoa. Out of the numerous conjectures of critics and translators the following may be noticed: (a) that of the LXX., "and Jether begat M.;" and (b) that of Bertheau (*Chronik*, ad loc.), that Miriam, Shammai, and Ishbah are the children of Mered by his Egyptian wife Bithiah, the daughter of Pharaoh: the last clause of ver. 18 having been erroneously transposed from its proper place in ver. 17. A. P. S.

MIR'MA (מִרְמָה) [*fraud, falsehood*]: *Μαρμά*; [Vat. *Μαμα*:] *Marma*). A Benjamite, "chief of the fathers," son of Shaharaim by his wife Hodesh; born in the land of Moab (1 Chr. viii. 10).

MIRROR. The two words, מִרְיָה, *maráh* (Ex. xxxviii. 8; *κάτοπτρον*, *speculum*), and מִרְיָה, *rèi* (Job xxxvii. 18), are rendered "looking-glass" in the A. V., but from the context evidently denote

a mirror of polished metal. The mirrors of the women of the congregation, according to the former passage, furnished the bronze for the laver of the tabernacle, and in the latter the beauty of the figure is heightened by rendering "Wilt thou beat out with him the clouds, strong as a molten mirror?" ; the word translated "spread out" in the A. V. being that which is properly applied to the hammering of metals into plates, and from which the Hebrew term for "firmament" is derived. [FIRMAMENT.] The metaphor in Deut. xxviii. 23, "Thy heaven that is over thy head shall be brass," derived its force from the same popular belief in the solidity of the sky.

The Hebrew women on coming out of Egypt probably brought with them mirrors like those which were used by the Egyptians, and were made of a mixed metal, chiefly copper, wrought with such admirable skill, says Sir G. Wilkinson (*Anc. Eg.* iii. 384), that they were "susceptible of a lustre, which has even been partially revived at the present day, in some of those discovered at Thebes, though

Egyptian Mirror. (From Mr. Salt's collection.)

buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner. Some presented the figure of a female, a flower, a column, or a rod ornamented with the head of Athor, a bird, or a fancy device; and sometimes the face of a Typhonian monster was introduced to support the mirror, serving as a contrast to the features whose beauty was displayed within it." With regard to the metal of which the ancient mirrors were composed there is not much difference of opinion. Pliny mentions that anciently the best were made at Brundisium of a mixture of copper and tin (xxxiii. 45), or of tin alone (xxxiv. 48). Praxiteles, in the time of Pompey the Great, is said to have been the first who made them of silver, though these were afterwards so common as, in the time of Pliny, to be used by the ladies' maids.<sup>a</sup> They are mentioned by Chrysostom among the extravagances of fashion for which he rebuked the ladies of his time, and Seneca long before was loud in his denunciation of similar follies (*Natur. Quest.* i. 17). Mirrors were

<sup>a</sup> Silver mirrors are alluded to in Plautus (*Mostell.* 4, ver 101) and Philostratus (*Icon.* i. 6); and one

of steel is said to have been found. They were ever made of gold (*Eur. Hec.* 925; *Sen. Nat. Quest.* i. 17).

used by the Roman women in the worship of Juno (Seneca, *Ep.* 95; Apuleius, *Metam.* xi. c. 9, p. 770). In the Egyptian temples, says Cyril of Alexandria (*De ador. in Spir.* ix.; *Opera*, i. p. 314, ed. Paris, 1638), it was the custom for the

women to worship in linen garments, holding a mirror in their left hands and a sistrum in their right, and the Israelites, having fallen into the idolatries of the country, had brought with them the mirrors which they used in their worship<sup>a</sup>

Egyptian Mirrors. 1, 3, 4, from Mr. Salt's collection; 2, from a painting at Thebes; 4 is about 11 inches high.

According to Beckmann (*Hist. of Inv.* ii. 64, Bohn), a mirror which was discovered near Naples was tested, and found to be made of a mixture of copper and regulus of antimony, with a little lead.

Egyptian Mirror. 2 and 3 show the bottom of the handle, to which something has been fastened. (Was in the possession of Dr. Hogg.)

Beckmann's editor (Mr. Francis) gives in a note the result of an analysis of an Etruscan mirror,

which he examined and found to consist of 67.12 copper, 24.93 tin, and 8.13 lead, or nearly 8 parts of copper to 3 of tin and 1 of lead, but neither in this, nor in one analyzed by Klaproth, was there any trace of antimony, which Beckmann asserts was unknown to the ancients. Modern experiments have shown that the mixture of copper and tin produces the best metal for specula (*Phil. Trans.* vol. 67, p. 296). Much curious information will be found in Beckmann upon the various substances employed by the ancients for mirrors but which has no bearing upon the subject of this article. In his opinion it was not till the 13th century that glass, covered at the back with tin or lead, was used for this purpose, the doubtful allusion in Pliny (xxxvi. 66)<sup>b</sup> to the mirrors made in the glass-houses of Sidon having reference to experiments which were unsuccessful. Other allusions to bronze mirrors will be found in a fragment of *Æschylus* preserved in *Stobæus* (*Serm.* xviii. p. 164, ed. Gesner, 1608), and in *Callimachus* (*Hym. in Lav. Pall.* p. 21). Convex mirrors of polished steel are mentioned as common in the East, in a manuscript note of Chardin's upon *Eccles.* xii. 11, quoted by Harmer (*Observ.* vol. iv. c. 11, obs. 55).

The metal of which the mirrors were composed being liable to rust and tarnish, required to be constantly kept bright (*Wisd.* vii. 26; *Eccles.* xii. 11). This was done by means of pounded pumice-stone, rubbed on with a sponge, which was generally suspended from the mirror. The Persians used emery-powder for the same purpose, according to Chardin (quoted by Hartmann, *de Hebr. am Putzische.* ii. 245). The obscure image produced by a tarnished or imperfect mirror [*δι' ἐσθάρτου, ἐν αἰνίγματι*],

<sup>a</sup> Apparently in allusion to this custom Moore (*Epicurean*, c. 5), in describing the maidens who danced at the Island Temple of the Moon, says, "As they passed under the lamp, a gleam of light flashed from their bosoms, which, I could perceive, was the

reflection of a small mirror, that in the manner of the women of the East each of the dancers wore beneath her left shoulder."

<sup>b</sup> "Sidone quondam his officinis nobili: siquidem etiam specula excogitaverat."

appears to be alluded to in 1 Cor. xiii. 12. On the other hand a polished mirror is among the Arabs the emblem of a pure reputation. "More spotless than the mirror of a foreign woman" is with them a proverbial expression, which Meidani explains of a woman who has married out of her country, and polishes her mirror incessantly that no part of her face may escape her observation (De Saey, *Chrest. Arab.* iii. p. 236).

The obscure word גְּלִיּוֹנִים *gilyōnim* (Is. iii. 23), rendered "glasses" in the A. V. after the Vulgate *speculi*, and supported by the Targum, and the commentaries of Kimchi, Abarbanel, and Jarchi, is explained by Schroeder (*de Vest. Mnl. Hebr.* ch. 18) to signify "transparent dresses" of fine linen, as the LXX. (τὰ διαφανῆ Λακωνικά) and even Kimchi in his Lexicon understand it (comp. *multicia*, *Juv. Sat.* ii. 66, 76). In support of this view, it is urged that the terms which follow denote articles of female attire; but in Is. viii. 1, a word closely resembling it is used for a smooth writing tablet, and the rendering of the A. V. is approved by Gesenius (*Jesaja*, i. 215) and the best authorities. W. A. W.

MIS'AEI (Μισαήλ; [Vat. Μεισαήλ:] *Misael*). 1. The same as MISHAEL 2 (1 Esdr. ix. 44; comp. Neh. viii. 4).

2. = MISHAEL 3, the Hebrew name of Meshach (Song of the Three Child. 66).

MIS'GAB (מִשְׁגַּב מִיָּמִינֵי, with the def. article, [the height, refuge:] 'Amūd; [Ald. Μασιγὰθ:] *fortis, sublimis*), a place in Moab named in company with NEBO and KIRIATHAIM in the denunciation of Jeremiah (xlvi. 1). It appears to be mentioned also in Is. xxv. 12,<sup>a</sup> though there rendered in the A. V. "high fort." [MOAB.] In neither passage is there any clew to its situation beyond the fact of its mention with the above two places; and even that is of little avail, as neither of them has been satisfactorily identified.

The name may be derived from a root signifying elevation (Gesenius, *Thes.* 1320), and in that case was probably attached to a town situated on a height. It is possibly identical with MIZREH OF MOAB, named only in 1 Sam. xxii. 3. Fürst (*Handb.* 794 a) understands "the Misgab" to mean the highland country of Moab generally, but its mention in company with other places which we know to have been definite spots, even though not yet identified with certainty, seems to forbid this. G.

MIS'AEI (מִישָׂאֵל) [who (is) what God is]: [Rom.] *Misael* in Ex., [Vat. Alex. omit;] *Misadān*, [Vat. Alex. *Misadai* in Lev.]; *Misuel*, *Misael*. 1. One of the sons of Uzziel, the uncle of Aaron and Moses (Ex. vi. 22). When Nadab and Abihu were struck dead for offering strange fire, Mishael and his brother Elzaphan, at the command of Moses, removed their bodies from the sanctuary, and buried them without the camp, their loose fitting tunics<sup>b</sup> (*cutlōnōth*, A. V. "coats"), the sim-

plest of eastern dresses, serving for winding-sheets (Lev. x. 4, 5). The late Prof. Blunt (*Notes. Coincidences*, pt. i. § xiv.) conjectured that the two brothers were the "men who were defiled by the dead body of a man" (Num. ix. 6), and thus prevented from keeping the second passover.

2. (Μισαήλ; [Vat. F.A.] Alex. *Μεισαήλ: Misael*). One of those who stood at Ezra's left hand on the tower of wood in the street of the water gate, when he read the Law to the people (Neh. viii. 4). Called MISAEI in 1 Esdr. ix. 44.

3. [Vat. (Theol.) *Μεισαήλ*]. One of Daniel's three companions in captivity, and of the blood-royal of Judah (Dan. i. 6, 7, 11, 19, ii. 17). He received the Babylonian title of MESHACH, by which he is better known. In the Song of the Three Children he is called MISAEI.

MISH'AL and MISH'EAL (both מִשְׁעָל [request:] *Μάσα*, Alex. *Μασαψ* [Comp. *Áld. Μασάλ; τῆν Βασελλάν*, Alex. *Μασααλ: Messal, Mis'al*], one of the towns in the territory of Asher (Josh. xix. 26), allotted to the Gershonite Levites (xxi. 30). It occurs between Amad and Carmel, but the former remains unknown, and this catalogue of Asher is so imperfect, that it is impossible to conclude with certainty that Mishal was near Carmel. True, Eusebius (*Onom.* "Masan") says that it was, but he is evidently merely quoting the list of Joshua, and not speaking from actual knowledge. In the catalogue of 1 Chr. vi. it is given as MASHAL, a form which suggests its identity with the MASALOTH of later history; but there is nothing to remark for or against this identification. G.

MISH'AM (מִשְׁעָמ) [purification, beauty, Dietr.]: *Μισαάλ*; [Vat. *Μεσσαμ*:] *Mis'am*). A Benjamite, son of Elpaal, and descendant of Shahrain (1 Chr. viii. 12).

MISH'MA (מִשְׁמָע) [hearing, report]: *Μασμά*: *Misma*).

1. A son of Ishmael and brother of MIBSAM (Gen. xxv. 14; 1 Chr. i. 30). The Masamani of Ptolemy (vi. 7, § 21) may represent the tribe of Mishma; their modern descendants are not known to the writer, but the name (Misma)<sup>c</sup> exists in Arabia, and a tribe is called the Bence-Misma'. In the *Mir-át ez-Zemán* (MS.), Mishma is written Misma'—probably from Rabbinical sources; but it is added "and he is Mesma'ah."<sup>d</sup> The Arabic word has the same signification as the Hebrew.

2. A son of Simeon (1 Chr. iv. 25), brother of MIBSAM. These brothers were perhaps named after the older brothers, Mishma and Mibsam. E. S. P.

MISHMAN'NAH (מִשְׁמַנָּה) [fatness]. *Μασμανά*; [Vat. *Μασεμαννη*]; Alex. *Μασμαν*; F.A. *Μασεμαννη*: *Mismanna*). The fourth of the twelve lion-faced Gadites, men of the host for the battle, who "separated themselves unto David" in the hold of Ziklag (1 Chr. xii. 10).

<sup>a</sup> In this passage it is without the article. As a mere appellative, the word *Misgab* is frequently used in the poetical parts of Scripture, in the sense of a lofty place of refuge. Thus 2 Sam. xxii. 3; Ps. ix. 9, ix. 9; Is. xxxiii. 16; in which and other places it is variously rendered in the A. V. "high tower," "refuge," "defence," etc. See Stanley, *S.* § P. App. § 31.

<sup>b</sup> Their priestly frocks, or cassocks (Ex. xl. 14) which, as Jarchi remarks, were not burned.

<sup>c</sup> مِسْمَع.

<sup>d</sup> مِسْمَاعَة.

\* The A. V. ed. 1611 reads Mishmannah for Mishmannah, in accordance with six MSS. and printed editions noted by Michaelis (*Bibl. Hebr.*). This is also the marginal reading of the Geneva version; the Bishops' Bible has "Masmana." A.

**MISHRAITES, THE** (מִשְׂרָיִם) [as *μηρῆ*, *slippery place*]: Ἡμισαραῖμ [Vat. -ειμ]; Alex. Ἡμισαραειν: *Masraei*, the fourth of the four "families of Kirjath-jearim," i. e. colonies proceeding therefrom and founding towns (1 Chr. ii. 53). Like the other three, Mishra is not elsewhere mentioned, nor does any trace of it appear to have been since discovered. But in its turn it founded — so the passage is doubtless to be understood — the towns of Zorah and Eshtaol, the former of which has been identified in our own times, while the latter is possibly to be found in the same neighborhood. [MAHANKEH-DAN.] G.

\* **MISPAR.** So correctly A. V. ed. 1611 in Ezr. ii. 2, where later editions have MIZPAR. The Hebrew is מִסְפָּר. A.

**MISPERETH** (מִסְפֶּרֶת) [*number*]: Μασφραθ; [Vat. Μασφραν; Alex. Μασφραθ;] FA. Μασφραθ: *Mispherath*. One of those who returned with Zerubbabel and Jeshua from Babylon (Neh. vii. 7). In Ezr. ii. 2 he is called MIZPAR, and in 1 Esdr. v. 8 ASPHARASUS.

**MISREPHOTH-MA'IM** (מִשְׂרֵפֹת מַיִם), and in xiii. 6, מִשְׂרֵפֹת מַיִם [see below]: Μασφραθ, and Μασφραθ Μεμφραμαίμ; Alex. Μασφραθ μαίμ, and Μασφραθ μαίμ: *aque Misrephoth*, a place in northern Palestine, in close connection with Zidon-rabbah, i. e. Sidon. From "the waters of Merom" Joshua chased the Canaanite kings to Zidon and Misrephoth-maim, and then eastward to the "plain of Mizpeh," probably the great plain of Baalbek — the *Bikah* of the Hebrews, the *Buka'a* of the modern Syrians (Josh. xi. 8). The name occurs once again in the enumeration of the districts remaining to be conquered (xiii. 6) — "all the inhabitants of the mountain from Lebanon unto M. Maim," all the Zidonians." Taken as Hebrew, the literal meaning of the name is "burnings of waters," and accordingly it is taken by the old interpreters to mean "warm waters," whether natural, i. e. hot baths or springs — as by Kimchi and the interpolation in the Vulgate; or artificial, i. e. salt, glass, or smelting-works — as by Jarchi, and the others mentioned by Fürst (*Hdwb.* 803 b), Rüdiger (in Gesen. *Thes.* 1341), and Keil (*Josua*, ad loc.).

Lord A. Hervey (*Genealogies*, etc., 228 note) considers the name as conferred in consequence of the "burning" of Jabin's chariots there. But were they burnt at that spot? and, if so, why is the name the "burning of waters?" The probability here, as in so many other cases, is, that a meaning has been forced on a name originally belonging to another language, and therefore unintelligible to the later occupiers of the country.

Dr. Thomson (*Loud and Book*, ch. xv.), reviving the conjecture of himself and Schultz (*Bibl. Sacra*, 1855), treats Misrephoth-maim as identical with a collection of springs called *Ain-Musheirifeh*,

on the sea-shore, close under the *Ras en-Nakhura*, but this has the disadvantage of being very far from Sidon. May it not rather be the place with which we are familiar in the later history as Zarephath? In Hebrew, allowing for a change not infrequent of S to Z (reversed in the form of the name current still later — Sarepta), the two are from roots almost identical, not only in sound, but also in meaning; while the close connection of Zarephath with Zidon — "Zarephath which belongeth to Zidon," — is another point of strong resemblance. G.

**MITE** (λεπτόν), a coin current in Palestine in the time of our Lord. It took its name from a very small Greek copper coin, of which with the Athenians seven went to the χαλκοῦς. It seems in Palestine to have been the smallest piece of money, being the half of the farthing, which was a coin of very low value. The mite is famous from its being mentioned in the account of the poor widow's piety whom Christ saw casting two mites into the treasury (Mark xii. 41-44; Luke xxi. 1-4). From St. Mark's explanation, "two mites, which make a farthing" (λεπτά δύο, ὃ ἐστὶ κοδράντης, ver. 42), it may perhaps be inferred that the κοδράντης, or farthing, was the commoner coin, for it can scarcely be supposed to be there spoken of as a money of account, though this might be the case in another passage (Matt. v. 26). In the Græco-Roman coinage of Palestine, in which we include the money of the Herodian family, the two smallest coins, of which the assarion is the more common, seem to correspond to the farthing and the mite, the larger weighing about twice as much as the smaller. This correspondence is made more probable by the circumstance that the larger seems to be reduced from the earlier "quarter" of the Jewish coinage. It is noticeable, that although the supposed mites struck about the time referred to in the Gospels are rare, those of Alex. Jannæus's coinage are numerous, whose abundant money must have long continued in use. [MONEY; FARTHING.] R. S. P.

**MITH'CAH** (מִתְקָה) [*sweetness*]: Μαθηκά; [Vat. Ματεκκά;] *Methca*, the name of an unknown desert encampment of the Israelites, meaning, perhaps, "place of sweetness"<sup>b</sup> (Num. xxxiii. 28, 29). H. H.

**MITH'NITE, THE** (מִתְנִי) [*appel. extension*]: ὁ Βαθβαεὶ; Alex. ο Μαθθανι; [Vat. ο Βαθβαεὶ; FA ο Βεβαεὶ;] *Mathanites*, the designation of JOSHAPHAT, one of David's guard in the catalogue of 1 Chr. xi. (ver. 43). No doubt it signifies the native of a place or a tribe bearing the name of Methen; but no trace exists in the Bible of any such. It should be noticed that Josphat is both preceded and followed by a man from beyond Jordan, but it would not be safe to infer therefrom that Methen was also in that region. G.

**MITHREDATH** (מִתְרַדָּת) [see below]. Μιθραδᾶτης; [Alex. Vat.2 Μιθριδατης;] *Mithridates*. 1. The treasurer (גִּזְבָּר, *gizbar*) of Cyrus king of Persia, to whom the king gave the vessels of the Temple, to be by him transferred to

<sup>a</sup> The "and" here inserted in the A. V. is quite gratuitous.

<sup>b</sup> Derived from מִתְקָה, "sweetness," with the suffix

ן of locality, which (or its plur. רָן) is often found in names.

the hands of Sheshbazzar (Ezr. i. 8). The LXX. take *gizbār* as a gentile name, Γασβαρνης, the Vulgate as a patronymic, *filiius gazarior*, but there is little doubt as to its meaning. The word occurs in a slightly different form in Dan. iii. 2, 3, and is there rendered "treasurer;" and in the parallel history of 1 Esdr. ii. 11, Mithredath is called MITHRIDATES the treasurer (γαροφύλαξ). The name Mithredath, "given by Mithra," is one of a class of compounds of frequent occurrence, formed from the name of Mithra, the Iranian sun-god.

2. A Persian officer stationed at Samaria, in the reign of Artaxerxes, or Smerdis the Magian (Ezr. iv. 7). He joined with his colleagues in prevailing upon the king to hinder the rebuilding of the Temple. In 1 Esdr. ii. 16 he is called MITHRIDATES.

MITHRIDATES ([given by Mithra]: Μιθριδάτης; [Val.] Alex. Μιθριδάτης: *Mithridatus*).

1. (1 Esdr. ii. 11) = MITHREDATH 1.
2. (1 Esdr. ii. 16) = MITHREDATH 2.

MITRE. [Crown; HEAD-DRESS.]

MITYLENE (Μιτυλήνη, in classical authors and on inscriptions frequently Μυτιλήνη; [*Mitylene*, Cod. Amiat. *Mitylene*]), the chief town of Lesbos, and situated on the east coast of the island. Its position is very accurately, though incidentally, marked (Acts xx. 14, 15) in the account of St. Paul's return-voyage from his third apostolical journey. Mitylene is the intermediate place where he stopped for the night between Assos and CHIOS. It may be gathered from the circumstances of this voyage that the wind was blowing from the N. W.; and it is worth while to notice that in the harbor or in the roadstead of Mitylene the ship would be sheltered from that wind. Moreover it appears that St. Paul was there at the time of dark moon: and this was a sufficient reason for passing the night there before going through the intricate passages to the southward. See *Life and Epistles of St. Paul*, ch. xx., where a view of the place is given, showing the fine forms of the mountains behind. The town itself was celebrated in Roman times for the beauty of its buildings ("Mitylene pulchra," Hor. *Epist.* I. xi. 17; see Cic. *c. Rull.* ii. 16). In St. Paul's day it had the privileges of a free city (Plin. *N. H.* v. 39). It is one of the few cities of the Ægean which have continued without intermission to flourish till the present day. It has given its name to the whole island, and is itself now called sometimes *Castro*, sometimes *Mitylen*. Tournefort gives a rude picture of the place as it appeared in 1700 (*Voyage du Levant*, i. 148, 149). It is more to our purpose to refer to our own Admiralty charts, Nos. 1665 and 1654. Mitylene concentrates in itself the chief interest of Lesbos, an island peculiarly famous in the history of poetry, and especially of poetry in connection with music. But for these points we must refer to the articles in the *Dict. of Geography*. J. S. H.

MIXED MULTITUDE. With the Israelites who journeyed from Rameses to Succoth, the first stage of the Exodus from Egypt, there went up (Ex. xii. 38) "a mixed multitude" (עֲרַבִּים: ἐπιμικτος: *vulgus promiscuum*), who have not hitherto been identified. In the Targum the phrase is vaguely rendered "many foreigners," and Jarchi explains it as "a medley of outlandish people." Aben Ezra goes further and says it signifies "the Egyptians who were mixed with them, and they

are the 'mixed multitude' (עֲרַבִּים, Num. xi. 4), who were gathered to them." Jarchi on the latter passage also identifies the "mixed multitude" of Num. and Exodus. During their residence in Egypt marriages were naturally contracted between the Israelites and the natives, and the son of such a marriage between an Israelitish woman and an Egyptian is especially mentioned as being stoned for blasphemy (Lev. xxiv. 11), the same law holding good for the resident or naturalized foreigner as for the native Israelite (Josh. vii. 35). This hybrid race is evidently alluded to by Jarchi and Aben Ezra, and is most probably that to which reference is made in Exodus. Knobel understands by the "mixed multitude" the remains of the Hyksos who left Egypt with the Hebrews. Dr. Kalisch (*Comm. on Ex.* xii. 38) interprets it of the native Egyptians who were involved in the same oppression with the Hebrews by the new dynasty, which invaded and subdued Lower Egypt; and Kurtz (*Hist. of Old Cov.* ii. 312, Eng. tr.), while he supposes the "mixed multitude" to have been Egyptians of the lower classes, attributes their emigration to their having "endured the same oppression as the Israelites from the proud spirit of caste which prevailed in Egypt," in consequence of which they attached themselves to the Hebrews, "and served henceforth as hewers of wood and drawers of water." That the "mixed multitude" is a general term including all those who were not of pure Israelite blood is evident; more than this cannot be positively asserted. In Exodus and Numbers it probably denoted the miscellaneous hangers-on of the Hebrew camp, whether they were the issue of spurious marriages with Egyptians, or were themselves Egyptians or belonging to other nations. The same happened on the return from Babylon, and in Neh. xiii. 3, a slight clew is given by which the meaning of the "mixed multitude" may be more definitely ascertained. Upon reading in the Law "that the Ammonite and the Moabite should not come into the congregation of God for ever," it is said, "they separated from Israel all the mixed multitude." The remainder of the chapter relates the expulsion of Tobiah the Ammonite from the Temple, of the merchants and men of Tyre from the city, and of the foreign wives of Ashdod, of Ammon, and of Moab, with whom the Jews had intermarried. All of these were included in the "mixed multitude," and Nehemiah adds, "thus cleansed I them from all foreigners." The Targ. Jon. on Num. xi. 4, explains the "mixed multitude" as proselytes, and this view is apparently adopted by Ewald, but there does not seem any foundation for it. W. A. W.

MIZAR, THE HILL (הַר מִצְרַיִם)  
[*mountain small*]: ὄρος [μικρός, Val.] μικροσ: *mons modicus*), a mountain — for the reader will observe that the word is *har* in the original (see vol. ii. p. 1077 a) — apparently in the northern part of trans-Jordanic Palestine, from which the author of Psalm xlii. utters his pathetic appeal (ver. 6). The name appears nowhere else, and the only clew we have to its situation is the mention of the "land of Jordan" and the "Hermions," combined with the general impression conveyed by the Psalm that it is the cry of an exile "from Je-

a In the Peshito-Syriac it bears the title, "The Psalm which David sang when he was in exile, and longing to return to Jerusalem."

usalem, possibly on his road to Babylon (Ewald, *Dichter*, ii. 185). If taken as Hebrew, the word is derivable from a root signifying smallness — the same by which Zoar is explained in Gen. xix. 20-22. This is adopted by all the ancient versions, and in the Prayer-Book Psalms of the Church of England appears in the inaccurate form of "the little hill of Hermon."

G.

**MIZPAH and MIZPEH.** The name borne by several places in ancient Palestine. Although in the A. V. most frequently presented as **MIZPEH**, yet in the original, with but few exceptions, the name is Mizpah, and with equally few exceptions is accompanied with the definite article — **הַמִּצְפָּה**, *ham-Mizpah*, [i. e. *the watch tower*].

1. **MIZPAH** (**הַמִּצְפָּה**); Samar. **הַמִּצְפָּה**, i. e. the pillar: *ῆ ὄρασις*; Veneto-Gk. *δ ἄρεσιμύς*; Vulg. omits). The earliest of all, in order of the narrative, is the heap of stones piled up by Jacob and Laban (Gen. xxxi. 48) on Mount Gilead (ver. 25), to serve both as a witness to the covenant then entered into, and also as a landmark of the boundary between them (ver. 52). This heap received a name from each of the two chief actors in the transaction — **GALEED** and **JEGAR SAHADUTHA**. But it had also a third, namely, **MIZPAH**, which it seems from the terms of the narrative to have derived from neither party, but to have possessed already; which third name, in the address of Laban to Jacob, is seized and played upon after the manner of these ancient people: "Therefore he called the name of it Galeed, and the Mizpah; for he said, Jehovah watch (*itzeph*, **יִצְפֶּה**) between me and thee," etc. It is remarkable that this Hebrew paronomasia is put into the mouth, not of Jacob the Hebrew, but of Laban the Syrian, the difference in whose language is just before marked by "*Jegar-Sahadutha*." Various attempts<sup>b</sup> have been made to reconcile this; but, whatever may be the result, we may rest satisfied that in Mizpah we possess a Hebraized form of the original name, whatever that may have been, bearing somewhat the same relation to it that the Arabic *Beit-ur* bears to the Hebrew Beth-horon, or — as we may afterwards see reason to suspect — as *Sifteh* and *Shifut* bear to ancient Mizpehs on the western side of Jordan. In its Hebraized form the word is derived from the root *tsapháh*, **צָפַח**, "to look out" (Gesen. *Lexicon*, ed. Robinson, s. v. **צָפַח**) and signifies a watch-tower. The root has also the signification of breadth — expansion. But that the original name had the same signification as it possesses in its Hebrew form is, to say the least, unlikely; because in such linguistic changes the meaning always appears to be secondary to the likeness in sound.

Of this early name, whatever it may have been, we find other traces on both sides of Jordan, not only in the various Mizpahs, but in such names as Zophim, which we know formed part of the lofty Pisgah; Zaphon, a town of Moab (Josh. xiii. 27); Zuph and Ramathaim-Zophim, in the neighborhood of Mizpeh of Benjamin; Zephathah in the

neighborhood of Mizpeh of Judah; possibly also in *Sufed*, the well-known city of Galilee.

But, however this may be, the name remained attached to the ancient meeting-place of Jacob and Laban, and the spot where their conference had been held became a sanctuary of Jehovah, and a place for solemn conclave and deliberation in times of difficulty long after. On this natural "watch-tower" (LXX. *σκοπιδ* [Alex. Ald. *Μασσηφδ*]), when the last touch had been put to their "misery" by the threatened attack of the Bene-Ammon, did the children of Israel assemble for the choice of a leader (Judg. x. 17, comp. ver. 16); and when the outlawed Jephthah had been prevailed on to leave his exile and take the head of his people, his first act was to go to "the Mizpah," and on that consecrated ground utter all his words "before Jehovah." It was doubtless from Mizpah that he made his appeal to the king of the Ammonites (xi. 12), and invited, though fruitlessly, the aid of his kinsmen of Ephraim on the other side of Jordan (xii. 2). At Mizpah he seems to have henceforward resided; there the fatal meeting took place with his daughter on his return from the war (xi. 34), and we can hardly doubt that on the altar of that sanctuary the father's terrible vow was consummated. The topographical notices of Jephthah's course in his attack and pursuit (ver. 29) are extremely difficult to unravel; but it seems most probable that the "Mizpeh-Gilead" which is mentioned here, and here only, is the same as the ham-Mizpah of the other parts of the narrative; and both, as we shall see afterwards, are probably identical with the **RAMATH-MIZPEH** and **RAMOTH-GILEAD**, so famous in the later history.

It is still more difficult to determine whether this was not also the place at which the great assembly of the people was held to decide on the measures to be taken against Gibeah after the outrage on the Levite and his concubine (Judg. xx. 1, 3, xxi. 1, 5, 8). No doubt there seems a certain violence in removing the scene of any part of so local a story to so great a distance as the other side of Jordan. But, on the other hand, are the limits of the story so circumscribed? The event is represented as one affecting not a part only, but the whole of the nation, east of Jordan as well as west — "from Dan to Beer-sheba, and the land of Gilead" (xx. 1). The only part of the nation excluded from the assembly was the tribe of Benjamin, and that no communication on the subject was held with them, is implied in the statement that they only "heard" of its taking place (xx. 3); an expression which would be meaningless if the place of assembly were — as Mizpah of Benjamin was — within a mile or two of Gibeah, in the very heart of their own territory, though perfectly natural if it were at a distance from them. And had there not been some reason in the circumstances of the case, combined possibly with some special claim in Mizpah — and that claim doubtless its ancient sanctity and the reputation which Jephthah's success had conferred upon it — why was not either Bethel, where the ark was deposited (xx. 26, 27), or Shiloh,

only; 4. In every other case the Hebrew text presents the name as ham-Mizpah.

<sup>a</sup> These exceptions may be collected here with contents: 1. Mizpeh, without the article, is found in the Hebrew in Josh. xi. 8, Judg. xi. 29, and 1 Sam. xiii. 3 only; 2. Mizpah without the article in Hos. v. 1, 2 only; 3. Mizpeh with the article in Josh. xv. 88

<sup>b</sup> See Ewald, *Komposition der Genesis*. Thus in the LXX. and Vulg. versions of ver. 49, the word *Mizpeh* is not treated as a proper name at all; and a different turn is given to the verse.

chosen for the purpose? Suppose a Mizpah near Gibeah, and the subject is full of difficulty: remove it to the place of Jacob and Laban's meeting, and the difficulties disappear; and the allusions to Gilead (xx. 1), to Jahesh-Gilead (xxi. 8, &c.), and to Shiloh, as "in the land of Canaan," all fall naturally into their places and acquire a proper force.

Mizpah is probably the same as RAMATH-MIZPEH (רַמַּת מִצְפֶּה), mentioned Josh. xiii. 26 only. The prefix merely signifies that the spot was an elevated one, which we already believe it to have been; and if the two are not identical, then we have the anomaly of an enumeration of the chief places of Gilead with the omission of its most famous sanctuary. Ramath ham-Mizpeh was most probably identical also with Ramoth-Gilead; but this is a point which will be most advantageously discussed under the latter head.

Mizpah still retained its name in the days of the Maccabees, by whom it was besieged and taken with the other cities of Gilead (1 Macc. v. 35). From Eusebius and Jerome (*Onomasticon*, "Maspha") it receives a bare mention. It is probable, both from their notices (*Onomasticon*, "Rammoth") and from other considerations, that Ramoth-Gilead is the modern *es-Salt*; but it is not ascertained whether Mizpah is not rather the great mountain *Jebel Osha*, a short distance to the northwest. The name *Safut* appears in Van de Velde's map a few miles east of *es-Salt*.

A singular reference to Mizpah is found in the title of Ps. lx., as given in the Targum, which runs as follows: "For the ancient testimony of the sons of Jacob and Laban . . . when David assembled his army and passed over the heap<sup>a</sup> of witness."

2. A second Mizpeh, on the east of Jordan, was the MIZPEH-MOAB (מִצְפֶּה מוֹאָב): *Μασσηφάθ* [Vat. -φα, Alex. *Μασσηφα*] τῆς Μωάβ: *Maspha quæ est Moab*, where the king of that nation was living when David committed his parents to his care (1 Sam. xxii. 3). The name does not occur again, nor is there any clue to the situation of the place. It may have been, as is commonly conjectured, the elevated and strong natural fortress afterwards known as *KIR-MOAB*, the modern *Kerak*. But is it not at least equally possible that it was the great Mount Pisgah, which was the most commanding eminence in the whole of Moab, which contained the sanctuary of Nebo, and of which one part was actually called Zophim (Num. xxiii. 14), a name derived from the same root with Mizpeh?

3. A third was THE LAND OF MIZPEH, or more accurately "OF MIZPAH" (אֶרֶץ מִצְפֶּה): *γῆν Μασσῦμα*; [Comp. Ald. *γῆν Μασσηφά*: Vat. *την Μασευμα*: Alex. *την Μασσηφάθ*:<sup>b</sup> *terra Maspha*], the residence of the Hivites who joined the northern confederacy against Israel, headed by Jabin king of Hazor (Josh. xi. 3). No other mention is found of this district in the Bible, unless it be identical with

4. THE VALLEY OF MIZPEH (עֵמֶק מִצְפֶּה):

<sup>a</sup> The word here used — אִבְרָהָם — exhibits the transition from the "Jegar" of the ancient Aramaic of Laban to the *Hajar* of the modern Arabs — the word by which they designate the heaps which it is their custom, as it was Laban's, to erect as landmarks of a boundary.  
<sup>b</sup> Here the LXX. (ed. Mai) omit "Hivites," and

τῶν πεδίων Μασσῶχ [Alex. Ald. *Μασσηφά*]: *campus Misphe*), to which the discomfited hosts of the same confederacy were chased by Joshua (xi. 8). It lay eastward from MISREPHOTH-MAIM; but this affords us no assistance, as the situation of the latter place is by no means certain. If we may rely on the peculiar term here rendered "valley" — a term applied elsewhere in the records of Joshua only to the "valley of Lebanon," which is also said to have been "under Mount Hermon," and which contained the sanctuary of Baal-gad (Josh. xi. 17, xii. 7) — then we may accept the "land of Mizpah" or "the valley of Mizpeh" as identical with that enormous tract, the great country of Cœle-Syria, the *Buk'ra* alike of the modern Arabs and of the ancient Hebrews (comp. Am. i. 5), which contains the great sanctuary of Baal-bek, and may be truly said to lie at the feet of Hermon (see Stanley, S. § P. p. 392 note). But this must not be taken for more than a probable inference, and it should not be overlooked that the name Mizpeh is here connected with a "valley" or "plain" — not, as in the other cases, with an eminence. Still the valley may have derived its appellation from an eminence of sanctity or reputedly situated therein; and it may be remarked that a name not impossibly derived from Mizpeh — *Haush Tell-Safiyeh* — is now attached to a hill a short distance north of Baalbek.

5. MIZPEH (מִצְפֶּה): *Μασφά*: *Masepha*), a city of Judah (Josh. xv. 38); in the district of the *Shefelah* or maritime lowland; a member of the same group with Dilean, Lachish, and Eglon, and apparently in their neighborhood. Van de Velde (*Memoir*, p. 335) suggests its identity with the present *Tell es-Sâfiyeh* — the Blanchegarde of the Crusaders; a conjecture which appears very feasible on the ground both of situation and of the likeness between the two names, which are nearly identical — certainly a more probable identification than those proposed with GATH and LIBNAH. *Tina*, which is not improbably Dilean, is about 3 miles N. W., and *Ajlan* and *um Lakis*, respectively 10 and 12 to the S. W. of *Tell es-Sâfiyeh*, which itself stands on the slopes of the mountains of Judah, completely overlooking the maritime plain (Porter, *Handbk.* p. 252). It is remarkable too that, just as in the neighborhood of other Mizpahs we find Zophim, Zuph, or Zapton, so in the neighborhood of Tell es-Sâfiyeh it is very probable that the valley of ZEPHATHAH was situated. (See *Rob. Bibl. Res.* ii. 31.)

6. MIZPEH, in Josh. and Samuel; elsewhere MIZPAH (מִצְפָּה) in Joshua; elsewhere מִצְפֶּה: *Μασσηφάθ*; in Josh. *Μασσημά* [Alex. *Μασφα*]; Chron. and Neh. *ἡ Μασφά*, and *δ Μασφέ*; Kings and Hos. in both MSS. *ἡ σκομιά*; Alex. *Μασσηφα*, [there are other variations not worth noting; *Mesphe*, *Maspha*, *Mispath*], a "city" of Benjamin, named in the list of the allotment between Beeroth and Chephirah, and in apparent proximity to Ramah and Gibeon (Josh. xviii. 26). Its connection with the two last-named towns is also

perhaps read "Hermon" (הַר מְרֹמֵי), as "Arabah" (עַרְבָּר) — the two words are more alike to the east than the eye — and thus give the sentence, "they under the desert in the Maseuna." A somewhat similar substitution is found in the LXX version of Gen xxxv. 27.

implied in the later history (1 K. xv. 22; 2 Chr. xvi. 6; Neh. iii. 7). It was one of the places fortified by Asa against the incursions of the kings of the northern Israel (1 K. xv. 22; 2 Chr. xvi. 6; Jer. xli. 10); and after the destruction of Jerusalem it became the residence of the superintendent appointed by the king of Babylon (Jer. xl. 7, &c.), and the scene of his murder and of the romantic incidents connected with the name of Ishmael the son of Nethaniah.

But Mizpah was more than this. In the earlier periods of the history of Israel, at the first foundation of the monarchy, it was the great sanctuary of Jehovah, the special resort of the people in times of difficulty and solemn deliberation. In the Jewish traditions it was for some time the residence of the ark (see Jerome, *Qu. Hebr.* on 1 Sam. vii. 2; Reland, *Antiq.* i. § 6);<sup>a</sup> but this is possibly an inference from the expression "before Jehovah" in Judg. xx. 1. It is suddenly brought before us in the history. At Mizpah, when suffering the very extremities of Philistine bondage, the nation assembled at the call of the great Prophet, and with strange and significant rites confessed their sins, and were blessed with instant and signal deliverance (1 Sam. vii. 5-13). At Mizpah took place no less an act than the public selection and appointment of Saul as the first king of the nation (1 Sam. x. 17-25). It was one of the three holy cities (l. XX. τοῖς ἁγιασμένοις ταύτοις) which Samuel visited in turn as judge of the people (vii. 6, 16), the other two being Bethel and Gilgal. But, unlike Bethel and Gilgal, no record is preserved of the cause or origin of a sanctity so abruptly announced, and yet so fully asserted. We have seen that there is at least some ground for believing that the Mizpah spoken of in the transactions of the early part of the period of the judges, was the ancient sanctuary in the mountains of Gilead. There is, however, no reason for, or rather every reason against, such a supposition, as applied to the events last alluded to. In the interval between the destruction of Gibeah and the rule of Samuel, a very long period had elapsed, during which the ravages of Ammonites, Amalekites, Moabites, and Midianites (Judg. iii. 13, 14, vi. 1, 4, 33, x. 9) in the districts beyond Jordan, in the Jordan Valley itself at both its northern and southern ends — at Jericho no less than Jezreel — and along the passes of communication between the Jordan Valley and the western table-land, must have rendered communication between west and east almost, if not quite, impossible. Is it possible that as the old Mizpah became inaccessible, an eminence nearer at hand was chosen and invested with the sanctity of the original spot and used for the same purposes? Even if the name did not previously exist there in the exact shape of Mizpah, it may easily have existed in some shape sufficiently near to allow of its formation by a process both natural and frequent in Oriental speech. To a Hebrew it would require a very slight inflection to change Zophim or Zuph — both of which names were attached to places in the tribe of Benjamin — to Mizpah. This, however, must not be taken for more than a mere hypothesis. And against it

there is the serious objection that if it had been necessary to select a holy place in the territory of Ephraim or Benjamin, it would seem more natural that the choice should have fallen on Shiloh, or Bethel, than on one which had no previous claim but that of its name.

With the conquest of Jerusalem and the establishment there of the Ark, the sanctity of Mizpah, or at least its reputation, seems to have declined. The "men of Mizpah" (Neh. iii. 7), and the "ruler of Mizpah," and also of "part of Mizpah" (19 and 15) — assisted in the rebuilding of the wall of Jerusalem. The latter expressions perhaps point to a distinction between the sacred and the secular parts of the town. The allusion in ver. 7 to the "throne of the governor on this side the river" in connection with Mizpah is curious, and recalls the fact that Gedaliah, who was left in charge of Palestine by Nebuchadnezzar, had his abode there. But we hear of no religious act in connection with it till that affecting assembly called together thither, as to the ancient sanctuary of their forefathers, by Judas Maccabeus, "when the Israelites assembled themselves together and came to Masepha over against Jerusalem; for in Masepha was there aforesaid a place of prayer (τόπος προσευχῆς) for Israel" (1 Macc. iii. 46). The expression "over against" (κατέναντι), no less than the circumstances of the story, seems to require that from Mizpah the City or the Temple was visible: an indication of some importance, since, scanty as it is, it is the only information given us in the Bible as to the situation of the place. Josephus omits all mention of the circumstance, but on another occasion he names the place so as fully to corroborate the inference. It is in his account of the visit of Alexander the Great to Jerusalem (*Ant.* xi. 8, § 5), where he relates that Jaddua the high-priest went to meet the king "to a certain place called Sapha (Σαφά); which name, if interpreted in the Greek tongue, signifies a look-out place (σκοπήν), for from thence both Jerusalem and the sanctuary are visible." Sapha is doubtless a corruption of the old name Mizpah through its Greek form Maspha; and there can be no reasonable doubt that this is also the spot which Josephus on other occasions — adopting as he often does the Greek equivalent of the Hebrew name as if it were the original (witness the ἄνω ἀγορά, Ἄκρα, ἡ τῶν Τυροπολιῶν φάραγξ, etc.) — mentions as "appropriately named Scopus" (Σκοπός), because from it a clear view was obtained both of the city and of the great size of the Temple (*B. J.* v. 2, § 3). The position of this he gives minutely, at least twice (*B. J.* ii. 19, § 4, and v. 2, § 3), as on the north quarter of the city, and about 7 stadia therefrom; that is to say, as is now generally agreed, the broad ridge which forms the continuation of the Mount of Olives to the north and east, from which the traveller gains, like Titus, his first view, and takes his last farewell, of the domes, walls, and towers of the Holy City.

Any one who will look at one of the numerous photographs of Jerusalem taken from this point, will satisfy himself of the excellent view of both city and temple which it commands; and it is the

<sup>a</sup> Rabbi Schwarz (127 note) very ingeniously finds a reference to Mizpah in 1 Sam. iv. 13; where he would point the word מִצְפָּה (A. V. "watching") as מִצְפָּה, and thus read "by the road to Mizpah."

<sup>b</sup> The word used by Josephus in speaking of it (*B. J.* v. 2, § 3) is χαμαλός; and it will be observed that the root of the word Mizpah has the force of *breas* as well as of elevation. See above.

only spot from which such a view is possible, which could answer the condition of the situation of Mizpah. *Neby Samuil*, for which Dr. Robinson argues (*B. R. i.* 460), is at least five miles, as the crow flies, from Jerusalem; and although from that lofty station the domes of the "Church of the Sepulchre," and even that of the Sakrah can be discerned, the distance is too great to allow us to accept it as a spot "over against Jerusalem," or from which either city or temple could with satisfaction be inspected.<sup>a</sup> Nor is the moderate height of Scopus, as compared with *Neby Samuil*, any argument against it, for we do not know how far the height of a "high place" contributed to its sanctity, or indeed what that sanctity exactly consisted in.<sup>b</sup> On the other hand, some corroboration is afforded to the identification of Scopus with Mizpah, in the fact that Mizpah is twice rendered by the LXX. *σκοπίδ*.

Titus's approach through the villages of ancient Benjamin was, as far as we can judge, a close parallel to that of an earlier enemy of Jerusalem — Sennacherib. In his case, indeed, there is no mention of Mizpah. It was at Nob that the Assyrian king remained for a day feasting his eyes on "the house of Zion and the hill of Jerusalem," and menacing with "his hand" the fair booty before him. But so exact is the correspondence, that it is difficult not to suspect that Nob and Mizpah must have been identical, since that part of the rising ground north of Jerusalem which is crossed by the northern road is the only spot from which a view of both city and temple at once can be obtained, without making a long détour by way of the Mount of Olives. This, however, will be best discussed under Nob. Assuming that the hill in question is the Scopus of Josephus, and that that again was the Mizpah of the Hebrews, the *σκοπίδ* (*σκοπίδ*) and *Massepath* of the LXX. translators, it is certainly startling to find a village named *Sháfüt* lying on the north slope of the mountain a very short distance below the summit — if summit it can be called — from which the view of Jerusalem, and of Zion (now occupied by the Sakrah), is obtained. Can *Sháfüt*, or *Sáfüt*, be, as there is good reason to believe in the case of *Tell es-Sáfieh*, the remains of the ancient Semitic name? Our knowledge of the topography of the Holy Land, even of the city and environs of Jerusalem, is so very imperfect, that the above can only be taken as suggestions which may be not unworthy the notice of future explorers in their investigations.

Professor Stanley appears to have been the first to suggest the identity of Scopus with Mizpah (*S. & P.* 1st edit. 222). But since writing the above, the writer has become aware that the same view is taken by Dr. Bonar in his *Land of Promise* (Appendix, § viii.). This traveller has investigated

the subject with great ability and clearness; and he points out one circumstance in favor of Scopus being Mizpah, and against *Neby Samuil*, which had escaped the writer, namely, that the former lay directly in the road of the pilgrims from Samaria to Jerusalem who were murdered by Ishmael (*Jer. xli. 7*), while the latter is altogether away from it. Possibly the statement of Josephus (see vol. ii. p. 1173 a) that it was at Hebron, not Gibeon, that Ishmael was overtaken, coupled with Dr. B.'s own statement as to the pre-occupation of the districts east of Jerusalem — may remove the only scruple which he appears to entertain to the identification of Scopus with Mizpah. G.

MIZ'PAR (מִצְפָּר [number]: *Μαζφάρ*; [Vat. *Μαλαραρ*]: *Mesphar*). Properly MISPAR, as in the A. V. of 1611 and the Geneva version; the same as MISPERETH (*Ezr. ii. 2*).

MIZ'PEH. [MIZPAH.]

MIZRA'IM (מִצְרַיִם [see below]: *Μεσραιμ*: *Mesraim*), the usual name of Egypt in the O. T., the dual of Mazar, מִצְוֹר, which is less frequently employed: gent. noun, מִצְרַיִם.

If the etymology of Mazar be sought in Hebrew it might signify a "mound," "bulwark," or "citadel," or again "distress;" but no one of these meanings is apposite. We prefer, with Gesenius (*Thes. s. v. מִצְוֹר*), to look to the Arabic, and we extract the article on the corresponding word

from the *Kámoos*, "مَصْر", a partition between

two things, as also مَاصِر: a limit between two

lands: a receptacle: a city or a province [the explanation means both]: and red earth or mud. The well-known city [Memphis]." Gesenius accepts the meaning "limit" or the like, but it is hard to see its fitness with the Shemites, who had no idea that the Nile or Egypt was on the border of two continents, unless it be supposed to denote the divided land. We believe that the last meaning but one, "red earth or mud," is the true one, from its correspondence to the Egyptian name of the country, KEM, which signifies "black," and was given to it for the blackness of its alluvial soil. It must be recollected that the term "red"

احمر) is not used in the *Kámoos*, or indeed in

Semitic phraseology, in the limited sense to which Indo-European ideas have accustomed us; it embraces a wide range of tints, from what we call red

<sup>a</sup> \* Dr. Valentiner, for several years a missionary at Jerusalem, and familiar with the topography of the region, agrees with Dr. Robinson that *Neby Samuil* is the ancient Mizpah. See *Zeitschr. der deutsch. M. Gesellsch.* xii. 164. Van de Velde thinks this to be the right opinion (*Syr. and Pal.* ii. 53). This *Neby Samuil*'s so marked a feature of the landscape, that it may very justly be said to "confront" (κατέναντι, see above) he observer as he looks towards it from Jerusalem. The impression in such a case depends less on the distance than on the position and conspicuousness of the object. See wood-cut, vol. i. p. 917. H.

<sup>b</sup> In the East, at the present time, a sanctity is

attached to the spot from which any holy place is visible. Such spots may be met with all through the hills a few miles north of Jerusalem, distinguished by the little heaps of stones erected by thoughtful or pious Mussulmans. (See Miss Beaufort's *Egypt. Sepulchres*, etc. ii. 88.)

<sup>c</sup> This is the spelling given by Van de Velde in his map. Robinson gives it as *Sháfüt* (i. e. with the *Ain*), and P<sup>r</sup>. Eli Smith, in the Arabic lists attached to Robinson's 1st edition (iii. App. 121), *Sáfüt*.

<sup>d</sup> It occurs only 2 K. xix. 24; Is. xix. 6. xxxvii 25; Mic. vii. 12.

to a reddish brown. So, in like manner, in Egyptian the word "black" signifies dark in an equally wide sense. We have already shown that the Hebrew word Ham, the name of the ancestor of the Egyptians, is evidently the same as the native appellation of the country, the former signifying "warm" or "hot," and a cognate Arabic word,

حم, meaning "black fetid mud" (*Kamoo*s), or "black mud" (*Sihah*, MS.), and suggested that Ham and Mazar may be identical with the Egyptian KEM (or KHEM), which is virtually the same in both sound and sense as the former, and of the same sense as the latter. [EGYPT; HAM.] How then are we to explain this double naming of the country? A recent discovery throws light upon the question. We had already some reason for conjecturing that there were Semitic equivalents, with the same sense, for some of the Egyptian geographical names with which the Shemites were well acquainted. M. de Rougé has ascertained that Zoan is the famous Shepherd-stronghold Avaris, and that the Hebrew name  $\text{זֶוָן}$ , from  $\text{זָוַן}$ , "he moved tents, went forward," is equivalent to the Egyptian one HA-WAR, "the place of departure" (*Revue Archéologique*, 1861, p. 250). This discovery, it should be noticed, gives remarkable significance to the passage, "Now Hebron was built seven years before Zoan in Egypt" (Num. xiii. 22). Perhaps a similar case may be found in Kush and Phut, both of which occur in Egyptian as well as Hebrew. In the Bible, African Cush is Ethiopia above Egypt, and Phut, an African people or land connected with Egypt. In the Egyptian inscriptions, the same Ethiopia is KEESH, and an Ethiopian people is called ANU-PET-MERU, "the Anu of the island of the bow," probably Meroë, where the Nile makes an extraordinary bend in its course. We have no Egyptian or Hebrew etymology for KEESH, or Cush, unless we may compare  $\text{שֶׁרֶף}$ , which would give the same connection with bow that we find in Phut or PET, for which our only derivation is from the Egyptian PET, "a bow." There need be no difficulty in thus supposing that Mizraim is merely the name of a country, and that Ham and Mazar may have been the same person, for the very form of Mizraim forbids any but the former idea, and the tenth chapter of Genesis is obviously not altogether a genealogical list. Egyptian etymologies have been sought in vain for Mizraim;  $\text{μετορρο}$ , "kingdom" (Gesen.

*Thes. s. v.*  $\text{מִצְרַיִם}$ ), is not an ancient form, and the old name, TO-MAR (Brugsch, *Geog. Inschr.* pl. x. nos. 367-370, p. 74), suggested as the source of Mizraim by Dr. Hincks, is too different to be accepted as a derivation.

MIZRAIM first occurs in the account of the Hamites in Gen. x., where we read, "And the sons of Ham; Cush, and Mizraim, and Phut, and Canaan" (ver. 6; comp. 1 Chr. i. 8.). Here we have conjectured that instead of the dual, the original text had the gentile noun in the plural (suggesting  $\text{בְּנֵי מִצְרַיִם}$  instead of the present  $\text{בְּנֵי מִצְרַיִם}$ ), since it seems strange that a dual form should occur in the first generation after Ham, and since the plural of the gentile noun would be consistent with the plural forms of the names of the Mizraite nations or tribes afterwards enumerated, as well as with

the like singular forms of the names of the Canaanites, excepting Sidon. [HAM.]

If the names be in an order of seniority, whether as indicating children of Ham, or older and younger branches, we can form no theory as to their settlements from their places; but if the arrangement be geographical, which is probable from the occurrence of the form Mizraim, which in no case can be a man's name, and the order of some of the Mizraites, the placing may afford a clew to the positions of the Hamite lands. Cush would stand first as the most widely spread of these peoples, extending from Babylon to the upper Nile, the territory of Mizraim would be the next to the north, embracing Egypt and its colonies on the northwest and northeast, Phut as dependent on Egypt might follow Mizraim, and Canaan as the northernmost would end the list. Egypt, the "land of Ham," may have been the primitive seat of these four stocks. In the enumeration of the Mizraites, though we have tribes extending far beyond Egypt, we may suppose that they all had their first seat in Mizraim, and spread thence, as is distinctly said of the Philistines. Here the order seems to be geographical, though the same is not so clear of the Canaanites. The list of the Mizraites is thus given in Gen. x.: "And Mizraim begat Ludim, and Ananim, and Lehabim, and Naphtuhim, and Pathrusim, and Caslubiza (whence came forth the Philistines), and Caphtorim" (13, 14; comp. 1 Chr. i. 11, 12). Here it is certain that we have the names of nations or tribes, and it is probable that they are all derived from names of countries. We find elsewhere Pathros and Caphtor, probably Lud (for the Mizraite Ludim), and perhaps, Lub for the Lubim, which are almost certainly the same as the Lehabim. There is a difficulty in the Philistines being, according to the present text, traced to the Caslubim, whereas in other places they come from the land of Caphtor, and are even called Caphtorim. It seems probable that there has been a misplacement, and that the parenthetic clause originally followed the name of the Caphtorim. Of these names we have not yet identified the Ananim and the Caslubim; the Lehabim are, as already said, almost certainly the same as the Lubim, the RTBU of the Egyptian monuments, and the primitive Libyans; the Naphtuhim we put immediately to the west of northern Egypt; and the Pathrusim and Caphtorim in that country, where the Caslubim may also be placed. There would therefore be a distinct order from west to east, and if the Philistines be transferred, this order would be perfectly preserved, though perhaps these last would necessarily be placed with their immediate parent among the tribes.

Mizraim therefore, like Cush, and perhaps Ham, geographically represents a centre whence colonies went forth in the remotest period of post-diluvian history. The Philistines were originally settled in the land of Mizraim, and there is reason to suppose the same of the Lehabim, if they be those Libyans who revolted, according to Manetho, from the Egyptians in a very early age. [LUBIM.] The list, however, probably arranges them according to the settlements they held at a later time, if we may judge from the notice of the Philistines' migration, but the mention of the spread of the Canaanites must be considered on the other side. We regard the distribution of the Mizraites as showing that their colonies were but a part of the great migration that gave the Cushites the command of the

Indian Ocean, and which explains the affinity the Egyptian monuments show us between the pre-Hellenic Cretans and Carians (the latter no doubt the Leleges of the Greek writers) and the Philistines.

The history and ethnology of the Mizraite nations have been given under the article HAM, so that here it is not needful to do more than draw attention to some remarkable particulars which did not fall under our notice in treating of the early Egyptians. We find from the monuments of Egypt that the white nations of western Africa were of what we call the Semitic type, and we must therefore be careful not to assume that they formed part of the stream of Arab colonization that has for full two thousand years steadily flowed into northern Africa. The seafaring race that first passed from Egypt to the west, though physically like, was mentally different from, the true pastoral Arab, and to this day the two elements have kept apart, the townspeople of the coast being unable to settle amongst the tribes of the interior, and these tribes again being as unable to settle on the coast.

The affinity of the Egyptians and their neighbors was long a safeguard of the empire of the Pharaohs, and from the latter, whether Cretans, Lubim, or people of Phut and Cush, the chief mercenaries of the Egyptian armies were drawn; facts which we mainly learn from the Bible, confirmed by the monuments. In the days of the Persian dominion Libyan Inaros made a brave stand for the liberty of Egypt. Probably the tie was more one of religion than of common descent, for the Egyptian belief appears to have mainly prevailed in Africa as far as it was civilized, though of course changed in its details. The Philistines had a different religion, and seem to have been identified in this matter with the Canaanites, and thus they may have lost, as they seem to have done, their attachment to their mother country.

In the use of the names Mazar and Mizraim for Egypt there can be no doubt that the dual indicates the two regions into which the country has always been divided by nature as well as by its inhabitants. Under the Greeks and Romans there was indeed a third division, the Heptanomis, which has been called Middle Egypt, as between Upper and Lower Egypt, but we must rather regard it as forming, with the Thebais, Upper Egypt. It has been supposed that Mazar, as distinct from Mizraim, signifies Lower Egypt; but this conjecture cannot be maintained. For fuller details on the subject of this article the reader is referred to HAM, EGYPT, and the articles on the several Mizraite nations or tribes.

R. S. P.

\* According to Dr. Geo. Ebers, of Jena, who has made this name the subject of a thorough and learned discussion (*Ägypten und die Bücher Moses*), Mizraim was a Semitic term, which originated entirely outside of Egyptian forms of speech, and was probably suggested by that feature of Egypt which would most powerfully impress a people living to the east of the Nile. In striking contrast with the tribes of Northern Arabia which roved from place to place, following the herbage for their flocks, Egypt was an inclosed and secluded country. At an early period the Pharaohs fortified themselves against the incursions of Asiatic tribes, and for a long time they were extremely seclusive even of commerce with foreigners. Hence the most secluded country known to the Semitic

peoples received the name of the Inclosed, the Fortified — the name Mizraim being derived from מִצְרַיִם. Knobel, who gives the same derivation, traces the idea of insulation (*Einschliessung*), to the geographical configuration of the country, as shut in within the hills and the desert — the double chain of mountains suggesting the dual form — or possibly this may have been intended to mark the contrast between the Nile Valley and the Delta. To this, however, it is objected by Ebers, that for a long time, perhaps until the invasion of the Hyksos, Egypt was known to the Phenicians and other nations of the East, only through its Delta. Indeed Pliny and other classic writers speak of the Thebaid as a distinct country, and not as a part of Egypt itself. Hence to account for the dual form of Mizraim, Ebers falls back upon the double line of fortifications that guarded the Isthmus of Suez; the one terminating at Heliopolis, the other at Klysna, at the head of the gulf, near the site of the modern Suez. The dual would then signify the doubly-fortified. If this hypothesis is not tenable, then the dual form may have been derived from the twofold division which appeared very early in the political constitution of the country, and under the consolidated empire was still represented in the colors and symbols of the double-crown. [EGYPT.] The fundamental idea of the inclosed country being retained, the term was adapted to this double form. The Hebrews, already familiar with this Semitic notion of Egypt, received their first impressions of the country from that doubly-fortified section which was their allotted home, and they naturally adhered to a descriptive name which is not found in the hieroglyphics, nor explained by the Coptic, and which probably the old Egyptians never employed to designate their native land. In Is. xi. 11 and Jer. xlv. 15 the plural Mizraim appears to be used for the Delta alone.

J. P. T.

MIZ'ZAH (מִצְחָה [*seah*]: Μοζέ; Alex. Μοχε [and Vat. Ομοζε] in 1 Chr.: *Meza*). Son of Reuel and grandson of Esau; descended likewise through Bashemath from Ishmael. He was one of the "dukes" or chiefs of tribes in the land of Edom (Gen. xxxvi. 13, 17; 1 Chr. i. 37). The settlements of his descendants are believed by Mr. Forster (*Hist. Geog. of Arab.* ii. 55) to be indicated in the μεσανίτης κόλπος, or Phrat-Misan, at the head of the Persian Gulf.

MNA'SON (*Mνάσαν*) is honorably mentioned in Scripture, like Gaius, Lydia, and others, as one of the hosts of the Apostle Paul (Acts xxi. 16). One or two questions of some little interest, though of no great importance, are raised by the context. It is most likely, in the first place, that his residence at this time was not Caesarea, but Jerusalem. He was well known to the Christians of Caesarea, and they took St. Paul to his house at Jerusalem. To translate the words ἄγοντες παρ' ἡξεισθόμεν, as in the A. V., removes no grammatical difficulty, and introduces a slight improbability into the narrative. He was, however, a Cyprian by birth, and may have been a friend of Barnabas (Acts iv. 36), and possibly brought to the knowledge of Christianity by him. The Cyprians who are so prominently mentioned in Acts xi. 19, 20, may have included Mnason. It is hardly likely that he could have been converted during the journey of Paul and Barnabas through Cyprus (Acts xiii. 4-13).

otherwise the Apostle would have been personally acquainted with him, which does not appear to have been the case. And the phrase ἀρχαῖος αἰθθητής points to an earlier period, possibly to the day of Pentecost (compare ἐν ἀρχῇ, Acts xi. 15), or to direct intercourse with our blessed Lord Himself. [CYPRUS.] J. S. H.

MO'AB (מוֹאָב) [see below]: מואָב; Josephus, Μώαβος: *Moab*, the name of the son of Lot's eldest daughter, the elder brother of Ben-Ammi, the progenitor of the Ammonites (Gen. xix. 37); also of the nation descended from him, though the name "Moabites" is in both the original and A. V. more frequently used for them.

No explanation of the name is given us in the original record, and it is not possible to throw an interpretation into it unless by some accommodation. Various explanations have however been proposed. (a.) The LXX. insert the words λέγουσα, ἐκ τοῦ πατρός μου, "saying 'from my father,'" as if מוֹאָב. This is followed by the old interpreters; as Josephus (*Ant.* i. 11, § 5), Jerome's *Quæst. Hebr. in Genesis*, the gloss of the Pseudojon. Targum; and in modern times by De Wette (*Bibel*), Tuch (*Gen.* p. 370), and J. D. Michaelis (*B. für Ungelehrten*). (b.) By Hiller (*Onom.* p. 414), Simonis (*Onom.* p. 479), it is derived from מוֹיָבָה אֵב, "ingressus, i. e. coitus, patris." (c.)

Rosenmüller (see Schumann, *Genesis*, p. 302) proposes to treat מוֹ as equivalent for מַיִם, in accordance with the figure employed by Balaam in Num. xxiv. 7. This is intimated by Jerome — "aqua paterna" (*Comm. in Mic.* vi. 8) — and has the great authority of Gesenius in its favor (*Theis.* p. 775 a); also of Fürst (*Handb.* p. 707) and Bunsen (*Bibelwerk*). (d.) A derivation, probably more correct etymologically than either of the above,

is that suggested by Maurer from the root יָאָב, "to desire" — "the desirable land" — with reference to the extreme fertility of the region occupied by Moab. (See also Fürst, *Handb.* p. 707 b.) No hint, however, has yet been discovered in the Bible records of such an origin of the name.

Zoar was the cradle of the race of Lot.<sup>a</sup> The situation of this town appears to have been in the district east of the Jordan, and to the north or northeast of the Dead Sea. [ZOAR.] From this centre the brother-tribes spread themselves. AMMON, whose disposition seems throughout to have been more roving and unsettled, went to the northeast and took possession of the pastures and waste tracts which lay outside the district of the mountains; that which in earlier times seems to have been known as Ham, and inhabited by the Zuzim or Zamzumim (Gen. xiv. 5; Deut. ii. 20). MOAB, whose habits were more settled and peaceful, remained nearer their original seat. The rich highlands which crown the eastern side of the chasm of the Dead Sea, and extend northwards as far as the foot of the mountains of Gilead, appear at that early date to have borne a name, which in its Hebrew form is presented to us as Shaveh-Kiriathaim, and to have been inhabited by a branch of the great race of the Rephaim. Like

the Horim before the descendants of Esau, the Avim before the Philistines, or the indigenous races of the New World before the settlers from the West, this ancient people, the Emim, gradually became extinct before the Moabites, who thus obtained possession of the whole of the rich elevated tract referred to — a district forty or fifty miles in length by ten or twelve in width, the celebrated *Belka* and *Kerrak* of the modern Arabs, the most fertile on that side of Jordan, no less eminently fitted for pastoral pursuits than the maritime plains of Philistia and Sharon, on the west of Palestine, are for agriculture. With the highlands they occupied also the lowlands at their feet, the plain which intervenes between the slopes of the mountains and the one perennial stream of Palestine, and through which they were enabled to gain access at pleasure to the fords of the river, and thus to the country beyond it. Of the valuable district of the highlands they were not allowed to retain entire possession. The warlike Amorites — either forced from their original seats on the west, or perhaps lured over by the increasing prosperity of the young nation — crossed the Jordan and overran the richer portion of the territory on the north, driving Moab back to his original position behind the natural bulwark of the Arnon. The plain of the Jordan Valley, the hot and humid atmosphere of which had perhaps no attraction for the Amorite mountaineers, appears to have remained in the power of Moab. When Israel reached the boundary of the country, this contest had only very recently occurred. Sihon, the Amorite king under whose command Heshbon had been taken, was still reigning there — the ballads commemorating the event were still fresh in the popular mouth (Num. xxi. 27-30).<sup>b</sup>

Of these events, which extended over a period, according to the received Bible chronology, of not less than 500 years, from the destruction of Sodom to the arrival of Israel on the borders of the Promised Land, we obtain the above outline only from the fragments of ancient documents, which are found embedded in the records of Numbers and Deuteronomy (Num. xxi. 26-30; Deut. ii. 10, 11).

The position into which the Moabites were driven by the incursion of the Amorites was a very circumscribed one, in extent not so much as half that which they had lost. But on the other hand its position was much more secure, and it was well suited for the occupation of a people whose disposition was not so warlike as that of their neighbors. It occupied the southern half of the high tablelands which rise above the eastern side of the Dead Sea. On every side it was strongly fortified by nature. On the north was the tremendous chasm of the Arnon. On the west it was limited by the precipices, or more accurately the cliffs, which descend almost perpendicularly to the shore of the lake, and are intersected only by one or two steep and narrow passes. Lastly, on the south and east, it was protected by a half circle of hills which open only to allow the passage of a branch of the Arnon and another of the torrents which descend to the Dead Sea.

It will be seen from the foregoing description that the territory occupied by Moab at the period

<sup>a</sup> \* This is an inadvertence. The "cradle of the race of Lot" was in the mountain above. S. W.

<sup>b</sup> For an examination of this remarkable passage in some respects without a parallel in the Old Testament, see NUMBERS

of its greatest extent, before the invasion of the Amorites, divided itself naturally into three distinct and independent portions. Each of these portions appears to have had its name by which it is almost invariably designated. (1.) The enclosed corner<sup>a</sup> or canton south of the Arnon was the "field of Moab" (Ruth i. 1, 2, 6, &c.). (2.) The more open rolling country north of the Arnon, opposite Jericho, and up to the hills of Gilead, was the "land of Moab" (Deut. i. 5, xxxii. 49, &c.). (3.) The sunk district in the tropical depths of the Jordan Valley, taking its name from that of the great valley itself — the Arabah — was the Arboth-Moab, the dry regions — in the A. V. very incorrectly rendered the "plains of Moab" (Num. xxii. 1, &c.).

Outside of the hills, which inclosed the "field of Moab," or Moab proper, on the southeast, and which are at present called the *Jebel Uru-Karaigeh* and *Jebel el-Tarfugeh*, lay the vast pasture grounds of the waste uncultivated country or "Midbar," which is described as "facing Moab" on the east (Num. xxi. 11). Through this latter district Israel appears to have approached the Promised Land. Some communication had evidently taken place, though of what nature it is impossible clearly to ascertain. For while in Deut. ii. 28, 29, the attitude of the Moabites is mentioned as friendly, this seems to be contradicted by the statement of xxiii. 4, while in Judg. xi. 17, again, Israel is said to have sent from Kadesh asking permission to pass through Moab, a permission which, like Edom, Moab refused. At any rate the attitude perpetuated by the provision of Deut. xxiii. 3 — a provision maintained in full force by the latest of the Old Testament reformers (Neh. xiii. 1, 2, 23) — is one of hostility.

But whatever the communication may have been, the result was that Israel did not traverse Moab, but turning to the right passed outside the mountains through the "wilderness," by the east side of the territory above described (Deut. ii. 8; Judg. xi. 18), and finally took up their position in the country north of the Arnon, from which Moab had so lately been ejected. Here the headquarters of the nation remained for a considerable time while the conquest of Bashan was being effected. It was during this period that the visit of Balaam took place. The whole of the country east of the Jordan, with the exception of the one little corner occupied by Moab, was in possession of the invaders, and although at the period in question the main body had descended from the upper level to the plains of Shittim, the Arboth-Moab, in the Jordan Valley, yet a great number must have remained on the upper level, and the towns up to the very edge of the ravine of the Arnon were still occupied by their settlements (Num. xxi. 24; Judg. xi. 26). It was a situation full of alarm for a nation which had already suffered so severely. In his extremity the Moabite king, Balak — whose father Zippor was doubtless the chieftain who had lost his life in the encounter with Sihon (Num. xxi. 26) — appealed to the Midianites for aid (Num. xxii. 2-4). With a

metaphor highly appropriate both to his mouth and to the ear of the pastoral tribe he was addressing,<sup>b</sup> he exclaims that "this people will lick up all round about us as the ox licketh up the grass of the field." What relation existed between Moab and Midian we do not know, but there are various indications that it was a closer one than would arise merely from their common descent from Terah. The tradition of the Jews<sup>c</sup> is, that up to this time the two had been one nation, with kings taken alternately from each, and that Balak was a Midianite. This, however, is in contradiction to the statements of Genesis as to the origin of each people. The whole story of Balaam's visit and of the subsequent events, both in the original narrative of Numbers and in the remarkable statement of Jephthah — whose words as addressed to Ammonites must be accepted as literally accurate — bears out the inference already drawn from the earlier history as to the pacific character of Moab.

The account of the whole of these transactions in the Book of Numbers, familiar as we are with its phrases, perhaps hardly conveys an adequate idea of the extremity in which Balak found himself in his unexpected encounter with the new nation and their mighty Divinity. We may realize it better (and certainly with gratitude for the opportunity), if we consider what that last dreadful agony was in which a successor of Balak was placed, when, all hope of escape for himself and his people being cut off, the unhappy Mesha immolated his own son on the wall of Kir-haraseth, — and then remember that Balak in his distress actually proposed the same awful sacrifice — "his first-born for his transgression, the fruit of his body for the sin of his soul" (Mic. vi. 7), a sacrifice from which he was restrained only by the wise, the almost Christian<sup>d</sup> counsels of Balaam. This catastrophe will be noticed in its proper place.

The connection of Moab with Midian, and the comparatively inoffensive character of the former, are shown in the narrative of the events which followed the departure of Balaam. The women of Moab are indeed said (Num. xxv. 1) to have commenced the idolatrous fornication which proved so destructive to Israel, but it is plain that their share in it was insignificant compared with that of Midian. It was a Midianitish woman whose shameless act brought down the plague on the camp, the Midianitish women were especially devoted to destruction by Moses (xxv. 16-18, xxxi. 16), and it was upon Midian that the vengeance was taken. Except in the passage already mentioned, Moab is not once named in the whole transaction.

The latest date at which the two names appear in conjunction, is found in the notice of the defeat of Midian "in the field of Moab" by the Edomite king Hadad-ben-Bedad, which occurred five generations before the establishment of the monarchy of Israel (Gen. xxxvi. 35; 1 Chr. i. 46). By the Jewish interpreters — e. g. Solomon Jarchi in his commentary on the passage — this is treated as implying not alliance, but war, between Moab and Midian (comp. 1 Chr. iv. 22).

<sup>a</sup> The word **קַרְנֵי** (A. V. "corners") is twice used with respect to Moab (Num. xxiv. 17; Jer. xlvi. 45). No one appears yet to have discovered its force in this relation. It can hardly have any connection with the name of the territory as noticed in the text.

<sup>b</sup> Midian was eminently a pastoral people. See the

account of the spoil taken from them (Num. xxxi. 32-47). For the pastoral wealth of Moab, even at this early period, see the expressions in Mic. vi. 6, 7.

<sup>c</sup> See Targum Pseudojathan on Num. xxii. 4.

<sup>d</sup> Balaam's words (Mic. vi. 8) are nearly identical with those quoted by our Lord Himself (Matt. ix. 17 and xii. 7).

It is remarkable that Moses should have taken his view of the Promised Land from a Moabite sanctuary, and been buried in the land of Moab. It is singular too that his resting-place is marked in the Hebrew Records only by its proximity to the sanctuary of that deity to whom in his lifetime he had been such an enemy. He lies in a ravine in the land of Moab, facing Beth-Peor, *i. e.* the abode of Baal-Peor (Deut. xxxiv. 6).

After the conquest of Canaan the relations of Moab with Israel were of a mixed character. With the tribe of Benjamin, whose possessions at their eastern  $\pi$  were separated from those of Moab only by the Jordan, they had at least one severe struggle, in union with their kindred the Ammonites, and also, for this time only, the wild Amalekites from the south (Judg. iii. 12-30). The Moabite king, Eglon, actually ruled and received tribute in Jericho for eighteen years, but at the end of that time he was killed by the Benjamite hero Ehud, and the return of the Moabites being intercepted at the fords, a large number were slaughtered, and a stop put to such incursions on their part for the future.<sup>a</sup> A trace of this invasion is visible in the name of Chephar-ha-Ammonai, the "hamlet of the Ammonites," one of the Benjamite towns; and another is possibly preserved even to the present day in the name of *Mukhmas*, the modern representative of Michmash, which is by some scholars believed to have received its name from Chemosh the Moabite deity.

The feud continued with true oriental pertinacity to the time of Saul. Of his slaughter of the Ammonites we have full details in 1 Sam. xi., and amongst his other conquests Moab is especially mentioned (1 Sam. xiv. 47). There is not, however, as we should expect, any record of it during Ishbosheth's residence at Mahanaim on the east of Jordan.

But while such were their relations to the tribe of Benjamin, the story of Ruth, on the other hand, testifies to the existence of a friendly intercourse between Moab and Bethlehem, one of the towns of Judah. The Jewish<sup>b</sup> tradition ascribes the death of Mahlon and Chilion to punishment for having broken the commandment of Deut. xxiii. 3, but no trace of any feeling of the kind is visible in the Book of Ruth itself—which not only seems to imply a considerable intercourse between the two nations, but also a complete ignorance or disregard of the precept in question, which was broken in the most flagrant manner when Ruth became the wife of Boaz. By his descent from Ruth, David may be said to have had Moabite blood in his veins. The relationship was sufficient, especially when combined with the blood feud between Moab and Benjamin, already alluded to, to warrant his visiting the land of his ancestress, and committing his parents to the protection of the king of Moab, when hard pressed by Saul (1 Sam. xxii. 3, 4). But here all friendly relation stops for ever. The next time the name is mentioned is in the account of David's war, at least twenty years after the last-mentioned event (2 Sam. viii. 2; 1 Chr. xviii. 2).

The abrupt manner in which this war is intro-

duced into the history is no less remarkable than the brief and passing terms in which its horrors are recorded. The account occupies but a few words in either Samuel or Chronicles, and yet it must have been for the time little short of a virtual extirpation of the nation. Two thirds of the people were put to death, and the remainder became bondmen, and were subjected to a regular tribute. An incident of this war is probably recorded in 2 Sam. xxiii. 20, and 1 Chr. xi. 22. The spoils taken from the Moabite cities and sanctuaries went to swell the treasures acquired from the enemies of Jehovah, which David was amassing for the future Temple (2 Sam. viii. 11, 12; 1 Chr. xviii. 11). It was the first time that the prophecy of Balaam had been fulfilled,—"Out of Jacob shall come he that shall have dominion, and shall destroy him that remaineth of Ar," that is of Moab.

So signal a vengeance can only have been occasioned by some act of perfidy or insult, like that which brought down a similar treatment on the Ammonites (2 Sam. x.). But as to any such act the narrative is absolutely silent. It has been conjectured that the king of Moab betrayed the trust which David reposed in him, and either himself killed Jesse and his wife, or surrendered them to Saul. But this, though not improbable, is nothing more than conjecture.

It must have been a considerable time before Moab recovered from so severe a blow. Of this we have evidence in the fact of their not being mentioned in the account of the campaign in which the Ammonites were subdued, when it is not probable they would have refrained from assisting their relatives had they been in a condition to do so. Throughout the reign of Solomon, they no doubt shared in the universal peace which surrounded Israel; and the only mention of the name occurs in the statement that there were Moabites amongst the foreign women in the royal harem, and, as a natural consequence, that the Moabite worship was tolerated, or perhaps encouraged (1 K. xi. 1, 7, 33). The high place for Chemosh, "the abomination of Moab," was consecrated "on the mount facing Jerusalem," where it remained till its "defilement" by Josiah (2 K. xxiii. 13), nearly four centuries afterwards.

At the disruption of the kingdom, Moab seems to have fallen to the northern realm, probably for the same reason that has been already remarked in the case of Eglon and Ehud—that the fords of Jordan lay within the territory of Benjamin, who for some time after the separation clung to its ancient ally the house of Ephraim. But be this as it may, at the death of Ahab, eighty years later, we find Moab paying him the enormous tribute, apparently annual, of 100,000 rams, and the same number of wethers with their fleeces; an amount which testifies at once to the severity of the terms imposed by Israel, and to the remarkable vigor of character, and wealth of natural resources, which could enable a little country, not so large as the county of Huntingdon, to raise year by year this enormous impost, and at the same time support its own people in prosperity and affluence.<sup>c</sup> It is not

<sup>a</sup> The account of Shaharaim, a man of Benjamin, who "begat children in the field of Moab," in 1 Chr. viii. 8, seems, from the mention of Ehud (ver. 6), to belong to this time; but the whole passage is very obscure.

<sup>b</sup> See Targum Jonathan on Ruth i. 4. The marriage

of Boaz with the stranger is vindicated by making Ruth a proselyte in desire, if not by actual initiation.

<sup>c</sup> This affluence is shown by the treasures which they left on the field of Berachah (2 Chr. xx. 25), no less than by the general condition of the country, indicated in the narrative of Joram's invasion; and in

surprising that the Moabites should have seized the moment of Ahab's death to throw off so burdensome a yoke; but it is surprising, that, notwithstanding such a drain on their resources, they were ready to incur the risk and expense of a war with a state in every respect far their superior. Their first step, after asserting their independence, was to attack the kingdom of Judah in company with their kindred the Ammonites, and, as seems probable, the Mehuim, a roving semi-Edomite people from the mountains in the southeast of Palestine (2 Chr. xx.). The army was a huge heterogeneous horde of ill-assorted elements. The route chosen for the invasion was round the southern end of the Dead Sea, thence along the beach, and by the pass of En-gedi to the level of the upper country. But the expedition contained within itself the elements of its own destruction. Before they reached the enemy dissensions arose between the heathen strangers and the children of Lot; distrust followed, and finally panic; and when the army of Jehoshaphat came in sight of them they found that they had nothing to do but to watch the extermination of one half the huge host by the other half, and to seize the prodigious booty which was left on the field.

Disastrous as was this proceeding, that which followed it was even still more so. As a natural consequence of the late events, Israel, Judah, and Edom united in an attack on Moab. For reasons which are not stated, but one of which we may reasonably conjecture was to avoid the passage of the savage Edomites through Judah, the three confederate armies approached not as usual by the north, but round the southern end of the Dead Sea, through the parched valleys of upper Edom. As the host came near, the king of Moab, doubtless the same Mesha who threw off the yoke of Ahab, assembled the whole of his people, from the youngest who were of age to bear the sword-girdle,<sup>a</sup> on the boundary of his territory, probably on the outer slopes of the line of hills which encircles the lower portion of Moab, overlooking the waste which extended below them towards the east.<sup>b</sup> Here they remained all night on the watch. With the approach of morning the sun rose suddenly above the horizon of the rolling plain, and as his level beams burst through the night-mists they revealed no masses of the enemy, but shone with a blood-red glare on a multitude of pools in the bed of the wady at their feet. They did not know that these pools had been sunk during the night by the order of a mighty Prophet who was with the host of Israel, and that they had been filled by the sudden flow of water rushing from the distant highlands of Edom. To them the conclusion was inevitable. The army had, like their own on the late occasion, fallen out in the night; these red pools were the blood of the slain; those who were not killed had fled, and nothing stood between them and the pillage of the camp.

the passages of Isaiah and Jeremiah which are cited further on in this article.

<sup>a</sup> 2 K. iii. 21. This passage exhibits one of the most singular variations of the LXX. The Hebrew text is literally, "and all gathered themselves together that were girt with a girdle and upward." This the LXX. originally rendered ἀνεβήσαν ἐκ παντὸς περιεζωμένοι ζώνῃ καὶ ἐπάνω which the Alexandrine Codex still retains; but in the Vatican MS. the last words have actually been corrupted into καὶ εἶπον, ὦ — "and they said, Oh!"

The cry "Moab to the spoil!" was raised. Down the slopes they rushed in headlong disorder, but not, as they expected, to empty tents; they found an enemy ready prepared to reap the result of his ingenious stratagem.<sup>c</sup> Then occurred one of those scenes of carnage which can happen but once or twice in the existence of a nation. The Moabites fled back in confusion, followed and cut down at every step by their enemies. Far inwards did the pursuit reach, among the cities and farms and orchards of that rich district: nor when the slaughter was over was the horrid work of destruction done. The towns both fortified and unfortified were demolished, and the stones strewn over the carefully tilled fields. The fountains of water, the life<sup>d</sup> of an eastern land, were choked, and all timber of any size or goodness felled. Nowhere else do we hear of such sweeping desolation; the very besom of destruction passed over the land. At last the struggle collected itself at KIR-HARSETH, apparently a newly constructed fortress, which, if the modern *Kerak* — and there is every probability that they are identical — may well have resisted all the efforts of the allied kings in its native impregnability. Here Mesha took refuge with his family and with the remnants of his army. The heights around, by which the town is entirely commanded, were covered with slingers, who, armed partly with the ancient weapon of David and of the Benjamites, partly perhaps with the newly-invented machines shortly to be famous in Jerusalem (2 Chr. xxvi. 15), discharged their volleys of stones on the town. At length the annoyance could be borne no longer. Then Mesha, collecting round him a forlorn hope of 700 of his best warriors, made a desperate sally, with the intention of cutting his way through to his special foe the king of Edom. But the enemy were too strong for him, and he was driven back. And then came a fitting crown to a tragedy already so terrible. An awful spectacle amazed and horrified the besiegers. The king and his eldest son, the heir to the throne, mounted the wall, and, in the sight of the thousands who covered the sides of that vast amphitheatre, the father killed and burnt his child as a propitiatory sacrifice to the cruel gods of his country. It was the same dreadful act to which, as we have seen, Balak had been so nearly tempted in his extremity.<sup>e</sup> But the danger, though perhaps not really greater than his, was more imminent; and Mesha had no one like Balaam at hand, to counsel patience and submission to a mightier Power than Chemosh or Baal-peor.

Hitherto, though able and ready to fight when necessary, the Moabites do not appear to have been a fighting people; perhaps, as suggested elsewhere, the Ammonites were the warriors of the nation of Lot. But this disaster seems to have altered their disposition, at any rate for a time. Shortly after these events we hear of "bands" — that is pillaging marauding parties<sup>f</sup> — of the Moabites making

<sup>b</sup> Compare Num. xxi. 11 — "towards the sun rising."

<sup>c</sup> The lesson was not lost on king Joram, who proved himself more cautious on a similar occasion (2 K. vii 12, 13).

<sup>d</sup> *Præ erat luxuria propter irriguos agros* (Jerome, on Is. xv. 9).

<sup>e</sup> Jerome alone of all the commentators has noticed this. See his *Comm. in Mich. vi.*

<sup>f</sup> לַבָּנִים. The word "bands," by which this is

their incursions into Israel in the spring, as if to spoil the early corn before it was fit to cut (2 K. xiii. 20). With Edom there must have been many a contest. One of these, marked by savage vengeance — recalling in some degree the tragedy of Kir-haraseth — is alluded to by Amos (ii. 1), where a king of Edom seems to have been killed and burnt by Moab. This may have been one of the incidents of the battle of Kir-haraseth itself, occurring perhaps after the Edomites had parted from Israel, and were overtaken on their road home by the furious king of Moab (Gesenius, *Jesuit*, i. 504); or according to the Jewish tradition (Jerome, on Amos ii. 1), it was a vengeance still more savage because more protracted, and lasting even beyond the death of the king, whose remains were torn from his tomb and thus consumed: *Non dico crudelitatem sed rabiam; ut incederent ossa regis Idumæ, et non paterentur mortem esse omnium extremum malorum* (*ib.* ver. 4).

In the "Burden of Moab" pronounced by Isaiah (chaps. xv., xvi.), we possess a document full of interesting details as to the condition of the nation, at the time of the death of Abaz king of Judah, B. C. 726. More than a century and a half had elapsed since the great calamity to which we have just referred. In that interval, Moab has regained all, and more than all of his former prosperity, and has besides extended himself over the district which he originally occupied in the youth of the nation, and which was left vacant when the removal of Reuben to Assyria, which had been begun by Pul in 770, was completed by Tiglath-pileser about the year 740 (1 Chr. v. 25, 26).

This passage of Isaiah cannot be considered apart from that of Jeremiah, ch. xlviii. The latter was pronounced more than a century later, about the year 600, ten or twelve years before the invasion of Nebuchadnezzar, by which Jerusalem was destroyed. In many respects it is identical with that of Isaiah, and both are believed by the best modern scholars, on account of the archaisms and other peculiarities of language which they contain,

commonly rendered with A. V. has not now the force of the original term. **רַבָּדִים** is derived from **רָבַד**, to rush together and fiercely, and signifies a troop of irregular marauders, as opposed to the regular soldiers of an army. It is employed to denote (1.) the bands of the Amalekites and other Bedouin tribes round Palestine: as 1 Sam. xxx. 8, 15, 23 (A. V. "troop" and "company"); 2 K. vi. 23, xiii. 20, 21, xxiv. 2; 1 Chr. xli. 21, 2 Chr. xxii. 1 (A. V. "band"). It is in this connection that it occurs in the elaborate play on the name of Gad, contained in Gen. xlix. 19 [see vol. i. p. 848 *b*], a passage strikingly corroborated by 1 Chr. xii. 18, where the Gadites who resorted to David in his difficulties — swift as roes on the mountains, with faces like the faces of lions — were formed by him into a "band." In 1 K. xi. 24 it denotes the roving troop collected by Rezon from the remnants of the army of Zobah, who took the city of Damascus by surprise, and by their forays molested — literally "played the Satan to" — Solomon (ver. 25). How formidable these bands were, may be gathered from 2 Sam. xxii. 30, where in a moment of most solemn exultation David speaks of breaking through one of them as among the most memorable exploits of his life.

(2.) The word is used in the general sense of hired soldiers — mercenaries; as of the host of 100,000 Eparathites hired by Amaziah in 2 Chr. xxv. 9, 10, 13; where the point is missed in the A. V. by the use of the word "army." No Bedouins could have shown a keener appetite for plunder than did these Israelites

to be adopted from a common source — the work of some much more ancient prophet <sup>a</sup>

Isaiah ends his denunciation by a prediction — in his own words — that within three years Moab should be greatly reduced. This was probably with a view to Shalmaneser who destroyed Samaria, and no doubt overthrew the other side of the Jordan <sup>b</sup> in 725, and again in 723 (2 K. xvii. 3, xviii. 9). The only event of which we have a record to which it would seem possible that the passage, as originally uttered by the older prophet, applied, is the invasion of Pul, who about the year 770 appears to have commenced the deportation of Reuben (1 Chr. v. 26), and who very probably at the same time molested Moab. <sup>c</sup> The difficulty of so many of the towns of Reuben being mentioned, as at that early date already in the possession of Moab, may perhaps be explained by remembering that the idolatry of the neighboring nations — and therefore of Moab — had been adopted by the trans-Jordanic tribes for some time previously to the final deportation by Tiglath-pileser (see 1 Chr. v. 25), and that many of the sanctuaries were probably even at the date of the original delivery of the denunciation in the hands of the priests of Chemosh and Milcom. If, as Ewald (*Gesch.* iii. 588) with much probability infers, the Moabites, no less than the Ammonites, were under the protection of the powerful Uzziah <sup>d</sup> (2 Chr. xxvi. 8), then the obscure expressions of the ancient seer as given in Is. xvi. 1-5, referring to a tribute of lambs (comp. 2 K. iii. 4) sent from the wild pasture-grounds south of Moab to Zion, and to protection and relief from oppression afforded by the throne <sup>e</sup> of David to the fugitives and outcasts of Moab — acquire an intelligible sense.

On the other hand, the calamities which Jeremiah describes may have been inflicted in any one of the numerous visitations from the Assyrian army, under which these unhappy countries suffered at the period of his prophecy in rapid succession.

But the uncertainty of the exact dates referred to in these several denunciations does not in the least affect the interest or the value of the allusions they

(ver. 13). In this sense it is probably used in 2 Chr. xxvi. 11 for the irregular troops kept by Uzziah for purposes of plunder, and who are distinguished from his "army" (ver. 13) maintained for regular engagements.

(3.) In 2 Sam. iii. 22 ("troop") and 2 K. v. 2 ("by companies") it refers to marauding raids for the purpose of plunder.

<sup>a</sup> See Ewald (*Propheten*, 229-31). He seems to believe that Jeremiah has preserved the old prophecy more nearly in its original condition than Isaiah.

<sup>b</sup> Amos. B. C. cir. 780, prophesied that a nation should afflict Israel from the entering in of Hamath unto the "torrent of the desert" (probably one of the wadies on the S. E. extremity of the Dead Sea); that is, the whole of the country east of Jordan.

<sup>c</sup> Knobel refers the original of Is. xv. xvi. to the time of Jeroboam II., a great conqueror beyond Jordan.

<sup>d</sup> He died 758, i. e. 12 years after the invasion of Pul.

<sup>e</sup> The word used in this passage for the palace of David in Zion, namely "tent" (A. V. "tabernacle"), is remarkable as an instance of the persistence with which the memory of the original military foundation of Jerusalem by the warrior-king was preserved by the Prophets. Thus, in Ps. lxxvi. 2 and Lam. ii. 6 it is the "booth or bivouacking-hut of Jehovah;" and in Is. xxix. 1 the city where David "pitched," or "encamped" (not "dwelt," as in A. V.).

contain to the condition of Moab. They bear the evident stamp of portraiture by artists who knew their subject thoroughly. The nation appears in them as high-spirited,<sup>a</sup> wealthy, populous, and even to a certain extent civilized, enjoying a wide reputation and popularity. With a metaphor which well expresses at once the pastoral wealth of the country and its commanding, almost regal, position, but which cannot be conveyed in a translation, Moab is depicted as the strong sceptre,<sup>b</sup> the beautiful staff,<sup>c</sup> whose fracture will be bewailed by all about him, and by all who know him. In his cities we discern a "great multitude" of people living in "glory," and in the enjoyment of great "treasure," crowding the public squares, the housetops, and the ascents and descents of the numerous high places and sanctuaries where the "priests and princes" of Chemosh or Baal-Peor minister to the anxious devotees. Outside the towns lie the "plentiful fields," luxuriant as the renowned Carmel<sup>d</sup> — the vineyards, and gardens of "summer fruits"; — the harvest is being reaped, and the "hay stored in its abundance," the vineyards and the presses are crowded with peasants, gathering and treading the grapes, the land resounds with the clamor<sup>e</sup> of the vintagers. These characteristics contrast very favorably with any traits recorded of Ammon, Edom, Midian, Amalek, the Philistines, or the Canaanite tribes. And since the descriptions we are considering are adopted by certainly two, and probably three prophets — Jeremiah, Isaiah, and the older seer — extending over a period of nearly 200 years, we may safely conclude that they are not merely temporary circumstances, but were the enduring characteristics of the people. In this case there can be no doubt that amongst the pastoral people of Syria, Moab stood next to Israel in all matters of material wealth and civilization.

It is very interesting to remark the feeling which actuates the prophets in these denunciations of a people who, though the enemies of Jehovah, were the blood-relations of Israel. Half the allusions of Isaiah and Jeremiah in the passages referred to, must forever remain obscure. We shall never know who the "lords of the heathen" were who, in that terrible night, laid waste and brought to silence the prosperous Ar-moab and Kir-moab. Or the occasion of that flight over the Arnon, when the Moabite women were huddled together at the ford, like a flock of young birds, pressing to cross to the safe side of the stream, — when the dwellers in Aroer stood by the side of the high road which passed their town, and eagerly questioning the fugitives as they hurried up, "What is done?" —

<sup>a</sup> Is. xvi. 6; Jer. xlviii. 29. The word *Gāḏn* (גָּדָן), like our own word "pride," is susceptible of a good as well as a bad sense. It is the term used for the "majesty" and "excellency" of Jehovah (Is. ii. 10, &c., Ex. xv. 7), and is frequently in the A. V. rendered by "pomp."

<sup>b</sup> מִזְבֵּי; the "rod" of Moses, and of Aaron, and of the heads of the tribes (Num. xvii. 2, &c.). The term also means a "tribe." No English word expresses all these meanings.

<sup>c</sup> מַקְלֵי; the word used for the "rods" of Jacob's stratagem; also for the "staves" in the pastoral parable of Zechariah (xl. 7-14).

<sup>d</sup> Carmel is the word rendered "plentiful field" in Is. xvi. 10 and Jer. xlviii. 33.

<sup>e</sup> What the din of a vintage in Palestine was may

received but one answer from all alike — "All is lost! Moab is confounded and broken down!"

Many expressions, also, such as the "weeping of Jazer," the "heifer of three years old," the "shadow of Heshbon," the "lions," must remain obscure. But nothing can obscure or render obsolete the tone of tenderness and affection which makes itself felt in a hundred expressions throughout these precious documents. Ardently as the Prophet longs for the destruction of the enemy of his country and of Jehovah, and earnestly as he curses the man "that doeth the work of Jehovah deceitfully, that keepeth back his sword from blood," yet he is constrained to bemoan and lament such dreadful calamities to a people so near him both in blood and locality. His heart mourns — it sounds like pipes — for the men of Kir-heres; his heart cries out, it sounds like a harp for Moab.

Isaiah recurs to the subject in another passage of extraordinary force, and of fiercer character than before, namely, xxv. 10-12. Here the extermination, the utter annihilation, of Moab, is contemplated by the Prophet with triumph, as one of the first results of the reestablishment of Jehovah on Mount Zion: "In this mountain shall the hand of Jehovah rest, and Moab shall be trodden down under Him, even as straw — the straw of his own threshing-floors at Madmenah — is trodden down for the dunghill. And He shall spread forth his hands in the midst of them — namely, of the Moabites — as one that swimmeth spreadeth forth his hands to swim, buffed following buff, right and left, with terrible rapidity, as the strong swimmer urges his way forward: and He shall bring down their pride together with the spoils of their hands. And the fortress of Misgab<sup>h</sup> — thy walls shall He bring down, lay low, and bring to the ground, to the dust."

If, according to the custom of interpreters, this and the preceding chapter (xxiv.) are understood as referring to the destruction of Babylon, then this sudden burst of indignation towards Moab is extremely puzzling. But, if the passage is examined with that view, it will perhaps be found to contain some expressions which suggest the possibility of Moab having been at least within the ken of the Prophet, even though not in the foreground of his vision, during a great part of the passage. The Hebrew words rendered "city" in xxv. 2 — two entirely distinct terms — are positively, with a slight variation, the names of the two chief Moabite strongholds, the same which are mentioned in xv. 1, and one of which<sup>i</sup> is in the Pentateuch a synonym for the entire nation of

be inferred from Jer. xxv. 30: "Jehovah shall roar from on high. . . . He shall mightily roar. . . . He shall give a shout as those that tread the grapes"

<sup>f</sup> *La noche triste.*

<sup>g</sup> It is thus characterized by Ewald (*Propheten* 230). "Eine so ganz von Trauer und Mitleid hingeris sene, von Weichheit zerfließende, mehr elegisch als prophetisch gestimmte Empfindung steht unter den ältern Propheten einzig da; sogar bei Hosea ist nichts ganz aehnliches."

<sup>h</sup> In the A. V. rendered "the high fort." But there is good reason to take it as the name of a place (Jer. xlviii. 1). [MISGAB.]

<sup>i</sup> Gesenius believes Ar, אֶר, to be a Moabite form of Ir, יֶר, one of the two words spoken of above Num. xxiv. 19 acquires a new force, if the word rendered "city" is interpreted as Ar, that is Moab.

**Moab.** In this light, verse 2 may be read as follows: "For thou hast made of Ar a heap; of Kir the defenced a ruin; a palace<sup>a</sup> of strangers no longer is Ar, it shall never be rebuilt." The same words are found in verses 10 and 12 of the preceding chapter, in company with *hutsoth* (A. V. "streets") which we know from Num. xxii. 39 to have been the name of a Moabite town. [KIR-JATH-HUZORIL.] A distinct echo of them is again heard in xxv. 3, 4; and finally in xxvi. 1, 5, there seems to be yet another reference to the same two towns, acquiring new force from the denunciation which closes the preceding chapter: "Moab shall be brought down, the fortress and the walls of Misgab shall be laid low; but in the land of Judah this song shall be sung, 'Our Ar, our city, is strong . . . Trust in the Lord Jehovah who bringeth down those that dwell on high: the lofty Kir He layeth it low,'" etc.

It is perhaps an additional corroboration to this view to notice that the remarkable expressions in xxiv. 17, "Fear, and the pit, and the snare," etc., actually occur in Jeremiah (xlviii. 43), in his denunciation of Moab, embedded in the old prophecies out of which, like Is. xv., xvi., this passage is compiled, and the rest of which had certainly, as originally uttered, a direct and even exclusive reference to Moab.

Between the time of Isaiah's denunciation and the destruction of Jerusalem we have hardly a reference to Moab. Zephaniah, writing in the reign of Josiah, reproaches them (ii. 8-10) for their taunts against the people of Jehovah, but no acts of hostility are recorded either on the one side or the other. From one passage in Jeremiah (xxv. 9-21) delivered in the fourth year of Jehoiakim, just before the first appearance of Nebuchadnezzar, it is apparent that it was the belief of the Prophet that the nations surrounding Israel — and Moab among the rest — were on the eve of devastation by the Chaldeans and of a captivity for seventy years (see ver. 11), from which, however, they should eventually be restored to their own country (ver. 12, and xlviii. 47). From another record of the events of the same period or of one only just subsequent (2 K. xxiv. 2), it would appear, however, that Moab made terms with the Chaldeans, and for the time acted in concert with them in harassing and plundering the kingdom of Jehoiakim.

Four or five years later, in the first year of Zedekiah (Jer. xxvii. 1),<sup>b</sup> these hostilities must have ceased, for there was then a regular intercourse between Moab and the court at Jerusalem (ver. 3), possibly, as Bunsen suggests (*Bibelwerk, Propheten*, p. 536), negotiating a combined resistance to the

common enemy. The brunt of the storm must have fallen on Judah and Jerusalem. The neighboring nations, including Moab, when the danger actually arrived probably adopted the advice of Jeremiah (xxvii. 11) and thus escaped, though not without much damage, yet without being carried away as the Jews were. That these nations did not suffer to the same extent as Judæa is evident from the fact that many of the Jews took refuge there when their own land was laid waste (Jer. xl. 11). Jeremiah expressly testifies that those who submitted themselves to the King of Babylon, though they would have to bear a severe yoke, — severe that their very wild animals<sup>c</sup> would be enslaved, — yet by such submission should purchase the privilege of remaining in their own country. The removal from home, so dreadful to the Semitic mind,<sup>d</sup> was to be the fate only of those who resisted (Jer. xxvii. 10, 11, xxviii. 14). This is also supported by the allusion of Ezekiel, a few years later, to the cities of Moab, cities formerly belonging to the Israelites, which, at the time when the Prophet is speaking, were still flourishing, "the glory of the country," destined to become at a future day a prey to the Bene-Kedem, the "men of the East" — the Bedouins of the great desert of the Euphrates<sup>e</sup> (Ez. xxv. 8-11).

After the return from the Captivity it was a Moabite, Sanballat of Horonaim, who took the chief part in annoying and endeavoring to hinder the operations of the rebuilders of Jerusalem (Neh. ii. 19, iv. 1, vi. 1, &c.). He confines himself, however, to the same weapons of ridicule and scurrility which we have already noticed Zephaniah's<sup>f</sup> resenting. From Sanballat's words (Neh. ii. 19) we should infer that he and his country were subject to "the king," that is, the King of Babylon. During the interval since the return of the first caravan from Babylon the illegal practice of marriages between the Jews and the other people around, Moab amongst the rest, had become frequent. So far had this gone, that the son of the high-priest was married to an Ammonite woman. Even among the families of Israel who returned from the Captivity was one bearing the name of PAHATHI-MOAB (Ezr. ii. 6, viii. 4; Neh. iii. 11, &c.), a name which must certainly denote a Moabite connection,<sup>g</sup> though to the nature of the connection no clew seems to have been yet discovered. By Ezra and Nehemiah the practice of foreign marriages was strongly repressed, and we never hear of it again becoming prevalent.

In the book of Judith, the date of which is laid shortly after the return from Captivity (iv. 3), Moabites and Ammonites are represented as dwelling in their ancient seats and as obeying the call

also in Mic. vi. 9, at the close of the remarkable conversation between Balak and Balaam there preserved, the word יָרִיב occurs again, in such a manner that it is difficult not to believe that the capital city of Moab is intended: "Jehovah's voice crieth unto Ar . . . hear ye the rod, and who hath appointed it."

<sup>a</sup> *Armin.* The same word is used by Amos (ii. 2) in his denunciation of Moab.

<sup>b</sup> There can be no doubt that "Jehoiakim" in this verse should be "Zedekiah." See ver. 3 of the same chap., and xxviii. 1.

<sup>c</sup> Jer. xxiii. 6.

<sup>d</sup> This feeling is brought out very strongly in Jer. lvi. 11, where even the successive devastations from

which Moab had suffered are counted as nothing — as absolute immunity — since captivity had been escaped.

<sup>e</sup> To the incursions of these people, true Arabs, it is possibly due that the LXX. in Is. xv. 9 introduce "Aparbas" — "I will bring Arabs upon Dimon."

<sup>f</sup> The word יָרִיב, rendered "reproach" in Zeph. ii. 8, occurs several times in Nehemiah in reference to the taunts of Sanballat and his companions. (See iv. 4, vi. 13, &c.)

<sup>g</sup> It will be observed that this name occurs in conjunction with Joab, who, if the well-known son of Zeruah, would be a descendant of Ruth the Moabitess. But this is uncertain. [Vol. ii. p. 1297 a.]

of the Assyrian general. Their "princes" (ἀρχόντας) and "governors" (ἡγουμένους) are mentioned (v. 2, vii. 8). The Maccabees, much as they ravaged the country of the Ammonites, do not appear to have molested Moab Proper, nor is the name either of Moab or of any of the towns south of the Arnon mentioned throughout those books. Josephus not only speaks of the district in which Heshbon was situated as "Moabitis" (*Ant.* xiii. 15, § 4; also *B. J.* iv. 8, § 2), but expressly says that even at the time he wrote they were a "very great nation" (*Ant.* i. 11, § 5). (See 5 Macc. xix. 19.)

In the time of Eusebius (*Onomast.* Μωάβ), i. e. cir. A. D. 320, the name appears to have been attached to the district, as well as to the town of Rabbath — both of which were called Moab. It also lingered for some time in the name of the ancient Kir-Moab, which, as Charakmoba, is mentioned by Ptolemy<sup>a</sup> (Reland, *Palæstina*, p. 463), and as late as the Council of Jerusalem, A. D. 536, formed the see of a bishop under the same title (*ib.* p. 533). Since that time the modern name *Kerak* has superseded the older one, and no trace of Moab has been found either in records or in the country itself.

Like the other countries east of Jordan Moab has been very little visited by Europeans, and beyond its general characteristics hardly anything is known of it. The following travellers have passed through the district of Moab Proper, from *Wady Mojeb* on the N. to *Kerak* on the S.: —

Seetzen, March, 1803, and January, 1807. (*U. I. Seetzen's Reisen*, etc., von Prof. Kruse, etc., vol. i. p. 405-426; in. 320-377. Also the editor's notes thereon, in vol. iv.)

Burckhardt, 1812, July 13, to Aug. 4. (*Travels*, London, 1822. See also the notes of Gesenius to the German translation, Weimar, 1824, vol. ii. p. 1061-1064.)

Irby and Mangies, 1818, June 5 to 8. (*Travels in Egypt*, etc., 1822, 8vo; 1847, 12mo. Chap. viii.)

De Sauley, 1851, January. (*Voyage autour de la Mer Morte*, Paris, 1853. Also translated into English.)

Of the character of the face of the country these travellers only give slight reports, and among these there is considerable variation even when the same district is referred to. Thus between *Kerak* and *Rabba*, Irby (141 a) found "a fine country," of great natural fertility, with "reapers at work and the corn luxuriant in all directions;" and the same district is described by Burckhardt as "a very fertile, and large tracts cultivated" (*Syr.* July 15); while De Sauley, on the other hand, pronounces that "from Shihhan (6 miles N. of *Rabba*) to the Wady *Kerak* the country is perfectly bare, not a tree or a bush to be seen" — "Toujours aussi nu . . . pas un arbre, pas un arbrisseau" (*Voyage*, i. 353); which again is contradicted by Seetzen, who not only found the soil very good, but encumbered with wormwood and other shrubs (Seetzen, i. 410). These discrepancies are no doubt partly due to

difference in the time of year, and other temporary causes; but they also probably proceed from the disagreement which seems to be inherent in all descriptions of the same scene or spot by various describers, and which is enough to drive to despair those whose task it is to endeavor to combine them into a single account.

In one thing all agree, the extraordinary number of ruins which are scattered over the country, and which, whatever the present condition of the soil, are a sure token of its wealth in former ages. "Wie schrecklich," says Seetzen, "ist diese Residenz alter Könige und ihr Land verwüstet!" (i. 412).

The whole country is undulating, and, after the general level of the plateau is reached, without any serious inequalities; and in this and the absence of conspicuous vegetation has a certain resemblance to the downs of our own southern counties.

Of the language of the Moabites we know nothing or next to nothing. In the few communications recorded as taking place between them and Israelites no interpreter is mentioned (see *Ruth*; 1 Sam. xxii. 3, 4, &c.). And from the origin of the nation and other considerations we may perhaps conjecture that their language was more a dialect of Hebrew than a different tongue.<sup>b</sup> This indeed would follow from the connection of Lot, their founder, with Abraham. [WRITING, Amer. ed.]

The narrative of Num. xxii. - xxiv. must be founded on a Moabite chronicle, though in its present condition doubtless much altered from what it originally was before it came into the hands of the author of the Book of Numbers. No attempt seems yet to have been made to execute the difficult but interesting task of examining the record, with the view of restoring it to its pristine form.

The following are the names of Moabite persons preserved in the Bible — probably Hebraized in their adoption into the Bible records. Of such a transition we seem to have a trace in Shomer and Shimrith (see below).

Zippor.  
Balak.  
Eglon.  
Ruth

Orpah (עֲרֹפָה).

Mesha (מִשָּׁעַ).

Ithmah (1 Chr. xi. 46).

Shomer (2 K. xii. 21), or Shimrith (2 Chr. xxv. 26).

Sanballat.

Add to these —

Emim, the name by which they called the Rephaim who originally inhabited their country and whom the Ammonites called Zamzumim or Zuzim.

Cemôsh, or Cemish (Jer. xlviii. 7), the deity of the nation.

Of names of places the following may be mentioned:—

Moab, with its compounds, Sedê-Moab, the fields

<sup>a</sup> From the order of the lists as they now stand, and the latitude affixed to Charakmoba, Ptolemy appears to refer to a place south of Petra.

<sup>b</sup> Some materials for an investigation of this subject may be found in the curious variations of some of the Moabite names — Chemosh, Chemish; Kir-araseth, Kir-heres, etc.; Shomer, Shimrith; and — remembering the close connection of Ammon with

Moab — the names of the Ammonite god, Molech, Milcom, Malcham.

<sup>c</sup> If this suggestion is correct — and there must be some truth in it — then this passage of Numbers becomes no less historically important than Gen. xiv., which Ewald (*Geschichte*, i. 73, 131, &c.) with great reason maintains to be the work of a Canaanite chronicler.

of M. (A. V. "the country of M."); Arboth-Moab, the deserts (A. V. the "plains") of M., that is, the part of the Arabah occupied by the Moabites.

Ham-Mishor, the high undulating country of Moab Proper (A. V. "the plain").

Ar, or Ar-Moab (עַר). This Gesenius conjectures to be a Moabite form of the word which in Hebrew appears as Ir (עִיר), a city.

Arnon, the river (אֲרָנוֹן).

Bamoth Baal.

Beer Eilm.

Beth-diblathaim.

Dibon, or Dimon.

Eglaim, or perhaps Eglath-Sheishiya (Is. xv. 8).

Horonaim.

Kiriathaim.

Kirjath-huzoth (Num. xxii. 39; comp. Is. xxiv. 11).

Kir-harasheth, -hareth, -heres.

Kir-Moab.

Luhith.

Medeba.

Nimrim, or Nimrah.

Nobah or Nophah (Num. xxi. 30)

hap-Pisgah.

hap-Peor.

Shaveh-Kariathaim (?)

Zophim.

Zoar.

It should be noticed how large a proportion of these names end in *im*.<sup>a</sup>

For the religion of the Moabites see CHEMOSH, MOLECH, PEOR. [See especially BAAL-PEOR.]

Of their habits and customs we have hardly a trace. The gesture employed by Balak when he found that Balaam's interference was fruitless — "he smote his hands together" — is not mentioned again in the Bible, but it may not on that account have been peculiar to the Moabites. Their mode of mourning, namely, cutting off the hair at the back<sup>b</sup> of the head and cropping the beard (Jer. xlviii. 37), is one which they followed in common with the other non-Israelite nations, and which was forbidden to the Israelites (Lev. xxi. 5), who indeed seem to have been accustomed rather to leave their hair and beard disordered and untrimmed when in grief (see 2 Sam. xix. 24; xiv. 2).

For a singular endeavor to identify the Moabites with the Druses, see Sir G. H. Rose's pamphlet, *The Affghans the Ten Tribes*, etc. (London, 1852), especially the statement therein of Mr. Wood, late British consul at Damascus (p. 154-157). G.

\* **MOAB, COUNTRY** or **FIELD OF** (מִוְאָב) denotes the cultivated ground in the upland (Gen. xxxvi. 35; Num. xxi. 20; Ruth, i. 1, 2, 6, 22, ii. 6, iv. 3; 1 Chr. i. 46, viii. 8). [MOAB.] H.

\* **MOAB, PLAINS** [A. V., but properly **DESERTS**] OF (עֲרֵבְיֹת מִוְאָב), Num. xxii. 1, xxvi. 3, 6, 3, xxxi. 12, xxxiii. 4-50, xxxv. 1, xxxvi. 13; Deut. xxxiv. 1, 8; Josh. viii. 32. [MOAB.] H.

\* **MO'ABITE** (מוֹאָבִי), *Mwab*, Num. xxii. 4; Judg. iii. 28; 2 Sam. viii. 2; 1 K. xi. 33; 2 K. jii. 18, 21, 22, 24, xiii. 20, xxiii. 13, xxiv. 2; מוֹאָבִי, *Mwab*, Vat. *Mwab*, Ezr. ix. 1; מוֹאָבִי,

<sup>a</sup> So also does Shaharaim, a person who had a special connection with Moab (1 Chr. viii. 8).

<sup>b</sup> מוֹאָבִי, as distinguished from מוֹאָבִי.

*Mwab*, Gen. xix. 37; ditto, Vat. -*Be*, Deut. ii. 9, 11, 20, xxiii. 3; 1 Chr. xi. 46; Neh. xiii. 1 1 Esdr. viii. 69; *viol* *Mwab*, Jud. vi. 1 (Vat. and Vulg. omit); fem. מוֹאָבִיָּה, *Mwab*, Vat. -*Be*, 1 K. xi. 1: *Moab*, *Moabites*, *Moabit*, descendant of Moab, or an inhabitant of the country so called. [MOAB.] A.

\* **MO'ABITISS** (מוֹאָבִיָּה): *Mwab*, Vat. -*Be*: *Moabit*, a Moabite woman, Ruth i. 22, ii. 2, 21, iv. 5, 10; 2 Chr. xxiv. 26. A.

\* **MO'ABITISH** (מוֹאָבִי): *Mwab*, Vat. -*Be*: *Moabit*, belonging to MOAB (Ruth ii. 6). A.

**MOADI'AH** (מוֹעֲדֵיָה) [*festival of Jehovah*]: *Maadai*; [Vat. Alex. FA. omit]; FA. *ἐν καιροῖς: Moadia*. A priest, or family of priests, who returned with Zerubbabel. The chief of the house in the time of Joiakim the son of Jeshua was Piltai (Neh. xii. 17). Elsewhere (Neh. xii. 5) called ΜΑΑΔΙΑΗ.

**MOCHMUR, THE BROOK** (ὁ χειμᾶρδος Μοχμοῦρ; [Sin. Μοχμοῦρ]: Alex. omits *Μοχ*: Vulg. omits; Syr. *Nachal de Peor*), a torrent, *i. e.* a small wady — the word "brook" conveys an entirely false impression — mentioned only in Jud. vii. 18 and there as specifying the position of Ekrebel — "near unto Chusi, and upon the brook Mochmur." EKREBEL has been identified, with great probability, by Mr. Van de Velde in *Akrabeh*, a ruined site in the mountains of Central Palestine, equidistant from *Nabulus* and *Seilan*, S. E. of the former and N. E. of the latter; and the torrent Mochmour may be either the *Wady Makfuriyeh*, on the northern slopes of which *Akrabeh* stands, or the *Wady Ahmar*, which is the continuation of the former eastwards.

The reading of the Syriac possibly points to the existence of a sanctuary of Baal-Peor in this neighborhood, but is more probably a corruption of the original name, which was apparently מוֹדִין (Simonis, *Onomasticon*, N. T. etc. p. 111). G.

**MO'DIN** (Μωδῆιν; Alex. Μωδεῖμ, Μωδεῖμ, Μωδαεῖμ, and in chap. ii. Μωδεῖν; Joseph. Μωδεῖμ, and once Μωδεῖν: *Modin*: the Jewish form is, in the Mishna, הַמּוֹדִיִּים, in Joseph ben-

Gorion, ch. xx., הַמּוֹדֵיִר; the Syriac version of Maccabees agrees with the Mishna, except in the absence of the article, and in the usual substitution of *r* for *d*, *Mora'im*), a place not mentioned in either Old or New Testament, though rendered immortal by its connection with the history of the Jews in the interval between the two. It was the native city of the Maccabean family (1 Macc. xiii. 25), and as a necessary consequence contained their ancestral sepulchre (*τάφος*) (ii. 70, ix. 19). Hither Mattathias removed from Jerusalem, where up to that time he seems to have been residing, at the commencement of the Antiochian persecution (ii. 1). It was here that he struck the first blow of resistance, by slaying on the heathen altar which had been erected in the place, both the commissioner of Antiochus and a recreant Jew whom he had induced to sacrifice, and then demolishing the altar. Mattathias himself, and subsequently his sons Judas and Jonathan, were buried in the family tomb, and over them Simon erected a structure which is minutely described in the book of Macc-

bees (xiii. 25-30), and, with less detail, by Josephus (*Ant.* xiii. 6, § 6), but the restoration of which has hitherto proved as difficult a puzzle as that of the mausoleum of Artemisia.

At Modin the Maccabean armies encamped on the eyes of two of their most memorable victories — that of Judas over Antiochus Eupator (2 Macc. xiii. 14), and that of Simon over Cendebæus (1 Macc. xvi. 4) — the last battle of the veteran chief before his assassination. The only indication of the position of the place to be gathered from the above notices is contained in the last, from which we may infer that it was near "the plain" (ἡ πεδίων), i. e. the great maritime lowland of Philistia (ver. 5). By Eusebius and Jerome (*Onom.* Μηδούμ and "Modim") it is specified as near Diospolis, i. e. Lydda; while the notice in the Mishna (*Pesachim*, ix. 2), and the comments of Bartenora and Maimonides, state that it was 15 (Roman) miles from Jerusalem. At the same time the description of the monument seems to imply (though for this see below) that the spot was so lofty<sup>a</sup> as to be visible from the sea, and so near that even the details of the sculpture were discernible therefrom. All these conditions, excepting the last, are tolerably fulfilled in either of the two cities called *Latrân* and *Kubâb*.<sup>b</sup> The former of these is, by the shortest road — that through *Wady Ali* — exactly 15 Roman miles from Jerusalem; it is about 8 English miles from *Lydd*, 15 from the Mediterranean, and 9 or 10 from the river *Rubin*, on which it is probable that Cedron — the position of Cendebæus in Simon's battle — stood. *Kubâb* is a couple of miles further from Jerusalem, and therefore nearer to *Lydd* and to the sea, on the most westerly spur of the hills of Benjamin. Both are lofty, and both apparently — *Latrân* certainly — command a view of the Mediterranean. In favor of *Latrân* are the extensive ancient remains with which the top of the hill is said to be covered (Rob. *Bibl. Res.* iii. 151; Tobler, *Dritte Wand.* 186), though if their age and particulars we have at present no accurate information. *Kubâb* appears to possess no ruins, but on the other hand its name may retain a trace of the monument.

The mediæval and modern tradition<sup>c</sup> places Modin at *Soba*, an eminence south of *Kuriet el-Enab*; but this being not more than 7 miles from Jerusalem, while it is as much as 25 from *Lydd* and 30 from the sea, and also far removed from the plain of Philistia, is at variance with every one of the conditions implied in the records. It has found advocates in our own day in M. de Sauley (*L'Art Judéique*, etc., 377, 378) and M. Salzmänn;<sup>d</sup> the latter of whom explored chambers there which may have been tombs, though he admits that there was nothing to prove it. A suggestive fact, which Dr. Robinson first pointed out, is the want of una-

nimity in the accounts of the mediæval travellers, some of whom, as William of Tyre (viii. 1), place Modin in a position near Emmaus-Nicopolis, Nol (*Annabek*), and Lydda. M. Mislin also — usually so vehement in favor of the traditional sites — has recommended further investigation. If it should turn out that the expression of the book of Maccabees as to the monument being visible from the sea has been misinterpreted, then one impediment to the reception of *Soba* will be removed; but it is difficult to account for the origin of the tradition in the teeth of those which remain.

The descriptions of the tomb by the author of the book of Maccabees and Josephus, who had both apparently seen it, will be most conveniently compared by being printed together.

<p>1 Macc. xiii. 27-30.</p> <p>"And Simon made a building over the sepulchre of his father and his brethren, and raised it aloft to view with polished stone behind and before. And he set up upon it seven pyramids, one against another, for his father and his mother and his four brethren. And on these he made engines of war, and set great pillars round about, and on the pillars he made suits of armour for a perpetual memory; and by the suits of armour ships carved, so that they might be seen by all that sail on the sea. This sepulchre he made at Modin, and it stands unto this day."</p>	<p>Josephus, <i>Ant.</i> xiii. 6, § 6</p> <p>"And Simon built a very large monument to his father and his brethren of white and polished stone. And he raised it up to a great and conspicuous height, and threw cloisters around, and set up pillars of a single stone, a work wonderful to behold: and near to these he built seven pyramids to his parents and his brothers, one for each, terrible to behold both for size and beauty.</p> <p>And these things are preserved even to this day"</p>
--	--

The monuments are said by Eusebius (*Onom.*) to have been still shown when he wrote — A. D. circa 320.

Any restoration of the structure from so imperfect an account as the above can never be anything more than conjecture. Something has been already attempted under MACCABEES (vol. ii. p. 1715). But in its absence one or two questions present themselves. [TOMB, Amer. ed.]

(1.) The "ships" (πλοῖα, *naves*). The sea and its pursuits were so alien to the ancient Jews, and the life of the Maccabean heroes who preceded Simon was — if we except their casual relations with Joppa and Jamnia and the battle-field of the maritime plain — so unconnected therewith, that it is difficult not to suppose that the word is corrupted from what it originally was. This was the view of J. D. Michaelis, but he does not propose any satisfactory word in substitution for πλοῖα (see his suggestion in Grimin, *ad loc.*). True, Simon

tribe of Judah." This difficulty (which however is entirely imaginary, for they do not mention the name of Judah in connection with Modin) would have been "enough to deter him entirely from the task," if he had not "found in the book of Joshua that M'dim (from which Modim is derived) was a part of the territory allotted to the tribe of Judah." Now Middin (not M'dim) was certainly in the tribe of Judah, but not within many miles of the spot in question, since it was one of the six towns which lay in the district immediately bordering on the Dead Sea, probably in the depths of the *Ghor* itself (Josh. xv. 61).

<sup>c</sup> Λίθοι ξεστώ. This Ewald (iv. 388) renders "inscribed, or "graven" — beschrifteten Steinen

<sup>a</sup> Thus the Vulg. of 1 Macc. ii. 1 has *Mons Modin*.

<sup>b</sup> Ewald (*Gench.* iv. 350, note) suggests that the name Modin may be still surviving in *Deir Ma'in*. But is not this questionable on philological grounds? and the position of *Deir Ma'in* is less in accordance with the facts than that of the two named in the text.

<sup>c</sup> See the copious references given by Robinson (*Bibl. Res.* ii. 7. note).

<sup>d</sup> The lively account of M. Salzmänn (*Jérusalem, Étude*, etc., pp. 37, 38), would be more satisfactory if it were less encumbered with mistakes. To name but two. The great obstacle which interposes itself in his quest of Modin is that Eusebius and Jerome state that it was "near Diospolis, on a mountain in the

appears to have been to a certain extent alive to the importance of commerce to his country,<sup>a</sup> and he is especially commemorated for having acquired the harbor of Joppa, and thus opened an inlet for the isles of the sea (1 Macc. xiv. 5). But it is difficult to see the connection between this and the placing of ships on a monument to his father and brothers, whose memorable deeds had been of a different description. It is perhaps more feasible to suppose that the sculptures were intended to be symbolical of the departed heroes. In this case it seems not improbable that during Simon's intercourse with the Romans he had seen and been struck with their war-galleys, no inapt symbols of the fierce and rapid career of Judas. How far such symbolical representation was likely to occur to a Jew of that period is another question.

(2.) The distance at which the "ships" were to be seen. Here again, when the necessary distance of Modin from the sea — *Latrin* 15 miles, *Kabib* 13, *Lydda* itself 10 — and the limited size of the sculptures are considered, the doubt inevitably arises whether the Greek text of the book of Maccabees accurately represents the original. De Sanley (*L'Art Judaïque*, p. 377) ingeniously suggests that the true meaning is, not that the sculptures could be discerned from the vessels in the Mediterranean, but that they were worthy to be inspected by those who were sailors by profession. The consideration of this is recommended to scholars. G.

**MO'ETH** (מֹעֵת: *Medius*). In 1 Esdr. viii. 63, "NOADIAH the son of Binnui" (Ezr. viii. 33), a Levite, is called "Moeth the son of Sabban."

**MOL'ADAH** (מֹלְאָדָה; but in Neh. מֹלְאָדָה [*birth, lineage*]: מֹלְאָדָה, Alex. Μωλαδα; [Καλαδάμ, Vat. 1] Κωλαλαμ, Alex. Μωλαδα; [Vat.] Μωαλαδα, [Rom.] Alex. Μωλαδα; *Molada*), a city of Judah, one of those which lay in the district of "the south," next to Edom. It is named in the original list between Shema and Hazar-gaddah, in the same group with Beer-sheba (Josh. xv. 26); and this is confirmed by another list in which it appears as one of the towns which, though in the allotment of Judah, were given to Simeon (xix. 2). In the latter tribe it remained at any rate till the reign of David (1 Chr. iv. 28), but by the time of the Captivity it seems to have come back into the hands of Judah, by whom it was reinhabited after the Captivity (Neh. xi. 26). It is, however, omitted from the catalogue of the places frequented by David during his wandering life (1 Sam. xxx. 27-31).

In the *Onomasticon* it receives a bare mention under the head of "Molada," but under "Ether" and "Iether" a place named Malatha is spoken of as in the interior of Darona (a district which answered to the *Negeb* or "South" of the Hebrews); and further, under "Arath" or 'Αραμά (*i. e.* Arad) it is mentioned as 4 miles from the latter place and 20 from Hebron. Ptolemy also speaks of a Maliatia as near Elusa. And lastly, Josephus states that Herod Agrippa retired to a certain tower "in Malatha of Idumæa" (*ἐν Μαλάθεις τῆς Ἰδ.*). The requirements of these notices are all very fairly answered by the position of the modern *el-Milh*, a site of ruins of some extent, and

two large wells, one of the regular stations on the road from Petra and *Ain el-Weibeh* to Hebron. *El-Milh* is about 4 English miles from *Tell Arad* 17 or 18 from Hebron, and 9 or 10 due east of Beer-sheba. Five miles to the south is *Ararah*, the *ARORER* of 1 Sam. xxx. 28. It is between 20 and 30 from Elusa, assuming *el-Khulusah* to be that place; and although Dr. Robinson is probably correct in saying that there is no verbal affinity, or only a slight one, between Molada or Malatha and *el-Milh*,<sup>b</sup> yet, taking that slight resemblance into account with the other considerations above named, it is very probable that this identification is correct (see *Bibl. Res.* ii. 201). It is accepted by Wilson (*Lands*, i. 347), Van de Velde (*Memoir*, p. 335), Bonar, and others. G.

**MOLE**, the representative in the A. V. of the Hebrew words *Tinshemeth* and *Chéphôr pèrôth*.

1. *Tinshemeth* (תִּנְשֵׁמֶת: ἀσπάλαξ, Ald. σπάλαξ, in Lev. xi. 30; λάρος, Ald. λάρος: *cygnus, talpa, ibis*). This word occurs in the list of unclean birds in Lev. xi. 18; Deut. xiv. 16, where it is translated "swan" by the A. V.; in Lev. xi. 30, where the same word is found amongst the unclean "creeping things that creep upon the earth," it evidently no longer stands for the name of a bird, and is rendered "mole" by the A. V. adopting the interpretation of the LXX., Vulg., Onkelos, and some of the Jewish doctors. Bochart has, however, shown that the Hebrew *Choled*, the Arabic *Khuld* or *Khild*, denotes the "mole," and has argued with much force in behalf of the "chameleleon" being the *tinshemeth*. The Syriac version and some Arabic MSS. understand "a centipede" by the original word, the Targum of Jonathan a "salamander," some Arabic versions read *sambabras*, which Golius renders "a kind of lizard." In Lev. xi. 30, the "chameleleon" is given by the

The Chameleon. (*Chameleo vulgaris*.)

A. V. as the translation of the Hebrew מֹלְאָדָה, *côach*, which in all probability denotes some larger kind of lizard. [CHAMELEON.] The only clew to an identification of *tinshemeth* is to be found in its etymology, and in the context in which the word occurs. Bochart conjectures that the root *c* from which the Hebrew name of this creature is derived, has reference to a vulgar opinion amongst the ancients that the chameleon lived on air (comp. *Ov. Met.* xv. 411, "Id quoque quod ventis animal nutritur et aura," and see numerous quotations from classical authors cited by Bochart (*Hieroz.* ii. 505). The lung of the chameleon is very large, and when filled with air it renders the body semi-transparent; from the creature's power of abstinence, no doubt arose the fable that it lived on air.

<sup>a</sup> For the notice of this fact I am indebted to the Rev. B. F. Westcott.

<sup>b</sup> By Schwarz (100) the Arabic name is quoted as

*Muladah*; by Stewart (*Tent and Khan*, p. 217) as *el-Melech*.

<sup>c</sup> מֹלְאָדָה, "to breathe," whence מֹלְאָדָה, "breath."

It is probable that the animals mentioned with the *tinshemeth* (Lev. xi. 30) denote different kinds of lizards; perhaps therefore, since the etymology of the word is favorable to that view, the chameleon may be the animal intended by *tinshemeth* in Lev. xi. 30. As to the change of color in the skin of this animal numerous theories have been proposed; but as this subject has no Scriptural bearing, it will be enough to refer to the explanation given by Milne-Edwards, whose paper is translated in vol. xvii. of the *Edinburgh New Philosophical Journal*. The chameleon belongs to the tribe *Dewlosauria*, order *Sauria*; the family inhabits Asia and Africa, and the south of Europe; the *C. vulgaris* is the species mentioned in the Bible. As to the bird *tinshemeth*, see SWAN.

2. *Chéphôr pèrôth* (פְּרוֹר פְּרוֹר); <sup>a</sup> τὰ μάτια: *talpæ*) is rendered "moles" by the A. V. in Is. ii. 20; three MSS. read these two Hebrew words as one, and so the LXX., Vulg., Aquila, Symmachus, and Theodotus, with the Syriac and Arabic versions, though they adopt different interpretations of the word (Bochart, *Hieroz.* ii. 449). It is difficult to see what Hebrew word the LXX. could have read; but compare Schleusner, *Nov. Thes.* in LXX. s. v. *μάταιος*. Gesenius follows Bochart in considering the Hebrew words to be the plural feminine of the noun *chapharpêrâh*,<sup>b</sup> but does not limit the meaning of the word to "moles." Michaelis also (*Suppl. ad Lex. Heb.* p. 876 and 2042) believes the words should be read as one, but that "sepulchres," or "vaults" dug in the rocks are intended. The explanation of Oedmann (*Vermischt. Samm.* iii. 82, 83), that the Hebrew words signify "(a bird) that follows cows for the sake of their milk," and that the goat-sucker (*Caprimulgus Europæus*) is intended, is improbable. Perhaps no reference is made by the Hebrew words (which, as so few MSS. join them, it is better to consider distinct) to any particular animal, but to the holes and burrows of rats, mice, etc., which we know frequent ruins and deserted places. (Harmer's *Observ.* ii. 456.) "Remembering the extent to which we have seen," says Kitto (*Pict. Bib.* on Is. xx.), "the forsaken sites of the East perforated with the holes of various cave-digging animals, we are inclined to suppose that the words might generally denote any animals of this description." Rosenmüller's explanation, "in effossionem, i. e. foramen *Murium*," appears to be decidedly the best proposed; for not only is it the literal translation of the Hebrew, but it is more in accordance with the natural habits of rats and mice to occupy with bats deserted places than it is with the habits of moles, which for the most part certainly frequent cultivated lands, and this no doubt is true of the articular species, *Spalax typhlus*, the mole-rat of Syria and Mesopotamia, which by some has been supposed to represent the mole of the Scriptures; if, moreover, the prophet intended to speak exclusively of "moles," is it not probable that he would have used the term *Choled* (see above)? [WEASEL.] W. H.

MOLECH (מֹלֶכֶת) with the article. except in 1 K. xi. 7 [*the king*]: ἄρχων, in Lev.; † βασι-

<sup>a</sup> "Holes of rats."

<sup>b</sup> חֲפָרֵי פְּרוֹרָה, as if the Hebrew word was from פְּרוֹרָה, "a cow."

λεὺς αὐτῶν, 1 K. xi. 7; ὁ Μολόχ, 2 K. xxiii. 10. and ὁ Μολόχ βασιλεὺς, Jer. xxxii. 35: *Moloch*) The fire-god Molech was the tutelary deity of the children of Ammon, and essentially identical with the Moabitish Chemosh. Fire-gods appear to have been common to all the Canaanite, Syrian, and Arab tribes, who worshipped the destructive element under an outward symbol, with the most inhuman rites. Among these were human sacrifices, purifications and ordeals by fire, devoting of the first-born, mutilation, and vows of perpetual celibacy and virginity. To this class of divinities belonged the old Canaanitish Molech, against whose worship the Israelites were warned by threats of the severest punishment. The offender who devoted his offspring to Molech was to be put to death by stoning; and in case the people of the land refused to inflict upon him this judgment, Jehovah would Himself execute it, and cut him off from among his people (Lev. xviii. 21, xx. 2-5). The root of the word Molech is the same as that of

מֶלֶךְ, *melec*, or "king," and hence he is identified with Maleham ("their king"), in 2 Sam. xii. 30, Zeph. i. 5, the title by which he was known to the Israelites, as being invested with regal honors in his character as a tutelary deity, the lord and master of his people. Our translators have recognized this identity in their rendering of Am. v. 26 (where "your Molech" is literally "your king," as it is given in the margin), following the Greek in the speech of Stephen, in Acts vii. 43. Dr. Geiger, in accordance with his theory that the worship of Molech was far more widely spread among the Israelites than appears at first sight from the Old Testament, and that many traces are obscured in the text, refers "the king," in Is. xxx. 33, to that deity: "for Tophet is ordained of old; yea for the king it is prepared." Again, of the Israelite nation, personified as an adulteress, it is said, "Thou wentest to the king with oil" (Is. lvii. 9); Amaziah the priest of Bethel forsoke Amos to prophecy there, "for it is the king's chapel" (Am. vii. 13); and in both these instances Dr. Geiger would find a disguised reference to the worship of Molech (*Urschrift*, etc., pp. 299-308). But whether his theory be correct or not, the traces of Molech-worship in the Old Testament are sufficiently distinct to enable us to form a correct estimate of its character. The first direct historical allusion to it is in the description of Solomon's idolatry in his old age. He had in his harem many women of the Ammonite race, who "turned away his heart after other gods," and, as a consequence of their influence, high places to Molech, "the abomination of the children of Ammon," were built on "the mount that is facing Jerusalem" — one of the summits of Olivet (1 K. xi. 7). Two verses before, the same deity is called MILCOM, and from the circumstance of the two names being distinguished in 2 K. xxiii. 10, 13, it has been inferred by Movers, Ewald, and others, that the two deities were essentially distinct. There does not appear to be sufficient ground for this conclusion. It is true that in the later history of the Israelites the worship of Molech is connected with the Valley of Hinnom, while the high place of Milcom was on the Mount of Olives, and that no mention is made of human sacrifices to the latter. But it seems impossible to resist the conclusion that in 1 K. xi. "Milcom the abomination of the Ammonites," in ver. 5, is the same as "Molech the

abomination of the children of Ammon," in ver. 7. To avoid this Movers contends, not very convincingly, that the latter verse is by a different hand. Be this as it may, in the reformation carried out by Josiah, the high place of Milcom, on the right hand of the Mount of Corruption, and Tophet in the valley of the children of Hinnoim were defiled, that "no man might make his son or his daughter to pass through the fire to Molech" (2 K. xxiii. 10, 13). In the narrative of Chronicles these are included under the general term "Baalin," and the apostasy of Solomon is not once alluded to. Tophet soon appears to have been restored to its original uses, for we find it again alluded to, in the reign of Zedekiah, as the scene of child-slaughter and sacrifice to Molech (Jer. xxxii. 35).

Most of the Jewish interpreters, Jarchi (on Lev. xviii. 21), Kimchi, and Maimonides (*Mor. Neb.* iii. 38) among the number, say that in the worship of Molech the children were not burnt but made to pass between two burning pyres, as a purificatory rite. But the allusions to the actual slaughter are too plain to be mistaken, and Aben Ezra in his note on Lev. xviii. 21, says that "to cause to pass through" is the same as "to burn." "They sacrificed their sons and their daughters unto devils, and shed innocent blood, the blood of their sons and of their daughters, whom they sacrificed unto the idols of Canaan" (Ps. cvi. 37, 38). In Jer. vii. 31, the reference to the worship of Molech by human sacrifice is still more distinct: "they have built the high places of Tophet . . . to burn their sons and their daughters in the fire," as "burnt-offerings unto Baal," the sun-god of Tyre, with whom, or in whose character, Molech was worshipped (Jer. xix. 5). Compare also Deut. xii. 31; Ez. xvi. 20, 21, xxiii. 37. But the most remarkable passage is that in 2 Chr. xxviii. 3, in which the wickedness of Ahaz is described: "Moreover, he burnt incense in the valley of the son of Hinnoim, and burnt (וַיִּבְרַח) his children in the fire, after the abominations of the nations whom Jehovah had driven out before the children of Israel." Now, in the parallel narrative of 2 K. xvi. 3, instead of וַיִּבְרַח, "and he burnt," the reading is וַיַּעֲבִיר, "he made to pass through," and Dr. Geiger suggests that the former may be the true reading, of which the latter is an easy modification, serving as a euphemistic expression to disguise the horrible nature of the sacrificial rites. But it is more natural to suppose that it is an exceptional instance, and that the true reading is וַיַּעֲבִיר, than to assume that the other passages have been intentionally altered.<sup>a</sup> The worship of Molech is evidently alluded to, though not expressly mentioned, in connection with star-worship and the worship of Baal in 2 K. xvii. 16, 17, xxi. 5, 6, which seems to show that Molech, the flame-god, and Baal, the sun-god, whatever their distinctive attributes, and whether or not the latter is a general appellation including the former, were worshipped with the same rites. The sacrifice of children is said by Movers to have been not so much an expiatory, as a purificatory rite, by which the victims were purged from the fross of the body and attained union with the

deity. In support of this he quotes the myth of Baaltis or Isis, whom Malcander, king of Byblus, employed as nurse for his child. Isis suckled the infant with her finger, and each night burnt whatever was mortal in its body. When Astarte the mother saw this she uttered a cry of terror, and the child was thus deprived of immortality (*Plut. Is. & Os.* ch. 16). But the sacrifice of Mesha king of Moab, when, in despair at failing to cut his way through the overwhelming forces of Judah, Israel, and Edom, he offered up his eldest son a burnt-offering, probably to Chemosh, his national divinity, has more of the character of an expiatory rite to appease an angry deity, than of a ceremonial purification. Besides, the passage from Plutarch bears evident traces of Egyptian, if not of Indian influence.

According to Jewish tradition, from what source we know not, the image of Molech was of brass, hollow within, and was situated without Jerusalem. Kimchi (on 2 K. xxiii. 10) describes it as "set within seven chapels, and whoso offered fine flour they open to him one of them, (whoso offered) turtle-doves or young pigeons they open to him two; a lamb, they open to him three; a ram, they open to him four; a calf, they open to him five; an ox, they open to him six, and so whoever offered his son they open to him seven. And his face was (that) of a calf, and his hands stretched forth like a man who opens his hands to receive (something) of his neighbor. And they kindled it with fire, and the priests took the babe and put it into the hands of Molech, and the babe gave up the ghost. And why was it called Tophet and Hinnoim? Because they used to make a noise with drums (*to-phim*), that the father might not hear the cry of his child and have pity upon him, and return to him. Hinnoim, because the babe wailed (*מְנַהֵם*, *menahem*), and the noise of his wailing went up. Another opinion (is that it was called) Hinnoim, because the priests used to say—"May it profit (*וְהָיָה*) thee! may it be sweet to thee! may it be of sweet savor to thee!" All this detail is probably as fictitious as the etymologies are unsound, but we have nothing to supply its place. Selden conjectures that the idea of the seven chapels may have been borrowed from the worship of Mithra, who had seven gates corresponding to the seven planets, and to whom men and women were sacrificed (*De Dis Syr. Synt.* i. c. 6). Benjamin of Tudela describes the remains of an ancient Ammonite temple which he saw at Gebal, in which was a stone image richly gilt seated on a throne. On either side sat two female figures, and before it was an altar on which the Ammonites anciently burned incense and offered sacrifice (*Early Travels in Palestine*, p. 79, Bohn). By these chapels Lightfoot explains the allusion in Am. v. 26; Acts vii. 43, to "the tabernacle of Molech;" "these seven chapels (if there be truth in the thing) help us to understand what is meant by Molech's tabernacle, and seem to give some reason why in the Prophet he is called *Siccuth*, or the *Covert God*, because he was retired within so many *Cancelli* (for that word Kimchi useth) before one could come at him." (*Comm. on Acts vii.* 43). It was

<sup>a</sup> We may infer from the expression, "after the abominations of the nations whom Jehovah had driven out before the children of Israel," that the

character of the Molech-worship of the time of Ahaz was essentially the same as that of the old Canaanites, although Movers maintains the contrary.

more probably a shrine or ark in which the figure of the god was carried in processions, or which contained, as Movers conjectures, the bones of children who had been sacrificed and were used for magical purposes. [AMMON, vol. i. p. 85 a.]

Many instances of human sacrifices are found in ancient writers, which may be compared with the descriptions in the Old Testament of the manner in which Molech was worshipped. The Carthaginians, according to Augustine (*De Civit. Dei*, vii. 19), offered children to Saturn, and by the Gauls even grown-up persons were sacrificed, under the idea that of all seeds the best is the human kind. Eusebius (*Præp. Ev.* iv. 16) collected from Porphyry numerous examples to the same effect, from which the following are selected. Among the Rhodians a man was offered to Kronos on the 6th July; afterwards a criminal condemned to death was substituted. The same custom prevailed in Salamis, but was abrogated by Diiphilus king of Cyprus, who substituted an ox. According to Manetho, Amosis abolished the same practice in Egypt at Heliopolis sacred to Juno. Sanchoniatho relates that the Phœnicians, on the occasion of any great calamity, sacrificed to Saturn one of their relatives. Istrus says the same of the Curetes, but the custom was abolished, according to Pallas, in the reign of Hadrian. At Laodicea a virgin was sacrificed yearly to Athene, and the Dumatii, a people of Arabia, buried a boy alive beneath the altar each year. Diodorus Siculus (xx. 14) relates that the Carthaginians, when besieged by Agathocles tyrant of Sicily, offered in public sacrifice to Saturn 200 of their noblest children, while others voluntarily devoted themselves to the number of 300. His description of the statue of the god differs but slightly from that of Molech, which has been quoted. The image was of brass, with its hands outstretched towards the ground in such a manner that the child when placed upon them fell into a pit full of fire.

Molech, "the king," was the lord and master of the Ammonites; their country was his possession (Jer. xlix. 1), as Moab was the heritage of Chemosh; the princes of the land were the princes of Malcham (Jer. xlix. 3; Am. i. 15). His priests were men of rank (Jer. xlix. 3), taking precedence of the princes. So the priest of Hercules at Tyre was second to the king (Justin. xviii. 4, § 5), and like Molech, the god himself, Baal Chamman, is *Melkart*, "the king of the city." The priests of Molech, like those of other idols, were called Chemarim (2 K. xxxiii. 5; Hos. x. 5; Zeph. i. 4).

Traces of the root from which Molech is derived are to be found in the Milichus, Malica, and Malcander of the Phœnicians; with the last mentioned may be compared Adrammelech, the fire-god of Sepharvaim. These, as well as Chemosh the fire-god of Moab, Urotal, Dusares, Sair, and Thyandrites, of the Edonites and neighboring Arab tribes, and the Greek Dionysus, were worshipped under the symbol of a rising flame of fire, which was imitated in the stone pillars erected in their honor (Movers, *Phæn.* i. c. 9). Tradition refers the origin of the fire-worship to Chaldaea. Abraham and his ancestors are said to have been fire-worshippers, and the Assyrian and Chaldaean armies took with them the sacred fire accompanied by the Magi.

There remains to be noticed one passage (2 Sam. xii. 31) in which the Hebrew written text has

מֶלֶךְ, *malcân*, while the marginal reading is

מֶלֶךְ, *malcân*, which is adopted by our translators in their rendering "brick-kiln." Kimchi explains *malcân* as "the place of Molech," where sacrifices were offered to him, and the children of Ammon made their sons to pass through the fire. And Milcom and Malken, he says, are one.<sup>a</sup> On the other hand Movers, rejecting the points, reads מֶלֶךְ, *malcân*, "our king," which he explains as the title by which he was known to the Ammonites. Whatever may be thought of these interpretations, the reading followed by the A. V. is scarcely intelligible. W. A. W.

MO'LI (Μολί [Vat. -λει]: *Moholi*). MAHLI, the son of Merari (1 Esdr. viii. 47; comp. Ezr. viii. 18).

MO'LI'D (מוליד [begetter]: Μωήλ; Alex. Μοδαδ: *Molid*). The son of Abishur by his wife Abihail, and descendant of Jerahmeel (1 Chr. ii. 29).

MO'LOCH. The Hebrew corresponding to "your Moloch" in the A. V. of Amos v. 26 is מֶלֶךְ, *malkeken*, "your king," as in the margin. In accordance with the Greek of Acts vii. 43 (ὁ Μολόχ: *Moloch*), which followed the LXX. of Amos, our translators have adopted a form of the name MOLECH which does not exist in Hebrew. Kimchi, following the Targum, takes the word as an appellative, and not as a proper name, while with regard to *siccuth* (סִכְוֹתָ, A. V. "tabernacle") he holds the opposite opinion. His note is as follows: "*Siccuth* is the name of an idol; and (as for) *malkeken* he spake of a star which was made an idol by its name, and he calls it 'king,' because they thought it a king over them, or because it was a great star in the host of heaven, which was as a king over his host; and so 'to burn incense to the queen of heaven,' as I have explained in the book of Jeremiah." Gesenius compares with the "tabernacle" of Moloch the sacred tent of the Carthaginians mentioned by Diodorus (xx. 65). Rosenmüller, and after him Ewald, understood by *siccuth* a pole or stake on which the figure of the idol was placed. It was more probably a kind of palanquin in which the image was carried in processions, a custom which is alluded to in Is. xlvi. 1; Epist. of Jer. 4 (Selden, *De Dis Syr. Synt.* i. c. 6). W. A. W.

\* MOLTEN IMAGE. [IDOL, 21.]

\* MOLTEN SEA. [SEA, MOLTEN.]

MOM'DIS (Μομδῖος; [Vat. Μομδεις]; Alex. Μομδεις: *Moadius*). The same as MAADAI, of the sons of Bani (1 Esdr. ix. 34; comp. Ezr. x. 34).

MONEY. This article treats of two principal matters, the uncoined money and the coined money mentioned in the Bible. Before entering upon the first subject of inquiry, it will be necessary to speak of uncoined money in general, and of the antiquity of coined money. An account of the principal monetary systems of ancient times is an equally need-

<sup>a</sup> The crown of Malcham, taken by David at Babab, is said to have had in it a precious stone (a magnet, according to Kimchi), which is described by Cyril

on Amos as transparent and like the day-star, whence Molech has groundlessly been identified with the planet Venus (Vossius, *De Orig. Idol.*, ii. c. 5, p. 331).

ful introduction to the second subject, which requires a special knowledge of the Greek coinages. A notice of the Jewish coins, and of the coins current in Judæa as late as the time of Hadrian, will be interwoven with the examination of the passages in the Bible and Apocrypha relating to them, instead of being separately given.

1. UNCOINED MONEY. 1. *Uncoined Money in general.* — It has been denied by some that there ever has been any money not coined, but this is merely a question of terms. It is well known that ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, on which gold and silver are shown to have been kept in the form of rings (see *cut*, p. 1995). The gold rings found in the Celtic countries have been held to have had the same use. It has indeed been argued that this could not have been the case with the latter, since they show no monetary system; yet it is evident from their weights that they all contain complete multiples or parts of a unit, so that we may fairly suppose that the Celts, before they used coins, had, like the ancient Egyptians, the practice of keeping money in rings, which they weighed when it was necessary to pay a fixed amount. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting among the Egyptians. With them the practice mounts up to a remote age, and was probably as constant, and perhaps as regulated with respect to the weight of the rings, as a coinage. It can scarcely be doubted that the highly civilized rivals of the Egyptians, the Assyrians and Babylonians, adopted if they did not originate this custom, clay tablets having been found specifying grants of money by weight (Rawlinson, *Her.* vol. i. p. 684); and there is therefore every probability that it obtained also in Palestine, although seemingly unknown in Greece in the time before coinage was there introduced. There is no trace in Egypt, however, of any different size in the rings represented, so that there is no reason for supposing that this further step was taken towards the invention of coinage.

2. *The Antiquity of Coined Money.* — Respecting the origin of coinage, there are two accounts seemingly at variance: some saying that Phidon king of Argos first struck money, and according to Ephorus, in Ægina; but Herodotus ascribing its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, the latter to that of Asiatic Greece; for it seems, judging from the coins themselves, that the electrum staters of the cities of the coast of Asia Minor were first issued as early as the silver coins of Ægina, both classes appearing to comprise the most ancient pieces of money that are known to us. When Herodotus speaks of the Lydians, there can be no doubt that he refers not to the currency of Lydia as a kingdom, which seems to commence with the darics and similar silver pieces now found near Sardis, and probably at the time of Cæresus, being perhaps the same as the staters of Cæresus (*Κροισεῖοι*, Jul. Poll.), of the ancients; but that he intends the money of Greek cities at the time when the coins were issued or later under the authority of the Lydians. If we conclude that coinage commenced in European and Asiatic Greece about the same time, the next question is whether we can approximately determine the date. This is extremely difficult, since there are no coins of known period before the time of the

expedition of Xerxes. The pieces of that age are of so archaic a style, that it is hard, at first sight, to believe that there is any length of time between them and the rudest and therefore earliest of the coins of Ægina or the Asiatic coast. It must, however, be recollected that in some conditions of art its growth or change is extremely slow, and that this was the case in the early period of Greek art seems evident from the results of the excavations on what we may believe to be the oldest sites in Greece. The lower limit obtained from the evidence of the coins of known date, may perhaps be conjectured to be two, or at most three, centuries before their time; the higher limit is as vaguely determined by the negative evidence of the Homeric writings, of which we cannot guess the age, excepting as before the first Olympiad. On the whole it seems reasonable to carry up Greek coinage to the 8th century B. C. Purely Asiatic coinage cannot be taken up to so early a date. The more archaic Persian coins seem to be of the time of Darius Hystaspis, or possibly Cyrus, and certainly not much older, and there is no Asiatic money, not of Greek cities, that can be reasonably assigned to an early period. Cæresus and Cyrus probably originated this branch of the coinage, or else Darius Hystaspis followed the example of the Lydian king. Coined money may therefore have been known in Palestine as early as the fall of Samaria, but only through commerce with the Greeks, and we cannot suppose that it was then current there.

3. *Notices of Uncoined Money in the O. T.* — There is no distinct mention of coined money in the books of the O. T. written before the return from Babylon. The contrary was formerly supposed to be the case, partly because the word shekel has a vague sense in later times, being used for a coin as well as a weight. Since however there is some seeming ground for the older opinion, we may here examine the principal passages relating to money, and the principal terms employed, in the books of the Bible written before the date above mentioned.

In the history of Abraham we read that Abimelech gave the patriarch "a thousand [pieces] of silver," apparently to purchase veils for Sarah and her attendants; but the passage is extremely difficult (Gen. xx. 16). The LXX. understood shekels to be intended (*χιλία διδραχμα*, *l. c.* also ver. 14), and there can be no doubt that they were right, though the rendering is accidentally an unfortunate one, their equivalent being the name of a coin. The narrative of the purchase of the burial place from Ephron gives us further insight into the use of money at that time. It is related that Abraham offered "full silver" for it, and that Ephron valued it at "four hundred shekels of silver," which accordingly the patriarch paid. We read, "And Abraham hearkened unto Ephron; and Abraham weighed (*וַיִּשְׁקַל*) to Ephron the silver, which he had named in the audience of the sons of Heth, four hundred shekels of silver, current with the merchant" (*עֶבֶר לְפֹתָר*), xxiii. 3 *ad fin.* esp. 9, 16). Here a currency is clearly indicated like that which the monuments of Egypt show to have been there used in a very remote age; for the weighing proves that this currency, like the Egyptian, did not bear the stamp of authority, and was therefore weighed when employed in commerce. A similar purchase is recorded of Jacob, who bought a parcel of a field at Shelem for a hundred kesitahs (xxxiii

18, 19). The occurrence of a name different from shekel, and, unlike it, not distinctly applied in any other passage to a weight, favors the idea of coined money. But what is the *kesith* (קֶסֶת)? The old interpreters supposed it to mean a lamb, and it has been imagined to have been a coin bearing the figure of a lamb. There is no known etymological ground for this meaning, the lost root, if we com-

pare the Arabic قَسَطَ, "he or it divided equally," being perhaps connected with the idea of division. Yet the sanction of the LXX., and the use of weights having the forms of lions, bulls, and geese, by the Egyptians, Assyrians, and probably Persians,

From Lepsius, *Denkmäler*, Abth. iii. Bl. 39, No. 3. See also Wilkinson's *Anc. Eg.* ii. 10, for weights in the form of a crouching antelope: and comp. Layard's *Nin. and Bab.* pp. 600-602.

must make us hesitate before we abandon a rendering so singularly confirmed by the relation of the Latin *pecunia* and *pecus*. Throughout the history of Joseph we find evidence of the constant use of money in preference to barter. This is clearly shown in the case of the famine, when it is related that all the money of Egypt and Canaan was paid for corn, and that then the Egyptians had recourse to barter (xlvi. 13-26). It would thence appear that money was not very plentiful. In the narrative of the visits of Joseph's brethren to Egypt, we find that they purchased corn with money, which was, as in Abraham's time, weighed silver, for it is spoken of by them as having been restored to their sacks in "its [full] weight" (xliii. 21). At the time of the exodus, money seems to have been still weighed, for the ransom ordered in the Law is stated to be half a shekel for each man — "half a shekel after the shekel of the sanctuary [of] twenty gerahs the shekel" (Ex. xxx. 13). Here the shekel is evidently a weight, and of a special system of which the standard examples were probably kept by the priests. Throughout the Law, money is spoken of as in ordinary use; but only silver money, gold being mentioned as valuable, but not clearly as used in the same manner. This distinction appears at the time of the conquest of Canaan, when covetous Achan found in Jericho "a goodly Babylonish garment, and two hundred shekels of silver, and a tongue of gold of fifty shekels weight" (Josh. vii. 11). Throughout the period before the return from Babylon this distinction seems to obtain: whenever anything of the character of money is mentioned the usual metal is silver, and gold generally occurs

as the material of ornaments and costly works. A passage in Isaiah has indeed been supposed to show the use of gold coins in that prophet's time: speaking of the makers of idols, he says, "They lavish gold out of the bag, and weigh silver in the balance" (xlv. 6). The mention of a bag is, however, a very insufficient reason for the supposition that the gold was coined money. Rings of gold may have been used for money in Palestine as early as this time, since they had been long previously so used in Egypt; but the passage probably refers to the people of Babylon, who may have had uncoined money in both metals like the Egyptians. A still more remarkable passage would be that in Ezekiel, which Gesenius supposes (*Lex.* s. v. כְּהֶפְזָר) to mention brass as money, were there any sound reason for following the Vulg. in the literal rendering of כְּהֶפְזָר כְּהֶפְזָר, *quia effusum est aes tuum*, instead of reading "because thy filthiness was poured out" with the A. V. (xvi. 36). The context does indeed admit the idea of money, but the sense of the passage does not seem to do so, whereas the other translation is quite in accordance with it, as well as philologically admissible (see Gesen. *Lex.* l. c.). The use of brass money at this period seems unlikely, as it was of later introduction in Greece than money of other metals, at least silver and electrum: it has, however, been supposed that there was an independent copper coinage in further Asia before the introduction of silver money by the Seleucidæ and the Greek kings of Bactriana.

We may thus sum up our results respecting the money mentioned in the books of Scripture written before the return from Babylon. From the time of Abraham silver money appears to have been in general use in Egypt and Canaan. This money was weighed when its value had to be determined, and we may therefore conclude that it was not of a settled system of weights. Since the money of Egypt and that of Canaan are spoken of together in the account of Joseph's administration during the famine, we may reasonably suppose they were of the same kind; a supposition which is confirmed by our finding, from the monuments, that the Egyptians used uncoined money of gold and of silver. It is even probable that the form in both cases was similar or the same, since the ring-money of Egypt resembles the ordinary ring-money of the Celts, among whom it was probably first introduced by the Phœnician traders, so that it is likely that this form generally prevailed before the introduction of coinage. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra, when other evidence equally shows that it was current in Palestine, its general use being probably a very recent change. This first notice of coinage, exactly when we should expect it, is not to be overlooked as a confirmation of the usual opinion as to the dates of the several books of Scripture founded on their internal evidence and the testimony of ancient writers; and it lends no support to those theorists who attempt to show that there have been great changes in the text. Minor confirmations of this nature will be found in the later part of this article.

II. COINED MONEY. 1. *The Principal Monetary Systems of Antiquity.* — Some notice of the principal monetary systems of antiquity, as determined by the joint evidence of the coins and of ancient writers, is necessary to render the next

section comprehensible. We must here distinctly lay down what we mean by the different systems with which we shall compare the Hebrew coinage, as current works are generally very vague and discordant on this subject. The common opinions respecting the standards of antiquity have been formed from a study of the statements of writers of different age and authority, and without a due discrimination between weights and coins. The coins, instead of being taken as the basis of all hypotheses, have been cited to confirm or refute previous theories, and thus no legitimate induction has been formed from their study. If the contrary method is adopted, it has firstly the advantage of resting upon the indisputable authority of monuments which have not been tampered with; and, in the second place, it is of an essentially inductive character. The result simplifies the examination of the statements of ancient writers, by showing that they speak of the same thing by different names on account of a change which the coins at once explain, and by indicating that probably at least one talent was only a weight, not used for coined money unless weighed in a mass.

The earliest Greek coins, by which we here intend those struck in the age before the Persian War, are of three talents or standards: the Attic, the Æginetan, and the Macedonian or earlier Phœnician. The oldest coins of Athens, of Ægina, and of Macedon and Thrace, we should select as typical respectively of these standards; obtaining as the weight of the Attic drachm about 67·5 grains troy; of the Æginetan, about 96; and of the Macedonian, about 58 — or 116, if its drachm be what is now generally held to be the didrachm. The electrum coinage of Asia Minor probably affords examples of the use by the Greeks of a fourth talent, which may be called the later Phœnician, if we hold the staters to have been tetradrachms, for their full weight is about 248 grs.; but it is possible that the pure gold which they contain, about 186 grs., should alone be taken into account, in which case they would be didrachms on the Æginetan standard. Their division into sixths (hectæ) may be urged on either side. It may be supposed that the division into oboli was retained; but then the half hecta has its proper name, and is not called an obolus. However this may be, the gold and silver coins found at Sardis, which we may reasonably assign to Croesus, are of this weight, and may be taken as its earliest examples, without of course proving it was a Greek system. They give a tetradrachm, or equivalent, of about 246 grains, and a drachm of 61·5; but neither of these coins is found of this early period. Among these systems the Attic and the Æginetan are easily recognized in the classical writers; and the Macedonian is probably their Alexandrian talent of gold and silver, to be distinguished from the Alexandrian talent of copper. Respecting the two Phœnician talents there is some difficulty. The Euboic talent of the writers we recognize nowhere in the coinage. It is useless to search for isolated instances of Euboic weight in Eubœa and elsewhere, when the coinage of the island and ancient coins generally afford no class on the stated Euboic weight. It is still more unsound to force an agree-

ment between the Macedonian talent of the coins and the Euboic of the writers. It may be supposed that the Euboic talent was never used for money; and the statement of Herodotus, that the king of Persia received his gold tribute by this weight, may mean no more than that it was weighed in Euboic talents. Or perhaps the nearness of the Euboic talent to the Attic caused the coins struck on the two standards to approximate in their weights; as the Cretan coins on the Æginetan standard were evidently lowered in weight by the influence of the Asiatic ones on the later Phœnician standard.

We must now briefly trace the history of these talents.

(a.) The Attic talent was from a very early period the standard of Athens. If Solon really reduced the weight, we have no money of the city of the older currency. Corinth followed the same system; and its use was diffused by the great influence of these two leading cities. In Sicily and Italy, after, in the case of the former, a limited use of the Æginetan talent, the Attic weight became universal. In Greece Proper the Æginetan talent, to the north the Macedonian, and in Asia Minor and Africa the later Phœnician, were long its rivals, until Alexander made the Attic standard universal throughout his empire, and Carthage alone maintained an independent system. After Alexander's time the other talents were partly restored, but the Attic always remained the chief. From the earliest period of which we have specimens of money on this standard to the time of the Roman dominion it suffered a great depreciation, the drachm falling from 67·5 grains to about 65·5 under Alexander, and about 55 under the early Cæsars. Its later depreciation was rather by adulteration than by lessening of weight.

(b.) The Æginetan talent was mainly used in Greece Proper and the islands, and seems to have been annihilated by Alexander, unless indeed afterwards restored in one or two remote towns, as Leucas in Acarnania, or by the general issue of a coin equally assignable to it or the Attic standard as a hemidrachm or a *tetrololon*.

(c.) The Macedonian talent, besides being used in Macedon and in some Thracian cities before Alexander, was the standard of the great Phœnician cities under Persian rule, and was afterwards restored in most of them. It was adopted in Egypt by the first Ptolemy, and also mainly used by the later Sicilian tyrants, whose money we believe imitates that of the Egyptian sovereigns. It might have been imagined that Ptolemy did not borrow the talent of Macedon, but struck money on the standard of Egypt, which the commerce of that country might have spread in the Mediterranean in a remote age, had not a recent discovery shown that the Egyptian standard of weight was much heavier, and even in excess of the Æginetan drachm, the unit being above 140 grs., the half of which, again, is greater than any of the drachms of the other three standards. It cannot therefore be compared with any of them.

(d.) The later Phœnician talent was always used for the official coinage of the Persian kings and commanders,<sup>a</sup> and after the earliest period was very

<sup>a</sup> Mr. Waddington has shown (*Mélanges de Numismatique*) that the so-called coins of the satraps were never issued excepting when these governors were in command of expeditions, and were therefore invested

with special powers. This discovery explains the putting to death of Aryandes, satrap of Egypt, for striking a coinage of his own.

general in the Persian empire. After Alexander, it was scarcely used excepting in coast-towns of Asia Minor, at Carthage, and in the Phœnician town of Aradus.

Respecting the Roman coinage it is only necessary here to state that the origin of the weights of its gold and silver money is undoubtedly Greek, and that the denarius, the chief coin of the latter metal, was under the early emperors equivalent to the Attic drachm, then greatly depreciated.

2. *Coined Money mentioned in the Bible.*—The earliest distinct mention of coins in the Bible is held to refer to the Persian money. In Ezra (ii. 69, viii. 27) and Nehemiah (vii. 70, 71, 72) current gold coins are spoken of under the name **דְּרַכְמֵי**, **אֲדָרְכָּיִם**, which only occurs in the plural, and appears to correspond to the Greek *στρατήρ Δαρεικός* or *Δαρεικός*, the Daric of numismatists. The renderings of the LXX. and Vulg., *χρυσούς, solidus, drachma*, especially the first and second, lend weight to the idea that this was the standard gold coin at the time of Ezra and Nehemiah, and this would explain the use of the same name in the First Book of Chronicles (xxix. 7), in the account of the offerings of David's great men for the Temple, where it would be employed instead of shekel, as a Greek would use the term stater. [See Art. DARIC.]

**Daric.** Obv.: King of Persia to the right, kneeling, bearing bow and javelin. Rev.: Irregular incuse square. British Museum.

The Apocrypha contains the earliest distinct allusion to the coining of Jewish money, where it is narrated, in the First Book of Maccabees, that Antiochus VII. granted to Simon the Maccabee permission to coin money with his own stamp, as well as other privileges (*Kal ἐπέτρεψά σοι ποιῆσαι νόμισμα Ἰσραὴλ νόμισμα πῆ ἡ χάρις σου.* xv. 6). This was in the fourth year of Simon's pontificate, B. C. 140. It must be noted that Demetrius II. had in the first year of Simon, B. C. 143, made a most important decree granting freedom to the Jewish people, which gave occasion to the dating of their contracts and covenants,—"In the first year of Simon the great high-priest, the leader, and chief of the Jews" (xiii. 34-42), a form which Josephus gives differently, "In the first year of Simon, benefactor of the Jews, and ethnarch" (*Ant.* xiii. 6).

The earliest Jewish coins were until lately considered to have been struck by Simon on receiving the permission of Antiochus VII. They may be thus described, following M. de Sauley's arrangement:—

SILVER.

1. שקל ישראל, "Shekel of Israel." Vase, above which ש [Year] 1.  
ירושלם הקדושה, "Jerusalem the holy." Branch bearing three flowers. A.

2. השקל הכזי, "Half-shekel." Same type and date.

3. שקל ישראל, "Shekel of Israel." Same type, above which שנת ב (ב), "Year 2."  
ירושלם הקדושה. Same type. A.
4. חצי השקל. "Half-shekel." Same type and date.  
ירושלם הקדושה. Same type. A.

5. שקל ישראל, "Shekel of Israel." Same type, above which שנת ג (ג), "Year 3."  
ירושלם הקדושה. Same type. A (Cut) R. M.

COPPER.

1. שנת ארבע חצי, "Year four: Half" A fruit, between two sheaves?  
לגאלת ציון, "Of the redemption of Zion." Palm-tree between two baskets? A.

2. שנת ארבע רביע, "Year four: Quarter Two sheaves?"  
לגאלת ציון, "Of the redemption of Zion." A fruit. A. (Cut) Mr. Wigan's collection.
3. שנת ארבע, "Year four." A sheaf between two fruits?

לְגַאֲלַת צִיּוֹן יִצְרָאֵל, "Of the redemption of Zion." Vase. *Æ.* (Cut) Wigan.

The average weight of the silver coins is about 520 grains troy for the shekel, and 110 for the half-shekel.<sup>a</sup> The name, from שֶׁקֶל, shows that the shekel was the Jewish stater. The determination of the standard weight of the shekel, which, be it remembered, was a weight as well as a coin, and of its relation to the other weights used by the Hebrews, belongs to another article [WEIGHTS AND MEASURES]; here we have only to consider its relation to the different talents of antiquity. The shekel corresponds almost exactly to the tetradrachm or didrachm of the earlier Phœnician talent in use in the cities of Phœnicia under Persian rule, and after Alexander's time at Tyre, Sidon, and Berytus, as well as in Egypt. It is represented in the LXX. by didrachm, a rendering which has occasioned great difficulty to numismatists. Col. Leake suggested, but did not adopt, what we have no doubt is the true explanation. After speaking of the shekel as probably the Phœnician and Hebrew unit of weight, he adds: "This weight appears to have been the same as the Egyptian unit of weight, for we learn from Herodotus that the *Μονάς*, or unit, which they held to be the basis of all numeration, was equal to two drachmæ; and *διδραχμῶν* is employed synonymously with *σίκλος* for the Hebrew word shekel by the Greek Septuagint; consequently, the shekel and the didrachmon were of the same weight. I am aware that some learned commentators are of opinion that the translators here meant a didrachmon of the Græco-Egyptian scale, which weighed about 110 grains; but it is hardly credible that *διδραχμῶν* should have been thus employed without any distinguishing epithet, at a time when the Ptolemaic scale was yet of recent origin [in Egypt], the word didrachmon on the other hand, having for ages been applied to a silver money, of about 130 grains, in the currency of all cities which follow the Attic or Corinthian standard, as well as in the silver money of Alexander the Great and [most of] his successors. In all these currencies, as well as in those of Lydia and Persia, the stater was an Attic didrachmon, or, at least, with no greater difference of standard than occurs among modern nations using a denomination of weight or measure common to all; and hence the word *διδραχμῶν* was at length employed as a measure of weight, without any reference to its origin in the Attic drachma. Thus we find the drachma of gold described as equivalent to ten didrachma, and the half-shekel of the Pentateuch, translated by the Septuagint τὸ ἥμισυ τοῦ διδράχμου. There can be no doubt, therefore, that the Attic, and not the Græco-Egyptian didrachmon, was intended by

them." He goes on to conjecture that Moses adopted the Egyptian unit, and to state the importance of distinguishing between the Mosaic weight and the extant Jewish shekel. "It appears," he continues, "that the half-shekel of ransom had, in the time of our Saviour, been converted into the payment of a didrachmon to the Temple; and two of these didrachma formed a stater of the Jewish currency. This stater was evidently the extant 'Shekel Israel,' which was a tetradrachmon of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemies; the didrachmon paid to the Temple was, therefore, of the same monetary scale. Thus the duty to the Temple was converted from the half of an Attic to the whole of a Ptolemaic didrachmon, and the tax was nominally raised in the proportion of about 105 to 65; but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews, when they began to strike money, should have revived the old name shekel, and applied it to their stater, or principal coin; and equally so, that they should have adopted the scale of the neighboring opulent and powerful kingdom, the money of which they must have long been in the habit of employing. The inscription on the coin appears to have been expressly intended to distinguish the monetary shekel or stater from the Shekel ha-Kodesh, or Shekel of the Sanctuary." Appendix to *Nismata Hellenica*, pp. 2, 3.

The great point here gained is that the Egyptian unit was a didrachm, a conclusion confirmed by the discovery of an Egyptian weight not greatly exceeding the Attic didrachm. The conjecture, however, that the LXX. intend the Attic weight is forced, and leads to this double dilemma, the supposition that the didrachm of the LXX. is a shekel and that of the N. T. half a stater, which is the same as half a shekel, and that the tribute was greatly raised, whereas there is no evidence that in the N. T. the term didrachm is not used in exactly the same sense as in the LXX. The natural explanation seems to us to be that the Alexandrian Jews adopted for the shekel the term didrachm as the common name of the coin corresponding in weight to it, and that it thus became in Hebraistic Greek the equivalent of shekel. There is no ground for supposing a difference in use in the LXX. and N. T., more especially as there happen to have been few, if any, didrachms current in Palestine in the time of our Lord, a fact which gives great significance to the finding of the stater in the fish by St. Peter, showing the minute accuracy of the Evangelist. The Ptolemaic weight, not being Egyptian but Phœnician, chanced to agree with the Hebrew, which was probably derived from the same source, the primitive system of Palestine, and perhaps of Babylon also. — Respecting the weights of the copper coins we cannot as yet speak with any confidence.

The fabric of the silver coins above described is so different from that of any other ancient money, that it is extremely hard to base any argument on it alone, and the cases of other special classes, as the ancient money of Cyprus, show the danger of such reasoning. Some have been disposed to consider that it proves that these coins cannot be later than the time of Nehemiah, others will not admit

<sup>a</sup> Coins are not always exact in relative weight: in some modern coinages the smaller coins are intention-

ally heavier than they would be if exact divisions of the larger.

t to be later than Alexander's time, while some still hold that it is not too archaic for the Maccabean period. Against its being assigned to the earlier dates we may remark that the forms are too exact, and that apart from style, which we do not exclude in considering fabric, the mere mechanical work is like that of the coins of Phœnician towns struck under the Seleucide. The decisive evidence, however, is to be found by a comparison of the copper coins which cannot be doubted to complete the series. These, though in some cases of a similar style to the silver coins, are generally far more like the undoubted pieces of the Maccabees.

The inscriptions of these coins, and all the other Hebrew inscriptions of Jewish coins, are in a character of which there are few other examples. As Gesenius has observed (*Gram.* § 5), it bears a strong resemblance to the Samaritan and Phœnician, and we may add to the Aramæan of coins, which must be carefully distinguished from the Aramæan of the papyri found in Egypt.<sup>a</sup> The use of this character does not afford any positive evidence as to age; but it is important to notice that, although it is found upon the Maccabean coins, there is no palæographic reason why the pieces of doubtful time bearing it should not be as early as the Persian period.

The meaning of the inscriptions does not offer matter for controversy. Their nature would indicate a period of Jewish freedom from Greek influence as well as independence, and the use of an era dating from its commencement. The form used on the copper coins clearly shows the second and third points. It cannot be supposed that the dating is by the sabbatical or jubilee year, since the redemption of Zion is particularized. These are separated from the known Maccabean and later coins by the absence of Hellenism, and connected with them by the want of perfect uniformity in their inscriptions, a point indicative of a time of national decay like that which followed the dominion of the earlier Maccabees. Here it may be remarked that the idea of Cavedoni, that the form ירושלים,

succeeding in the second year to ירושלים, is to be taken as a dual, because in that year (according to his view of the age of the coins) the fortress of Zion was taken from the Syrians (*Num. Bibl.* p. 23), notwithstanding its ingenuity must, as De Saulcy has already said, be considered untenable.

The old explanation of the meaning of the types of the shekels and half-shekels, that they represent the pot of manna and Aaron's rod that budded, seems to us remarkably consistent with the inscriptions and with what we should expect. Cavedoni has suggested, however, that the one type is simply a vase of the Temple, and the other a lily, arguing against the old explanation of the former that the pot of manna had a cover, which this vase has not. But it may be replied, that perhaps this vase had a flat cover, that on later coins a vase is represented both with and without a cover, and that the different forms given to the vase which is so constant on the Jewish coins seem to indicate that it is a representation of something like the pot of manna lost when Nebuchadnezzar took Jerusalem, and of which there was therefore only a traditional recollection.

Respecting the exact meaning of the types of the copper, save the vase, it is difficult to form a probable conjecture. They may reasonably be supposed to have a reference to the great festivals of the Jewish year, which were connected with thanksgiving for the fruits of the earth. But it may, on the other hand, be suggested that they merely indicate the products of the Holy Land, the fertility of which is so prominently brought forward in the Scriptures. With this idea the representation of the vine-leaf and bunch of grapes upon the later coins would seem to tally; but it must be recollected that the lower portion of a series generally shows a departure or divergence from the higher in the intention of its types, so as to be an unsafe guide in interpretation.

Upon the copper coins we have especially to observe, as already hinted, that they form an important guide in judging of the age of the silver. That they really belong to the same time is not to be doubted. Everything but the style proves this. Their issue in the 4th year, after the silver ceases in the 3d year, their types and inscriptions, leave no room for doubt. The style is remarkably different, and we have selected two specimens for engraving, which afford examples of their diversity. We venture to think that the difference between the silver coins engraved, and the small copper coin, which most nearly resembles them in the form of the letters, is almost as great as that between the large copper one and the copper pieces of John Hyrcanus. The small copper coin, be it remembered, more nearly resembles the silver money than does the large one.

From this inquiry we may lay down the following particulars as a basis for the attribution of this class. 1. The shekels, half-shekels, and corresponding copper coins, may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. 2. They must belong to a time of independence, and one at which Greek influence was excluded. 3. They date from an era of Jewish independence.

M. de Saulcy, struck by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity. He fixes upon the pontificate of Jaddua, and supposes them to have been first issued when Alexander granted great privileges to the Jews. If it be admitted that this was an occasion from which an era might be reckoned, there is a serious difficulty in the style of the copper coins, and those who have practically studied the subject of the fabric of coins will admit that, though archaic style may be long preserved, there can be no mistake as to late style, the earlier limits of which are far more rigorously fixed than the later limits of archaic style. But there is another difficulty of even a graver nature. Alexander, who was essentially a practical genius, suppressed all the varying weights of money in his empire excepting the Attic, which he made the lawful standard. Philip had struck his gold on the Attic weight, his silver on the Macedonian. Alexander even changed his native currency in carrying out this great commercial reform, of which the importance has never been recognized. Is it likely that he would have allowed a new currency to have been issued by Jaddua on a system different from the Attic? If it be urged that this was a sacred coinage for the tribute, and that therefore an exception may have been made,

<sup>a</sup> See Mr. Waddington's paper on the so-called sapor coins (*Mélanges de Numismatique*).

It must be recollected that an excess of weight would not have been so serious a matter as a deficiency, and besides that it is by no means clear that the shekels follow a Jewish weight. On these grounds, therefore, we feel bound to reject M. de Sauley's theory.

The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Maccabee. M. de Sauley would, however, urge against our conclusion the circumstance that he has attributed small copper coins, all of one and the same class, to Judas the Maccabee, Jonathan, and John Hyrcanus, and that the very dissimilar coins hitherto attributed to Simon must therefore be of another period. If these attributions be correct, his deduction is perfectly sound, but the circumstance that Simon alone is unrepresented in the series, whereas we have most reason to look for coins of him, is extremely suspicious. We shall, however, show in discussing this class, that we have discovered evidence which seems to us sufficient to induce us to abandon M. de Sauley's classification of copper coins to Judas and Jonathan, and to commence the series with those of John Hyrcanus. For the present therefore we adhere to the old attribution of the shekels, half-shekels, and similar copper coins, to Simon the Maccabee.

We now give a list of all the principal copper coins of a later date than those of the class described above and anterior to Herod, according to M. de Sauley's arrangement.

COPPER COINS.

1. Judas Maccabeus.

יהוד  
הכהן  
גדול  
ולוחם  
היהודים

"Judas,  
the illustrious priest,  
and friend of the Jews."

*Aristobulus* (no coins).

*Hyrcanus* restored (no coins).

*Oligarchy* (no coins).

*Aristobulus* and *Alexander* (no coins).

*Hyrcanus* again restored (no coins).

*Antigonus.*

. . . . . ΙΓΟΝΟΥ (ΒΑΣΙΛΕΩΣ ΑΝΤΙΓΟΝΟΥ) around a crown.

Ὶ. . . . . מרתיה חכהן הגדל מרתיה? "Mattathiah the high-priest"? Ἐ. W.

This arrangement is certainly the most satisfactory that has been yet proposed, but it presents serious difficulties. The most obvious of these is the absence of coins of Simon, for whose money we have more reason to look than for that of any other Jewish ruler. M. de Sauley's suggestion that we may some day find his coins is a scarcely satisfactory answer, for this would imply that he struck very few coins, whereas all the other princes in the list, Judas only excepted, struck many, judging from those found. That Judas should have struck but few coins is extremely probable from the unsettled state of the country during his rule; but the prosperous government of Simon seems to require a large issue of money. A second difficulty is that the series of small copper coins, having the same, or essentially the same, reverse-type, commences with Judas, and should rather commence with Simon. A third difficulty is that Judas bears the title of priest, and probably of high-priest, for the word גדול is extremely doubtful, and the

extraordinary variations and blunders in the inscriptions of these copper coins make it more probable that גדול is the term, whereas it is extremely doubtful that he took the office of high-priest. It is, however, just possible that he may have taken an inferior title, while acting as high-priest during the lifetime of Alcimus. These objections are, however, all trifling in comparison with one that seems never to have struck any inquirer. These small copper coins have for the main part of their reverse-type a Greek symbol, the united cornua copiae, and they therefore distinctly belong to a period of Greek influence. Is it possible that Judas the Maccabee, the restorer of the Jewish worship, and the sworn enemy of all heathen customs, could have struck money with a type derived from the heathen, and used by at least one of the hated family that then oppressed Israel, a type connected with idolatry, and to a Jew as forbidden as any other of the representations on the coins of the Gentiles? It seems to us that this is an impossibility, and that the use of such a type points to the time when prosperity had corrupted the ruling family and Greek usages once more were powerful in their influence. This period may be considered to commence in the rule of John Hyrcanus, whose adoption of foreign customs is evident in the naming of his sons far more than in the policy he followed. If we examine the whole series, the coins bearing the name of "John the high-priest" are the best in execution, and therefore have some claim to be considered the earliest.

It is important to endeavor to trace the origin of the type which we are discussing. The two cornua copiae first occur on the Egyptian coins, and indicate two sovereigns. In the money of the Seleucidae the type probably originated at a marriage with an Egyptian princess. The cornua copiae, as represented on the Jewish coins, are first found, as far as we are aware, on a coin of Alexander II. Zebina (n. c. 128-122), who, be it recollected, was set up by Ptolemy Physcon. The type occurs, however, in a different form on the unique tetradrachm of Cleopatra, ruling alone, in the British Museum, but it may have been adopted on her marriage with Alexander I. Balas (n. c. 150). Yet even this earlier date is after the rule of Judas (n. c. 167-161), and in the midst of that of Jonathan; and Alexander Zebina was contemporary with John Hyrcanus. We have seen that Alexander Jannæus (n. c. 105-78) seems to have followed a type of Antiochus VII. Sidetes, of which there are coins dated n. c. 132-131.

Thus far there is high probability that M. de Sauley's attributions before John Hyrcanus are extremely doubtful. This probability has been almost changed to certainty by a discovery the writer has recently had the good fortune to make. The acute Barthélemy mentions a coin of "Jonathan the high-priest," on which he perceived traces of the words ΒΑΣΙΛΕΩΣ ΑΛΕΞΑΝΔΡΟΥ, and he accordingly conjectures that these coins are of the same class as the bilingual ones of Alexander Jannæus, holding them both to be of Jonathan, and the latter to mark the close alliance between that ruler and Alexander I. Balas. An examination of the money of Jonathan the high-priest has led us to the discovery that many of his coins are restruck, that some of these restruck coins exhibit traces of Greek inscriptions, showing the original pieces to be probably of the class attributed to Alexander

Jannæus by M. de Sauley, and that one of the latter distinctly bears the letters  $\Lambda\text{N}\Delta\text{I} \cdot \Upsilon$  [ $\text{AAEE-ANAPOT}$ ]. The two impressions of restruck coins are in general of closely consecutive dates, the object of restriking having usually been to destroy an obnoxious coinage. That this was the motive in the present instance appears from the large number of restruck coins among those with the name of Jonathan the high-priest, whereas we know of no other restruck Jewish coins, and from the change in the style from Jonathan the king to Jonathan the high-priest.

Under these circumstances but two attributions of the bilingual coins, upon which everything depends, can be entertained, either that they are of Jonathan the Maccabee in alliance with Alexander I. Balas, or that they are of Alexander Jannæus; the Jewish prince having, in either case, changed his coinage. We learn from the case of Antigonus that double names were not unknown in the family of the Maccabees. To the former attribution there are the following objections. 1. On the bilingual coins the title Jonathan the king corresponds to Alexander the king, implying that the same prince is intended, or two princes of equal rank. 2. Although Alexander I. Balas sent presents of a royal character to Jonathan, it is extremely unlikely that the Jewish prince would have taken the regal title, or that the king of Syria would have actually granted it. 3. The Greek coins of Jewish fabric with the inscription Alexander the king, would have to be assigned to the Syrian Alexander I., instead of the Jewish king of the same name. 4. It would be most strange if Jonathan should have first struck coins with Alexander I., and then cancelled that coinage and issued a fresh Hebrew coinage of his own and Greek of the Syrian king, the whole series moreover, excepting those with only the Hebrew inscription, having been issued within the years B. C. 153-146, eight out of the nineteen of Jonathan's rule. 5. The reign of Alexander Jannæus would be unrepresented in the coinage. To the second attribution there is this objection, that it is unlikely that Alexander Jannæus would have changed the title of king for that of high-priest; but to this it may be replied, that his quarrel with the Pharisees with reference to his performing the duties of the latter office, the turning-point of his reign, might have made him abandon the recent kingly title and recur to the sacerdotal, already used on his father's coins, for the Hebrew currency, while probably still issuing a Greek coinage with the regal title. On these grounds, therefore, we maintain Bayer's opinion that the Jewish coinage begins with Simon, we transfer the coins of Jonathan the high-priest to Alexander Jannæus, and propose the following arrangement of the known money of the princes of the period we have been just considering.

*John Hyrcanus*, B. C. 135-106.

Copper coins, with Hebrew inscription, "John the high-priest;" on some A, marking alliance with Antiochus VII. Sidetes.

*Aristobulus and Antigonus*, B. C. 106-105.

(Probable Attribution.)

Copper coins, with Hebrew inscription, "Judah the high (?) priest;" copper coins with Greek inscription, "Judah, the king," and A. for Antigonus? M. de Sauley supposes that Aristobulus bore the Hebrew name Judah, and there is certainly some probability in the conjecture, though the classification

of these coins cannot be regarded as more than tentative.

*Alexander Jannæus*, B. C. 105-78.

First coinage: copper coins with bilingual inscriptions — Greek, "Alexander the king;" Hebrew, "Jonathan the king."

Second coinage: copper coins with Hebrew inscription, "Jonathan the high-priest;" and copper coins with Greek inscription, "Alexander the king." (The assigning of these latter two to the same ruler is confirmed by the occurrence of Hebrew coins of "Judah the high-priest," and Greek ones of "Judah the king," which there is good reason to attribute to one and the same person.)

*Alexandra*, B. C. 78-69.

The coin assigned to Alexandra by M. de Sauley may be of this sovereign, but those of Alexander are so frequently blundered that we are not certain that it was not struck by him.

*Hyrcanus*, B. C. 69-66 (no coins).

*Aristobulus*, B. C. 66-63 (no coins).

*Hyrcanus* restored, B. C. 63-57 (no coins).

*Oligarchy*, B. C. 57-47 (no coins).

*Aristobulus and Alexander*, B. C. 49 (no coins)

*Hyrcanus* again B. C. 47-40 (no coins).

*Antigonus*, B. C. 40-37. Copper coins, with bilingual inscriptions.

It must be observed that the whole period unrepresented in our classification is no more than twenty-nine years, only two years in excess of the length of the reign of Alexander Jannæus, that it was a very troublous time, and that Hyrcanus, whose rule occupied more than half the period, was so weak a man that it is extremely likely that he would have neglected to issue a coinage. It is possible that some of the doubtful small pieces are of this unrepresented time, but at present we cannot even conjecturally attribute any.

It is not necessary to describe in detail the money of the time commencing with the reign of Herod and closing under Hadrian. We must, however, speak of the coinage generally, of the references to it in the N. T., and of two important classes — the money attributed to the revolt preceding the fall of Jerusalem, and that of the famous Barkokab.

The money of Herod is abundant, but of inferior interest to the earlier coinage, from its generally having a thoroughly Greek character. It is of copper only, and seems to be of three denominations, the smallest being apparently a piece of brass ( $\chi\alpha\lambda\kappa\omicron\upsilon\varsigma$ ), the next larger its double ( $\delta\iota\chi\alpha\lambda\kappa\omicron\varsigma$ ), and the largest its triple ( $\tau\rho\iota\chi\alpha\lambda\kappa\omicron\varsigma$ ), as M. de Sauley has ingeniously suggested. The smallest is the commonest, and appears to be the farthing of the N. T. The coin engraved below is of the smallest denomination of these: it may be thus described:—

H  $\Omega$  Δ ΒΑCΙ. Anchor.

Ϝ Two cornua copiae, within which a caduceus (degraded from pomegranate).  $\text{Æ}$ . W.

We have chosen this specimen from its remarkable relation to the coinage of Alexander Jannæus, which makes it probable that the latter was still current money in Herod's time, having been abundantly issued, and so tends to explain the seeming neglect to coin in the period from Alexander or Alexandra to Antigonus.

The money of Herod Archelaus, and the similar coinage of the Greek Imperial class, of Roman rulers with Greek inscriptions, issued by the procurators of Judæa under the emperors from Augustus to Nero, present no remarkable peculiarities, nor do the coins attributed by M. de Sauley to Agrippa I., but possibly of Agrippa II. We engrave a specimen of the money last mentioned to illustrate this class.

ΒΑΣΙΛΕΥΩΣ ΑΓΡΡΙΠΙΑ. State umbrella.

ΚΥ Corn-stalk bearing three ears of bearded wheat. L S Year 6. Æ.

There are several passages in the Gospels which throw light upon the coinage of the time. When the twelve were sent forth our Lord thus commanded them, "Provide neither gold, nor silver, nor brass in your purses" (lit. "girdles"), Matt. x. 9. In the parallel passages in St. Mark (vi. 8), copper alone is mentioned for money, the Palestinian currency being mainly of this metal, although silver was coined by some cities of Phœnicia and Syria, and gold and silver Roman money was also in use. St. Luke, however, uses the term "money," ἀργύριον (ix. 3), which may be accounted for by its less Hebraistic style.

The coins mentioned by the Evangelists, and first those of silver, are the following: the *stater* is spoken of in the account of the miracle of the tribute money. The receivers of *didrachms* demanded the tribute, but St. Peter found in the fish a *stater*, which he paid for our Lord and himself (Matt. xvii. 24-27). This *stater* was therefore a tetradrachm, and it is very noteworthy that at this period almost the only Greek Imperial silver coin in the East was a tetradrachm, the didrachm being probably unknown, or very little coined.

The *didrachm* is mentioned as a money of account in the passage above cited, as the equivalent of the Hebrew shekel. [SHEKEL.]

The *denarius*, or Roman penny, as well as the Greek *drachm*, then of about the same weight, are spoken of as current coins. There can be little doubt that the latter is merely employed as another name for the former. In the famous passages respecting the tribute to Cæsar, the Roman *denarius* of the time is correctly described (Matt. xxii. 15-21; Luke xx. 19-25). It bears the head of Tiberius, who has the title Cæsar in the accompanying inscription, most later emperors having, after their accession, the title Augustus: here again therefore we have an evidence of the date of the Gospels. [DENARIUS; DRACHM.]

Of copper coins the farthing and its half, the *mite*, are spoken of, and these probably formed the chief native currency. [FARTHING; MITE.]

To the revolt of the Jews, which ended in the capture and destruction of Jerusalem, M. de Sauley assigns some remarkable coins, one of which is represented in the cut beneath

חררת ציון, "The liberty of Zion." Vine-stalk, with leaf and tendril.

שנת שחיים. "Year two." Vase. Æ.

There are other pieces of the year following, which slightly vary in their reverse-type, if indeed we be right in considering the side with the date to be the reverse.

Same obverse.

שנת שלש. "Year three." Vase with cover.

M. de Sauley remarks on these pieces: "De ces deux monnaies, celle de l'an III. est incomparablement plus rare que celle de l'an II. Cela tient probablement à ce que la liberté des Juifs était à son apogée dans la deuxième année de la guerre judaïque, et déjà à son déclin dans l'année troisième. Les pièces analogues des années I. et IV. manquent, et cela doit être. Dans la première année de la guerre judaïque, l'autonomie ne fut pas rétablie à Jérusalem; et dans la quatrième année l'anarchie et les divisions intestines avaient déjà préparé et facilité à Titus la conquête qu'il avait entreprise" (p. 154).

The subjugation of Judæa was not alone signalized by the issue of the famous Roman coins with the inscription IVDAEA CAPTA, but by that of similar Greek Imperial coins in Judæa of Titus, one of which may be thus described:—

ΑΥΤΟΚΡ ΤΙΤΟΣ ΚΑΙΣΑΡ. Head of Titus, laureate, to the right.

ΚΥ ΙΟΥΔΑΙΑΣ ΕΛΛΟΚΤΙΑΣ. Victory, to the right, writing upon a shield: before her a palm tree. Æ.

The proper Jewish series closes with the money of the famous Barkokab, who headed the revolt in the time of Hadrian. His most important coins are shekels, of which we here engrave one.

לחררת ירושלם. "Of the deliverance of Jerusalem." Bunch of fruits?

שמעון. "Simeon." Tetrastyle temple: above which star. Æ. B. M. (Shekel.)

The half-shekel is not known, but the quarter, which is simply a restruck denarius, is common

The specimen represented below shows traces of the old types of a denarius of Trajan on both sides.

שמעון. "Simeon." Bunch of grapes.

לְחֵרֹרֵירוּשָׁלַם. "Of the deliverance of Jerusalem." Two trumpets. R. B. M.

The denarius of this time was so nearly a quarter of a shekel, that it could be used for it without occasioning any difficulty in the coinage. The copper coins of Barkokab are numerous, and like his silver pieces, have a clear reference to the money of Simon the Maccabee. It is indeed possible that the name Simon is not that of Barkokab, whom we know only by his surnames, but that of the earlier ruler, employed here to recall the foundation of Jewish autonomy. What high importance was attached to the issue of money by the Jews, is evident from the whole history of their coinage.

The money of Jerusalem, as the Roman Colonia *Ælia Capitolina*, has no interest here, and we conclude this article with the last coinage of an independent Jewish chief.

The chief works on Jewish coins are Bayer's treatise *De Numis Hebræo-Samaritanis*; De Saulcy's *Numismatique Judaïque*; Cavedoni's *Numismatica Biblica*, of which there is a translation under the title *Biblische Numismatik*, by A. von Werlhof, with large additions. Since writing this article we find that the translator had previously come to the conclusion that the coins attributed by M. de Saulcy to Judas Maccabæus are of Aristobulus, and that Jonathan the high-priest is Alexander Jam aus. We have to express our sincere obligations to Mr. Wigan for permission to examine his valuable collection, and have specimens drawn for this article.

R. S. P.

**MONEY-CHANGERS** (*κολλυβιστής*, Matt. xxi. 12; Mark xi. 15; John ii. 15). According to Ex. xxx. 13-15, every Israelite, whether rich or poor, who had reached or passed the age of twenty, must pay into the sacred treasury, whenever the nation was numbered, a half-shekel as an offering to Jehovah. Maimonides (*Shekal*. cap. 1) says that this was to be paid annually, and that even paupers were not exempt. The Talmud exempts priests and women. The tribute must in every case be paid in coin of the exact Hebrew half-shekel, about 15½*d.* sterling of English money. The premium for obtaining by exchange of other money the half-shekel of Hebrew coin, according to the Talmud, was a *κόλυβος* (*collybus*), and hence the money-broker who made the exchange was called *κολλυβιστής*. The *collybus*, according to the same authority, was equal in value to a silver *obolus*, which has a weight of 12 grains, and its money value is about 1½*d.* sterling. The money-changers (*κολλυβισται*) whom Christ, for their impiety, avarice, and fraudulent dealing, expelled from the Temple, were the dealers who supplied half-shekels, for such a premium as they might be able to exact, to the Jews from all parts of the world, who as-

sembled at Jerusalem during the great festivals, and were required to pay their tribute or ransom-money in the Hebrew coin; and also for other purposes of exchange, such as would be necessary in so great a resort of foreign residents to the ecclesiastical metropolis. The word *τραπεζίτης* (*trapezites*), which we find in Matt. xxv. 27, is a general term for banker or broker. Of this branch of business we find traces very early both in the oriental and classical literature (comp. Matt. xvii. 24-27; see Lightfoot, *Hor. Heb.* on Matt. xxi. 12; Buxtorf, *Lex. Rabbin.* 2032). C. E. S.

\* The exchangers were called *τραπεζίται* from the tables (*τράπεζαι*, John ii. 15) at which they sat in the open air, with the coin before them (*τὸ κέρμα* collective, John ii. 15) which they were accustomed to pay out or receive in return. This is a very common sight at the present day in eastern cities, as well as in the south of Europe. H.

**MONTH** (*חֹדֶשׁ*; *יָרֵחַ*). The terms for "month" and "moon" have the same close connection in the Hebrew language, as in our own and in the Indo-European languages generally; we need only instance the familiar cases of the Greek *μήν* and *μήνη*, and the Latin *mensis*; the German *mond* and *monat*; and the Sanskrit *māsa*, which answers to both month and moon. The Hebrew *chodesh* is perhaps more distinctive than the corresponding terms in other languages; for it expresses not simply the idea of a *lunation*, but the recurrence of a period commencing definitely with the *new moon*, it is derived from the word *chaddash*, "new," which was transferred in the first instance to the "new moon," and in the second instance to the "month," or as it is sometimes more fully expressed, *חֹדֶשׁ יְרֵיכָה*, "a month of days" (Gen. xxix. 14; Num. xi. 20, 21; comp. Deut. xxi. 13; 2 K. xv. 13). The term *yerech* is derived from *yāreach*, "the moon;" it occurs occasionally in the historical (Ex. ii. 2; 1 K. vi. 37, 38, viii. 2; 2 K. xv. 13), but more frequently in the poetical portions of the Bible.

The most important point in connection with the month of the Hebrews is its length, and the mode by which it was calculated. The difficulties attending this inquiry are considerable in consequence of the scantiness of the *data*. Though it may fairly be presumed from the terms used that the month originally corresponded to a *lunation*, no reliance can be placed on the mere verbal argument to prove the exact length of the month in historical times. The word appears even in the earliest times to have passed into its secondary sense, as describing a period approaching to a *lunation*; for, in Gen. vii. 11, viii. 4, where we first meet with it, equal periods of 30 days are described, the interval between the 17th days of the second and the seventh months being equal to 150 days (Gen. vii. 11, viii. 3, 4). We have therefore in this instance an approximation to the solar month, and as, in addition to this, an indication of a double calculation by a solar and a lunar year has been detected in a subsequent date (for from viii. 14, compared with vii. 11, we find that the total duration of the flood exceeded the year by eleven days, in other words by the precise difference between the lunar year of 354 days and the solar one of 365 days), the passage has attracted considerable attention on the part of certain critics, who have endeavored to deduce from it arguments prejudicial to the originality of the Biblical narrative. It has been urged that the Hebrews them-

elves knew nothing of a solar month, that they must have derived their knowledge of it from more easterly nations (Ewald, *Jahrbüch.* 1854, p. 8), and consequently that the materials for the narrative, and the date of its composition, must be referred to the period when close intercourse existed between the Hebrews and the Babylonians (Von Bohlen's *Introd.* to *Gen.* ii. 155 ff.). It is unnecessary for us to discuss in detail the arguments on which these conclusions are founded; we submit in answer to them that the data are insufficient to form any decided opinion at all on the matter, and that a more obvious explanation of the matter is to be found in the Egyptian system of months. To prove the first of these points, it will be only necessary to state the various calculations founded on this passage: it has been deduced from it (1) that there were 12 months of 30 days each [CHRONOLOGY]; (2) that there were 12 months of 30 days with 5 intercalated days at the end to make up the solar year (Ewald, *l. c.*); (3) that there were 7 months of 30 days, and 5 of 31 days (Von Bohlen); (4) that there were 5 months of 30 days, and 7 of 29 days (Knobel, in *Gen.* viii. 1-3): or, lastly, it is possible to cut away the foundation of any calculation whatever by assuming that a period might have elapsed between the termination of the 150 days and the 17th day of the 7th month (Ideler, *Chronol.* i. 70). But, assuming that the narrative implies equal months of 30 days, and that the date given in viii. 14, does involve the fact of a double calculation by a solar and a lunar year, it is unnecessary to refer to the Babylonians for a solution of the difficulty. The month of 30 days was in use among the Egyptians at a period long anterior to the period of the exodus, and formed the basis of their computation either by an unintercalated year of 360 days or an intercalated one of 365 (Rawlinson's *Herodotus*, ii. 283-286). Indeed, the Bible itself furnishes us with an indication of a double year, solar and lunar, in that it assigns the regulation of its length indifferently to both sun and moon (*Gen.* i. 14). [YEAR.]

From the time of the institution of the Mosaic Law downwards the month appears to have been a lunar one. The cycle of religious feasts, commencing with the Passover, depended not simply on the month, but on the moon (*Joseph. Ant.* iii. 10, § 5); the 14th of Abib was coincident with the full moon (*Philo. Fil. Mos.* iii. p. 686); and the new moons themselves were the occasions of regular festivals (*Num.* x. 10, xxviii. 11-14). The statements of the Talmudists (*Mishna, Rosh hash.* 1-3) are decisive as to the practice in their time, and the lunar month is observed by the modern Jews. The commencement of the month was generally decided by observation of the new moon, which may be detected about forty hours after the period of its conjunction with the sun: in the later times of Jewish history this was effected according to strict rule, the appearance of the new moon being reported by competent witnesses to the local authorities, who then officially announced the commence-

ment of the new month by the twice repeated word, "Mekûdash," i. e. *consecrated*.

According to the Rabbinical rule, however, there must at all times have been a little uncertainty beforehand as to the exact day on which the month would begin; for it depended not only on the appearance, but on the announcement: if the important word *Mekûdash* were not pronounced until after dark, the following day was the first of the month; if before dark, then that day (*Rosh hash.* 3, § 1). But we can hardly suppose that such a strict rule of observation prevailed in early times, nor was it in any way necessary; the recurrence of the new moon can be predicted with considerable accuracy by a calculation of the interval that would elapse either from the last new moon, from the full moon (which can be detected by a practiced eye), or from the disappearance of the waning moon. Hence, David announces definitely "To-morrow is the new moon," that being the first of the month (1 Sam. xx. 5, 24, 27) though the new moon could not have been as yet observed, and still less announced.<sup>a</sup> The length of the month by observation would be alternately 29 and 30 days, nor was it allowed by the Talmudists that a month should fall short of the former or exceed the latter number, whatever might be the state of the weather. The months containing only 29 days were termed in Talmudical language *châsar*, or "deficient," and those with 30 *malê*, or "full."

The usual number of months in a year was twelve, as implied in 1 K. iv. 7; 1 Chr. xxvii. 1-15; but inasmuch as the Hebrew months coincided, as we shall presently show, with the seasons, it follows as a matter of course that an additional month must have been inserted about every third year, which would bring the number up to thirteen. No notice, however, is taken of this month in the Bible. We have no reason to think that the intercalary month was inserted according to any exact rule; it was sufficient for practical purposes to add it whenever it was discovered that the barley harvest did not coincide with the ordinary return of the month of Abib. In the modern Jewish calendar the intercalary month is introduced seven times in every 19 years, according to the Metonic cycle, which was adopted by the Jews about A. D. 360 (Prideaux's *Connection*, i. 209 note). At the same time the length of the synodical month was fixed by R. Hillel at 29 days, 12 hours, 44 min., 3½ sec., which accords very nearly with the truth.

The usual method of designating the months was by their numerical order, e. g. "the second month" (*Gen.* vii. 11), "the fourth month" (2 K. xxv. 3); and this was generally retained even when the names were given, e. g. "in the month Zif, which is the second month" (1 K. vi. 1), "in the third month, that is, the month Sivan" (*Esth.* viii. 9). An exception occurs, however, in regard to Abib<sup>b</sup> in the early portion of the Bible (*Ex.* xiii. 4, xxiii. 15; *Deut.* xvi. 1), which is always mentioned by name alone, inasmuch as it was neces-

<sup>a</sup> Jahn (*Ant.* iii. 3, § 352) regards the discrepancy of the dates in 2 K. xxv. 27, and *Jer.* iii. 31, as originating in the different modes of computing, by astronomical calculation and by observation. It is more probable that it arises from a mistake of a copyist, substituting 7 for 77, as a similar discrepancy exists in 2 K. xxv. 19 and *Jer.* iii. 25, without admitting of similar explanation.

<sup>b</sup> We doubt indeed whether Abib was really a proper name. In the first place it is always accompanied by the article, "the Abib;" in the second place, it appears almost impossible that it could have been superseded by Nisan, if it had been regarded as a proper name, considering the important associations connected with it.

rarily coincident with a certain season, while the numerical order might have changed from year to year. The practice of the writers of the post-Babylonian period in this respect varied: Ezra, Esther, and Zechariah specify both the names and the numerical order; Nehemiah only the former; Daniel and Haggai only the latter. The names of the months belong to two distinct periods; in the first place we have those peculiar to the period of Jewish independence, of which four only, even including Abib, which we hardly regard as a proper name, are mentioned, namely, Abib, in which the Passover fell (Ex. xiii. 4, xxii. 15, xxxiv. 18; Deut. xvi. 1), and which was established as the first month in commemoration of the exodus (Ex. xii. 2); Zif, the second month (1 K. vi. 1, 37); Bul, the eighth (1 K. vi. 38); and Ithanim, the seventh (1 K. viii. 2)—the three latter being noticed only in connection with the building and dedication of the Temple, so that we might almost infer that their use was restricted to the official documents of the day, and that they never attained the popular use which the later names had. Hence it is not difficult to account for their having been superseded. In the second place we have the names which prevailed subsequently to the Babylonish Captivity; of these the following seven appear in the Bible: Nisan, the first, in which the Passover was held (Neh. ii. 1; Esth. iii. 7); Sivan, the third (Esth. viii. 9; Bar. i. 8); Elul, the sixth (Neh. vi. 15; 1 Macc. xiv. 27); Chisleu, the ninth (Neh. i. 1; Zech. vii. 1; 1 Macc. i. 54); Tebeth, the tenth (Esth. ii. 16); Sebat, the eleventh (Zech. i. 7; 1 Macc. xvi. 14); and Adar, the twelfth (Esth. iii. 7, viii. 12; 2 Macc. xv. 36). The names of the remaining five occur in the Talmud and other works; they were Iyar, the second (Targum, 2 Chr. xxx. 2); Tammuz, the fourth (Mishn. *Taan.* 4, § 5); Ab, the fifth, and Tisir, the seventh (*Rosh hash.* 1, § 3); and Marcheshvan, the eighth (*Taan.* i. § 3; Joseph. *Ant.* i. 3, § 3). The name of the intercalary month was Veadar,<sup>a</sup> *i. e.* the additional Adar.

The first of these series of names is of Hebrew

<sup>a</sup> The name of the intercalary month originated in its position in the calendar after Adar and before Nisan. The opinion of Ideler (*Chronol.* i. 539), that the first Adar was regarded as the intercalary month, because the feast of Purim was held in Veadar in the intercalary year, has little foundation.

<sup>b</sup> זִבְיָב. [See CHRONOLOGY.]

<sup>c</sup> זִי וְזִי, or, more fully, as in the Targum, זִי וְזִי נִפְתְּחֵי, "the bloom of flowers." Another explanation is given in Rawlinson's *Herodotus*, i. 622; namely, that Ziv is the same as the Assyrian *Giv*, "bull," and answers to the zodiacal sign of Taurus.

<sup>d</sup> בּוּל. The name occurs in a recently discovered Phœnician inscription (Ewald, *Jahrb.* 1856, p. 135). A cognate term, מַבּוּל, is used for the "deluge" (Gen. vi. 17, &c.); but there is no ground for the inference drawn by Von Bohlen (*Introd. to Gen.* ii. 156), that here is any allusion to the month Bul.

<sup>e</sup> Thenius on 1 K. viii. 2, suggests that the true name was אֲדַר נִים, as in the LXX. Ἀδαρίμ, and that its meaning was the "month of gifts," *i. e.*, of fruit, from תָּנַח, "to give." There is the same peculiarity in this as in Abib, namely, the addition of the definite article.

<sup>f</sup> The names of the months, as read on the Behistun inscriptions, *Garnapata*, *Bagayadish*, *Atriyata*, etc.,

origin, and has reference to the characteristics of the seasons—a circumstance which clearly shows that the months returned at the same period of the year, in other words, that the Jewish year was a solar one. Thus Abib<sup>b</sup> was the month of "ears of corn," Zif<sup>c</sup> the month of "blossom," and Bul<sup>d</sup> the month of "rain." With regard to Ithanim<sup>e</sup> there may be some doubt, as the usual explanation, "the month of violent or, rather, incessant rain," is decidedly inappropriate to the seventh month. With regard to the second series, both the origin and the meaning of the name is controverted. It was the opinion of the Talmudists that the names were introduced by the Jews who returned from the Babylonish Captivity (Jerusalem Talmud, *Rosh hash.* 1, § 1), and they are certainly used exclusively by writers of the post-Babylonian period. It was, therefore, perhaps natural to seek for their origin in the Persian language, and this was done some years since by Benfey (*Monatsnamen*) in a manner more ingenious than satisfactory. The view, though accepted to a certain extent by Gesenius in his *Thesaurus*, has been since abandoned, both on philological grounds and because it meets with no confirmation from the monumental documents of ancient Persia.<sup>f</sup> The names are probably borrowed from the Syrians,<sup>g</sup> in whose regular calendar we find names answering to Tisir, Sebat, Adar, Nisab, Iyar, Tammuz, Ab, and Elul (Ideler, *Chronol.* i. 430), while Chisleu and Tebeth<sup>h</sup> appear on the Palmyrene inscriptions (Gesen. *Thesaur.* pp. 702, 543). Sivan may be borrowed from the Assyrians, who appear to have had a month so named, sacred to Sin or the moon (Rawlinson, i. 615). Marcheshvan, coinciding as it did with the rainy season in Palestine, was probably a purely Hebrew<sup>i</sup> term. With regard to the meaning of the Syrian names we can only conjecture from the case of Tammuz, which undoubtedly refers to the festival of the deity of that name mentioned in Ez. viii. 14, that some of them may have been derived from the names of deities.<sup>k</sup> Hebrew roots are suggested by Gesenius for others, but without much confidence.<sup>l</sup>

bear no resemblance to the Hebrew names (Rawlinson's *Herodotus*, ii. 593-596).

<sup>g</sup> The names of the months appear to have been in many instances of local use: for instance, the calendar of Heliopolis contains the names of Ag and Gelon (Ideler, i. 440), which do not appear in the regular Syrian calendar, while that of Palmyra, again, contains names unknown to either.

<sup>h</sup> The resemblance in sound between Tebeth and the Egyptian Tobi, as well as its correspondence in the order of the months, was noticed by Jerome, *ad Ez.* xxxix. 1.

<sup>i</sup> Von Bohlen connects it with the root *vâchâs* (בָּחַשׁ), "to boil over" (*Introd. to Gen.* ii. 156). The modern Jews consider it a compound word, *mar*, "drop," and *Cheshvan*, the former betokening that it was wet, and the latter being the proper name of the month (De Sola's *Mishna*, p. 168 note).

<sup>k</sup> We draw notice to the similarity between Elul and the Arabic name of Venus Urania, *Alil-at* (Herod. iii. 8); and again between Adar, the Egyptian Athor, and the Syrian Atar-gatis.

<sup>l</sup> The Hebrew forms of the names are:—יִסְכָּן, תִּשְׂרִי, אֶלּוּל, אֲב, תַּמְּמוּז, סִינוֹן, אֲיָר, אֲדָר, שְׁבַט, כִּסְלוֹ, מְרִישָׁנוֹ וְאֲדָר.

Subsequently to the establishment of the Syro-Macedonian empire, the use of the Macedonian calendar was gradually adopted for purposes of literature or intercommunication with other countries. Josephus, for instance, constantly uses the Macedonian months, even where he gives the Hebrew names (e. g. in *Ant.* i. 3, § 3, he identifies Marcheshvan with Dios, and Nisan with Xanthicus, and in xii. 7, § 6, Chisleu with Appellæus). The only instance in which the Macedonian names appear in the Bible is in 2 Macc. xi. 30, 33, 38, where we have notice of Xanthicus in combination with another named Dioscorinthius (ver. 21), which does not appear in the Macedonian calendar. Various explanations have been offered in respect to the latter. Any attempt to connect it with the Macedonian Dios fails on account of the interval being too long to suit the narrative, Dios being the first and Xanthicus the sixth month. The opinion of Scaliger (*Emend. Temp.* ii. 94), that it was the Macedonian intercalary month, rests on no foundation whatever, and Ideler's assumption that that intercalary month preceded Xanthicus must be rejected along with it (*Chronol.* i. 399). It is most probable that the author of 2 Macc. or a copyist was familiar with the Cretan calendar, which contained a month named Dioscurus, holding the same place in the calendar as the Macedonian Diustrus (Ideler, i. 426), i. e. immediately before Xanthicus, and that he substituted one for the other. This view derives some confirmation from the Vulgate rendering, *Dioscorus*. We have further to notice the reference to the Egyptian calendar in 3 Macc. vi. 38, Pachon and Epiphi in that passage answering to Pachons and Epep, the ninth and eleventh months (Wilkinson, *Anc. Egypt.* i. 14, 2d ser.).

The identification of the Jewish months with our own cannot be effected with precision on account of the variations that must inevitably exist between the lunar and the solar month, each of the former ranging over portions of two of the latter. It must, therefore, be understood that the following remarks apply to the general identity on an average of years. As the Jews still retain the names Nisan, etc., it may appear at first sight needless to do more than refer the reader to a modern almanac, and this would have been the case if it were not evident that the modern Nisan does not correspond to the ancient one. At present Nisan answers to March, but in early times it coincided with April; for the barley harvest — the first fruits of which were to be presented on the 15th of that month (*Lev.* xxiii. 10) — does not take place even in the warm district about Jericho until the middle of April, and in the upland districts not before the end of that month (Robinson's *Researches*, i. 551, iii. 102, 145). To the same effect Josephus (*Ant.* ii. 14, § 6) synchronizes Nisan with the Egyptian Pharmuth, which commenced on the 27th of March (Wilkinson, *l. c.*), and with the Macedonian Xanthicus, which answers generally to the early part of April, though considerable variation occurs in the local calendars as to its place (comp. Ideler, i. 435, 442). He further informs us (iii. 10, § 5) that the Passover

took place when the sun was in Aries, which it does not enter until near the end of March. Assuming from these data that Abib or Nisan answers to April, then Zif or Iyar would correspond with May, Sivan with June, Tammuz with July, Ab with August, Elul with September, Ethanim or Tisri with October, Bul or Marcheshvan with November, Chisleu with December, Tebeth with January, Sebat with February, and Adar with March.

W. L. B.

\* **MONUMENTS** (מַנְטָוּמִּים, στήλαια, Is. lxx. 4). The precise meaning of the Heb. word, as employed here (elsewhere rendered *preserved*, Is. xlix. 6, *hidden*, xlvi. 6, *besieged*, i. 8; Ezek. vi. 12, *subtil*, Prov. vii. 10) is somewhat obscure. It refers apparently to certain retired places, such perhaps as the *adyta* of heathen temples (Vulg. *delubra idolorum*) or (observe the parallelism) sepulchral caverns (less probably, *lone witch-towers*, see Fürst, *Lex.* s. v.), resorted to for necromantic purposes, or (as LXX. διὰ ἐνόπνια) in order to obtain prophetic dreams. D. S. T.

**MOON** (יָרֵאֵךְ; לְבָנָה). It is worthy of observation that neither of the terms by which the Hebrews designated the moon contains any reference to its office or essential character; they simply describe it by the accidental quality of color, *yārēach*, signifying "pale," or "yellow," *lebānāh*, "white." The Indo-European languages recognized the moon as the measurer of time, and have expressed its office in this respect, all the terms applied to it, *μήνη*, *moon*, etc., finding a common element with *μετρέιν*, to measure, in the Sanscrit root *ma* (Pott's *Etym. Forsch.* i. 194). The nations with whom the Hebrews were brought into more immediate contact worshipped the moon under various designations expressive of its influence in the kingdom of nature. The exception which the Hebrew language thus presents would appear to be based on the repugnance to nature-worship, which runs through their whole system, and which induced the precautionary measure of giving it in reality no name at all, substituting the circuitous expressions "lesser light" (Gen. i. 16), the "pale," or the "white." The same tendency to avoid the notion of personality may perhaps be observed in the indifference to gender, *yārēach* being masculine, and *lebānāh* feminine.

The moon held an important place in the kingdom of nature, as known to the Hebrews. In the history of the creation (Gen. i. 14-16), it appears simultaneously with the sun, and is described in terms which imply its independence of that body as far as its light is concerned. Conjointly with the sun, it was appointed "for signs and for seasons, and for days and years;" though in this respect it exercised a more important influence, if by the "seasons" we understand the great religious festivals of the Jews, as is particularly stated in Ps. civ. 19 ("He appointed the moon for seasons"), and more at length in *Ecclus.* xliii. 6, 7. Besides this, it had its special office in the distribution of light; it was appointed "to rule over the night," as the sun over the day, and thus the appearance of the two founts of light served "to

a The term *lebānāh* occurs only three times in the Bible (*Cant.* vi. 10; *Is.* xxiv. 23, xxx. 26). Another explanation of the term is proposed in Rawlinson's *Herodotus*, i. 615, to the effect that it has reference to *lebānāh*, "a brick," and embodies the Babylonian

notion of *Sin*, the moon, as being the god of architecture. The strictly parallel use of *yārēach* in *Joel* ii. 31 and *Ez.* xxxii. 7, as well as the analogy in the sense of the two words, seems a strong argument against the view.

divide between the day and between the night." In order to enter fully into this idea, we must remember both the greater brilliancy<sup>a</sup> of the moonlight in eastern countries, and the larger amount of work, particularly travelling, that is carried on by its aid. The appeals to sun and moon conjointly are hence more frequent in the literature of the Hebrews than they might otherwise have been (Josh. x. 12; Ps. lxxii. 5, 7; Eccl. xii. 2; Is. xxiv. 23, &c.); in some instances, indeed, the moon receives a larger amount of attention than the sun (e. g. Ps. viii. 3, lxxxix. 37<sup>b</sup>). The inferiority of its light is occasionally noticed, as in Gen. i. 16; in Cant. vi. 10, where the epithets "fair," and "clear" (or rather *spotless*, and hence extremely brilliant) are applied respectively to moon and sun; and in Is. xxx. 26, where the equalizing of its light to that of the sun conveys an image of the highest glory. Its influence on vegetable or animal life receives but little notice; the expression in Deut. xxxiii. 14, which the A. V. refers to the moon, signifies rather *months* as the period of ripening fruits. The coldness of the night-dews is prejudicial to the health, and particularly to the eyes of those who are exposed to it, and the idea expressed in Ps. cxxi. 6 ("The moon shall not smite thee by night") may have reference to the general or the particular evil effect: blindness is still attributed to the influence of the moon's rays on those who sleep under the open heaven, both by the Arabs (Carne's *Letters*, i. 88), and by Europeans. The connection between the moon's phases and certain forms of disease, whether madness or epilepsy, is expressed in the Greek *σεληνιαζεσθαι* (Matt. iv. 24, xvii. 15), in the Latin derivative "lunatic," and in our "moon-struck."

The worship of the moon was extensively practiced by the nations of the East, and under a variety of aspects. In Egypt it was honored under the form of Isis, and was one of the only two deities which commanded the reverence of all the Egyptians (*Herod.* ii. 42, 47). In Syria it was represented by that one of the Ashtorah (*i. e.* of the varieties which the goddess Ashtoreh, or Ashtoreth, underwent) surnamed "Karnaim," from the horns of the crescent moon by which she was distinguished. [ASHTORETH.] In Babylonia, it formed one of a triad in conjunction with Æther, and the sun, and, under the name of Sin, received the honored titles of "Lord of the month," "King of the Gods," etc. (Rawlinson's *Herodotus*, i. 614.) There are indications of a very early introduction into the countries adjacent to Palestine of a species of worship distinct from any that we have hitherto noticed, namely, of the direct homage of the heavenly bodies, sun, moon, and stars, which is the characteristic of Sabianism. The first notice we have of this is in Job (xxi. 26, 27), and it is observable that the warning of Moses (Deut. iv. 19) is directed against this nature worship, rather

than against the form of moon-worship, which the Israelites must have witnessed in Egypt. At a later period,<sup>c</sup> however, the worship of the moon in its grosser form of idol-worship was introduced from Syria: we have no evidence indeed that the Ashtoreth of the Zidonians, whom Solomon introduced (1 K. xi. 5), was identified in the minds of the Jews with the moon, but there can be no doubt that the moon was worshipped under the form of an image in Manasseh's reign, although Movers (*Phöniz.* i. 66, 164) has taken up the opposite view; for we are distinctly told that the king "made an *asherah* (A. V. "grove"), *i. e.* an image of Ashtoreth, and worshipped all the host of heaven" (2 K. xxi. 3), which *asherah* was destroyed by Josiah, and the priests that burned incense to the moon were put down (xxiii. 4, 5). At a somewhat later period the worship of the "queen of heaven" was practiced in Palestine (*Jer.* vii. 18, xlv. 17); the title has been generally supposed to belong to the moon, but we think it more probable that the Oriental Venus is intended, for the following reasons: (1) the title of *Urania* "of heaven" was peculiarly appropriated to Venus, whose worship was borrowed by the Persians from the Arabians and Assyrians (*Herod.* i. 131, 199): (2) the votaries of this goddess, whose chief function it was to preside over births, were women, and we find that in Palestine the married women are specially noticed as taking a prominent part: (3) the peculiarity of the title, which occurs only in the passages quoted, looks as if the worship was a novel one; and this is corroborated by the term *καυάν*<sup>d</sup> applied to the "cakes," which is again so peculiar that the LXX. has retained it (*χαυάν*), deeming it to be, as it not improbably was, a foreign word. Whether the Jews derived their knowledge of the "queen of heaven" from the Philitines, who possessed a very ancient temple of Venus Urania at Askalon (*Herod.* i. 105), or from the Egyptians, whose god Athor was of the same character, is uncertain.

In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the temporary or permanent withdrawal of its light (Is. xiii. 10; Joel ii. 31; Matt. xxiv. 29; Mark xiii. 24); in these and similar passages we have an evident allusion to the mysterious awe with which eclipses were viewed by the Hebrews in common with other nations of antiquity. With regard to the symbolic meaning of the moon in Rev. xii. 1, we have only to observe that the ordinary explanations, namely, the sublunary world, or the changeableness of its affairs, seem to derive no authority from the language of the O. T., or from the ideas of the Hebrews.

W. L. B.

MOON, NEW. [NEW MOON.]

\* MOONS or LUNETTES as ornaments. [BELLS, CAMELS, TIRES.]

<sup>a</sup> The Greek *σελήνη*, from *σέλας*, expresses this idea of brilliancy more vividly than the Hebrew terms.

<sup>b</sup> In the former of these passages the sun may be included in the general expression "heavens" in the preceding verse. In the latter, "the faithful witness in heaven" is undoubtedly the moon, and not the rainbow, as some explain it. The regularity of the moon's changes impressed the mind with a sense of durability and certainty; and hence the moon was specially qualified to be a witness to God's promise.

<sup>c</sup> The ambiguous expression of Hosea (ver. 7),

"Now shall a month devour them with their pernicities," is understood by Bunsen (*Bibelwerk*, in loc. as referring to an idolatrous worship of the new moon. It is more generally understood of "a month" as a short space of time. Hitzig (*Comment.* in loc.) explains it in a novel manner of the crescent moon, as a symbol of destruction, from its resemblance to a scimitar.

<sup>d</sup> נָהַן.

**MOOSIAS** (*Moosias*; [Vat. *Moosias*; Alex. *Moos Sias*:] *Moosias*). Apparently the same as **MAASEIAI** 4 (1 Esdr. ix. 31, comp. Esr. x. 30).

**MO'RASTHITE, THE** (הַמֹּרַשְׁתִּיתִי; in Micah, הַמֹּרַשְׁתִּי; δ *μορασθίτης*, ὁ τοῦ Μωρασθῆ; Alex. in Micah, *Μωρασθῆ*; de *Morasthi, Morasthites*), that is, the native of a place named **MORASHETI**, such being the regular formation in Hebrew.

It occurs twice (Jer. xxvi. 18; Mic. i. 1), each time as the description of the prophet **MICAH**.

The Targum, on each occasion, renders the word "of Mareshah;" but the derivation from Mareshah would be Mareshathite, and not Morasthite, or more accurately Morasthite. G.

**MOR'DECAI** [3 syl.] (מֹרְדֵכַי [see below]: *Μαρδοχάιος*; *Mardochæus*), the deliverer, under Divine Providence, of the Jews from the destruction plotted against them by Haman [**ESTHER**], the chief minister of Xerxes: the institutor of the feast of Purim [**PURIM**], and probably the author as well as the hero of the Book of Esther, which is sometimes called the book of Mordecai.<sup>a</sup> The Scripture narrative tells us concerning him that he was a Benjamite, and one of the Captivity, residing in Shushan, whether or not in the king's service before Esther was queen, does not appear certainly. From the time, however, of Esther being queen he was one of those "who sat in the king's gate." In this situation he saved the king's life by discovering the conspiracy of two of the eunuchs to kill him. When the decree for the massacre of all the Jews in the empire was known, it was at his earnest advice and exhortation that Esther undertook the perilous task of interceding with the king on their behalf. He might feel the more impelled to exert himself to save them, as he was himself the cause of the meditated destruction of his countrymen. Whether, as some think, his refusal to bow before Haman arose from religious scruples, as if such salutation as was practiced in Persia (*προσκύνησις*) were akin to idolatry, or whether, as seems far more probable, he refused from a stern unwillingness as a Jew to bow before an Analekite, in either case the affront put by him upon Haman was the immediate cause of the fatal decree. Anyhow, he and Esther were the instruments in the hand of God of averting the threatened ruin. The concurrence of Esther's favorable reception by the king with the Providential circumstance of the passage in the Medo-Persian chronicles, which detailed Mordecai's fidelity in disclosing the conspiracy, being read to the king that very night, before Haman came to ask leave to hang him; the striking incident of Haman being made the instrument of the exaltation and honor of his most hated adversary, which he rightly interpreted as the presage of his own downfall, and finally the hanging of Haman and his sons upon the very gallows which he had reared for Mordecai, while Mordecai occupied Haman's post as vizier of the Persian monarchy;

are incidents too well known to need to be further dwelt upon. It will be more useful, probably, to add such remarks as may tend to point out Mordecai's place in sacred, profane, and rabbinical history respectively. The first thing is to fix his date. This is pointed out with great particularity by the writer himself, not only by the years of the king's reign, but by his own genealogy in ch. ii. 5, 6. Some, however, have understood this passage as stating that Mordecai himself was taken captive with Jeconiah. But that any one who had been taken captive by Nebuchadnezzar in the 8th year of his reign should be vizier after the 12th year of any Persian king among the successors of Cyrus, is obviously impossible. Besides, too, the absurdity of supposing the ordinary laws of human life to be suspended in the case of any person mentioned in Scripture, when the sacred history gives no such intimation, there is a peculiar defiance of probability in the supposition that the cousin german of the youthful Esther, her father's brother's son should be of an age ranging from 90 to 170 years, at the time that she was chosen to be queen on account of her youth and beauty. But not only is this interpretation of Esth. ii. 5, 6, excluded by chronology, but the rules of grammatical propriety equally point out, not Mordecai, but Kish, as being the person who was taken captive by Nebuchadnezzar at the time when Jeconiah was carried away. Because, if it had been intended to speak of Mordecai as led captive, the ambiguity would easily have been avoided by either placing the clause

בְּשׂוֹשָׁן הַיְבֵרָה, etc., immediately after בְּשׂוֹשָׁן הַיְבֵרָה, and then adding his name and genealogy, הָיָא מִן, or else by writing דְּרוּהָ instead of הָיָא, at the beginning of verse 6. Again, as the sentence stands, the distribution of the copulative וְ distinctly connects the sentence

וְהָיָא אִמְּךָ in ver. 7, with הָיָה in ver. 5, showing that three things are predicated of Mordecai: (1) that he lived in Shushan; (2) that his name was Mordecai, son of Jair, son of Shimei, son of Kish the Benjamite who was taken captive with Jehoiachin; (3) that he brought up Esther. This genealogy does then fix with great certainty the age of Mordecai. He was great grandson of a contemporary of Jehoiachin. Now four generations cover 120 years — and 120 years from b. c. 593 bring us to b. c. 473, i. e. to the 6th year of the reign of Xerxes; thus confirming with singular force the arguments which led to the conclusion that Ahasuerus is Xerxes. [AHASUERUS.]<sup>b</sup> The carrying back the genealogy of a captive to the time of the Captivity has an obvious propriety, as connecting the captives with the family record preserved in the public genealogies, before the Captivity, just as an American would be likely to carry up his pedigree to the ancestor who emigrated from England. And now it would seem both possible and probable (though it cannot be certainly

<sup>a</sup> De Wette thinks that "the opinion that Mordecai wrote the book does not deserve to be confuted," although the author "designed that the book should be considered as written by Mordecai." His translator adds, that "the greatest part of the Jewish and Christian scholars" refer it to him. But he adds, "more modern writers, with better judgment, affirm only their ignorance of the authorship" (*Introd.* ii. 345-

347). But the objections to Mordecai's authorship are only such as, if valid, would impugn the truth and authenticity of the book itself.

<sup>b</sup> Justin has the singular statement, "Primum Xerxes, rex Persarum, Judeos domuit" (*lib. xxxvi cap. iii.*). May not this arise from a confused knowledge of the events recorded 'n Esther?

proved) that the Mordecai mentioned in the duplicate passage, Ezr. ii. 2; Neh. vii. 7, as one of the leaders of the captives who returned from time to time from Babylon to Judæa [EZRA], was the same as Mordecai of the book of Esther. It is very probable that on the death of Xerxes, or possibly during his lifetime, he may have obtained leave to lead back such Jews as were willing to accompany him, and that he did so. His age need not have exceeded 50 or 60 years, and his character points him out as likely to lead his countrymen back from exile, if he had the opportunity. The name Mordecai not occurring elsewhere, makes this supposition the more probable.

As regards his place in profane history, the domestic annals of the reign of Xerxes are so scanty, that it would not surprise us to find no mention of Mordecai. But there is a person named by Ctesias, who probably saw the very chronicles of the kings of Media and Persia referred to in Esth. x. 2, whose name and character present some points of resemblance with Mordecai, namely, Matacas, or Natacas (as the name is variously written), whom he describes as Xerxes's chief favorite, and the most powerful of them all. His brief notice of him in these words, *ἠμαρβέναν δὲ μέγιστον ἡδύνατο Νατακάς*, is in exact agreement with the description of Mordecai, Esth. ix. 4, x. 2, 3. He further relates of him, that when Xerxes after his return from Greece had commissioned Megabyzus to go and plunder the temple of Apollo at Delphi, upon his refusal, he sent Matacas the eunuch, to insult the god, and to plunder his property, which Matacas did, and returned to Xerxes. It is obvious how grateful to the feelings of a Jew, such as Mordecai was, would be a commission to desecrate and spoil a heathen temple. There is also much probability in the selection of a Jew to be his prime minister by a monarch of such decided iconoclastic propensities as Xerxes is known to have had (Prideaux, *Connect.* i. 231-233). Xerxes would doubtless see much analogy between the Magian tenets of which he was such a zealous patron, and those of the Jews' religion; just as Pliny actually reckons Moses (whom he couples with Janes) among the leaders of the Magian sect, in the very same passage in which he relates that Osthanes the Magian author and heresiarch accompanied Xerxes in his Greek expedition, and widely diffused the Magian doctrines (lib. xxx. ch. i. § 2); and in § 4 seems to identify Christianity also with Magic. From the context it seems highly probable that this notice of Moses and of Janes may be derived from the work of Osthanes, and if so, the probable intercourse of Osthanes with Mordecai would readily account for his mention of them. The point, however, here insisted upon is, that the known hatred of Xerxes to idol-worship makes his selection of a Jew for his prime minister very probable, and that there are strong points of resemblance in what is thus related of Matacas, and what we know from Scripture of Mordecai. Again, that Mordecai was, what Matacas is related to have been, a eunuch, seems not improbable from his having neither wife nor child, from his bringing up his cousin Esther

in his own house,<sup>b</sup> from his situation in the king's gate, from his access to the court of the women, and from his being raised to the highest post of power by the king, which we know from Persian history was so often the case with the king's eunuchs. With these points of agreement between them, there is sufficient resemblance in their names to add additional probability to the supposition of their identity. The most plausible etymology usually given for the name *Mordecai* is that favored by Gesenius, who connects it with Merodach the Babylonian idol (called Mardok in the cuneiform inscriptions), and which appears in the names Messesi Mordacus, Sisi-Mordachus, in nearly the same form as in the Greek, *Μαρδοχαῖος*. But it is highly improbable that the name of a Babylonian idol should have been given to him under the Persian dynasty,<sup>c</sup> and it is equally improbable that Mordecai should have been taken into the king's service before the commencement of the Persian dynasty. If then we suppose the original form of the name to have been Matacai, it would easily in the Chaldee orthography become Mordecai, just as *מְרַדַּי* is for *מְרַדַּי*, *מְרַדַּי* for *מְרַדַּי*, *מְרַדַּי* for *מְרַדַּי*, etc. In the Targum of Esther he is said to be called Mordecai, because he was like *מְרַדַּי* *מְרַדַּי*, "to pure myrrh."

As regards his place in Rabbinical estimation, Mordecai, as is natural, stands very high. The interpolations in the Greek book of Esther are one indication of his popularity with his countrymen. The Targum (of late date) shows that this increased rather than diminished with the lapse of centuries. There Shimei in Mordecai's genealogy is identified with Shimei the son of Gera who cursed David, and it is said that the reason why David would not permit him to be put to death then was, that it was revealed to him that Mordecai and Esther should descend from him; but that in his old age, when this reason no longer applied, he was slain. It is also said of Mordecai that he knew *the seventy languages*, i. e. the languages of all the nations mentioned in Gen. x., which the Jews count as seventy nations, and that his age exceeded 400 years (*Juchosin* ap. Wolf, and Stehelin, *Rabb. Liter.* i. 179). He is continually designated by the appellation *יְדִיָּהּ*, "the Just," and the amplifications of Esth. viii. 15 abound in the most glowing descriptions of the splendid robes, and Persian buskins, and Median scimitars, and golden crowns, and the profusion of precious stones and Macedonian gold, on which was engraved a view of Jerusalem, and of the phylactery over the crown, and the streets strewn with myrtle, and the attendants, and the heralds with trumpets, all proclaiming the glory of Mordecai and the exaltation of the Jewish people. Benjamin of Tudela mentions the ruins of Shushan and the remains of the palace of Ahasuerus as still existing in his day, but places the tomb of Mordecai and Esther at Hamadan, or Ecabatana (p. 128). Others, however, place the tomb

<sup>a</sup> It seems probable that some other temple, not that at Delphi, was at this time ordered by Xerxes to be spoiled, as no other writer mentions it. It might be that of Apollo Didymæus, near Miletus, which was destroyed by Xerxes after his return (Strab. xiv. cap. i. § 5).

<sup>b</sup> To account for this, the Targum adds that he was 75 years old.

<sup>c</sup> Mr. Rawlinson (*Herod.* i. 270) points out Mr. Layard's conclusion (*Nin.* ii. 441), that the Persians adopted generally the Assyrian religion, as "quite a mistake."

of Mordecai in Susa, and that of Esther in or near Baram in Galilee (note to Asher's *Benj. of Tuhl.* p. 166). With reference to the above-named palace of Ahasuerus at Shushan, it may be added that considerable remains of it were discovered by Mr. Loftus's excavations in 1852, and that he thinks the plan of the great colonnade, of which he found the bases remaining, corresponds remarkably to the description of the palace of Ahasuerus in Esth. i. (Loftus, *Chaldea*, ch. xxviii.). It was built or begun by Darius Hystaspis.

A. C. H.

**MOREH** [מֹרֶה, *archer or teacher*; perh. *fruitful*]. A local name of central Palestine, one of the very oldest that has come down to us. It occurs in two connections.

1. THE PLAIN, OR PLAINS (or, as it should rather be rendered, the OAK OR OAKS) OF MOREH (מֹרֶה אֱלֹן מֹרֶה and אֱלֹנֵי מֹרֶה; Samar. in both cases, מֹרֶה אֱלֹן מֹרֶה: ἡ δρυς ἡ ὑψηλή: *convallis illustris, vallis tendens* [et *intrans procul*]), the first of that long succession of sacred and venerable trees which dignified the chief places of Palestine, and formed not the least interesting link in the chain which so indissolubly united the land to the history of the nation.

The Oak of Moreh was the first recorded halting-place of Abram after his entrance into the land of Canaan (Gen. xii. 6). Here Jehovah "appeared" to him, and here he built the first of the series of altars<sup>a</sup> which marked the various spots of his residence in the Promised Land, and dedicated it "to Jehovah, who appeared<sup>b</sup> unto him" (ver. 7). It was at the "place of Shechem" (xii. 6), close to (אֵיל) the mountains of Ebal and Gerizim (Deut. xi. 30), where the Samar. Cod. adds "over against Shechem."

There is reason for believing that this place, the scene of so important an occurrence in Abram's early residence in Canaan, may have been also that of one even more important, the crisis of his later life, the offering of Isaac, on a mountain in "the land of Moriah." [MORIAH.]

A trace of this ancient name, curiously reappearing after many centuries, is probably to be found in Morthia, which is given on some ancient coins as one of the titles of Neapolis, i. e. Shechem, and by Pliny and Josephus as Mamortha<sup>d</sup> or Mabortha (Reland, *Diss.* iii. § 8). The latter states (*B. J.* iv. 8, § 1), that "it was the name by which the place was called by the country-people" (ἐπιχώριοι), who thus kept alive the ancient appellation, just as the peasants of Hebron did that of Kirjath-arba down to the date of Sir John Maundeville's visit. [See vol. ii. p. 1565 a, and note.]

Whether the oaks of Moreh had any connection with

<sup>a</sup> It may be roughly said that Abraham built altars; Isaac dug wells; Jacob erected stones.

<sup>b</sup> הִפְרִיחֵהוּ. This is a play upon the same word which, as we shall see afterwards, performs an important part in the name of MORIAH.

<sup>c</sup> Eccclus. i. 26 perhaps contains a play on the name Moreh — "that foolish people (ὁ λαὸς ὁ μωροὺς) who dwell in Sicheim." If the pun existed in the Hebrew text it may have been between Sicheim and Sichor (drunken).

<sup>d</sup> This form is possibly due to a confusion between Moreh and Mamra. (See Reland as above.)

\* \* This identification of Moreh and Harod (ascribed

2 THE HILL OF MORIH (הַבְּרֵית הַמֹּרֶה) :

Γαββαθαμωπα [Vat. -μωπα]; Alex. ἀπο τοῦ βωμοῦ τοῦ αβωρ: *collis excelsus*), at the foot of which the Midianites and Amalekites were encamped before Gideon's attack upon them (Judg. vii. 1), seems, to say the least, most uncertain. Copious as are the details furnished of that great event of Jewish history, those which enable us to judge of its precise situation are very scanty. But a comparison of Judg. vi. 33 with vii. 1 makes it evident that it lay in the valley of Jezreel, rather on the north side of the valley, and north also of the eminence on which Gideon's little band of heroes was clustered. At the foot of this latter eminence was the spring of Ain-Charod (A. V. "the well of Harod"), and a sufficient sweep of the plain intervened between it and the hill Moreh to allow of the encampment of the Amalekites. No doubt — although the fact is not mentioned — they kept near the foot of Mount Moreh, for the sake of some spring or springs which issued from its base, as the Ain-Charod did from that on which Gideon was planted. These conditions are most accurately fulfilled if we assume *Jebel ed-Duhy*, the "Little Hermon" of the modern travellers, to be Moreh, the *Ain-Jalûd* to be the spring of Harod, and Gideon's position to have been on the northeast slope of *Jebel Fukûr* (Mount Gilboa), between the village of *Nuris* and the last-mentioned spring. Between *Ain Jalûd* and the foot of the "Little Hermon," a space of between 2 and 3 miles intervenes, ample in extent for the encampment even of the enormous horde of the Amalekites. In its general form this identification is due to Professor Stanley.<sup>e</sup> The desire to find Moreh nearer to Shechem, where the "oak of Moreh" was, seems to have induced Mr. Van de Velde to place the scene of Gideon's battle many miles to the south of the valley of Jezreel, "possibly on the plain of *Tûbas* or of *Yâsir*;" in which case the encampment of the Israelites may have been on the ridge between *Wadi Ferrâ* and *Wadi Tûbas*, near *Burj el-Ferrâ* (*Syr. & Pal.* ii. 341-2). But this involves the supposition of a movement in the position of the Amalekites, for which there is no warrant either in the narrative or in the circumstances of the case; and at any rate, in the present state of our knowledge, we may rest tolerably certain that *Jebel ed-Duhy* is the HILL OF MOREH.

G.

MORE'SHETH-GATH' (מֹרֶשֶׁת גַּת) :

κληρονομία Γέθ: *hereditus Geth*), a place named by the prophet Micah only (Mic. i. 14), in company with Lachish, Achzib, Mareshah, and other towns of the lowland district of Judah. His words, "therefore shalt thou give presents to Moresheth-gath," are explained by Ewald (*Propheten*, 330, 331) as referring to Jerusalem, and as containing an allusion

above to Stanley) is suggested also in Bertheau's *Richard u. Ruth*, p. 119, and Bunsen's *Bibelwerk* on Judg. vii. 1. The reasons for this view are less obvious in the A. V., owing to the mistranslation of עַיִן by

"well" (which would be strictly בְּיָרֵךְ), instead of "fountain," and of עַל by "beside," instead of "above." The identification of the places in question depends on these intimations. The position of Gideon "above the fountain of Harod" is evident from vii. 8, where it is said that the host of Midian were below him in the valley

H

to the signification of the name Moresheth, which, though not so literal as the play on those of Achzib and Mareshah, is yet tolerably obvious: "Therefore shalt thou, O Jerusalem, give compensation to Moresheth-gath, itself only the possession of another city."

Micah was himself the native of a place called Moresheth, since he is designated, in the only two cases in which his name is mentioned, "Micah the Morashite," which latter word is a regular derivation from Moresheth; but whether Moresheth-gath was that place cannot be ascertained from any information given us in the Bible.

Eusebius and Jerome, in the *Onomasticon*, and Jerome in his Commentary on Micah (*Prologus*), give Morasthi as the name, not of the person, but of the place; and describe it as "a moderate-sized village (*ludus grandis viculus*) near Eleutheropolis, the city of Philistia (Palestinae), and to the east thereof."

Supposing *Beit-jibrin* to be Eleutheropolis, no traces of the name of Moresheth-gath have been yet discovered in this direction. The ruins of Maresha lie a mile or two due south of *Beit-jibrin*; but it is evident from Mic. i. 14, 15, that the two were distinct.

The affix "gath" may denote a connection with the famous Philistine city of that name—the site of which cannot, however, be taken as yet ascertained—or it may point to the existence of vineyards and wine-presses, "gath" in Hebrew signifying a wine-press or vat.

**MORI'AH.** A name which occurs twice in the Bible (Gen. xxii. 2; 2 Chr. iii. 1).

1. THE LAND OF MORIAH (הַר הַמִּזְבֵּחַ) [see below]; Samar. הַר הַבְּוֹרָה (הַר הַבְּוֹרָה) *terra visionis*). On "one of the mountains" in this district took place the sacrifice of Isaac (Gen. xxii. 2). What the name of the mountain was we are not told; but it was a conspicuous one, visible from "afar off" (ver. 4). Nor does the narrative afford any data for ascertaining its position; for although it was more than two days' journey from the "land of the Philistines"—meaning no doubt the district of Gerar where Beer-sheba lay, the last place mentioned before and the first after the occurrence in question—yet it is not said how much more than two days it was. The mountain—the "place"—came into view in the course of the third day; but the time occupied in performing the remainder of the distance is not stated. After the deliverance of Isaac, Abraham, with a play on the name of Moriah impossible to convey in English, called the spot Jehovah-jireh, "Jehovah sees" (*i. e.* provides), and thus originated a proverb referring to the providential and opportune interference of God. "In the mount of Jehovah, He will be seen."

It is most natural to take the "land of Moriah" as the same district with that in which the "Oak

(A. V. 'plain') of Moreh" was situated, and not as that which contains Jerusalem, as the modern tradition, which would identify the Moriah of Gen. xxii. and that of 2 Chr. iii. 1, affirms. The former was well known to Abraham. It was the first spot on which he had pitched his tent in the Promised Land, and it was hallowed and endeared to him by the first manifestation of Jehovah with which he had been favored, and by the erection of his first altar. With Jerusalem on the other hand, except as possibly the residence of Melchizedek, he had not any connection whatever; it lay as entirely out of his path as it did out of that of Isaac and Jacob. The LXX. appear to have thus read or interpreted the original, since they render both Moreh and Moriah in Gen. by ὑψηλή, while in 2 Chr. iii. they have Ἀμωρία. The one name is but the feminine of the other<sup>c</sup> (Simonis, *Onom.* 414), and there is hardly more difference between them than between Maresha and Mareshah, and not so much as between Jerusalem and Jerushalaim. The Jewish tradition, which first appears in Josephus—unless 2 Chr. iii. 1 be a still earlier hint of its existence—is fairly balanced by the rival tradition of the Samaritans, which affirms that Mount Gerizim was the scene of the sacrifice of Isaac, and which is at least as old as the 3d century after Christ. [GERIZIM.]

2. MOUNT MORIAH (הַר הַמִּזְבֵּחַ) *δρος του Ἀμωρία* [Vat. -ρεια]; Alex. *Ἀμωρία: Mons Moria*). The name ascribed, in 2 Chr. iii. 1 only, to the eminence on which Solomon built the Temple. "And Solomon began to build the house of Jehovah in Jerusalem on the Mount Moriah, where He appeared to David his father, in a place which David prepared in the threshing-floor of Araunah the Jebusite." From the mention of Araunah, the inference is natural that the "appearance" alluded to occurred at the time of the purchase of the threshing-floor by David, and his erection thereon of the altar (2 Sam. xxiv.; 1 Chr. xxi.). But it will be observed that nothing is said in the narratives of that event of any "appearance" of Jehovah. The earlier and simpler record of Samuel is absolutely silent on the point. And in the later and more elaborate account of 1 Chr. xxi. the only occurrence which can be construed into such a meaning is that "Jehovah answered David by fire on the altar of burnt-offering."

A tradition which first appears in a definite shape in Josephus (*Ant.* i. 13, §§ 1, 2, vii. 13, § 4), and is now almost universally accepted, asserts that the "Mount Moriah" of the Chronicles is identical with the "mountain" in "the land of Moriah" of Genesis, and that the spot on which Jehovah appeared to David, and on which the Temple was built, was the very spot of the sacrifice of Isaac. In the early Targum of Onkelos on Gen. xxii., this belief is exhibited in a very mild form. The land of Moriah is called the "land of worship,"<sup>e</sup> and

<sup>a</sup> Michaelis (*Suppl.* No. 1458) suggests that the name may be more accurately Hammoriah, since it is not the practice in the early names of districts to add the article. Thus the land of Canaan is ארץ כנען,

not ארץ כנען. [See LASHARON.]

<sup>b</sup> Following Aquila, τὴν γῆν τὴν καταφανῆ; and Symmachus, τὴν γῆν τῆς ὀπτασίας. The same rendering is adopted by the Samaritan version.

<sup>c</sup> Others take Moriah as Moreh-jah (*i. e.* Jehovah),

but this would be to anticipate the existence of the name of Jehovah, and, as Michaelis has pointed out (*Suppl.* No. 1458), the name would more probably be Moriel, El being the name by which God was known to Abraham. [But see JEHOVAH, Amer. ed.]

<sup>d</sup> \* For topographical notices of Mount Moriah see the articles on JERUSALEM; KIDRON; TEMPLE; ΤΥΡΟ ΠΕΓΟΝ (Amer. ed.).

B. W.

הַר הַמִּזְבֵּחַ

ver. 14 is given as follows: "And Abraham sacrificed and prayed in that place; and he said before Jehovah, In this place shall generations worship, because it shall be said in that day, In this mountain did Abraham worship before Jehovah." But in the Jerusalem Targum the latter passage is thus given, "Because in generations to come it shall be said, In the mount of the house of the sanctuary of Jehovah did Abraham offer up Isaac his son, and in this mountain which is the house of the sanctuary was the glory of Jehovah much manifest." And those who wish to see the tradition in its complete and detailed form, may consult the Targum of R. Joseph on 1 Chr. xxi. 15, and 2 Chr. iii. 1, and the passages collected by Beer (*Leben Abrahams nach jüdische Sage*, 57-71).<sup>a</sup> But the single occurrence of the name in this one passage of Chronicles is surely not enough to establish a coincidence, which if we consider it is little short of miraculous.<sup>b</sup> Had the fact been as the modern belief asserts, and had the belief existed in the minds of the people of the Old or New Testament, there could not fail to be frequent references to it, in the narrative — so detailed — of the original dedication of the spot by David; in the account of Solomon's building in the book of Kings; of Nehemiah's rebuilding (compare especially the reference to Abraham in ix. 7); or of the restorations and purifications of the Maccabees. It was a fact which must have found its way into the paronomastic addresses of the prophets, into the sermon of St. Stephen, so full of allusion to the Founders of the nation, or into the argument of the author of the Epistle to the Hebrews. But not so; on the contrary, except in the case of Salem, and that is by no means ascertained — the name of Abraham does not, as far as the writer is aware, appear once in connection with Jerusalem or the later royal or ecclesiastical glories of Israel. Jerusalem lies out of the path of the patriarchs, and has no part in the history of Israel till the establishment of the monarchy. The "high places of Isaac," as far as we can understand the allusion of Amos (vii. 9, 16) were in the northern kingdom. To connect Jerusalem in so vital a manner with the life of Abraham, is to antedate the whole of the later history of the nation and to commit a serious anachronism, warranted neither by the direct nor indirect statements of the sacred records.

But in addition to this, Jerusalem is incompatible with the circumstances of the narrative of Gen. xxii. To name only two instances — (1.) The Temple Mount cannot be spoken of as a conspicuous eminence. "The towers of Jerusalem," says Professor Stanley (*S. G. P.* p. 251), "are indeed seen from the ridge of Mar Elias at the distance of three miles to the south, but there is no elevation; nothing corresponding to the 'place afar off'

to which Abraham 'lifted up his eyes.' And the special locality which Jewish tradition has assigned for the place, and whose name is the chief guarantee for the tradition — Mount Moriah, the hill of the Temple — is not visible till the traveller is close upon it at the southern edge of the Valley of Hinnom, from whence he looks down upon it as on a lower eminence."<sup>c</sup>

(2.) If Salem was Jerusalem, then the trial of Abraham's faith, instead of taking place in the lonely and desolate spot implied by the narrative, where not even fire was to be obtained, and where no help but that of the Almighty was nigh, actually took place under the very walls of the city of Melchizedek.

But, while there is no trace except in the single passage quoted of Moriah being attached to any part of Jerusalem — on the other hand in the slightly different form of מוֹרְיָה it did exist attached to the town and the neighborhood of Shechem, the spot of Abram's first residence in Palestine. The arguments in favor of the identity of Mount Gerizim with the mountain in the land of Moriah of Gen. xxii., are stated under GERIZIM (vol. ii. pp. 901, 902). As far as they establish that identity, they of course destroy the claim of Jerusalem. G.

\* In another article, GERIZIM (Amer. ed.), we have given our reasons for rejecting the theory which would identify the Moriah of Genesis with Mount Gerizim, and which is again brought forward in the present article. This theory has the respectable authority of Dean Stanley (reviving the discredited Samaritan claim), and the weighty endorsement of Mr. Grove and Mr. Ffoulkes. On the other side, in corroboration of the view of its untenableness already given, may be cited the testimony of three most competent writers who have lately traversed the ground and examined this point. Prof. J. Leslie Porter, author of the valuable *Handbook*, etc., pronounces it "simply impossible" (Kitto's *Bibl. Cyc.* ii. 113); Dr. Thomson, the veteran American missionary, whose personal acquaintance with the country is unsurpassed, declares it "incredible" (*Land and Book*, ii. 212); and Mr. Tristram, the observant English traveller who visited Gerizim two or three times, says: "I have traversed and timed these routes repeatedly, in a greater or less portion of their course, and feel satisfied that as long as the sacred text remains as it is, 'on the third day,' the claims of Gerizim are untenable" (*Land of Israel*, p. 153).

In disproving "that identity," we leave "the claim of Jerusalem" clear of a rival. But this claim is distinct, and, like the other, must rest on its own merits. Its principal proofs are the iden-

<sup>a</sup> The modern form of the belief is well expressed by the latest Jewish commentator (Kalisch, *Genesis*, 444, 445): "The place of the future temple, where it was promised the glory of God should dwell, and whence atonement and peace were to bless the hearts of the Hebrews, was hallowed by the most brilliant act of piety, and the deed of their ancestor was thus more prominently presented to the imitation of his descendants." The spot of the sacrifice of Isaac is actually shown in Jerusalem (Barcelona, *City*, 109). <sup>b</sup> Fürst likewise regards the mount of Abraham's sacrifice and that of Solomon's temple as the same (*Handb.* 788).—H.]

<sup>c</sup> There is in the East a natural tendency when a

place is established as a sanctuary to make it the scene of all the notable events, possible or impossible, which can be by any play of words or other pretext be connected with it. Of this kind were the early Christian legends that Golgotha was the place of the burial of the first Adam as well as of the death of the Second (see Mislin, *Saints Lieux*, ii. 304, 305). Of this kind also are the Mohammedan legends which cluster round all the shrines and holy places, both of Palestine and Arabia. In the Targum of Chronicles (2 Chr. iii. 1) alluded to above, the Temple mount is made to be also the scene of the vision of Jacob.

<sup>c</sup> See JERUSALEM, vol. ii. p. 1277 a, and the plate in Bartlett's *Walks* there referred to.

ty of its name; the distance from Beer-sheba, which suits exactly the requirements of the narrative; and the tradition of the Jews, twice recorded by Josephus: "It was that mountain upon which King David afterwards built [purposed to build] the Temple" (*Ant.* i. 13, § 2). "Now it happened that Abraham came and offered his son Isaac for a burnt-offering at that very place, as we have before related. When King David saw that God had heard his prayer and graciously accepted his sacrifice, he resolved to call that entire place the altar of all the people, and to build a temple to God there" (*Ant.* vii. 13, § 4).

Without countervailing evidences these grounds would be accepted as sufficient. We will now examine the objections to this view which are brought forward in the present article.

(1.) "Although it was more than two days' journey from 'the land of the Philistines,' yet it is not said how much more than two days it was." This does not weigh against Jerusalem. It is merely a negative argument in behalf of the more distant locality, Gerizim, and has been answered under that head.

(2.) The Septuagint makes "Moreh and Moriah" etymologically the same; "the one name is but the feminine of the other." This argument, which belongs properly to the former article, we have already answered, and are sustained by a recent able author: "Moreh is strictly a proper name, and as such, both in Gen. xii. 6 and Deut. xxix. 30, though in the genitive after a definite noun, rejects the article; the 'hill of Moreh,' mentioned in Judg. vii. 1, where the name has the article, being a totally different place. On the other hand, the name Moriah, in the two places of its occurrence, namely, Gen. xxii. and 2 Chr. iii. 1, bears the article as an appellation, whether it denotes the same situation in both places or not. It is true the LXX. render the Moreh of Gen. xii. and the Moriah of Gen. xxii. alike by the adjective *ὄψηλας*, in one case translating by the words 'the lofty oak,' in the other, by 'the high land.' It is plain that, on whatever grounds they proceeded in thus translating, this gives no support to the supposition that the names, as names of places, are synonymous, inasmuch as they did not take the words for names of places at all, but as descriptive adjectives. Mr. Grove tells us that *מִרְיָה* is only the feminine form of *מֹרְיָה*. According to no analogy of the construction of feminine forms can this be said; the masculine form should in his case have been *מֹרְיָה*" (Quarry, *Genesis and its Authorship*, pp. 210, 211).

(3.) Abraham had little or no "connection" with Jerusalem. "It lay out of his path," while Gerizim was "well-known" to him, and "was hallowed and endeared to him." The obvious answer to this is, that the patriarch did not choose the spot; he went to the place which the Lord selected for him, and started apparently ignorant of his precise destination. This argument further assumes that he not only went to a place of his own selection, but also that he started on an agreeable excursion, which he would naturally wish to associate with the pleasant memories of his pilgrimage; the reverse of which we know to have been the fact.

(4.) "Had the fact been as the modern belief asserts, there could not fail to be frequent refer-

ence to it, by the writers both of the Old and New Testaments." The reply to this is strongly put by a learned writer whom we have already quoted: "This *argumentum ab silentio* is notoriously not to be relied on; the instances of unaccountable silence respecting undoubted facts, where we might have expected them to be mentioned, are too numerous among ancient writers to allow it any weight, except as tending to corroborate arguments that may have considerable weight in themselves. In the present case, the clause in 2 Chr.

iii. 1, 'which was seen' (*בְּרָאָה*) or 'provided by David,' may fairly be taken as containing an obscure reference to the Jehovah-Jireh, and the saying, 'In the mount of the Lord it shall be seen,' of Gen. xxii. 14, so that the absence of all such reference is not so complete as is alleged" (Quarry, pp. 213, 214).

Still, if this site had been selected for the Temple by King David because it was the scene of the offering of Isaac (and another reason is assigned by the sacred writer, 1 Chr. xxi., xxii., without any intimation of this), the absence of some more distinct allusion to the fact, though not more unaccountable than other omissions in the Scriptures, must yet be admitted to be unaccountable.

(5.) "The Jewish tradition is fairly balanced by the rival tradition of the Samaritans." Surely not "balanced;" the latter is later and less reliable. Josephus and the rabbinical writers doubtless embodied the honest tradition of their countrymen supported by the identity of names; the Moriah of Genesis and the Moriah of Chronicles being not only the same word, but used in no other connection. The first tradition is natural; the second is suspicious—in keeping with other Samaritan claims, which we know to have been false.

(6.) "The temple-mount is not a conspicuous eminence, like the one to which Abraham 'lifted up his eyes.'" This objection we have already answered. The phrase simply indicates the direction of the eyes, whether up or down, and a further illustration is furnished in ver. 13 of this chapter.

(7.) The eminence was seen "afar off," and "the hill of the Temple is not visible till the traveller is close upon it." The phrase, "afar off," is relative. It is modified by circumstances, as in Gen. xxxvii. 18, where it is limited to the distance at which a person would be seen and recognized on a plain. In most connections it would indicate a greater distance than is admissible here; but there is a circumstance which qualifies it in this passage. From the spot where the place became visible (as is conceded by Mr. Ffoulkes) Abraham and Isaac proceeded alone to the appointed spot, the latter bearing the wood. The distance to be traversed with this load from the point at which Moriah becomes visible to a traveller from the south to its summit is fully as great as any reader would naturally associate with this fact in the narrative.

(8.) "If Salem was Jerusalem, instead of the lonely and desolate spot implied by the narrative, it took place under the very walls of the city of Melchizedek." Mr. Grove, who suggests this, not being convinced of their identity—"the arguments are almost equally balanced," ii. 1272)—while Dean Stanley is fully convinced that they are not identical, this argument is for other minds, for

those who hold other and positive views on this point. We accept the identity, and we feel the force of the objection. Our only reply to it is, that the environs of an eastern walled town are often as free from observation, as secluded and still, as a solitude. The writer of this has passed hours together within a stone's throw of the walls of the modern Jerusalem at various points undisturbed by any sound, and as unobserved as though the city had been tenantless. This view is supported by a writer already quoted: "Even under the walls of the city of Melchizedek the whole may have taken place without attracting the notice of the inhabitants, and the desolate loneliness of the spot, supposed to be implied in the narrative, has no place in it whatever. It is not implied that Abraham could not obtain fire, but going to an unknown place, he took with him, by way of precaution, what would be needful for the intended sacrifice" (Quarry, p. 213).

This partially relieves the difficulty which Mr. Grove has raised for those of his readers who identify Salem and Jerusalem; but only in part, we think. It must be acknowledged that close proximity to a city is not a natural locality for such a scene. We should suppose that the patriarch would have been directed — we should naturally infer from the narrative itself that he was directed — to some spot remote from the dwellings of men, where, in the performance of this remarkable rite, which even his servants were not to witness, he would not be liable to interruption or intrusive observation.

It must also be admitted that the selection of this spot, with or without a design, for the two events associated with it, is a most unlikely occurrence. "It would take a vast amount of contrary evidence to force me to abandon this idea," says Dr. Thomson. It would require very little to lead us to relinquish it; for in itself it seems to us the height of improbability. That the altar of burnt-offering for the Hebrew worship should have been erected on the identical spot where centuries before the great progenitor of the nation had erected the altar for the sacrifice of his son, led thither for the purpose three days' journey from home — that this should have occurred without design, have been a mere "coincidence," — we must concur with Mr. Grove in pronouncing "a little short of miraculous." Yet if it did occur, this is a somewhat less incredible supposition than that it was by design. That the locality became invested with any sanctity in the Divine mind — was divinely selected as the site of the Temple, the scene of the second manifestation, because it had been the scene of the first — is an assumption wholly uncountenanced by any fact or analogy within our knowledge. The "natural tendency" of the eastern mind, moreover, to cluster supernatural or sacred events around the supposed scene of a known miracle, is correctly stated by Mr. Grove. Nothing could be more natural than for the Jews, without any clear warrant, to connect if possible the scene of their sacrifices with the offering of Isaac, and associate the altars of their typical worship with the altar on which the son of promise was laid. This correspondence is thought by some to favor the identity; we cannot but regard a double claim, so peculiar, as in itself a suspicious circumstance.

We would say in conclusion that in favor of the identity of the two sites may be urged the identity of the name, used without explanation in these two

passages of Scripture alone, and "in both places alike as an appellative bearing the article;" the possible allusion in a clause of the latter to a clause in the former; the correspondence of the distance with the specifications of the journey; the ancient and consistent Hebrew tradition, universally received in Christendom; the failure to establish a single presumption in favor of any other locality; and the absence of any fatal or decisive objection to this identification. On these grounds the traditional belief will probably abide. Nevertheless, for reasons above intimated, we cannot feel the absolute confidence in it which some express. And the most which we think can be safely affirmed is, that Mount Moriah in Jerusalem, on which the Temple of Solomon was built, was probably, also, the spot where Abraham offered up Isaac. S. W.

\* MORNING, SON OF THE. [LUCIFER.]

MORTAR. The simplest and probably most ancient method of preparing corn for food was by pounding it between two stones (Virg. *Æn.* i. 179). Convenience suggested that the lower of the two stones should be hollowed, that the corn might not escape, and that the upper should be shaped so as to be convenient for holding. The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and handmills among their necessary domestic utensils. When the manna fell they gathered it, and either ground it in the mill or pounded it in the mortar (מִדְּבָחַ, *mēdēbāh*) till it was fit for use (Num. xi. 8). So in the present day stone mortars are used by the Arabs to pound wheat for their national dish *kibby* (Thomson, *The Land and the Book*, ch. viii. p. 94). Niebuhr describes one of a very simple kind which was used on board the vessel in which he went from Jidda to Loheia. Every afternoon one of the sailors had to take the *durra*, or millet, necessary for the day's consumption and pound it "upon a stone, of which the surface was a little curved, with another stone which was long and rounded" (*Descr. de l'Arab* p. 45). Among the inhabitants of Ezzelhoue, a Druse village, Burckhardt saw coffee-mortars made out of the trunks of oak-trees (*Syria*, pp. 87, 88). The spices for the incense are said to have been prepared by the house of Abtines, a family set apart for the purpose, and the mortar which they used was, with other spoils of the Temple, after the destruction of Jerusalem by Titus, carried to Rome, where it remained till the time of Hadrian (Reggio in Martinet's *Hebr. Chrest.* p. 35). Ezzertor mentions a kind of mortar (מִתְּבָשׁ, *cūtīsh*) in which olives were slightly bruised before they were taken to the olive-presses (*Lex. Talm.* n. v. כְּרִישׁ). From the same root as this last is derived *mactēsh* (מִתְּבָשׁ, Prov. xxvii. 22), which probably denotes a mortar of a larger kind in which corn was pounded. "Though thou bray the fool in the mortar among the bruised corn with the pestle, yet will not his folly depart from him." Corn may be separated from its husk and all its good properties preserved by such an operation, but the fool's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing

an allusion to a mode of punishment by which criminals were put to death, by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Hebrews. The Ulemats, or body of lawyers, in Turkey had the distinguished privilege, according to De Tott (*Mém.* i. p. 28, Eng. tr.), of being put to death only by the pestle and the mortar. Such, however, is supposed to be the reference in the proverb by Mr. Roberts, who illustrates it from his Indian experience. "Large mortars are used in the East for the purpose of separating the rice from the husk. When a considerable quantity has to be prepared, the mortar is placed outside the door, and two women, each with a pestle of five feet long, begin the work. They strike in rotation, as blacksmiths do on the anvil. Cruel as it is, this is a punishment of the state: the poor victim is thrust into the mortar, and beaten with the pestle. The late king of Kandy compelled one of the wives of his rebellious chiefs thus to beat her own infant to death. Hence the saying, 'Though you beat that loose woman in a mortar, she will not leave her ways: ' which means, Though you chastise her ever so much, she will never improve'" (*Orient. Illustr.* p. 368).

W. A. W.

**MORTER** <sup>a</sup> (Gen. xi. 3; Ex. i. 14; Lev. xiv. 42, 45; Is. xli. 25; Ez. xiii. 10, 11, 14, 15, xxii. 23; Nah. iii. 14). Omitting iron cramps, lead [HANDICRAFT], and the instances in which large stones are found in close apposition without cement, the various compacting substances used in oriental buildings appear to be—1, bitumen, as in the Babylonian structures; 2, common mud or moistened clay; 3, a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 1, 2, 3, well pounded, sometimes mixed and sometimes coated with oil, so as to form a surface almost impenetrable to wet or the weather. [PLASTER.] In Assyrian, and also Egyptian brick buildings stubble or straw, as hair or wool among ourselves, was added to increase the tenacity (*Shaw, Trav.* p. 206; Volney, *Trav.* ii. 436; Chardin, *Voy.* iv. 116). If the materials were bad in themselves, as mere mud would necessarily be, or insufficiently mixed, or, as the Vulgate seems to understand (Ez. xiii. 10), if straw were omitted, the mortar or cob-wall would be liable to crumble under the influence of wet weather. See *Shaw, Trav.* p. 136, and *Ges.* p. 1515, s. v. **תַּבְרֵל**: a word connected with the Arabic *Tafal*,<sup>b</sup> a substance resembling pipe-clay, believed by Burckhardt to be the detritus of the felspar of granite, and used for taking stains out of cloth (*Burckhardt, Syria*, p. 488; *Mishn. Pesach.* x. 3). Wheels for grinding chalk or lime in mortar, closely resembling our own machines for the same purpose, are in use in Egypt (*Niebuhr, Voy.* i. 122, pl. 17; *Burckhardt, Nubia*, pp. 82, 97, 102, 140; *Hasselquist, Trav.* p. 90). [HOUSE; CLAY.]

H. W. P.

\* **MORTGAGE**, Neh. v. 3. [LOAN.]

\* **MORTIFY** (from the late Latin *mortifico*) is used in its primitive sense, though metaphorically,

in Rom. viii. 13 (A. V.): "If ye through the Spirit do mortify (*θανατοῦτε*, lit. "put to death," "make an end of," Noyes) the deeds of the body, ye shall live." So in Col. iii. 5, where it is the rendering of *νεκρώσατε*: "Mortify ('make dead,' Ellicott, Noyes; 'sle,' Wycliffe) therefore your members which are upon the earth;" comp. Gal. v. 24, "They that are Christ's have crucified the flesh with its affections and lusts." A.

**MOSE'RAH** (מוֹסְרָה) [perh. *fetter, chastisement*]: *Μισαδαί*; Alex. *Μεισαδαί*; Comp. *Μοσερᾶ*:] *Mosera*, Deut. x. 6, apparently the same as *MOSEROTH*, Num. xxxiii. 30, it's plural form), the name of a place near Mount Ilor. Hengstenberg (*Authent. der Pentat.*) thinks it lay in the Arabah, where that mountain overhangs it. Burckhardt suggests that possibly *Wady Mousa*, near Petra and Mount Hor, may contain a corruption of *Mosera*. This does not seem likely. Used as a common noun, the word means "bonds, fetters." In Deut. it is said that "there Aaron died." Probably the people encamped in this spot adjacent to the mount, which Aaron ascended, and where he died.

H. H.

\* **MOSEROTH** (מוֹסְרוֹת): *Μασουροῦθ*; Vat. in ver. 30, *Μασουραθ*: *Moseroth*, Num. xxxiii. 30, 31. See *MOSERAH*. A.

**MOSES** (Heb. *Mósheh*, מֹשֶׁה = *drawn*): LXX, Josephus, Philo, the most ancient MSS. of N. T., *Μωϋσῆς*, declined *Μωϋσῆος*, *Μωϋσεῖ* or *Μωϋσῆ*, *Μωϋσεῖα* or *Μωϋσῆν*: Vulg. *Moses*, declined *Moyse*, gen. and dat., *Moyse*, acc.: Rec. Text of N. T. and Protestant versions, *Moses*: Arabic, *Musa*: Numenius ap. Eus. *Præp. Ev.* ix. 8, 27, *Μουσαῖος*: Artapanus ap. Eus. *Ibid.* 27, *Μώσσο*s: Manetho ap. Joseph. c. *Ap.* i. 26, 28, 31, *Osarsiph*: Chæremon, ap. *ib.* 32, *Tisithen*: "the man of God," Ps. xc., title, 1 Chr. xxiii. 14; "the slave of Jehovah," Num. xii. 7, Deut. xxxiv. 5, Josh. i. 1, Ps. cv. 26; "the chosen," Ps. cvi. 23). The legislator of the Jewish people, and in a certain sense the founder of the Jewish religion. No one else presented so imposing a figure to the external Gentile world; and although in the Jewish nation his fame is eclipsed by the larger details of the life of David, yet he was probably always regarded as their greatest hero.

The materials for his life are—

I. The details preserved in the four last books of the Pentateuch.

II. The allusions in the Prophets and Psalms, which in a few instances seem independent of the Pentateuch.

III. The Jewish traditions preserved in the N. T. (Acts vii. 20-38; 2 Tim. iii. 8, 9; Heb. xi. 23-28; Jude 9); and in Josephus (*Ant.* ii. iii., iv.), Philo (*Vita Moysis*), and Clemens. Alex. (*Strom.*).

IV. The heathen traditions of Manetho, Lysimachus, and Chæremon, preserved in Josephus (c. *Ap.* i. 26-32), of Artapanus and others in Euse-

*lutum*, also *limus, pulvis*, A. V. "dust," "powder," as in 2 K. xxiii. 6, and Gen. ii. 7.

<sup>b</sup> **طَبَق**.

<sup>c</sup> Πρώτος ἀπάντων ὁ θαυμαστός θεολόγος τε καὶ νομοθέτης, Eus. *Præp. Ev.* vii. 8. Comp. Philo, *V. Mos.* i. 80.

<sup>a</sup> 1. **הַמָּוֶר**: *πηλός*: *cæmentum*, a word from the same root (**הַמָּוֶר**, "boil") as **הַמָּוֶר**, "slime" or "bitumen," used in the same passage, Gen. xi. 3. **הַמָּוֶר** is also rendered "clay," evidently plastic *lay*, Is. xlix. 16, and elsewhere. 2. **עָפָר**: *χούς*:

ius (*Præp. Ev.* ix. 8, 26, 27), and of Hecateus in Diod. Sic. xl., Strabo xvi. 2.

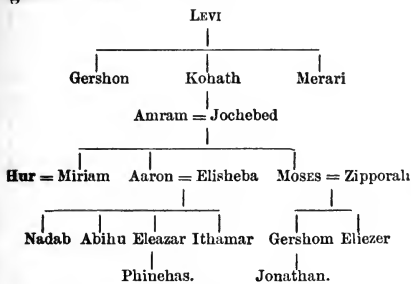

V. The Mussulman traditions in the Koran (ii., vii., x., xviii., xx., xxviii., xl.), and the Arabian legends, as given in Weil's *Biblical Legends*, D'Herbelot ("Mousa"), and Lane's *Selections*, p. 182.

VI. Apocryphal Books of Moses (Fabricius, *Cod. Pseud. V. T.* i. 825): (1.) Prayers of Moses. (2.) Apocalypse of Moses. (3.) Ascension of Moses. (These are only known by fragments.)

VII. In modern times his career and legislation has been treated by Warburton, Michaelis, Ewald, and Bunsen.

His life, in the later period of the Jewish history, was divided into three equal portions of forty years each (Acts vii. 23, 30, 36). This agrees with the natural arrangement of his history into the three parts of his Egyptian education, his exile in Arabia, and his government of the Israelite nation in the Wilderness and on the confines of Palestine.

I. His birth and education. The immediate pedigree of Moses is as follows:—

In the Koran, by a strange confusion, the family of Moses is confounded with the Holy Family of Nazareth, chiefly through the identification of Mary and Miriam, and the 3d chapter, which describes the evangelical history, bears the name of the "Family of Amram." Although little is known of the family except through its connection with this its most illustrious member, yet it was not without influence on his after-life.

The fact that he was of the tribe of Levi no doubt contributed to the selection of that tribe as the sacred caste. The tie that bound them to Moses was one of kinship, and they thus naturally rallied round the religion which he had been the means of establishing (Ex. xxxii. 28) with an ardor which could not have been found elsewhere. His own eager devotion is also a quality, for good or evil, characteristic of the whole tribe.

The Levitical parentage and the Egyptian origin both appear in the family names. *Gershom*, *Eleazar*, are both repeated in the younger generations. *Moses* (vide *infra*) and *Phinehas* (see Brugsch, *Hist. de l'Égypte*, i. 173) are Egyptian. The name of his mother, Jochebed, implies the knowledge of the name of *ΓΕΘΟΥΑΗ* in the bosom of the family. It is its first distinct appearance in the sacred history.

<sup>a</sup> She was, according to Artapanus, Eus. *Præp. Ev.* ix. 27) the daughter of Palmanothes, who was reigning at Heliopolis, and the wife of Chenephres, who was reigning at Memphis. In this tradition, and that of Philo (V. M. i. 4), she has no child, and hence her delight at finding one.

Miriam, who must have been considerably older than himself, and Aaron, who was three years older (Ex. vii. 7), afterwards occupy that independence of position which their superior age would naturally give them.

Moses was born, according to Manetho (Jos. c. Ap. i. 26, ii. 2), at Heliopolis, at the time of the deepest depression of his nation in the Egyptian servitude. Hence the Jewish proverb, "When the tale of bricks is doubled then comes Moses." His birth (according to Josephus, *Ant.* ii. 9, § 2, 3, 4) had been foretold to Pharaoh by the Egyptian magicians, and to his father Amram by a dream—as respectively the future destroyer and deliverer. The pangs of his mother's labor were alleviated so as to enable her to evade the Egyptian midwives. The story of his birth is thoroughly Egyptian in its scene. The beauty of the new-born babe—in the later versions of the story amplified into a beauty and size (Jos. *ib.* § 1, 5) almost divine (*ἀστέριος τῷ θεῷ*, Acts vii. 20; the word *ἀστέριος* is taken from the LXX. version of Ex. ii. 2, and is used again in Heb. xi. 23, and is applied to none but Moses in the N. T.)—induced the mother to make extraordinary efforts for its preservation from the general destruction of the male children of Israel. For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus—perhaps from a current Egyptian belief that the plant is a protection from crocodiles (Plut. *Is. & Os.* 358)—closed against the water by bitumen. This was placed among the aquatic vegetation by the side of one of the canals of the Nile. [NILE.] The mother departed as if unable to bear the sight. The sister lingered to watch her brother's fate. The basket (Jos. *ib.* § 4) floated down the stream.

The Egyptian princess (to whom the Jewish traditions gave the name of *Thermuthis*, Jos. *Ant.* ii. 9, § 5; Artapanus, *Præp. Ev.* ix. 27, the name of *Merrhis*, and the Arabic traditions that of *Asiâ*, Jalaladdin, 387) came down, after the Homeric simplicity of the age, to bathe in the sacred river,<sup>a</sup> or (Jos. *Ant.* ii. 9, § 5) to play by its side. Her attendant slaves followed her. She saw the basket in the flags, or (Jos. *ib.*) borne down the stream, and dispatched divers after it. The divers, or one of the female slaves, brought it. It was opened, and the cry of the child moved the princess to compassion. She determined to rear it as her own. The child (Jos. *ib.*) refused the milk of Egyptian nurses. The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was long cherished in the name given to the foundling of the water's side—whether according to its Hebrew or Egyptian form. Its Hebrew form is מֹשֶׁה, *Moshch*, from מָשַׁח, *Mashâh*, "to draw out"—"because I have drawn him out of the water." But this (as in many other instances, *Babel*, etc.) is probably the Hebrew form given to a foreign word. In Coptic, *mo* = water, and *ushé* = saved. This is the explanation<sup>b</sup> given by Ja

<sup>b</sup> Brugsch, however (*L'Histoire d'Égypte*, pp. 151, 173), renders the name *Mos* or *Messon* = child, borne by one of the princes of Ethiopia under Rameses II. In the Arabic traditions the name is derived from his discovery in the water and among the trees; "for in the Egyptian language *mo* is the name of water, and *se* is that of a tree" (Jalaladdin, 387)

nephus (*Ant.* ii. 9, § 6; *c. Apion.* i. 31<sup>a</sup>), and confirmed by the Greek form of the word adopted in the LXX., and thence in the Vulgate, Μωϋσῆς, *Moses*, and by Artapanus Μώϊσος (*Eus. Præp. Ev.* ix. 27). His former Hebrew name is said to have been Joachim (*Clem. Alex. Strom.* i. p. 343). The child was adopted by the princess. Tradition describes its beauty as so great that passers-by stood fixed to look at it, and laborers left their work to steal a glance (*Jos. Ant.* ii. 9, § 6).

From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, but in the N. T. he is represented as "educated (ἐπαιδεύθη) in all the wisdom of the Egyptians," and as "mighty in words and deeds" (*Acts* vii. 22). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (comp. Strabo, xvii. 1), and grew up there as a priest, under his Egyptian name of Osarsiph (Manetho, apud *Jos. c. Ap.* i. 26, 28, 31) or Tisitben (Chærenon, apud *ib.* 32). "Osarsiph" is derived by Manetho from Osiris, *i. e.* (Osiri-tsif?) "saved by Osiris" (Osburn, *Monumental Egypt*). He was taught the whole range of Greek, Chaldee, and Assyrian literature. From the Egyptians, especially, he learned mathematics, to train his mind for the unprejudiced reception of truth (*Philo, V. M.* i. 5). "He invented boats and engines for building — instruments of war and of hydraulics — hieroglyphics — division of lands" (Artapanus, ap. *Eus. Præp. Ev.* ix. 27). He taught Orpheus, and was hence called by the Greeks Μουσῆος (*ib.*), and by the Egyptians Hermes (*ib.*). He taught grammar to the Jews, whence it spread to Phœnicia and Greece (Eupolemus, ap. *Clem. Alex. Strom.* i. p. 343). He was sent on an expedition against the Ethiopians. He got rid of the serpents of the country to be traversed by turning baskets full of ibises upon them (*Jos. Ant.* ii. 10, § 2), and founded the city of Hermopolis to commemorate his victory (Artapanus, ap. *Eus.* ix. 27). He advanced to Saba, the capital of Ethiopia, and gave it the name of Meroë, from his adopted mother Merrhis, whom he buried there (*ib.*). Tharbis, the daughter of the king of Ethiopia, fell in love with him, and he returned in triumph to Egypt with her as his wife (*Jos. ibid.*).

II. The nurture of his mother is probably spoken of as the link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a distincter form than the account in the Pentateuch. "Moses, when he was come to years, refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God than to enjoy the pleasures of sin for a season; esteeming the reproach of Christ greater riches than the treasures" — the ancient accumulated treasure of Rhampsinitus and the old kings — "of Egypt" (*Heb.* xi. 24-26). In his earliest infancy he was reported to have refused the milk of Egyptian nurses (*Jos. Ant.* ii. 9, § 5), and when three years old to have trampled under his feet the crown which Pharaoh had playfully placed on his head (*ib.* 7). According to the Alexandrian representation of Philo (*V. M.* 6), he led an ascetic life, in order to pursue his

high philosophic speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers, according to the custom of his fathers, outside the walls of the city, in the open air, turning towards the sun-rising (*Jos. c. Apion.* ii. 2). The king was excited to hatred by the priests of Egypt, who foresaw their destroyer (*ib.*), or by his own envy (Artapanus, ap. *Eus. Præp. Ev.* ix. 27). Various plots of assassination were contrived against him, which failed. The last was after he had already escaped across the Nile from Memphis, warned by his brother Aaron, and when pursued by the assassin he killed him (*ib.*). The same general account of conspiracies against his life appears in Josephus (*Ant.* ii. 10). All that remains of these traditions in the sacred narrative is the simple and natural incident, that seeing an Israelite suffering the bastinado from an Egyptian, and thinking that they were alone, he slew the Egyptian (the later tradition, preserved by Clement of Alexandria, said, "with a word of his mouth"), and buried the corpse in the sand (the sand of the desert then, as now, running close up to the cultivated tract). The fire of patriotism which thus turned him into a deliverer from the oppressors, turns him in the same story into the peacemaker of the oppressed. It is characteristic of the faithfulness of the Jewish records that his flight is there occasioned rather by the malignity of his countrymen than by the enmity of the Egyptians. And in St. Stephen's speech it is this part of the story which is drawn out at greater length than in the original, evidently with the view of showing the identity of the narrow spirit which had thus displayed itself equally against their first and their last Deliverer (*Acts* vii. 25-35).

He fled into Midian. Beyond the fact that it was in or near the Peninsula of Sinai, its precise situation is unknown. Arabian tradition points to the country east of the Gulf of Akaba (see Laborde). Josephus (*Ant.* ii. 11, § 1) makes it "by the Red Sea." There was a famous well ("the well," *Ex.* ii. 15) surrounded by tanks for the watering of the flocks of the Bedouin herdsmen. By this well the fugitive seated himself "at noon" (*Jos. ibid.*), and watched the gathering of the sheep. There were the Arabian shepherds, and there were also seven maidens, whom the shepherds rudely drove away from the water. The chivalrous spirit (if we may so apply a modern phrase) which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the distressed maidens. They returned unusually soon to their father, and told him of their adventure. Their father was a person of whom we know little, but of whom that little shows how great an influence he exercised over the future career of Moses. It was JETHRO, or RUEEL, or HOSAB, chief of priest ("Sheikh" exactly expresses the union of the religious and political influence) of the Midianite tribes.

Moses, who up to this time had been "an Egyptian" (*Ex.* ii. 19), now became for an unknown period, extended by the later tradition over forty years (*Acts* vii. 30), an Arabian. He married Zipporah, daughter of his host, to whom he also became the slave and shepherd (*Ex.* ii. 21, iii. 1).

The blank which during the stay in Egypt is filled up by Egyptian traditions, can here only be

<sup>a</sup> Philo (*V. M.* i. 4), *mōs* = water; *Clem. Alex. Strom.* i. p. 343, *mōu* = water. Clement (*ib.*) derives *Moses* from "drawing breath." In an ancient Egypt-

ian treatise on agriculture cited by Chwolson (*Ueberreste*, etc., 12 note) his name is given as *Mōnia*.

supplied from indirect allusions in other parts of the O. T. The alliance between Israel and the Kenite branch of the Midianites, now first formed, was never broken. [KENTITES.] Jethro became their guide through the desert. If from Egypt, as we have seen, was derived the secular and religious learning of Moses, and with this much of their outward ceremonial, so from Jethro was derived the organization of their judicial and social arrangements during their nomadic state (Ex. xviii. 21-23). Nor is the conjecture of Ewald (*Gesch.* ii. 59, 60) improbable, that in this pastoral and simple relation there is an indication of a wider concert than is directly stated between the rising of the Israelites in Egypt and the Arabian tribes, who, under the name of "the Shepherds," had been recently expelled. According to Artapanus (Eus. *Præp. Ev.* ix. 27) Reuel actually urged Moses to make war upon Egypt. Something of a joint action is implied in the visit of Aaron to the desert (Ex. iv. 27; comp. Artapanus, *ut supra*); something also in the sacredness of Sinai, already recognized both by Israel and by the Arabs (Ex. viii. 27; *Jos. Ant.* ii. 12, § 1).

But the chief effect of this stay in Arabia is on Moses himself. It was in the seclusion and simplicity of his shepherd-life that he received his call as a prophet. The traditional scene of this great event is the valley of Shoayb, or Hobab, on the N. side of Jebel Mûsa. Its exact spot is marked by the convent of St. Catherine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. It was at "the back" of "the wilderness" at Horeb (Ex. iii. 1): to which the Hebrew adds, whilst the LXX. omits, "the mountain of God." Josephus further particularizes that it was the loftiest of all the mountains in that region, and best for pasturage, from its good grass; and that, owing to a belief that it was inhabited by the Divinity, the shepherds feared to approach it (*Ant.* ii. 12, § 1). Philo (*V. M.* i. 12) adds "a grove" or "glade."

Upon the mountain was a well-known acacia [ΣΗΤΙΣΤΙΜ] (the definite article may indicate either "the particular celebrated tree," sacred perhaps already, or "the tree" or "vegetation peculiar to the spot"), the thorn-tree of the desert, spreading out its tangled branches, thick set with white thorns, over the rocky ground. It was this tree which became the symbol of the Divine Presence: a flame of fire in the midst of it, in which the dry branches would naturally have crackled and burnt in a moment, but which played round it without consuming it. In Philo (*V. M.* i. 12) "the angel" is described as a strange, but beautiful creature. Artapanus (Eus. *Præp. Ev.* ix. 27) represents it as a fire suddenly bursting from the bare ground, and feeding itself without fuel. But this is far less expressive than the Biblical image. Like all the visions of the Divine Presence recorded in the O. T., as manifested at the outset of a prophetic career, this was exactly suited to the circumstances of the tribe. It was the true likeness of the condition of Israel, in the furnace of affliction, yet not destroyed (comp. Philo, *V. M.* i. 12). The place,

too, in the desert solitude, was equally appropriate, as a sign that the Divine protection was not confined either to the sanctuaries of Egypt, or to the Holy Land, but was to be found with any faithful worshipper, fugitive and solitary though he might be. The rocky ground at once became "holy," and the shepherd's sandal was to be taken off no less than on the threshold of a palace or a temple. It is this feature of the incident on which St. Stephen dwells, as a proof of the universality of the true religion (Acts vii. 29-33).

The call or revelation was twofold —

1. The declaration of the Sacred Name expresses the eternal self-existence of the One God. The name itself, as already mentioned, must have been known in the family of Aaron. But its grand significance was now first drawn out. [JΕΙΘΟ-ΥΑΙΤ.]

2. The mission was given to Moses to deliver his people. The two signs are characteristic — the one of his past Egyptian life — the other of his active shepherd life. In the rush of leprosy into his hand<sup>a</sup> is the link between him and the people whom the Egyptians called a nation of lepers. In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career which lay before it. The humble yet wonder-working crook is, in the history of Moses, as Ewald finely observes, what the despised Cross is in the first history of Christianity.

In this call of Moses, as of the Apostles afterwards, the man is swallowed up in the cause. Yet this is the passage in his history which, more than any other, brings out his outward and domestic relations.

He returns to Egypt from his exile. His Arabian wife and her two infant sons are with him. She is seated with them on the ass — (the ass was known as the animal peculiar to the Jewish people from Jacob down to David). He apparently walks by their side with his shepherd's staff. (The LXX. substitute the general term τὰ ὄροζύγια.)

On the journey back to Egypt a mysterious incident occurred in the family, which can only be explained with difficulty. The most probable explanation seems to be, that at the caravanserai either Moses or Gershom (the context of the preceding verses, iv. 22, 23, rather points to the latter) was struck with what seemed to be a mortal illness. In some way, not apparent to us, this illness was connected by Zipporah with the fact that her son had not been circumcised — whether in the general neglect of that rite amongst the Israelites in Egypt, or in consequence of his birth in Midian. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, exclaiming in the agony of a mother's anxiety for the life of her child — "A bloody husband thou art, to cause the death of my son." Then, when the recovery from the illness took place (whether of Moses or Gershom), she exclaims again, "A bloody husband still thou art, but not so as to cause the child's death, but only to bring about his circumcision."<sup>b</sup>

<sup>a</sup> The Mussulman legends speak of his white shining hand as the instrument of his miracles (D'Herbette). Hence "the white hand" is proverbial for the healing art.

<sup>b</sup> So Ewald (*Geschichte*, vol. ii. pt. 2, p. 105) taking

the sickness to have visited Moses. Rosenmüller makes Gershom the victim, and makes Zipporah address Jehovah, the Arabic word for "marriage" being a synonym for "circumcision." It is possible that on this story is founded the tradition of Artapanus (Eus.

It would seem to have been in consequence of this event, whatever it was, that the wife and her children were sent back to Jethro, and remained with him till Moses joined them at Rephidim (Ex. xviii. 2-6), which is the last time that she is distinctly mentioned. In Num. xii. 1 we hear of a Cushite wife who gave umbrage to Miriam and Aaron. This may be — (1) an Ethiopian (Cushite) wife, taken after Zipporah's death (Ewald, *Gesch.* ii. 229). (2.) The Ethiopian princess of Josephus (*Ant.* i. 10, § 2): (but that whole story is probably only an inference from Num. xii. 1). (3.) Zipporah herself, which is rendered probable by the juxtaposition of Cushan with Midian in Hab. iii. 7.

The two sons also sink into obscurity. Their names, though of Levitical origin, relate to their foreign birthplace. Gershom, "stranger," and Eli-ezer, "God is my help," commemorated their father's exile and escape (Ex. xviii. 3, 4). Gershom was the father of the wandering Levite Jonathan (*Judg.* xviii. 30), and the ancestor of Shebuel, David's chief treasurer (1 Chr. xxiii. 16, xxiv. 20). Eliezer had an only son, Rehabiah (1 Chr. xxiii. 17), who was the ancestor of a numerous but obscure progeny, whose representative in David's time — the last descendant of Moses known to us — was Shelomith, guard of the consecrated treasures in the Temple (1 Chr. xxvi. 25-28).

After this parting he advanced into the desert, and at the same spot where he had had his vision encountered Aaron (Ex. iv. 27). From that meeting and coöperation we have the first distinct indication of his personal appearance and character. The traditional representations of him in some respects well agree with that which we derive from Michael Angelo's famous statue in the church of *S. Pietro in Vinculi* at Rome. Long shaggy hair and beard is described as his characteristic equally by Josephus, Diodorus (i. p. 424), and Artapanus (*κομήτης*, apud Eus. *Præp. Ev.* ix. 27). To this Artapanus adds the curious touch that it was of a reddish hue, tinged with gray (*πυρρόκερης, πολίος*). The traditions of his beauty and size as a child have been already mentioned. They are continued to his manhood in the Gentile descriptions. "Tall and dignified," says Artapanus (*μάκρος, ἀξίωματικός*) — "Wise and beautiful as his father Joseph" (with a curious confusion of genealogies), says Justin (xxxvi. 2).

But beyond the slight glance at his infantine beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only point there brought out is a singular and unlooked for infirmity. "O my Lord, I am not eloquent, neither heretofore nor since Thou hast spoken to Thy servant; but I am slow of speech and of a slow tongue. . . . How shall Pharaoh hear me, which am of uncircumcised lips?" (*i. e.* slow, without words, stammering, hesitating: *ἰσχυρόφωνος καὶ βαρύνγλωσσος*, l.XX.), his "speech contemptible," like St. Paul's — like the English Cromwell (comp. Carlyle's *Cromwell*, ii. 219) — like the first efforts of the Greek Demosthenes. In the solution of this difficulty which Moses offers, we read both the disinterestedness, which is the most distinct trait of his personal character, and the future relation of the two brothers. "Send, I pray Thee, by the hand of him whom Thou wilt send" (*i. e.* "make any one Thy apostle rather than me").

*Præp. Ev.* ix. 27), that the Ethiopians derived circumcision from Moses

In outward appearance this prayer was granted. Aaron spoke and acted for Moses, and was the permanent inheritor of the sacred staff of power. But Moses was the inspiring soul behind; and so as time rolls on, Aaron, the prince and priest, has almost disappeared from view, and Moses, the dumb, backward, disinterested prophet, is in appearance, what he was in truth, the foremost leader of the chosen people.

III. The history of Moses henceforth is the history of Israel for forty years. But as the incidents of this history are related in other articles, under the heads of EGYPT, EXODUS, PLAGUES, SYNAI, LAW, PASSOVER, WANDERINGS, WILDERNESS, it will be best to confine ourselves here to such indications of his personal character as transpire through the general framework of the narrative.

It is important to trace his relation to his immediate circle of followers. In the Exodus, he takes the decisive lead on the night of the flight. Up to that point he and Aaron appear almost on an equality. But after that, Moses is usually mentioned alone. Aaron still held the second place, but the character of interpreter to Moses which he had borne in speaking to Pharaoh withdraws, and it would seem as if Moses henceforth became altogether, what hitherto he had only been in part, the prophet of the people. Another who occupies a place nearly equal to Aaron, though we know but little of him, is HUR, of the tribe of Judah, husband of Miriam, and grandfather of the artist Bezaleel (*Joseph. Ant.* iii. 2, § 4). He and Aaron are the chief supporters of Moses in moments of weariness or excitement. His adviser in regard to the route through the wilderness as well as in the judicial arrangements, was, as we have seen, JETHRO. His servant, occupying the same relation to him as Elisha to Elijah, or Gehazi to Elisha, was the youthful Hoshea (afterwards JOSHUA). MIRIAM always held the independent position to which her age entitled her. Her part was to supply the voice and song to her brother's prophetic power.

But Moses is incontestably the chief personage of the history, in a sense in which no one else is described before or since. In the narrative, the phrase is constantly recurring, "The Lord spake unto Moses," "Moses spake unto the children of Israel." In the traditions of the desert, whether late or early, his name predominates over that of every one else, "The Wells of Moses" — on the shores of the Red Sea. "The Mountain of Moses" (Jebel Mûsa) — near the convent of St. Catherine. The Ravine of Moses (Shuk Mûsa) — at Mount St. Catherine. The Valley of Moses (Wady Mûsa) — at Petra. "The Books of Moses" are so called (as afterwards the Books of Samuel), in all probability from his being the chief subject of them. The very word "Mosaic" has been in later times applied (as the proper name of no other saint of the O. T.) to the whole religion. Even as applied to tessellated pavement ("Mosaic," *Musivum, μουσειον, μουσαϊκόν*), there is some probability that the expression is derived from the variegated pavement of the later Temple, which had then become the representative of the religion of Moses (see an Essay of Redslob, *Zeitschrift der Deutsch. Morgenl. Gesells.* xiv. 663).

It has sometimes been attempted to reduce this great character into a mere passive instrument of the Divine Will, as though he had himself borne no conscious part in the actions in which he figured or the messages which he delivers. This, however

is as incompatible with the general tenor of the Scriptural account, as it is with the common language in which he has been described by the Church in all ages. The frequent addresses of the Divinity to him no more contravene his personal activity and intelligence, than in the case of Elijah, Isaiah, or St. Paul. In the N. T. the Mosaic legislation is expressly ascribed to him: "Moses gave you circumcision" (John vii. 22). "Moses, because of the hardness of your hearts, suffered you" (Matt. xix. 8). "Did not Moses give you the law?" (John vii. 19). "Moses accuseth you" (John v. 45). St. Paul goes so far as to speak of him as the founder of the Jewish religion: "They were all baptized unto Moses" (1 Cor. x. 2). He is constantly called "a Prophet." In the poetical language of the O. T. (Num. xxi. 18; Deut. xxxiii. 21), and in the popular language both of Jews and Christians, he is known as "the Lawgiver." The terms in which his legislation is described by Philo (V. M. ii. 1-4) is decisive as to the ancient Jewish view. He must be considered, like all the saints and heroes of the Bible, as a man of marvelous gifts, raised up by Divine Providence for a special purpose; but as led, both by his own disposition and by the peculiarity of the Revelation which he received, into a closer communication with the invisible world than was vouchsafed to any other in the Old Testament.

There are two main characters in which he appears, as a Leader and a Prophet. The two are more frequently combined in the East than in the West. Several remarkable instances occur in the history of Mohammedanism: Mohammed himself, Abd-el-Kader in Algeria, Schamyl in Circassia.

(a.) As a Leader, his life divides itself into the three epochs — of the march to Sinai; the march from Sinai to Kadesh; and the conquest of the trans-Jordanic kingdoms. Of his natural gifts in this capacity, we have but few means of judging. The two main difficulties which he encountered were the reluctance of the people to submit to his guidance, and the impracticable nature of the country which they had to traverse. The patience with which he bore their murmurs is often described — at the Red Sea, at the apostasy of the golden calf, at the rebellion of Korah, at the complaints of Aaron and Miriam. The incidents with which his name was specially connected, both in the sacred narrative and in the Jewish, Arabian, and heathen traditions, were those of supplying water, when most wanted. This is the only point in his life noted by Tacitus, who describes him as guided to a spring of water by a herd of wild asses (*Hist.* v. 3). In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. That at Marah is produced by the sweetening of waters through a tree in the desert, those at Horeb and at Kadesh by the opening of a rift in the "rock" and in the "cliff;" that in Moab, by the united efforts, under his direction, of the chiefs and of the people (Num. xxi. 18).<sup>a</sup> (See Philo, V. M. i. 40.) Of the three first of these incidents, traditional sites, bearing his name, are shown in the desert at the present day, though most of them are rejected by modern travellers. One is *Ayân Mûsa*, "the

wells of Moses," immediately south of Suez, which the tradition (probably from a confusion with Marah) ascribes to the rod of Moses. Of the water at Horeb, two memorials are shown. One is the *Shuk Mûsa*, or "cleft of Moses," in the side of Mount St Catherine, and the other is the remarkable stone, first mentioned expressly in the Koran (ii. 57), which exhibits the 12 marks or mouths out of which the water is supposed to have issued for the 12 tribes.<sup>b</sup> The fourth is the celebrated "Sik," or ravine, by which Petra is approached from the east, and which, from the story of its being torn open by the rod of Moses, has given his name (the *Wady Mûsa*) to the whole valley. The quails and the manna are less directly ascribed to the intercession of Moses. The brazen serpent that was lifted up as a sign of the Divine protection against the snakes of the desert (Num. xxi. 8, 9) was directly connected with his name, down to the latest times of the nation (2 K. xviii. 4; John. iii. 14). Of all the relics of his time, with the exception of the Ark, it was the one longest preserved. [NEHUSHTAN.]

The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment is fixed by the cloudy pillar. But the direction of the people first to the Red Sea, and then to Mount Sinai (where he had been before), is communicated through Moses, or given by him. According to the tradition of Memphis, the passage of the Red Sea was effected through Moses's knowledge of the movement of the tide (*Eus. Præp. Ev.* ix. 27). And in all the wanderings from Mount Sinai he is said to have had the assistance of Jethro. In the Mussulman legends, as if to avoid this appearance of human aid, the place of Jethro is taken by El Kuhdr, the mysterious benefactor of mankind (D'Herbelot, *Mousses*). On approaching Palestine the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Hormah. To his guidance is ascribed the circuitous route by which the nation approached Palestine from the east, and to his generalship the two successful campaigns in which SHOX and OG were defeated. The narrative is told so shortly, that we are in danger of forgetting that at this last stage of his life Moses must have been as much a conqueror and victorious soldier as Joshua.

(b.) His character as a Prophet is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a prophet in the O. T. The name is indeed applied to Abraham before (Gen. xx. 7), but so casually as not to enforce our attention. But, in the case of Moses, it is given with peculiar emphasis. In a certain sense, he appears as the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. Aaron's fluent speech enabled him to act the part of Prophet for Moses in the first instance, and Miriam is expressly called "the Prophetess." The seventy elders, and Eldad and Medad also, all "prophesied" (Num. xi. 25-27).

but Moses (at least after the Exodus) rose high

<sup>a</sup> An illustration of these passages is to be found in one of the representations of Rameses II. (contemporary with Moses), in like manner calling out water

from the desert-rocks (see Brugsch, *Hist. de l'Eg.* vol. i. p. 153).

<sup>b</sup> See S. § P., 46, 47, also Wolff's *Travels*. 2d ed. p. 125

above all these. The others are spoken of as more or less inferior. Their communications were made to them in dreams and figures (Deut. xiii. 1-4; Num. xii. 6). But "Moses was not so." With him the Divine revelations were made "mouth to mouth, even apparently, and not in dark speeches, and the similitude of JEHOVAH shall he behold" (Num. xii. 8). In the Mussulman legends his surname is "Kelim Allah," "the spoken to by God." Of the especial modes of this more direct communication, four great examples are given, corresponding to four critical epochs in his historical career, which help us in some degree to understand what is meant by these expressions in the sacred text. (1.) The appearance of the Divine Presence in the flaming acacia-tree has been already noticed. The usual pictorial representations of that scene — of a winged human form in the midst of the bush, belongs to Philo (V. M. i. 12), not to the Bible. No form is described. The "Angel," or "Messenger," is spoken of as being "in the flame." On this it was that Moses was afraid to look, and hid his face, in order to hear the Divine voice (Ex. iii. 2-6). (2.) In the giving the Law from Mount Sinai, the outward form of the revelation was a thick darkness as of a thunder-cloud, out of which proceeded a voice (Ex. xix. 19, xx. 21). The revelation on this occasion was especially of the Name of JEHOVAH. Outside this cloud Moses himself remained on the mountain (Ex. xxiv. 1, 2, 15), and received the voice, as from the cloud, which revealed the Ten Commandments, and a short code of laws in addition (Ex. xx.-xxiii.). On two occasions he is described as having penetrated within the darkness, and remained there, successively, for two periods of forty days, of which the second was spent in absolute seclusion and fasting (Ex. xxiv. 18, xxiv. 28). On the first occasion he received instructions respecting the tabernacle, from a "pattern showed to him" (xxv. 9, 40; xxvi., xxvii.), and respecting the priesthood (xxviii.-xxxi.). Of the second occasion hardly anything is told us. But each of these periods was concluded by the production of the two slabs or tables of granite, containing the successive editions of the Ten Commandments (Ex. xxxii. 15, 16). On the first of the two occasions the ten moral commandments are those commonly so called (comp. Ex. xx. 1-17, xxxii. 15; Deut. v. 6-22). On the second occasion (if we take the literal sense of Ex. xxxiv. 27, 28), they are the ten (chiefly) ceremonial commandments of Ex. xxxiv. 14-26. The first are said to have been the writing of God (Ex. xxxi. 18, xxxii. 16; Deut. v. 22); the second, the writing of Moses (Ex. xxxiv. 28). (3.) It was nearly at the close of those communications in the mountains of Sinai that an especial revelation was made to him personally, answering in some degree to that which first called him to his mission. In the despondency produced by the apostasy of the molten calf, he besought JEHOVAH to show him "His glory." The wish was thoroughly Egyptian. The same is recorded of Amenoph, the Pharaoh preceding the Exodus. But the Divine answer is thoroughly Biblical. It announced that an actual vision of God was impossible. "Thou canst not see my face; for there shall no man see my face and live." He was commanded to hew two blocks of stone, like those which he had destroyed. He was to come absolutely alone. Even the flocks and herds which fed in the neigh-

<sup>a</sup> It is this moment which is seized in the recent sculpture by Mr. Woolner in Llandaf Cathedral.

boring valleys were to be removed out of the sight of the mountain (Ex. xxxiii. 18, 20; xxxiv. 1, 3). He took his place on a well-known or prominent rock ("the rock," xxxiii. 21). The cloud passed by (xxxiv. 5, xxxiii. 22). A voice proclaimed the two immutable attributes of God, Justice and Love — in words which became part of the religious creed of Israel and of the world (xxxiv. 6, 7). The importance of this incident in the life of Moses is attested not merely by the place which it holds in the sacred record, but by the deep hold that it has taken of the Mussulman traditions, and the local legends of Mount Sinai. It is told, with some characteristic variations, in the Koran (vii. 139), and is commemorated in the Mussulman chapel erected on the summit of the mountain which from this incident (rather than from any other) has taken the name of the Mountain of Moses (*Jebel Musa*). A cavity is shown in the rock, as produced by the pressure of the back of Moses, when he shrank from the Divine glory<sup>a</sup> (S. § P. p. 30).

(4.) The fourth mode of Divine manifestation was that which is described as commencing at this juncture, and which continued with more or less continuity through the rest of his career. Immediately after the catastrophe of the worship of the calf, and apparently in consequence of it, Moses removed the chief tent<sup>b</sup> outside the camp, and invested it with a sacred character under the name of "the Tent or Tabernacle of the Congregation" (xxxiii. 7). This tent became henceforth the chief scene of his communications with God. He left the camp, and it is described how, as in the expectation of some great event, all the people rose up and stood every man at his tent door, and looked — gazing after Moses until he disappeared within the tent. As he disappeared the entrance was closed behind him by the cloudy pillar, at the sight of which the people prostrated themselves (xxxiii. 10). The communications within the tent were described as being still more intimate than those on the mountain. "JEHOVAH spake unto Moses face to face, as a man speaketh unto his friend" (xxxiii. 11). He was apparently accompanied on these mysterious visits by his attendant Hoshea (or Joshua), who remained in the tent after his master had left it (xxxiii. 11). All the revelations contained in the books of Leviticus and Numbers seem to have been made in this manner (Lev. i. 1; Num. i. 1).

It was during these communications that a peculiarity is mentioned which apparently had not been seen before. It was on his final descent from Mount Sinai, after his second long seclusion, that a splendor shone on his face, as if from the glory of the Divine Presence. It is from the Vulgate translation of "ray" (קָרָן), "*cornutam habens faciem*," that the conventional representation of the horns of Moses has arisen. The rest of the story is told so differently in the different versions that both must be given. (1.) In the A. V. and most Protestant versions, Moses is said to wear a veil in order to hide the splendor. In order to produce this sense, the A. V. of Ex. xxxiv. 33 reads, "and [till] Moses had done speaking with them" — and [other versions, "he had put on the veil." (2.) In the LXX and the Vulgate, on the other hand, he is said to put on the veil, not during, but after the conver-

<sup>b</sup> According to the LXX. It was his own tent.  
<sup>c</sup> Ewald, *Alterthümer*, p. 329.

ation with the people — in order to hide, not the splendor, but the vanishing away of the splendor; and to have worn it till the moment <sup>a</sup> of his return to the Divine Presence in order to rekindle the light there. With this reading agrees the obvious meaning of the Hebrew words, and it is this rendering of the sense which is followed by St. Paul in 2 Cor. iii. 13, 14, where he contrasts the fearlessness of the Apostolic teaching with the concealment of that of the O. T. "We have no fear, as Moses had, that our glory will pass away."

There is another form of the prophetic gift, in which Moses more nearly resembles the later prophets. We need not here determine (what is best considered under the several books which bear his name, PENTATEUCH, etc.) the extent of his authorship, or the period at which these books were put together in their present form. Eupolemus (*Eus. Prep. Et. ix. 26*) makes him the author of letters. But of this the Hebrew narrative gives no indication. There are two portions of the Pentateuch, and two only, of which the actual *writing* is ascribed to Moses: (1.) The second Edition of the Ten Commandments (*Ex. xxxiv. 28*). (2.) The register of the Stations in the Wilderness (*Num. xxxiii. 1*). But it is clear that the prophetic office, as represented in the history of Moses, included the poetical form of composition which characterizes the Jewish prophecy generally. These poetical utterances, whether connected with Moses by ascription or by actual authorship, enter so largely into the full Biblical conception of his character, that they must be here mentioned.

1. "The song which Moses and the children of Israel sung" (after the passage of the Red Sea, *Ex. xv. 1-19*). It is, unquestionably, the earliest written account of that event; and, although it may have been in part, according to the conjectures of Ewald and Bunsen, adapted to the sanctuary of Gerizim or Shiloh, yet its framework and ideas are essentially Mosaic. It is probably this song to which allusion is made in *Rev. xv. 2, 3*: "They stand on the sea of glass mingled with fire . . . and sing the song of Moses the servant of God."

2. A fragment of a war-song against Amalek —  
 "As the hand is on the throne of Jehovah,  
 So will Jehovah war with Amalek  
 From generation to generation."

(*Ex. xvii. 16*).

3. A fragment of a lyrical burst of indignation —  
 "Not the voice of them that shout for mastery,  
 Nor the voice of them that cry for being overcome,  
 But the noise of them that sing do I hear."

(*Ex. xxxii. 18*).

4. Probably, either from him or his immediate prophetic followers, the fragments of war-songs in *Num. xxi. 14, 15, 27-30*, preserved in the "book of the wars of Jehovah," *Num. xxi. 14*; and the address to the well, *xxi. 16, 17, 18*.

5. The song of Moses (*Deut. xxxii. 1-43*), setting forth the greatness and the failings of Israel. It is remarkable as bringing out with much force the idea of God as the Rock (*xxxii. 4, 15, 18, 30, 31, 37*). The special allusions to the pastoral riches

of Israel point to the trans-Jordanic territory as the scene of its composition (*xxxii. 13, 14*).

6. The blessing of Moses on the tribes (*Deut. xxxiii. 1-29*). If there are some allusions in this psalm to circumstances only belonging to a later time (such as the migration of Dan, *xxxiii. 22*), yet there is no one in whose mouth it could be so appropriately placed, as in that of the great leader on the eve of the final conquest of Palestine. This poem, combined with the similar blessing of Jacob (*Gen. xlix.*), embraces a complete collective view of the characteristics of the tribes.

7. The 90th Psalm, "A prayer of Moses, the man of God." The title, like all the titles of the Psalms, is of doubtful authority — and the psalm has often been referred to a later author. But Ewald (*Psalmen*, p. 91) thinks that, even though this be the case, it still breathes the spirit of the venerable Lawgiver. There is something extremely characteristic of Moses, in the view taken, as from the summit or base of Sinai, of the eternity of God, greater even than the eternity of mountains, in contrast with the fleeting generations of man. One expression in the Psalm, as to the limit of human life (70, or at most 80 years) in ver. 10, would, if it be Mosaic, fix its date to the stay at Sinai. Jerome (*Adv. Rufin. i. § 13*), on the authority of Origen, ascribes the next eleven Psalms to Moses. Cosmas (*Cosmog. v. 223*) supposes that it is by a younger Moses of the time of David.

How far the gradual development of these revelations or prophetic utterances had any connection with his own character and history, the materials are not such as to justify any decisive judgment. His Egyptian education must, on the one hand, have supplied him with much of the ritual of the Israelite worship. The coincidences between the arrangements of the priesthood, the dress, the sacrifices, the ark, in the two countries, are decisive. On the other hand, the proclamation of the Unity of God not merely as a doctrine confined to the priestly order, but communicated to the whole nation, implies distinct antagonism, almost a conscious recoil against the Egyptian system. And the absence of the doctrine of a future state (without adopting to its full extent the paradox of Warburton) proves at least a remarkable independence of the Egyptian theology, in which that great doctrine held so prominent a place. Some modern critics have supposed that the Levitical ritual was an after-growth of the Mosaic system, necessitated or suggested by the incapacity of the Israelites to retain the higher and simpler doctrine of the Divine Unity — as proved by their return to the worship of the Heliopolitan calf under the sanction of the brother of Moses himself. There is no direct statement of this connection in the sacred narrative. But there are indirect indications of it, sufficient to give some color to such an explanation. The event itself is described as a crisis in the life of Moses, almost equal to that in which he received his first call. In an agony of rage and disappointment he destroyed the monument of his first revelation (*Ex. xxxii. 19*). He threw up his sacred

<sup>a</sup> In *Ex. xxxiv. 34, 35*, the Vulgate, apparently by blowing a different reading, 𐤀𐤓𐤁𐤏, "with them," 𐤀𐤓𐤁𐤏, "with him," differs both from the LXX. and A. V.

<sup>b</sup> Lord Bacon has given a metrical version of this 90th Psalm, rising in some parts to a tone of grandeur which makes it one of the noblest hymns in our language. See his *Works*, xiv. 125-127 (N. Y. 1804).

mission (*ib.* 32). He craved and he received a new and special revelation of the attributes of God to console him (*ib.* xxxiii. 18). A fresh start was made in his career (*ib.* xxxiv. 29). His relation with his countrymen henceforth became more awful and mysterious (*ib.* 32-35). In point of fact, the greater part of the details of the Levitical system were subsequent to this catastrophe. The institution of the Levitical tribe grew directly out of it (xxxii. 26). And the inferiority of this part of the system to the rest is expressly stated in the Prophets, and expressly connected with the idolatrous tendencies of the nation. "Wherefore I gave them statutes that were not good, and judgments whereby they should not live" (Ez. xx. 25). "I spake not unto your fathers, nor commanded them in the day that I brought them out of the land of Egypt, concerning burnt-offerings or sacrifices" (Jer. vii. 22).

Other portions of the Law, such as the regulations of slavery, of blood-feud, of clean and unclean food, were probably taken, with the necessary modifications, from the customs of the desert tribes.

But the distinguishing features of the law of Israel, which have remained to a considerable extent in Christendom, are peculiarly Mosaic: the Ten Commandments; and the general spirit of justice, humanity, and liberty, that pervades even the more detailed and local observances.

The prophetic office of Moses, however, can only be fully considered in connection with his whole character and appearance. "By a prophet Jehovah brought Israel out of Egypt, and by a prophet was he preserved" (Hos. xii. 13). He was in a sense peculiar to himself the founder and representative of his people. And, in accordance with this complete identification of himself with his nation, is the only strong personal trait which we are able to gather from his history. "The man Moses was very meek, above all the men that were upon the face of the earth" (Num. xii. 3). The word "meek" is hardly an adequate reading of the Hebrew term מֵיָדָוּ, which should be rather "much enduring;" and, in fact, his onslaught on the Egyptian, and his sudden dashing the tables on the ground, indicate rather the reverse of what we should call "meekness." It represents what we should now designate by the word "disinterested." All that is told of him indicates a withdrawal of himself, a preference of the cause of his nation to his own interests, which makes him the most complete example of Jewish patriotism. He joins his countrymen in their degrading servitude (Ex. ii. 11, v. 4). He forgets himself to avenge their wrongs (ii. 14). He desires that his brother may take the lead instead of himself (Ex. iv. 13). He wishes that not he only, but all the nation were gifted alike: "Enviest thou for my sake?" (Num. xi. 29). When the offer is made that the people should be destroyed, and that he should be made "a great nation" (Ex. xxxii. 10), he prays that they may be forgiven — if not, blot me, I pray Thee, out of Thy book which Thou hast written" (xxxii. 32). His sons were not raised to honor. The leadership of the people passed, after his death, to another tribe. In the books which bear his name, Abraham, and not himself, appears as the real father of the nation. In spite of his great preëminence, they are never "the children of Moses."

In exact conformity with his life is the account

of his end. The Book of Deuteronomy describes, and is, the long last farewell of the prophet to his people. It takes place on the first day of the eleventh month of the fortieth year of the wanderings, in the plains of Moab (Deut. i. 3, 5), in the palm-groves of Abila (Joseph. *Ant.* iv. 8, § 1) [ABEL-SHITTIM.] He is described as 120 years of age, but with his sight and his freshness of strength unabated (Deut. xxxiv. 7). The address from ch. i. to ch. xxx. contains the recapitulation of the Law. Joshua is then appointed his successor. The Law is written out, and ordered to be deposited in the Ark (ch. xxxi). The song and the blessing of the tribes conclude the farewell (cc. xxxii., xxxiii.).

And then comes the mysterious close. As if to carry out to the last the idea that the prophet was to live not for himself, but for his people, he is told that he is to see the good land beyond the Jordan, but not to possess it himself. The sin for which this penalty was imposed on the prophet is difficult to ascertain clearly. It was because he and Aaron rebelled against Jehovah, and "believed Him not to sanctify him," in the murmurings at Kadesh (Num. xx. 12, xxvii. 14; Deut. xxxii. 51), or, as it is expressed in the Psalms (cvi. 33), because he spoke unadvisedly with his lips. It seems to have been a feeling of distrust. "Can we (not, as often rendered, can we) bring water out of the cliff?" (Num. xx. 10; LXX. μή ἐξήγομεν, "surely we cannot.") The Talmudic tradition, characteristically, makes the sin to be that he called the chosen people by the opprobrious name of "rebels." He ascends a mountain in the range which rises above the Jordan Valley. Its name is specified so particularly that it must have been well known in ancient times, though, owing to the difficulty of exploring the eastern side of the Jordan, it is unknown at present. The mountain tract was known by the general name of THE PISGAH. Its summits apparently were dedicated to different divinities (Num. xxxii. 14). On one of these, consecrated to Nebo, Moses took his stand, and surveyed the four great masses of Palestine west of the Jordan — so far as it could be discerned from that height. The view has passed into a proverb for all nations. In two remarkable respects it illustrates the office and character of Moses. First, it was a view, in its full extent, to be imagined rather than actually seen. The foreground alone could be clearly discernible; its distance had to be supplied by what was beyond, though suggested by what was within the actual prospect of the seer.

Secondly, it is the likeness of the great discoverer pointing out what he himself will never reach. To English readers this has been made familiar by the application of this passage to Lord Bacon, originally in the noble poem of Cowley, and then drawn out at length by Lord Macaulay.

"So Moses the servant of Jehovah died there in the land of Moab, according to the word of Jehovah, and He buried him in a 'ravine' in the land of Moab, 'before' Beth-peor — but no man knoweth of his sepulchre unto this day . . . And the children of Israel wept for Moses in the plains of Moab thirty days" (Deut. xxxiv. 5-8). This is all that is said in the sacred record. Jewish, Arabian, and Christian traditions have labored to fill up the detail. "Amidst the tears of the people — the women beating their breasts, and the children giving way to uncontrolled wailing — he withdrew. At a certain point in his ascent he made a sign to

the weeping multitude to advance no further, taking with him only the elders, the high-priest Eliezer, and the general Joshua. At the top of the mountain he dismissed the elders — and then, as he was embracing Eliezer and Joshua, and still speaking to them, a cloud suddenly stood over him, and he vanished in a deep valley. He wrote the account of his own death <sup>a</sup> in the sacred books, fearing lest he should be deified" (Joseph. *Ant.* iv. 8, 48). "He died in the last month of the Jewish year."<sup>b</sup> After his death he is called "Melki" (Clem. Alex. *Strom.* i. 343).

His grave, though studiously concealed in the sacred narrative, in a manner which seems to point a warning against the excessive veneration of all sacred tombs, and though never acknowledged by the Jews, is shown by the Mussulmans on the west (and therefore the wrong) side of the Jordan, between the Dead Sea and St. Saba (*S. & P.* p. 302).

The Mussulman traditions are chiefly exaggerations of the O. T. accounts. But there are some stories independent of the Bible. One is the striking story (Koran, xviii. 65-80) on which is founded Parnell's *Hermit*. Another is the proof given by Moses of the existence of God to the atheist king (Chardin, x. 836, and in Fabricius, p. 836).

In the O. T. the name of Moses does not occur so frequently, after the close of the Pentateuch, as might be expected. In the Judges it occurs only once — in speaking of the wandering Levite Jonathan, his grandson. In the Hebrew copies, followed by the A. V., it has been superseded by "Manasseh," in order to avoid throwing discredit on the family of so great a man. [MANASSEH, vol. ii. p. 1776 a.] In the Psalms and the Prophets, however, he is frequently named as the chief of the prophets.

In the N. T. he is referred to partly as the representative of the Law — as in the numerous passages cited above — and in the vision of the Transfiguration, where he appears side by side with Elijah. It is possible that the peculiar word rendered "decease" (ἐξέσθως) — used only in Luke ix. 31 and 2 Pet. i. 15, where it may have been drawn from the context of the Transfiguration — was suggested by the Exodus of Moses.

As the author of the Law he is contrasted with Christ, the Author of the Gospel: "The law was given by Moses" (John i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 13-18), and his mediatorial character ("the law in the hand of a mediator") against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of God is contrasted with Christ's sonship (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and, as this is a point of view which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw out in detail.

1. Moses is, as it would seem, the only character of the O. T. to whom Christ expressly likens Himself, "Moses wrote of me" (John v. 46). It is uncertain to what passage our Lord alludes, but the general opinion seems to be the true one — that

it is the remarkable prediction in Deut. xviii. 15, 18, 19 — "The Lord thy God will raise up unto thee a prophet from the midst of thee, from thy brethren, like unto me: unto him ye shall hearken . . . I will raise them up a prophet from among their brethren, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him. And it shall come to pass, that whosoever will not hearken unto my words which he shall speak in my name, I will require it of him." This passage is also expressly quoted by Stephen (Acts vii. 37, [and by Peter, Acts iii. 22]), and it is probably in allusion to it, that at the Transfiguration, in the presence of Moses and Elijah, the words were uttered, "Hear ye Him."

It suggests three main points of likeness: —

(a.) Christ was, like Moses, the great Prophet of the people — the last, as Moses was the first. In greatness of position, none came between them. Only Samuel and Elijah could by any possibility be thought to fill the place of Moses, and they only in a very secondary degree. Christ alone appears, like Moses, as the Revealer of a new name of God — of a new religious society on earth. The Israelites "were baptized unto Moses" (1 Cor. x. 2). The Christians were baptized unto Christ. There is no other name in the Bible that could be used in like manner.

(b.) Christ, like Moses, is a Lawgiver: "Him shall ye hear." His whole appearance as a Teacher, differing in much beside, has this in common with Moses, unlike the other prophets, that He lays down a code, a law, for his followers. The Sermon on the Mount almost inevitably suggests the parallel of Moses on Mount Sinai.

(c.) Christ, like Moses, was a Prophet out of the midst of the nation — "from their brethren." As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. The last and greatest of the Jewish prophets, He was not only a Jew by descent, but that Jewish descent is insisted upon as an integral part of his appearance. Two of the Gospels open with his genealogy. "Of the Israelites came Christ after the flesh" (Rom. ix. 5). He wept and lamented over his country. He confined himself during his life to their needs. He was not sent "but unto the lost sheep of the house of Israel" (Matt. xv. 24). It is true that his absorption into the Jewish nationality was but the symbol of his absorption into the far wider and deeper interests of all humanity. But it is only by understanding the one that we are able to understand the other; and the life of Moses is the best means of enabling us to understand them both.

2. In Heb. iii. 1-19, xii. 24-29, Acts vii. 27, Christ is described, though more obscurely, as the Moses of the new dispensation — as the Apostle, or Messenger, or Mediator, of God to the people — as the Controller and Leader of the flock or household of God. No other person in the O. T. could have furnished this parallel. In both, the revelation was communicated partly through the life, partly through the teaching; but in both the Prophet was incessantly united with the Guide, the Ruler, the Shepherd.

3. The details of their lives are sometimes though not often, compared. Stephen (Acts vii.

<sup>a</sup> According to the view also of Philo (*V. M.* iii. 66), Moses wrote the account of his death.

<sup>b</sup> In the Arabic traditions the 7th of Adar (*Jah. lad.* n. p. 838).

24-28, 35) dwells, evidently with this view, on the likeness of Moses in striving to act as a peace-maker, and misunderstood and rejected on that very account. The death of Moses, especially as related by Josephus (*ut supra*), immediately suggests the Ascension of Christ; and the retardation of the rise of the Christian Church, till after its Founder was withdrawn, gives a moral as well as a material resemblance. But this, though dwelt upon in the services of the Church, has not been expressly laid down in the Bible.

In Jude 9 is an allusion to an altercation between Michael and Satan over the body of Moses. It has been endeavored (by reading Ἰησοῦ for Μωϋσέως) to refer this to Zech. iii. 2. But it probably refers to a lost apocryphal book, mentioned by Origen, called the "Ascension, or Assumption, of Moses." All that is known of this book is given in Fabricius, *Cod. Pseudepigr. V. T. i.* 839-844. The "dispute of Michael and Satan" probably had reference to the concealment of the body to prevent idolatry. Gal. v. 6 is by several later writers said to be a quotation from the "Revelation of Moses" (Fabricius, *ib. i.* 838).<sup>a</sup>

A. P. S.

\* If the birth of Moses fell within the period of the XVIIIth Dynasty, this surely cannot be styled an "age of Homeric simplicity." On the contrary, it was the most brilliant era of Egypt in arts and arms, and the monuments show that the manners of the people were highly luxurious. Women were allowed a freedom which is nowhere tolerated in the East at the present day, and which was exceptional among civilized nations of antiquity; hence the use of the Nile for bathing could not have been forbidden to their sex by any code of Egyptian propriety. Moreover, a princess would have been able to command a degree of privacy in her ablations, such, for instance, as could easily be secured to-day along the margin of the palace garden in the island of Koda in the Nile — where, indeed, the Mohammedan tradition locates the scene of the finding of Moses. This incident of the bathing, so contrary to the customs of other nations of antiquity with regard to women, gives verisimilitude to the story.

The entire absence of the marvelous in this Biblical narrative of the infancy of Moses is in striking contrast with the Rabbinical legends, and with the tendency of an inventor to exaggerate the early history of such a hero, and to multiply fables and wonders. The stories of Romulus and Remus, exposed on the bank of the Tiber, suckled by a wolf and fed by a wood-pecker, and of Semiramis preserved in infancy by pigeons that brought her food, bear no analogy to this account of the preservation of Moses. The whole air of the former is fabulous; while the latter gives a natural and sufficient explanation of the incident, without seeking to magnify the incident itself. It was natural, for the reason assigned, that the Egyptian king, jealous of the growing numbers of a foreign race, should seek to exterminate them by destroying their male

offspring. It was natural that the parents of Moses should seek to save him alive. When they could no longer hide him, the expedient of committing him to a floating cradle upon the reedy margin of the river that flowed by the door, was but the natural ingenuity of maternal affection. The finding of the child by the king's own daughter was a perfectly natural incident, and her immediate adoption of the child was but the natural prompting of a woman's sympathy. The addition of Philo that she afterwards used devices upon her own person with a view to represent Moses as her own child, is one of those fanciful legends which by contrast enable one the better to appreciate the simplicity of the Bible story. (*Phil. Mos. i. 5.*) This narrative has nothing in common with the mythical inventions of later times.

The incident which first brings Moses before us in the character of a deliverer illustrates the magnanimity of his nature, in openly espousing the cause of the injured, and identifying himself with his oppressed race, while at the same time it exhibits a rude impulsiveness of spirit which needed to be subdued before he could be fitted for his great work of leadership. Augustine condemns his killing the Egyptian as a deed of unjustifiable violence. The Koran represents it as a work of Satan, of which Moses repented. Philo applauds it as a pious action. In his own code Moses makes a wide distinction between killing by guile, and killing through sudden heat, to avenge an injury or injustice. Certainly a quick sympathy with the suffering and oppressed marks a noble nature; yet, from the subsequent narrative, it would appear that Moses in this act had mistaken the will of God as to the manner of delivering Israel, since this would be accomplished not by a violent insurrection, but by the manifestation of Divine power.

In the wilderness of Arabia Petraea Moses would find a secure retreat from the rage of Pharaoh — especially if at that time the Egyptians had been dispossessed of their dominion in the peninsula. Bunsen (*Egypt's Place*, bk. iv. pt. ii. sec. v.) argues that since the copper mines of Sarbât el Khadim were worked from the time of Tuthmosis II. down to that of Rameses the Great, the life of Moses could not have fallen within this period. Lepsius (*Briefe aus Egypten*) traces the steles of Sarbât from the last dynasty of the old monarchy to the last king of the XIXth Dynasty. Yet the presence of an Egyptian garrison at Sarbât may have been no greater restraint upon the Nomads of that time, than are the garrisons of Nûkhl and Akaba upon the Alouins of to-day.

The scenes of the desert life of Moses, following so closely upon his life in Egypt, again verify the narrative by their fidelity to nature. The incident at the well could hardly have happened in Egypt, where water for almost all purposes was drawn from the river, and where the people were more agricultural than pastoral, — but it belongs to Arabian life.

<sup>a</sup> In later history, the name of Moses has not been forgotten. In the early Christian Church he appears in the Roman catacombs in the likeness of St. Peter, partly, doubtless, from his being the leader of the Jewish, as Peter of the Christian Church, partly from his connection with the Rock. It is as striking the mark that he appears under Peter's name.

In the Jewish, as in the Arabian nation, his name in later years been more common than in former

ages, though never occurring again (perhaps, as in the case of David, and of Peter in the Papacy, from motives of reverence) in the earlier annals, as recorded in the Bible. Moses Maimonides, Moses Mendelssohn, Mûsa the conqueror of Spain, are obvious instances. Of the first of these three a Jewish proverb testifies that "From Moses to Moses there was none like Moses."

It was in the desert, where the greatness and majesty of God are so strikingly contrasted with the littleness and nothingness of man, and where everything invites to religious contemplation, that Moses attained to that high spiritual development which qualified him to be "the spokesman and interpreter of the divine mysteries." As Ewald (*Geschichte des Volkes Israel*) has said, "It was necessary for Moses, before his prophetic work began, to be so imbued with the power of religion that from that moment he became a new man. This first seized on him in the calm and stillness of life; — the bush in the desolate waste suddenly became to the simple shepherd a burning shrine, out of whose brightness the angels of God spake to him. Thenceforth he thought and acted under the direct assurance of God. That there is no redemption from Egyptian bondage but in free obedience to the clearly perceived will of the Heavenly Father, no deliverance from idolatry and the whole superstition of Egypt but by the service of the purely spiritual God; these truths, and such as these, must have come before the eye of Moses in all the power of a divine illumination, while as yet they had never been recognized with equal certainty by any one. In Moses were present all the necessary conditions to make him the greatest prophet of high antiquity."

The influence of Egyptian thought, manners, and institutions upon Moses has been considered in another place. [LAW OF MOSES.] But his conception of God as a pure spirit, infinitely holy, and his conception of love as the true basis of human society, are so remote from Egyptian influence, and so sublime in themselves, as almost to necessitate the theory of a divine inspiration to account for their existence.

As the incident of the burning bush rests solely upon the authority of Moses himself, some have treated it as a spiritual hallucination, and others have classed it with the pretended night-vision of Mohammed. But Mohammed never wrought a miracle openly; whereas Moses, using the staff given him at the burning-bush, wrought miracles upon the grandest scale in presence of two nations. Hence, to discredit his story of the burning bush and the serpent-rod, is either to set aside the whole history of the Exodus and of Israel in the desert, or to assume that by the miracles in Egypt Jehovah put his seal to a fantasy or an imposture. Moreover there is nothing in this story to magnify Moses as a hero; on the contrary, with a hesitancy that borders upon stubbornness, and a distrust that betrays a lurking unbelief, he appears quite at disadvantage. The story of the divine call of Moses is very unlike the mythical treatment of a hero. And the same is true of the whole narrative of his interviews with Pharaoh, and of the wonders performed in Egypt, at the Red Sea, and in the wilderness of Sinai. Never was there a great leader who obscured himself so little, and was so careful to ascribe all his achievements to God — even putting upon record his own infirmities, whenever he was for a moment betrayed into petulance or presumption. The artlessness and honesty of the story in all that concerns Moses himself prepares us to receive as credible the supernatural events that are incorporated with it.

It is quite possible that some traces of Moses will yet be found in Egyptian literature, more definite and decisive than the brief allusions of Manetho which have come down to us through Josephus. Lauth

(*Moses der Ewäer*) finds the Moses of the Hebrew books in the *Mesu* of the Papyri at Leyden, registered as Anastasi I. and Anastasi I. 350, and he has even attempted to identify him with the Mohar or hero whose travels in Syria and Phœnicia in the fourteenth century b. c. have lately been deciphered by Chabas (*Voyage d'un Egyptien*). As yet, however, this interpretation is simply tentative; but we may confidently hope to obtain from Egyptian sources some verification of the personality and the period of a man who figured so grandly in Egyptian and Arabian history. J. P. T.

\* A Latin version of a large portion of the work referred to by some of the Christian fathers as the "Ascension" or "Assumption" (*Ἀνάληψις*) of Moses" is contained in a palimpsest manuscript of the sixth century belonging to the Ambrosian Library at Milan, and was first published by the Librarian, A. M. Ceriani, in his *Monumenta sacra et profana*, etc. Tom. I. Fasc. i., Mediolani, 1861. It was first critically edited by Hilgenfeld in his *Novum Testamentum extra Canonem receptum*, Fasc. i. pp. 93-115 (Lips. 1866), who, with the aid of Gutschmid, Lipsius, and others, corrected many of the errors of the manuscript, and brought the text, for the most part, into a readable condition. It was next edited with a German translation and copious notes by Volkmar, as the third volume of his *Handbuch zu den Apokryphen*, Leipzig, 1867, and again by M. Schmidt and A. Merx in Merx's *Archiv für wissenschaftl. Erforschung des alten Test.*, 1867, Heft 2. Still more recently it has been retranslated from Latin into Greek, with critical and explanatory notes, by Hilgenfeld, in his *Zeitschr. f. wiss. Theol.*, 1868, pp. 273-309, 356. Critical discussions of various points connected with the work will also be found in the same periodical for 1867, pp. 217 ff. (against Volkmar), 448 (by M. Haupt), 1868, pp. 76-108 (by H. Rönisch), 466 ff. (do.), and 1869, pp. 213-228 (do.). See also Ewald in the *Göttinger Gel. Anz.* for 1862, pp. 3-7; 1867, pp. 110-117; and *Gesch. Christus*, 3<sup>e</sup> Ausg. (1867), pp. 73-82; Langen (Cath.), *Das Judenthum*, etc. (1866), pp. 102-110; F. Philippi, *Das Buch Henoch*, etc. (1868), pp. 166-191; and an article by Wieseler, *Die jüngst aufgefundenen Aufnahmen Moses nach Ursprung und Inhalt untersucht*, in the *Jahrb. f. deutsche Theol.*, 1868, pp. 622-648.

The work may be divided into two principal parts. In the first, Moses, just before his death, is represented as giving to Joshua, as his appointed successor, a sketch of the future history of the chosen people, ending with their final triumph over the Roman power, here symbolized by the Eagle, as in the 2d book of Esdras. This is followed by a self-distrustful speech of Joshua, to which Moses makes an encouraging reply, broken off abruptly by the imperfection of the manuscript, which has, besides, a considerable number of illegible lines or words. Though the importance of this document is strangely exaggerated by Volkmar, it is of no little interest as illustrating the state of feeling and the theoretic or Messianic expectations of a portion, at least, of the Jews, at the time when it was written. The critics as yet differ pretty widely concerning the date. Ewald assigns its origin to the year G. A. D. Wieseler supposes it to have been written by a Galilean Zealot, about 2 years before Christ, soon after the troubles connected with the death of Herod. Hilgenfeld places it in the reign of Claudius, A. D. 44; Langen soon after the de-

struction of Jerusalem; Volkmar and Philippi about 137 A. D. The most important passage bearing on the date is unfortunately mutilated in the manuscript. To discuss here this or other questions connected with the work would lead us too far.

It should be added that a "Revelation of Moses" has recently been published from four Greek manuscripts by Tischendorf in his *Apocalypses apocryphæ*, Lips. 1866. It is a fanciful amplification of the Biblical history of Adam and Eve and their immediate descendants, in the spirit of the Jewish Haggada, resembling the Book of Jubilees or Little Genesis.

\* MOSES, BOOKS OF. [PENTATEUCH.]

\* MOSES, LAW OF. [LAW OF MOSES.]

MOSOL/LAM (Μοσόλλαμος: *Bosoranus*) = MESHULLAM 11 (1 Esdr. ix. 14; comp. Ezr. x. 15).

MOSOL/LAMON (Μοσόλλαμος; [Vat. Μεσολαβων:] *Mosolunus*) = MESHULLAM 10 (1 Esdr. viii. 44; comp. Ezr. viii. 16).

\* MOTE (κάρφος: *festuca*), Matt. vii. 3-5; Luke vi. 41, 42. The original word here used properly denotes a small particle of something dry, as wood, chaff, or straw. The rendering "straw" or "splinter" is preferred by some as forming a more lively antithesis to "beam." For the proverb see the notes of Wetstein and Tholuck on Matt. vii. 3-5.

MOTH (שָׂץ,<sup>a</sup> 'ash: שָׂץ, אֲרָחְרָה, תַּרְאֲחָה, חֲרוֹנוֹס; Sym. εὐρώς; Aq. βρώσις: *tinea, avanea*). By the Hebrew word we are certainly to understand some species of clothes-moth (*tinea*); for the Greek *σῆς*, and the Latin *tinea*, are used by ancient authors to denote either the larva or the imago of this destructive insect, and the context of the several passages where the word occurs is sufficiently indicative of the animal. Reference to the destructive habits of the clothes-moth is made in Job iv. 19, xiii. 28; Ps. xxxix. 11; Is. i. 9, li. 8; Hos. v. 12; Matt. vi. 19, 20; Luke xii. 33, and in Ecclus. xix. 3, xlii. 13; indeed, in every instance but one where mention of this insect is made, it is in reference to its habit of destroying garments; in Job xxvii. 18, "He buildeth his house as a moth," it is clear that allusion is made either to the well-known case of the *Tinea pellionella* (see woodcut), or some allied species, or else to the leaf-building larvæ of some other member of the *Lepidoptera*. "I will be to Ephraim as a moth," in Hos. v. 12, clearly means "I will consume him as a moth consumes garments." The expression of the A. V. in Job iv. 19, "are crushed before the moth," is certainly awkward and ambiguous; for the different interpretations of this passage see Rosenmüller's *Schol.* ad loc., where it is argued that the words rendered "before the moth" signify, "as a moth (destroys garments)." So the Vulg. "consumenter veluti a tinea" (for this use of the Hebrew phrase, see 1 Sam. i. 16). Similar is the Latin *ad faciendi*, in Plaut. *Cistell.* i. 1, 73). Others take the passage thus—"who are crushed even as the frail moth is crushed." Either sense will suit the passage; but see the different explanation of Lee (*Comment. on Job*, ad loc.). Some writers understand the word βρώσις of Matt. vi. 19, 20, to denote some species of moth (*tinea gra-*

*nella*?); others think that *σῆς καὶ βρώσις* by hendiadys = *σῆς βιβρώσκουσα* (see Scultet. *Ex. Evang.* ii. c. 35). [RUST.] The Orientals were fond of forming repositories of rich apparel (Hammond, *Annot.* on Matt. vi. 19), whence the frequent allusion to the destructiveness of the clothes-moth.

The Clothes-Moth. (*Tinea pellionella*.)

- a. Larva in a case constructed out of the substance on which it is feeding  
 b. Case cut at the ends.  
 c. Case cut open by the larva for enlarging it.  
 d, e. The perfect insect.

The British tinea which are injurious to clothes, fur, etc., are the following: *tinea tapetzella*, a common species often found in carriages, the larva feeding under a gallery constructed from the lining, *t. pellionella*, the larva of which constructs a portable case out of the substance in which it feeds, and is very partial to feathers. This species, writes Mr. H. T. Stainton to the author of this article, "certainly occurs in Asia Minor, and I think you may safely conclude, that it and *bisellinta* (an abundant species often found in horse-hair linings of chairs) will be found in any old furniture warehouse at Jerusalem." For an interesting account of the habits and economy of the clothes-moths, see Rennie's *Insect Architecture*, p. 190, and for a systematic enumeration of the British species of the genus *Tinea*, see *Insecta Britannica*, vol. iii. The clothes-moths belong to the group *Tineina*, order *Lepidoptera*. For the Hebrew שָׂץ (*Sās*) see WORM. W. H.

MOTHER (אִמָּה: *māthar*: *mater*). The superiority of the Hebrew over all contemporaneous systems of legislation and of morals is strongly shown in the higher estimation of the mother in the Jewish family, as contrasted with modern oriental, as well as ancient oriental and classical usage. The king's mother, as appears in the case of Bathsheba, was treated with especial honor (1 K. ii. 19; Ex. xx. 12; Lev. xix. 3; Deut. v. 16, xxi. 18, 21; Prov. x. 1, xv. 20, xvii. 25, xxix. 15, xxxi. 1, 30). [CHILDREN; FATHER; KINDRED; KING, vol. ii. p. 1540 b; WOMEN.]

H. W. P.

MOUNT, MOUNTAIN. In the O. T. our translators have employed this word to represent the following terms only of the original: (1) the Hebrew הָרַר, *har*, with its derivative or kindred הָרָרָה, *hārār*, or הָרַר. *herer*; and (2) the Chaldee ܚܪܝܢ, *tūr*: this last occurs only in Dan. ii. 35, 45. In the New Testament it is confined almost

<sup>a</sup> From the root שָׂץ, "to fall away."

exclusively to representing ὄρος. In the Apocrypha the same usage prevails as in the N. T., the only exception being in 1 Macc. xii. 36, where "mount" is put for ἔψος, probably a mound, as we should now say, or embankment, by which Simon cut off the communication between the citadel on the Temple mount and the town of Jerusalem. For this Josephus (*Ant.* xiii. 5, § 11) has τείχος, a wall.

But while they have employed "mount" and "mountain" for the above Hebrew and Greek terms only, the translators of the A. V. have also occasionally rendered the same terms by the English word "hill," thereby sometimes causing a confusion and disconnection between the different parts of the narrative which it would be desirable to avoid. Examples of this are given under HILLS (vol. ii. p. 1077). Others will be found in 1 Macc. xiii. 52, compared with xvi. 20; Jud. vi. 12, 13, comp. with x. 10, xiii. 10.

The Hebrew word *har*, like the English "mountain," is employed both for single eminences more or less isolated, such as Sinai, Gerizim, Ebal, Zion, and Olivet, and for ranges, such as Lebanon. It is also applied to a mountainous country or district, as in Josh. xi. 16, where "the mountain of Israel" is the highland of Palestine, as opposed to the "valley and the plain;" and in Josh. xi. 21, xx. 7, where "the mountain of Judah" (A. V. in the former case "mountains") is the same as "the hill-country" in xxi. 11. Similarly Mount Ephraim (*Har Ephraim*) is the mountainous district occupied by that tribe, which is evident from the fact that the Mount Gaash, Mount Zemaraim, the hill of Phinehas, and the towns of Shechem, Shamir, Timmath-Serach, besides other cities (2 Chr. xv. 8), were all situated upon it.<sup>a</sup> So also the "mountain of the Amorites" is apparently the elevated country east of the Dead Sea and Jordan (Deut. i. 7, 19, 20), and "Mount Naphtali" the very elevated and hilly tract allotted to that tribe.

The various eminences or mountain-districts to which the word *har* is applied in the O. T. are as follow:—

ABARIM; AMANA; OF THE AMALEKITES; OF THE AMORITES; ARARAT; BAALAH; BAAL-HERMON; BASHAN; BETHEL; BETHER; CARMEL; EBAL; EPHRAIM; EPHRON; ESAU; GAASH; GERIZIM; GILBOA; GILEAD; HALAK; HERES; HERMON; HOR<sup>b</sup> (2); HOREB; OF ISRAEL; JERARIM; JUDAH; OLIVET, or OF OLIVES; MIZAR; MORIAH; NAPHTALI; NEBO; PARAN; PERAZIM; SAMARIA; SEIR; SEPHAR; SINAI; SION, SIRION, or SHENIR (all names for Hermon); SHAPHER; TABOR; ZALMON; ZEMARAIM; ZION.

THE MOUNT OF THE VALLEY (הַר הַעֲמֻקָּה): ὁ ὄρος Ἐνδθ; Alex. <sup>d</sup> *Evax; mons convallis*) was a district on the East of Jordan, within the territory allotted to Reuben (Josh. xiii. 19), containing a number of towns. Its name recalls a similar juxtaposition of "mount" and "valley" in the name

<sup>a</sup> In the same manner "The Peak," originally the name of the highest mountain of Derbyshire, has now been extended to the whole district.

<sup>b</sup> Mount Hor is probably the "great mountain" — the "mountain of mountains," according to the oriental custom of emphasizing an expression by doubling the word.

<sup>c</sup> 1 K. xvi. 24, "the hill Samaria;" accurately, "the mountain Shomeron."

<sup>d</sup> The same reading is found in the LXX. of Jer. viii. 5, xlix. 4.

of "Langdale i kes," a well-known mountain in our own country.

The word *har* became, at least in one instance, incorporated with the name which accompanied it, so as to form one word. *Har Gerizim*, Mount Gerizim, appears in the writers of the first centuries of the Christian era as ὄρεις Ἀργαριζίν (Eupolemus), ὄρος Ἀργαριζός (Marinus), *mons Agazaren* (*Itin. Hierosolym.* p. 587). This is also, as has already been noticed (see vol. i. p. 156 *b*), the origin of the name of Armageddon; and it may possibly be that of Atabyrion or Itabyrion, the form under which the name of Mount Tabor is given by the LXX., Stephanus of Byzantium, and others, and which may have been a corruption, for the sake of euphony, from Ἀρταβύριον:—Ἀταβύριον, Ἰταβύριον.

The frequent occurrence throughout the Scriptures of personification of the natural features of the country is very remarkable. The following are, it is believed, all the words<sup>e</sup> used with this object in relation to mountains or hills:—

1. HEAD, ראשׁ, *Rôsh*, Gen. viii. 5; Ex. xix. 20; Deut. xxxiv. 1; 1 K. xviii. 42 (A. V. "top").

2. EARS, אַזְנוֹת, *Aznôth*. Aznoth-Tabor, Josh. xix. 34: possibly in allusion to some projection on the top of the mountain. The same word is perhaps found in UZZEN-SHERAH.

3. SHOULDER, כַּתֵּף, *Câthêph*. Deut. xxxiii. 12; Josh. xv. 8, and xviii. 16 ("side"); all referring to the hills on or among which Jerusalem is placed. Josh. xv. 10, "the *side* of Mount Jearim."

4. SIDE, צֵד, *Tsad*. (See the word for the "side" of a man in 2 Sam. ii. 16, Ez. iv. 4, &c.) Used in reference to a mountain in 1 Sam. xxiii. 26, 2 Sam. xiii. 34.

5. LOINS OR FLANKS, כִּסְלוֹת, *Cislôth*. Chisloth-Tabor, Josh. xix. 12. It occurs also in the name of a village, probably situated on this part of the mountain, Ha-Cesulloth, הַכִּסְלוֹת, *i. e.* the "loins" (Josh. xix. 18). [CHESULLOTH.]

6. RIB, צֵלַע, *Tselâ*. Only used once, in speaking of the Mount of Olives, 2 Sam. xvi. 13, and there translated "side," ἐκ πλευρᾶς τοῦ ὄρους.

7. BACK, שֵׁקֶם, *Shechem*. Possibly the root of the name of the town *Shechem*, which may be derived from its situation, as it were on the back of Gerizim.

8. THIGH, יָרֵךְ, *Jarcâh*. (See the word for the "thigh" of a man in Judg. iii. 16, 21.) Applied to Mount Ephraim, Judg. xix. 1, 18; and to Lebanon, 2 K. xix. 23; Is. xxxvii. 24. Used also for the "sides" of a cave, 1 Sam. xxiv. 3.

<sup>e</sup> With perhaps four exceptions, all the above terms are used in our own language; but, in addition, we speak of the "crown," the "instep," the "foot," the "toe," and the "breast" or "bosom" of a mountain or hill. "Top" is perhaps only a corruption of *kopf*, "head." Similarly we speak of the "moath," and the "gorge" (*i. e.* the "throat") of a ravine; and a "tongue" of land. Compare too the word *col*, "neck," in French.

9. The word translated "covert" in 1 Sam. xxv. 20 is סֶתֶר, *Sèther*, from סָתַר, "to hide," and probably refers to the shrubbery or thicket through which Abigail's path lay. In this passage "hill" should be "mountain."

The Chaldee טַרְיָר, *târ*, is the name still given to the Mount of Olives, the *Jebel et-Tûr*.

The above is principally taken from the Appendix to Professor Stanley's *Sinai and Palestine*, § 23. See also 249, and 338 note, of that work. G.

**MOUNT** (Is. xxix. 3; Jer. vi. 6, &c.). [SIEGE.]

\* **MOUNT OF THE AMALEKITES** (Judg. xii. 15, and comp. v. 14, A. V.), or **MOUNT OF AM'ALEK**. [AMALEKITES.]

\* **MOUNT EPHRAIM**. [EPHRAIM, MOUNT, Amer. ed.]

**MOUNTAIN OF THE AM'ORITES**

(הַר הָאֲמֹרִי) : ὄρος τοῦ Ἀμορραίου : *Mons Amorrhæi*, specifically mentioned Deut. i. 19, 20 (comp. 44), in reference to the wandering of the Israelites in the desert. It seems to be the range which rises abruptly from the plateau of *et-Tih*, running from a little S. of W. to the N. of E., and of which the extremities are the *Jebel Arnaif en-Nakûh* westward, and *Jebel el-Mukrah* eastward, and from which line the country continues mountainous all the way to Hebron. [WILDERNESS OF WANDERING.] H. H.

**MOURNING.**<sup>a</sup> The numerous list of words employed in Scripture to express the various actions which are characteristic of mourning, show in a great degree the nature of the Jewish customs in this respect. They appear to have consisted chiefly in the following particulars:—

1. Beating the breast or other parts of the body.
2. Weeping and screaming in an excessive degree.
3. Wearing sad-colored garments.
4. Songs of lamentation.
5. Funeral feasts.
6. Employment of persons, especially women, to lament.

And we may remark that the same words, and in many points the same customs prevailed, not only in the case of death, but in cases of affliction or calamity in general.

(1.) Although in some respects a similarity exists between Eastern and Western usage, a similarity

which in remote times and in particular nations was stronger than is now the case, the differences between each is on the whole very striking. One marked feature of oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies. Thus Abraham, after the death of Sarah, came, as it were in state, to mourn and weep for her, Gen. xxiii. 2. Job, after his misfortunes, "arose and rent his mantle (*meil*, Dress, i. 621 a), and shaved his head, and fell down upon the ground, on the ashes," Job i. 20, ii. 8, and in like manner his friends "rent every one his mantle, and sprinkled dust upon their heads, and sat down with him on the ground seven days and seven nights" without speaking, ii. 12, 13. We read also of high places, streets, and house-tops, as places especially chosen for mourning, not only by Jews but by other nations, Is. xv. 3; Jer. iii. 21, xlviii. 38; 1 Sam. xi. 4, xxx. 4; 2 Sam. xv. 30.

(2.) Among the particular forms observed the following may be mentioned:—

a. Renting the clothes, Gen. xxxvii. 29, 34, xlv. 13; 2 Chr. xxxiv. 27; Is. xxxvi. 22; Jer. xxxvi. 24 (where the absence of the form is to be noted), xli. 5; 2 Sam. iii. 31, xv. 32; Josh. vii. 6; Joel ii. 13; 1Kz. ix. 5; 2 K. v. 7, xi. 14; Matt. xxvi. 65, *ἰμάτιον*; Mark xiv. 63, *χιτῶν*.

b. Dressing in sackcloth [SACKCLOT] [SACKCLOT]. Gen. xxxvii. 34; 2 Sam. iii. 31, xxi. 10; Ps. xxxv. 13; Is. xxxvii. 1; Joel i. 8, 13; Am. viii. 10; Jon. iii. 8, man and beast; Job xvi. 15; Esth. iv. 3, 4; Jer. vi. 26; Lam. ii. 10; 1 K. xxi. 27.

c. Ashes, dust, or earth sprinkled on the person, 2 Sam. xiii. 19, xv. 32; Josh. vii. 6; Esth. iv. 1, 3; Jer. vi. 26; Job ii. 12, xvi. 15, xlii. 6; Is. lxi. 3; Rev. xviii. 19.

d. Black or sad-colored garments, 2 Sam. xiv. 2; Jer. vii. 21; Ps. xxxviii. 6, xlii. 9, xliii. 2; Mal. iii. 14, marg.; Ges. p. 1195.

e. Removal of ornaments or neglect of person, Deut. xxi. 12, 13; Ex. xxxiii. 4; 2 Sam. xiv. 2, xix. 24; Ez. xxvi. 16; Dan. x. 3; Matt. vi. 16, 17. [NAIL.]

f. Shaving the head, plucking out the hair of the head or beard, Lev. x. 6; 2 Sam. xix. 24; Ezr. ix. 3; Job i. 20; Jer. vii. 29, xvi. 6.

g. Laying bare some part of the body. Isaiah himself naked and barefoot, Is. xx. 2. The Egyptian and Ethiopian captives, ib. ver. 4; Is. xlvi. 2, l. 6; Jer. xiii. 22, 26; Nah. iii. 5; Mic. i. 11; Am. viii. 10.

- a 1. To mourn. לָבַד, *penétho*, *lugeo*.
2. (a) בָּנָה, *yoγyúzw*, and (b) בָּכָה, *penétho*, *moerere*. From (b) בָּכָה and בָּכָה, *stevagmós*, *gemitus*. In Lam. ii. 5, *ταπεινούμενος*, *humiliatus*; A. V. "mourning," "lamentation."
3. בְּכוֹרֵת, *pénthos*, *fletus*; A. V. *Bachulh*. Also בְּכִיָּה, and בָּכָה, *Baca*, from בָּכָה, *klaíw*, *fleo*.
4. בְּהִי, *thrḡnos*, *cantus*. In Ez. ii. 10, הִי, *thrḡnos*, *amentatio*. In Ez. xxvii. 32, בְּהִי, *thrḡnos*, *carmen usubre*, from בָּהָה, *thrḡnéw*, *canto*.
5. בָּיַד, *thrḡnéw*, *lugeo*.
6. מַסְפַּד, *kopetós*, *planctus*, from כָּפַד, *kóppw*, *plango*. See Eccl. xii. 5.

7. הָרַךְ, *skotéomai*, *contristor*, i. e. to wear dark colored clothes. Jer. viii. 21.
8. אָנַן, *dolor*. [BEN-ONI.]
9. הָדָה, *mélós*, *carmen*. Ez. li. 10.
10. מְרִיחָה, *thíasos*, *convivium*; A. V. marg. "mourning feast." Jer. xvi. 5.
11. הָרַךְ, or הִיךְ, "to beat." Hence part מְרַחֵבֵי, Jer. ix. 17; *thrḡnoussai*, *lamentatrices* "mourning women."

In N. T. *thrḡnéw*, ἀλαλάζω, ὀλοῦζω, θορυβόμα: *penétho*, κλαίω, κόπταμαι, κοπετός, πένθος, κλαυθμός: *lugeo*, *fleo*, *ploro*, *plango*, *moerere*, *ejula*, *luctus*, *fletus*, *moeror*, *planctus*, *ululatus*.

**A.** Fasting or abstinence in meat and drink, 2 Sam. i. 12, iii. 35, xii. 16, 22; 1 Sam. xxxi. 13; Ezr. x. 6; Neh. i. 4; Dan. x. 3, vi. 18; Joel i. 14, ii. 12; Ezr. xxiv. 17; Zech. vii. 5, a periodical fast during captivity; 1 K. xxi. 9, 12; Is. lviii. 3, 4, 5, xxiv. 7, 9, 11; Mal. iii. 14; Jer. xxxvi. 9; Jon. iii. 5, 7 (of Nineveh); Judg. xx. 26; 2 Chr. xx. 3; Ezr. viii. 21; Matt. ix. 14, 15.

**i.** In the same direction may be mentioned participation in offerings to God, and prohibition to partake in sacrificial food, Lev. vii. 20; Deut. xxvi. 14; Hos. ix. 4; Joel i. 9, 13, 16.

**k.** Covering the "upper lip," *i. e.* the lower part of the face, and sometimes the head, in token of silence; specially in the case of the leper, Lev. xiii. 45; 2 Sam. xv. 30, xix. 4; Jer. xiv. 4; Ezr. xxiv. 17; Mic. iii. 7.

**l.** Cutting the flesh, Jer. xvi. 6, 7; xli. 5. [CUTTINGS IN THE FLESH.] Beating the body, Ezr. xxi. 12; Jer. xxxi. 19.

**m.** Employment of persons hired for the purpose of mourning, women "skillful in lamentation," Eccl. xii. 5; Jer. ix. 17; Am. v. 16; Matt. ix. 23. Also flute-players, Matt. ix. 23 [MINSTREL]; 2 Chr. xxxv. 25.

**n.** Akin to this usage the custom for friends or passers-by to join in the lamentations of bereaved or afflicted persons, Gen. l. 3; Judg. xi. 40; Job ii. 11, xxx. 25, xxvii. 15; Ps. lxxviii. 64; Jer. ix. 1, xxii. 18; 1 K. xiv. 13, 18; 1 Chr. vii. 22; 2 Chr. xxxv. 24, 25; Zech. xii. 11; Luke vii. 12; John xi. 31; Acts viii. 2, ix. 39; Rom. xii. 15. So also in times of general sorrow we find large numbers of persons joining in passionate expressions of grief, Judg. ii. 4, xx. 26; 1 Sam. xxviii. 3, xxx. 4; 2 Sam. i. 12; Ezr. iii. 13; Ezr. vii. 16, and the like is mentioned of the priests, Joel ii. 17; Mal. ii. 13; see below.

**o.** The sitting or lying posture in silence indicative of grief, Gen. xxiii. 3; Judg. xx. 26, 2 Sam. xii. 16, xiii. 31; Job i. 20, ii. 13; Ezr. ix. 3; Lam. ii. 10; Is. iii. 26.

**p.** Mourning feast and cup of consolation, Jer. xvi. 7, 8.

The period of mourning varied. In the case of Jacob it was seventy days, Gen. l. 3; of Aaron, Num. xx. 29, and Moses, Deut. xxxiv. 8, thirty. A further period of seven days in Jacob's case, Gen. l. 10. Seven days for Saul, which may have been an abridged period in time of national danger, 1 Sam. xxxi. 13.

Excessive grief in the case of an individual may be noticed in 2 Sam. iii. 16; Jer. xxxi. 15, and the same hypocritically, Jer. xli. 6.

(3.) Similar practices are noticed in the Apocryphal books.

**a.** Weeping, fasting, rending clothes, sackcloth, ashes, or earth on head, 1 Macc. ii. 14, iii. 47, iv. 39, v. 14, xi. 71, xiii. 45; 2 Macc. iii. 19, x. 25, xiv. 15; Jud. iv. 10, 11; viii. 6, ix. 1, xiv. 1<sup>o</sup> (Assyrians), x. 2, 3, viii. 5; 3 Macc. iv. 6; 2 Esdr. v. 4; Esth. xiv. 2.

**b.** Funeral feast with wailing, Bar. vi. 32 [or Epist. of Jer. 32]; also Tob. iv. 1<sup>o</sup>; see in reproof of the practice, Aug. *Civ. D.* viii. 27.

**c.** Period of mourning, Jud. viii. 6; Eccl. xxii. 2, seven days, so also perhaps 2 Esdr. v. 20. Bel and Dragon ver. 40.

**d.** Priests ministering in sackcloth and ashes, *be* altar dressed in sackcloth, Jud. iv. 11, 14, 15.

**e.** Idol priests with clothes rent, head and beard

shorn, and head bare, Bar. vi. 31 [or Epist. of Jer. 31 6].

(4.) In Jewish writings not Scriptural, these notices are in the main confirmed, and in some cases enlarged.

**a.** Tearing hair and beating breast, Joseph. *Ant.* xvi. 7, § 5, xv. 3, § 9.

**b.** Sackcloth and ashes, Joseph. *Ant.* xx. 6, § 1, xix. 8, § 2, *Bell. Jud.* ii. 12, § 5; clothes rent, ii. 15, § 4.

**c.** Seven days' mourning for a father, Joseph. *Ant.* xvii. 8, § 4, *Bell. Jud.* ii. 1, § 1; for thirty days, *B. J.* iii. 9, § 5.

**d.** Those who met a funeral required to join it, Joseph. *c. Ap.* ii. 26; see Luke vii. 12, and R. *Ab.* xii. 15.

**e.** Flute-players at a funeral, *Bell. Jud.* iii. 5, § 5. [JARUS, Amer. ed.]

The Mishna prescribes seven days' mourning for a father, a mother, son, daughter, brother, sister, or wife (Bartenora, on *Moed Katon*, iii. 7).

Rending garments is regularly graduated according to the degree of relationship. For a father or mother the garment was to be rent, but not with an instrument, so as to show the breast; to be sewn up roughly after thirty days, but never closed. The same for one's own teacher in the Law, but for other relatives a palm breadth of the upper garment to suffice, to be sewn up roughly after seven days and fully closed after thirty days, *Moed Kat.* iii. 7; *Shabb.* xiii. 3; Carpzov, *App. Bib.* p. 650. Friendly mourners were to sit on the ground, not on the bed. On certain days the lamentation was to be only partial, *Moed Kat.* l. c. For a wife there was to be at least one hired mourner and two pipers, *Cetuboth*, iv. 4.

(5.) In the last place we may mention *a.*, the idolatrous "mourning for Tammuz," *Ez.* viii. 14, as indicating identity of practice in certain cases among Jews and heathens; and the custom in later days of offerings of food at graves, *Eccl.* xxx. 18.

**b.** The prohibition both to the high-priest and to Nazarites against going into mourning even for a father or mother, Lev. xxi. 10, 11; Num. vi. 7; see *Neziv*, vii. 1. The inferior priests were limited to the cases of their near relatives, Lev. xxi. 1, 2, 4.

**c.** The food eaten during the time of mourning was regarded as impure, Deut. xxvi. 14; Jer. xvi. 5, 7; Ezr. xxiv. 17; Hos. ix. 4.

(6.) When we turn to heathen writers we find similar usages prevailing among various nations of antiquity. Herodotus, speaking of the Egyptians, says, "When a man of any account dies, all the womankind among his relatives proceed to smear their heads and faces with mud. They then leave the corpse in the house, and parade the city with their breasts exposed, beating themselves as they go, and in this they are joined by all the women belonging to the family. In like manner the men also meet them from opposite quarters, naked to the waist and beating themselves" (*Her.* ii. 85). He also mentions seventy days as the period of embalming (*ii.* 86). This doubtless includes the whole mourning period. Diodorus, speaking of a king's death, mentions rending of garments, suspension of sacrifices, heads smeared with clay, and breasts bared, and says men and women go about in companies of 200 or 300, making a wailing twice-a-day, *εὐρύμας μετ' ὀδῶν*. They abstain from flesh, wheat-bread, wine, the bath, dainties, and in general all pleasure; do not lie on beds, but lament as for an only child during seventy-two days. On the

as: day a sort of trial was held of the merits of the deceased, and according to the verdict pronounced by the acclamations of the crowd, he was treated with funeral honors, or the contrary (Died. Sic. i. 72). Similar usages prevailed in the case of private persons, *ib.* 91, 92.

The Egyptian paintings confirm these accounts as to the exposure of the person, the beating, and the throwing clay or mud upon the head; and women are represented who appear to be hired mourners (Long, *Eg. Ant.* ii. 154-159; Wilkinson, *Eg. Ant.* ii. pp. 358, 387). Herodotus also mentions the Persian custom of rending the garments with wailing, and also cutting off the hair on occasions of death or calamity. The last, he says, was also usual among the Scythians (Her. ii. 66, viii. 99, ix. 24, iv. 71).

Lucian, in his discourse concerning Greek mourning, speaks of tearing the hair and flesh, and wailing, and beating the breast to the sound of a flute, Lustral of slaves, horses, and ornaments as likely to be useful to the deceased, and the practice for relatives to endeavor to persuade the parents of the deceased to partake of the funeral-feast (*περὶ δειπνῶν*) by way of recruiting themselves after their three days' fast (*De Luctu*, vol. ii. p. 303, 305, 307, ed. Amsterdam). Plutarch mentions that the Greeks regarded all mourners as unclean, and that women in mourning cut their hair, but the men let it grow. Of the Romans, in carrying corpses of parents to the grave, the sons, he says, cover their heads, but the daughters uncover them, contrary to their custom in each case (*Quæst. Rom.* vol. vii. pp. 74, 82, ed. Reiske).

Greeks and Romans both made use of hired mourners, *præfices*, who accompanied the funeral procession with chants or songs. Flowers and perfumes were also thrown on the graves (Ov. *Fast.* vi. 660; *Trist.* v. 1, 47; Plato, *Legg.* vii. 9; *Dict. of Antiq.* art. *Funus*). The *præfices* seem to be the predecessors of the "mutes" of modern funerals.

(7.) With the practices above mentioned, oriental and other customs, ancient and modern, in great measure agree. D'Arvieux says, Arab men are silent in grief, but the women scream, tear their hair, hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old abba by way of mourning garments. They also sing the praises of the deceased (*Trav.* pp. 269, 270). Niebuhr says both Mohammedans and Christians in Egypt hire wailing women, and wail at stated times (*Voy.* i. 150). Burckhardt says the women of Athara in Nubia shave their heads on the death of their nearest relatives, a custom prevalent also among several of the peasant tribes of Upper Egypt. In Berber on a death they usually kill a sheep, a cow, or a camel. He also mentions wailing women, and a man in distress besmearing his face with dirt and dust in token of grief (*Nubia*, pp. 176, 226, 374). And, speaking of the ancient Arab tribes of Upper Egypt, "I have seen the female relations of a deceased man dance before his house with sticks and lances in their hands and behaving like furious soldiers" (*Notes on Berd.* i. 280). Shaw says of the Arabs of Barbary, after a funeral the female relations during the space of two or three months go once a week to

wEEP over the grave and offer eatables (see *Eccles.* xxx. 18). He also mentions mourning women (*Trav.* pp. 220, 242). "In Oman," Wellsted says, "there are no hired mourning women, but the females from the neighborhood assemble after a funeral and continue for eight days, from sunrise to sunset, to utter loud lamentations" (*Trav.* i. 216). In the Arabian Nights are frequent allusions to similar practices, as rending clothes, throwing dust on the head, cutting off the hair, loud exclamation, visits to the tomb, plucking the hair and beard (i. 65, 263, 297, 358, 518, ii. 354, 237, 409). They also mention ten days and forty days as periods of mourning (i. 427, ii. 409). Sir J. Chardin, speaking of Persia, says the tombs are visited periodically by women (*Voy.* vi. 489). He speaks also of the tumult at a death (*ib.* 482). Mourning lasts forty days: for eight days a fast is observed, and visits are paid by friends to the bereaved relatives; on the ninth day the men go to the bath, shave the head and beard, and return the visits, but the lamentation continues two or three times a week till the fortieth day. The mourning garments are dark-colored, but never black (*ib.* p. 481). Russell, speaking of the Turks at Aleppo, says, "the instant the death takes place, the women who are in the chamber give the alarm by shrieking as if distracted, and are joined by all the other females in the harem. This conclamation is termed the "wulwaly":<sup>a</sup> it is so shrill as to be heard, especially in the night, at a prodigious distance. The men disapprove of and take no share in it; they drop a few tears, assume a resigned silence, and retire in private. Some of the near female relations, when apprised of what has happened, repair to the house, and the wulwaly, which had paused for some time, is renewed upon the entrance of each visitant into the harem" (*Aleppo*, i. 306). He also mentions professional mourners, visits to the grave on the third, seventh, and fortieth days, prayers at the tomb, flowers strewn, and food distributed to the poor. At these visits the shriek of wailing is renewed: the chief mourner appeals to the deceased and reproaches him fondly for his departure. The men make no change in their dress; the women lay aside their jewels, dress in their plainest garments, and wear on the head a handkerchief of a dusky color. They usually mourn twelve months for a husband and six for a father (*ib.* 311, 312). Of the Jews he says, the conclamation is practiced by the women, but hired mourners are seldom called in to assist at the wulwaly. Both sexes make some alteration in dress by way of mourning. The women lay aside their jewels, the men make a small rent in their outer vestment (ii. 86, 87).

Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called 'welwêh' or 'wilwâl,' uttering the most piercing shrieks, and calling upon the name of the deceased, 'O, my master! O, my resource! O, my misfortune! O, my glory!' (see *Jer.* xxii. 18). The females of the neighborhood come to join with them in this conclamation; generally, also, the family send for two or more *meddâhels*, or public wailing women. Each brings a tambourine and beating them they exclaim, 'Alas for him.'

<sup>a</sup> Arab. , Heb. , Gk. δολαλύω, ἀλαλάω, Lat. *gulo, ululo*, an onomatopoeic word common to

many languages. See Ges. p. 596; Schabel, *Anal. Constit.* p. 54; and Russell, vol. i. note 83, *et seq.* from Schultens.

The female relatives, domestics, and friends, with their hair disheveled, and sometimes with rent clothes, beating their faces, cry in like manner, 'Alas, for him!' These make no alteration in dress, but women, in some cases, dye their shirts, head-veils, and handkerchiefs of a dark-blue color. They visit the tombs at stated periods" (*Mod. Eg. iii.* 152, 171, 195). Wealthy families in Cairo have in the burial-grounds regularly furnished houses of mourning, to which the females repair at stated periods to bewail their dead. The art of mourning is only to be acquired by long practice, and regular professors of it are usually hired, on the occasion of a death, by the wealthier classes (Mrs. Poole, *Englishw. in Egypt*, ii. 100). Dr. Wolff mentions the wailing over the dead in Abyssinia, *Autobiog.* ii. 273. Pietro della Valle mentions a practice among the Jews of burning perfumes at the site of Abraham's tomb at Hebron, for which see 2 Chr. xvi. 14, xxi. 19; Jer. xxxiv. 5; P. della Valle, *Viaggi*, i. 306. The customs of the N. American Indians also resemble those which have been described in many particulars, as the howling and wailing, and speeches to the dead; among some tribes the practice of piercing the flesh with arrows

or sharp stones, visits to the place of the dead (Carver, *Travels*, p. 401; Bancroft, *Hist. of U. States*, ii. 912; Catlin, *N. A. Indians*, i. 90).

The former and present customs of the Welsh, Irish, and Highlanders at funerals may also be cited as similar in several respects, e. g. wailing and howling, watching with the corpse, funeral entertainments ("funeral baked meats"), flowers on the grave, days of visiting the grave (Brand, *Pop. Antiq.* ii. 128, &c.; Harmer, *Obs.* iii. 40).

One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at Jerusalem at a spot as near to the Temple as could be obtained. This custom, noticed by St. Jerome, is alluded to by Benjamin of Tudela, and exists to the present day. Jerome, *ad Sophon.* i. 15; *ad Paulam*, Ep. xxxix.; *Early Trav. in Pal.*, p. 83; Raumer, *Palästina*, p. 293; Martineau, *Eastern Life*, p. 471; Robinson, i. 237. H. W. P.

\* It is customary among the Christian men of the upper classes in Syria to make a change to black garments on occasion of a death in the family, or at least to wear black crape over the tarboosh. G. E. P.

Copper Coins of Vespasian, representing the mourning of Judaea for her Captivity.

**MOUSE** (מִשָּׂה, 'abbār: μῦς: mus) occurs in Lev. xi. 29 as one of the unclean creeping things which were forbidden to be used as food. In 1 Sam. vi. 4, 5, five golden mice, "images of the mice that mar the land," are mentioned as part of the trespass offering which the Philistines were to send to the Israelites when they returned the ark. In Is. lxvi. 17, it is said, "They that sanctify themselves . . . eating swine's flesh, and the abomination, and the mouse, shall be consumed together." The Hebrew word is in all probability generic, and is not intended to denote any particular species of mouse; although Bochart (*Hieroz.* ii. 427), following the Arabic version of Is. lxvi. 7, restricts its meaning to the jerboa (*Dipus jaculus*). The original word denotes a field-ravager,<sup>a</sup> and may therefore comprehend any destructive rodent. It is probable, however, that in 1 Sam. vi. 5, "the mice that mar the land" may include and more particularly refer to the short-tailed field-mice (*Arvicola agrestis*, Flem.), which Dr. Kitto says cause great destruction to the corn-lands of Syria. "Of all the smaller rodentia which are injurious, both in the fields and in the woods, there is not," says Prof. Bell (*Hist. Brit. Quad.* p. 325), "one

which produces such extensive destruction as this little animal, when its increase, as is sometimes the case, becomes multitudinous." The ancient writers frequently speak of the great ravages committed by mice. Herodotus (ii. 141) ascribes the loss of Sennacherib's army to mice, which in the night time gnawed through the bow-strings and shield-straps.

Col. Hamilton Smith (*Kitto's Cycl.* art. "Mouse") says that the hamster and the dormouse are still eaten in common with the jerboa by the Bedouens; and Gesenius (*Thes.* s. v.) believes some esculent species of dormouse is referred to in Is. lxvi. 17. W. H.

**MOWING** (קָצַר; tonsio, Am. vii. 1 — LXX. reads ἄγρ δ βασιλεύς, either from a various reading or a confusion of the letters ק and ל — a word signifying also a shorn fleece, and rendered in Ps. lxxii. 6 "mown grass"). As the great heat of the climate in Palestine and other similarly situated countries soon dries up the herbage itself, hay-making in our sense of the term is not in use. The term "hay," therefore, in P. B. version of Ps. cvi. 20, for קָצַר, is incorrect. A. V. "grass." So also Prov. xxvii. 25, and Is. xv. 6. The corn destined for forage is cut with a sickle. The term קָצַר, A. V. "mower," Ps. cxxix. 7, is most com-

<sup>a</sup> Bochart derives it from קָצַר, "to devour," and קָצַר, "corn."

only in A. V. "reaper;" and once, Jer. ix. 22, "harvest-man."

The "king's mowings," Am. vii. 1, *i. e.* mown grass, Ps. lxxii. 6, may perhaps refer to some royal right of early pasturage for the use of the cavalry. See 1 K. xviii. 5. (Shaw, *Trav.* p. 138; Wilkinson, *Anc. Eg.* abridgm. ii. 43, 50; *Early Trav.*, p. 305. Pietro della Valle, *Viaggi*, ii. p. 237; Chardin, *Voy.*, iii. 370; Layard, *Nin. & Bab.*, p. 330; Niebuhr, *Descr. de l'Ar.* p. 139; Harmer, *Obs.*, iv. 326; Burckhardt, *Notes on Bed.*, i. 210.) H. W. P.

**MO'ZA** (מוֹצָא) [*going forth, door, gate*]: מוֹצָא; [Vat. *Ἰωσαῦ*]; Alex. *Ἰωσα*: *Mosa*. 1. Son of Caleb the son of Hezron by his concubine Ephah (1 Chr. ii. 46).

2. (*Μαῖσα*, 1 Chr. viii. 36, 37; *Μοσαῖα*, Alex. [F.A.] *Μασα*, 1 Chr. ix. 42, 43). Son of Zimri, and descendant of Saul through Micah the son of Mephibosheth.

**MO'ZAH** (מוֹצֵה) [*perh. the fountain*], with the definite article, ham-Motsah: *Ἰμωσῆ*; Alex. *Ἀμωσα*: *Amosa*), one of the cities in the allotment of Benjamin (Josh. xviii. 26 only), named between hac-Cephirah and Rekem. The former of these has probably been identified with *Kefir*, 2 miles east of *Yalo*, but no trace of any name resembling Motsah has hitherto been discovered. Interpreting the name according to its Hebrew derivation, it may signify "the spring-head" — the place at which the water of a spring gushes out (Stanley, *S. & P. App.* § 52). A place of this name is mentioned in the Mishna (*Succah*, iv. § 5) as follows: — "There was a place below Jerusalem named Motsa; thither they descended and gathered willow-branches," *i. e.* for the "Feast of Tabernacles" so called. To this the Gemara adds, "the place was

a Colonia α (קולניא), that is, exempt from the king's tribute" (Buxtorf, *Lex. Talm.* 2043), which other Talmudists reconcile with the original name by observing that Motsah signifies an outlet or liberation, *e. g.* from tribute. Bartenora, who lived at Jerusalem, and now lies in the "valley of Jehoshaphat" there, says (in Surenhusius' *Mishna*, ii. 274) that Motsah was but a short distance from the city, and in his time retained the name of Colonia. On these grounds Schwarz (127) would identify Mosaic with the present *Kulonieh*, a village about 4 miles west of Jerusalem on the Jaffa road, at the entrance of the great Wady *Beit Hannah*. The interpretations of the Rabbis, just quoted, are not inconsistent with the name being really derived from its having been the seat of a Roman *colonia*, as suggested by Robinson, (*Bibl. Res.* iii. 158). The only difficulty in the way of the identification is that *Kulonieh* can hardly be spoken of as "below Jerusalem" — an expression which is most naturally interpreted of the ravine beneath the city, where the *Bir-Eyub*, and the royal gardens formerly were. Still there are vestiges of much vegetation about *Kulonieh*, and when the country was more

generally cultivated and wooded, and the climate less arid than at present, the dry river-bed<sup>b</sup> which the traveller now crosses may have flowed with water, and have formed a not unfavorable spot for the growth of willows. G.

\* MUFFLERS. [VEILS, (3.)]

**MULBERRY-TREES** (מוֹרְבָרִים, *becāim*: *κλαυθμών*, *ἄπτοι*: *γγρι*) occurs only in 2 Sam. v. 23 and 24, and in the parallel passage of 1 Chr. xiv. 14. The Philistines having spread themselves in the Valley of Rephaim, David was ordered to fetch a compass behind them and come upon them over against the mulberry-trees; and to attack them when he heard the "sound of a going in the top of the mulberry-trees."

We are quite unable to determine what kind of tree is denoted by the Hebrew מוֹרְבָרִים; many attempts at identification have been made, but they are mere conjectures. The Jewish Rabbis, with several modern versions, understand the mulberry-tree; others retain the Hebrew word. Celsius (*Hierob.* i. 335) believes the Hebrew *bacā* is identical with a tree of similar name mentioned in a MS. work of the Arabic botanical writer Abu'l Fadli, namely, some species of *Amyris* or *Balsamodendron*. Most lexicographers are satisfied with this explanation. Some modern English authors have adopted the opinion of Dr. Royle, who (*Kitto's Cyc.* art. *Baca*) refers the Hebrew *bacā* to the Arabic *Shayrat-al-bak*,<sup>c</sup> "the gnat-tree," which he identifies with some species of poplar, several kinds of which are found in Palestine. Rosenmüller follows the LXX. of 1 Chr. xiv. 14, and believes "pear-trees" are signified. As to the claim of the mulberry-tree to represent the *becāim* of Scripture, it is difficult to see any foundation for such an interpretation — for, as Rosenmüller has observed (*Bib. Bot.* p. 256), it is neither "countenanced by the ancient versions nor by the occurrence of any similar term in the cognate languages" — unless we adopt the opinion of Ursinus, who (*Arbor. Bib.* iii. 75), having in view the root of the word *bacah*,<sup>d</sup> "to weep," identifies the name of the tree in question with the mulberry, "from the blood-like tears which the pressed berries pour forth." Equally unsatisfactory is the claim of the "pear-tree" to represent the *bacā*; for the uncertainty of the LXX., in the absence of further evidence, is enough to show that little reliance is to be placed upon this rendering.

As to the tree of which Abu'l Fadli speaks, and which Sprengel (*Hist. Rei herb.* p. 12) identifies with *Amyris gileadensis*, Lin., it is impossible that it can denote the *bacā* of the Hebrew Bible, although there is an exact similarity in form between the Hebrew and Arabic terms: for the *Amyridaceæ* are tropical shrubs, and never could have grown in the Valley of Rephaim, the Scriptural locality for the *becāim*.

The explanation given by Royle, that some poplar

<sup>a</sup> Can this title be in any way connected with the *κάλων* (*καλων*), which is one of the eleven names inserted by the LXX. in the catalogue of the cities of Judah, between verses 59 and 60 of Josh. xv.?

<sup>b</sup> \* It depends on the season of the year whether this river-bed is "dry" or contains water. Several travellers, as Richardson, Otto von Richter, Prokesch, testify that it is quite a running stream, at certain periods of the year, of which indeed proof is seen in

the striking fertility of the valley which it irrigates. (See DECEITFULLY, vol. i. p. 577, Am. ed.) H.

<sup>c</sup> *شجرة البق*, of which, however, Freytag says, "Arbor culicum, ulmus, quia ex succo in foliis culis exsiccat culices gignuntur."

<sup>d</sup> *בַּדְדָה*: "to flow by drops," "to weep."

is signified, although in some respects it is well suited to the context of the Scriptural passages, is untenable; for the Hebrew *bācā* and the Arabic *baka* are clearly distinct both in form and signification, as is evident from the difference of the second radical letter in each word.<sup>a</sup>

As to the מִרְרָה of Ps. lxxxiv. 6, which the A. V. retains as a proper name, we entirely agree with Hengstenberg (*Com. on Ps. ad loc.*), that the word denotes "weeping," and that the whole reference to Baca trees must be given up, but see BACA.

Though there is no evidence to show that the mulberry-tree occurs in the Hebrew Bible, yet the fruit of this tree is mentioned in 1 Macc. vi. 34, as having been, together with grape juice, shown to the elephants of Antiochus Eupator in order to irritate these animals and make them more formidable opponents to the army of the Jews. It is well known that many animals are enraged when they see blood or anything of the color of blood. For further remarks on the mulberry-trees of Palestine see SYCAMINE.

W. H.

MULE, the representative in the A. V. of the following Hebrew words, — *Pered* or *Pirdāh*, *Reches*, and *Yēmim*.

1. *Pered*, *Pirdāh* (פֶּרֶד, פִּרְדָּה): *b* δ ἄμλονος, ἡ ἄμλονος: *mulus, mula*(*t*), the common and feminine Hebrew nouns to express the "mule;" the first of which occurs in numerous passages of the Bible, the latter only in 1 K. i. 33, 38, 44. It is an interesting fact that we do not read of mules till the time of David (as to the *yēmim*, A. V. "mules," of Gen. xxxvi. 24, see below), just at the time when the Israelites were becoming well acquainted with horses. After this time horses and mules are in Scripture often mentioned together. After the first half of David's reign, as Michaelis (*Comment. on Laws of Moses*, ii. 477) observes, they became all at once very common. In Ezr. ii. 66, Neh. vii. 68, we read of two hundred and forty-five mules; in 2 Sam. xiii. 29, "all the king's sons arose, and every man gat him up upon his mule." Absalom rode on a mule in the battle of the wood of Ephraim at the time when the animal went away from under him and so caused his death. Mules were amongst the presents which were brought year by year to Solomon (1 K. x. 25). The Levitical law forbade the coupling together of animals of different species (Lev. xix. 19), consequently we must suppose that the mules were imported, unless the Jews became subsequently less strict in their observance of the ceremonial injunctions, and bred their mules. We learn from Ezekiel (xxvii. 14) that the Tyrians, after the time of Solomon, were supplied with both horses and mules from Armenia (Togarmah), which country was celebrated for its good horses (see Strabo, xi. 13, § 7, ed. Kramer; comp. also Xenoph. *Anab.* iv. 5, 36; Herod. vii. 40). Michaelis conjectures that the Israelites first became acquainted with mules in the war which David carried on with the king of Nisibis

(Zobah), (2 Sam. viii. 3, 4). In Solomon's time it is possible that mules from Egypt occasionally accompanied the horses which we know the king of Israel obtained from that country; for though the mule is not of frequent occurrence in the monuments of Egypt (Wilkinson's *Anc. Egypt.* i. 386, Lond. 1854), yet it is not easy to believe that the Egyptians were not well acquainted with this animal. That a friendship existed between Solomon and Pharaoh is clear from 1 K. ix. 16, as well as from the fact of Solomon having married the daughter of the king of Egypt; but after Shishak came to the throne a very different spirit prevailed between the two kingdoms: perhaps, therefore, from this date mules were obtained from Armenia. It would appear that kings and great men only rode on mules. We do not read of mules at all in the N. T., perhaps therefore they had ceased to be imported.

2. *Reches* (רֶחֶשׁ). See DROMEDARY.

3. *Yēmim* (יְמִימִים): *εἶπεν Ἰαμεῖν*, Vat. and Alex.: *τὸν ἔαμιν*, Compl.; *τοὺς ἰαμεῖν*, Aq. and Sym.: *aque calide* (is found only in Gen. xxxvi. 24, where the A. V. has "mules" as the rendering of the word. The passage where the Hebrew name occurs is one concerning which various explanations have been attempted. Whatever may be the proper translation of the passage, it is quite certain that the A. V. is incorrect in its rendering — "This was that Anah that found the mules in the wilderness as he fed the asses of Zibeon his father." Michaelis has shown that at this time horses were unknown in Canaan; consequently mules could not have been bred there. The Talmudical writers believe that Anah was the first to find out the manner of breeding mules: but, besides the objection urged above, it may be stated that neither the Hebrew nor its cognates have any such a word to signify "mules." Bochart (*Hieroz.* i. 209, 10), following the reading of the Samaritan Version and Onkelos, renders *yēmim* by "emims" or "giants" (Gen. xiv. 5); but this explanation has been generally abandoned by modern critics (see Rosenmüller, *Schol. in Gen.*; Geddes, *Crit. Rem.* xv. 5). The most probable explanation is that which interprets *yēmim* to mean "warm springs," as the Vulg. has it; and this is the interpretation adopted by Gesenius and modern scholars generally: the passage will then read, "this was that Anah who while he was feeding his father's asses in the desert discovered some hot springs." This would be considered an important discovery, and as such worthy of record by the historian; but if, with some writers, we are to understand merely that Anah discovered water, there is nothing very remarkable in the fact, for his father's asses could not have survived without it.<sup>d</sup>

W. H.

MUPPIM (מִפִּים) [perh. *darkness, sorrow*, First]: *Μαμφίμ*; [Alex. *Μαμφεμ*:] *Mophim*, a Benjamite, and one of the fourteen descendants of Rachel who belonged to the original colony of the sons of Jacob in Egypt (Gen. xli. 21). In Num. xxvi. 39 the name is written Shupham, and the

<sup>a</sup> In the Hebrew, ق in the Arabic; مق, بكد.

<sup>b</sup> A word of doubtful etymology. Gesenius refers it to the Syriac *ܦܢܐ*; "avolavit." Comp. German *Pferd*, Lat. *burdo*, and see Michaelis' remarks.

<sup>c</sup> From unused root יָמַם, "quæ cæloris potestatem tabuisse videtur" (Gesen. *Thes.*).

<sup>d</sup> The plural form of a noun (מִפִּים) which is apparently of Persian origin, rendered "camel" by the A. V., occurs in Esth. viii. 10, 14, and seems to denote some fine breed of mules. See Bochart *Hieroz.* i. 219. [On Gen. xxxvi. 24, see addition to ANAH, Amer. ed.]

family sprung from him are called Shuphamites. In 1 Chr. vii. 12, 15, it is Shuphim (the same as xxvi. 16), and viii. 5, Shephuphan. Hence it is probable that Muphim is a corruption of the text, and that Shupham is the true form. [BESICHER.] According to 1 Chr. vii. 12, he and his brother Huphim were the sons of Ir, or Iri (ver. 7), the son of Bela, the son of Benjamin, and their sister Maachah appears to have married into the tribe of Manasseh (*ib.* 15, 16). But ver. 15 seems to be in a most corrupt state. 1 Chr. viii. 3, 5, assigns in like manner Shephuphan to the family of Bela, as do the LXX. in Gen. xlvii. 21. As it seems to be impossible that Benjamin could have had a great-grandson at the time of Jacob's going down into Egypt (comp. Gen. i. 23), and as Machir the husband of Maachah was Manasseh's son, perhaps the explanation of the matter may be that Shupham was Benjamin's son, as he is represented Num. xxvi. 39, but that his family were afterwards reckoned with that of which Ir the son of Bela was chief (comp. 1 Chr. xxv. 9-31, xxvi. 8, 9, 11).

A. C. H.

**MURDER.**<sup>a</sup> The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offense is stated on its highest ground, as an outrage, Philo calls it sacrilege, on the likeness of God in man, to be punished even when caused by an animal (Gen. ix. 5, 6, with Bertheau's note; see also John viii. 44; 1 John iii. 12, 15; Philo, *De Spec. Leg.* iii. 15, vol. ii. p. 313). Its secondary or social ground appears to be implied in the direction to replenish the earth which immediately follows (Gen. ix. 7). The exemption of Cain from capital punishment may thus be regarded by anticipation as founded on the social ground either of expediency or of example (Gen. iv. 12, 15). The postdiluvian command, enlarged and infringed by the practice of blood-revenge, which it seems to some extent to sanction, was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited compensation or reprieve of the murderer, or his protection if he took refuge in the refuge-city, or even at the altar of Jehovah, a principle which finds an eminent illustration in the case of Joab (Ex. xxi. 12, 14; Lev. xxiv. 17, 21; Num. xxxv. 16, 18, 21, 31; Deut. xix. 11, 13; 2 Sam. xvii. 25, xx. 10; 1 K. ii. 5, 6, 31; Philo, *l. c.*; Michaelis, *On Laws of Moses*, § 132). Bloodshed even in warfare was held to involve pollution (Num. xxxv. 33, 34; Deut. xxi. 1, 9; 1 Chr. xxviii. 3). Philo says that the attempt to murder deserves punishment equally with actual perpetration; and the Mishna, that a mortal blow intended for another is punishable with death; but no express legislation on this subject is found in the Law (Philo, *l. c.*; Mishn. *Sanh.* ix. 2).

No special mention is made in the Law (*a*) of child-murder, (*b*) of parricide, nor (*c*) of taking life by poison, but its animus is sufficiently obvious in all these cases (Ex. xxi. 15, 17; 1 Tim. i. 9; Matt. xv. 4), and the 3d may perhaps be specially intended under the prohibition of witchcraft (Ex.

xxii. 18; Joseph. *Ant.* iv. 8, § 34; Philo, *De Spec. Leg.* iii. 17, vol. ii. p. 315).

It is not certain whether a master who killed his slave was punished with death (Ex. xxi. 20; Knobel, *ad loc.*). In Egypt the murder of a slave was punishable with death as an example *à fortiori* in the case of a freeman; and parricide was punished with burning; but child-murder, though treated as an odious crime, was not punished with death (Diod. Sic. i. 77). The Greeks also, or at least the Athenians, protected the life of the slave (*Dict. of Antiq.* art. *Servus*, p. 1036; Müller, *Dorians*, iii. 3, § 4; Wilkinson, *Anc. Eg.* ii. 208, 209).

No punishment is mentioned for suicide attempted, nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xvii. 23).

Striking a pregnant woman so as to cause her death was punishable with death (Ex. xxi. 23; Joseph. *Ant.* iv. 8, § 33).

If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (Ex. xxi. 29, 31; Michaelis, § 274, vol. iv. pp. 234, 235).

The duty of executing punishment on the murderer is in the Law expressly laid on the "revenger of blood;" but the question of guilt was to be previously decided by the Levitical tribunal. A strong bar against the license of private revenge was placed by the provision which required the concurrence of at least two witnesses in any capital question (Num. xxxv. 19-30; Deut. xvii. 6-12, xix. 12, 17). In regal times the duty of execution of justice on a murderer seems to have been assumed to some extent by the sovereign, as well as the privilege of pardon (2 Sam. xiii. 39, xiv. 7, 11; 1 K. ii. 34). During this period also the practice of assassination became frequent, especially in the kingdom of Israel. Among modes of effecting this object may be mentioned the murder of Benhadad of Damascus by Hazael by means of a wet cloth (1 K. xv. 27, xvi. 9; 2 K. viii. 15; Thenius, *ad loc.*; Jahn, *Hist.* i. 137; 2 K. x. 7, xi. 1, 16, xii. 20, xiv. 5, xv. 14, 25, 30).

It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Ex. xxii. 2, 3).

The Koran forbids child-murder, and allows blood-revenge, but permits money-compensation for bloodshed (ii. 21, iv. 72. xvii. 230, ed. Sale). [BLOOD, REVENGER OF; MANSAYER.]

**MUSIC.** Of music as a science among the Hebrews we have no certain knowledge, and the traces of it are so slight as to afford no ground for reasonable conjecture. But with regard to its practice there is less uncertainty. The inventor of musical instruments, like the first poet and the first forger of metals, was a Cainite. According to the narrative of Gen. iv., Jubal the son of Lamech was "the father of all such as handle the harp and organ," that is of all players upon stringed and wind instruments.<sup>a</sup> It has been conjectured that Jubal's discovery may have been perpetuated by the pillars of the Sethites mentioned by Josephus (*Ant.* i. 2), and that in this way it was preserved till after the Flood; but such conjectures are worse than an honest confession of ignorance. The first mention of music in the times after the Deluge is in the narrative of Laban's interview with Jacob, when he reproached his son-in-law with having stolen away unawares, without allowing him to cheer his departure "with songs, with tabret, and with harp" (Gen. xxxi. 27). So that, in whatever way it was preserved, the practice of music existed in the upland country of Syria, and of the three possible kinds of musical instruments, two were known and employed to accompany the song. The three kinds are alluded to in Job xxi. 12. On the banks of the Red Sea sang Moses and the children of Israel their triumphal song of deliverance from the hosts of Egypt; and Miriam, in celebration of the same event, exercised one of her functions as a prophetess by leading a procession of the women of the camp, chanting in chorus the burden to the song of Moses, "Sing ye to Jehovah, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea." Their song was accompanied by timbrels and dances, or, as some take the latter word, by a musical instrument of which the shape is unknown but which is supposed to have resembled the modern tambourine (DANCE, vol. i. p. 536 b), and, like it, to have been used as an accompaniment to dancing. The expression in the A. V. of Ex. xv. 21, "and Miriam answered them," seems to indicate that the song was alternate, Miriam leading off with the solo while the women responded in full chorus. But it is probable that the Hebrew word, like the corresponding Arabic, has merely the sense of singing, which is retained in the A. V. of Ex. xxxii. 18; Num. xxi. 17; 1 Sam. xxix. 5; Ps. cxlvii. 7; Hos. ii. 15. The same word is used for the shouting of soldiers in battle (*Jer.* li. 14), and the cry of wild beasts (*Is.* xiii. 22), and in neither of these cases can the notion of response be appropriate. All that can be inferred is that Miriam led off the song, and this is confirmed by the rendering of the Vulg. *precinebat*. The triumphal hymn of Moses had unquestionably a religious character about it, but the employment of music in religious service, though idolatrous, is more distinctly marked in

the festivities which attended the erection of the golden calf.<sup>b</sup> The wild cries and shouts which reached the ears of Moses and Joshua as they came down from the mount, sounded to the latter as the din of battle, the voices of victor and vanquished blending in one harsh chorus. But the quicker sense of Moses discerned the rough music with which the people worshipped the visible representation of the God that brought them out of Egypt. Nothing could show more clearly than Joshua's mistake the rude character of the Hebrew music at this period (*Ex.* xxxii. 17, 18), as untrained and wild as the notes of their Syrian forefathers.<sup>c</sup> The silver trumpets made by the metal workers of the Tabernacle, which were used to direct the movements of the camp, point to music of a very simple kind (*Num.* x. 1-10), and the long blast of the jubilee horns, with which the priests brought down the walls of Jericho, had probably nothing very musical about it (*Josh.* vi.), any more than the rough concert with which the ears of the sleeping Midianites were saluted by Gideon's three hundred warriors (*Judg.* vii.). The song of Deborah and Barak is cast in a distinctly metrical form, and was probably intended to be sung with a musical accompaniment as one of the people's songs, like that with which Jephthah's daughter and her companions met her father on his victorious return (*Judg.* xi.).

The simpler impromptu with which the women from the cities of Israel greeted David after the slaughter of the Philistine, was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the darling of the songs of Israel." The accompaniment of timbrels and instruments of music must have been equally simple, and such that all could take part in it (1 Sam. xviii. 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. At Bethel (1 Sam. x. 5) was a school of this kind, as well as at Natioth in Ramah (1 Sam. xix. 19, 20), at Jericho (2 K. ii. 5, 7, 15), Gilgal (2 K. iv. 38), and perhaps at Jerusalem (2 K. xxii. 14). Professional musicians soon became attached to the court, and though Saul, a hardy warrior, had only at intervals recourse to the soothing influence of David's harp, yet David seems to have gathered round him "singing men and singing women," who could celebrate his victories and lend a charm to his hours of peace (2 Sam. xix. 35). Solomon did the same (*Ecc.* ii. 8), adding to the luxury of his court by his patronage of art, and obtaining a reputation himself as no mean composer (1 K. iv. 32).

But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before, however, the elaborate arrangements had been made by David for the

<sup>a</sup> From the occurrence of the name Mahalaleel, third in descent from Seth, which signifies "giving praise to God," Schneider concludes that vocal music in religious services must have been still earlier in use among the Sethites (*Bibl.-gesch. Darstellung der Hebr.* Musik, p. xi.).

<sup>b</sup> With this may be compared the musical service which accompanied the dedication of the golden image

in the plains of Dura (*Dan.* ii.), the commencement of which was to be the signal for the multitude to prostrate themselves in worship.

<sup>c</sup> Compare *Lam.* ii. 7, where the war-cry of the enemy in the Temple is likened to the noise of the multitude on a solemn feast-day: "They have made a noise in the house of Jehovah as in the day of a solemn feast."

temple choir, there must have been a considerable body of musicians throughout the country (2 Sam. vi. 5), and in the procession which accompanied the ark from the house of Obbedom, the Levites, with Chenaniah at their head, who had acquired skill from previous training, played on psalteries, harps, and cymbals, to the words of the psalm of thanksgiving which David had composed for the occasion (1 Chr. xv., xvi.). It is not improbable that the Levites all along had practiced music and that some musical service was part of the worship of the Tabernacle; for unless this supposition be made, it is inconceivable that a body of trained singers and musicians should be found ready for an occasion like that on which they make their first appearance. The position which the tribe of Levi occupied among the other tribes naturally favored the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. They were free from the hardships attending the struggle for conquest and afterwards for existence, which the Hebrews maintained with the nations of Canaan and the surrounding countries, and their subsistence was provided for by a national tax. Consequently they had ample leisure for the various ecclesiastical duties devolving upon them, and among others for the service of song, for which some of their families appear to have possessed a remarkable genius. The three great divisions of the tribe had each a representative family in the choir: Heman and his sons represented the Kohathites, Asaph the Gershonites, and Ethan (or Jeduthun) the Merarites (1 Chr. xv. 17, xxiii. 6, xxv. 1-6). Of the 38,000 who composed the tribe in the reign of David, 4,000 are said to have been appointed to praise Jehovah with the instruments which David made (1 Chr. xxiii. 5) and for which he taught them a special chant. This chant for ages afterwards was known by his name, and was sung by the Levites before the army of Jehoshaphat, and on laying the foundation of the second Temple (comp. 1 Chr. xvi. 34, 41; 2 Chr. vii. 6, xx. 21; Ezr. iii. 10, 11); and again by the Maccabean army after their great victory over Gorgias (1 Macc. iv. 24). Over this great body of musicians presided the sons of Asaph, Heman, and Jeduthun, twenty-four in number, as heads of the twenty-four courses of twelve into which the skilled minstrels were divided. These skilled or cunning (מְבַרְבְּרִים, 1 Chr. xxv. 6, 7) men were 288 in number, and under them appear to have been the scholars

תְּלָמִיד, 1 Chr. xxv. 8), whom, perhaps, they trained, and who made up the full number of 4,000. Supposing 4,000 to be merely a round number, each course would consist of a full band of 166 musicians presided over by a body of twelve skilled players, with one of the sons of Asaph, Heman, or Jeduthun as conductor. Asaph himself appears to have played on the cymbals (1 Chr. xvi. 5), and this was the case with the other leaders (1 Chr. xv. 19), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from both, as is evident in Ps. lxxviii. 25, "the singers went before, the players on instruments followed after, in the midst of the damsels playing with timbrels;" unless the *singers* in this case were the cymbal-players, like Heman, Asaph, and Ethan, who, in 1 Chr. xv. 19, are called "singers," and perhaps while giving the time with their cym-

bals led the choir with their voices. The "players on instruments" (נְגִינִים, *noḡēnīm*), as the word denotes, were the performers upon stringed instruments, like the psaltery and harp, who have been alluded to. The "players on instruments" (חֹלְלִים, *chōllīm*), in Ps. lxxxvii. 7, were different from these last, and were properly pipers or performers on perforated wind-instruments (see 1 K. i. 40). "The damsels playing with timbrels" (comp. 1 Chr. xiii. 8) seem to indicate that women took part in the temple choir, and among the family of Heman are specially mentioned three daughters, who, with his fourteen sons, were all "under the hands of their father for song in the house of Jehovah" (1 Chr. xxv. 5, 6). Besides, with those of the Captivity who returned with Zerubbabel were "200 singing men and *singing women*" (Ezr. ii. 65). Bartenora adds that children also were included.

The trumpets, which are mentioned among the instruments played before the ark (1 Chr. xiii. 8), appear to have been reserved for the priests alone (1 Chr. xv. 24, xvi. 6). As they were also used in royal proclamations (2 K. xi. 14), they were probably intended to set forth by way of symbol the royalty of Jehovah, the theocratic king of his people, as well as to sound the alarm against his enemies (2 Chr. xiii. 12). A hundred and twenty priests blew the trumpets in harmony with the choir of Levites at the dedication of Solomon's Temple (2 Chr. v. 12, 13, vii. 6), as in the restoration of the worship under Hezekiah, in the description of which we find an indication of one of the uses of the temple music. "And Hezekiah commanded to offer the burnt-offering upon the altar. And when the burnt-offering began, the song of Jehovah began also, with the trumpets and with the instruments of David king of Israel. And all the congregation worshipped, and the singers sang, and the trumpeters sounded; all until the burnt-offering was finished" (2 Chr. xxix. 27, 28). The altar was the table of Jehovah (Mal. i. 7), and the sacrifices were his feasts (Ex. xxiii. 18), so the solemn music of the Levites corresponded to the melody by which the banquets of earthly monarchs were accompanied. The Temple was his palace, and as the Levite sentries watched the gates by night they chanted the songs of Zion; one of these it has been conjectured with probability is Ps cxxxiv.

The relative numbers of the instruments in the temple band have been determined in the traditions of Jewish writers. Of psalteries there were to be not less than two nor more than six; of flutes not less than two nor more than twelve; of trumpets not less than two but as many as were wished; of harps or citherns not less than nine but as many as were wished; while of cymbals there was only one pair (Forkel, *Allg. Gesch. der Musik*, c. iii. § 28). The enormous number of instruments and dresses for the Levites provided during the magnificent reign of Solomon would seem, if Josephus be correct (*Ant. iiii. 3, § 8*), to have been intended for all time. A thousand dresses for the high-priest, linen garments and girdles of purple for the priests 10,000; trumpets 200,000; psalteries and harps of electrum 40,000; all these were stored up in the temple treasury. The costume of the Levite singers at the dedication of the Temple was of fine linen (2 Chr. v. 12).

In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their court musicians (Ecl. ii. 8) who bewailed their death (2 Chr. xxxv. 25), and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the song with the tinkling of the psaltery or guitar (Am. vi. 4-6), and amused themselves with devising musical instruments while their nation was perishing, as Nero fiddled when Rome was in flames. Isaiah denounces a woe against those who sat till the morning twilight over their wine, to the sound of "the harp and the viol, the tabret and pipe" (Is. v. 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "the mirth of tabrets ceaseth, the noise of them that rejoice endeth, the joy of the harp ceaseth, they shall not drink wine with a song" (Is. xxiv. 8, 9). In the sadness of captivity the harps hung upon the willows of Babylon, and the voices of the singers refused to sing the songs of Jehovah at their foreign captors' bidding (Ps. cxxxvii.). The bridal processions as they passed through the streets were accompanied with music and song (Jer. vii. 34), and these ceased only when the land was desolate (Ez. xxvi. 13). The high value attached to music at banquets is indicated in the description given in Ecclus. xxxii. of the duties of the master of a feast. "Pour not out words where there is a musician, and show not forth wisdom out of time. A concert of music in a banquet of wine is as a signet of carbuncle set in gold. As a signet of an emerald set in a work of gold, so is the melody of music with pleasant wine." And again, the memory of the good king Josiah was "as music at a banquet of wine" (Ecclus. xlix. 1). The music of the banquets was accompanied with songs and dancing (Luk. xv. 25).<sup>a</sup> The triumphal processions which celebrated a victory were enlivened by minstrels and singers (Ex. xv. 1, 20; Judg. v. 1, xi. 34; 1 Sam. xviii. 6, xxi. 11; 2 Chr. xx. 28; Jud. xv. 12, 13), and on extraordinary occasions they even accompanied armies to battle. Thus the Levites sang the chant of David before the army of Jehoshaphat as he went forth against the hosts of Ammon, and Moab, and Mt. Seir (2 Chr. xx. 19, 21); and the victory of Abijah over Jeroboam is attributed to the encouragement given to Judah by the priests sounding their trumpets before the ark (2 Chr. xiii. 12, 14). It is clear from the narrative of Elisha and the minstrel who by his playing calmed the prophet's spirit till the hand of Jehovah was upon him, that among the camp followers of Jehoshaphat's army on that occasion there were to be reckoned musicians who were probably

Levites (2 K. iii. 15). Besides songs of triumph there were also religious songs (Is. xxx. 29; Am. v. 23; Jam. v. 13), "songs of the temple" (Am. viii. 3), and songs which were sung in idolatrous worship (Ex. xxxii. 18).<sup>b</sup> Love songs are alluded to in Ps. xlv. title, and Is. v. 1. There were also the doleful songs of the funeral procession, and the wailing chant of the mourners who went about the streets, the professional "keening" of those who were skillful in lamentation (2 Chr. xxxv. 25; Eccl. xii. 5; Jer. ix. 17-20; Am. v. 16). Lightfoot (*Hor. Heb.* on Matt. ix. 23) quotes from the Talmudists (*Chetubb.* cap. 4, hal. 6), to the effect that every Israelite on the death of his wife "will afford her not less than two pipers and one woman to make lamentation." The grape gatherers sang as they gathered in the vintage, and the wine-presses were trodden with the shout of a song (Is. vii. 10; Jer. xlviii. 33); the women sang as they toiled at the mill, and on every occasion the land of the Hebrews during their national prosperity was a land of music and melody. There is one class of musicians to which allusion is casually made (Ecclus. ix. 4), and who were probably foreigners, the harlots who frequented the streets of great cities, and attracted notice by singing and playing the guitar (Is. xxiii. 15, 16).

There are two aspects in which music appears, and about which little satisfactory can be said: the mysterious influence which it had in driving out the evil spirit from Saul, and its intimate connection with prophecy and prophetic inspiration. Miriam "the prophetess" exercised her prophetic functions as the leader of the chorus of women who sang the song of triumph over the Egyptians (Ex. xv. 20). The company of prophets whom Saul met coming down from the hill of God had a psaltery, a tabret, a pipe, and a harp before them, and smitten with the same enthusiasm he "prophesied among them" (1 Sam. x. 5, 10). The priests of Baal, challenged by Elijah at Carmel, cried aloud, and cut themselves with knives, and *prophesied* till sunset (1 K. xviii. 29). The sons of Asaph, Heman, and Jeduthun, set apart by David for the temple choir, were to "prophesy with harps, with psalteries, and with cymbals" (1 Chr. xxv. 1); Jeduthun "prophesied with the harp" (1 Chr. xxv. 3), and in 2 Chr. xxxv. 15 is called "the king's seer," a term which is applied to Heman (1 Chr. xxv. 5) and Asaph (2 Chr. xxix. 30) as musicians, as well as to Gad the prophet (2 Sam. xxiv. 11; 1 Chr. xxix. 29). The spirit of Jehovah came upon Jahaziel, a Levite of the sons of Asaph, in the reign of Jehoshaphat, and he foretold the success of the royal army (2 Chr. xx. 14). From all these instances it is evident that the same Hebrew root (נָצַח) is used to denote the inspiration under which the prophets spoke and the minstrels sang: Gesenius assigns the latter as a secondary

<sup>a</sup> At the royal banquets of Babylon were sung hymns of praise in honor of the gods (Dan. v. 4, 23), and perhaps on some such occasion as the feast of Beshazzar the Hebrew captives might have been brought in to sing the songs of their native land (Ps. cxxxvii.).

<sup>b</sup> The use of music in the religious services of the Therapeutæ is described by Philo (*De Vita contempl.* p. 901, ed. Frankof.). At a certain period in the service one of the worshippers rose and sang a song of praise to God, either of his own composition, or one from the older poets. He was followed by others in a regular

order, the congregation remaining quiet till the concluding prayer, in which all joined. After a simple meal, the whole congregation arose and formed two choirs, one of men and one of women, with the most skillful singer of each for leader; and in this way sang hymns to God, sometimes with the full chorus, and sometimes with each choir alternately. In conclusion, both men and women joined in a single choir in imitation of that on the shores of 'the Red Sea' which was led by Moses and Miriam

meaning. In the case of Elisha, the minstrel and the prophet are distinct personages, but it is not till the minstrel has played that the hand of Jehovah comes upon the prophet (2 K. iii. 15). This influence of music has been explained as follows by a learned divine of the Platonist school: "These divine enthusiasts were commonly wont to compose their songs and hymns at the sounding of some one musical instrument or other, as we find it often suggested in the Psalms. So Plutarch . . . describes the dictate of the oracle antiently . . . 'how that it was uttered in verse, in pomp of words, similitudes, and metaphors, at the sound of a pipe.' Thus we have Asaph, Heman, and Jeduthun set forth in this prophetic preparation, 1 Chr. xxv. 1 . . . Thus R. Sal. expounds the place . . . 'when they played upon their musical instruments they prophesied after the manner of Elisha' . . . And this sense of this place, I think, is much more genuine than that which a late author of our own would fasten upon it, namely, that this prophesying was nothing but the singing of psalms. For it is manifest that these prophets were not mere singers but composers, and such as were truly called prophets or enthusiasts" (Smith, *Select Discourses*, vi. c. 7, pp. 238, 239, ed. 1660). All that can be safely concluded is that in their external manifestations the effect of music in exciting the emotions of the sensitive Hebrews, the frenzy of Saul's madness (1 Sam. xviii. 10), and the religious enthusiasm of the prophets, whether of Baal or Jehovah, were so nearly alike as to be described by the same word. The case of Saul is more difficult still. We cannot be admitted to the secret of his dark malady. Two turning points in his history are the two interviews with Samuel, the first and the last, if we except that dread encounter which the despairing monarch challenged before the fatal day of Gilboa. On the first of these, Samuel foretold his meeting with the company of prophets with their minstrelsy, the external means by which the Spirit of Jehovah should come upon him, and he should be changed into another man (1 Sam. x. 5). The last occasion of their meeting was the disobedience of Saul in sparing the Amalekites, for which he was rejected from being king (1 Sam. xv. 26). Immediately after this we are told the Spirit of Jehovah departed from Saul, and an "evil spirit from Jehovah troubled him:" (1 Sam. xvi. 14); and his attendants, who had perhaps witnessed the strange transformation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration. 'Let our lord now command thy servants before thee, to seek out a man, a cunning player on an harp: and it shall come to pass, when the evil spirit from God is upon thee, that he shall play with his harp, and thou shalt be well. . . . And it came to pass when the spirit from God was upon Saul, that David took an harp and played with his hand. So Saul was refreshed, and was well, and the evil spirit departed from him' (1 Sam. xvi. 16, 23). But on two occasions, when anger and jealousy supervened, he remedy which had soothed the frenzy of insanity had lost its charm (1 Sam. xviii. 10, 11; xix. 9, 10). It seems therefore that the passage of Seneca, which has often been quoted in explanation of this phenomenon, "Pythagoras perturbaciones lyra componebat" (*De Ira*, iii. 9), is scarcely applicable, and we must be content to leave the narrative as it stands.

W. A. W.

MUSICAL INSTRUMENTS. In addition to the instruments of music which have been represented in our version by some modern word, and are treated under their respective titles, there are other terms which are vaguely or generally rendered. These are —

1. **דָּוָדִּים**, *dachdāwīm*, Chald., rendered "instruments of music" in Dan. vi. 18. The margin gives "or *table*, perhaps lit. *concubines*." The last-mentioned rendering is that approved by Gesenius, and seems most probable. The translation, "instruments of music," seems to have originated with the Jewish commentators, R. Nathan, R. Levi, and Aben Ezra, among others, who represent the word by the Hebrew *neginoth*, that is, stringed instruments which were played by being struck with the hand or the plectrum.

2. **מִינִים**, *minnim*, rendered with great probability "stringed-instruments" in Ps. cl. 4. It appears to be a general term, but beyond this nothing is known of it; and the word is chiefly interesting from its occurrence in a difficult passage in Ps. xlv. 8, which stands in the A. V. "out of the ivory palaces *whereby* (מִינִי, *minni*) they have made thee glad," a rendering which is neither intelligible nor supported by the Hebrew idiom. Gesenius and most of the moderns follow Sebastian Schmid in translating, "out of the ivory palaces the stringed-instruments make thee glad."

3. **עֶשְׂרֵי**, *'āšōr*, "an instrument of ten strings," Ps. xxi. 3. The full phrase is **נְבֵל עֶשְׂרֵי**, *nebel 'āšōr*, "a ten-stringed psaltery," as in Ps. xxxiii. 2. xlv. 9; and the true rendering of the first-mentioned passage would be "upon an instrument of ten strings, even upon the psaltery." [PSALTERY.]

4. **שִׁדְדָה**, *shiddāh*, is found only in one very obscure passage, Eccl. ii. 8, "I gat me men-singers and women-singers, and the delights of the sons of men, *musical instruments, and that of all sorts*" (שִׁדְדָה וְשִׁדְדוֹת, *shiddāh veshiddōth*). The words thus rendered have received a great variety of meanings. They are translated "drinking-vessels" by Aquila and the Vulgate; "cup-bearers" by the LXX.; Peshito-Syriac, Jerome, and the Arabic version; "baths" by the Chaldee; and "musical instruments" by Dav. Kimchi, followed by Luther and the A. V., as well as by many commentators. By others they are supposed to refer to the women of the royal harem. But the most probable interpretation to be put upon them is that suggested by the usage of the Talmud, where שִׁדְדָה, *shiddāh*, denotes a "palanquin" or "litter" for women. The whole question is discussed in Gesenius' *Thesaurus*, p. 1365.

5. **שָׁלִישִׁים**, *shālīshīm*, rendered "instruments of music" in the A. V. of 1 Sam. xviii. 6, and in the margin "three-stringed instruments," from the root *shālōsh*, "three." Koediger (Gesen. *Thez.* p. 1429) translates "triangles," which are said to have been invented in Syria, from the same root. We have no means of deciding which is the more correct. The LXX. and Syriac give "cymbals," and the Vulgate "sistra;" while others render it "noble songs" (comp. Prov. xxii. 20).

W. A. W.

**MUSTARD** ( $\sigma\upsilon\nu\alpha\pi\iota$ : *sinapis*) occurs in Matt. xlii. 31; Mark iv. 31; Luke xiii. 19, in which passages the kingdom of heaven is compared to a grain of mustard-seed which a man took and sowed in his garden; and in Matt. xvii. 20, Luke xvii. 6, where our Lord says to his Apostles, "if ye had faith as a grain of mustard-seed, ye might say to this mountain, remove hence to yonder place."

The subject of the mustard-tree of Scripture has of late years been a matter of considerable controversy, the common mustard-plant being supposed unable to fulfill the demands of the Biblical allusion. In a paper by the late Dr. Royle, read before the Royal Asiatic Society, and published in No. xv. of their Journal (1844), entitled, "On the Identification of the Mustard-tree of Scripture," the author concludes that the *Salvadora persica* is the tree in question. He supposes the *Salvadora persica* to be the same as the tree called *Kharjal* (the Arabic for mustard), seeds of which are employed throughout Syria as a substitute for mustard, of which they have the taste and properties. This tree, according to the statement of Mr. Ameun, a Syrian, quoted by Dr. Royle, is found all along the banks of the Jordan, near the lake of Tiberias, and near Damascus, and is said to be generally recognized in Syria as the mustard-tree of Scripture. It appears that Captains Irby and Mangles, who had observed this tree near the Dead Sea, were struck with the idea that it was the mustard-tree of the parable. As these travellers were advancing towards Kerek from the southern extremity of the Dead Sea, after leaving its borders they entered a wooded country with high rushes and marshes. "Occasionally," they say, "we met with specimens of trees, etc., such as none of our party had seen before. . . . Amongst the trees which we knew, were various species of Acacia, and in some instances we met with the dwarf Mimosa. . . . There was one curious tree which we observed in great numbers, and which bore a fruit in bunches, resembling in appearance the currant, with the color of the plum; it has a pleasant, though strong aromatic taste, resembling mustard, and if taken in any quantity, produces a similar irritability in the nose and eyes. The leaves of this tree have the same pungent flavor as the fruit, though not so strong. We think it probable that this is the tree our Saviour alluded to in the parable of the mustard-seed, and not the mustard-plant which is to be found in the north" (*Trav.* May 8). Dr. Royle thus sums up his arguments in favor of the *Salvadora persica* representing the mustard-tree of Scripture: "The *S. persica* appears better calculated than any other tree that has yet been adduced to answer to every thing that is required, especially if we take into account its name and the opinions held respecting it in Syria. We have in it a small seed, which sown in cultivated ground grows up and abounds in foliage. This being pungent, may like the seeds have been used as a condiment, as mustard-and-ress is with us. The nature of the plant is to become arboreous, and thus it will form a large shrub or a tree, twenty-five feet high, under which a horseman may stand when the soil and climate are favorable; it produces numerous branches and leaves, under which birds may and do take shelter, as well as build their nests; it has a name in Syria which may be considered as traditional, from the earliest times of which the Greek is a correct

translation; its seeds are used for the same purposes as mustard; and in a country where trees are not plentiful, that is, the shores of the lake of Tiberias, this tree is said to abound, that is in the very locality where the parable was spoken" (*Treatise on the Mustard-tree*, etc., p. 24).

Notwithstanding all that has been adduced by Dr. Royle in support of his argument, we confess ourselves unable to believe that the subject of the mustard-tree of Scripture is thus finally settled. But, before the claims of the *Salvadora persica* are discussed, it will be well to consider whether some mustard-plant (*Sinapis*) may not after all be the mustard-tree of the parable: at any rate this opinion has been held by many writers, who appear never to have entertained any doubt upon the subject. Hiller, Celsius, Rosenmüller, who all studied the botany of the Bible, and older writers, such as Erasmus, Zegerus, Grotius, are content to believe that some common mustard-plant is the

*Salvadora Persica.*

plant of the parable; and more recently Mr. Lambert in his "Note on the Mustard-plant of Scripture" (see *Linnean Trans.* vol. xvii. p. 449), has argued in behalf of the *Sinapis nigra*.

The objection commonly made against any *Sinapis* being the plant of the parable, is, that the seed grew into "a tree" ( $\delta\epsilon\acute{\nu}\delta\rho\omicron\nu$ ), or as St. Luke has it, "a great tree" ( $\delta\epsilon\acute{\nu}\delta\rho\omicron\nu \mu\acute{\epsilon}\gamma\alpha$ ), in the branches of which the fowls of the air are said to come and lodge. Now in answer to the above objection it is urged with great truth, that the expression is figurative and oriental, and that in a proverbial simile no literal accuracy is to be expected; it is an error, for which the language of Scripture is not accountable, to assert, as Dr. Royle and some others have done, that the passage implies that birds "built their nests" in the tree, the Greek word  $\kappa\alpha\tau\alpha\sigma\kappa\eta\rho\omega$  has no such meaning, the word merely means "to settle or rest upon" any thing for a longer or shorter time; the birds came, "*insidendi et versandi causa*" as Hiller (*Hierophyt.* ii. 63) explains the phrase: nor is there any

occasion to suppose that the expression "fowls of the air" denotes any other than the smaller *insectorial* kinds, linnets, finches, etc., and not the "aquatic fowls by the lake side, or partridges and pigeons hovering over the rich plain of Gennesareth," which Prof. Stanley (*S. & P. p.* 427) recognizes as "the birds that came and devoured the seed by the way-side" — for the larger birds are wild and avoid the way-side — or as those "which took refuge in the spreading branches of the mustard-tree." Hiller's explanation is probably the correct one; that the birds came and settled on the mustard-plant for the sake of the seed, of which they are very fond. Again, whatever the *σίβανι* may be, it is expressly said to be an herb, or more properly "a garden herb" (*ἀλάχανον, olus*). As to the plant being called a "tree" or a "great tree," the expression is not only an oriental one, but it is clearly spoken with reference to some other thing; the *σίβανι* with respect to the other *herbs* of the garden may, considering the size to which it grows, justly be called "a great tree," though

*Sinapis nigra*.

of course, with respect to trees properly so named, it could not be called one at all. This, or a somewhat similar explanation is given by Celsius and Hiller, and old commentators generally, and we confess we see no reason why we should not be satisfied with it. Irbly and Mangles mention the large size which the mustard-plant attains in Palestine. In their journey from Bysan to Adjeloum, in the Jordan Valley, they crossed a small plain very thickly covered with herbage, particularly the mustard-plant, which reached as high as their horses' heads. (*Trav.* March 12.) Dr. Kitto says his plant was probably the *Sinapis orientalis*

<sup>a</sup> Dr. Hooker has read the proof-sheet of this article, and returned it with the following remarks: "I quite agree with all you say about *Mustard*. My best informants laughed at the idea of the *Salvadora persica* either being the mustard, or as being sufficiently well known to be made use of in a parable at all. I am

(*nigra*), which attains under a favoring climate a stature which it will not reach in our country. Dr. Thomson also (*The Land and the Book*, p. 414) says he has seen the Wild Mustard on the rich plain of Akkar as tall as the horse and the rider. Now, it is clear from Scripture that the *σίβανι* was cultivated in our Lord's time, the seed a "man took and sowed in his field;" St. Luke says, "cast into his garden:" if then, the wild plant on the rich plain of Akkar grows as high as a man on horseback, it might attain to the same or a greater height when in a cultivated garden; and if, as Lady Callcott has observed, we take into account the very low plants and shrubs upon which birds often roost, it will readily be seen that some common mustard-plant is able to fulfill all the Scriptural demands. As to the story of the Rabbi Simeon Ben Calaphtha having in his garden a mustard-plant, into which he was accustomed to climb as men climb into a fig-tree, it can only be taken for what Talmudical statements generally are worth, and must be quite insufficient to afford grounds for any argument. But it may be asked Why not accept the explanation that the *Salvadora persica* is the tree denoted? — a tree which will literally meet all the demands of the parable. Because, we answer, where the commonly received opinion can be shown to be in full accordance with the Scriptural allusions, there is no occasion to be dissatisfied with it; and again, because at present we know nothing certain of the occurrence of the *Salvadora persica* in Palestine, except that it occurs in the small, tropical, low valley of Engedi, near the Dead Sea, from whence Dr. Hooker saw specimens, but it is evidently of rare occurrence. Mr. Amenny says he had seen it all along the banks of the Jordan, near the lake of Tiberias and Damascus; but this statement is certainly erroneous. We know from Pliny, Dioscorides, and other Greek and Roman writers, that mustard-seeds were much valued, and were used as a condiment; and it is more probable that the Jews of our Lord's time were in the habit of making a similar use of the seeds of some common mustard (*Sinapis*), than that they used to plant in their gardens the seed of a tree which certainly cannot fulfill the Scriptural demand of being called "a pot-herb."

The expression "which is indeed the least of all seeds," is in all probability hyperbolic, to denote a very small seed indeed, as there are many seeds which are smaller than mustard. "The Lord, in his popular teaching," says Trench (*Notes on Parables*, 108), "adhered to the popular language;" and the mustard-seed was used proverbially to denote anything very minute (see the quotations from the Talmud in Buxtorf, *Lex. Talm.* p. 322; also the Koran, *Sur.* 31).

The parable of the mustard-plant may be thus paraphrased: "The Gospel dispensation is like a grain of mustard seed which a man sowed in his garden, which indeed is one of the least of all seeds; but which, when it springs up, becomes a tall, branched plant, on the branches of which the birds come and settle seeking their food." <sup>a</sup>

W. H.

satisfied that it is a very rare plant in Syria, and is probably confined to the hot, low, sub-tropical Engedi valley, where various other Indian and Arabian types appear at the *Ultima Thule* of their northern wanderings. Of the mustard-plants which I saw on the banks of the Jordan, one was 10 feet high, drawn

\* The writer, in crossing the Plain of Akka from Birweh, on the north side, to Mount Carmel, on the south, met with a field — a little forest it might almost be called — of the common mustard-plant of the country. It was in blossom at the time, full grown; in some cases, as measured, six, seven, and nine feet high, with a stem or trunk more than an inch thick, throwing out branches on every side. It might well be called a tree, and certainly, in comparison with its tiny seed, "a great tree." But still the branches, or stems of the branches, were not very large, and to the eye did not appear very strong. Can the birds, I said to myself, rest upon them? Are they not too slight and flexible? Will they not bend or break beneath the superadded weight? At that very instant, as I stood and revolved the thought, lo! one of the fowls of heaven stopped in its flight through the air, alighted down on one of the branches, which hardly moved beneath the shock, and then began, perched there before my eyes, to warble forth a strain of the richest music.

In this occurrence every condition of the parable was fully met. As remarked above, the Greek expression does not say that the birds build their nests among such branches, but light upon them or make their abode among them. [NESTS, Amer. ed.] This plant is not only common in Palestine in a wild state, but is cultivated in gardens (comp. Matt. xiii. 31). This circumstance shows that the *Khardal* or mustard-tree of the Arabs (*Salvadora persica*) cannot be meant, for that grows wild only. Certain birds are fond of the seeds, and seek them as food. The associating of the birds and this plant as in the parable was the more natural on that account. Further, see Tristram, *Nat. Hist. of the Bible*, p. 472 f. H.

MUTH-LAB' BEN. "To the chief musician upon Muth-Labben" (עַל מוֹת לָבֶן): ὑπὲρ τῶν κρυφίων τοῦ υἱοῦ: *pro oculis filii*) is the title of Ps. ix., which has given rise to infinite conjecture. Two difficulties in connection with it have to be resolved: first, to determine the true reading of the Hebrew, and then to ascertain its meaning. Neither of these points has been satisfactorily explained. It is evident that the LXX. and Vulgate must have read עַל מוֹתָר, "concerning the mysteries," and so the Arabic and Ethiopic versions. The Targum, Synmachus,<sup>a</sup> and Jerome,<sup>b</sup> in his translation of the Hebrew, adhered to the received text, while Aquila,<sup>c</sup> retaining the consonants as they at present stand, read *al-nuth* as one word, עַל מוֹתָר, "youth," which would be the regular form of the abstract noun, though it does not occur in Biblical Hebrew. In support of the reading עַל מוֹתָר as one word, we have the authority of 28 of Kennicott's MSS., and the assertion of Jarchi that he had seen it so written, as in Ps. xlviii. 14, in the Great Masorah. If the reading of the Vulgate and LXX. be correct with regard to the consonants, the words might be pointed thus, עַל מוֹתָר, 'al 'alāmōth, "upon Alamoth," as in the title of Ps. xlvi., and לָבֶן is

possibly a fragment of לִבְנֵי לֹרַח, *libnē Korach*, "for the sons of Korah," which appears in the same title. At any rate, such a reading would have the merit of being intelligible, which is more than can be said of most explanations which have been given. But if the Masoretic reading be the true one, it is hard to attach any meaning to it. The Targum renders the title of the Psalm, — "on the death of the man who came forth from between (בֵּין) the camps," alluding to Goliath, the Philistine champion (אִישׁ תְּבַיְנִים, 1 Sam. xvii. 4). That David composed the psalm as a triumphal song upon the slaughter of his gigantic adversary was a tradition which is mentioned by Kimchi merely as an *ad dit.* Others render it "on the death of the son," and apply it to Absalom; but, as Jarchi remarks, there is nothing in the character of the psalm to warrant such an application. He mentions another interpretation, which appears to have commended itself to Grotius and Hengstenberg, by which *labben* is an anagram of *nabal*, and the psalm is referred to the death of Nabal, but the Rabbinical commentator had the good sense to reject it as untenable, though there is as little to be said in favor of his own view. His words are — "but I say that this song is of the future to come, when the childhood and youth of Israel shall be made white (וְיִלְבֶּן), and their righteousness be revealed and their salvation draw nigh, when Esau and his seed shall be blotted out." He takes עַל מוֹתָר as one word, signifying "youth," and לָבֶן = לְלָבֶן = "to whiten." Menahem, a commentator quoted by Jarchi, interprets the title as addressed "to the musician upon the stringed instruments called Alamoth, to instruct," taking לָבֶן as if it were לְחָבִין or לְבוֹנֵן. Donesh supposes that *labben* was the name of a man who warred with David in those days, and to whom reference is made as "the wicked" in verse 5. Arama (quoted by Dr. Gill in his *Exposition*) identifies him with Saul. As a last resource Kimchi suggests that the title was intended to convey instructions to the Levite minstrel Ben, whose name occurs in 1 Chr. xv. 18, among the temple choir, and whose brethren played "with psalteries on Alamoth." There is reason, however, to suspect that the reading in this verse is corrupt, as the name is not repeated with the others in verse 20. There still remain to be noticed the conjectures of Delitzsch, that Muth-labben denotes the tone or melody with the words of the song associated with it, of others that it was a musical instrument, and of Hupfeld that it was the commencement of an old song, either signifying "die for the son," or "death to the son." Hitzig and others regard it as an abbreviation containing a reference to Ps. xlviii. 14. The difficulty of the question is sufficiently indicated by the explanation which Gesenius himself (*Thes.* p. 741, a) was driven to adopt, that the title of the psalm signified that it was "to be chanted by boys with virgins' voices."

The renderings of the LXX. and Vulgate induced the early Christian commentators to refer

<sup>a</sup> sp among bushes, etc., and not thicker than whipcord. I was told it was a well-known condiment, and cultivated by the Arabs; it is the common wild *Sinapis Nigra*."

a Ἐπὶ θανάτου τοῦ υἱοῦ.

b Super morte filii

c Νεαρότητος τοῦ υἱοῦ.

the psalm to the Messiah. Augustine understands "the son" as "the only begotten son of God." The Syriac version is quoted in support of this interpretation, but the titles of the Psalms in that version are generally constructed without any reference to the Hebrew, and therefore it cannot be appealed to as an authority.

On all accounts it seems extremely probable that the title in its present form is only a fragment of the original, which may have been in full what has been suggested above. But, in the words of the Assembly's Annotations, "when all hath been said that can be said, the conclusion must be the same as before; that these titles are very uncertain things, if not altogether unknown in these days." W. A. W.

\* MUZZLE. [Ox.]

MYNDUS (Μύνδος), a town on the coast of CARIA, between MILETUS and HALICARNASSUS. The convenience of its position in regard to trade was probably the reason why we find in 1 Macc. xv. 23 that it was the residence of a Jewish population. Its ships were well known in very early times (Herod. v. 33), and its harbor is specially mentioned by Strabo (xiv. 658). The name still lingers in the modern *Mentesche*, though the remains of the city are probably at *Gumishlu*, where Admiral Beaufort found an ancient pier and other ruins. J. S. H.

MYRA (τὰ Μύρα [ointments: Vulg. *Lystra*]), an important town in LYCIA, and interesting to us as the place where St. Paul, on his voyage to Rome (Acts xxvii. 5), was removed from the Adramyttian ship which had brought him from Cæsarea, and entered the Alexandrian ship in which he was wrecked on the coast of Malta. [ADRAMYTTIUM.] The travellers had availed themselves of the first of these vessels because their course to Italy necessarily took them past the coasts of the province of ASIA (ver. 2), expecting in some harbor on these coasts to find another vessel bound to the westward. This expectation was fulfilled (ver. 6).

It might be asked how it happened that an Alexandrian ship bound for Italy was so far out of her course as to be at Myra. This question is easily answered by those who have some acquaintance with the navigation of the Levant. Myra is nearly due north of Alexandria, the harbors in the neighborhood are numerous and good, the mountains high and easily seen, and the current sets along the coast to the westward (Smith's *Voyage and Shipwreck of St. Paul*). Moreover, to say nothing of the possibility of landing or taking in passengers or goods, the wind was blowing about this time continuously and violently from the N. W. and the same weather which impeded the Adramyttian ship (ver. 4) would be a hindrance to the Alexandrian (see ver. 7; *Life and Epistles of St. Paul*, ch. xxiii.).

Some unimportant MSS. having *Ἀόστρα* in this passage, Grotius conjectured that the true reading might be *Ἀλύστρα* (Bentleii *Critica Sacra*, ed. A. A. Ellis). This supposition, though ingenious, is quite unnecessary. Both Limyra and Myra were well known among the maritime cities of Lycia. The harbor of the latter was strictly Andriace, distant from it between two and three miles, but the river was navigable to the city (Appian, *B. C.* iv. 82).

Myra (called *Dembra* by the Greeks) is remarkable still for its remains of various periods of history. The tombs, enriched with ornament, and many of them having inscriptions in the ancient Lycian character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Greek age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun with St. Paul's visit. It is reasonable to conjecture that this may have been a metropolitan church, inasmuch as we find that when Lycia was a province, in the later Roman empire, Myra was its capital (*Hierocl.* p. 684). In later times it was curiously called the port of the Adriatic, and visited by Anglo-Saxon travellers (*Early Travels in Palestine*, pp. 33, 138). Legend says that St. Nicholas, the patron saint of the modern Greek sailors, was born at PATARA, and buried at Myra, and his supposed relics were taken to St. Petersburg by a Russian frigate during the Greek revolution.

The remains of Myra have had the advantage of very full description by the following travellers: Leake, Beaufort, Fellows, Texier, and Spratt and Forbes. J. S. H.

MYRRH, the representative in the A. V. of the Hebrew words *Môr* and *Lôt*.

1. *Môr* (מֹר<sup>a</sup>: *σύβρυνα, στακτή, μύρρινος, κρόκος; myrrha, myrrhinus, myrrha*) is mentioned in Ex xxx. 23, as one of the ingredients of the "oil of holy ointment;" in Esth. ii. 12, as one of the substances used in the purification of women; in Ps. xlv. 8. Prov. vii. 17, and in several passages in Canticles, as a perfume. The Greek *σύνβρυνα* occurs in Matt. ii. 11 amongst the gifts brought by the wise men to the infant Jesus, and in Mark xv. 23, it is said that "wine mingled with myrrh" (*οἶνος ἐσμπυρισμένος*) was offered to, but refused by, our Lord on the cross. Myrrh was also used for embalming (see John xix. 39, and Herod. ii. 86). Various conjectures have been made as to the real nature of the substance denoted by the Hebrew *môr* (see Celsius, *Hierob.* i. 522); and much doubt has existed as to the countries in which it is produced. According to the testimony of Herodotus (iii. 107), Dioscorides (i. 77), Theophrastus (ix. 4, § 1), Diodorus Siculus (ii. 49), Strabo, Pliny, etc., the tree which produces myrrh grows in Arabia — Pliny (xii. 16) says, in different parts of Arabia, and asserts that there are several kinds of myrrh both wild and cultivated: it is probable that under the name of *myrrha* he is describing different resinous productions. Theophrastus, who is generally pretty accurate in his observations, remarks (ix. 4, § 1), that myrrh is produced in the middle of Arabia, around Saba and Adramytta. Some ancient writers, as Propertius (i. 2, 3) and Oppian (*Haliect.* iii. 403), speak of myrrh as found in Syria (see also Belon, *Observ.* ii. ch. 80); others conjecture India and Æthiopia; Plutarch (*Is. et Osir.* p. 383) asserts that it is produced in Egypt, and is there called *Bal*. "The fact," observes Dr. Royle (s. v. *Môr*, *Kitto's Cycl.*), "of myrrh being called *bal* among the Egyptians is extremely curious, for *bal* is the Sanscrit *bola*, the name for myrrh throughout India."<sup>b</sup>

It would appear that the ancients generally are

<sup>a</sup> From root מָרַר, "to drop."

<sup>b</sup> Plutarch, however, was probably in error, and

has confounded the Coptic *sal*, "myrrh," with *bal*, "an eye." See Jablonski, *Opusc.* i. 49, ed. te Water.

correct in what they state of the localities where myrrh is produced, for Ehrenberg and Hemprich have proved that myrrh is found in Arabia Felix, thus confirming the statements of Theophrastus and Pliny; and Mr. Johnson (*Travels in Abyssinia*, i. 249) found myrrh exuding from cracks in the bark of a tree in *Koran-hedulaa* in Adal, and Forskål mentions two myrrh-producing trees, *Amyris Katsf* and *Amyris Kafal*, as occurring near Haes in Arabia Felix. The myrrh-tree which Ehrenberg and Hemprich found in the borders of Arabia Felix, and that which Mr. Johnson saw in Abyssinia, are believed to be identical; the tree is the *Balsamodendron myrrha*, "a low, thorny, ragged-looking tree, with bright trifoliate leaves:" it is probably the *Murr* of Abu 'l Fadli, of which he says "murr is the Arabic name of a thorny tree like an acacia, from which flows a white liquid, which thickens and becomes a gum."

*Balsamodendron Myrrha.*

That myrrh has been long exported from Africa we learn from Arrian, who mentions *συβρυα* as one of the articles of export from the ancient district of Barbaria: the Egyptians perhaps obtained their myrrh from the country of the Troglodytes (Nubia), as the best wild myrrh-trees are said by Pliny (xii. 15) to come from that district. Pliny states also that "the Sabæi even cross the sea to procure it in the country of the Troglodytæ." From what Athenæus (xv. 689) says, it would appear that myrrh was imported into Egypt, and that the Greeks received it from thence. Dioscorides describes many kinds of myrrh under various names, for which see Sprengel's *Annotations*, i. 73, &c.

The *Balsamodendron myrrha*, which produces the myrrh of commerce, has a wood and bark which emit a strong odor; the gum which exudes from the bark is at first oily, but becomes hard by exposure to the air: it belongs to the natural order *Terebinthaceæ*. There can be little doubt that his tree is identical with the *Murr* of Abu 'l Fadli, the *συβρυα* of the Greek writers, the "stillata coriæ myrrha" of Ovid and the Latin writers, and *be môr* of the Hebrew Scriptures.

The "wine mingled with myrrh," which the Roman soldiers presented to our Lord on the cross,

was given, according to the opinion of some commentators, in order to render him less sensitive to pain; but there are differences of opinion on this subject, for which see GALL.

2. *Lôt* (לֹט " : *στακτή*: *stacte*), erroneously translated "myrrh" in the A. V. in Gen. xxxvii. 23, xliii. 11, the only two passages where the word is found, is generally considered to denote the odorous resin which exudes from the branches of the *Cistus creticus*, known by the name of *ladanum* or *labdanum*. It is clear that *lôt* cannot signify "myrrh," which is not produced in Palestine, yet the Scriptural passages in Genesis speak of this substance as being exported from Gilead into Egypt.

*Cistus Creticus.*

*Ladanum* was known to the early Greeks, for Herodotus (iii. 107, 112) mentions *λήδανον*, or *λάδανον*, as a product of Arabia, and says it is found "sticking like gum to the beards of he-goats, which collect it from the wood;" similar is the testimony of Dioscorides (i. 128), who says that the best kind is "odorous, in color inclining to green, easy to soften, fat, free from particles of sand and dirt: such is that kind which is produced in Cyprus, but that of Arabia and Libya is inferior in quality." There are several species of *Cistus*, all of which are believed to yield the gum *ladanum*: but the species mentioned by Dioscorides is in all probability identical with the one which is found in Palestine, namely, the *Cistus creticus* (Strand, *Flor. Palest.*

<sup>a</sup> From root לֹט, "to cover;" the gum covering the plant.

No. 289). The *C. ladaniferus*, a native of Spain and Portugal, produces the greatest quantity of the ladanum; it has a white flower, while that of the *C. creticus* is rose-colored. Tournefort (*Voyage*, i. 79) has given an interesting account of the mode in which the gum ladanum is gathered, and has figured the instrument commonly employed by the people of Candia for the purpose of collecting it. There can be no doubt that the Hebrew *kit*, the Arabic *ladan*, the Greek *λάδανον*, the Latin and English *ladanum*, are identical (see Rosenmüller, *Bib. Bot.* p. 158; Celsius, *Hierob.* i. 288). Ladanum was formerly much used as a stimulant in medicine, and is now of repute amongst the Turks as a perfume.

The Cistus belongs to the Natural order *Cistaceae*, the Rock-rose family. W. H.

**MYRTLE** (דַּוְדָּה,<sup>a</sup> *hadās*: *μυρσίνη*, *ῥπος*:<sup>b</sup> *myrtus*, *myrtetum*). There is no doubt that the A. V. is correct in its translation of the Hebrew word, for all the old versions are agreed upon the point, and the identical noun occurs in Arabic — in the dialect of Yemen, S. Arabia — as the name of the “myrtle.”<sup>c</sup>

Mention of the myrtle is made in Neh. viii. 15; Is. xli. 19, lv. 13; Zech. i. 8, 10, 11. When the Feast of Tabernacles was celebrated by the Jews on

*Myrtus communis*

the return from Babylon, the people of Jerusalem were ordered to “go forth unto the mount and fetch olive-branches, and pine-branches, and myrtle-branches, and to make booths.” The prophet Isaiah foretells the coming golden age of Israel, when the Lord shall plant in the wilderness “the shittah-tree and the myrtle-tree and the oil-tree.” The modern Jews still adorn with myrtle the booths and sheds at the Feast of Tabernacles. Myrtles (*Myrtus communis*) will grow either on hills or in valleys, but it is in the latter locality where they

<sup>a</sup> The derivation of this word is uncertain; but see the Hebrew Lexicons.

<sup>b</sup> The LXX. reading *הדדד*, instead of *הדדס*.

attain to their greatest perfection. Formerly, as we learn from Nehemiah (viii. 15), myrtles grew on the hills about Jerusalem. “On Olivet,” says Prof. Stanley, “nothing is now to be seen but the olive and the fig tree:” on some of the hills, however, near Jerusalem, Hasselquist (*Trav.* 127, Lond. 1766) observed the myrtle. Dr. Hooker says it is not uncommon in Sanaria and Galilee. Irby and Mangles (p. 222) describe the rivers from Tripoli towards Galilee as having their banks covered with myrtles (see also Kitto, *Phys. Hist. of Palest.* p. 268).

The myrtle (*hadās*) gave her name to Hadassah or Esther (Esth. ii. 7); the Greek names *Myrtilus*, *Myrtoëssa*, etc., have a similar origin. There are several species of the genus *Myrtus*, but the *Myrtus communis* is the only kind denoted by the Hebrew *hadās*: it belongs to the natural order *Myrtaceae*, and is too well known to need description. W. H.

\* The myrtle is found very widely distributed through Mt. Lebanon, and on the whole sea-coast. I have collected it as far north as the plain of *Lattakieh*. The black berries are eaten in Syria.

The bush is known by the two names of *أس*, *Rihân*, *ريحان*. The dried leaves of this plant are employed by the natives as a stuffing for the beds of children, with the idea that their odor is promotive of health, and that they keep off vermin. G. E. P.

**MY'SIA** (*Μυσία*). If we were required to fix the exact limits of this northwestern district of Asia Minor, a long discussion might be necessary. But it is mentioned only once in the N. T. (Acts xvi. 7, 8), and that cursorily and in reference to a passing journey. St. Paul and his companions, on the second missionary circuit, were divinely prevented from staying to preach the Gospel either in ASIA or BITHYNIA. They had then come *κατὰ τὴν Μυσίαν*, and they were directed to Troas, *παρελθόντες τὴν Μυσίαν*; which means either that they skirted its border, or that they passed through the district without staying there. In fact the best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense. Winer compares it, in this point of view, to such German terms as Suabia, Breisgau, etc. Illustrations nearer home might be found in such districts as Craven in Yorkshire or Appin in Argyllshire. ASSOS and ADRAMYTTIUM were both in Mysia. Immediately opposite was the island of Lesbos. [MITYLENE.] TROAS, though within the same range of country, had a small district of its own, which was viewed as politically separate. J. S. H.

\* **MYSTERY** (*μυστήριον*). The origin and etymological import of the Greek word (*μυστήριον*) are partially involved in doubt. Its claims to a Hebrew derivation, though plausible, are undoubtedly to be rejected. It evidently stands connected with *μύστης*, one initiated, namely, into the mys-

<sup>g</sup> *هَدَس* (Heb. דַּוְדָּה). *Myrtus idiomata Arabiae Felicis*. KAWZS (Freytag, *Ar. Lex.* s. v. <sup>h</sup>)

N.

eries, and thus with *μύω*, to initiate. This verb again is probably from *μύω* (*μύω*) to close, to shut, but whether the eyes, or the mouth, seems uncertain. If the former, the *μύστης* may either be one who voluntarily closes his bodily eyes that the eye of his spirit may be opened, or one who closes them as it were in death, the initiated being regarded as dead to the world of sense, and living only in the world of unseen realities. If the latter, he may be denominated either from whispering secrets with compressed lips, or from taking the vow of perpetual silence and secrecy, symbolized by the sealed mouth. Whichever be the precise explanation, the etymology of *μυστήριον* links it first naturally with religious doctrines and symbols, and secondly with truths hidden from the natural sense, and from the merely natural reason. It points to facts which need a revelation (*ἀποκάλυψις*), and which revelation may be made either by the sole internal influence of the Spirit, or by this conjointly with the progress of outward events. But while the *μυστήριον* thus implies something hidden, and inaccessible to the unaided reason, and usually also of weighty import, it by no means necessarily denotes anything strictly mysterious and incomprehensible. The fact or truth, though requiring to be revealed, may, when revealed, be of a very elementary character. It may be very adequately made known, and the sole condition of the reception of the knowledge is a spiritual mind; to the animal (*ψυχικός*) man the outward revelation is of course made in vain (1 Cor. ii. 14).

That such is the New Testament meaning of *μυστήριον*, namely, a hidden truth unveiled, but not unknowable, may be abundantly demonstrated. Thus Paul speaks of "knowing all mysteries" (1 Cor. xiii. 2), and prays that the Colossians may come into the "recognition of the mysteries of Christ" (Col. ii. 2). Our Lord declares to his disciples that to them it is given "to know the mysteries of the kingdom of God" (Matt. xiii. 11; Mark iv. 11); and even the person speaking with tongues, who "with the spirit speaketh mysteries" (1 Cor. xiv. 2), utters what is unintelligible indeed to others, but not to himself.

The word is applied in the New Testament to the doctrines and facts of the Gospel, as formerly hidden, but now unveiled both by outward facts and spiritual communications. The kingdom of heaven (Matt. xiii. 11), the doctrine of the cross (1 Cor. i. 18, ii. 7), the resurrection of the dead (1 Cor. xv. 51), are the great New Testament "mysteries." In fact the entire life of our Lord in its various cardinal features is the actual unveiled "great" mystery of godliness (1 Tim. iii. 16). Special mysteries are also the divine purpose in the partial hardening of Israel (Rom. xi. 25), and the admission of the Gentiles to co-heirship with the Jews (Eph. iii. 5, 6). In accordance too with the etymology of the word, it applies naturally to the hidden import of parables and symbols, which, as partly veiling the truths they set forth, demand a divine elucidation. Thus the hidden sense of the Saviour's parables (Matt. xiii. 11); the import of the seven stars and seven candlesticks (Rev. i. 20); and of the woman clothed in scarlet (Rev. xvii. 7); the deeper significance of marriage as symbolizing the union of Christ and His Church (Eph. v. 32), are illustrations of this use of the term.

A. C. K.

NA'AM (נְאֻם) [*pleasantness, grace*]: *No'ua* [Alex. *Naaμ*:] *Naham*. One of the sons of Caleb the son of Jephunneh (1 Chr. iv. 15).

NA'AMAH (נְעֻמָּה) [*pleasing, lovely*]. 1. (*Noemud*: *Noëma*.) One of the four women whose names are preserved in the records of the world before the Flood; all except Eve being Cainites. She was daughter of Lamech by his wife Zillah, and sister, as is expressly mentioned, to Tubal-cain (Gen. iv. 22 only). No reason is given us why these women should be singled out for mention in the genealogies; and in the absence of this most of the commentators have sought a clew in the significance of the names interpreted as Hebrew terms; endeavoring, in the characteristic words of one of the latest Jewish critics, by "due energy to strike the living water of thought even out of the rocky soil of dry names" (Kalisch, *Genesis*, p. 149). Thus Naamah, from *Na'am*, "sweet, pleasant," signifies, according to the same interpreter "the lovely beautiful woman," and this and other names in the same genealogy of the Cainites are interpreted as tokens that the human race at this period was advancing in civilization and arts. But not only are such deductions at all times hazardous and unsatisfactory, but in this particular instance it is surely begging the question to assume that these early names are Hebrew; at any rate the *onus probandi* rests on those who make important deductions from such slight premises. In the Targum Pseudojonathan, Naamah is commemorated as "the mistress of lamenters and singers;" and in the Samaritan Version her name is given as Zalkipha.

2. ([Rom. *Naaμd*, *Naavn*, *Noomud*; Vat. in 1 K. xiv. 21] *Maaxamu*; Alex. *Naaμα*, *Noomua*; Joseph. *Noomās*: *Naama*.) Mother of king Rehoboam (1 K. xiv. 21, 31; 2 Chr. xii. 13). On each occasion she is distinguished by the title "the (not 'an,' as in A. V.) Ammonite." She was therefore one of the foreign women whom Solomon took into his establishment (1 K. xi. 1). In the LXX. (1 K. xii. 24, answering to xiv. 31 of the Hebrew text) she is stated to have been the "daughter of Ana (*i. e.* Hanun) the son of Nahash." If this is a translation of a statement which once formed part of the Hebrew text, and may be taken as authentic history, it follows that the Ammonite war into which Hanun's insults had provoked David was terminated by a re-alliance; and, since Solomon reigned forty years, and Rehoboam was forty-one years old when he came to the throne, we can fix with tolerable certainty the date of the event. It took place before David's death, during that period of profound quiet which settled down on the nation, after the failure of Absalom's rebellion and of the subsequent attempt of Sheba the son of Bichri had strengthened more than ever the affection of the nation for the throne of David; and which was not destined to be again disturbed till put an end to by the shortsighted rashness of the son of Naamah.

G.

NA'AMAH (נְאֻמָּה) [*lovely*]: *Naaμn*; Alex. *Noμα*: *Naama*), one of the towns of Judah in

\* The LXX. transpose this to ch. xii. after ver. 26

the district of the lowland or *Shefelah*, belonging to the same group with Lachish, Eglon, and Makedah (Josh. xv. 41). Nothing more is known of it, nor has any name corresponding with it been yet discovered in the proper direction. But it seems probable that Naamah should be connected with the Naamathites, who again were perhaps identical with the Mehunim or Mineans, traces of whom are found on the southwestern outskirts of Judah; one such at Minois or *el-Minyay*, a few miles below Gaza. G.

**NA'AMAN** (נַאֲמָן [*pleasantness, grace*]: נַאֲמָן; N. T. Rec. Text, *Νεεμάν*, but Lachm. [Tisch. Treg.] with [Sin.] A B D, *Ναυμάν*; Joseph. *Ναυμος* [*Naamani*]) — or to give him the title conferred on him by our Lord, "Naaman the Syrian." An Aramite warrior, a remarkable incident in whose life is preserved to us through his connection with the prophet Elisha. The narrative is given in 2 K. v.

The name is a Hebrew one, and that of ancient date (see the next article), but it is not improbable that in the present case it may have been slightly altered in its insertion in the Israelite records. Of Naaman the Syrian there is no mention in the Bible except in this connection. But a Jewish tradition, at least as old as the time of Josephus (*Ant.* viii. 15, § 5), and which may very well be a genuine one, identifies him with the archer whose arrow, whether at random or not, struck Ahab with his mortal wound, and thus "gave deliverance to Syria." The expression is remarkable — "because that by him Jehovah had given deliverance to Syria." To suppose the intention to be that Jehovah was the universal ruler, and that therefore all deliverance, whether afforded to his servants or to those who, like the Syrians, acknowledged Him not, was wrought by Him, would be thrusting a too modern idea into the expression of the writer. Taking the tradition above-mentioned into account, the most natural explanation perhaps is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the particular exploit referred to was, it had given Naaman a great position at the court of Benhadad. In the first rank for personal prowess and achievements, he was commander-in-chief of the army, while in civil matters he was nearest to the person of the king, whom he accompanied officially, and supported, when the king went to worship in the Temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied cure. In Israel, according to the enactments of the Mosaic Law, this would have cut off even Naaman from intercourse with every one; he would there have been compelled to dwell in a "several house." But not so in Syria; he maintained his access to the king, and his contact with the members of his own household. The circumstances of his visit to Elisha have been drawn out under the latter head [vol. i. p. 718], and need not be repeated here. Naaman's appearance throughout the occurrence is most character-

istic and consistent. He is every inch a soldier ready at once to resent what he considers as a slight cast either on himself or the natural glories of his country, and blazing out in a moment into sudden "rage," but calmed as speedily by a few good-humored and sensible words from his dependants, and, after the cure has been effected, evincing a thankful and simple heart, whose gratitude knows no bounds and will listen to no refusal.

His request to be allowed to take away two mules' burden of earth is not easy to understand. The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Aceldama for the Campo Santo at Pisa, and in obedience to which the pilgrims to Mecca are said to bring back stones from that sacred territory, the grateful convert to Jehovah wished to take away some of the earth of his country, to form an altar for the burnt-offering and sacrifice which henceforth he intended to dedicate to Jehovah only, and which would be inappropriate if offered on the profane earth of the country of Rimmon or Hadad. But it should be remembered that in the narrative there is no mention of an altar; and although Jehovah had on one occasion ordered that the altars put up for offerings to Him should be of earth (Ex. xx. 24), yet Naaman could hardly have been aware of this enactment, unless indeed it was a custom of older date and wider existence than the Mosaic law, and adopted into that law as a significant and wise precept for some reason now lost to us.

How long Naaman lived to continue a worshipper of Jehovah while assisting officially at that of Rimmon, we are not told. When next we hear of Syria, another, Hazael, apparently holds the position which Naaman formerly filled. But, as has been elsewhere noticed, the reception which Elisha met with on this later occasion in Damascus probably implies that the fame of "the man of God," and of the mighty Jehovah in whose name he wrought, had not been forgotten in the city of Naaman.

It is singular that the narrative of Naaman's cure is not found in the present text of Josephus. Its absence makes the reference to him as the slayer of Ahab, already mentioned, still more remarkable.

It is quoted by our Lord (Luke iv. 27) as an instance of mercy exercised to one who was not of Israel, and it should not escape notice that the reference to this act of healing is recorded by none of the Evangelists but St. Luke the physician. G.

**NA'AMAN** (נַאֲמָן [*amenity, pleasantness*]: *Νοεμάν*; [in Num., Alex. *Νοεμα*, Vat. omits; in 1 Chr., *Νοαμά*, *Νοομά*; Vat. *Νοομα*; Alex. in ver. 4, *Νααμαν*; *Naaman*, in Num. *Νοεμαν*]). One of the family of Benjamin who came down to Egypt with Jacob, as we read in Gen. xli. 21. According to the LXX. version of that passage he was the son of Bela, which is the parentage assigned to him in Num. xxvi. 40, where, in the

<sup>a</sup> LXX. εὐστόχος, i. e. "with good aim," possibly a transcriber's variation from εὐρύχως.

<sup>b</sup> It did drive a king into strict seclusion (2 Chr. xvi. 21).

<sup>c</sup> The A. V. of ver. 4 conveys a wrong impression. It is accurately "one went in," but "he (i. e.

Naaman) went in and told his master" (i. e. the king). The word rendered "lord" is the same as is rendered "master" in ver. 1.

<sup>d</sup> The LXX. (Vat. MSS.) omits even the words "of earth," ver. 17.

enumeration of the sons of Benjamin, he is said to be the son of Bela, and head of the family of the Naamites. He is also reckoned among the sons of Bela in 1 Chr. viii. 3, 4. Nothing is known of his personal history, or of that of the Naamites. For the account of the migrations, apparently compulsory, of some of the sons of Benjamin from Geba to Manahath, in 1 Chr. viii. 6, 7, is so confused, probably from the corruption of the text, that it is impossible to say whether the family of Naaman was or was not included in it. The repetition in ver. 7 of the three names Naaman, Ahiah, Gera, in a context to which they do not seem to belong, looks like the mere error of a copyist, inadvertently copying over again the same names which he had written in the same order in ver. 4, 5—Naaman, Ahoah, Gera. If, however, the names are in their place in ver. 7, it would seem to indicate that the family of Naaman did migrate with the sons of Ehud (called *Abihud* in ver. 3) from Geba to Manahath. A. C. H.

NA'AMATHITE (נַעֲמַתִּית) [patr. as below]:

*Mivaiwv* [Vat. Sin. *Μειβαιων*] βασιλεύς, δ *Mivaios* [Vat. Méc.]: *Naamathites*, the gentilic name of one of Job's friends, Zophar the Naamathite (Job ii. 11, xi. 1, xx. 1, xlii. 9). There is no other trace of this name in the Bible, and the town, נַעֲמַת, whence it is derived, is unknown. If we may judge from modern usage, several places so called probably existed on the Arabian borders of Syria. Thus in the Geographical Dictionary, *Marsid el-Italia*, are Noam, a castle in the Yemen, and a place on the Euphrates; Niameh, a place belonging to the Arabs; and Noamee, a valley in Tihameh. The name Naamán (of unlikely derivation however) is very common. Bochart (*Phaleg*, cap. xxii.), as might be expected, seizes the LXX. reading, and in the "king of the Minæi" sees a confirmation to his theory respecting a Syrian, or northern Arabian settlement of that well-known people of classical antiquity. It will be seen, in art. DIKLA, that the present writer identifies the Minæi with the people of Ma'een, in the Yemen; and there is nothing improbable in a northern colony of the tribe, besides the presence of a place so named in the Syro-Arabian desert. But we regard this point as apart from the subject of this article, thinking the LXX. reading, unsupported as it is, to be too hypothetical for acceptance.

E. S. P.

NA'AMITES, THE (נַעֲמִיתִים): Samar.

הַנְּעִמִּי [the lovely one]: δῆμος δ *Noemaví* [Vat. -vet], Alex. omits: *fumilia Naamitarum*, and *Noemantiarum*, the family descended from NAAMAN, the grandson of Benjamin (Num. xxvi. 40 only). [NAAMAN, p. 2048 b.] The name is a contraction, of a kind which does not often occur in Hebrew. Accordingly the Samaritan Codex, as will be seen above, presents it at length—"the Naamanites."

G.

NA'ARAH (נַעֲרָה) [*maiden*]: Θεοῦδα [rather Αῶδα]; Alex. *Noopá: Naara*, the second wife of Ashur, a descendant of Judah (1 Chr. iv. 5, 6).

Nothing is known of the persons (or places) recorded as the children of Naarah. In the Vat. LXX. the children of the two wives are interchanged. [Rather, in ver. 5 the names of the two wives are transposed. A.]

NA'ARAI (נַעֲרָי) [*Jehovah reveals?*]. *Naarai*; [Alex. *Noopa:*] *Naarai*. One of the valiant men of David's armies (1 Chr. xi. 37). In 1 Chr. he is called the son of Ezbai, but in 2 Sam. xxiii. 35 he appears as "Paarai the Arbitrator." Ken-nicott (*Diss.* pp. 209-211) decides that the former is correct.

NA'ARAN (נַעֲרָן) [*boyish, juvenile*, Ges.]: [Rom. *Noarav*; Vat.] *Naarvan*; Alex. *Naarav: Noran*, a city of Ephraim, which in a very ancient record (1 Chr. vii. 28) is mentioned as the eastern limit of the tribe. It is very probably identical with NAARATH, or more accurately Naarah, which seems to have been situated in one of the great valleys or torrent-beds which lead down from the highlands of Bethel to the depths of the Jordan valley.

In 1 Sam. vi. 21 the Peshito-Syriac and Arabic versions have respectively Naarin and Naaran for the Kirjath-jearim of the Hebrew and A. V. If this is anything more than an error, the Naaran to which it refers can hardly be that above spoken of, but must have been situated much nearer to Bethshemesh and the Philistine lowland. G.

NA'ARATH (the Heb. נַעֲרָתָה) = to

Naarah, נַעֲרָה, [*maiden*]: which is therefore the real form of the name: αἱ α̅ κῶμαι ἀνθῶν; Alex. *Naaraba kai ai kōmai antōn: Naratha*, a place named (Josh. xvi. 7, only) as one of the landmarks on the (southern) boundary of Ephraim. It appears to have lain between Ataroth and Jericho. If Ataroth be the present *Atara*, a mile and a half south of *el-Bireh* and close to the great natural boundary of the *Wady Suweinit*, then Naarah was probably somewhere lower down the wady. Eusebius and Jerome (*Onomast.*) speak of it as if well known to them—"Naorath, a small village of the Jews five miles from Jericho." Schwarz (147) fixes it at "Neama," also "five miles from Jericho," meaning perhaps *Naimah*, the name of the lower part of the great *Wady Mutyah* or *el-Asas*, which runs from the foot of the hill of *Rūmmun* into the Jordan valley above Jericho, and in a direction generally parallel to the *Wady Suweinit* (Rob. *Bibl. Res.* iii. 290). A position in this direction is in agreement with 1 Chr. vii. 28, where NAARAN is probably the same name as that we are now considering. G.

NAASH'ON, Ex. vi. 23. [NAHSHON.]

NAAS'SON (*Naassōn: Naasson*). The Greek form of the name NAHSHON (Matt. i. 4; Luke iii. 32 only).

NA'ATHUS (*Náathos*; [Vat. *Λαθος*]: *Nathus*). One of the family of Addi, according to the list of 1 Esdr. ix. 31. There is no name corresponding in Ezr. x. 30.

NAB'AL (נַבָּל) = fool: Ναβάλ, one of the

α Perhaps treating נַעֲרָה, "a damsel" as equivalent to בַּת, "a daughter," the term commonly used to express the hamlets dependent on a city.

β The 'Oopáth in the present text of Eusebius should obviously have prefixed to it the ν from the εστιν which precedes it. [The edition of Larsow and Pav they reads Noopáth.] Compare NASOR.

character introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxv.). Nabal himself is remarkable as one of the few examples given to us of the private life of a Jewish citizen. He ranks in this respect with BOAZ, BARZILLAI, NABOTH. He was a sheep-master on the confines of Judæa and the desert, in that part of the country which bore from its great conqueror the name of CALEB (1 Sam. xxx. 14, xxv. 3; so Vulgate, A. V., and Ewald). He was himself, according to Josephus (*Ant.* vi. 13, § 6), a Ziphite, and his residence Emmaus, a place of that name not otherwise known, on the southern Carmel, in the pasture lands of Maon. (In the LXX. of xxv. 4 he is called "the Carmelite," and the LXX. read "Maon" for "Paran" in xxv. 1.) With a usage of the word, which reminds us of the like adaptation of similar words in modern times, he, like Barzillai, is styled "very great," evidently from his wealth. His wealth, as might be expected from his abode, consisted chiefly of sheep and goats, which, as in Palestine at the time of the Christian era (*Matt.* xxv.), and at the present day (*Stanley, S. & P.*), fed together. The tradition preserved in this case the exact number of each — 3000 of the former, 1000 of the latter. It was the custom of the shepherds to drive them into the wild downs on the slopes of Carmel; and it was whilst they were on one of these pastoral excursions, that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (xxv. 7, 15, 16). Once a year there was a grand banquet, on Carmel, when they brought back their sheep from the wilderness for shearing — with eating and drinking "like the feast of a king" (xxv. 2, 4, 36).

It was on one of these occasions that Nabal came across the path of the man to whom he owes his place in history. Ten youths were seen approaching the hill; in them the shepherds recognized the slaves or attendants of the chief of the freebooters who had defended them in the wilderness. To Nabal they were unknown. They approached him with a triple salutation — enumerated the services of their master, and ended by claiming, with a mixture of courtesy and defiance, characteristic of the East, "whatever cometh into thy hand for thy servants (LXX. omit this — and have only the next words), and for thy son David." The great sheep-master was not disposed to recognize this unexpected parental relation. He was a man notorious for his obstinacy (such seems the meaning of the word translated "churlish") and for his general low conduct (xxv. 3, "evil in his doings"; xxv. 17, "a man of Belial"). Josephus and the LXX. taking the word *Caleb* not as a proper name, but as a quality (to which the context certainly lends itself) — add "of a disposition like a dog" — cynical — *κυνικός*. On hearing the demand of the ten petitioners, he sprang up (LXX. *ἀνεπήδησε*), and broke out into fury, "Who is David? and who is the son of Jesse?" — "What runaway slaves are these to interfere with my own domestic arrangements?" (xxv. 10, 11). The moment that the messengers were gone, the shepherds that stood by perceived the danger that their master and themselves would incur. To Nabal himself they durst not speak (xxv. 17). But the sacred writer, with a tinge of the sentiment which such a contrast always suggests, proceeds to describe that this brutal

ruffian was married to a wife as beautiful and as wise, as he was the reverse (xxv. 3). [ABIGAIL.] To her, as to the good angel of the household, one of the shepherds told the state of affairs. She, with the offerings usual on such occasions (xxv. 18, comp. xxx. 11, 2 Sam. xvi. 1, 1 Chr. xii. 40), loaded the asses of Nabal's large establishment — herself mounted one of them, and, with her attendants running before her, rode down the hill toward David's encampment. David had already made the fatal vow of extermination, couched in the usual terms of destroying the household of Nabal, so as not even to leave a dog behind (xxv. 22). At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and poured forth her petition in language which both in form and expression almost assumes the tone of poetry: — "Let thine handmaid, I pray thee, speak in thine audience, and hear the words of thine handmaid." Her main argument rests on the description of her husband's character, which she draws with that mixture of playfulness and seriousness which above all things turns away wrath. His name here came in to his rescue. "As his name is, so is he: Nabal [*fool*] is his name, and folly is with him" (xxv. 25; see also ver. 26). She returns with the news of David's recantation of his vow. Nabal is then in, at the height of his orgies. Like the revellers of Palestine in the later times of the monarchy, he had drunk to excess, and his wife dared not communicate to him either his danger or his escape (xxv. 36). At break of day she told him both. The stupid reveller was suddenly roused to a sense of that which impended over him. "His heart died within him, and he became as a stone." It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, "and the Lord smote Nabal, and he died" (xxv. 37, 38). The suspicions entertained by theologians of the last century, that there was a conspiracy between David and Abigail to make away with Nabal for their own alliance (see "Nabal" in Winer's *Realw.* ii. 129), have entirely given place to the better spirit of modern criticism, and it is one of the many proofs of the reverential, as well as truthful appreciation of the Sacred Narrative now inaugurated in Germany, that Ewald enters fully into the feeling of the narrator, and closes his summary of Nabal's death, with the reflection that "it was not without justice regarded as a Divine judgment." According to the (not improbable) LXX. version of 2 Sam. iii. 33, the recollection of Nabal's death lived afterwards in David's memory to point the contrast of the death of Abner: "Died Abner as Nabal died?" A. P. S.

NABARI'AS (*Ναβαρίας* [Vat. -*pei*]: *Nabarius*). Apparently a corruption of Zechariah (1 Esdr. ix. 44; comp. Neh. viii. 4).

NABATHITES, THE (*οἱ Ναβαθαῖοι*, and *Ναβαθαῖοι*; [Sin. in v. 25, *οἱ ἀναβαθαῖοι*]; Alex. [in ix. 35] *Ναβαθαῖοι*: *Nabuthai*), 1 Macc. v. 25; ix. 35. [NEBATHOTH.]

NABOTH (*נָבוֹת* [*fruits, productions*]: *Ναβοθαῖ*), victim of Ahab and Jezebel. He was a Jezreelite, and the owner of a small portion of ground (2 K. ix. 25, 26) that lay on the eastern slope of the hill of Jezreel. He had also a vineyard, of which the situation is not quite certain. According to the Hebrew text (1 K. xxi. 1) it was in Jezreel, but the LXX. render the *ῥῆμα* clause differently, omitting the words "ἐν τῷ ἔλαιον" was in

Jezebel," and reading instead of "the palace," the *threshing-floor* of Ahab king of Samaria." This points to the view, certainly most consistent with the subsequent narrative, that Naboth's vineyard was on the hill of Samaria, close to the "threshing-floor" (the word translated in A. V. "void place") which undoubtedly existed there, hard by the gate of the city (1 K. xxiv.). The royal palace of Ahab was close upon the city wall at Jezebel. According to both texts it immediately adjoined the vineyard (1 K. xxi. 1, 2, Heb.; 1 K. xx. 2, LXX.; 2 K. ix. 30, 36), and it thus became an object of desire to the king, who offered an equivalent in money, or another vineyard in exchange for this. Naboth, in the independent spirit of a Jewish landholder,<sup>a</sup> refused. Perhaps the turn of his expression implies that his objection was mingled with a religious scruple at forwarding the acquisitions of a half-heathen king; "Jehovah forbid it to me that I should give the inheritance of my fathers unto thee." Ahab was cowed by this reply; but the proud spirit of Jezebel was roused. She and her husband were apparently in the city of Samaria (1 K. xxi. 18). She took the matter into her own hands, and sent a warrant in Ahab's name and sealed with Ahab's seal, to the elders and nobles of Jezebel, suggesting the mode of destroying the man who had insulted the royal power. A solemn fast was proclaimed as on the announcement of some great calamity. Naboth was "set on high"<sup>b</sup> in the public place of Samaria; two men of worthless character accused him of having "cursed God and the king." He and his children (2 K. ix. 26), who else might have succeeded to his father's inheritance, were dragged out of the city and despatched the same night.<sup>c</sup> The place of execution there, as at Hebron (2 Sam. iii.), was by the large tank or reservoir, which still remains on the slope of the hill of Samaria, immediately outside the walls. The usual punishment for blasphemy was enforced. Naboth and his sons were stoned; their mangled remains were devoured by the dogs (and swine, LXX.) that prowled under the walls; and the blood from their wounds ran down into the waters of the tank below, which was the common bathing-place of the prostitutes of the city (comp. 1 K. xxi. 19, xxii. 38, LXX.). Josephus (*Ant.* viii. 15, § 6) makes the execution to have been at Jezebel, where he also places the washing of Ahab's chariot.

For the signal retribution taken on this judicial murder — a remarkable proof of the high regard paid in the old dispensation to the claims of justice and independence — see AHAB, JEHU, JEZEBEL, JEZREEL.

A. P. S.

NABUCHODONOSOR (*Ναβουχοδονό-*

*σορ*: *Nabuchodonosor*). Nebuchadnezzar king of Babylon (1 Esdr. i. 40, 41, 45, 48, [ii. 10, v. 7, vi. 15, 18, 26;] Tob. xiv. 15; Jud. i. 1, 5, 7, 11, 12 ii. 1, 4, 19, iii. 2, 8, iv. 1, vi. 2, 4, xi. [1, 4,] 7, 23, xii. 13, xiv. 18; [Bar. i. 9, 12; Esth. xi. 4.]

NA'CHON'S THRESHING-FLOOR

(*נָחֹן*): [Rom. *άλως Ναχώρ*; Vat.] *αλωσ Ωδαβ*; Alex. *αλωμωνος Ναχων*: *Areia Nachon*), the place at which the ark had arrived in its progress from Kirjath-jearim to Jerusalem, when Uzzah lost his life in his too hasty zeal for its safety (2 Sam. vi. 6). In the parallel narrative of Chronicles the name is given as CHIDON, which is also found in Josephus. After the catastrophe it received the name of Perez-uzzah. There is nothing in the Bible narrative to guide us to a conclusion as to the situation of this threshing-floor, — whether nearer to Jerusalem or to Kirjath-jearim. The words of Josephus (*Ant.* vii. 4, § 2), however, imply that it was close to the former.<sup>c</sup> Neither is it certain whether the name is that of the place or of a person to whom the place belonged. The careful Aquila translates the words — *εως αλωμος ετοιμης* — "to the prepared threshing-floor," which is also the rendering of the Targum Jonathan. G.

NA'CHOR. The form (slightly the more accurate) in which on two occasions the name elsewhere given as NAHOR is presented in the A. V.

1. (*נָחֹר*) [*piercer, slayer, Fürst; snorting*, Ges.]: *Ναχώρ*: *Nachor*.) The brother of Abraham (Josh. xxiv. 2). [NAHOR 1.]

Ch is commonly used in the A. V. of the Old Testament to represent the Hebrew נ, and only very rarely for נ, as in Nachor. Charashim, Rachel, Marchesvan, are further examples of the latter usage.

2. (*Ναχώρ*: [*Nachor*].) The grandfather of Abraham (Luke iii. 34). [NAHOR, 2.] G.

NADAB (*נָדָב*) [*noble, generous*: *Ναδάβ*: *Nadab*]. 1. The eldest son of Aaron and Elisheba, Ex. vi. 23; Num. iii. 2. He, his father and brother, and seventy old men of Israel were led out from the midst of the assembled people (Ex. xxiv. 1), and were commanded to stay and worship God "afar off;" below the lofty summit of Sinai, where Moses alone was to come near to the Lord. Subsequently (Lev. x. 1) Nadab and his brother [ABIHU] were struck dead before the sanctuary by fire from the Lord. Their offense was kindling the incense in their censers with "strange" fire, i. e., not taken from that which burned perpetually (Lev. vi. 13) on the altar. From the injunction given, Lev. x. 9, 10, immediately after their death, it has

<sup>d</sup> *שָׂמַח*. The word rendered "yesterday" in 2 K. ix. 26 has really the meaning of *yesternight*, and thus bears testimony to the precipitate haste both of the execution and of Ahab's entrance on his new acquisition. [See ELLIAB, vol. i. p. 706 b.]

<sup>c</sup> His words are, "Having brought the ark into Jerusalem" (*εις Ιεροσόλυμα*). In some of the Greek versions, or variations of the LXX., of which fragments are preserved by Bahrtdt, the name is given *η ελωσ* 'Ερνά (Ornan) του Ιεβουσαιου, identifying it with the floor of Araunah.

<sup>f</sup> As if from *נָחַן* to make ready. A similar rendering, *נָחַן* is employed in the Targum Joseph, of 1 Chr. xiii. 9, for the floor of Chidon

<sup>a</sup> Compare the cases of David and Araunah (2 Sam. xxiv.), Omri and Shemer (1 K. xvi.).

<sup>b</sup> The Hebrew word which is rendered, here only, "on high," is more accurately "at the head of" or "in the chiefest place among" (1 Sam. ix. 22). The passage is obscured by our ignorance of the nature of the ceremonial in which Naboth was made to take part; but, in default of this knowledge, we may accept the explanation of Josephus, that an assembly (*εκλησία*) was convened, at the head of which Naboth, in virtue of his position, was placed, in order that the charge of blasphemy and the subsequent catastrophe might be more telling.

<sup>c</sup> By the LXX. this is given *εὐλόγησε*, "blessed;" possibly merely for the sake of euphemism.

been inferred (Rosenmüller, *in loco*) that the brothers were in a state of intoxication when they committed the offense. The spiritual meaning of the injunction is drawn out at great length by Origen, *Hom. vii. in Levitic.* On this occasion, as if to mark more decidedly the divine displeasure with the offenders, Aaron and his surviving son were forbidden to go through the ordinary outward ceremonial of mourning for the dead.

2. [Rom. *Naβár*; Vat. *Naβαθ, Naβar*; Alex. *Naβar, Naβαδ*: *Nadab*.] King Jeroboam's son, who succeeded to the throne of Israel B. C. 954, and reigned two years, 1 K. xv. 25-31. Gibbethon in the territory of Dan (Josh. xix. 44), a Levitical town (Josh. xxi. 23), was at that time occupied by the Philistines, perhaps having been deserted by its lawful possessors in the general self-exile of the Levites from the polluted territory of Jeroboam. Nadab and all Israel went up and laid siege to this frontier-town. A conspiracy broke out in the midst of the army, and the king was slain by Baasha, a man of Issachar. Abijah's prophecy (1 K. xiv. 10) was literally fulfilled by the murderer, who proceeded to destroy the whole house of Jeroboam. So perished the first Israelitish dynasty.

We are not told what events led to the siege of Gibbethon, or how it ended, or any other incident in Nadab's short reign. It does not appear what ground Ewald and Newman have for describing the war with the Philistines as unsuccessful. It is remarkable that, when a similar destruction fell upon the family of the murderer Baasha twenty-four years afterwards, the Israelitish army was again engaged in a siege of Gibbethon, 1 K. xvi. 15.

3. [*Naδáβ*.] A son of Shammai, 1 Chr. ii. 28, 30, of the tribe of Judah.

4. [Vat. in 1 Chr. viii. 30, *Αδαδ*.] A son of Gibeon [rather, of Jehiel], 1 Chr. viii. 30, ix. 36, of the tribe of Benjamin. W. T. B.

**NADAB'ATHA** [Sin. *Γαβαδαν*; Rom.] Alex. *Naδaβáθ*: Syriac, *ܢܘܒܘܬ*, Nobot; *Madaba*, a place from which the bride was being conducted by the children of Jambri, when Jonathan and Simon attacked them (1 Macc. ix. 37). Josephus (*Ant.* xiii. 1, § 4) gives the name *Γαβαδθ*. Jerome's conjecture (in the Vulgate) can hardly be admitted, because Medeba was the city of the Jambrites (see ver. 36) to which the bride was being brought, not that from which she came. That Nadabatha was on the east of Jordan is most probable; for though, even to the time of the Gospel narrative, by "Chananites" — to which the bride in this case belonged — is signified Phœnicians, yet we have the authority (such as it is) of the Book of Judith (v. 3) for attaching that name especially to the people of Meab and Ammon; and it is not probable that when the whole country was in such disorder a wedding *cortége* would travel for so great a distance as from Phœnicia to Medeba.

On the east of Jordan the only two names that occur as possible are Nebo — by Eusebius and Jerome written Nabo and Nabau — and Nabathæa. Compare the lists of places round *es-Salt*, in Robinson, 1st ed. iii. 167-70. G.

**NAG'GE** (*Nayyal*), or, as some MSS. read, *Nayyal*, one of the ancestors of Christ (Luke iii. 35). It represents the Heb. *נֹגַח*, *Nogah* (*Nayyal*, LXX.), which was the name of one of David's

sons, as we read in 1 Chr. iii. 7. Nagge must have lived about the time of Onias I. and the commencement of the Macedonian dynasty. It is interesting to notice the evidence afforded by this name, both as a name in the family of David, and from its meaning, that, amidst the revolutions and conquests which overthrew the kingdoms of the nations, the house of David still cherished the hope, founded upon promise, of the revival of the splendor (*noyah*) of their kingdom. A. C. H.

**NA'HALAL** (*נְהַלֵּל*) [*perh. pasture*]: Σελλάδ; Alex. *Νααλωλ*: *Naalol*), one of the cities of Zebulun, given with its "suburbs" to the Merarite Levites (Josh. xxi. 35). It is the same which in the list of the allotment of Zebulun (Josh. xix. 15) is inaccurately given in the A. V. as *NAIALLAL*, the Hebrew being in both cases identical. Elsewhere it is called *NAHALOL*. It occurs in the list between Kattath and Shimron, but unfortunately neither of these places has yet been recognized. The Jerusalem Talmud, however (*Megillah*, ch. i.; *Maaser Sheni*, ch. v.), as quoted by Schwarz (172), and Reland (*Pal.* 717), asserts that Nahalal (or Mahalal, as it is in some copies) was in post-biblical times called Mahlul; and this Schwarz identifies with the modern *Mahlul*, a village in the plain of Esdraelon under the mountains which inclose the plain on the north, 4 miles west of Nazareth, and 2 of Japhia; an identification concurred in by Van de Velde (*Memoir*). One Hebrew MS. (30 K.) lends countenance to it by reading *נְהַלֵּל*, i. e. Mahalal, in Josh. xxi. 35. If the town was in the great plain we can understand why the Israelites were unable to drive out the Canaanites from it, since their chariots must have been extremely formidable as long as they remained on level or smooth ground.

**NA'HALLAL** (*נְהַלֵּל*) [*pasture*]: *Naβαδλ*; Alex. *Νααλωλ*: *Naalol*), an inaccurate mode of spelling, in Josh. xix. 15, the name which in Josh. xxi. 35, is accurately given as *NAHALAL*. The original is precisely the same in both. G.

**NAHA'LIEL** (*נְהַלִּיֵּל*) = *torrent* [or *valley*] of *God*; Samar. *נְהַלִּיֵּל*: [Vat.] *Μαβαήλ*; [Rom.] Alex. *Νααληήλ*: *Nahaliel*), one of the halting-places of Israel in the latter part of their progress to Canaan (Num. xxi. 19). It lay "beyond," that is, north of the Arnon (ver. 13), and between Mat-tanah and Bamoth, the next after Bamoth being Pisgah. It does not occur in the catalogue of Num. xxxiii., nor anywhere besides the passage quoted above. By Eusebius and Jerome (*Onomast.* "Nahaliel") it is mentioned as close to the Arnon. Its name seems to imply that it was a stream or wady, and it is not impossibly preserved in that of the *Wady Encheyle*, which runs into the *Mujeb*, the ancient Arnon, a short distance to the east of the place at which the road between Rabba and Aroer crosses the ravine of the latter river. The name *Encheyle*, when written in Hebrew letters (*נְהַלִּיֵּל*), is little more than *נְהַלִּיֵּל*, transposed. Burckhardt was perhaps the first to report this name, but he suggests the *Wady Wale* as the Nahliel (*Syria*, July 14). This, however, seems unnecessarily far to the north, and, in addition, retains no likeness to the original name. G.

**NAHALOL** (נָחָלוֹל) [*pasture*]: Δομαδί, Alex. Εραμμίαν; [Comp. Νααλωλ:] *Naalol*, a variation in the mode of giving the name (both in Hebrew and A. V.) of the place elsewhere called Nahalal. It occurs only in Judg. i. 30. The variation of the LXX. is remarkable. G.

**NA'HAM** (נָחָם) [*consolation*]: Ναχαμί; [Vat. Ναεμήθ; Alex. Ναχημέ:] *Nahum*. The brother of Hodiah, or Jehudijah, wife of Ezra, and father of Keilah and Eshtemoa (1 Chr. iv. 19).

**NAHAMANI** (נָחָמָנִי) [*compassionate*]: Ναεμανί; [Vat. Ναεμάνει:] FA. Νααμμάνει: *Nahmanani*. A chief man among those who returned from Babylon with Zerubbabel and Jeshua (Neh. vii. 7.) His name is omitted in Ezr. ii. 2, and in the parallel list of 1 Esdr. v. 8, is written **ENEMIOUS**.

**NA'HARAI** [3 syl.] (נָחָרַי) [*snorer*, Ges.]: Ναχαρά; Alex. Νααραί: *Naarai*. The armor-bearer of Joab, called in the A. V. of 2 Sam. xxiii. 37, **NAHARI**. [So in later editions, here and in 1 Chr. xi. 39, but not in the ed. of 1611 and other early editions.] He was a native of Beeroth (1 Chr. xi. 39).

**NA'HARI** (נָחָרַי) [*snorer*]: Γελωπέ; Alex. Γεδωπε; [Comp. Ναχαρά:] *Naharai*. The same as **NAHARAI**, Joab's armor-bearer (2 Sam. xxiii. 37). In the A. V. of 1611 the name is printed "**NAHARAI** the Berothite."

**NA'HASH** (נָחָשׁ) [*serpent*]. L. (*Nas*, but in 1 Chr. ix. 2 [Vat.] *Avas*; [Rom.] Alex. in both *Naas*: *Naas*.) "Nahash the Ammonite, king of the Bene-Ammon at the foundation of the monarchy in Israel, who dictated to the inhabitants of Jabesh-Gilead that cruel alternative of the loss of their right eyes or slavery, which roused the swift wrath of Saul, and caused the destruction of the whole of the Ammonite force (1 Sam. xi. 1, 2-11). According to Josephus (*Ant.* vi. 5, § 1) the siege of Jabesh was but the climax of a long career of similar a ferocity with which Nahash had oppressed the whole of the Hebrews on the east of Jordan, and his success in which had rendered him so self-confident that he despised the chance of relief which the men of Jabesh eagerly caught at. If, as Josephus (*ib.* § 3) also states, Nahash himself was killed in the rout of his army, then the Nahash who was the father of the foolish young king Hanun (2 Sam. x. 2; 1 Chr. xix. 1, 2) must have been his son. In this case, like Pharaoh in Egypt, and also perhaps like Benhadad, Achish, and Agag, in the kingdoms of Syria, Philistia, and Amalek, "Nahash" would seem to have been the title of the king of the Ammonites rather than the name of an individual.

However this was, Nahash the father of Hanun had rendered David some special and valuable service, which David was anxious for an opportunity of requiting (2 Sam. x. 2). No doubt this had been during his wanderings, and when, as the victim of Saul, the Ammonite king would naturally sym-

pathize with and assist him. The particulars of the service are not related in the Bible, but the Jewish traditions affirm that it consisted in his having afforded protection to one of David's brothers, who escaped alone when his family were massacred by the treacherous king of Moab, to whose care they had been entrusted by David (1 Sam. xxii. 3, 4), and who found an asylum with Nahash. (See the *Midrash* of R. Tanchum, as quoted by S. Jarchi on 2 Sam. x. 2.)

The retribution exacted by David for the annoying insults of Hanun is related elsewhere. [DAVID, vol. i. 561 b; JOAB, vol. ii. 1395 b; URIAH.] One casual notice remains which seems to imply that the ancient kindness which had existed between David and the family of Nahash had not been extinguished even by the horrors of the Ammonite war. When David was driven to Mahanaim, into the very neighborhood of Jabesh-Gilead, we find "Shobi the son of Nahash of Rabbah of the Bene-Ammon" (2 Sam. xvii. 27) among the great chiefs who were so forward to pour at the feet of the fallen monarch the abundance of their pastoral wealth, and that not with the grudging spirit of tributaries, but rather with the sympathy of friends, "for they said, the people is hungry and weary and thirsty in the wilderness" (ver. 29).

2. (*Nahas*.) A person mentioned only once (2 Sam. xvii. 25) in stating the parentage of Amasa, the commander-in-chief of Absalom's army. Amasa is there said to have been the son of a certain Ithra, by Abigail, "daughter of Nahash, and sister to Zeruah." By the genealogy of 1 Chr. ii. 16 it appears that Zeruah and Abigail were sisters of David and the other children of Jesse. The question then arises, How could Abigail have been at the same time daughter of Nahash and sister to the children of Jesse? To this three answers may be given:—

1. The universal tradition of the Rabbis that Nahash and Jesse were identical.<sup>a</sup> "Nahash," says Solomon Jarchi (in his commentary on 2 Sam. xvii. 25), "was Jesse the father of David, because he died without sin, by the counsel of the serpent" (*nachash*); i. e. by the infirmity of his fallen human nature only. It must be owned that it is easier to allow the identity of the two than to accept the reason thus assigned for it.

2. The explanation first put forth by Professor Stanley in this work (vol. i. 552 a), that Nahash was the king of the Ammonites, and that the same woman had first been his wife or concubine—in which capacity she had given birth to Abigail and Zeruah—and afterwards wife to Jesse, and the mother of his children. In this manner Abigail and Zeruah would be sisters to David, without being at the same time daughters of Jesse. This has in its favor the guarded statement of 1 Chr. ii. 16, that the two women were not themselves Jesse's children, but sisters of his children; and the improbability (otherwise extreme) of so close a connection between an Israelite and an Ammonite king is alleviated by Jesse's known descent from a Moabitess, and by the connection which has been shown above to have existed between David and Nahash of Ammon.

<sup>a</sup> The statement in 1 Sam. xii. 12 appears to be at variance with that of viii. 4, 5; but it bears a remarkable testimony to the dread entertained of the savage chief, in ascribing the adoption of monarchy by Israel to the panic caused by his approach.

<sup>b</sup> The whole expression seems to denote that he was an illegitimate son

<sup>c</sup> The Alex. LXX. regards Nahash as brother of Zeruah—*θυγάτηρ Ναας ἀδελφὸς Ζαρουίας*.

<sup>d</sup> See the extract from the Targum on Euth iv. 22 given in the note to Jesse, vol. ii. p. 1346 a. Also the citations from the Talmud in Meyer, *Seder Olam*, 569 also Jerome, *Quaest. Hebr.* ad loc.

3. A third possible explanation is that Nahash was the name not of Jesse, nor of a former husband of his wife, but of his wife herself. There is nothing in the name to prevent its being borne equally by either sex, and other instances may be quoted of women who are given in the genealogies as the daughters, not of their fathers, but of their mothers: e. g. Mehetabel, daughter of Matred, daughter of Mezahab. Still it seems very improbable that Jesse's wife would be suddenly intruded into the narrative, as she is if this hypothesis be adopted.

G.

**NA'HATH** (נַחַת) [*setting down, rest*]: *Naxóth*, Alex. *Naxóm*, Gen. xxxvi. 13; *Naxóth*, Alex. *Naxóth*, Gen. xxxvi. 17; *Naxés*, [Alex. *Naxéth*.] 1 Chr. i. 37: *Nahath*. 1. One of the "dukes" or phylarchs in the land of Edom, eldest son of Reuel the son of Esau.

2. (*Kaiváth*; [Vat. Alex.<sup>2</sup> *Kaiváth*]) A Kohathite Levite, son of Zophai and ancestor of Samuel the prophet (1 Chr. vi. 26).

3. (*Naéth*; [Vat. *Maéth*]) A Levite in the reign of Hezekiah, who with others was overseer of the tithes and dedicated things under Cononiah and Shimei (2 Chr. xxxi. 13).

**NAHBI** (נַבִּי) [*hidden, Ges.; protection*]: *Nabí*; [Vat. *NaBei*]; Alex. *NaBa*: *Nehabi*. The son of Vophsi, a Naphtalite, and one of the twelve spies (Num. xiii. 14).

**NA'HOR** (נַחֹר) [see **NACHOR**]: *Naxówp*; Joseph. *Naxówp*s: *a Nabor*, and *Nachor*, the name of two persons in the family of Abraham.

1. His grandfather: the son of Serug and father of Terah (Gen. xi. 22-25; [1 Chr. i. 26]). He is mentioned in the genealogy of our Lord, Luke iii. 34, though there the name is given in the A. V. in the Greek form of **NACHOR**.

2. Grandson of the preceding, son of Terah and brother of Abraham and Haran (Gen. xi. 26, 27). The members of the family are brought together in the following genealogy:—

It has been already remarked, under **LOR** (vol. ii. p. 1685 *note*), that the order of the ages of the family of Terah is not improbably inverted in the narrative; in which case Nahor, instead of being younger than Abraham, was really older. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth, on the eastern side of the Euphrates—the boundary between the Old and the New World of that early age—and gathered his family around him at the sepulchre of his father.<sup>a</sup> (Comp. 2 Sam. xix. 37.)

Like Jacob, and also like Ishmael, Nahor was the father of twelve sons, and further, as in the case of Jacob, eight of them were the children of his wife, and four of a concubine (Gen. xxii. 21-24). Special care is taken in speaking of the legitimate branch to specify its descent from Milcah—"the son of Milcah, which she bare unto Nahor." It was to this pure and unsullied race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob's flight from Haran the intercourse ceased. The heap of stones which he and "Laban the Syrian" erected on Mount Gilead (Gen. xxxi. 46) may be said to have formed at once the tomb of their past connection and the barrier against its continuance. Even at that time a wide variation had taken place in their language (ver. 47), and not only in their language, but, as it would seem, in the Object of their worship. The "God of Nahor" appears as a distinct divinity

from the "God of Abraham and the Fear of Isaac" (ver. 53). Doubtless this was one of the "other gods" which before the Call of Abraham were worshipped by the family of Terah; whose images were in Rachel's possession during the conference on Gilead; and which had to be discarded before Jacob could go into the Presence of the "God of Bethel" (Gen. xxxv. 2; comp. xxxi. 13). Henceforward the line of distinction between the two families is most sharply drawn (as in the allusion of Josh. xxiv. 2), and the descendants of Nahor confine their communications to their own immediate kindred, or to the members of other non-Israelite tribes, as in the case of Job the man of Uz, and his friends, Elihu the Buzite of the kindred of Ram, Eliphaz the Temanite, and Bildad the Shuhite. Many centuries later David appears to have come into collision—sometimes friendly, sometimes the reverse—with one or two of the more remote Nahorite tribes. Tibhath, probably identical with Tehah and Maacah, are mentioned in the relation of his wars on the eastern frontier of Israel (1 Chr. xviii. 8, xix. 6); and the mother of Absalom either belonged to or was connected with the latter of the above nations.

No certain traces of the name of Nahor have been recognized in Mesopotamia. Ewald (*Geschichte*, i. 359) proposes *Haditha*, a town on the Euphrates just above *Hit*, and bearing the additional name of *el-Nawra*; also another place, likewise called *el-Na'ura*, mentioned by some Arabian geographers

<sup>a</sup> This is the form given in the Benedictine edition of Jerome's *Bibliotheca Divina*. The other is found in the ordinary copies of the Vulgate.

<sup>b</sup> The statements of Gen. xi. 27-32 appear to imply that Nahor did not advance from Ur to Haran at the same time with Terah, Abraham, and Lot, but remained there till a later date. Coupling this with the

statement of Judith v. 8, and the universal tradition of the East, that Terah's departure from Ur was a relinquishment of false worship, an additional force is given to the mention of "the god of Nahor" (Gen. xxxi. 53) as distinct from the God of Abraham's descendants. Two generations later Nahor's family was certainly living at Haran (Gen. xxviii. 10, xxix. 4).

lying further north; and *Nahrein*, which, however, seems to lie out of Mesopotamia to the east. Others have mentioned Naarda, or Nehardea, a town or district in the neighborhood of the above, celebrated as the site of a college of the Jews (*Dict. of Geogr.* "Naarda").

May not *Aram-Naharaim* have originally derived its name from Nahor? The fact that in its present form it has another signification in Hebrew is no argument against such a derivation.

In Josh. xxiv. 2 the name is given in the A. V. in the form (more nearly approaching the Hebrew than the other) of *NACHOR*. G.

**NAH'SHON, or NAASH'ON** (נְהִישׁוֹן) [*enchanter*, Ges.]: *Ναασσών*, LXX. and N. T.: *Nahasson*, O. T.; *Naasson*, N. T.), son of Amminadab, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the time of the first numbering in the wilderness (Exod. vi. 23; Num. i. 7, &c.). His sister, Elisheba, was wife to Aaron, and his son, Salmon, was husband to Rahab after the taking of Jericho. From Elisheba being described as "sister of Naashon" we may infer that he was a person of considerable note and dignity, which his being appointed as one of the twelve princes who assisted Moses and Aaron in taking the census, and who were all "renowned of the congregation . . . heads of thousands in Israel," shows him to have been. No less conspicuous for high rank and position does he appear in Num. ii. 3, vii. 12, x. 14, where, in the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to Nahshon the son of Amminadab as captain of the host of Judah. Indeed, on these three last-named occasions he appears as the first man in the state next to Moses and Aaron, whereas at the census he comes after the chiefs of the tribes of Reuben and Simeon.<sup>a</sup> Nahshon died in the wilderness according to Num. xxvi. 64, 65, but no further particulars of his life are given. In the N. T. he occurs twice, namely, in Matt. i. 4 and Luke iii. 32, in the genealogy of Christ, where his lineage in the preceding and following descents are exactly the same as in Ruth iv. 18-20; 1 Chr. ii. 10-12, which makes it quite certain that he was the sixth in descent from Judah, inclusive, and that David was the fifth generation after him. [AMMINADAB.] A. C. H.

**NA'HUM** (נְהֻם) [*consolation*]: *Ναοῦμ*: *Nahum*. "The book of the vision of Nahum the Elkoshite" stands seventh in order among the writings of the minor prophets in the present arrangement of the canon. Of the author himself we have no more knowledge than is afforded us by the scanty title of his book, which gives no indication whatever of his date, and leaves his origin obscure. The site of Elkosh, his native place, is disputed, some placing it in Galilee, with Jerome, who was shown the ruins by his guide; others in Assyria, where the tomb of the prophet is still visited as a sacred spot by Jews from all parts. Benjamin of Tudela (p. 53, Heb. text, ed. Asher) thus briefly

alludes to it: "And in the city of Asshur (Mosul) is the synagogue of Obadiah, and the synagogue of Jonah the son of Amittai, and the synagogue of Nahum the Elkoshite." [ELKOSH.] Those who maintain the latter view assume that the prophet's parents were carried into captivity by Tiglath-pileser, and planted, with other exile colonists, in the province of Assyria, the modern Kurdistan, and that the prophet was born at the village of Alkush, on the east bank of the Tigris, two miles north of Mosul. Ewald is of opinion that the prophecy was written there at a time when Nineveh was threatened from without. Against this it may be urged that it does not appear that the exiles were carried into the province of Assyria Proper, but into the newly-conquered districts, such as Mesopotamia, Babylonia, or Media. The arguments in favor of an Assyrian locality for the prophet are supported by the occurrence of what are presumed to be

Assyrian words: *הַיְבֵי*, ii. 7 (Heb. 8), *מְלִיכָהּ*, *מְלִיכָהּ*, iii. 17; and the strange form *מְלִיכָהּ* in ii. 13 (Heb. 14), which is supposed to indicate a foreign influence. In addition to this is the internal evidence supplied by the vivid description of Nineveh, of whose splendors it is contended Nahum must have been an eye-witness; but Hitzig justly observes that these descriptions display merely a lively imagination, and such knowledge of a renowned city as might be possessed by any one in Anterior Asia. The Assyrian warriors were no strangers in Palestine, and that there was sufficient intercourse between the two countries is rendered probable by the history of the prophet Jonah. There is nothing in the prophecy of Nahum to indicate that it was written in the immediate neighborhood of Nineveh, and in full view of the scenes which are depicted, nor is the language that of an exile in an enemy's country. No allusion is made to the Captivity; while, on the other hand, the imagery is such as would be natural to an inhabitant of Palestine (i. 4) to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossom of Lebanon, were emblems of all that was luxuriant and fertile. The language employed in i. 15, ii. 2, is appropriate to one who wrote for his countrymen in their native land.<sup>b</sup> In fact, the sole origin of the theory that Nahum flourished in Assyria is the name of the village Alkush, which contains his supposed tomb, and from its similarity to Elkosh was apparently selected by mediæval tradition as a shrine for pilgrims, with as little probability to recommend it as exists in the case of Obadiah and Jephthah, whose burial-places are still shown in the same neighborhood. This supposition is more reasonable than another which has been adopted in order to account for the existence of Nahum's tomb at a place, the name of which so closely resembles that of his native town. Alkush, it is suggested, was founded by the Israelitish exiles, and so named by them in memory of Elkosh in their own country. Tradition, as usual, has usurped the province of history. According to Pseudo-Epiphanius (*De Vitis*

<sup>a</sup> It is curious to notice that, in the second numbering (Num. xxvi.), Reuben still comes first, and Judah fourth. So also 1 Chr. ii. 1.

<sup>b</sup> Capernaum, literally "village of Nahum," is supposed to have derived its name from the prophet. Schwarz (*Descr. of Pal.* p. 188) mentions a *Kefar Ten-*

*chum* or *Nahum*, close on Chinnereth, and 2½ English miles N. of Tiberias. "They point out there the graves of Nahum the prophet, of Rabbis Tanchum and Tanchuma, who all repose there, and through these the ancient position of the village is easily known."

*Proph.* Opp. ii. p. 247), Nahum was of the tribe of Simeon, "from Eleesei beyond the Jordan at Begabar (Βηγαβάρ; Chron. Pasch. 150 B. Βηγαβάρη)," or Bethabara, where he died in peace and was buried. In the Roman martyrology the 1st of December is consecrated to his memory.

The date of Nahum's prophecy can be determined with as little precision as his birthplace. In the Seder Olam Rabba (p. 55, ed. Meyer) he is made contemporary with Joel and Habakkuk in the reign of Manasseh. Syncellus (*Chron.* p. 201 d) places him with Hosea, Amos, and Jonah in the reign of Joash king of Israel, more than a century earlier; while, according to Eutychius (*Ann.* p. 252), he was contemporary with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus (*Ant.* ix. 11, § 3) mentions him as living in the latter part of the reign of Jotham; "about this time was a certain prophet, Nahum by name; who, prophesying concerning the downfall of Assyrians and of Nineveh, said thus." etc.; to which he adds, "and all that was foretold concerning Nineveh came to pass after 115 years." From this Carpov concluded that Nahum prophesied in the beginning of the reign of Ahaz, about B. C. 742. Modern writers are divided in their suffrages. Berthold thinks it probable that the prophet escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil (*Lehrb. d. Eönl. in d. A. T.*) places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Vitringa (*Typ. Doctr. proph.* p. 37) was of the like opinion, and the same view is taken by De Wette (*Eönl.* p. 328), who suggests that the rebellion of the Medes against the Assyrians (B. C. 710), and the election of their own king in the person of Deioces, may have been present in the prophet's mind. But the history of Deioces and his very existence are now generally believed to be mythical. This period also is adopted by Knobel (*Prophet.* ii. 207, &c.) as the date of the prophecy. He was guided to his conclusion by the same supposed facts, and the destruction of No Ammon, or Thebes of Upper Egypt, which he believed was effected by the Assyrian monarch Sargon (B. C. 717-715), and is referred to by Nahum (iii. 8) as a recent event. In this case the prophet would be a younger contemporary of Isaiah (comp. Is. xx. 1). Ewald, again, conceives that the siege of Nineveh by the Median king Phraortes (B. C. 630-625), may have suggested Nahum's prophecy of its destruction. The existence of Phraortes, at the period to which he is assigned, is now believed to be an anachronism. [MEDES.] JUNIUS and Tremellius select the last years of Josiah as the period at which Nahum prophesied, but at this time not Nineveh but Babylon was the object of alarm to the Hebrews. The arguments by which Strauss (*Nahumi de Nino Vaticinium*, prol. c. 1, § 3) endeavors to prove that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, that is between the years 680 and 667 B. C., are not convincing. Assuming that the position which Nahum occupies in the canon between Micah and Habakkuk supplies, as the limits of his prophetic career, the reigns of Hezekiah and Josiah, he endeavors to show from certain apparent resemblances to the writings of the older prophets, Joel, Jonah, and Isaiah, that Nahum must have been familiar with their writings, and consequently later in point of time than any of them. But a careful examina-

tion of the passages by which this argument is maintained, will show that the phrases and turns of expression upon which the resemblance is supposed to rest, are in no way remarkable or characteristic, and might have been freely used by any one familiar with oriental metaphor and imagery without incurring the charge of plagiarism. Two exceptions are Nah. ii. 10, where a striking expression is used which only occurs besides in Joel ii. 6, and Nah. i. 15 (Heb. ii. 1), the first clause of which is nearly word for word the same as that of Is. lii. 7. But these passages, by themselves, would equally prove that Nahum was anterior both to Joel and Isaiah, and that his diction was copied by them. Other references which are supposed to indicate imitations of older writers, or, at least, familiarity with their writings, are Nah. i. 3 compared with Jon. iv. 2; Nah. i. 13 with Is. x. 27; Nah. iii. 10 with Is. xiii. 16; Nah. ii. 2 [1] with Is. xxiv. 1; Nah. iii. 5 with Is. xlvii. 2, 3; and Nah. iii. 7 with Is. li. 19. For the purpose of showing that Nahum preceded Jeremiah, Strauss quotes other passages in which the later prophet is believed to have had in his mind expressions of his predecessor with which he was familiar. The most striking of these are Jer. x. 19 compared with Nah. iii. 19; Jer. xiii. 26 with Nah. iii. 5; Jer. i. 37, li. 30 with Nah. iii. 13. Words, which are assumed by the same commentator to be peculiar to the times of Isaiah, are appealed to by him as evidences of the date of the prophecy. But the only examples which he quotes prove nothing: שֶׁתֶּפֶת, *shetepth* (Nah. i. 8, A. V. "flood"), occurs in Job, the Psalms, and in Proverbs, but not once in

Isaiah; and מִצֻּרֹתַי, *metsurâth* (Nah. ii. 1 [2], A. V. "munition") is found only once in Isaiah, though it occurs frequently in the Chronicles, and is not a word likely to be uncommon or peculiar, so that nothing can be inferred from it. Besides, all this would be as appropriate to the times of Hezekiah as to those of Manasseh. That the prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldeans (cir. B. C. 625), will be admitted. The allusions to the Assyrian power imply that it was still unbroken (i. 12, ii. 13, 14 (E. V. 12, 13), iii. 15-17). The glory of the kingdom was at its brightest in the reign of Esarhaddon (B. C. 680-660), who for 13 years made Babylon the seat of empire, and this fact would incline us to fix the date of Nahum rather in the reign of his father Sennacherib, for Nineveh alone is contemplated in the destruction threatened to the Assyrian power, and no hint is given that its importance in the kingdom was diminished, as it necessarily would be, by the establishment of another capital. That Palestine was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in i. 11, 12, 13, ii. 2; and the vivid description of the Assyrian armament in ii. 3, 4. At such a time the prophecy would be appropriate, and if i. 14 refers to the death of Sennacherib in the house of Nisroch, it must have been written before that event. The capture of No Ammon, or Thebes, has not been identified with anything like certainty. It is referred to as of recent occurrence, and it has been conjectured with probability that it was sacked by Sargon in the invasion of Egypt alluded to in Is. xx. 1. These circumstances seem to determine the 14th year of Hezekiah (B. C. 712

in the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy, and it is on all accounts most probable that Nahum flourished in the latter half of the reign of Hezekiah, and wrote his prophecy soon after the date above mentioned, either in Jerusalem or its neighborhood, where the echo still lingered of "the rattling of the wheels, and of the prancing horses, and of the jumping chariots" of the Assyrian host, and "the flame of the sword and lightning of the spear" still flashed in the memory of the beleaguered citizens.

The subject of the prophecy is, in accordance with the superscription, "the burden of Nineveh." The three chapters into which it is divided form a consecutive whole. The first chapter is introductory. It commences with a declaration of the character of Jehovah, "a God jealous and avenging," as exhibited in his dealings with his enemies, and the swift and terrible vengeance with which He pursues them (i. 2-6), while to those that trust in Him He is "good, a stronghold in the day of trouble" (i. 7), in contrast with the overwhelming flood which shall sweep away his foes (i. 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i. 9-11). In the verses that follow the intention of Jehovah is still more fully declared, and addressed first to Judah (i. 12, 13), and then to the monarch of Assyria (i. 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, trod the mountains that were round about Jerusalem (i. 15), and proclaimed to Judah the accomplishment of her vows. But round the doomed city gathered the destroying armies; "the breaker in pieces" had gone up, and Jehovah mustered his hosts to the battle to avenge his people (ii. 1, 2). The prophet's mind in vision sees the burnished bronze shields of the scarlet-clad warriors of the besieging army, the flashing steel scythes of their war-chariots as they are drawn up in battle-array, and the quivering cypress-shafts of their spears (ii. 3). The Assyrians hasten to the defense: their chariots rush madly through the streets, and run to and fro like the lightning in the broad ways, which glare with their bright armor like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii. 4, 5). The crisis hastens on with terrible rapidity. The river-gates are broken in, and the royal palace is in the hands of the victors (ii. 6). And then comes the end; the city is taken and carried captive, and her maidens "moan as with the voice of doves," beating their breasts with sorrow (ii. 7). The flight becomes general, and the leaders in vain endeavor to stem the torrent of fugitives (ii. 8). The wealth of the city and its accumulated treasures become the spoil of the captors, and the conquered suffer all the horrors that follow the assault and storm (ii. 9, 10). Over the charred and blackened ruins the prophet, as the mouth-piece of Jehovah, exclaims in triumph, "Where is the lair of the lions, the feeding place of the young lions, where walked lion, lioness, lion's whelp, and none made (them) afraid?" (ii. 11, 12). But for all this the downfall of Nineveh was certain, for 'behold! I am against thee, saith Jehovah of

Hosts" (ii. 13). The vision ends, and the prophet, recalled from the scenes of the future to the realities of the present, collects himself, as it were, for one final outburst of withering denunciation against the Assyrian city, not now threatened by her Median and Chaldean conquerors, but in the full tide of prosperity, the oppressor and corrupter of nations. Mingled with this woe there is no touch of sadness or compassion for her fate; she will fall unpitied and unlamented, and with terrible calmness the prophet pronounces her final doom: "all that hear the bruit of thee shall clap the hands over thee: for upon whom hath not thy wickedness passed continually?" (iii. 19).

As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (i. 2-6), and to the magnificent description of the siege and destruction of Nineveh in ch. ii. His style is clear and uninvolved, though pregnant and forcible; his diction sonorous and rhythmical, the words reaching to the sense (comp. ii. 4, iii. 3). Some words and forms of words are almost peculiar to himself; as, for example, *שְׁעָרָה* *שְׁעָרָה*, in i. 3, occurs only besides in Job ix. 17; *הַבְּרִיחַ* for *הַבְּרִיחַ*, in i. 2, is found only in Josh. xxiv. 19; *הַבְּרִיחַ*, ii. 9 [10], is found in Job xxiii. 3, and there not in the same sense; *יְהִי*, in iii. 2, is only found in Judg. v. 22; *פְּלִירוֹת* and *רָעַל*, ii. 3 [4], *בְּחַג*, ii. 7 [8], *בַּבְּרִיחַ* and *בְּבִרְיָה*, ii. 10 [11], *מִבְּרִיחַ*, iii. 17, and *בְּרִיחַ*, iii. 19, do not occur elsewhere. The unusual form of the pronominal suffix in *מִלְּאֲבִיבָה*, ii. 13 [14], *בְּצַבֵּר* *בְּפִנְשֵׁי*, iii. 18, are peculiar to Nahum; *מְצַר*, iii. 5, is only found in 1 K. vii. 36; *בְּרִי*, iii. 17, occurs besides only in Am. vii. 1; and the foreign word *מְפַסֵּר*, iii. 17, in the slightly different form *מְפַסֵּר*, is found only in Jer. i. 27.

For illustrations of Nahum's prophecy, see the article NINEVEH.

W. A. W.

\* For the general writers on the Minor Prophets see the addition to MICAH (Amer. ed.). Part xix. of Lange's *Bibelwerk des A. Test.* by Dr. Paul Kleinert (1868) includes Nahum. It furnishes a new translation of the text, instead of adhering to that of Luther. Among the special writers on this prophet are Bilbliander, *Prophecia Nah. juxta veritatem Hebr.* (1534); Abarbanel, *Comm. in Nah. rabb. et Lat.* (1703); Kalinski, *Vaticin. (Hab. et Nah. etc.* (1748); Kreenen, *Nah. vaticinium, phil. et crit. expositum* (1808); Justi, *Nah. neu übersetzt u. erläutert* (1820); Hoelemann, *Nah. oraculum illustravit* (1842); and O. Strauss, *Nahum de Nino vaticinium* (1853). There is a "Translation of the Prophecy of Nahum with Notes" by Prof. B. B. Edwards in the *Bibl. Sacra*, v. 551-576. It is a fine example of exact Biblical exegesis. Recent explorations in the East have given fresh interest to the study of Nahum. Among the works which illustrate the connections of the book with Assyrian and Babylonian history in addition to the commentaries, are M. von Niebuhr's *Geschichte Assur's u. Babel's* (1857); O. Strauss, *Nineve u. das Wort Gottes* (1855); Layard, *Nineveh and*

*its Remains*; Vance Smith, *The Prophecies relating to Nineveh and the Assyrians* (Lond. 1857); Rawlinson, *Ancient Monarchies*, vol. i. See the copious list of works in German, French, and English, relating to the fall of Nineveh in Lange's *Bibelwerk* (p. 100) as above. Nineveh, which disappeared so suddenly after its doom was pronounced by the prophet, may almost be said to stand before us again in the light of the remains restored to us by modern discoveries. The articles on Nahum by Winer in his *Bibl. Realw.* by Nägelsbach in Herzog's *Real-Encyk.*, and by Wunderlich in Zeller's *Bibl. Wörterb.* should not be overlooked. In opposition to the view that Nahum lived in Assyria, Bleek (*Eint. in das A. Test.* p. 544) agrees with those who decide that the prophet was not only born in Palestine, but wrote the book which bears his name in Jerusalem or the vicinity (i. 12 f.). [ELKOSH, Amer. ed.]

The book of Nahum contains nothing strictly Messianic. It is important as a source of permanent instruction because it illustrates so signally the law of retribution according to which God deals with nations, and the fidelity with which He fulfills his promises and threatenings to the righteous or the wicked.

H.

NA'IDUS (Ναΐδος; Alex. *Naeidos*: *Raanas*) = BENAIATH, of the sons of Pahath Moab (1 Esdr. ix. 31; comp. Ezr. x. 30).

NAIL. I. (of finger).<sup>a</sup> — 1. A nail or claw of man or animal. 2. A point or style, *e. g.* for writing: see Jer. xvii. 1. *Tzipporen* occurs in Deut. xxi. 12, in connection with the verb נָשָׂה, 'ásáh, "to make," here rendered περιουχιζω, *circumcido*, A. V. "pare," but in marg. "dress," "suffer to grow." Gesenius explains "make neat."

Much controversy has arisen on the meaning of this passage: one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, while others refer it to the deposition of mourning. Some, who would thus belong to the latter class, refer it to the practice of staining the nails with hennah.

The word *asah*, "make," is used both of "dressing," *i. e.* making clean the feet, and also of "trimming," *i. e.* combing and making neat the beard, in the case of Mephibosheth, 2 Sam. xix. 24. It seems, therefore, on the whole to mean "make suitable" to the particular purpose intended, whatever that may be: unless, as Gesenius thinks, the passage refers to the completion of the female captive's month of seclusion, that purpose is evidently one of mourning — a month's mourning interposed for the purpose of preventing on the one hand too hasty an approach on the part of the captor, and on the other too sudden a shock to natural feeling in the captive. Following this line of interpretation, the command will stand thus: The captive is to lay aside the "raiment of her captivity," namely, her ordinary dress in which she had been taken captive, and she is to remain in mourning retire-

ment for a month with hair shortened and nails made suitable to the same purpose, thus presenting an appearance of woe to which the nails untrimmed and shortened hair would seem each in their way most suitable (see Job i. 20).

If, on the other hand, we suppose that the shaving the head, etc., indicate the time of retirement completed, we must suppose also a sort of Nazaritic initiation into her new condition, a supposition for which there is elsewhere no warrant in the Law, besides the fact that the "making," whether paring the nails or letting them grow, is nowhere mentioned as a Nazaritic ceremony, and also that the shaving the head at the end of the month would seem an altogether unsuitable introduction to the condition of a bride.

We conclude, therefore, that the captive's head was shaved at the commencement of the month, and that during that period her nails were to be allowed to grow in token of natural sorrow and consequent personal neglect. Joseph. *Ant.* iv. 8-23; Philo, *περὶ φιλανθρ.* c. 14, vol. ii. p. 394, ed. Mangey; Clem. Alex. *Strom.* ii. c. 18, iii. c. 11, vol. ii. pp. 475, 543, ed. Potter; Calmet, Patrick; *Crit. Sacr.* on Deut. xxi. 12; Schleusner, *Lex. V. T. περιουχιζω*; Selden, *de Juv. Nat.* v. xiii. p. 644; Harmer, *Obs.* i. 104; Wilkinson, *Anc. Eg.* ii. 345; Lane, *M. E.* i. 64; Gesenius, p. 1075; Michaelis, *Laws of Moses*, art. 88, vol. i. p. 464, ed. Smith; Num. vi. 2, 18.

II. — 1.<sup>b</sup> A nail (Is. xli. 7), a stake (Is. xxxiii. 20), also a tent-peg. Tent-pegs are usually of wood and of large size, but sometimes, as was the case with those used to fasten the curtains of the Tabernacle, of metal (Ex. xxvii. 19, xxxviii. 20; see Lightfoot, *Spicil.* in Ex. § 42; Joseph. *Ant.* v. 5, 4). [JAEI, TENT.]

2.<sup>c</sup> A nail, primarily a point.<sup>d</sup> We are told that David prepared iron for the nails to be used in the Temple; and as the holy of holies was plated with gold, the nails also for fastening the plates were probably of gold. Their weight is said to have been 50 shekels, = 25 ounces, a weight obviously so much too small, unless mere gilding be supposed, for the total weight required, that LXX. and Vulg. render it as expressing that of each nail, which is equally excessive. To remedy this difficulty Thénien suggests reading 500 for 50 shekels (1 Chr. xxii. 3; 2 Chr. iii. 9; Bertheau, on *Chronicles*, in *Kurzgef. Handb.*). [On "nails" in Eccl. xii. 11, see MASTER, Amer. ed.]

"Nail," Vulg. palus, is the rendering of πῶσαλος in Ecclus. xxvii. 2. In N. T. we have ἥλος and προσηλώω in speaking of the nails of the Cross (John xx. 25; Col. ii. 14). [See addition to CRUCIFIXION.] H. W. P.

NA'IN (Ναΐν [either from נָיִן, *pasture*, or נָיִן, *gracefulness*: *Na'im*]). There are no materials for a long history or a detailed description of this village of Galilee, the gate of which is made illustrious by the raising of the widow's son (Luke

<sup>a</sup> נָיִן, *t'phar*, a Chaldee form of the Heb. נָיִן, *tzipporen*, from the root נָיִן, connected with נָיִן, *aphar*, "to scrape," or "pare:" *ὄνυξ*: *unguis*.

<sup>b</sup> נָיִן, *jathêil*: πάσιλας: *pasilus, clavus*; *akn*

<sup>c</sup> Arab. وَتَد, *watada*, "to fix a peg."

<sup>c</sup> מַסְמֵר, *masmêr*,<sup>1</sup> only used in plur.: ἥλος *clavus*.

<sup>d</sup> From נָיִן, "stand on end," as hair (Gen. p. 961).

<sup>1</sup> Closely allied to Arab. مَسْمَر, *masmâr*, "nail."

vil. 12). But two points connected with it are of extreme interest to the Biblical student. The site of the village is certainly known; and there can be no doubt as to the approach by which our Saviour was coming when He met the funeral. The modern *Nain* is situated on the northwestern edge of the "Little Hermon," or *Jebel el-Dahy*, where the ground falls into the plain of Esdraelon. Nor has the name ever been forgotten. The crusaders knew it, and Eusebius and Jerome mention it in its right connection with the neighborhood of Endor. Again, the entrance to the place must probably always have been up the steep ascent from the plain; and here, on the west side of the village, the rock is full of sepulchral caves. It appears also that there are similar caves on the east side. (Robinson, *Bibl. Res.* ii. 361; Van de Velde, *Syria and Palestine*, ii. 382; Stanley, *Sinai and Palestine*, p. 357; Thomson, *Land and Book*, p. 445; Porter, *Handbook to Syria*, p. 358.) J. S. H.

\* *Nain* is distinctly visible from the top of Tabor across an intervening branch of the plain of Esdraelon. It is but a few miles distant from Nazareth. Shunem and Endor are in the neighborhood. The present name (though variously written by travelers) is the identical ancient name. Mr. Tristrani (*Land of Israel*, p. 130) speaks of a fountain here, which explains why the place has been so long inhabited. Thomson states (*Land and Book*, ii. 158) that "the tombs are chiefly on the east of the village," and not on the west (see above). On the miracle of restoring to life the son of the widow at Nain (Luke vii. 11-15), see Trench on *Miracles*, p. 222. The custom of carrying the dead for interment outside of the cities and villages, is still, as on that occasion, almost universal in Palestine.

Whether we understand "bier" or "coffin" to be meant by *σποός* in the narrative, is immaterial to its accuracy. Present usages show that the body in either case was not so confined as to make it impossible for the "young man" to rise and sit up at the command of Christ. [COFFIN, Amer. ed.] The writer has witnessed funerals in Greece at which the upper side of the coffin was left entirely open, and the lid carried before the corpse until the procession reached the grave (see *Illustr. of Scripture*, p. 120). H.

NAIOTH (נַיִוֶּת), according to the *Keri* or corrected text of the Masorets, which is followed by the A. V., but in the *Cethib* or original text נַיִוֶּת, <sup>a</sup> i. e. Neviaoth [*habitations*]: [Rom. *Navath*; Vat.] *Avath*; Alex. *Naviath*: *Naiioth*), or more fully, <sup>b</sup> "Naiioth in Ramah;" a place in which Samuel and David took refuge together, after the latter had made his escape from the jealous fury of Saul (1 Sam. xix. 18, 19, 22, 23, xx. 1). It is evident from ver. 18, that Naiioth was not actually in Ramah, Samuel's habitual residence, though from the affix it must have been near it (Ewald, lii. 66). In its corrected form (*Keri*) the name signifies "habitations," and from an early date has been interpreted to mean the huts or dwellings of a

school or college of prophets over which Samuel presided, as Elisha did over those at Gilgal and Jericho.

This interpretation was unknown to Josephus who gives the name Γαλβᾶαθ, to the translators of the LXX. and the Peshito-Syriac (*Jonath*), and to Jerome.<sup>c</sup> It appears first in the Targum-Jonathan, where for Naiioth we find throughout נַיִוֶּת תַּלְמוּדֵי, "the house of instruction," the term <sup>d</sup> which appears in later times to have been regularly applied to the schools of the Rabbis (Buxtorf, *Lex Talm.* 106) — and where ver. 20 is rendered, "and they saw the company of scribes singing praises, and Samuel teaching, standing over them," thus introducing the idea of Samuel as a teacher. This interpretation of Naiioth is now generally accepted by the lexicographers and commentators. G.

\* NAKED. [DRESS, vol. i. p. 620 b.]

\* NAMES, BIBLICAL; THEIR ORIGIN AND SIGNIFICANCE. — Names are archaeological monuments. Especially is this true of those presented to us in the primitive languages of mankind. Originally given for the purpose of distinguishing different objects, or of indicating the significance which those objects possessed for the name-giver, they connate and perpetuate the conceptions, feelings, and modes of thought of their originators. It is on this account that their study is at once so fascinating and of such real utility. It is the study of the thought-fossils of mankind.

The two principal cautions to be given to the student of names, are, first, to guard against false etymologies, and secondly, to beware of mystical or merely fanciful interpretations. A recent English writer has wittily illustrated the first danger by saying, that the tyro must not think he has discovered a wonderful fitness in the denomination of the metropolitan residence of the English primate, Lambeth, because forsooth *Lama* is a Mongolian word for "Chief Priest," and *Beth* the Hebrew term for "house"; since, if the truth must be told, the term Lambeth is derived from an Anglo-Saxon compound, signifying "the muddy landing place"! An equally striking exemplification of the second liability is furnished us, by a recent American writer in this department, Mr. W. Arthur. In his work on the "Derivation of Family Names" (N. Y. 1857) we find an old Christian-rabbinical idea thus rehabilitated: "The signification of the Hebrew names recorded in the fifth chapter of Genesis, when arranged in order, present an epitome of the ruin and recovery of man through a Redeemer, thus: —

Adam . . . . .	'Man in the image of God'
Seth . . . . .	'Substituted by.'
Enos . . . . .	'Frail man.'
Canaan . . . . .	'Lamenting.'
Mahalaleel . . . . .	'The blessed God.'
Jered . . . . .	'Shall come down'
Enoch . . . . .	'Teaching.'
Methuselah . . . . .	'His death shall grieve'
Lemech . . . . .	'To the humble.'
Noah . . . . .	'Consolation.'

<sup>a</sup> The plural of נַיִוֶּת. The original form (*Cethib*) would be the plural of נַיִוֶּת (Simonis, *Onom* 30), a word which does not appear to have existed.

<sup>b</sup> "Naiioth" occurs both in Heb. and A. V. in 1 Sam. ix. 18, only. The LXX. supply ἐν Παμᾶ in "hat rare." The Vulgate adheres to the Hebrew.

<sup>c</sup> In his notice of this name in the *Onomasticon* ("Namoth"), Jerome refers to his observations thereon in the "libri Hebraicarum questionum." As, however, we at present possess those books, they contain no reference to Naiioth.

<sup>d</sup> It occurs again in the Targum for the residence of Hulda the prophetess (2 K. xxii. 14).

"These names in the order in which they are recorded read thus: 'To man, once made in the image of God, now substituted by man, frail and full of sorrow, the blessed God shall come down himself to the earth teaching, and his death shall send to the humble consolation'" (1) The original author of this remarkable piece of interpretation seems to have been Ursinus, chief author of the Heidelberg Catechism. Dr. Alabaster repeated it in a sermon on 1 Chron. i. 1-4 delivered before the University of Cambridge, and Dr. Brown of Haddington introduces it with evident approbation into his "Dictionary of the Bible," art. Adam. (For analogous instances of exegetical trifling on the part of the cabalistic writers, see McClintock and Strong's *Cyclop. of Bib., Theol., and Ecclesiast. Literature*, art. *Cabala*.)

Notwithstanding such fanciful attempts to discover the whole system of Christian truth in a genealogical table, it must not be forgotten that the names of the Bible have in innumerable instances a real and profound significance. This is apparent from the fact, that on mentioning a name the sacred writers in almost countless cases pause to call our attention either to its etymological signification or to the reasons which led to its bestowment. In view of the special attention paid to etymology in the American edition of the present work, we shall restrict ourselves in this article to general facts and statements relative to names of places and persons. For information respecting particular names whose derivation or signification present especial problems, we may safely refer the reader to the appropriate articles in the Dictionary and to the literature given below.

I. NAMES OF PLACES. These may be divided into two general classes, descriptive and historical. The former are such as mark some peculiarity of the locality, usually a natural one, *e. g.*, Sharon, "plain"; Gibeah, "hill"; Pizgah, "height"; Mizpah, "watchtower,"<sup>a</sup> etc. The extraordinary richness and expressiveness of the Hebrew topographical vocabulary (see Stanley, *Appendix to S. and P.* pp. 471-519), rendered the construction of descriptive names in this way an exceedingly easy and natural process. How apt the designations were can yet be seen in hundreds of instances. See for example, Carmel, "the park," in volume first of this work.

Of the second class of local names, some were given in honor of individual men, *e. g.*, the city Enoch, Gen. iv. 17; Dan, Judg. xviii. 29; Jebus, Cæsarea, Cæsarea Philippi, etc. More commonly, however, such names were given to perpetuate the memory of some important historic occurrence. Thus Babel, we are told, received its name "because the Lord did there confound the language of all the earth," Gen. xi. 9. (See, however, the native etymology, *sub voce*.) Bethel perpetuated through all Jewish history the early revelations of God to Jacob, Gen. xxviii. 19, xxxv. 15. See Jehovah-jireh, Gen. xxii. 14; Isaac's wells, Gen. xxvi. 20 ff.; Mahanaim, Gen. xxxii. 2; Peniel, Gen. xxxii. 30; Massah and Meribah, Ex. xvii. 7; Kiboth-hattavah, Num. xi. 34; Hormah, Num. xxi. 1; Achor, Josh. vii. 26; Bochim, Jud. ii. 5; Cabul, 1 K. ix. 13, &c., &c. In some instances it may

<sup>a</sup> \* The Hebrew forms of the names in this article will be found in connection with the English forms in their respective places, and need not be repeated here.

be difficult to determine to which class a particular name belongs; thus Golgotha, or Calvary, is supposed by some to have been so called because in the form of "a skull," *i. e.* a well-marked hillock, others however, deny that the traditional conception of a "Mount Calvary" has any Scriptural warrant, and trace the name to the fact that it was the customary place for capital executions. The former class would make it a descriptive, the latter a historical, name. The importance of the question in a topographical point of view is self-evident.

In forming compounds to serve as names of towns or other localities, some of the most common terms employed by the Hebrews were *Kir*, a "wall" or "fortress" (*Kir-haresh*); *Kirjath*, "city" (*Kirjath-arba*; *Kirjath-huzoth*, "city of streets"; *Kirjath-jearim*, "city of woods" = Forestville; *Kirjath-sepher*, "city of books"; *Kirjath-sannah*, "city of learning"); *En*, "fountain" (*En-eglainim*, "fountain of the two calves"; *En-gannim*, "fountain of the gardens"; *En-gedi*, "fountain of the kid"; *En-hakkore*, "fountain of the cry or prayer," Judg. xv. 19; *En-rozel*, "fountain of the fuller," etc.); *Beer*, "a well" (*Beer-elim*, "well of the mighty ones" or "well of the terebinth"; *Beer-lahai-roi*, "*Puteus (Dei) viventis, aspicientis me*," Simonis; *Beer-sheba*, "well of the oath"); *Beth*, "house" (*Beth-arabah*, "house of the desert"; *Beth-aven*, "house of vanity" or of idols; *Beth-emek*, "house of the valley"; *Beth-horon*, "place of the great cavern"; *Beth-lehem*, "house of bread"; *Beth-shan*, "house of rest"; *Beth-shemesh*, "house of the sun" etc., etc.). The names of rivers and bodies of water were almost always of a descriptive character, *e. g.*, Jordan, "descending"; Kishon, "tortuous"; Chebar, "abundant" or "vehement"; Kidron, "very black"; Merom, "a high place" (fully written *Mey-merom*, "waters of the heights"); *Jam-Suph*, "sea of weeds" (Red Sea); *Jam-Arabah*, "sea of the desert," or *Jam-Hammelach*, "salt sea" (Dead Sea); *Jam-chinnereth*, "sea of the Harp" (Sea of Galilee, said to have been so called from its shape). The names of countries and sections of country were almost universally derived from the name of their first settlers or earliest historic populations, *e. g.*, Canaan; Misraim (Egypt); Edom; Asshur (Assyria); Tarshish; Havilah, etc. In the Geographical Appendix to Osborn's *Palestine, Past and Present*, Phila. 1858, may be found an exhaustive list of the names of all places and nations mentioned in the O. or N. Test., with references to all the passages where they occur and the latitude and longitude of each locality so far as ascertained. The Bible Atlas of Maps and Plans by the Rev. Samuel Clark, published by the Society for Promoting Christian Knowledge (Lond. 1868), has a "Complete Index to the Geographical Names in the English Bible," including the Apocrypha, by George Grove.

II. NAMES OF PERSONS. Unlike the Romans, but like the Greeks, the Hebrews were a mononymic people, that is, each person received but a single name. In the case of boys this was conferred upon the eighth day in connection with the rite of circumcision (Luke i. 59, ii. 21; comp. Gen. xvii. 5-14, xxi. 3, 4). To distinguish an individual from others of the same name it was customary, as among most, if not all primitive peoples, to add to his own proper name that of his father, or if that was insufficient, the names of several ancestors in ascending order (Jer. xxxvi. 14). Instead of the

father's name that of the mother was sometimes used, possibly in cases where the mother was the more widely known of the two (1 Chr. ii. 16). In some instances the father is represented as conferring the name, in others the mother. Thus, to pass over the naming of the animals and of Eve by Adam, Seth named Enos, Lamech Noah, Jacob Benjamin, etc. On the other hand Eve named Cain and Seth, probably also Abel; Lot's daughters named Moab and Ammon; Leah gave names to Reuben, Simeon, Levi, Judah, Gad, Asher, Issachar, Zebulun, and Dinah; Rachel to Dan, Naphtali, Joseph, and her last born, which was however changed by Jacob. (See Moroni, *Dictionario*.)

Distinguishing with Ewald three classes of names, the simple, the derivative and the compound, we will briefly treat of each in order.

1. *Simple names.* These in Hebrew, as in all languages, were largely borrowed from nature, e. g. Deborah, "bee"; Arieh, "Leo" or "Lion"; Tamar, "a palm-tree"; Jonah, "dove"; Rachel, "ewe"; Shual, "fox"; Caleb, "dog"; Hodesh, "new moon"; Cheran, "lamb"; Dishan, "gazelle," etc., etc. Others are of a descriptive character, e. g., Ashur, "black" (comp. however Simonis); Edom, "red"; Esau, "hairy"; Gareb, "scabbed"; Korah, "bald"; Chimeham, "pining" (can be understood, however, in the sense of *Desiderius*; so by Simonis); Peseah, "the lame"; Ikkesh, "crooked" (here too, Simonis has an interpretation of his own, understanding the term as relating to the hair, like the Latin name *Crispus*). Still other names were borrowed from human occupations and conditions, e. g., Dan, "a judge"; Sarah, "a princess"; Carmi, "vine-dresser," etc., etc. Whether diminutives are found in Hebrew may be doubted. Ewald and others have claimed that Zebulun and Jeduthan are such. This peculiarity of the Hebrew is the more remarkable from the fact, that its near cognate, the Arabic, abounds in diminutives.

2. *Derivative names.* Many names of women were derived from those of men by change of termination: Hammelech, "the king," Hammoleketh, "the queen," (like the German *König, Königin*); Meshullam, "*Pius*," Meshullameth, "*Pia*"; Haggi or Haggai, "exultation," and Haggith; Judah, Judith; Dan, Dinah, etc., etc. Such derivations, however, are limited to simple names, no instance occurring where a feminine name is derived from a compound masculine one. On this peculiarity Ewald remarks, that as the same compound names are sometimes used both for men and women, and as names are applied to women which could not originally have been applicable to any but men, as Abigail, and Ahinoam, we must assume that the plastic power of language had already exhausted itself in this remote province, and that for this reason, the distinction of the feminine was omitted; in the same way as Sanskrit and Greek adjectives of the form *εὐδαμων, εὐτυχής*, are not able to distinguish the feminine in form.

The final syllable *-i*, or *-ai*, in such names as Amittai, Barzillai, is regarded by Ewald as a derivative particle, so that according to this grammarian the names mentioned would be equivalent to "Truman" and "Ironman." All other etymologists, however, whom we have consulted, regard the syllable in question as an imperfectly expressed *Jah*, and interpret the names "Truth of Jehovah," "Iron of Jehovah," etc. Of the use of the same

terminal syllable to form patronymics in Hebrew, see Wilkinson, pp. 29-42.

The most anomalous phenomenon observable in the derivation of Hebrew names is the fact, that in the employment of names derived from abstract nouns masculine ones are often applied to women, and feminine ones to men, while in other cases names identical in meaning and distinguished as to gender by their termination are applied to a single sex. In this respect Hebrew usage seems to have been subject to no rule. Thus Shelomi, "peaceable" or "my peace," and Shelomo, Hebrew for Solomon, are masculine forms and were used as masculine names, but Shelomith, the feminine form, was not only a name of women, but also of men, 1 Chr. xxvi. 25, 26, xxiii. 9. Shemeth and Shimri, "watchful" or "guarded" (of God), are names of men both in form and fact. The feminine form, Shimrith, is nevertheless applied to a man, 1 Chr. viii. 21; while in 2 Chr. xxiv. 26 another feminine form, Shimrith, is the name of a woman. Analogous to this is the fact, that many titles of men were feminine and required to be construed with feminine adjectives, etc., as Pechah, "governor," Koheleth, "preacher," etc., while in other cases masculine nouns took feminine terminations in the plural, e. g. *Ab*, "father," plural *both not abim*; or feminine nouns the plural ending of the masculine, e. g., *Milch*, "word," *Milchim*, "words." See the Grammars.

3. *Compound Names.* These constitute in all languages the most interesting and instructive class, since they reflect emotions and ideas, for whose expression a conscious exercise of the onomatopoeitic faculty was requisite. In Hebrew we find some, which have no especial religious or social significance, as for example, Phinehas, "mouth of brass"; Ishod, "man of beauty"; Gemalli, "camel-owner." The majority, however, have such significance, being compounded either (1) with terms denoting relationship, as *Abi*, or *ab* (Abihud, "father of praise"; Abijam, "f. of the sea"; Abimelech, "f. of the king"; Abinoam, "f. of pleasantness"; Abitub, "f. of goodness" etc. etc.);—*Achi* (Eng. ver. *Ahi*), "brother" (Ahihud, Ahimelech, Ahinoam, Ahitub, etc., etc.);—*Ben* (Syriac *Bar*), "son" (Benoni, "son of my sorrow"; Benjamin, "s. of my right hand"; Ben-hail, "s. of the host"; Barabbas, Bar-jona, etc.),—or *Bath*, "daughter" (Bathsheba, Bath-shua, "d. of an oath"); or (2) with nouns borrowed from the sphere of national life and aspiration, such as *Am* (אִם) "people," resembling the numerous Greek compounds with *λαός* and *δημος* (Amminadab, *q. v.*; Ammizabad, "people of the Giver" i. e. God; Jeroboam, "whose people are countless," or "increaser of the people"; Jashobeam, "he will return among the people," Jones, "people's leader," Ewald, "habitant in populo," Simonis; Jekameam, "gatherer of the people," etc.);—*Melech*, "king" (Abimelech, "father of the king"; Ahimelech, "brother of the king."—On Nathan-melech, Ebed-melech, aud Regem-melech, see Wilkinson, pp. 395-397); or (3) with names of God, as for instance, *Shaddai* (Ammishaddai, "people of the Almighty," and Zurishaddai, "my rock is the Almighty");—*El*, prefixed or suffixed (Elnathan or Nathaniel, equivalent to Theodotus or Dositheus; Eliezer, "God of help" or Ger. *Gothilf*; Israel, "pugnator Dei," Winer; Eliphalet, "God of salvation"; Ariel, "lion of God"; Elishaphat, "God is judge," Abdiel

"servant of God"); — *Adoni*, "lord" (Adoniram, "lord of exaltation," Adonijah, "my lord is Jehovah"; Adonikain, "lord of the enemy," Gesenius, or "lord who assists," Fürst, "Dominus surrexit," Simonis and Jones); — *Jehovah*, when prefixed shortened to *Jeho*, or *Jo*, when suffixed to *Jahn* or *jah* or *i* (Jonathan and Nathaniah, parallel with Elnathan and Nathaniel, "Jehovah-given," comp. Jehonadab and Jehohanan; Jehoiaa, "Jehovah knows"; Jehoiachin, "Jehovah will establish"; Joab, "whose father is Jehovah"; Elijah, "the strength of Jehovah"; Ishmerai, "whom Jehovah shall keep," etc.). It remains to be observed in this connection, that *Abi*, or *Ab*, is supposed by Gesenius and most etymologists to have originally designated in all instances a direct blood relationship, but in the process of time to have become a constituent part of proper names, which were used without reference to their strict etymological meanings. This view is opposed by Ewald, who thinks, however, that in later times the term "father" was often used to express a certain dignity, as "father" or lord of a town. So in 1 Chr. ii. 29, 42, 45, 50, &c., where *Ab* is compounded with names of places. On the possessive sense of *Ab* or *Abi* in composition, see Wilkinson, pp. 365-367.

The non-Hebrew names of the Old Testament are chiefly Egyptian, Canaanitish, and Persian. These are separately treated by Simonis, sec. xi., and Wilkinson, pp. 416-481.

Glancing a moment at the history of names and name-giving among the Hebrews, we readily distinguish many of those changes which characterize popular customs and habits in this particular among all peoples. In their first or ruder age their names are simple and "small of nature." In the period of their highest national and religious development we find more compounds and more allusions to artificial refinements. In the period of their humiliation and conflicts under the judgments of God, whole passages of Scripture were appropriated as in modern times by the Puritans of Great Britain. Hence such names as Hodaiah, "praise-ye-the-Lord"; Elioenai, "mine-eyes-are-unto-Jehovah." Hazeleponi, "give-shade-thou-that-turnest-thy-face-to-me" (Oehler), or, "give-shadow-that-seest-me" (Ewald). As soon as the people grew weary of this unwieldy nomenclature a very natural reaction led to the repristination of the simple and hallowed names of early Hebrew history. Loss of independence and intermarriage with foreigners led to the introduction of foreign names, the use of the Greek language to a translation of many Hebrew ones and to the modification of others, so that in the New Testament we find almost as great a variety of names as among the modern nations of Europe. There are *pure Hebrew* names, such as, Joseph, Simeon or Simon, Levi, Gamaliel, Saul, etc.; Hebrew names which have become *grecized in form*, such as Lazarus from Eleazar, Matthæus from Mattathiah or Mattaniah, Anna from Hannah, Zebedæus from Zabdi or Zebadiah, Zacchæus from Zaccai, Ananias from Chananiah, Alcimus from Eliakim, Jason from Joshua, etc.; *Aræman* names, such as Martha, Tabitha, Caiaphas, etc.; *Greek* names, such as Andreas, Andronicus, Euodia, Antipater, Philippos, etc.; *Latin* names: Marcus, Aquila, Priscilla, Justus, Paulus, etc., etc., and finally, even names which were *derived from those of the gods of Greece and Rome*, e. g., Apollonius, Phœbe, Nereus, Demetrius, Diotrepes,

Epaphroditus, Dionysius, Hermas, Olympiodorus Hymeneus, Artemas, etc., etc. These last names were doubtless given by heathen parents. On the New Testament proper names see particularly Schirlitz's *Grundzüge der neust. Gracität* (Gießen, 1861), pp. 140-161.

"Nomen est omen." Among no ancient people was this truer than among the Hebrews. Doubtless the more customary names became in time conventional, at least to some extent. Even an Ahab could give to sons borne him by Jezebel names compounded with Jehovah, as Ahaziah and Joram. Still, it cannot be denied that, in most instances, the choice of the name was understood as an act of religious profession and confession on the part of the parents. Even when the name must have grown perfectly familiar, we discover a tendency to seek for correspondences between its meaning and its bearer. See Abigail's allusion to the name of Nabal, 1 Sam. xxv. 25, Naomi's to her own, Ruth i. 20. Probably the perception of the significance of names was keener among ancient peoples, since their roots were almost universally of the vernacular language. Even Cicero cannot resist the temptation to play upon the name of the conspirators against Cæsar (the *Bruti*), and who can ever forget the cutting pasquinade on the Papal despoilers of the Pantheon: "*Quod non fecerunt Barbari, fecere Barberini!*" Among the Hebrews, this identification of name and person reached its climax. A tendency to it was characteristic of the nation, and under the supernatural tuition of Revelation it was fully developed. "In the spirit of that truthfulness, which desires to see all contradiction between name and nature done away, and every one called by his right name (comp. Is. v. 20, xxxii. 5; Rev. iii. 1), a series of names is here produced, which really express the personal significance and life-station of those who bear them, and which thus themselves become attestations of Revelation, abiding pledges of divine guidance and promise. These significant names are partly birth-names, partly and more commonly, new appellations. As outside the circle of Revelation, particularly among the oriental nations, it is customary to mark one's entrance into a new relation by a new name, in which case the acceptance of the new name involves the acknowledgment of the sovereignty of the name-giver, so the importance and new sphere assigned to the organs of Revelation in God's kingdom are frequently indicated by a change of name. Examples of this are Abraham, Gen. xvii. 5; Sarah, xvii. 15; Israel as designation of the spiritual character, in place of Jacob which designated the natural character, xxxii. 28; Joshua, Num. xiii. 16; comp. also Jerubbaal, Judg. vi. 32; in N. T. Cephas or Peter, John i. 42; Boanerges, Mar. iii. 17; Barnabas, Acts iv. 36. It is, however, remarkable, that in many instances where no particular reason is given, a striking correspondence is seen between the name and the character of the person; e. g. Saul, David, Solomon (comp. however 1 Chr. xxii. 9), Elijah (1 K. xviii. 36). What peculiar weight the prophets attached to names is well known. Nathan gives Solomon the name Jedidiah, "because of the Lord." Hosea (chap. i.) and Isaiah (viii. 3) express their prophecies in the names of their children. Isaiah comforts himself with the merciful pledge contained in the significance of his own name (viii. 18). The prophets frequently play upon the names of persons and places, and such instances of paronomasia are not to be regarded as mere rhetorical ornaments

Compare Micah's play upon his own name, Mic. vii. 13 (Caspari, *Commentar*, p. 20 ff.). such passages as Is. xxv. 10; Micah i. 10 ff. Jer. xx. 3, xxiii. 6. This intimate concrete relation between name and person explains, finally, certain Biblical modes of speech. When God elects a man by virtue of personal qualification, he is said to call him by name (Ex. xxxi. 2; Is. xl. 3, 4). When Jehovah says to Moses, 'I know thee by name' (Ex. xxxiii. 12), he means, he has placed himself in a specifically personal relation to Moses, in a relation pertaining to Moses alone, and therefore connected with his name. This explains also Is. xliii. 1: 'I have called thee by thy name and thou art mine' (comp. xlix. 1). Receiving a 'new name' from God (Is. lxxv. 15, lxii. 2: Rev. ii. 17, iii. 12) is the expression employed to denote a new personal relation to him established by an act of divine grace" (Oehler).

The attempt made by Strauss (*Leben Jesu, passim*), Bertholdt (*Einkleitung ins A. T.* pp. 2337-2357), and others, to prove from the peculiar significance of names the mythical origin of different books of the canon is simply puerile. Even Theodore Parker ridicules the former, by showing in like manner the mythical character of the Declaration of Independence from the fact of its reputed promulgation at Philadelphia, "the city of brotherly love" (see his review of Strauss's *Leben Jesu*). He also styles Bertholdt's arguments "merely nugatory," adding that all B. sayings of the names in the book of Ruth "may be said of almost all Hebrew names" (*Translation of De Wette's Introduction to the Old Test.*, i. 319). What havoc some future myth-hunter may make even of the names and achievements of these brave destroyers themselves! Strauss means "ostrich," "dispute," "strife"; Hitzig, "hot-headed"; Bauer, a "peasant," "rude fellow"; Neander, "new man"; Schleiermacher, "veil-maker"; Hengstenberg, "stallion-mountain," comp. Ang. Sax. "mare's-nest," — Ergo the tale of the famous battle in the nineteenth century, in Germany, between belief and unbelief is all a myth! No such man as Strauss ever lived, no such men as his reputed opponents!

In conclusion, for literature of the names of God, see art. **Jehovah**, and the bibliographical manuals. W. F. W.

**NANEA** [more correctly **NANĀ'Ā**] (*Navaia* : *Nanea*). The last act of Antiochus Epiphanes (vol. i. p. 116 b) was his attempt to plunder the temple of Nanea at Elymais, which had been enriched by the gifts and trophies of Alexander the Great (1 Macc. vi. 1-4; 2 Macc. i. 13-16). The Persian goddess Nanea, called also *Avārtis* by Strabo (xv. p. 733), is apparently the Moon goddess, of whom the Greek Artemis was the nearest representative in Polybius (quoted by Joseph. *Ant.* xii. 9. § 1). Beyer calls her the "Elymean Venus" (*ad Joh. Selleni*, etc., *addit.* p. 345), and Winer (*Realw.*) apparently identifies Nanea with Meni, and both with the planet Venus, the star of luck, called by the Syrians **نَيْب**, *Nani*, and in Zend *Nahid* or *Anahid*.

Elphinstone in 1811 found coins of the Sassanians with the inscription **NANĀĀĀ**, and on the reverse a figure with nimbus and lotus-flower (Movers, *Phæn.* i. 626). It is probable that Nanea is identical with the deity named by Strabo (xi. p. 532) as the *numen patrium* of the Persians, who was also honored by the Medes, Armenians, and in many districts of Asia Minor. Other forms of the name are *'Avala*, given by Strabo, *Αἰνή* by Polybius, *'Avērtis* by Plutarch, and *Tavaῖs* by Clemens Alexandrinus, with which last the variations of some MSS. of Strabo correspond. In consequence of a confusion between the Greek and Eastern mythologies, Nanea has been identified with Artemis and Aphrodite, the probability being that she corresponds with the Tauric or Ephesian Artemis, who was invested with the attributes of Aphrodite and represented the productive power of nature

In this case some weight may be allowed to the conjecture, that "the desire of women" mentioned in Dan. xi. 37 is the same as the goddess Nanaea.

In 2 Macc. ix. 1, 2, appears to be a different account of the same sacrilegious attempt of Antiochus; but the scene of the event is there placed at Persepolis, "the city of the Persians," where there might well have been a temple to the national deity. But Grimm considers it far more probable that it was an Elymaean temple which excited the cupidity of the king. See Gesenius, *Jesaja*, iii. 337, and Grimm's *Commentar in the Kurzgef. Handb.* W. A. W.

NA'OMI (נְאוֹמִי) [*my delight, pleasure*: Rom. Νοεμίν; Vat.] Νωεμειν; Alex. Νοομμειν, Νοεμειν, Νοομει, etc.: *Noemi*), the wife of Elimelech, and mother-in-law of Ruth (Ruth i. 2, &c., ii. 1, &c., iii. 1, iv. 3, &c.). The name is derived from a root signifying sweetness, or pleasantness, and this significance contributes to the point of the paronomasia in i. 2, 21, though the passage contains also a play on the mere sound of the name:—"Call me not Naomi (pleasant), call me Mara (bitter) . . . why call ye me Naomi when Jehovah hath testified (*anah*, נָאָה) against me?" G.

\* The life of this Hebrew woman, one of the most checkered which is given in the sacred record, derives its chief general interest from her relation to Ruth, her daughter-in-law, and from the position of the latter in Jewish history. But Naomi is really the heroine of the Book of Ruth, and her character appears beautiful as presented in this charming narrative. Her tenderness and generosity, her devout trust in God and grateful recognition of his hand, serve to explain the strong confidence and affection which she inspired in the daughter of Moab who identified herself with her darkest fortunes. Her constant counsels guided her faithful daughter-in-law—and, spared to become the nurse of her son, not a little of the moral influence which distinguished the line thus founded may have been transmitted from her. [RUTH, BOOK OF, Amer. ed.] S. W.

\* The name is properly Noomi, and not Naomi as in the A. V., perhaps after the Latin translation of Tremellius and Junius (*Nalomi*). See Wright's *Book of Ruth*, p. 3. The orthography of the A. V. appears in the Bishops' Bible. H.

NAPHISH (נַפְיִשׁ), "according to the Syriac usage, 'refreshment,'" Ges.: *Ναφές, Ναφισαῖοι: Naphís*), the last but one of the sons of Ishmael (Gen. xxv. 15; 1 Chr. i. 31). The tribe descended from Nodab was subdued by the Reubenites, the Gadites, and the half of the tribe of Manasseh, when "they made war with the Hagarites, with Ietur, and *Nephish* (Ναφισαῖων, LXX.), and Nodab" (1 Chr. v. 19). The tribe is not again found

in the sacred records, nor is it mentioned by later writers. It has not been identified with any Arabian tribe; but identifications with Ishmaelite tribes are often difficult. The difficulty in question arises from intermarriages with Keturahites and Joktanites, from the influence of Mohammedan history and from our ignorance respecting many of the tribes, and the towns and districts, of Arabia. The influence of Mohammedan history is here mentioned as the strongest instance of a class of influences very common among the Arabs, by which prominence has been given to certain tribes remarkable in the rise of the religion, or in the history of the country, its language, etc. But intermarriages exercise even a stronger influence on the names of tribes, causing in countless instances the adoption of an older name to the exclusion of the more recent, without altering the pedigree. Thus Mohammed claimed descent from the tribe of Mudád, although he gloried in being an Ishmaelite: Mudád took its name from the father of Ishmael's wife, and the name of Ishmael himself is merged in that of the older race. [ISHMAEL.]

If the Hagarites went southwards, into the province of Hejer, after their defeat, Naphish may have gone with them, and traces of his name should in this case be looked for in that obscure province of Arabia. He is described in Chronicles, with the confederate tribes, as pastoral, and numerous in men and cattle. [NODAB.]

E. S. P.

NAPHISI ([Vat.] Ναφισαί; [Rom.] Alex. Ναφισί; *Nasissim*), 1 Esdr. v. 31. [NEPHUSIM.]

NAPHTALI (נַפְתָּלִי): *Νεφθαλείμ*, and so also Josephus; [Rom. Alex. *Νεφθαλί*, -λίμ, -λεί, -λείμ; Vat. -λει, -λειμ; Sin. in Ps. lxxvii. 27, -λειμ, in Is. ix. 1, -λιμ: *Nephthalí*, *Nephthalí*]. The fifth son of Jacob; the second child borne to him by Bilhah, Rachel's slave. His birth and the bestowal of his name are recorded in Gen. xxx. 8: "and Rachel said 'wrestlings (or contortions—*naph-tále*) of God' have I wrestled (*niph-talí*) with my sister and have prevailed.' And she called his name *b* Naphthali."

By his birth Naphtali was thus allied to Dan (Gen. xxxv. 25); and he also belonged to the same portion of the family as Ephraim and Benjamin, the sons of Rachel; but, as we shall see, these connections appear to have been only imperfectly maintained by the tribe descended from him.

At the migration to Egypt four sons are attributed to Naphtali (Gen. xlvii. 24; Ex. i. 4; 1 Chr. vii. 13). Of the individual patriarch not a single trait is given in the Bible; but in the Jewish traditions he is celebrated for his powers as a swift runner, and he is named as one of the five who were chosen by Joseph to represent the family before Pharaoh (*Targ. Pseudojon.* on Gen. l. 13 and xlvii. 2).<sup>c</sup>

<sup>a</sup> That is, according to the Hebrew idiom, "immense wrestlings." *Ἀμηχάντος ὄλον*, "as if irresistible," is the explanation of the name given by Josephus (*Ant.* i. 19, § 8).

<sup>b</sup> An attempt has been made by Redslob, in his singular treatise *Die Attest. Namen*, etc. (Hamb. 1846, pp. 88, 89), to show that "Naphtali" is nothing but a synonym for "Galilee," and that again for "Cabal," all three being opprobrious appellations. But if there were no other difficulties in the way, this has the disadvantage of being in direct contradiction to the high

estimation in which the tribe was held at the date of the composition of the Songs of Deborah and Jacob.

<sup>c</sup> In the "Testaments of the Twelve Patriarchs," Naphtali dies in his 132d year, in the 7th month, on the 4th day of the month. He explains his name as given "because Rachel had dealt deceitfully" (*ἔμ πανουργία ἐποίησε*). He also gives the genealogy of his mother: Balla (Bilhah), the daughter of Routhaios, the brother of Deborah, Rebekah's nurse, was born the same day with Rachel. Routhaios was a Chaldean of the kindred of Abraham, who, being taken

When the census was taken at Mount Sinai the tribe numbered no less than 53,400 fighting men (Num. i. 43, ii. 30). It thus held exactly the middle position in the nation, having five above it in numbers, and six below. But when the borders of the Promised Land were reached, its numbers were reduced to 45,400, with four only below it in the scale, one of the four being Ephraim (Num. xxvi. 48-50; comp. 37). The leader of the tribe at Sinai was Ahira ben-Enan (Num. ii. 29); and at Shiloh, Pedahel ben-Anmihud (xxiv. 28). Amongst the spies its representative was Nahbi ben-Vophsi (xiii. 14).

During the march through the wilderness Naphtali occupied a position on the north of the Sacred Tent with Dan, and also with another tribe, which though not originally so intimately connected became afterwards his immediate neighbor — Asher (Num. ii. 25-31). The three formed the "Camp of Dan" and their common standard, according to the Jewish traditions, was a serpent or basilisk, with the motto, "Return, O Jehovah, unto the many thousands of Israel!" (*Targ. Pseudojon.* on Num. ii. 25).

In the apportionment of the land, the lot of Naphtali was not drawn till the last but one. The two portions then remaining unappropriated were the noble but remote district which lay between the strip of coast-land already allotted to Asher and the upper part of the Jordan, and the little canton or corner, more central, but in every other respect far inferior, which projected from the territory of Judah into the country of the Philistines, and formed the "marches" between those two everting combatants. Naphtali chose the former of these, leaving the latter to the Danites, a large number of whom shortly followed their relatives to their home in the more remote but more undisturbed north, and thus testified to the wisdom of Naphtali's selection.

The territory thus appropriated was inclosed on three sides by those of other tribes. On the west, as already remarked, lay Asher; on the south Zebulun, and on the east the trans-Jordanic Manasseh. The north terminated with the ravine of the *Litány* or *Leontes*, and opened into the splendid valley which separates the two ranges of Lebanon. According to Josephus (*Ant. v. 1, § 22*) the eastern side of the tribe reached as far as Damascus; but of this — though not impossible in the early times of the nation and before the rise of the Syrian monarchy — there is no indication in the Bible. The south boundary was probably very much the same as that which at a later time separated Upper from Lower Galilee, and which ran from or about the town of *Akké* to the upper part of the Sea of Gennesaret. Thus Naphtali was cut off from the great plain of Esdraelon — the favorite resort of the hordes of plunderers from beyond the Jordan, and the great battlefield of the country — by the mass of the mountains of Nazareth; while on the east it had a communication with the Sea of Galilee, the rich district of the *Ard el-Hüleh* and the *Merj Ayûn*, and all the splendidly watered country about *Banias* and *Hasbeya*, the springs of Jordan. "O Naphtali," thus accurately does the Song attributed to the dying lawgiver express itself with

regard to this part of the territory of the tribe — "O Naphtali, satisfied with favor and full of Jehovah's blessing, the sea<sup>a</sup> and the south possess thou!" (Deut. xxxiii. 23). But the capabilities of these plains and of the access to the Lake, which at a later period raised GALILEE and GENNESARET to so high a pitch of crowded and busy prosperity, were not destined to be developed while they were in the keeping of the tribe of Naphtali. It was the mountainous country ("Mount Naphtali," Josh. xx. 7) which formed the chief part of their inheritance, that impressed or brought out the qualities for which Naphtali was remarkable at the one remarkable period of its history. This district, the modern *Belad-Besharah*, or "land of good tidings," comprises some of the most beautiful scenery, and some of the most fertile soil in Palestine (Porter, p. 363), forests surpassing those of the renowned Carmel itself (Van de Velde, i. 293); as rich in noble and ever-varying prospects as any country in the world (ii. 407). As it is thus described by one of the few travellers who have crossed its mountains and descended into its ravines, so it was at the time of the Christian era: "The soil," says Josephus (*B. J. iii. 3, § 2*), "universally rich and productive; full of plantations of trees of all sorts; so fertile as to invite the most slothful to cultivate it." But, except in the permanence of these natural advantages, the contrast between the present and that earlier time is complete; for whereas, in the time of Josephus, Galilee was one of the most populous and busy districts of Syria, now the population is in an inverse proportion to the luxuriance of the natural vegetation (Van de Velde, i. 170).

Three of the towns of Naphtali were allotted to the Gershonite Levites — Kedesh (already called Kedesh-in-Galilee), Hammoth-dor, and Kartan. Of these, the first was a city of refuge (Josh. xx. 7, xxi. 32). Naphtali was one of Solomon's commissariat districts, under the charge of his son-in-law Ahimaa; who with his wife Basmath resided in his presidency, and doubtless enlivened that remote and rural locality by a miniature of the court of his august father-in-law, held at Safed or Kedesh, or wherever his residence may have been (1 K. iv. 15). Here he doubtless watched the progress of the unpromising new district presented to Solomon by Hiram — the twenty cities of Cabul, which seem to have been within the territory of Naphtali, perhaps the nucleus of the Galilee of later date. The ruler of the tribe (נַפְתָּלִי) — a different dignity altogether from that of Ahimaa — was, in the reign of David, Jerimoth ben-Azriel (1 Chr. xxvii. 19).

Naphtali had its share in those incursions and molestations by the surrounding heathen, which were the common lot of all the tribes (Judah perhaps alone excepted) during the first centuries after the conquest. One of these, apparently the severest struggle of all, fell with special violence on the north of the country, and the leader by whom the invasion was repelled — BARAK of Kedesh-Naphtali — was the one great hero whom Naphtali is recorded to have produced. How gigantic were the efforts by which these heroic mountaineers

saptive, was bought as a slave by Laban. Laban gave him his maid Aina or Eva for wife, by whom he had Zolipha (Zilpah) — so called from the place in

which he had been captive — and Balla (Fabricius, *Cod. Pseudepigr. V. T. i. 659, &c.*).

<sup>a</sup> Yam, rendered "west" in the A. V., but obviously the "Sea" of Galilee.

saved their darling highlands from the swarms of Canaanites who followed Jabin and Sisera, and how grand the position which they achieved in the eyes of the whole nation, may be gathered from the narrative of the war in Judg. iv., and still more from the expressions of the triumphal song in which Deborah, the prophetess of Ephraim, immortalized the victors, and branded their reluctant countrymen with everlasting infamy. Gilead and Reuben lingered beyond the Jordan amongst their flocks: Dan and Asher preferred the luxurious calm of their hot lowlands to the free air and fierce strife of the mountains; Issachar with characteristic sluggishness seems to have moved slowly if he moved at all; but Zebulun and Naphtali on the summits of their native highlands devoted themselves to death, even to an extravagant pitch of heroism and self-devotion (Judg. v. 18):—

"Zebulun are a people that threw away their lives even unto death—

And Naphtali, on the high places of the field."

The mention of Naphtali contained in the Song attributed to Jacob—whether it is predictive, or as some writers believe, retrospective—must have reference to this event: unless indeed, which is hardly to be believed, some other heroic occasion is referred to, which has passed unrecorded in the history. The translation of this difficult passage given by Ewald (*Geschichte*, ii. 380) has the merit of being more intelligible than the ordinary version, and also more in harmony with the expressions of Deborah's Song:—

"Naphtali is a towering Terebinth;  
He hath a goodly crest."

The allusion, at once to the situation of the tribe at the very apex of the country, to the heroes who towered at the head of the tribe, and to the lofty mountains on whose summits their castles, then as now, were perched—is very happy, and entirely in the vein of these ancient poems.

After this burst of heroism, the Naphtalites appear to have resigned themselves to the intercourse with the <sup>b</sup> heathen, which was the bane of the northern tribes in general, and of which there are already indications in Judg. i. 33. The location by Jeroboam within their territory of the great sanctuary for the northern part of his kingdom must have given an impulse to their nationality, and for a time have revived the connection with their brethren nearer the centre. But there was one circumstance fatal to the prosperity of the tribe, namely, that it lay in the very path of the northern invaders. Syrian and Assyrian, Benhadad and Tiglath-pileser, each had their first taste of the plunder of the Israelites from the goodly land of Naphtali. At length in the reign of Pekah king of Israel (cir. B. C. 730), Tiglath-pileser overran the whole of the north of Israel, swept off the population, and bore them away to Assyria.

But though the history of the tribe of Naphtali

<sup>a</sup> So Ewald, *wegwerfend* (*Dichter*, i. 130).

<sup>b</sup> This is implied in the name of Galilee, which, at an early date, is styled גליל הגליות, *gelil hagoyim*, Galilee of the Gentiles.

<sup>c</sup> Not to the *placæ*, as in the Vulgate, — *hunc locum*.

<sup>d</sup> The word "water" is here used merely for "liquor," as in *aqua vitæ*. Native naphtha is sometimes obtained without color, and in appearance not unlike water.

ends here, and the name is not again mentioned except in the well-known citation of St. Matthew (iv. 15), and the mystical references of Ezekiel (xlviii. 3, 4, 34) and of the writer of the Apocalypse (Rev. vii. 6), yet under the title of GALILEE—apparently an ancient name, though not brought prominently forward till the Christian era—the district which they had formerly occupied was destined to become in every way far more important than it had ever before been. For it was the cradle of the Christian faith, the native place of most of the Apostles, and the "home" of our Lord. [GALILEE, vol. i. p. 860 a; CAPERNAUM, 381.]

It also became populous and prosperous to a degree far beyond anything of which we have any indications in the Old Testament; but this, as well as the account of its sufferings and heroic resistance during the campaign of Titus and Vespasian prior to the destruction of Jerusalem, must be given elsewhere. [GALILEE; PALESTINE.] G.

NAPHTALI, MOUNT (הַר נַפְתָּלִי) τῶ ὄρει τῶ Νεφθαλεί [Rom. -λί]: *Mons Nephthali*. The mountainous district which formed the main part of the inheritance of Naphtali (Josh. xx. 7), answering to "Mount Ephraim" in the centre and "Mount Judah" in the south of Palestine.

NAPHTHAR (νεφθαρ: *Nephthar*). The name given by Nehemiah to the substance <sup>c</sup> which after the return from Babylon was discovered in the dry pit in which at the destruction of the Temple the sacred Fire of the altar had been hidden (2 Macc. i. 36, comp. 19). The legend is a curious one; and it is plain, from the description of the substance—"thick water," <sup>d</sup> which, being poured over the sacrifice and the wood, was kindled by the great heat of the sun, and then burnt with an exceedingly bright and clear flame (ver. 32)—that it was either the same as or closely allied to the naphtha of modern commerce (*Petroleum*). The narrative is not at all extravagant in its terms, and is very probably grounded on some actual occurrence. The only difficulty it presents is the explanation given of the name: "Naphthar, which is, being interpreted, cleansing" (*καθαρισμῶς*), and which has hitherto puzzled all the interpreters. It is perhaps due to some mistake in copying. A list of conjectures will be found in Grimm (*Kurzgef. Handb.* ad loc.), and another in Reland's *Dis. de vet. Ling. Pers.* lxxviii.

The place from which this combustible water was taken was inclosed by the "king of Persia" (Artaxerxes Longimanus), and converted into a sanctuary (such seems the force of *ἱερὸν ποιεῖν* ver. 34). In modern times it has been identified with the large well called by the Arabs *Bir-eyül*, situated beneath Jerusalem, at the confluence of the valley of Kidron and Hinnom with the *Wady en-Nar* (or "valley of the fire"), and from which the main water supply of the city is obtained.

This well, the Arab name of which may be the well of Joab or of Job, and which is usually identi-

uid," as in *aqua vitæ*. Native naphtha is sometimes obtained without color, and in appearance not unlike water.

<sup>e</sup> Grimm. (p. 50) notices a passage in the "Adam-book" of the Ethiopian Christians, in which Ezra is said to have discovered in the vaults of the Temple censer full of the Sacred Fire which had formerly burnt in the Sanctuary.

bed with En-rogel, is also known to the Frank Christians as the "Well of Nehemiah." According to Dr. Robinson (*Bibl. Res.* : 331, 2 note), the first trace of this name is in Quaresmius (*Elucidatio*, etc. ii. 270-4), who wrote in the early part of the 17th cent. (1616-25). He calls it "the well of Nehemiah and of fire," in words which seem to imply that such was at that time its recognized name: "Celebris ille et nominatus puteus, Nehemie et ignis appellatus." The valley which runs from it to the Dead Sea is called *Wady en-Nar*, "Valley of the Fire;" but no stress can be laid on this, as the name may have originated the tradition. A description of the *Bir-egab* is given by Williams (*Holy City*, ii. 423-95), Barclay (*City*, etc., 513-16), and by the careful Tobler (*Umgebungen*, etc., p. 50). At present it would be an equally unsuitable spot either to store fire or to seek for naphtha. One thing is plain, that it cannot have been En-rogel (which was a living spring of water from the days of Joshua downwards), and a naphtha well also. G.

**NAPHTUHIM** (נַפְתּוּחִים) [Egyptian, see below]: *Νεφθαλείμ*; [in 1 Chr., Rom. Vat. omit, Comp. Ald. *Νεφθασειμ*; Alex. *Νεφθαλειμ*, *Νεφθαλιμ*;] *Nephthim*, *Nephthumim*, a Mizraite nation or tribe, mentioned only in the account of the descendants of Noah (Gen. x. 13; 1 Chr. i. 11). If we may judge from their position in the list of the Mizraites, according to the Masoretic text (in the LXX. in Gen. x. they follow the Ludim and precede the Anamim, Ἐνεμετείμ), immediately after the Lehabim, who doubtless dwelt to the west of Egypt, and before the Pathrusim, who inhabited that country, the Naphthumim were probably settled at first, or at the time when Gen. x. was written, either in Egypt or immediately to the west of it. In Coptic the city Marea and the neighboring territory, which probably corresponded to the older Meroitic nome, is called **ΝΑΦΔΙΑΤ** or **ΝΑΦΔΙΑΔΑ**, a name composed of the word **ΦΔΙΑΤ** or **ΦΔΙΑΔΑ**, of unknown meaning, with the plural definite article **ΝΑ** prefixed. In hieroglyphics mention is made of a nation or confederacy of tribes conquered by the Egyptians called "the Nine Bows,"<sup>a</sup> a name which Champollion read Naphit, or, as we should write it, NA-PETU, "the bows," though he called them "the Nine Bows."<sup>b</sup> It seems, however, more reasonable to suppose that we should read (ix.) PETU "the Nine Bows" literally. It is also doubtful whether the Coptic name of Marea contains the word "bow," which is only found in the forms **ΝΑΤΕ** (S. masc.) and **ΦΑΤ** (M. fem. "a rainbow"); but it is possible that the second part of the former may have been originally the same as the latter. It is noteworthy that there should be two geographical names connected with the bow in hieroglyphics, the one of a country, MERU-PET, "the island of the bow," probably MEROË, and the other of a nation or confederacy, "the Nine Bows," and that in the list of the Hamites there should be two similar names, Phut and Naphthumim, besides Cush, probably of like sense.

No important historical notice of the Nine Bows has been found in the Egyptian inscriptions: they are only spoken of in a general manner when the kings are said, in laudatory inscriptions, to have subdued great nations, such as the Negroes, or extensive countries, such as KEESII, or Cush. Perhaps therefore this name is that of a confederacy or of a widely-spread nation, of which the members or tribes are spoken of separately in records of a more particular character, treating of special conquests of the Pharaohs or enumerating their tributaries.

R. S. P.

\* **NAPKIN** (σουδάριον: *sularium*), Luke xix. 20; John xi. 44, xx. 7. The original term is not so restricted in its meaning as our word *naphkin*, but rather corresponds to *HANDKERCHIEF*, which see. "Napkin" was formerly used in this wider sense, as by Shakespeare. A.

**NARCIS'SUS** (Νάρκισσος ["daffodil": *Narcissus*]). A dweller at Rome (Rom. xvi. 11), some members of whose household were known as Christians to St. Paul. Some persons have assumed the identity of this Narcissus with the secretary of the emperor Claudius (Suetonius, *Claudius*, § 28). But that wealthy and powerful freedman satisfied the revenge of Agrippina by a miserable death in prison (*Tac. Ann.* xiii. 1), in the first year of Nero's reign (A. D. 54-55), about three years before this Epistle was written. Dio Cassius, lxxiv. 3, mentions another Narcissus, who probably was living in Rome at that time; he attained to some notoriety as an associate of Nero, and was put to an ignominious death with Helius, Patrobius, Locusta, and others, on the accession of Galba, A. D. 68. His name, however (see Reimar's note, *in loco*), was at that time too common in Rome to give any probability to the guess that he was the Narcissus mentioned by St. Paul. A late and improbable tradition (Pseudo-Hippolytus) makes Narcissus one of the seventy disciples, and bishop of Athens. W. T. B.

**NARD.** [SPIKENARD.]

**NAS'BAS** (Νασβάς; [Sin. *Ναβαδ*: *Nabuth*]). The nephew of Tobit who came with Achiacharus to the wedding of Tobias (Tob. xi. 18). Grotius considers him the same with Achiacharus the son of Anael, but according to the Vulgate they were brothers. The margin of the A. V. gives "Junius" as the equivalent of Nasbas.

**NA'SITH** (Νασί: [Vat. *Νασει*;] Alex. *Νασιθ*: *Nasit*) = NEZIAH (1 Esdr. v. 32: comp. Ezer. ii. 54).

**NA'SOR, THE PLAIN OF** (τὸ πεδῖον *Νασώρ* [Sin. and 4 cursive MSS. *Ασωρ*, see below]: *Campus Asor*), the scene of an action between Jonathan the Maccabee and the forces of Demetrius (? Macc. xi. 67, comp. 63). It was near Cades (Kadesh-Naphtali) on the one side, and the water of Gennesar (Lake of Gennesaret) on the other, and therefore may be safely identified with the Hazor which became so renowned in the history of the conquest for the victories of Joshua and Barak (vol. ii. p. 1015b). In fact the name is the same, except that through the error of a transcriber the N from the preceding Greek word has become attached to it. Josephus (*Ant.* xiii. 5, § 7) gives it correctly, Ἀσώρ. [Comp. NAARATHI, p. 2048 note.] G.

**NATHAN** (נָתָן [G:ven i. e. of God]: *Néṯan*. *Nathan*), an eminent Hebrew prophet in the reigns

<sup>a</sup> Dr. Brugsch reads this name "the Nine Peoples" *Geographische Inschriften*, ii. p. 20).

<sup>b</sup> A bow in hieroglyphics is PET, PEET, or PETER.

of David and Solomon. If the expression "first and last," in 2 Chr. ix. 29, is to be taken literally, he must have lived late into the life of Solomon, in which case he must have been considerably younger than David. At any rate he seems to have been the younger of the two prophets who accompanied him, and may be considered as the latest direct representative of the schools of Samuel.

A Jewish tradition mentioned by Jerome (*Qu. Heb.* on 1 Sam. xvii. 12) identifies him with the eighth son of Jesse. [DAVID, vol. i. p. 552 b.] But of this there is no proof.

He first appears in the consultation with David about the building of the Temple. He begins by advising it, and then, after a vision, withdraws his advice, on the ground that the time was not yet come (2 Sam. vii. 2, 3, 17). He next comes forward as the reprover of David for the sin with Bathsheba; and his famous apologue on the rich man and the ewe lamb, which is the only direct example of his prophetic power, shows it to have been of a very high order (2 Sam. xii. 1-12).

There is an indistinct trace of his appearing also at the time of the plague which fell on Jerusalem in accordance with the warning of Gad. "An angel," says Eusebius (*Euseb. Præp. Ev.* ix. 30), "pointed him to the place where the Temple was to be built, but forbade him to build it, as being stained with blood, and having fought many wars. His name was Dianathan." This was probably occasioned by some confusion of the Greek version, *διὰ Νάθαν*, with the parallel passage of 1 Chr. xxii. 8, where the bloodstained life of David is given as a reason against the building, but where Nathan is not named.

On the birth of Solomon he was either specially charged with giving him his name, JEDIDIAN, or else with his education, according as the words of 2 Sam. xii. 25, "He sent (or 'sent him') by (or 'into') the hand of Nathan," are understood. At any rate, in the last years of David, it is Nathan who, by taking the side of Solomon, turned the scale in his favor. He advised Bathsheba; he himself ventured to enter the royal presence with a remonstrance against the king's apathy; and at David's request he assisted in the inauguration of Solomon (1 K. i. 8, 10, 11, 22, 23, 24, 32, 34, 38, 45).

This is the last time that we hear directly of his intervention in the history. His son Zabud succeeded the post of "King's Friend," perhaps succeeding Nathan (2 Sam. xv. 37; 1 Chr. xxvii. 33). His influence may be traced in the perpetuation of his manner of prophecy in the writings ascribed to Solomon (compare Eccl. ix. 14-16 with 2 Sam. xii. 1-4).

He left two works behind him — a Life of David (1 Chr. xxix. 29), and a Life of Solomon (2 Chr. ix. 29). The last of these may have been incomplete, as we cannot be sure that he outlived Solomon. But the biography of David by Nathan is, of all the losses which antiquity, sacred or profane, has sustained, the most deplorable.

The consideration in which he was held at the time is indicated by the solemn announcement of his approach — "Behold Nathan the prophet" (1 K. i. 23). The peculiar affix of "the prophet," as distinguished from "the seer," given to Samuel and Gad (1 Chr. xxix. 29), shows his identification with the later view of the prophetic office indicated in 1 Sam. ix. 9. His grave is shown at *Ialhal* near Helvon (see Robinson, *Bibl. Res.* i. 216 note).

A. P. S.

2. A son of David; one of the four who were borne to him by Bathsheba (1 Chr. iii. 5; comp. xiv. 4, and 2 Sam. v. 14). He was thus own brother to Solomon — if the order of the lists is to be accepted, elder brother; though this is at variance with the natural inference from the narrative of 2 Sam. xii. 24, which implies that Solomon was Bathsheba's second son. The name was not unknown in David's family; Nathan-el was one of his brothers, and Jo-nathan his nephew.

Nathan appears to have taken no part in the events of his father's or his brother's reigns. He is interesting to us from his appearing as one of the forefathers of Joseph in the genealogy of St. Luke (iii. 31) — "the private genealogy of Joseph, exhibiting his line as David's descendant, and thus showing how he was heir to Solomon's crown" (vol. i. p. 885). The hypothesis of Lord Arthur Hervey is that on the failure of Solomon's line in Jehoiachin or Jeconiah, who died without issue, Salathiel of Nathan's house became heir to David's throne, and then was entered in the genealogical table as "son of Jeconiah" (i. 885 b). That the family of Nathan was, as this hypothesis requires, well known at the time of Jehoiachin's death, is implied by its mention in Zech. xii. 12, a prophecy the date of which is placed by Ewald (*Propheten*, i. 391) as fifteen years after Habbakuk, and shortly before the destruction of Jerusalem by Nebuchadnezzar — that is, a few years only after Jehoiachin's death.

3. [In 2 Sam., Rom. Vat. *Nathard*.] Son, or brother, of one of the members of David's guard (2 Sam. xxiii. 36; 1 Chr. xi. 38). In the former of these two parallel passages he is stated to be "of Zobah," i. e. Aram-Zobah, which Kennicott in his investigation (*Dissert.* 215, 216) decides to have been the original reading, though he also decides for "brother" against "son."

4. One of the head men who returned from Babylon with Ezra on his second expedition, and whom he despatched from his encampment at the river Ahava to the colony of Jews at Casiphia, to obtain thence some Levites and Nethinim for the Temple service (Ezr. viii. 16; 1 Esdr. viii. 44). That Nathan and those mentioned with him were laymen, appears evident from the concluding words of the preceding verse, and therefore it is not impossible that he may be the same with the "son of Baui" who was obliged to relinquish his foreign wife (Ezr. x. 39), though on the other hand these marriages seem rather to have been contracted by those who had been longer in Jerusalem than he, who had so lately arrived from Babylon, could be.

G.

NATHANAEL (*Nathanan*), *gift of God*: [*Nathanaël*], a disciple of Jesus Christ concerning whom, under that name at least, we learn from Scripture little more than his birth-place, Cana of Galilee (John xxi. 2), and his simple truthful character (John i. 47). We have no particulars of his life. Indeed the name does not occur in the first three Gospels.

We learn, however, from St. John that Jesus, on the third or fourth day after his return from the scene of his temptation to that of his baptism, having been proclaimed by the Baptist as the Lamb of God, was minded to go into Galilee. He first then called Philip to follow Him, but Philip could not set forth on his journey without communicating to Nathanael the wonderful intelligence which he had received from his master the Baptist, namely, that the Messiah so long foretold by Moses

and the Prophets had at last appeared. Nathanael, who seems to have heard the announcement at first with some distrust, as doubting whether anything good could come out of so small and inconsiderable a place as Nazareth — a place nowhere mentioned in the Old Testament — yet readily accepted Philip's invitation to go and satisfy himself by his own personal observation (John i. 46). What follows is a testimony to the humility, simplicity, and sincerity of his own character from One who could read his heart, such as is recorded of hardly any other person in the Bible. Nathanael, on his approach to Jesus, is saluted by Him as "an Israelite indeed, in whom is no guile" — a true child of Abraham, and not simply according to the flesh. So little, however, did he expect any such distinctive praise, that he could not refrain from asking how it was that he had become known to Jesus. The answer, "before that Philip called thee, when thou wast under the fig-tree, I saw thee," appears to have satisfied him that the speaker was more than man — that He must have read his secret thoughts, and heard his unuttered prayer at a time when he was studiously screening himself from public observation. The conclusion was inevitable. Nathanael at once confessed "Rabbi, thou art the Son of God; thou art the King of Israel" (John i. 49). The name of Nathanael occurs but once again in the Gospel narrative, and then simply as one of the small company of disciples to whom Jesus showed Himself at the Sea of Tiberias after his resurrection. On that occasion we may fairly suppose that he joined his brethren in their night's venture on the lake — that, having been a sharer of their fruitless toil, he was a witness with them of the miraculous draught of fishes the next morning — and that he afterwards partook of the meal, to which, without daring to ask, the disciples felt assured in their hearts, that He who had called them was the Lord (John xxi. 12). Once therefore at the beginning of our Saviour's ministry, and once after his resurrection, does the name of Nathanael occur in the Sacred Record.

This scanty notice of one who was intimately associated with the very chiefest Apostles, and was himself the object of our Lord's most emphatic commendation, has not unnaturally provoked the inquiry whether he may not be identified with another of the well-known disciples of Jesus. It is indeed very commonly believed that Nathanael and Bartholomew are the same person. The evidence for that belief is as follows: St. John, who twice mentions Nathanael, never introduces the name of Bartholomew at all. St. Matt. x. 3; St. Mark iii. 18, and St. Luke vi. 14, all speak of Bartholomew, but never of Nathanael. It may be, however, that Nathanael was the proper name, and Bartholomew (son of Tholmai) the surname of the same disciple, just as Simon was called Bar-Jona, and Jesus, Barnabas.

It was Philip who first brought Nathanael to Jesus, just as Andrew had brought his brother Simon, and Bartholomew is named by each of the first three Evangelists immediately after Philip; while by St. Luke he is coupled with Philip precisely in the same way as Simon with his brother Andrew, and James with his brother John. It should be observed, too, that, as all the other disciples mentioned in the first chapter of St. John became Apostles of Christ, it is difficult to suppose that one who had been so singularly commended

by Jesus, and who in his turn had so promptly and so fully confessed Him to be the Son of God, should be excluded from the number. Again, that Nathanael was one of the original twelve, is inferred with much probability from his not being proposed as one of the candidates to fill the place of Judas. Still we must be careful to distinguish conjecture, however well founded, from proof.

To the argument based upon the fact, that in St. John's enumeration of the disciples to whom our Lord showed Himself at the Sea of Tiberias Nathanael stands before the sons of Zebedee, it is replied that this was to be expected, as the writer was himself a son of Zebedee; and further that Nathanael is placed after Thomas in this list, while Bartholomew comes before Thomas in St. Matthew, St. Mark, and St. Luke. But as in the Acts St. Luke reverses the order of the two names, putting Thomas first, and Bartholomew second, we cannot attach much weight to this argument.

St. Augustine not only denies the claim of Nathanael to be one of the Twelve, but assigns as a reason for his opinion, that whereas Nathanael was most likely a learned man in the Law of Moses, it was, as St. Paul tells us, 1 Cor. i. 26, the wisdom of Christ to make choice of rude and unlettered men to confound the wise (*in John. Ev. c. i. § 17*). St. Gregory adopts the same view (*on John i. 33, c. 16. B*). In a dissertation on John i. 46, to be found in *Theo. philolog. ii. 370*, the author, J. Kindler, maintains that Bartholomew and Nathanael are different persons.

There is a tradition that Nathanael was the bridegroom at the marriage of Cana (Calmet), and Epiphanius, *Adv. Hæc. i. § 223*, implies his belief that of the two disciples whom Jesus overtook on the road to Emmaus Nathanael was one.

2. 1 Esdr. i. 9. [NETHANEEL.]

3. (Ναθαναήλος: [*Nathaneel*]) 1 Esdr. ix. 22. [NETHANEEL.]

4. (*Nathanias*.) Son of Samael; one of the ancestors of Judith (Jud. viii. 1), and therefore a Simeonite (ix. 2). E. II. . . . s.

NATHANI'AS (Ναθανίας: om. in Vulg.)= NATHAN of the sons of Bani. (1 Esdr. ix. 34; comp. Ezr. x. 39).

NATHAN-ME'LECH (נָתָן־מֶלֶךְ) [*appointed of the king*, Ges.]: Ναθαν βασιλεύς: *Nathan-melech*. A eunuch (A. V. "chamberlain") in the court of Josiah, by whose chamber at the entrance to the Temple were the horses which the kings of Judah had dedicated to the sun (2 K. xxiii. 11). The LXX. translate the latter part of the name as an appellative, "Nathan the king."

\* NAUGHTINESS (1 Sam. xvii. 28; Prov. xi. 6; James i. 21), signified wickedness when our present version of the Scriptures was made. Recent translators (as Conant, Noyes) substitute "excess of wickedness" for "superfluity of naughtiness" (περισσεύειν κακίας) in James as above. [NAUGHTY.] H.

\* NAUGHTY, formerly used in the sense of worthless, bad, as in Jer. xxiv. 2, "naughty figs", and hence also morally corrupt, wicked, as Prov. vi. 12, "a naughty person, a wicked man," and Prov. xv. 4, "a naughty tongue." It is now applied generally to the conduct of pert or mischievous children. H.

NA'UM (Ναούμ: [*Nahum*], son of Eshl, and father of Amos, in the genealogy of Christ (Luke

nii. 25), about contemporary with the high-priesthood of Jason and the reign of Antiochus Epiphanes. The only point to be remarked is the circumstance of the two consecutive names, Naum and Amos, being the same as those of the prophets N. and A. But whether this is accidental, or has any peculiar significance, it is difficult to say. Naum is also a Phœnician proper name (Ges. s. v. and *Mon. Phœn.* p. 134). *Neheniath* is formed from the same root, נָחַם, "to comfort." A. C. H.

NAVE. The Heb. נָבַע, *nav*, conveys the notion of convexity or protuberance. It is rendered in A. V. boss of a shield, Job xv. 26; the eyebrow, Lev. xiv. 9; an eminent place, Ez. xvi. 31; once only in plur. naves, נֹוֹתוֹי, radii, 1 K. vii. 33; but in Ez. i. 18 twice, נֹוֹתוֹי, "rings," and marg. "strakes," an old word apparently used both for the nave of a wheel from which the spokes proceed, and also more probably the felloe or the tire, as making the streak or stroke upon the ground. (Halliwell, Phillips, Bailey, Ash, *Eng. Dictionaries*, "strake.") Gesenius, p. 256, renders *curvatura rotarum*. [CHARIOT; LAYER; GABBATHA] H. W. P.

NA'VE (*Navh; Nave*). Joshua the son of Nun is always called in the LXX. "the son of Nave," and this form is retained in Eccles. xlv. 1.

NAZ'ARENE (*Ναζαρηθ, Ναζαρηθός; Nazareus, Nazarenus*), an inhabitant of Nazareth. This appellative is found in the N. T. applied to Jesus by the demons in the synagogue at Capernaum (Mark i. 24; Luke iv. 34); by the people, who so describe him to Bartimeus (Mark x. 47; Luke xviii. 37); by the soldiers who arrested Jesus (John xviii. 5, 7); by the servants at his trial (Matt. xxvi. 71; Mark xiv. 67); by Pilate in the inscription on the cross (John xix. 19); by the disciples on the way to Emmaus (Luke xxiv. 19); by Peter (Acts ii. 22, iii. 6, iv. 10); by Stephen, as reported by the false witness (Acts vi. 14); by the ascended Jesus (Acts xxii. 8); and by Paul (Acts xxvi. 9). This name, made striking in so many ways, and which, if first given in scorn, was adopted and gloried in by the disciples, we are told, in Matt. ii. 23, possesses a prophetic significance. Its application to Jesus, in consequence of the providential arrangements by which his parents were led to take up their abode in Nazareth, was the filling out of the predictions in which the promised Messiah is described as a *Netszer* (נֶצֶר), i. e. a shoot, sprout, of Jesse, a humble and despised descendant of the decayed royal family. Whenever men spoke of Jesus as the Nazarene, they either consciously or unconsciously pronounced one of the names of the predicted Messiah, a name indicative both of his royal descent and his humble condition. This explanation, which Jerome mentions as that given by learned (Christian) Jews in his day, has been adopted by Surenhusius, Fritzsche, Gieseler, Krabbe (*Leben Jesu*), Drechsler (on Is. xi. 1), Schirlitz (*N. T. Wörterb.*), Robinson (*N. T. Lex.*), Hengstenberg (*Christol.*), De Wette, and Meyer. It is confirmed by the following considerations: (1.) *Netszer*, as Hengstenberg, after de Dieu and others, has proved, was the proper Hebrew name of Nazareth. (2.) The reference to the etymological signification of the word is entirely in keeping with Matt. ii. 21-23. (3.) The Messiah is expressly called a *Netszer* in Is. xi. 1. (4.) The same thought,

and under the same image, although expressed by a different word, is found in Jer. xxiii. 5, xxxiii. 15; Zech. iii. 8, vi. 12, which accounts for the statement of Matthew that this prediction was uttered "by the prophets" in the plural.

It is unnecessary therefore to resort to the hypothesis that the passage in Matt. ii. 23 is a quotation from some prophetic book now lost (Chryso-st., Theophyl., Clericus), or from some apocryphal book (Ewald), or was a traditional prophecy (Calovius; Alexander, *Connection and Harmony of the Old and N. T.*), all which suppositions are refuted by the fact that the phrase "by the prophets," in the N. T., refers exclusively to the canonical books of the O. T. The explanation of others (Tert., Erasm., Calv., Bez., Grot., Wetstein), according to whom the declaration is that Jesus should be a *Nazurite* (נֹזֵרִי), i. e. one specially consecrated or devoted to God (Judg. xiii. 5), is inconsistent, to say nothing of other objections, with the LXX. mode of spelling the word, which is generally *Ναζαρηθός*, and never *Ναζαρηθός*. Within the last century the interpretation which finds the key of the passage in the contempt in which Nazareth may be supposed to have been held has been widely received. So Paulus, Rosenm., Kuin., Van der Palm, Gersdorf, A. Barnes, Olsh., Davidson, Elrard, Lange. According to this view the reference is to the despised condition of the Messiah, as predicted in Ps. xxii. 1s. liii. That idea, however, is more surely expressed in the first explanation given, which has also the advantage of recognizing the apparent importance attached to the signification of the name ("He shall be called"). Recently a suggestion which Witsius borrowed from Socinus has been revived by Zuschlag and Riggenbach, that the true word is נֹזֵרִי or נֹזֵרִי, *my Saviour*, with reference to Jesus as the Saviour of the world, but without much success. Once (Acts xxiv. 5) the term *Nazarenes* is applied to the followers of Jesus by way of contempt. The name still exists in Arabic as the ordinary designation of Christians, and the recent revolt in India was connected with a pretended ancient prophecy that the Nazarenes, after holding power for one hundred years, would be expelled. (Spanheim, *Dubit Evangelica*, ii. 583-648; Wolf, *Curæ Philologica*, i. 46-48; Hengstenberg, *Christology of the O. T.*, ii. 106-112; Zuschlag in the *Zeitschrift für die Lutherische Theologie*, 1854, 417-446; Riggenbach in the *Studien und Kritiken*, 1855, 588-612.) G. E. D.

NAZ'ARETH (written *Ναζαρηθ* and *Ναζαρηθ*; also *Ναζαρηθ*, Tisch. 8th ed., in Matt. iv. 13 and Luke iv. 16: *Nazareth*) is not mentioned in the Old Testament or in Josephus, but occurs first in Matt. ii. 23, though a town could hardly fail to have existed on so eligible a spot from much earlier times. It derives its celebrity almost entirely from its connection with the history of Christ, and in that respect has a hold on the imagination and feelings of men which it shares only with Jerusalem and Bethlehem. It is situated among the hills which constitute the south ridges of Lebanon, just before they sink down into the Plain of Esdraelon. Among those hills is a valley which runs in a waving line nearly east and west, about a mile long and, on the average, a quarter of a mile broad, but which at a certain point enlarges itself considerably so as to form a sort of basin. In this basin or inclosure, along the lower edge of

the hill-side, lies the quiet, secluded village in which the Saviour of men spent the greater part of his earthly existence. The surrounding heights vary in altitude, some of them rise to 405 or 500 feet. They have rounded tops, are composed of the glittering limestone which is so common in that country, and, though on the whole sterile and unattractive in appearance, present not an unpleasing aspect, diversified as they are with the foliage of fig-trees and wild shrubs and with the verdure of occasional fields of grain. Our familiar hollyhock is one of the gay flowers which grow wild there. The inclosed valley is peculiarly rich and well cultivated: it is filled with corn-fields, with gardens, hedges of cactus, and clusters of fruit-bearing trees. Being so sheltered by hills, Nazareth enjoys a mild atmosphere and climate. Hence all the fruits of the country, — as pomegranates, oranges, figs, olives, — ripen early and attain a rare perfection. No thoroughfare invaded the seclusion of Nazareth. The line of travel from the north through Cæle-Syria (the *Bakā'a*) to the south of Palestine passed it by different routes on the east and the

west, and that from East-Jordan to the Mediterranean passed it on the south.

Of the identification of the ancient site there can be no doubt. The name of the present village is *en-Nāzirah*, the same, therefore, as of old; it is situated among hills and on a hill-side (Luke iv. 29); it is within the limits of the province of Galilee (Mark i. 9); it is near Cana (whether we assume *Kana* on the north or *Kana* on the northeast as the scene of the first miracle), according to the implication in John ii. 1, 2, 11; a precipice exists in the neighborhood (Luke iv. 29); and, finally, a series of testimonies (Ireland, *Pal.*, p. 905) reach back to Eusebius, the father of Church history, which represent the place as having occupied an invariable position.

The modern Nazareth belongs to the better class of eastern villages. It has a population variously estimated from 3000 to 5000. It consists of Mohammedans, Latin and Greek Christians, and a few Protestants. There are two mosques (one of them very small), a Franciscan convent of huge dimensions but displaying no great architectural

Nazareth.

beauty, a small Maronite church, a Greek church, and perhaps a church or chapel of some of the other confessions. Protestant missions have been attempted, but with no very marked success. Most of the houses are well built of stone, and have a neat and comfortable appearance. A few of the people dwell in recesses of the limestone cliffs, natural or excavated for that purpose. As streams in the rainy season are liable to pour down with violence from the hills, every "wise man," instead of building upon the loose soil on the surface, digs deep and lays his foundation upon the rock (*ἐπι-ἤν πετρᾶν*) which is found so generally in that country at a certain depth in the earth. The streets or lanes are narrow and crooked, and after rain are so full of mud and mire as to be almost impassable.

A description of Nazareth would be incomplete

without mention of the remarkable view from the tomb of Neby Ismail on one of the hills behind the town. It must suffice to indicate merely the objects within sight. In the north are seen the ridges of Lebanon and, high above all, the white top of Hermon; in the west, Carmel, glimpses of the Mediterranean, the bay and the town of Akka; east and southeast are Gilead, Tabor, Gilboa; and south, the Plain of Esdraelon and the mountains of Samaria, with villages on every side, among which are Kana, Nein, Endor, Zerim (Jezreel), and Taannuk (Taannach). It is unquestionably one of the most beautiful and sublime spectacles (for it combines the two features) which earth has to show. Dr. Robinson's elaborate description of the scene (*Bibl. Res.*, ii. 336, 337) conveys no exaggerated idea of its magnificence or historical interest. It is easy to believe that the Saviour, during

the days of his seclusion in the adjacent valley, came often to this very spot and looked forth thence upon those glorious works of the Creator which so lift the soul upward to Him. One of the grandest views of *Jebel esh-Sheik*, the ancient Hermon, is that which bursts on the traveller as he ascends from the valley eastward on the way to Cana and Tiberias.

The passages of Scripture which refer expressly to Nazareth, though not numerous, are suggestive and deserve to be recalled here.<sup>a</sup> It was the home of Joseph and Mary (Luke ii. 39). The angel announced to the Virgin there the birth of the Messiah (Luke i. 26-28). The holy family returned thither after the flight into Egypt (Matt. ii. 23). Nazareth is called the native country (*ἡ πατρις αὐτοῦ*) of Jesus: He grew up there from infancy to manhood (Luke iv. 16), and was known through life as "The Nazarene." He taught in the synagogue there (Matt. xiii. 54; Luke iv. 16), and was dragged by his fellow-townsmen to the precipice in order to be cast down thence and be killed (*εἰς τὸ κατακρηνῖσαι αὐτόν*). "Jesus of Nazareth, king of the Jews" was written over his Cross (John xix. 19), and after his ascension He revealed Himself under that appellation to the persecuting Saul (Acts xxii. 8). The place has given name to his followers in all ages and all lands, a name which will never cease to be one of honor and reproach.

The origin of the disrepute in which Nazareth stood (John i. 46) is not certainly known. All the inhabitants of Galilee were looked upon with contempt by the people of Judæa because they spoke a ruder dialect, were less cultivated, and were more exposed by their position to contact with the heathen. But Nazareth labored under a special opprobrium, for it was a Galilean and not a southern Jew who asked the reproachful question, whether "any good thing" could come from that source. As the term "good" (*ἀγαθόν*) has more commonly an ethical sense, it has been suggested that the inhabitants of Nazareth may have had a bad name among their neighbors for irreligion or some laxity of morals. The supposition receives support from the disposition which they manifested towards the person and ministry of our Lord. They attempted to kill Him; they expelled Him twice (for Luke iv. 16-29, and Matt. xiii. 54-58, relate probably to different occurrences) from their borders; they were so willful and unbelieving that He performed not many miracles among them (Matt. xiii. 58); and, finally, they compelled Him to turn his back upon them and reside at Capernaum (Matt. iv. 13).

It is impossible to speak of distances with much

exactness. Nazareth is a moderate journey of three days from Jerusalem, seven hours, or about twenty miles, from Akka or Ptolemais (Acts xxi. 7), five or six hours, or eighteen miles, from the sea of Galilee, six miles west from Mount Tabor, two hours from Cana,<sup>b</sup> and two or three from Endor and Nain. The origin of the name is uncertain. For the conjectures on the subject, see NAZARENE.

We pass over, as foreign to the proper object of this notice, any particular account of the "holy places" which the legends have sought to connect with events in the life of Christ.<sup>c</sup> They are described in nearly all the books of modern tourists; but, having no sure connection with Biblical geography or exegesis, do not require attention here. Two localities, however, form an exception to this statement, inasmuch as they possess, though in different ways, a certain interest which no one will fail to recognize. One of these is the "Fountain of the Virgin," situated at the northeastern extremity of the town, where, according to one tradition, the mother of Jesus received the angel's salutation (Luke i. 28). Though we may attach no importance to this latter belief, we must, on other accounts, regard the spring with a feeling akin to that of religious veneration. It derives its name from the fact that Mary, during her life at Nazareth, no doubt accompanied often by "the child Jesus," must have been accustomed to repair to this fountain for water, as is the practice of the women of that village at the present day. Certainly, as Dr. Clarke observes (*Travels*, ii. 427), "if there be a spot throughout the holy land that was undoubtedly honored by her presence, we may consider this to have been the place: because the situation of a copious spring is not liable to change, and because the custom of repairing thither to draw water has been continued among the female inhabitants of Nazareth from the earliest period of its history." The well-worn path which leads thither from the town has been trodden by the feet of almost countless generations. It presents at all hours a busy scene, from the number of those, hurrying to and fro, engaged in the labor of water-carrying. See the engraving, i. 838 of this *Dictionary*.

The other place is that of the attempted Precipitation. We are directed to the true scene of this occurrence, not so much by any tradition as by internal indications in the Gospel history itself. A prevalent opinion of the country has transferred the event to a hill about two miles southeast of the town. But there is no evidence that Nazareth ever occupied a different site from the present one: and that a mob whose determination was to put to

<sup>a</sup> \* The name of Nazareth occurs 27 times in the Greek text, and twice more in the A. V., namely, Luke xviii. 37 and xxiv. 19, where the Greek, however, is Ναζωραῖος. II.

<sup>b</sup> \* Yet, with this vicinity of Cana to Nazareth, Nathanael, who lived at Cana, appears never to have heard of Jesus until called to be one of his disciples at the beginning of his ministry (John i. 46-50). So strictly private, unofficial, was the Saviour's life at Nazareth until the time came for Him "to be made manifest to Israel" (John i. 31). This obscurity is irreconcilable with the idea that Christ wrought miracles before He entered on his public work. II.

<sup>c</sup> \* For an enumeration of these "places" and the legends connected with them, one may see Sepp's *Jerus. und das heil. Land*, ii. 78-91). They are de-

scribed still more fully in the new work of Titus Tobler, *Nazareth in Palæstina* (Berlin, 1868). This work is founded partly on the author's third journey to the Holy Land in 1846, but still more on communications from the missionary Zeller, who has resided at Nazareth since 1868. It forms a valuable contribution to our knowledge of the history, statistics, and topography of this sacred place. The plan of the little village, inserted at the end, representing the course of the valley, the market, streets, fountains, convents, churches, is a great help to the reader. It may be added that Dr. Tobler, though a Catholic, rejects the tradition of the Latin monks respecting the site of the precipice at Nazareth, and agrees with those who decide that it must be sought within the present village, probably near the Maronite Church. H.

leath the object of their rage, should repair to so distant a place for that purpose, is entirely incredible. The present village, as already stated, lies along the hill-side, but much nearer the base than the summit. Above the bulk of the town are several rocky ledges over which no person could be thrown without almost certain destruction. But there is one very remarkable precipice, almost perpendicular and forty or fifty feet high, near the Maronite Church, which may well be supposed to be the identical one over which his infuriated townsmen attempted to hurl Jesus. Not far from the town, on the northwest declivity of the hill, are a few excavated stone-sepulchres, almost the only Jewish monument which now remains to be seen there.

The singular precision with which the narrative relates the transaction deserves a remark or two. Casual readers would understand from the account that Nazareth was situated on the summit, and that the people brought Jesus down thence to the brow of the hill as if it was between the town and the valley. If these inferences were correct, the narrative and the locality would then be at variance with each other. The writer is free to say that he himself had these erroneous impressions, and was led to correct them by what he observed on the spot. Even Reland (*Pal.* p. 905) says: "Ναζαρέθ—urbs edificata super rupem, unde Christum precipitæ conati sunt." But the language of the Evangelist, when more closely examined, is found neither to require the inferences in question on the one hand, nor to exclude them on the other. What he asserts is, that the incensed crowd "rose up and cast Jesus out of the city, and brought him to the brow of the hill on which the city was built, that they might cast him down headlong." It will be remarked here, in the first place, that it is not said that the people either went up or descended in order to reach the precipice, but simply that they brought the Saviour to it, wherever it was; and in the second place, that it is not said that the city was built "on the brow of the hill" (ἐως τῆς ὀφρῶς τοῦ ὕψους), but equally as well that the precipice was "on the brow," without deciding whether the cliff overlooked the town (as is the fact) or was below it.<sup>a</sup> It will be seen, therefore, how very nearly the terms of the history approach a mistake and yet avoid it. As Paley remarks in another case, none but a true account could advance thus to the very brink of contradiction without falling into it.

The fortunes of Nazareth have been various. Epiphanius states that no Christians dwelt there until the time of Constantine. Helena, the mother of that emperor, is related to have built the first Church of the Annunciation here. In the time of the Crusaders, the Episcopal See of Bethsean was transferred there. The birthplace of Christianity was lost to the Christians by their defeat at Hattin in 1183, and was laid utterly in ruins by Sultan Bibars in 1233. Ages passed away before it rose again from this prostration. In 1620 the Franciscans rebuilt the Church of the Annunciation

and connected a cloister with it. In 1799 the Turks assaulted the French General Junot at Nazareth; and shortly after, 2,100 French, under Kleber and Napoleon, defeated a Turkish army of 25,000 at the foot of Mount Tabor. Napoleon himself, after that battle, spent a few hours at Nazareth, and reached there the northern limit of his eastern expedition. The earthquake which destroyed Safed, in 1837, injured also Nazareth. No Jews reside there at present, which may be ascribed perhaps as much to the hostility of the Christian sects as to their own hatred of the prophet who was sent "to redeem Israel."<sup>b</sup> H. B. H.

NAZARITE, more properly NAZ'IRITE

(נָזִיר and נְזִירִים: ἡγυμένως and εὐδόμενος, Num. vi.; νᾱζιραῖος, Judg. xiii. 7, Lam. iv. 7: Nazareus), one of either sex who was bound by a vow of a peculiar kind to be set apart from others for the service of God. The obligation was either for life or for a defined time. The Mishna names the two classes resulting from this distinction, נְזִירִים

עולם, "perpetual Nazarites" (*Nazarei nativi*), and נְזִירִי ימים, "Nazarites of days" (*Nazarei votivi*).

I. There is no notice in the Pentateuch of Nazarites for life; but the regulations for the vow of a Nazarite of days are given Num. vi. 1-21.

The Nazarite, during the term of his consecration, was bound to abstain from wine, grapes, with every production of the vine, even to the stones and skin of the grape, and from every kind of intoxicating drink. He was forbidden to cut the hair of his head, or to approach any dead body, even that of his nearest relation. When the period of his vow was fulfilled, he was brought to the door of the Tabernacle and was required to offer a he-lamb for a burnt-offering, a ewe lamb for a sin-offering, and a ram for a peace-offering, with the usual accompaniments of peace-offerings (Lev. vii. 12, 13) and of the offering made at the consecration of priests (Ex. xxix. 2) "a basket of unleavened bread, cakes of fine flour mingled with oil, and wafers of unleavened bread anointed with oil" (Num. vi. 15). He brought also a meat-offering and drink-offering, which appear to have been presented by themselves as a distinct act of service (ver. 17). He was to cut off the hair of "the head of his separation" (that is, the hair which had grown during the period of his consecration) at the door of the Tabernacle, and to put it into the fire under the sacrifice on the altar. The priest then placed upon his hands the sodden left shoulder of the ram, with one of the unleavened cakes and one of the wafers, and then took them again and waved them for a wave-offering. These, as well as the breast and the heave, or right shoulder (to which he was entitled in the case of ordinary peace-offerings, Lev. vii. 32-34), were the perquisite of the priest. The Nazarite also gave him a present proportioned to his circumstances (ver. 21).<sup>b</sup>

If a Nazarite incurred defilement by accidentally

<sup>a</sup> \* Mr. Tristram's view, that "the old Nazareth was on the brow of the hill" (*Land of Israel*, p. 122, 2d ed.), and not "on the steep slope" as at present, is not "a misinterpretation" (as Tobler characterizes it, *Nazareth*, p. 52), is certainly unnecessary. H.

<sup>b</sup> It is said that at the southeast corner of the court of the women, in Herod's temple, there was an apartment appropriated to the Nazarites, in which they used to boil their peace-offerings and cut off their hair. Lightfoot, *Prospect of the Temple*, c. xvii.: Reland, *A. S. p. i. chap. 8, § 11.*

touching a dead body, he had to undergo certain rites of purification and to recommence the full period of his consecration. On the seventh day of his uncleanness he was to cut off his hair, and on the following day he had to bring two turtle-doves or two young pigeons to the priest, who offered one for a sin-offering and the other for a burnt-offering. He then hallowed his head, offered a lamb of the first year as a trespass-offering, and renewed his vow under the same conditions as it had been at first made.

It has been conjectured that the Nazarite vow was at first taken with some formality, and that it was accompanied by an offering similar to that prescribed at its renewal in the case of pollution. But if any inference may be drawn from the early sections of the Mishmical treatise *Nazir*, it seems probable that the act of self-consecration was a private matter, not accompanied by any prescribed rite.

There is nothing whatever said in the Old Testament of the duration of the period of the vow of the Nazarite of days. According to *Nazir* (cap. i. § 3, p. 148) the usual time was thirty days, but double vows for sixty days, and treble vows for a hundred days, were sometimes made (cap. iii. 1-4). One instance is related of Helena, queen of Adiabene (of whom some particulars are given by Josephus, *Ant.* xx. 2), who, with the zeal of a new convert, took a vow for seven years in order to obtain the divine favor on a military expedition which her son was about to undertake. When her period of consecration had expired she visited Jerusalem, and was there informed by the doctors of the school of Hillel that a vow taken in another country must be repeated whenever the Nazarite might visit the Holy Land. She accordingly continued a Nazarite for a second seven years, and happening to touch a dead body just as the time was about to expire, she was obliged to renew her vow according to the law in Num. vi. 9, etc. She thus continued a Nazarite for twenty-one years.<sup>a</sup>

There are some other particulars given in the Mishna, which are curious as showing how the institution was regarded in later times. The vow was often undertaken by childless parents in the hope of obtaining children: this may, of course, have been easily suggested by the cases of Manoa's wife and Hannah. A female Nazarite whose vow was broken might be punished with forty stripes. — The Nazarite was permitted to smooth his hair with a brush, but not to comb it, lest a single hair might be torn out.

II. Of the Nazarites for life three are mentioned in the Scriptures: Samson, Samuel, and St. John the Baptist. The only one of these actually called a Nazarite is Samson. The Rabbis raised the question whether Samuel was in reality a Nazarite.<sup>b</sup> In Hannah's vow, it is expressly stated that no azor should come upon her son's head (1 Sam. i.

11); but no mention is made of abstinence from wine. It is, however, worthy of notice that Phile makes a particular point of this, and seems to refer the words of Hannah, 1 Sam. i. 15, to Samuel himself.<sup>c</sup> In reference to St. John the Baptist, the Angel makes mention of abstinence from wine and strong drink, but not of letting the hair grow (Luke i. 15).

We are but imperfectly informed of the difference between the observances of the Nazarite for life and those of the Nazarite for days. The later Rabbis slightly notice this point.<sup>d</sup> We do not know whether the vow for life was ever voluntarily taken by the individual. In all the cases mentioned in the sacred history, it was made by the parents before the birth of the Nazarite himself. According to the general law of vows (Num. xxx. 8), the mother could not take the vow without the father, and this is expressly applied to the Nazarite vow in the Mishna.<sup>e</sup> Hannah must therefore either have presumed on her husband's concurrence, or secured it beforehand.

The Mishna<sup>f</sup> makes a distinction between the ordinary Nazarite for life and the Samson-Nazarite (נזיר שמשון). The former made a strong point of his purity, and, if he was polluted, offered corban. But as regards his hair, when it became inconveniently long, he was allowed to trim it, if he was willing to offer the appointed victims (Num. vi. 14). The Samson-Nazarite, on the other hand, gave no corban if he touched a dead body, but he was not suffered to trim his hair under any conditions. This distinction, it is pretty evident, was suggested by the freedom with which Samson must have come in the way of the dead (Judg. xv. 16, etc.), and the terrible penalty which he paid for allowing his hair to be cut.

III. The consecration of the Nazarite bore a striking resemblance to that of the high-priest (Lev. xxi. 10-12). In one particular, this is brought out more plainly in the Hebrew text than it is in our version, in the LXX., or in the Vulgate.

One word (נִזְיִר),<sup>g</sup> derived from the same root as Nazarite, is used for the long hair of the Nazarite, Num. vi. 19, where the A. V. has "hair of his separation," and for the anointed head of the high-priest, Lev. xxi. 12, where it is rendered "crown." The Mishna points out the identity of the law for both the high-priest and the Nazarite in respect to pollution, in that neither was permitted to approach the corpse of even the nearest relation, while for an ordinary priest the law allowed more freedom (Lev. xxi. 2). And Maimonides (*More Nevochim*, iii. 48) speaks of the dignity of the Nazarite, in regard to his sanctity, as being equal to that of the high-priest. The abstinence from wine enjoined upon the high-priest on behalf of all the priests when they were about to enter upon their ministrations, is an obvious, but perhaps not such an important

<sup>a</sup> *Nazir*, cap. 3, § 6, p. 156.

<sup>b</sup> *Nazir*, cap. 9, § 5, with Bartonora's note, p. 178.

<sup>c</sup> Διὰ τοῦτο ὁ καὶ βασιλέων καὶ προφητῶν μέγιστος Σαμουὴλ ὄλον καὶ μέθυμα, ὡς ὁ ἱερὸς λόγος φησὶν, ἄχρι τελευτῆς οὐ πίνετα. — Phil. de Ebrietate, vol. i. p. 179, edit. Mangey.

<sup>d</sup> See *Pesikta*, quoted by Drusus on Num. vi.

<sup>e</sup> *Nazir*, cap. 4, § 6, p. 159.

<sup>f</sup> *Nazir*, cap. 1, § 2, p. 147.

<sup>g</sup> The primary meaning of this word is that of separation with a holy purpose. Hence it is used to ex-

press the consecration of the Nazarite (Num. vi. 4, 5, 9). But it appears to have been especially applied to a badge of consecration and distinction worn on the head, such as the crown of a king (2 Sam. i. 10; 2 K.

xi. 12), the diadem (צִיָּיִר) of the high-priest (Ex. xxxix. 6, xxxix. 30), as well as his anointed hair, the long hair of the Nazarite, and, dropping the idea of consecration altogether, to long hair in a general sense (Jer. vii. 29; This may throw light on Gen. xlix. 26 and Deut. xxxiii. 16. See section VI. of this article.

point in the comparison. There is a passage in the account given by Hegesippus of St. James the Just (Eusebius, *Hist. Ecc.* ii. 23), which, if we may assume it to represent a genuine tradition, is worth a notice, and seems to show that Nazarites were permitted even to enter into the Holy of Holies. He says that St. James was consecrated from his birth neither to eat meat, to drink wine, to cut his hair, nor to indulge in the use of the bath, and that to him alone it was permitted (τούτω μόνω ἐξῆν) to enter the sanctuary. Perhaps it would not be unreasonable to suppose that the half sacerdotal character of Samuel might have been connected with his prerogative as a Nazarite. Many of the Fathers designate him as a priest, although St. Jerome, on the obvious ground of his descent, denies that he had any sacerdotal rank.<sup>a</sup>

IV. Of the two vows recorded of St. Paul, that in Acts xviii. 18,<sup>b</sup> certainly cannot be regarded as a regular Nazarite vow. All that we are told of it is that on his way from Corinth to Jerusalem, he "shaved his head in Cenchreae, for he had a vow." It would seem that the cutting off the hair was at the commencement of the period over which the vow extended; at all events, the hair was not cut off at the door of the Temple when the sacrifices were offered, as was required by the law of the Nazarite. It is most likely that it was a sort of vow, modified from the proper Nazarite vow, which had come into use at this time amongst the religious Jews who had been visited by sickness, or any other calamity. In reference to a vow of this kind which was taken by Bernice, Josephus says that "they were accustomed to vow that they would refrain from wine, and that they would cut off their hair thirty days before the presentation of their offering."<sup>c</sup> No hint is given us of the purpose of St. Paul in this act of devotion. Spencer conjectures that it might have been performed with a view to obtain a good voyage;<sup>d</sup> Neander, with greater probability, that it was an expression of thanksgiving and humiliation on account of some recent illness or affliction of some kind.

The other reference to a vow taken by St. Paul is in Acts xxi. 24, where we find the brethren at Jerusalem exhorting him to take part with four Christians who had a vow on them, to sanctify (not purify, as in A. V.) himself with them, and to be at charges with them, that they might shave their heads. The reason alleged for this advice is that he might prove to those who misunderstood him, that he walked orderly and kept the law. Now it cannot be doubted that this was a strictly legal Nazarite vow. He joined the four men for the last seven days of their consecration, until the

offering was made for each one of them, and their hair was cut off in the usual form (ver. 26, 27). It appears to have been no uncommon thing for those charitable persons who could afford it to assist in paying for the offerings of poor Nazarites. Josephus relates that Herod Agrippa I., when he desired to show his zeal for the religion of his fathers, gave direction that many Nazarites should have their heads shorn;<sup>e</sup> and the Gemara (quoted by Reland, *Ant. Sac.*), that Alexander Jannæus contributed towards supplying nine hundred victims for three hundred Nazarites.

V. That the institution of Nazaritism existed and had become a matter of course amongst the Hebrews before the time of Moses is beyond a doubt. The legislator appears to have done no more than ordain such regulations for the vow of the Nazarite of days as brought it under the cognizance of the priest and into harmony with the general system of religious observance. It has been assumed, not unreasonably, that the consecration of the Nazarite for life was of at least equal antiquity.<sup>f</sup> It may not have needed any notice or modification in the Law, and hence, probably, the silence respecting it in the Pentateuch. But it is doubted in regard to Nazaritism in general, whether it was of native or foreign origin. Cyril of Alexandria considered that the letting the hair grow, the most characteristic feature in the vow, was taken from the Egyptians. This notion has been substantially adopted by Fagius,<sup>g</sup> Spencer,<sup>h</sup> Michaelis,<sup>i</sup> Hengstenberg,<sup>k</sup> and some other critics. Hengstenberg affirms that the Egyptians and the Hebrews were distinguished amongst ancient nations by cutting their hair as a matter of social propriety; and thus the marked significance of long hair must have been common to them both. The arguments of Bähr, however, to show that the wearing long hair in Egypt and all other heathen nations had a meaning opposed to the idea of the Nazarite vow, seem to be conclusive;<sup>l</sup> and Winer justly observes that the points of resemblance between the Nazarite vow and heathen customs are too fragmentary and indefinite to furnish a safe foundation for an argument in favor of a foreign origin for the former.

Ewald supposes that Nazarites for life were numerous in very early times, and that they multiplied in periods of great political and religious excitement. The only ones, however, expressly named in the Old Testament are Samson and Samuel. The rabbinical notion that Absalom was a Nazarite seems hardly worthy of notice, though Spencer and Lightfoot have adopted it.<sup>m</sup> When Amos wrote, the Nazarites, as well as the prophets, suffered from

<sup>a</sup> J. C. Ortlob, in an essay in the *Thesaurus Novus Theologico-Philologicus*, vol. i. p. 687, entitled "Samuel Judex et Propheta, non Pontifex aut sacerdos sacrificans," has brought forward a mass of testimony on this subject.

<sup>b</sup> Grotius, Meyer, Howson, and a few others, refer this vow to Aquila, not to St. Paul. The best arguments in favor of this view are given by Mr. Howson (*Life of St. Paul*, vol. i. p. 453). Dean Alford, in his note on Acts xviii. 18, has satisfactorily replied to them.

<sup>c</sup> Dr. Howson formerly held that opinion, but retracts it in his *Lectures on the Character of St. Paul*, p. 16 (2d ed. 1864), where he admits that the vow is more probably that of Paul than that of Aquila. Further, we add to it AQUILA, Amer. ed. H.

<sup>d</sup> See Neander's *Planting and Training of the Church*, i. 208 (Ryland's translation). In the passage trans-

lated from Joseph. B. J. ii. 15, § 1, an emendation of Neander's is adopted. See also Kuinoel on Acts xviii. 13.

<sup>d</sup> *De Leg. Hebr.* lib. iii. chap. vi. § 1.

<sup>e</sup> *Antiq.* xix. 6, § 1.

<sup>f</sup> Ewald seems to think that it was the more ancient of the two (*Alterthümer*, p. 96).

<sup>g</sup> *Critici Sacri*, on Num. vi. 5.

<sup>h</sup> *De Leg. Hebr.* lib. iii. chap. vi. § 1.

<sup>i</sup> *Commentaries on the Law of Moses*, bk. iii. § 145.

<sup>k</sup> *Egypt and the Books of Moses*, p. 190 (English vers.).

<sup>l</sup> Bähr, *Symbolik*, vol. ii. p. 439.

<sup>m</sup> Spencer, *De Leg. Hebr.* lib. iii. c. vi. § 1. Lightfoot, *Exercit.* in 1 Cor. xi. 14. Some have imagined that Jephtha's daughter was consigned to a Nazarite vow by her father. See Carpov, p. 158.

the persecution and contempt of the ungodly. The divine word respecting them was, "I raised up of your sons for prophets and of your young men for Nazarites. But ye gave the Nazarites wine to drink, and commanded the prophets, saying, Prophecy not" (Am. ii. 11, 12). In the time of Judas Maccabæus we find the devout Jews, when they were bringing their gifts to the priests, stirring up the Nazarites of days who had completed the time of their consecration, to make the accustomed offerings (1 Macc. iii. 49). From this incident, in connection with what has been related of the liberality of Alexander Jannæus and Herod Agrippa, we may infer that the number of Nazarites must have been very considerable during the two centuries and a half which preceded the destruction of Jerusalem. The instance of St. John the Baptist and that of St. James the Just (if we accept the traditional account) show that the Nazarite for life retained his original character till later times; and the act of St. Paul in joining himself with the four Nazarites at Jerusalem seems to prove that the vow of the Nazarite of days was as little altered in its important features.

VI. The word נָזִיר occurs in three passages of the Old Testament, in which it appears to mean one separated from others as a prince. Two of the passages refer to Joseph: one is in Jacob's benediction of his sons (Gen. xlix. 26), the other in Moses' benediction of the tribes (Deut. xxxiii. 16). As these texts stand in our version, the blessing is spoken of as falling "on the crown of the head of him who was separated from his brethren." The LXX. render the words in one place, ἐπὶ κορυφῆς ὧν ἡγήσατο ἀδελφῶν, and in the other ἐπὶ κορυφῆν δοξασθέντος ἐν ἀδελφοῖς. The Vulgate translates them in each place "in vertice Nazaræi inter fratres." The expression is strikingly like that used of the high-priest (Lev. xxi. 10-12), and seems to derive illustrations from the use of the word נָזִיר.<sup>a</sup>

The third passage is that in which the prophet is mourning over the departed prosperity and beauty of Sion (Lam. iv. 7, 8). In the A. V. the words are "Her Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than rubies, their polishing was of sapphire, their visage is blacker than a coal, they are not known in the streets, their skin cleaveth to their bones, it is withered, it is become like a stick." In favor of the application of this passage to the Nazarites are the renderings of the LXX., the Vulg., and nearly all the versions. But Gesenius, de Wette, and other modern critics think that it refers to the young princes of Israel, and that the word נָזִיר is used in the same sense as it is in regard to Joseph, Gen. xlix. 26 and Deut. xxxiii. 16.

VII. The vow of the Nazarite of days must have been a self-imposed discipline, undertaken for a specific purpose. The Jewish writers mostly re-

garded it as a kind of penance, and hence accounted for the place which the law regulating it holds in Leviticus immediately after the law relating to adultery.<sup>b</sup> As the quantity of hair which grew within the ordinary period of a vow could not have been very considerable, and as a temporary abstinence from wine was probably not a more noticeable thing amongst the Hebrews than it is in modern society, the Nazarite of days might have fulfilled his vow without attracting much notice until the day came for him to make his offering in the Temple.

But the Nazarite for life, on the other hand, must have been, with his flowing hair and persistent refusal of strong drink, a marked man. Whether in any other particular his daily life was peculiar is uncertain.<sup>c</sup> He may have had some privileges (as we have seen) which gave him something of a priestly character, and (as it has been conjectured) he may have given up much of his time to sacred studies.<sup>d</sup> Though not necessarily cut off from social life, when the turn of his mind was devotional, consciousness of his peculiar dedication must have influenced his habits and manner, and in some cases probably led him to retire from the world.

But without our resting on anything that may be called in question, he must have been a public witness for the idea of legal strictness and of whatever else Naziritism was intended to express: and as the vow of the Nazarite for life was taken by his parents before he was conscious of it, his observance of it was a sign of filial obedience, like the peculiarities of the Rechabites.

The meaning of the Nazarite vow has been regarded in different lights. Some consider it as a symbolical expression of the Divine nature working in man, and deny that it involved anything of a strictly ascetic character; others see in it the principle of stoicism, and imagine that it was intended to cultivate, and bear witness for, the sovereignty of the will over the lower tendencies of human nature: while some regard it wholly in the light of a sacrifice of the person to God.

(a.) Several of the Jewish writers have taken the first view more or less completely. Abarbanel imagined that the hair represents the intellectual power, the power belonging to the head, which the wise man was not to suffer to be diminished or to be interfered with, by drinking wine or by any other indulgence; and that the Nazarite was not to approach the dead because he was appointed to bear witness to the eternity of the divine nature.<sup>e</sup> Of modern critics, Bähr appears to have most completely trodden in the same track.<sup>f</sup> While he denies that the life of the Nazarite was, in the proper sense, ascetic, he contends that his abstinence from wine,<sup>g</sup> and his not being allowed to approach the dead, figured the separation from other men which characterizes the consecrated servant of the Lord; and that his long hair signified his holiness. The hair, according to his theory, as being the bloom

<sup>a</sup> See note g, p. 2074.

<sup>b</sup> Maimonides, *Mor. Ner.* ii. 48.

<sup>c</sup> Nicolas Fuller has discussed the subject of the dress of the Nazarites (as well as of the prophets) in his *Miscellanea Sacra*. See *Critici Sacri*, vol. ix. p. 1023. Those who have imagined that the Nazarites wore a peculiar dress, doubt whether it was of royal purple, of rough hair-cloth (like St. John's), or of some white material.

<sup>d</sup> Vatablus on Num. vi. (*Critici Sacri*).

<sup>e</sup> Quoted by De Muis on Num. vi. (*Critici Sacri*).

<sup>f</sup> *Symbolik*, vol. ii. p. 416-430.

<sup>g</sup> He will not allow that this abstinence at all resembled in its meaning that of the priests, when engaged in their ministrations, which was intended only to secure strict propriety in the discharge of their duties.

of manhood, is the symbol of growth in the vegetable as well as the animal kingdom, and therefore of the operation of the Divine power.<sup>a</sup>

(b.) But the philosophical Jewish doctors, for the most part, seem to have preferred the second view. Thus Bechai speaks of the Nazarite as a conqueror who subdued his temptations, and who wore his long hair as a crown, "quod ipse rex sit cupiditatis imperans præter morem reliquorum hominum, qui cupiditatum sunt servi."<sup>b</sup> He supposed that the hair was worn rough, as a protest against foppery.<sup>c</sup> But others, still taking it as a regal emblem, have imagined that it was kept elaborately dressed, and fancy that they see a proof of the existence of the custom in the seven locks of Samson (Judg. xvi. 13-19).<sup>d</sup>

(c.) Philo has taken the deeper view of the subject. In his work, *On Animals fit for Sacrifice*,<sup>e</sup> he gives an account of the Nazarite vow, and calls it ἡ εὐχὴ μεγάλη. According to him the Nazarite did not sacrifice merely his possessions but his person, and the act of sacrifice was to be performed in the completest manner. The outward observances enjoined upon him were to be the genuine expressions of his spiritual devotion. To represent spotless purity within, he was to shun defilement from the dead, at the expense even of the obligation of the closest family ties. As no spiritual state or act can be signified by any single symbol, he was to identify himself with each one of the three victims which he had to offer as often as he broke his vow by accidental pollution, or when the period of his vow came to an end. He was to realize in himself the ideas of the whole burnt-offering, the sin-offering, and the peace-offering. That no mistake might be made in regard to the three sacrifices being shadows of one and the same substance, it was ordained that the victims should be individuals of one and the same species of animal. The shorn hair was put on the fire of the altar in order that, although the divine law did not permit the offering of human blood, something might be offered up actually a portion of his own person. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice; but he looks on the preservation of the hair as signifying that the Nazarite is so set apart for God, that no change or diminution should be made in any part of his person, and as serving to himself and the world for a visible token of his peculiar consecration to Jehovah.<sup>f</sup>

That the Nazarite vow was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vi. 2). In the old dispensation it may have answered to that "living sacrifice, holy, acceptable unto God," which the believer is now called upon to make. As the

Nazarite was a witness for the straitness of the law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a submission to the letter of a rule. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of divine wisdom for the time for which it was ordained. Wisdom, we are told, was justified of her child in the life of the great Nazarite who preached the baptism of repentance when the Law was about to give way to the Gospel. Amongst those born of women, no greater than he had arisen, "but he that is least in the kingdom of Heaven is greater than he." The sacrifice which the believer now makes of himself is not to cut him off from his brethren, but to unite him more closely with them; not to subject him to an outward bond, but to confirm him in the liberty with which Christ has made him free. It is not without significance that wine under the Law was strictly forbidden to the priest who was engaged in the service of the sanctuary, and to the few whom the Nazarite vow bound to the special service of the Lord; while in the Church of Christ it is consecrated for the use of every believer to whom the command has come, "drink ye all of this."<sup>g</sup>

Carpzov, *Apparatus Criticus*, p. 148; Reland, *Ant. Sacre*, p. ii. c. 10; Meinhard, *Pauli Naziræatus (Thesaurus Theologico-philologicus*, ii. 473). The notes of De Muis and Drusius on Num. vi. (*Critici Sacri*); the notes of Grotius on Luke i. 15, and Kuinoel on Acts xviii. 18; Spencer, *De Legibus Hebræorum*, lib. iii. cap. vi. § 1; Michaelis, *Commentaries on the Laws of Moses*, book iii. § 145; the Mishnial treatise *Nazir*, with the notes in Surenhusius's *Mishna*, iii. 146, &c.; Bähr, *Symbolik*, ii. 416-430; Ewald, *Alterthümer*, p. 96; also *Geschichte*, ii. 43. Carpzov mentions with praise *Naziræus, seu Commentarius literalis et mysticus in Legem Naziræorum*, by Cremer. The essay of Meinhard contains a large amount of information on the subject, besides what bears immediately on St. Paul's vows. Spencer gives a full account of heathen customs in dedicating the hair. The Notes of De Muis contain a valuable collection of Jewish testimonies on the meaning of the Nazarite vow in general. Those of Grotius relate especially to the Nazarites' abstinence from wine. Heigstenberg (*Egypt and the Books of Moses*, p. 190, English translation) confutes Bähr's theory. S. C.

NE'AH (נְעָה) [*the settlement, Fürst; perh. inclination, descent*, Dietr.], with the def. article: Vat. omits; Alex. *Ἀνεα*<sup>b</sup>), a place which was one of the landmarks on the boundary of Zebulun (Josh. xix. 13 only). By Eusebius and

<sup>a</sup> Bähr defends this notion by several philological arguments, which do not seem to be much to the point. The nearest to the purpose is that derived from Lev. xxv. 5, where the unpruned vines of the sabbatical year are called Nazarites. But this, of course, can be well explained as a metaphor from unshorn hair.

<sup>b</sup> Carpzov, *App. Crit.* p. 152. Abenezra uses very similar language (*Drusius*, on Num. vi. 7).

<sup>c</sup> This was also the opinion of Lightfoot, *Exercit. in I Cor.* xi. 14, and *Sermon on Judg.* xi. 39.

<sup>d</sup> Spencer, *De Leg. Hebr.* iii. vi. § 1.

<sup>e</sup> *Opera*, vol. ii. p. 249 (ed. Mangey).

<sup>f</sup> Lightfoot is inclined to favor certain Jewish writers who identify the vine with the tree of knowledge of good and evil, and to connect the Nazarite law

with the condition of Adam before he fell (*Exercit. in Luc.* i. 15). This strange notion is made still more fanciful by Magee (*Atonement and Sacrifice*, Illustration xxxviii.).

<sup>g</sup> This consideration might surely have furnished St. Jerome with a better answer to the Tatianists, who alleged Amos ii. 12 in defense of their abstinence from wine, than his bitter taunt that they were bringing "Judaicas fabulas" into the church, and that they were bound, on their own ground, neither to cut their hair, to eat grapes or raisins, or to approach the corpse of a dead parent (on Amos ii. 12).

<sup>h</sup> This is the reading of the text of the Vulgate given in the Benedictine edition of Jerome. The ordinary copies have *Noa*.

Jerome (*Onomast.* "Anua") it is mentioned merely with a caution that there is a place of the same name, 10 miles S. of Neapolis. It has not yet been identified even by Schwarz. If *el-Meshhad*, about 2½ miles E. of *Sefjwieh*, be ΓΑΤΤΗ-ΠΕΡΙΗΕΚ, and *Rummaneh* about 4 miles N. E. of the same place, RIMMON, then Neah must probably be sought somewhere to the north of the last-named town.

G.

NEAPOLIS (Νεάπολις, "new city": *Neapolis*)<sup>f</sup> is the place in northern Greece where Paul and his associates first landed in Europe (Acts xvii. 11); where, no doubt, he landed also on his second visit to Macedonia (Acts xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (Acts xx. 6). Philippi being an inland town, Neapolis was evidently the port; and hence it is accounted for, that Luke leaves the verb which describes the voyage from Troas to Neapolis (ἐνθουδρομήσαμεν), to describe the continuance of the journey from Neapolis to Philippi. It has been made a question whether this harbor occupied the site of the present Kavalla, a Turkish town on the coast of Roumelia, or should be sought at some other place. Cousinéry (*Voyage dans la Macédoine*) and Tafel (*De Via Militari Romanorum Egnatia*, etc.) maintain, against the common opinion, that Luke's Neapolis was not at Kavalla, the inhabited town of that name, but at a deserted harbor ten or twelve miles further west, known as Eski or Old Kavalla. Most of those who contend for the other identification assume the point without much discussion, and the subject demands still the attention of the Biblical geographer. It may be well, therefore, to mention with some fullness the reasons which support the claim of Kavalla to be regarded as the ancient Neapolis, in opposition to those which are urged in favor of the other harbor.

First, the Roman and Greek ruins at Kavalla prove that a port existed there in ancient times. Neapolis, wherever it was, formed the point of contact between Northern Greece and Asia Minor, at a period of great commercial activity, and would be expected to have left vestiges of its former importance. The antiquities found still at Kavalla fulfill entirely that presumption. One of these is a massive aqueduct, which brings water into the town from a distance of ten or twelve miles north of Kavalla, along the slopes of Symbolum. It is built on two tiers of arches, a hundred feet long and eighty feet high, and is carried over the narrow valley between the promontory and the mainland. The upper part of the work is modern, but the substructions are evidently Roman, as is seen from the composite character of the material, the cement, and the style of the masonry. Just out of the western gate are two marble sarcophagi, used as watering-troughs, with Latin inscriptions, of the age of the emperor Claudius. Columns with chaplets of elegant Ionic workmanship, blocks of marble, fragments of hewn stone, evidently antique, are

<sup>a</sup> Colonel Leake did not visit either this Kavalla or the other, and his assertion that there are "the ruins of a Greek city" there (which he supposes, however, to have been Galepsus, and not Neapolis) appears to rest on Cousinéry's statement. But as involving this claim of Eski Kavalla in still greater doubt, it may be added that the situation of Galepsus itself is quite uncertain. Dr. Arnold (note on Thucyd. iv. 107) places it near the mouth of the Strymon, and hence much

numerous both in the town and the suburbs. On some of these are inscriptions, mostly in Latin, but one at least in Greek. In digging for the foundation of new houses the walls of ancient ones are often brought to light, and sometimes tablets with sculptured figures, which would be deemed curious at Athens or Corinth. For fuller details, see *Bibl. Sacra*, xvii. 881 ff. (October, 1860). [COLONY, Amer. ed.] On the contrary, no ruins have been found at Eski Kavalla, or Paleopoli, as it is also called, which can be pronounced unmistakably ancient. No remains of walls, no inscriptions, and no indications of any thoroughfare leading thence to Philippi, are reported to exist there. Cousinéry, it is true, speaks of certain ruins at the place which he deems worthy of notice; but according to the testimony of others these ruins are altogether inconsiderable, and, which is still more decisive, are modern in their character.<sup>a</sup> Cousinéry himself, in fact, corroborates this, when he says that on the isthmus which binds the peninsula to the main land, "on trouve les ruines de l'ancienne Néapolis ou celles d'un château reconstruit dans le moyen âge."<sup>b</sup> It appears that a mediæval or Venetian fortress existed there; but as far as is yet ascertained, nothing else has been discovered which points to an earlier period.

Secondly, the advantages of the position render Kavalla the probable site of Neapolis. It is the first convenient harbor south of the Hellespont, on coming from the east. Thasos serves as a natural landmark. Tafel says, indeed, that Kavalla has no port, or one next to none; but that is incorrect. The fact that the place is now the seat of an active commerce proves the contrary. It lies open somewhat to the south and southwest, but is otherwise well sheltered. There is no danger in going into the harbor. Even a rock which lies off the point of the town has twelve fathoms alongside of it. The bottom affords good anchorage; and although the bay may not be so large as that of Eski Kavalla, it is ample for the accommodation of any number of vessels which the course of trade or travel between Asia Minor and Northern Greece would be likely to bring together there at any one time.

Thirdly, the facility of intercourse between this port and Philippi shows that Kavalla and Neapolis must be the same. The distance is nearly ten miles,<sup>c</sup> and hence not greater than Corinth was from Cenchræe, and Ostia from Rome. Both places are in sight at once from the top of Symbolum. The distance between Philippi and Eski Kavalla must be nearly twice as great. Nature itself has opened a passage from the one place to the other. The mountains which guard the plain of Philippi on the coast-side fall apart just behind Kavalla, and render the construction of a road there entirely easy. No other such defile exists at any other point in this line of formidable hills. It is impossible to view the configuration of the country from the sea, and not feel at once that the only natural place for crossing into the interior is this breakdown in the vicinity of Kavalla.

farther west than Leake supposes. According to Cousinéry, Galepsus is to be sought at Kavalla.

<sup>b</sup> On p. 119 he says again: "Les ruines de l'ancienne ville de Néapolis se composent principalement des restes d'un château du moyen âge entièrement abandonné et peu accessible."

<sup>c</sup> \* The recent French explorers (*Mission Archéologique*) make the distance from 12 to 13 kilometers i. e. about 9 Roman miles.

Fourthly, the notices of the ancient writers lead us to adopt the same view. Thus Dio Cassius says (*Hist. Rom.* xlvii. 35), that Neapolis was opposite Thasos (καρ' ἀντιπέρασ Ἰθάσου), and that is the situation of Kavalla. It would be much less correct, if correct at all, to say that the other Kavalla was so situated, since no part of the island extends so far to the west. Appian says (*Bell. Civ.* iv. 106), that the camp of the Republicans near the Gangas, the river (ποταμός) at Philippi, was nine Roman miles from their triremes at Neapolis (it was considerably further to the other place), and that Thasos was twelve Roman miles from their naval station (so we should understand the text); the latter distance appropriate again to Kavalla, but not to the harbor further west.

Finally, the ancient Itineraries support entirely the identification in question. Both the Antonine and the Jerusalem Itineraries show that the Egnatian Way passed through Philippi. They mention Philippi and Neapolis as next to each other in the order of succession; and since the line of travel which these Itineraries sketch was the one which led from the west to Byzantium, or Constantinople, it is reasonable to suppose that the road, after leaving Philippi, would pursue the most convenient and direct course to the east which the nature of the country allows. If the road, therefore, was constructed on this obvious principle, it would follow the track of the present Turkish road, and the next station, consequently, would be Neapolis, or Kavalla, on the coast, at the termination of the only natural defile across the intervening mountains. The distance, as has been said, is about ten miles. The Jerusalem Itinerary gives the distance between Philippi and Neapolis as ten Roman miles, and the Antonine Itinerary as twelve miles. The difference in the latter case is unimportant, and not greater than in some other instances where the places in the two Itineraries are unquestionably the same. It must be several miles further than this from Philippi to Old Kavalla, and hence the Neapolis of the Itineraries could not be at that point. The theory of Tafel is, that Akontisma or Herkontroma (the same place, without doubt), which the Itineraries mention next to Neapolis, was at the present Kavalla, and Neapolis at Leutere or Eski Kavalla. This theory, it is true, arranges the places in the order of the Itineraries; but, as Leake objects, there would be a needless detour of nearly twenty miles, and that through a region much more difficult than the direct way. The more accredited view is that Akontisma was beyond Kavalla, further east.

Neapolis, therefore, like the present Kavalla, was on a high rocky promontory which juts out into the Aegean. The harbor, a mile and a half wide at the entrance, and half a mile broad, lies on the west side. The indifferent roadstead on the east should not be called a harbor. Symbolum, 1670 feet high, with a defile which leads into the plain of Philippi, comes down near to the coast a little to the west of the town. In winter the sun sinks behind Mount Athos in the southwest as early as 4 o'clock P. M. The land along the eastern shore is low, and otherwise unmarked by any peculiarity. The island of Thasos bears a little to the S. E., twelve or fifteen miles distant. Plane-trees just beyond the walls, not less than four or five hundred years old, cast their shadow over the road which Paul followed on his way to Philippi. Kavalla has a population of five or six thousand, nine-tenths of whom are Mussulmans, and the rest Greeks.

For Neapolis as the Greek name of Shechem, now *Nabulus*, see *STIECHER*. H. B. H.

\* The region of Neapolis or Macedonia appears to have been the northern limit of Paul's travels. It may have been in this country and climate that the Apostle suffered some of the privations (among which were "cold" and "nakedness") of which he writes in 2 Cor. xi. 27. The winter, for example, of 1857 is said to have been one of great severity. Symbolum, over which the road passes to Philippi from the coast, was covered with deep snow, and the road thence onward to Thessalonica became for a time impassable. Shepherds and travellers were frozen to death, and the flocks were destroyed in a frightful manner. During a sojourn there of two weeks in December, 1858, the thermometer fell repeatedly below zero. Huge icicles hung from the arches of the old aqueduct. All the streams and pools were frozen, and Thasos in the distance appeared white with snow to the very shore. For successive days the streets of Kavalla were almost deserted. It is not at all improbable that the Apostle's first sojourn in Macedonia, and perhaps part of his second, fell in that season of the year. The Apostle arrived in Macedonia on his second visit early in the summer; for, remaining at Ephesus until Pentecost (as may be inferred from 1 Cor. xvi. 8), and tarrying for a short time at Troas (2 Cor. ii. 12, 13), he then proceeded directly to Macedonia. But as he went, at this time, westward as far as Illyricum (Rom. xv. 19), and as he spent but three months at Corinth before his return to Macedonia, at the time of the succeeding Pentecost (Acts xx. 6), he must have prolonged his stay in northern Greece into or through December.

Kavalla (*Cavalla*, so common in many of the books, is unknown on the ground) consists of an inner or upper part, inclosed by a crenelated mediæval wall, and an outer part or suburb, also surrounded by a wall, but of more recent construction. Even the outer wall does not include the entire promontory, but leaves the western slope outside, part of which is tilled, and the remainder is naked rock. The celebrated Mohammed Ali, Pasha of Egypt, was born here in 1769. He showed through life, a warm attachment to his native place, and, among the proofs of this, was his munificent endowment of a *mudresseh*, or college, in which at the present time three hundred scholars are taught and supported, without any expense to themselves. The funds are so ample, that doles of bread and rice are given out, daily, to hundreds of the inhabitants of Kavalla. Just before his death in 1848, the Pasha made a final visit to his birth-place. On landing he went to the house in which he was born; but remained there only a few hours, and having spent these in religious worship, under the roof which first sheltered him, hastened back to his ship, and the next day departed for Egypt. (For other information see *Bibl. Sacra* as above.)

II.

\* NEAP'OLIS, a later name of Emmaus in the south of Palestine. [EMMAUS, 2.]

NEARIAH (נְעָרִיָּה [servant of Jehovah]: *Nwadhā*: [Vat. *Nwadhā*; Comp. *Neapia*:] *Naaria*). 1. One of the six sons of Shemaiah in the line of the royal family of Judah after the Captivity (1 Chr. iii. 22, 23).

2. [Comp. *Naapia*.] A son of Ishi, and one of the captains of the 500 Simeonites who, in the

Jays of Hezekiah, drove out the Amalekites from Mount Seir (1 Chr. iv. 42).

NEBAI [2 syl.] (נְבַיִ) ; Keri, נִבִי [perh. *fruitful*]: *NawBaŕ*; [Vat. F.A. *Bawai*:] *Nebaŕ*). A family of the heads of the people who signed the covenant with Nehemiah (Neh. x. 19). The LXX. followed the written text, while the Vulgate adopted the reading of the margin.

NEBA'IOTH, [3 syl.] NEBA'JOTH (נְבַיִוֹת) [*height*: in Gen. xxv. 13, *Naŕaióð*; xxviii. 9, Rom. *Naŕewoð*;] *Naŕaióð*: *Nabaióth*), the "first-born of Ishmael" (Gen. xxv. 13; 1 Chr. i. 29), and father of a pastoral tribe named after him, the "rams of Nebaioth" being mentioned by the prophet Isaiah (lx. 7) with the flocks of Kedar. From the days of Jerome (*Comment. in Gen. xx. 13*), this people had been identified with the Nabathæans, until M. Quatremère first investigated the origin of the latter, their language, religion, and history; and by the light he threw on a very obscure subject enabled us to form a clearer judgment respecting this assumed identification than was, in the previous state of knowledge, possible. It will be convenient to recapitulate, briefly, the results of M. Quatremère's labors, with those of the later works of M. Chwolson and others on the same subject, before we consider the grounds for identifying the Nabathæans with Nebaioth.

From the works of Arab authors, M. Quatremère (*Mémoire sur les Nabatéens*, Paris, 1835, reprinted from the *Nouveau Journ. Asiat.* Jan.-Mar., 1835) proved the existence of a nation called Nabat

(نَبَات), or Nabeet (نَبَيْط), pl. Anbát (أَنْبَاطُ),

(*Sihdh* and *Kámoos*), reputed to be of ancient origin, of whom scattered remnants existed in Arab times, after the era of the Flight. The Nabat, in the days of their early prosperity, inhabited the country chiefly between the Euphrates and the Tigris, Beyn en Nahreyn and El-Irák (the Mesopotamia and Chaldæa of the classics). That this was their chief seat and that they were Aramæans, or more accurately Syro-Chaldeans, seems in the present state of the inquiry (for it will presently be seen that, by the publication of oriental texts, our knowledge may be very greatly enlarged) to be a safe conclusion. The Arabs loosely apply the name Nabat to the Syrians, or especially the eastern Syrians, to the Syro-Chaldeans, etc. Thus El-Mes'odee (*op. Quatremère, l. c.*) says, "The Syrians are the same as the Nabathæans (Nabat). . . . The Nimrods were the kings of the Syrians whom the Arabs call Nabathæans. . . . The Chaldeans are the same as the Syrians, otherwise called Nabat (*Kitáb et-Tenbeeh*). The Nabathæans . . . founded the city of Babylon. . . . The inhabitants of Nineveh were part of those whom we call Nabeet or Syrians, who form one nation and speak one language; that of the Nabeet differs only in a small number of letters; but the foundation of the language is identical" (*Kitáb Muwoj-edh-Dhahab*). These, and many other fragmentary passages, prove sufficiently the existence of a great Aramæan people called Nabat, celebrated among the Arabs for their knowledge of agriculture, and of magic, astronomy, medicine, and science (so called) generally. But we have stronger evidence to this effect. Quatremère introduced to the notice of the learned world the most important relic of that people's literature, a

treatise on Nabat agriculture. A study of an imperfect copy of that work, which unfortunately was all he could gain access to, induced him to date it about the time of Nebuchadnezzar, or *cir. B. C.* 600. M. Chwolson, professor of oriental languages at St. Petersburg, who had shown himself fitted for the inquiry by his treatise on the Sabians and their religion (*Die Sabier und der Sabismus*), has since made that book a subject of special study; and in his *Remains of Ancient Babylonian Literature in Arabic Translations (Ueber die Ueberreste der Alt-Babylonischen Literatur in Arabischen Uebersetzungen*, St. Petersburg, 1859), he has published the results of his inquiry. Those results, while they establish all M. Quatremère had advanced respecting the existence of the Nabat, go far beyond him both in the antiquity and the importance M. Chwolson claims for that people. Ewald, however, in 1857, stated some grave causes for doubting this antiquity, and again in 1859 (both papers appeared in the *Goettingische gelehrte Anzeigen*) repeated moderately but decidedly his misgivings. M. Renan followed on the same side (*Journ. de l'Institut*, Ap-May, 1860); and more recently, M. de Gutschmid (*Zeitschrift d. Deutsch. Morgenländ. Gesellschaft*, xv. 1-100) has attacked the whole theory in a lengthy essay. The limits of this Dictionary forbid us to do more than recapitulate, as shortly as possible, the bearings of this remarkable inquiry, as far as they relate to the subject of the article.

The remains of the literature of the Nabat consist of four works, one of them a fragment: the "Book of Nabat Agriculture" (already mentioned); the "Book of Poisons;" the "Book of Tenkelooshà the Babylonian;" and the "Book of the Secrets of the Sun and Moon" (Chwolson, *Ueberreste*, pp. 10, 11). They purport to have been translated, in the year 904, by Aboo-Bekr Ahmad Ibn-'Alee the Chaldean of Kissen,<sup>a</sup> better known as *Ibn-Wahsheeyeh*. The "Book of Nabat Agriculture" was, according to the Arab translator, commenced by Daghreeth, continued by Yânbushâdh, and completed by Kuthâmee. Chwolson, disregarding the dates assigned to these authors by the translator, thinks that the earliest lived some 2500 years B. C., the second some 300 or 400 years later, and Kuthâmee, to whom he ascribes the chief authorship (Ibn-Wahsheeyeh says he was little more than editor), at the earliest under the 6th king of a Canaanite dynasty mentioned in the book, which dynasty Chwolson — with Bunsen — makes the same as the 5th (or Arabian) dynasty of Berosus (Chwolson, *Ueberreste*, p. 68, &c.; Bunsen, *Egypt*, iii. 432, &c.: *Cory's Ancient Fragments*, 2d ed. p. 60), or of the 13th century B. C. It will thus be seen that he rejects most of M. Quatremère's reasons for placing the work in the time of Nebuchadnezzar. It is remarkable that that great king is not mentioned, and the author or authors were, it is argued by Chwolson, ignorant not only of the existence of Christianity, but of the kingdom and faith of Israel. While these and other reasons, if granted, strengthen M. Chwolson's case for the antiquity of the work, on the other hand it is urged that even neglecting the difficulties attending an Arab's translating so ancient a writing (and we reject altogether the supposition that it was modernized as being without a parallel, at least in Arabic literature), and conceding that

<sup>a</sup> Or Keysee. See Chwolson, *Ueberreste*, p. 8, foot-note. De Lacy's *'Abd-er-Lateef*, p. 484.

he was of Chaldean or Nabat race — we encounter formidable intrinsic difficulties. The book contains mentions of personages bearing names closely resembling those of Adam, Seth, Enoch, Noah, Shem, Nimrod, and Abraham; and M. Chwolson himself is forced to confess that the particulars related of them are in some respects similar to those recorded of the Biblical patriarchs. If this difficulty proves insurmountable, it shows that the author borrowed from the Bible, or from late Jews, and destroys the claim of an extreme antiquity. Other apparent evidences of the same kind are not wanting. Such are the mentions of Ermeesà ('Hermes), Agathadæmoon (Agathodæmon), Tammuz (Adonis), and Yoonân (Ionians). It is even a question whether the work should not be dated several centuries after the commencement of our era. Anachronisms, it is asserted, abound; geographical, linguistic (the use of late words and phrases), historical, and religious (such as the traces of Hellenism, as shown in the mention of Hermes, etc., and influences to be ascribed to Neoplatonism). The whole style is said to be modern, wanting the rugged vigor of antiquity (this, however, is a delicate issue, to be tried only by the ripest scholarship). And while Chwolson dates the oldest part of the Book of Agriculture B. C. 2500, and the Book of Tenkeloosha in the 1st century, A. D. at the latest (p. 136), Renan asserts that the two are so similar as to preclude the notion of their being separated by any great interval of time (*Journal de l'Institut*).

Although Quatremère recovered the broad outlines of the religion and language of the Nabat, a more extended knowledge of these points hangs mainly on the genuineness or spuriousness of the work of Kuthâmee. If M. Chwolson's theory be correct, that people present to us one of the most ancient forms of idolatry; and by their writings we can trace the origin and rise of successive phases of pantheism, and the roots of the complicated forms of idolatry, heresy, and philosophical infidelity, which abound in the old seats of the Aramæan race. At present, we may conclude that

they were Sabians (صَابِيُونَ),<sup>a</sup> at least in late

times, as Sabeism succeeded the older religions; and their doctrines seem to have approached (how nearly a further knowledge of these obscure subjects will show) those of the Mendæes, Mendaites, or Gnostics. Their language presents similar difficulties; according to M. Chwolson, it is the ancient language of Babylonia. A cautious criticism would (till we know more) assign it a place as a comparatively modern dialect of Syro-Chaldee (comp. Quatremère, *Mém.* 100-103).

Thus, if M. Chwolson's results are accepted, the Book of Nabat Agriculture exhibits to us an ancient civilization, before that of the Greeks, and at least as old as that of the Egyptians, of a great and powerful nation of remote antiquity; making us acquainted with sages hitherto unknown, and with the religions and sciences they either founded or advanced; and throwing a flood of light on what has till now been one of the darkest pages of the world's history. But until the original text of Kuthâmee's treatise is published, we must withhold our acceptance of facts so startling,

and regard the antiquity ascribed to it even by Quatremère as extremely doubtful. It is sufficient for the present to know that the most important facts advanced by the latter — the most important when regarded by sober criticism — are supported by the results of the later inquiries of M. Chwolson and others. It remains for us to state the grounds for connecting the Nabat with the Nabathæans.

As the Arabs speak of the Nabat as Syrians, so conversely the Greeks and Romans knew the Nabathæans (*οἱ Ναβατταῖοι* and *Ναβαταῖοι*, LXX.: Alex. *Ναβατεοῖ*; Nabuthæi, Vulg.: 'Απαταῖοι, or *Ναπαταῖοι*, Pt. vi. 7, § 21; *Ναβίται*, Suid. s. v.: Nabathæe) as Arabs. While the inhabitants of the peninsula were comparative strangers to the classical writers, and very little was known of the further-removed peoples of Chaldæa and Mesopotamia, the Nabathæans bordered the well-known Egyptian and Syrian provinces. The nation was famous for its wealth and commerce. Even when, by the decline of its trade (diverted through Egypt), its prosperity waned, Petra is still mentioned as a centre of the trade both of the Sabæans of Southern Arabia [SHEBA] and the Gerthæans on the Persian Gulf. It is this extension across the desert that most clearly connects the Nabathæan colony with the birthplace of the nation in Chaldæa. The notorious trade of Petra across the well-trodden desert-road to the Persian gulf is sufficient to account for the presence of this colony; just as traces of Abrahamic peoples [DEDAN, etc.] are found, demonstrably, on the shores of that sea on the east, and on the borders of Palestine on the west, while along the northern limits of the Arabian peninsula remains of the caravan stations still exist. Nothing is more certain than the existence of this great stream of commerce, from remote times, until the opening of the Egyptian route gradually destroyed it. Josephus (*Ant.* i. 12, § 4) speaks of Nabatæa (*Ναβαταία*, Strab; *Ναβατηνή*, Joseph.) as embracing the country from the Euphrates to the Red Sea — *i. e.* Petraea and all the desert east of it. The Nabat of the Arabs, however, are described as famed for agriculture and science; in these respects offering a contrast to the Nabathæans of Petra, who were found by the expedition sent by Antigonus (B. C. 312) to be dwellers in tents, pastoral, and conducting the trade of the desert; but in the Red Sea again they were piratical, and by sea-faring qualities showed a non-Semitic character.

We agree with M. Quatremère (*Mém.* p. 81), while rejecting other of his reasons, that the civilization of the Nabathæans of Petra, far advanced on that of the surrounding Arabs, is not easily explained except by supposing them to be a different people from those Arabs. A remarkable confirmation of this supposition is found in the character of the buildings of Petra, which are unlike anything constructed by a purely Semitic race. Architecture is a characteristic of Aryan or mixed races. In Southern Arabia, Nigritians and Semites (Joktanites) together built huge edifices; so in Babylonia and Assyria, and so too in Egypt, mixed races left this unmistakable mark. [ARABIA.] Petra, while it is wanting in the colossal features of those more ancient remains, is yet unmistakably foreign to an unmixed Semitic race. Further, the subjects of the literature of the Nabat, which are scientific and industrial, are not such as are found in the writings of pure Semites or Aryans, as Renan

<sup>a</sup> Sabi-on is commonly held by the Arabs to signify originally "Apostates."

(*Hist. des Langues Sémitiques*, p. 227) has well observed; and he points, as we have above, to a foreign ("Couschite," or partly Nigritian) settlement in Babylonia. It is noteworthy that 'Abdel-Lateef (at the end of the fourth section of his first book, or treatise, see De Lacy's ed.) likens the Copts in Egypt (a mixed race) to the Nabat in El-'Irak.

From most of these, and other considerations,<sup>a</sup> we think there is no reasonable doubt that the Nabathæans of Arabia Petraea were the same people as the Nabat of Chaldæa; though at what ancient epoch the western settlement was formed remains unknown.<sup>b</sup> That it was not of any importance until after the Captivity appears from the notices of the inhabitants of Edom in the canonical books, and their absolute silence respecting the Nabathæans, except (if Nebaioth be identified with them) the passage in Isaiah (lx. 7).

The Nabathæans were allies of the Jews after the Captivity, and Judas the Maccabee, with Jonathan, while at war with the Edonites, came on them three days south of Jordan (1 Macc. v. 3, 24, &c.; Joseph. *Ant.* xii. 8, § 3), and afterwards "Jonathan had sent his brother John, a captain of the people, to pray his friends the Nabathites that they might leave with them their carriage, which was much" (ix. 35, 36). Diod. Sic. gives much information regarding them, and so too Strabo, from the expedition under Ælius Gallus, the object of which was defeated by the treachery of the Nabathæans (see the *Dict. of Geography*, to which the history of Nabatæa in classical times properly belongs).

Lastly, did the Nabathæans, or Nabat, derive their name, and were they in part descended, from Nebaioth, son of Ishmael? Josephus says that Nabatæa was inhabited by the twelve sons of Ishmael; and Jerome, "Nebaioth omnis regio ab Euphrate usque ad Mare Rubrum Nabathæna usque hodie dicitur, quæ pars Arabia est" (*Comment. in Gen.* xxv. 13). Quatremère rejects the identification for an etymological reason — the change of נב to ט; but this change is not unusual; in words Aramæan from the Greek, the like change of τ generally occurs. Renan, on the other hand, accepts it; regarding Nebaioth, after his manner, merely as an ancient name unconnected with the Biblical history. The Arabs call Nebaioth, Náb-

bit (نَابَيْت), and do not connect him with the

Nabat, to whom they give a different descent; but all their Abrahamian genealogies come from late Jews, and are utterly untrustworthy. When we remember the darkness that enshrouds the early history of the "sons of the concubines" after they were sent into the east country, we hesitate to deny a relationship between peoples whose names are strikingly similar, dwelling in the same tract. It is possible that Nebaioth went to the far east, to the country of his grandfather Abraham, intermarried

<sup>a</sup> We have not entered into the subject of the language of the Nabathæans. The little that is known of it tends to strengthen the theory of the Chaldæan origin of that people. The Duc de Luynes, in a paper on the coins of the latter in the *Revue Numismatique* (nouv. série, iii. 1858), adduces facts to show that they called themselves Nabat נַבְתַּן.

<sup>b</sup> It is remarkable that, while remnants of the Nabat

with the Chaldæans, and gave birth to a mixed race, the Nabat. Instances of ancient tribes adopting the name of more modern ones, with which they have become fused, are frequent in the history of the Arabs (see MIDIAN, foot-note); but we think it is also admissible to hold that Nebaioth was so named by the sacred historian because he intermarried with the Nabat. It is, however, safest to leave unsettled the identification of Nebaioth and Nabat until another link be added to the chain that at present seems to connect them. E. S. P.

NEBAL'LAT (נְבַלְלַט) [perh. *projection, spur*, Dietr.; *hard, firm soil*, Fürst]: Vat. [Rom. Alex.] omit; Alex. [rather, FA. 3] Ναβαλλατ: *Neballat*, a town of Benjamin, one of those which the Benjamites reoccupied after the Captivity (Neh. xi. 34), but not mentioned in the original catalogue of allotment (comp. Josh. xviii. 11–28). It is here named with ZEBOM, LOD, and ONO. Lod is Lydda, the modern *Ludd*, and Ono not impossibly *Kefr Anna*, four miles to the north of it. East of these, and forming nearly an equilateral triangle with them,<sup>c</sup> is *Beit Nebalu* (Rob. ii. 232), which is possibly the *locum tenens* of the ancient village. Another place of very nearly the same name, *Bir Nebala*, lies to the east of *el-Jib* (Gibeon), and within half a mile of it. This would also be within the territory of Benjamin, and although further removed from Lod and Ono, yet if ZEBOM should on investigation prove (as is not impossible) to be in one of the wadies which penetrate the eastern side of this district and lead down to the Jordan Valley (comp. 1 Sam. xiii. 18), then, in that case, this situation might not be unsuitable for Neballat. G.

NE'BAT (נְבַת) [*view, aspect*, Ges.: *cultivation?* Fürst]: *Naβár*; [Vat. in 1 K. *Naβaθ* and *Naβar*, elsewhere *Naβar*:] *Nabat*, but *Nabath* in 1 K. xi.). The father of Jeroboam, whose name is only preserved in connection with that of his distinguished son (1 K. xi. 26, xii. 2, 15, xv. 1, xvi. 3, 26, 31, xxi. 22, xxii. 52; 2 K. iii. 3, ix. 9, x. 29, xiii. 2, 11, xiv. 24, xv. 9, 18, 24, 28, xvii. 21, xxiii. 15; 2 Chr. ix. 20, x. 2, 15, xxiii. 6). He is described as an Ephraimite, or Ephraimite, of Zereda in the Jordan Valley, and appears to have died while his son was young. The Jewish tradition preserved in Jerome (*Quest. Hebr. in lib. Reg.*) identifies him with Shimei of Gera, who was a Benjamite. [JEROBOAM.]

NEBO, MOUNT (הַר-נְבוֹ) [*Mount Nebo*, *i. e.*, a heathen god = Mercury]: ὄρος Ναβαῦ: *mons Nebo*). The mountain from which Moses took his first and last view of the Promised Land (Deut. xxxii. 49, xxxiv. 1). It is so minutely described, that it would seem impossible not to recognize it: in the land of Moab; facing Jericho; the head or summit of a mountain called the Pisgah, which again seems to have formed a portion of the general range of the "mountains of Abarim." Its position is further denoted by the mention of the valley (or perhaps more correctly the ravine) in

are mentioned by trustworthy Arab writers as existing in their own day, no Arab record connecting that people with Petra has been found. Caussin believes this to have arisen from the Chaldæan speech of the Nabathæans, and their corruption of Arabic (*Essai sur l'Hist. des Arabes avant l'Islamisme*, i. 38).

<sup>c</sup> Schwarz (p. 134), with less than usual accuracy places "Beth-Naballa" at "five miles south of Rom leh." It is really about that distance N. E. of \*

which Moses was buried, and which was apparently one of the clefts of the mount itself (xxxii. 50) — "the ravine in the land of Moab facing Beth-Peor" (xxxiv. 6). And yet, notwithstanding the minuteness of this description, no one has yet succeeded in pointing out any spot which answers to Nebo. Viewed from the western side of Jordan (the nearest point at which most travellers are able to view them) the mountains of Moab present the appearance of a wall or cliff, the upper line of which is almost straight and horizontal. "There is no peak or point perceptibly higher than the rest; but all is one apparently level line of summit without peaks or gaps" (Rob. *Bibl. Res.* i. 570). "On ne distingue pas un sommet, pas la moindre cime; seulement on aperçoit, çà et là, de légères inflexions, comme si la main du peintre qui a tracé cette ligne horizontale sur le ciel eût tremblé dans quelques endroits" (Chateaubriand, *Itinéraire*, part 3). "Possibly," continues Robinson, "on travelling among these mountains, some isolated point or summit might be found answering to the position and character of Nebo." Two such points have been named. (1.) Seetzen (March 17, 1806; *Reise*, vol. i. 408) seems to have been the first to suggest the *Dschibbal Attarús* (between the *Wady Zerka-Main* and the Arnon, 3 miles below the former, and 10 or 12 south of Heshbon) as the Nebo of Moses. In this he is followed (though probably without any communication) by Burckhardt (July 14, 1812), who mentions it as the highest point in that locality, and therefore probably "Mount Nebo of the Scripture." This is adopted by Irby and Mangles, though with hesitation (*Travels*, June 8, 1818).

(2.) The other elevation above the general summit level of these highlands is the *Jebel 'Osha*, or *Ausha*, or *Jebel el-Jil'ál*, "the highest point in all the eastern mountains," "overtopping the whole of the *Belka*, and rising about 3000 feet above the *Ghór*" (Burckhardt, July 2, 1812; Robinson, i. 527 note, 570).

But these eminences are alike wanting in one main essential of the Nebo of the Scripture, which is stated to have been "facing Jericho," words which in the widest interpretation must imply that it was "some elevation immediately over the last stage of the Jordan," while '*Osha* and *Attarús* are equally remote in opposite directions, the one 15 miles north, the other 15 miles south of a line drawn eastward from Jericho. Another requisite for the identification is, that a view should be obtainable from the summit, corresponding to that prospect over the whole land which Moses is said to have had from Mount Nebo: even though, as Professor Stanley has remarked (*S. & P.* 301), that was a view which in its full extent must have been imagined rather than actually seen.<sup>a</sup> The view from *Jebel Jil'ad* has been briefly described by Mr. Porter (*Handb.* 309), though without reference to the possibility of its being Nebo. Of that from *Jebel Attarús*, no description is extant, for, almost incredible as it seems, none of the travellers above named, although they believed it to be Nebo, appear to have made any attempt to deviate so far from their route as to ascend an eminence, which, if their conjectures be correct, must be the most interesting spot in the world. G.

\* It is a pleasure to add, that since the date of the preceding article, the lost Nebo from which Moses beheld the land of promise, just before his death, has in all probability been identified. De Sauley may have singled out the right summit, but he did not verify his conjecture, and we are mainly indebted to Mr. Tristram for the discovery. This traveller ascended one of the ridges or "brows" of the Abarim or Moab Mountains, on the east of the Jordan, which in its position and the wide prospect which it commands agrees remarkably with the Biblical account. It is about three miles southwest of *Heshbân* (Heshbon), and about a mile and a half due west of *Main* (Baal-Meon). It overlooks the mouth of the Jordan, "over against Jericho" (Deut. xxxiv. 1), and the gentle slope of its sides may well answer to "the field of Zophim" (Num. xxiii. 14). It is not an isolated peak, but one of "a succession of bare turf-clad eminences, so linked together that the depressions between them were mere hollows rather than valleys." It is "the highest" of these, which differ, however, so little that Mr. Tristram thought it impossible "to pitch upon the exact Pisgah with certainty."

It must be left to the traveller's own words to describe the magnificent panorama which lies spread out before the eye from this summit.

"The altitude of the brow cannot be less than 4,500 feet, so completely does it overlook the heights of Hebron and of Central Judæa. To the eastward, as we turned round, the ridge seemed gently to slope for two or three miles, when a few small ruin-clad 'tells' or hillocks (*Heshbân*, *Main*, and others) broke the monotony of the outline; and then, sweeping forth, rolled in one vast unbroken expanse the goodly *Belka* — one boundless plain, stretching far into Arabia, till lost in the horizon — one waving ocean of corn and grass. Well may the Arabs boast, 'Thou cannot find a country like the *Belka*.' . . . As the eye turned southwards towards the line of the ridge on which we were clustered, the peak of *Jebel Shihân* just stood out behind *Jebel Attarús*, which opened to reveal to us the situation of *Kerak*, though not its walls. Beyond and behind these, sharply rose Mounts Hor and Seir, and the rosy granite peaks of Arabia faded away into the distance towards *Akabah*. Still turning westwards, in front of us, two or three lines of terraces reduced the height of the plateau as it descended to the Dead Sea, the western outline of which we could trace, in its full extent, from *Udum* to *Feshkhah*. It lay like a long strip of molten metal, with the sun mirrored on its surface, waving and undulating on its further edge, unseen on its eastern limits, as though poured from some deep cavern beneath our feet. There, almost in the centre of the line, a break in the ridge and a green spot below marked Engedi, the nest once of the Kenite, now of the wild goat. The fortress of *Masada* and jagged *Shukijf* rose above the mountain-line, but still far below us, and lower, too, than the ridge of Hebron, which we could trace, as it lifted gradually from the southwest, as far as Bethlehem and Jerusalem. The buildings of Jerusalem we could not see, though all the familiar points in the neighborhood were at once identified. There was the Mount of Olives, with the church at its top, the gap in the hills leading up from Jericho, and the rounded heights of Benjamin on its other side. Still turning northward, the eye was riveted by the deep *Ghór*; with the rich greer islets of *Ain Sultan* and *Ain Dák* — the twin oases, nestling, as it were, under the wall of

<sup>a</sup> This view was probably identical with that seen by Balaam (Num. xxiii. 14). It is beautifully drawn out in detail by Prof. Stanley (*S. & P.* 299).

*Quarantania* [the traditional scene of Christ's temptation]. There — closer still, beneath us — had Israel's last camp extended, in front of the green fringe which peeped forth from under the terraces in our foreground. The dark sinuous bed of Jordan, clearly defined near its mouth, was soon lost in dim haze. Then, looking over it, the eye rested on Gerizim's rounded top; and, further still, opened the plain of Esdraelon, a shoulder of Carmel, or some other intervening height, just showing to the right of Gerizim; while the faint and distant bluish haze beyond it told us that there was the sea, the utmost sea. It seemed as if but a whiff were needed to brush off the haze and reveal it clearly. Northwards, again, rose the distinct outline of unmistakable Tabor, aided by which we could identify Gilboa and *Jebel Duhy*. Snowy Hermon's top was mantled with cloud, and Lebanon's highest range must have been exactly shut behind it; but in front, due north of us, stretched in long line the dark forests of *Ajlun*, bold and undulating, with the steep sides of mountains here and there whitened by cliffs; terminating in Mount Gilead, behind *es-Sall*. To the northeast the vast Hauran stretched beyond, filling in the horizon line to the *Belka*, between which and the Hauran (Bashan) there seems to be no natural line of separation. The tall range of *Jebel Hauran*, behind Bozrah, was distinctly visible." (*Land of Israel*, pp. 541-543, 2d ed.)

De Saulcy reports that he heard this mountain (it seems to have been this) called *Nebbeh* (Neb) by the Arabs; but the statement needs confirmation. Mr. Tristram states his own conclusion thus: "We were undoubtedly on the range of Nebo, among the highlands of Abarim, and in selecting this highest point, the crest just west of *Main*, we might reasonably flatter ourselves that we stood on Pisgah's top." [NEBO.] Mr. Grove, who in the above article rejects all previous claims to the identification of this Nebo, admits now (Clark's *Bible Atlas*, p. 104), that "probably" *Jebel Nebbah* is the mount in question. The difficulty in regard to the possibility of seeing so far has been exaggerated. An oriental atmosphere, as compared with our own, has a transparency which is marvellous. Dr. Thomson, who has dwelt more than a quarter of a century amid the scenery of Lebanon, says (*Land and Book*, i. p. 18) that he can show "many a Pisgah in Lebanon and Hermon from which the view is far more extensive" than that on which the eye of Moses rested as he looked abroad from Nebo. We are to remember, too, that, though the Hebrew lawgiver was a hundred and twenty years old when he died, we are expressly told that "his eye was not dim nor his natural force abated" (Deut. xxxiv. 7). H.

NE'BO (נְבוֹ [see above]). 1. (Naβaū: *Nebo*

<sup>a</sup> The name is omitted in this passage in the Vatican LXX. Tl. Alex. MSS. has τῆν βαμῶ.

<sup>b</sup> See MOAB, p. 1984 a.

<sup>c</sup> Selden (*De D's Syr. Synt.* ii. cap. 12) assumes on the authority of Hesychius' interpretation of Is. xv. 1, that Dibon contained a temple or sanctuary of Nebo. But it would appear that Nebo the place, and not Nebo the divinity, is referred to in that passage.

<sup>d</sup> In another passage (*ad Esaiam*, xv. 2), Jerome states that the "consecrated idol of Chemosh — that is, Belphegor" — Baal Peor, resided in Nebo.

<sup>e</sup> *Kenawat*, the representative of Kenath, is 100 Roman miles N. E. of Heshbon.

and *Nabo*.) A town on the eastern side of Jordan, situated in the pastoral country (Num. xxiii. 3) one of those which were taken possession of and rebuilt by the tribe of Reuben (ver. 38).<sup>a</sup> In these lists it is associated with Kirjathaim and Baalmeon or Beon; and in another record (1 Chr. v. 8; with Aroer, as marking one extremity, possibly the west, of a principal part of the tribe. In the remarkable prophecy adopted<sup>b</sup> by Isaiah (xv. 2) and Jeremiah (xlviii. 1, 22) concerning Moab, Nebo is mentioned in the same connection as before, though no longer an Israelite town, but in the hands of Moab. It does not occur in the catalogue of the towns of Reuben in Joshua (xiii. 15-23); but whether this is an accidental omission, or whether it appears under another name — according to the statement of Num. xxiii. 38, that the Israelites changed the names of the heathen cities they retained in this district — is uncertain. In the case of Nebo, which was doubtless called after the deity<sup>c</sup> of that name, there would be a double reason for such a change (see Josh. xxiii. 7).

Neither is there anything to show whether there was a connection between Nebo the town and Mount Nebo. The notices of Eusebius and Jerome (*Onomasticon*) are confused, but they at least denote that the two were distinct and distant from each other.<sup>d</sup> The town (Naβaūp and "Nabo") they identify with Nobah or Kenath, and locate it 8 miles south<sup>e</sup> of Heshbon, where the ruins of *el-Habis* appear to stand at present; while the mountain (Naβaū and "Naban") is stated to be 6 miles east (Jer.) or west (Eus.) from the same spot.

In the list of places south of *es-Sall* given by Dr. Robinson (*Bibl. Res.* 1st ed. vol. iii. App. 170) one occurs named *Neba*, which may possibly be identical with Nebo, but nothing is known of its situation or of the character of the spot.

2. (Naβoύ, Alex. Naβo; in Neh. [Rom. Alex. Naβla. V.A. Naβeia, Vat.] Naβiaa: *Nebo*.) The children of Nebo (*Bene-Nebo*) to the number of fifty-two, are mentioned in the catalogue of the men of Judah and Benjamin, who returned from Babylon with Zerubbabel (Ez. ii. 29; Neh. vii. 33).<sup>f</sup> Seven of them had foreign wives, whom they were compelled to discard (Ez. x. 43). The name occurs between Bethel and Ai, and Lydda, which, if we may trust the arrangement of the list, implies that it was situated in the territory of Benjamin to the N. W. of Jerusalem. This is possibly the modern *Beit-Nūbah*, about 12 miles N. W. by W. of Jerusalem, 8 from Lydda, and close to *Yalo*, which seems to be the place mentioned by Jerome (*Onom.* "Anab," and "Anob;," and *Epit. Paulæ*, § 8) as Nob the city of the priests (though that identification is hardly admissible), and both in his and later times known as Bethannaba or Bettenuble.<sup>g</sup>

It is possible that this Nebo was an offshoot of

<sup>f</sup> In Neh. the name is given as the "other Nebo,"

נְבוֹ (comp. ELAM), as if two places of that name were mentioned, but this is not the case.

<sup>g</sup> The words of William of Tyre (xiv. 8) are well worth quoting. They are evidently those of an eye witness. "Nobe qui hodie vulgari appellatione dicitur Bettenuble, in descensu montium, in primis auspiciis (aspiciis?) campestrium, via quā itur Liddam . . . ibi enim in faucibus montium inter angustias inevitabiles . . . Ascalonicis subitas irruptiones illic facere consuetis." Just as the Philistines did in the time of Saul. — Can this be Gob or Nob, where they were frequently encountered?

hat on the east of Jordan; in which case we have another town added to those already noticed in the territory of Benjamin which retain the names of foreign and heathen settlers. [BENJAMIN, vol. i. p. 277, note; MICHMASH; OPHNI.]

A town named Nomba is mentioned by the LXX. (not in Heb.) amongst the places in the south of Judah frequented by David (1 Sam. xxx. 30), but its situation forbids any attempt to identify this with Nebo. G.

NE'BO (נְבוֹ) [see above]: Ναβό, [Ναβαῦ; in Is., Alex. *Δαγών*:] *Nabo*, which occurs both in Isaiah (xvi. 1) and Jeremiah (xlviii. 1) as the name of a Chaldean god, is a well-known deity of the Babylonians and Assyrians. The original native name was, in Hamitic Babylonian, *Nabiu*, in Semitic Babylonian and Assyrian, *Nabu*. It is reasonably conjectured to be connected with the Hebrew נבא, "to prophesy," whence the common word נְבִיא, "prophet" (Arab. *Neby*). Nebo was the god who presided over learning and letters.

"Nebo."

He is called "the far-hearing," "he who possesses intelligence," "he who teaches or instructs." The wedge or arrow-head — the essential element of cuneiform writing — appears to have been his emblem; and hence he bore the name of *Tir*, which signifies "a shaft or arrow." His general character corresponds to that of the Egyptian Thoth, the Greek Hermes, and the Latin Mercury. Astronomically he is identified with the planet nearest the sun, called Nebo also by the Mendæans, and *Tir* by the ancient Persians.

Nebo was of Babylonian rather than of Assyrian origin. In the early Assyrian Pantheon he occu-

pies a very inferior position, being either omitted from the lists altogether, or occurring as the last of the minor gods. The king supposed to be Pul first brings him prominently forward in Assyria and then apparently in consequence of some peculiar connection which he himself had with Babylon. A statue of Nebo was set up by this monarch at Calah (*Nimrud*), which is now in the British Museum. It has a long inscription, written across the body, and consisting chiefly of the god's various epithets. In Babylonia Nebo held a prominent place from an early time. The ancient town of Borsippa was especially under his protection, and the great temple there (the modern *Birs-Nimrud*) was dedicated to him from a very remote age. [BABEL, TOWER OF.] He was the tutelary god of the most important Babylonian kings, in whose names the word *Nabu*, or Nebo, appears as an element: e. g. Nabo-nassar, Nabo-polassar, Nebuchadnezzar, and Nabo-nadius or Labynetus; and appears to have been honored next to Bel-Merodach by the later kings. Nebuchadnezzar completely rebuilt his temple at Borsippa, and called after him his famous seaport upon the Persian Gulf, which became known to the Greeks as Teredon or Dirdotis — "given to Tir," i. e. to Nebo. The worship of Nebo appears to have continued at Borsippa to the 3d or 4th century after Christ, and the Sabæans of Harran may have preserved it even to a later date. (See the Essay *On the Religion of the Babylonians and Assyrians*, by Sir H. Rawlinson, in the 1st vol. of Rawlinson's *Herodotus*, pp. 637-640; and compare Norberg's *Onomasticon*, s. v. Nebo, pp. 98, 99.) G. R.

NEBUCHADNEZZAR, or NEBUCHADREZZAR (נְבוּכַדְנֶצְרַר, [נְבוּכַדְנֶצְרַר] or נְבוּכַדְרֶצְרַר : Ναβουχοδονόσορ : *Nabuchodonosor*), was the greatest and most powerful of the Babylonian kings. His name, according to the native orthography, is read as *Nabu-kuduri-utsur*, and is explained to mean "Nebo is the protector against misfortune," *kuduri* being connected with the Hebrew קִדּוּר, "trouble" or "attack," and *utsur* being a participle from the root נָצַר, "to protect." The rarer Hebrew form, used by Jeremiah and Ezekiel, — Nebuchadrezzar, is thus very close indeed to the original. The Persian form, *Nabukutrachara* (*Beh. Inscr.* col. i. par. 16), is less correct; while the Greek equivalents are sometimes very of the mark. *Ναβουκοδρόσορος*, which was used by Abydenus and Megasthenes, is the best of them: *Ναβοκολάσαρος*, which appears in the Canon of Ptolemy, the worst. Strabo's *Ναβοκαδρόσορος* (xv. 1, § 6) and Berosus's *Ναβουχοδρόσορος* lie between these extremes.

Nebuchadnezzar was the son and successor of Nabopolassar, the founder of the Babylonian Empire. He appears to have been of marriageable age at the time of his father's rebellion against Assyria, B. C. 625; for, according to Abydenus (ap. Euseb. *Chron. Can.* i. 9), the alliance between this prince and the Median king was cemented by the betrothal of Amuhia, the daughter of the latter, to Nebuchadnezzar, Nabopolassar's son. Little further is known of him during his father's lifetime. It is suspected, rather than proved, that ne was the leader of a Babylonian contingent which accompanied Cyaxares in his Lydian war [MEDES] by whose interposition, on the occasion of an eclipse,

that war was brought to a close,<sup>a</sup> B. C. 616. At any rate, a few years later, he was placed at the head of a Babylonian army, and sent by his father, who was now old and infirm, to chastise the insolence of Pharaoh-Necho, king of Egypt. This prince had recently invaded Syria, defeated Josiah, king of Judah, at Megiddo, and reduced the whole tract, from Egypt to Carchemish on the upper Euphrates [CARCHEMISH], which in the partition of the Assyrian territories on the destruction of Nineveh had been assigned to Babylon (2 K. xxiii. 29, 30; Beros. ap. Joseph. c. Ap. i. 19). Necho had held possession of these countries for about three years, when (B. C. 605) Nebuchadnezzar led an army against him, defeated him at Carchemish in a great battle (Jer. xlvi. 2-12), recovered Coele-syria, Phœnicia, and Palestine, took Jerusalem (Dan. i. 1, 2), pressed forward to Egypt, and was engaged in that country or upon its borders when intelligence arrived which recalled him hastily to Babylon. Nabopolassar, after reigning 21 years, had died, and the throne was vacant: for there is no reason to think that Nebuchadnezzar, though he appeared to be the "king of Babylon" to the Jews, had really been associated by his father. In some alarm about the succession he hurried back to the capital, accompanied only by his light troops; and crossing the desert, probably by way of Tadmor or Palmyra, reached Babylon before any disturbance had arisen, and entered peaceably on his kingdom (B. C. 604). The bulk of the army, with the captives — Phœnicians, Syrians, Egyptians, and Jews — returned by the ordinary route, which skirted instead of crossing the desert. It was at this time that Daniel and his companions were brought to Babylon, where they presently grew into favor with Nebuchadnezzar, and became persons of very considerable influence (Dan. i. 3-20).

Within three years of Nebuchadnezzar's first expedition into Syria and Palestine, disaffection again showed itself in those countries. Jehoiakim — who, although threatened at first with captivity (2 Chr. xxxvi. 5), had been finally maintained on the throne as a Babylonian vassal — after three years of service "turned and rebelled" against his suzerain, probably trusting to be supported by Egypt (2 K. xxiv. 1). Not long afterwards Phœnicia seems to have broken into revolt; and the Chaldean monarch, who had previously endeavored to subdue the disaffected by his generals (*ib.* ver. 2), once more took the field in person, and marched first of all against Tyre. Having invested that city in the seventh year of his reign (Joseph. c. Ap. i. 21), and left a portion of his army there to continue the siege, he proceeded against Jerusalem, which submitted without a struggle. According to Josephus, who is here our chief authority, Nebuchadnezzar punished Jehoiakim with death (*Ant.* x. 6, § 3; comp. Jer. xxii. 18, 19, and xxxvi. 30), but placed his son Jehoiachin upon the throne. Jehoiachin reigned only three months; for, on his showing symptoms of disaffection, Nebuchadnezzar came up against Jerusalem for the third time, deposed the young prince (whom he carried to Babylon, together with a large portion of the population of the city, and the chief of the Temple treasures), and made his uncle, Zedekiah, king in his room. Tyre still held out; and it was not

till the thirteenth year from the time of its first investment that the city of merchants fell (B. C. 585). Ere this happened, Jerusalem had been totally destroyed. This consummation was owing to the folly of Zedekiah, who, despite the warnings of Jeremiah, made a treaty with Apries (Hophra), king of Egypt (Ez. xvii. 16), and on the strength of this alliance renounced his allegiance to the king of Babylon. Nebuchadnezzar commenced the final siege of Jerusalem in the ninth year of Zedekiah, his own seventeenth year (B. C. 588), and took it two years later (B. C. 586). One effort to carry out the treaty seems to have been made by Apries. An Egyptian army crossed the frontier, and began its march towards Jerusalem; upon which Nebuchadnezzar raised the siege, and set off to meet the new foe. According to Josephus (*Ant.* x. 7, § 3) a battle was fought, in which Apries was completely defeated; but the Scriptural account seems rather to imply that the Egyptians retired on the advance of Nebuchadnezzar, and recrossed the frontier without risking an engagement (Jer. xxxvii. 5-8). At any rate the attempt failed, and was not repeated; the "broken reed, Egypt," proved a treacherous support, and after an eighteen months' siege Jerusalem fell. Zedekiah escaped from the city, but was captured near Jericho (*ib.* xxxix. 5) and brought to Nebuchadnezzar at Riblah in the territory of Hamath, where his eyes were put out by the king's order, while his sons and his chief nobles were slain. Nebuchadnezzar then returned to Babylon with Zedekiah, whom he imprisoned for the remainder of his life; leaving Nebuzar-adan, the captain of his guard, to complete the destruction of the city and the pacification of Judæa. Gedaliah, a Jew, was appointed governor, but he was shortly murdered, and the rest of the Jews either fled to Egypt, or were carried by Nebuzar-adan to Babylon.

The military successes of Nebuchadnezzar cannot be traced minutely beyond this point. His own annals have not come down to us; and the historical allusions which we find in his extant inscriptions are of the most vague and general character. It may be gathered from the prophetic Scriptures and from Josephus, that the conquest of Jerusalem was rapidly followed by the fall of Tyre and the complete submission of Phœnicia (Ez. xxvi. — xxviii.; Joseph. c. Ap. i. 21); after which the Babylonians carried their arms into Egypt, and inflicted severe injuries on that fertile country (Jer. xlvi. 13-26; Ez. xxx. 2-20; Joseph. *Ant.* x. 9, § 7). But we have no account, on which we can depend, of these campaigns. Our remaining notices of Nebuchadnezzar present him to us as a magnificent prince and beneficent ruler, rather than a warrior; and the great fame which has always attached to his name among the eastern nations depends rather on his buildings and other grand constructions than on any victories or conquests ascribed to him.

We are told by Berosus that the first care of Nebuchadnezzar, on obtaining quiet possession of his kingdom after the first Syrian expedition, was to rebuild the Temple of Bel (*Bel-Merodach*) at Babylon out of the spoils of the Syrian war (ap. Joseph. *Ant.* x. 11, § 1). He next proceeded to strengthen and beautify the city, which he reno-

<sup>a</sup> Herodotus terms this leader Labynetus (i. 74); a word which does not rightly render the Babylonian *Nabu-kuduri-uzur*, but does render another Babylonian

name, *Nabu-nahit*. Nabopolassar may have had a son of this name; or the Labynetus of Herod. i. 74 may be Nabopolassar himself.

ated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he constructed a new palace, adjoining the old residence of his father—a superb edifice, which he completed in fifteen days! In the grounds of this palace he formed the celebrated "hanging garden," which was a pleasure, built up with huge stones to imitate the varied surface of mountains, and planted with trees and shrubs of every kind. Diodorus, probably following Ctesias, describes this marvel as a square, four *plethra* (400 feet) each way, and 50 cubits (75 feet) high, approached by sloping paths, and supported on a series of arched galleries increasing in height from the base to the summit. In these galleries were various pleasant chambers; and one of them contained the engines by which water was raised from the river to the surface of the mound. This curious construction, which the Greek writers reckoned among the seven wonders of the world, was said to have been built by Nebuchadnezzar for the gratification of his wife, Amuhia, who, having been brought up among the Median mountains, desired something to remind her of them. Possibly, however, one object was to obtain a pleasure-ground at a height above that to which the mosquitoes are accustomed to rise.

This complete renovation of Babylon by Nebuchadnezzar, which Berosus asserts, is confirmed to us in every possible way. The Standard Inscription of the king relates at length the construction of the whole series of works, and appears to have been the authority from which Berosus drew. The ruins confirm this in the most positive way, for nine-tenths of the bricks *in situ* are stamped with Nebuchadnezzar's name. Scripture, also, adds an indirect but important testimony, in the exclamation of Nebuchadnezzar recorded by Daniel, "Is not this great Babylon which I have built?" (Dan. iv. 30).

But Nebuchadnezzar did not confine his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Cutha, Chilmad, Duraba, Teredon, and a multitude of other places, he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing everything of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs. "I have examined," says Sir H. Rawlinson, "the bricks *in situ*, belonging perhaps to a hundred different towns and cities in the neighborhood of Bagdad, and I never found any other legend than that of Nebuchadnezzar, son of Nabopolassar, king of Babylon" (*Comm. on the Inscr. of Assyria and Babylonia*, pp. 76, 77). "Nebuchadnezzar," says Abydenus, "on succeeding to the throne, fortified Babylon with three lines of walls. He dug the *Nahr Malcha*, or Royal River, which was a branch stream derived from the Euphrates, and also the *Acraeanus*. He likewise made the great reservoir above the city of Sippara, which was thirty parasangs (90 miles) in circumference, and twenty fathoms (120 feet) deep. Here he placed sluices or flood-gates, which enabled him to irrigate the

low country. He also built a quay along the shore of the Red Sea (Persian Gulf), and founded the city of Teredon on the borders of Arabia." It is reasonably concluded from these statements, that an extensive system of irrigation was devised by this monarch, to whom the Babylonians were probably indebted for the greater portion of that vast net-work of canals which covered the whole alluvial tract between the two rivers, and extended on the right bank of the Euphrates to the extreme verge of the stony desert. On that side the principal work was a canal of the largest dimensions, still to be traced, which left the Euphrates at *Hu*, and skirting the desert ran southeast a distance of above 400 miles to the Persian Gulf, where it emptied itself into the Bay of *Grane*.

The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in the book of Daniel. "The God of heaven" gave him, not a kingdom only, but "power, strength, and glory" (Dan. ii. 37). His wealth is evidenced by the image of gold, 60 cubits in height, which he set up in the plain of Dura (*ib.* iii. 1). The grandeur and careful organization of his kingdom appears from the long list of his officers, "princes, governors, captains, judges, treasurers, councillors, sheriffs, and rulers of provinces," of whom we have repeated mention (*ib.* vv. 2, 3, and 37). We see the existence of a species of hierarchy in the "magicians, astrologers, sorcerers," over whom Daniel was set (*ib.* ii. 48). The "tree, whose height was great, which grew and was strong, and the height thereof reached unto the heavens, and the sight thereof to the end of all the earth; the leaves whereof were fair, and the fruit much, and in which was food for all; under which the beasts of the field had shadow, and the fowls of heaven dwelt in the branches thereof, and all flesh was fed of it" (*ib.* iv. 10-12), is the fitting type of a kingdom at once so flourishing and so extensive.

It has been thought by some (De Wette, Th. Parker, etc.), that the book of Daniel represents the satrapial system of government (*Satrapen-Einrichtung*) as established throughout the whole empire; but this conclusion is not justified by a close examination of that document. Nebuchadnezzar, like his Assyrian predecessors (Is. x. 8), is represented as a "king of kings" (Dan. ii. 37); and the officers enumerated in ch. ii. are probably the authorities of Babylonia proper, rather than the governors of remoter regions, who could not be all spared at once from their employments. The instance of Gedaliah (Jer. xl. 5; 2 K. xxv. 22) is not that of a satrap. He was a Jew; and it may be doubted whether he stood really in any different relation to the Babylonians from Zedekiah or Jehoiachin; although as he was not of the seed of David, the Jews considered him to be "governor" rather than king.

Towards the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. As a punishment for his pride and vanity, that strange form of madness was sent upon him which the Greeks called *Lycanthropy* (*λυκανθρωπία*); wherein the sufferer imagines himself a beast, and quitting the features of men, insists on leading the life of a beast (Dan. iv. 33).<sup>a</sup> Berosus, with the pardon-

<sup>a</sup> Prof. Rawlinson describes more fully this singular malady in a later work, the third volume of his *Monarchies of the Ancient Eastern World*, p. 503 (Lond.

1865). "This malady, which is not unknown to the physicians, has been termed 'Lycanthropy.' It consists in the belief that one is not a man but a beast.

able tenderness of a native, anxious for the good fame of his country's greatest king, suppressed this fact; and it may be doubted whether Herodotus in his Babylonian travels, which fell only about a century after the time, obtained any knowledge of it. Nebuchadnezzar himself, however, in his great inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say — "For four years (?) . . . the seat of my kingdom . . . did not rejoice my heart. In all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honor of my kingdom I did not lay out. In the worship of Merodach, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises, I did not furnish his altars with victims, nor did I clear out the canals" (Rawlinson's *Herod.* ii. 586). Other negative clauses follow. It is plain that we have here narrated a suspension — apparently for four years — of all those works and occupations on which the king especially prided himself — his temples, palaces, worship, offerings, and works of irrigation; and though the cause of the suspension is not stated, we can scarcely imagine anything that would account for it but some such extraordinary malady as that recorded in Daniel.

It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works, which other writers (Berosus, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitocris was Nebuchadnezzar's queen, and that, as she carried on his constructions during his incapacity, they were by some considered to be hers. It is no disproof of this to urge that Nebuchadnezzar's wife was a Median princess, not an Egyptian (as Nitocris must have been from her name), and that she was called, not Nitocris, but Amytis or Amyhia; for Nebuchadnezzar, who married Amytis in B. C. 625, and who lived after this marriage more than sixty years, may easily have married again after the decease of his first wife, and his second queen may have been an Egyptian. His latter relations with Egypt appear to have been friendly; and it is remarkable that the name Nitocris, which belonged to very primitive Egyptian history, had in fact been resuscitated about this time, and is found in the Egyptian monuments to have been borne by a princess belonging to the family of the Psammetiks.

After an interval of four, or perhaps <sup>a</sup> seven years (Dan. iv. 16), Nebuchadnezzar's malady left him. As we are told in Scripture that "his reason returned, and for the glory of his kingdom his honor and brightness returned;" and he "was estab-

lished in his kingdom, and excellent majesty was added to him" (Dan. iv. 36), so we find in the Standard Inscription that he resumed his great works after a period of suspension, and added fresh "wonders" in his old age to the marvelous constructions of his manhood. He died in the year B. C. 561, at an advanced age (83 or 84), having reigned 43 years. A son, Evil-Merodach, succeeded him.

The character of Nebuchadnezzar must be gathered principally from Scripture. There is a conventional formality in the cuneiform inscriptions, which deprives them of almost all value for the illustration of individual mind and temper. Ostentation and vainglory are characteristics of the entire series, each king seeking to magnify above all others his own exploits. We can only observe as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his military achievements, and a strong religious spirit, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. Though his own tutelary deity and that of his father was Nebo (Mercury), yet his worship, his ascriptions of praise, his thanksgivings, have in almost every case for their object the god Merodach. Under his protection he placed his son, Evil-Merodach. Merodach is "his lord," "his great lord," "the joy of his heart," "the great lord who has appointed him to the empire of the world, and has confided to his care the far-spread people of the earth," "the great lord who has established him in strength," etc. One of the first of his own titles is, "he who pays homage to Merodach." Even when restoring the temples of other deities, he ascribes the work to the suggestions of Merodach, and places it under his protection. We may hence explain the appearance of a sort of monotheism (Dan. i. 2; iv. 24, 32, 34, 37), mixed with polytheism (*ib.* ii. 47; iii. 12, 18, 29; iv. 9), in the Scriptural notices of him. While admitting a qualified divinity in Nebo, Nana, and other deities of his country, Nebuchadnezzar maintained the real *monarchy* of Bel-Merodach. He was to him "the supreme chief of the gods," "the most ancient," "the king of the heavens and the earth."<sup>b</sup> It was *his* image, or symbol, undoubtedly, which was "set up" to be worshipped in the "plain of Dura" (*ib.* iii. 1), and *his* "house" in which the sacred vessels from the Temple were treasured (*ib.* i. 2). Nebuchadnezzar seems at some times to have identified this, his supreme god, with the God of the Jews (*ib.* ch. iv.); at others, to have regarded the Jewish God as one of the local and inferior deities (ch. iii.) over whom Merodach ruled.

The genius and grandeur which characterized Nebuchadnezzar, and which have handed down his name among the few ancient personages known generally throughout the East, are very apparent in

in the disuse of language, the rejection of all ordinary human food, and sometimes in the loss of the erect posture and a preference for walking on all fours. Within a year of the time that he received the warning (Dan. iv. 29), Nebuchadnezzar was smitten. The great king became a wretched maniac. Allowed to indulge his disesteemed fancy, he eschewed human habitations, lived in the open air night and day, fed on herbs, disused clothing, and became covered with a rough coat of hair (ver. 33). His subjects generally, it is probable, were not allowed to know on any condition, though they could not but be aware that

he was suffering from some terrible malady. The queen most likely held the reins of power, and carried on the government in his name.

We must not suppose that the afflicted monarch was allowed to range freely through the country. He was no doubt strictly confined to the private gardens attached to the palace.<sup>c</sup>

<sup>a</sup> Daniel's expression is "seven times" We can not be sure that by a "time" is meant a year.

<sup>b</sup> These expressions are all applied to Merodach by Nebuchadnezzar in his Inscriptions.

Scripture, and indeed in all the accounts of his reign and actions. Without perhaps any strong military turn, he must have possessed a fair amount of such talent to have held his own in the east against the ambitious Medes, and in the west against the Egyptians. Necho and Apries were both princes of good warlike capacity, whom it is some credit to have defeated. The prolonged siege of Tyre is a proof of the determination with which he prosecuted his military enterprises. But his greatness lay especially in the arts of peace. He saw in the natural fertility of Babylonia, and its ample wealth of waters, the foundation of national prosperity, and so of power. Hence his vast canals and elaborate system of irrigation, which made the whole country a garden; and must have been a main cause of the full treasury, from which alone his palaces and temples can have received their magnificence. The forced labor of captives may have raised the fabrics; but the statues, the enameled bricks, the fine woodwork, the gold and silver plating, the hangings and curtains, had to be bought; and the enormous expenditure of this monarch, which does not appear to have exhausted the country, and which cannot have been very largely supported by tribute, must have been really supplied in the main from that agricultural wealth which he took so much pains to develop. We may gather from the productiveness of Babylonia under the Persians (Herod. i. 192, 193, iii. 92), after a conquest and two (three?) revolts, some idea of its flourishing condition in the period of independence, for which (according to the consistent testimony of the monuments and the best authors) it was indebted to this king.

The moral character of Nebuchadnezzar is not such as entitles him to our approval. Besides the overweening pride which brought upon him so terrible a chastisement, we note a violence and fury (Dan. ii. 12, iii. 19) common enough among oriental monarchs of the weaker kind, but from which the greatest of them have usually been free; while at the same time we observe a cold and relentless cruelty which is particularly revolting. The blinding of Zedekiah may perhaps be justified as an ordinary eastern practice, though it is the earliest case of the kind on record; but the refinement of cruelty by which he was made to witness his sons' execution before his eyes were put out (2 K. xxv. 7) is worthier of a Dionysius or a Domitian than of a really great king. Again, the detention of Jehoiachin in prison for 36 years for an offense committed at the age of eighteen (2 K. xxiv. 8), is a severity surpassing oriental harshness. Against these grave faults we have nothing to set, unless it be a feeble trait of magnanimity in the pardon accorded to Shadrach, Meshach, and Abed-nego, when he found that he was without power to punish them (Dan. iii. 26).

It has been thought remarkable that to a man of this character, God should have vouchsafed a revelation of the future by means of visions (Dan. i. 29, iv. 2). But the circumstance, however it may disturb our preconceived notions, is not really

at variance with the general laws of God's providence, as revealed to us in Scripture. As with his natural, so with his supernatural gifts, they are no confined to the worthy. Even under Christianity, miraculous powers were sometimes possessed by those who made an ill use of them (1 Cor. xiv. 2-33). And God, it is plain, did not leave the old heathen world without some supernatural aid, but made his presence felt from time to time in visions, through prophets, or even by a voice from Heaven. It is only necessary to refer to the histories of Pharaoh (Gen. xli. 1-7, and 28), Abimelech (*ib.* xx. 3), Job (Job iv. 13, xxxviii. 1, xl. 6; comp. Dan. iv. 31), and Balaam (Num. xxii.-xxiv.), in order to establish the parity of Nebuchadnezzar's visions with other facts recorded in the Bible. He was warned, and the nations over which he ruled were warned through him, God leaving not Himself "without witness" even in those dark times. In conclusion, we may notice that a heathen writer (Abydenus), who generally draws his inspirations from Berostus, ascribes to Nebuchadnezzar a miraculous speech just before his death, announcing to the Babylonians the speedy coming of "a Persian mule," who with the help of the Medes would enslave Babylon (Abyd. ap. Euseb. *Præp. Ev.* ix. 41).  
G. R.

NEBUSHAS'BAN (נְבוּשַׁשְׁבַּן, *i. e.* Nebushazban; LXX. omits: *Nabusezban*), one of the officers of Nebuchadnezzar at the time of the capture of Jerusalem. He was Rab-saris, *i. e.* chief of the eunuchs (Jer. xxxix. 13), as Nebuzaradan was Rab-tabachim (chief of the body-guard), and Nergal-sharezer, Rab-Mag (chief of the magicians), the three being the most important officers then present, probably the highest dignitaries of the Babylonian court.<sup>b</sup> Nebushasban's office and title were the same as those of Ashpenaz (Dan. i. 3), whom he probably succeeded. In the list given (ver. 3) of those who took possession of the city in the dead of the night of the 11th Tammuz, Nebushasban is not mentioned by name, but merely by his title Rab-saris. His name, like that of Nebuchadnezzar and Nebuzaradan, is a compound of Nebo, the Babylonian deity, with some word which though not quite ascertained, probably signified adherence or attachment (see Gesen. *Thes.* 840 b: Fürst, *Handwb.* ii. 7 b).  
G.

NEBUZAR'ADAN (נְבוּזַרְאֲדָן [see below]: *Ναβουζαρδάν* or *Ναβουζαρδάν*; Joseph. *Ναβουζαρδάνης*: *Nebuzaradan*), the Rab-tabachim, *i. e.* chief of the slaughterers (A. V. "captain of the guard"), a high officer in the court of Nebuchadnezzar, apparently (like the Tartan in the Assyrian army) the next to the person of the monarch. He appears not to have been present during the siege of Jerusalem; probably he was occupied at the more important operations at Tyre, but as soon as the city was actually in the hands of the Babylonians he arrived, and from that moment everything was completely directed by him. It was he who decided, even to the minutest

<sup>a</sup> In the usual copies of the Hebrew Bible this final n is written small, and noted in the Masora accordingly. In several of Kennicott's MSS. z (ז) is found instead of n (נ), making the name Nebushazbaz, with perhaps an intentional play of sound, *baz* meaning prey or spoil

<sup>b</sup> So at the Assyrian invasion in the time of Hezekiah Tartan, Rab-saris, and Rab-shakeh, as the three highest dignitaries, addressed the Jews from the head of their army (2 K. xviii. 17). Possibly these three officers in the Assyrian court, answered to the three named above in the Babylonian.

details of fire-pans and bowls (2 K. xxv. 15), what should be carried off and what burnt, which persons should be taken away to Babylon and which left behind in the country. One act only is referred directly to Nebuchadnezzar, the appointment of the governor or superintendent of the conquered district. All this Nebuzaradan seems to have carried out with wisdom and moderation. His conduct to Jeremiah, to whom his attention had been directed by his master (Jer. xxxix. 11), is marked by even higher qualities than these, and the prophet has preserved (xl. 2-5) a speech of Nebuzaradan's to him on liberating him from his chains at Ramah, which contains expressions truly remarkable in a heathen. He seems to have left Judæa for this time when he took down the chief people of Jerusalem to his master at Riblah (2 K. xxv. 18-20). In four years he again appeared (Jer. lii. 30). Nebuchadnezzar in his twenty-third year made a descent on the regions east of Jordan, including the Ammonites and Moabites (Joseph. *Ant.* x. 9, § 7), who escaped when Jerusalem was destroyed. [MOAB, p. 1986 b.] Thence he proceeded to Egypt (Joseph. *ibid.*), and, either on the way thither or on the return, Nebuzaradan again passed through the country and carried off seven hundred and forty-five more captives (Jer. lii. 30).

The name, like Nebuchadnezzar and Nebushasban, contains that of Nebo the Babylonian deity. The other portion of the word is less certain. Gesenius (*Theo.* p. 839 b) translates it by "Mercurii dux dominus," taking the  $\aleph$  as = שׂר, "prince," and  $\aleph$  as = לֹדִי, "lord." Fürst, on the other hand (*Handb.* ii. 6), treats it as equivalent in meaning to the Hebrew *rab-tabbachim*, which usually follows it, and sometimes occurs by itself (2 K. xxv. 18; Jer. xl. 2, 5). To obtain this meaning he compares the last member of the name to the Sansk. *dāna*, from *dā*, "to cut off." Gesenius also takes zaradan as identical with the first element in the name of Sardanapalus. But this latter name is now explained by Sir H. Rawlinson as Assur-dan-i-pal (Rawlinson's *Herod.* i. 460). G.

NE'CHO (נֶכּוֹ: Νεχᾶδ: [*Necho*]), 2 Chr. xxxv. 20, 22; xxxvi. 4. [PHARAOH-NECHO.]

NECO'DAN (Νεκωδᾶν: *Nechodāicus*) = NEKODA (1 Esdr. v. 37; comp. Ezr. ii. 60).

\* NECROMANCER (Deut. xviii. 11). See MAGIC.

NEDABIAH (נְדַבְיָה: *Nabādias*; [Vat. Δεϋθεϊ:] *Nadabir*). Apparently one of the sons of Jehoniah, or Jehoiachin, king of Judah (1 Chr. iii. 18). Lord A. Hervey, however, contends that this list contains the order of succession and not of lineal descent, and that Nedabiah and his brothers were sons of Neri.

\* NEEDLEWORK. See DRESS, 2.

NEEMI'AS (*Neemias*; [in Ecclus., Vat. Νεουσιαν, Sin. Νεμουσι: in 2 Macc. i. 18, 21, 23, 36, ii. 13, Alex. Νεεμίας:] *Nehemias*) = NENE-MIAH the son of Hachaliah (Ecclus. xlix. 13; 2 Macc. i. 18, 20, 21, 23, 31, 36, ii. 13).

NEG'INAH (נְגִינָה), properly *Neginath*, as the text now stands, occurs in the title of Ps. li., "to the chief musician upon Neginath." If the present reading be correct, the form of the word

may be compared with that of Mahalath (Ps. lii.) But the LXX. (ἐν ὕμνοις), and Vulg. (*in hymnis*), evidently read "Neginoth" in the plural, which occurs in the titles of five Psalms, and is perhaps the true reading. Whether the word be singular or plural, it is the general term by which all stringed instruments are described. In the singular it has the derived sense of "a song sung to the accompaniment of a stringed instrument," and generally of a taunting character (Job xxx. 9; Ps. lxix. 12; Lam. iii. 14). [NEG'INOTH.]

W. A. W.

NEG'INOTH (נְגִינָה). This word is found in the titles of Ps. iv., vi., liv., lv., lxvii., lxxvi., and the margin of Hab. iii. 19, and there seems but little doubt that it is the general term denoting all stringed instruments whatsoever, whether played with the hand, like the harp and guitar, or with a plectrum.<sup>a</sup> It thus includes all those instruments which in the A. V. are denoted by the special terms "harp," "psaltery" or "viol," "sackbut," as well as by the general descriptions "stringed instruments" (Ps. cl. 4), "instruments of music" (1 Sam. xviii. 6), or, as the margin gives it, "three-stringed instruments," and the "instrument of ten strings" (Ps. xxxiii. 2, xcii. 3, cxlv. 9). "The chief musician on *Neginoth*" was therefore the conductor of that portion of the Temple-choir who played upon the stringed instruments, and who are mentioned in Ps. lxxviii. 25 (נְגִינָה, *ngōnām*).

The root (נָגַן = κρουῖν) from which the word is derived occurs in 1 Sam. xvi. 16, 17, 18, 23, xviii. 10, xix. 9; Is. xxxviii. 20, and a comparison of these passages confirms what has been said with regard to its meaning. The author of the *Shilte Haggibborim*, quoted by Kircher (*Musurgia*, i. 4, p. 48), describes the *Neginoth* as instruments of wood, long and round, pierced with several apertures, and having three strings of gut stretched across them, which were played with a bow of horsehair. It is extremely doubtful, however, whether the Hebrews were acquainted with anything so closely resembling the modern violin.

W. A. W.

NEHEL'AMITE, THE (הַיְהוּדֵי הַנְּהֶלָם: δ Αἰλαμίτης [Vat. -εῖ; Alex. FA. Ελαμίτης:] *Nehelamites*). The designation of a man named Shemaiah, a false prophet, who went with the Captivity to Babylon (Jer. xxix. 24, 31, 32). The name is no doubt formed from that either of Shemaiah's native place, or the progenitor of his family; which of the two is uncertain. No place called Nehelam is mentioned in the Bible, or known to have existed in Palestine,<sup>b</sup> nor does it occur in any of the genealogical lists of families. It resembles the name which the LXX. have attached to Ahijah the Prophet, namely the Enlamite — δ Ἐνλαμί; but by what authority they substitute that name for "the Shilonite" of the Hebrew text is doubtful. The word "Nehelamite" also probably contains a play on the "dreams" (*halam*) and "dreamers," whom Jeremiah is never wearied of denouncing (see cc. xxiii., xxvii., xxix.). This

<sup>a</sup> Hence Symmachus renders διὰ ψαλτηρίων.

<sup>b</sup> The Targum gives the name as *Helam*, הֶלֶם. A place of this name lay somewhere between the *Jordan* and the Euphrates. See vol. ii. p. 1935 f.

is hinted in the margin of the A. V. — from what source the writer has not been able to discover.

G.

**NEHEMIAH** (נְהִמְיָא) [*consolated by Jehovah: Neemula, Neemas; [Nehemiis]¹.* I. Son of Hachaliah, and apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hanani his kinsman seems to have been of that tribe (Neh. i. 2, ii. 3, vii. 2). He is called indeed "Nehemiah the Priest" (Neh. sacerdos in the Vulgate of 2 Macc. i. 21; but the Greek has it, that "Nehemiah ordered the priests (ἱερεῖς) to pour the water," etc. Nor does the expression in ver. 13, that Nehemiah "offered sacrifice," imply any more than that he provided the sacrifices. Others again have inferred that he was a priest from Neh. x. 1-8; but the words "these were the priests" naturally apply to the names which follow Nehemiah's, who signed first as the head of the whole nation. The opinion that he was connected with the house of David is more feasible, though it cannot be proved. The name of Hanani his kinsman, as well as his own name, are found slightly varied in the house of David, in the case of Hananiah the son of Zerubbabel (1 Chr. iii. 19), and Naum (Luke iii. 25).<sup>a</sup> If he were of the house of David, there would be peculiar point in his allusion to his "fathers' sepulchres" at Jerusalem. Malalas of Antioch (*Chronogr.* vi. 160), as cited by Grimm, on 2 Macc. i. 21, singularly combines the two views, and calls him "Nehemiah the priest, of the seed of David."

All that we know certainly concerning this eminent man is contained in the book which bears his name. His autobiography first finds him at Shushan, the winter<sup>b</sup> residence of the kings of Persia, in high office as the cupbearer of king Artaxerxes Longimanus. In the 20th year of the king's reign, i. e. B. C. 445, certain Jews, one of whom was a near kinsman of Nehemiah's, arrived from Judæa, and gave Nehemiah a deplorable account of the state of Jerusalem, and of the residents in Judæa. He immediately conceived the idea of going to Jerusalem to endeavor to better their state. After three or four months (from Chisleu to Nisan), in which he earnestly sought God's blessing upon his undertaking by frequent prayer and fasting, an opportunity presented itself of obtaining the king's consent to his mission. Having received his appointment as governor<sup>c</sup> of Judæa, a troop of cavalry, and letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph the keeper of the king's forests, to supply him with timber, he started upon his journey: being under promise to return to Persia within a given time. Josephus says that he went in the first instance to Babylon, and gathered round him a band of exiled Jews, who returned with him. This is important as possibly indicating that the book which Josephus followed, understood the Nehemiah mentioned in Ezr. ii. 2; Neh. vii. 7, to be the son of Hachaliah.

Nehemiah's great work was rebuilding, for the first time since their destruction by Nebuzaradan, the walls of Jerusalem, and restoring that city to its former state and dignity, as a fortified town. It is impossible to overestimate the importance to the future political and ecclesiastical prosperity of the Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestine Jews had fallen, is apparent from the fact that from the 6th of Darius to the 7th of Artaxerxes, there is no history of them whatever; and that even after Ezra's commission, and the ample grants made by Artaxerxes in his 7th year, and the considerable reinforcements, both in wealth and numbers, which Ezra's government brought to them, they were in a state of abject "affliction and reproach" in the 20th of Artaxerxes; their country pillaged, their citizens kidnapped and made slaves of by their heathen neighbors, robbery and murder rife in their very capital, Jerusalem almost deserted, and the Temple falling again into decay. The one step which could resuscitate the nation, preserve the Mosaic institutions, and lay the foundation of future independence, was the restoration of the city walls. Jerusalem being once again secure from the attacks of the marauding heathen, civil government would become possible, the spirit of the people, and their attachment to the ancient capital of the monarchy would revive, the priests and Levites would be encouraged to come into residence, the tithes and first-fruits and other stores would be safe, and Judah, if not actually independent, would preserve the essentials of national and religious life. To this great object therefore Nehemiah directed his whole energies without an hour's unnecessary delay.<sup>d</sup> By word and example he induced the whole population, with the single exception of the Tekoite nobles, to commence building with the utmost vigor, even the lukewarm high-priest Eliashib performing his part. In a wonderfully short time the walls seemed to emerge from the heaps of burnt rubbish, and to encircle the city as in the days of old. The gateways also were rebuilt, and ready for the doors to be hung upon them. But it soon became apparent how wisely Nehemiah had acted in hastening on the work. On his very first arrival, as governor, Sanballat and Tobiah had given unequivocal proof of their mortification at his appointment; and, before the work was even commenced, had scornfully asked whether he intended to rebel against the king of Persia. But when the restoration was seen to be rapidly progressing, their indignation knew no bounds. They not only poured out a torrent of abuse and contempt upon all engaged in the work, but actually made a great conspiracy to fall upon the builders with an armed force and put a stop to the undertaking. The project was defeated by the vigilance and prudence of Nehemiah, who armed all the people after their families, and showed such a strong front that their enemies dared not attack them. This armed attitude was continued from

<sup>a</sup> See *Genealog. of our Lord J. C.*, p. 145. [NEHEMIAH, SON OF AZBUK.]

<sup>b</sup> Ecbatana was the summer, Babylon the spring, and Persepolis the autumn residence of the kings of Persia (Pilkington). Susa was the principal palace [Strab. lib. xv. cap. iii. § 3].

<sup>c</sup> נְהִמְיָא, the term applied to himself and other satraps by Nehemiah. The meaning and etymology

of *Tir-hatha*, which is applied only to Nehemiah, are doubtful. I. is by most modern scholars thought to mean Governor (Gesen. s. v.); but the sense *cup-bearer*, given by older commentators, seems more probable.

<sup>d</sup> The three days, mentioned Neh. ii. 11, and Ezr. viii. 32, seems to point to some customary interval perhaps for purification after a journey. See in *Cruce's Concordance* "Third Day" and "Three Days."

that day forward. Various stratagems were then resorted to to get Nehemiah away from Jerusalem, and if possible to take his life. But that which most nearly succeeded was the attempt to bring him into suspicion with the king of Persia, as if he intended to set himself up for an independent king, as soon as the walls were completed. It was thought that the accusation of rebellion would also frighten the Jews themselves, and make them cease from building. Accordingly a double line of action was taken. On the one hand Sanballat wrote a letter to Nehemiah, in an apparently friendly tone, telling him, on the authority of Geshem, that it was reported among the heathen (*i. e.* the heathen nations settled in Samaria, and Galilee of the nations), that he was about to head a rebellion of the Jews, and that he had appointed prophets to aid in the design by prophesying of him, "thou art the king of Judah;" and that he was building the walls for this purpose. This was sure, he added, to come to the ears of the king of Persia, and he invited Nehemiah to confer with him as to what should be done. At the same time he had also bribed Noadiah the prophetess, and other prophets, to induce Nehemiah by representations of his being in danger, to take refuge in the fortress of the Temple, with a view to cause delay, and also to give an appearance of conscious guilt. While this portion of the plot was conducted by Sanballat and Tobiah, a yet more important line of action was pursued in concert with them by the chief officers of the king of Persia in Samaria. In a letter addressed to Artaxerxes they represented that the Jews had rebuilt the walls of Jerusalem, with the intent of rebelling against the king's authority and recovering their dominion on "this side the river." Referring to former instances of the seditious spirit of the Jewish people, they urged that if the king wished to maintain his power in the province he must immediately put a stop to the fortification. This artful letter so far wrought upon Artaxerxes, that he issued a decree stopping the work till further orders.<sup>a</sup> It is probable that at the same time he recalled Nehemiah, or perhaps Nehemiah's leave of absence had previously expired; in either case had the Tirshatha been less upright and less wise, and had he fallen into the trap laid for him, his life might have been in great danger. The sequel, however, shows that his perfect integrity was apparent to the king. For after a delay, perhaps of several years, he was permitted to return to Jerusalem, and to crown his work by repairing the Temple, and dedicating the walls. What, however, we have here to notice is, that owing to Nehemiah's wise haste, and his refusal to pause for a day in his work, in spite of threats, plots, and insinuations, the designs of his enemies were frustrated. The wall was actually finished and ready to receive the gates, before the king's decree for suspending the work arrived. A little delay, therefore, was all they were able to effect. Nehemiah does not indeed mention this adverse decree, which may have arrived during his absence, nor give us any clew to the time of his return; nor should we have suspected his absence at all from Jerusalem, but for the incidental allusion in ch. ii. 6, xiii. 6, coupled with the long

interval of years between the earlier and later chapters of the book. But the interval between the close of ch. vi. and the beginning of ch. vii. is the only place where we can suppose a considerable gap in time, either from the appearance of the text, or the nature of the events narrated. It seems to suit both well to suppose that Nehemiah returned to Persia, and the work stopped immediately after the events narrated in vi. 16-19, and that chapter vii. goes on to relate the measures adopted by him upon his return with fresh powers. These were, the setting up the doors in the various gates of the city, giving a special charge to Hanani and Hananiah, as to the time of opening and shutting the gates, and above all providing for the due peopling of the city, the numbers of which were miserably small, and the rebuilding of the numerous decayed houses within the walls. Then followed a census of the returned captives, a large collection of funds for the repair of the Temple, the public reading of the Law to the people by Ezra (who now appears again on the scene, perhaps having returned from Persia with Nehemiah), a celebration of the Feast of Tabernacles, such as had not been held since the days of Joshua: a no less solemn keeping of the Day of Atonement, when the opportunity was taken to enter into solemn covenant with God, to walk in the law of Moses and to keep God's commandments.

It may have been after another considerable interval of time, and not improbably after another absence of the Tirshatha from his government, that the next event of interest in Nehemiah's life occurred, namely, the dedication of the walls of Jerusalem, including, if we may believe the author of 2 Macc., supported by several indications in the Book of Nehemiah, that of the Temple after its repair by means of the funds collected from the whole population. This dedication was conducted with great solemnity, and appears to have been the model of the dedication by Judas Maccabeus, when the Temple was purified and the worship restored at the death of Antiochus Epiphanes, as related 1 Macc. iv. The author of 2 Macc. says that on this occasion Nehemiah obtained the sacred fire which had been hid in a pit by certain priests at the time of the Captivity, and was recovered by their descendants, who knew where it was concealed. When, however, these priests went to the place, they found only muddy water. By Nehemiah's command they drew this water, and sprinkled it upon the wood of the altar and upon the victims, and when the sun, which had been over-clouded, presently shone out, a great fire was immediately kindled, which consumed the sacrifices, to the great wonder of all present. The author also inserts the prayer, a simple and beautiful one, said to have been uttered by the priests, and responded to by Nehemiah, during the sacrifice; and adds, that the king of Persia inclosed the place where the fire was found, and that Nehemiah gave it the name of Naphthar, or cleansing. [NAPHTHAR.] He tells us further that an account of this dedication was contained in the "writings and commentaries of Nehemiah" (2 Macc. ii. 13), and that Nehemiah founded "a library, and gathered together the acts of the kings, and the prophets, and of David,

<sup>a</sup> The reader must remember that this application of Ezr. iv. 7-23 to this time is novel, and must exercise his own judgment as to its admissibility.

<sup>b</sup> Such as the collection of money and priests' gar-

ments mentioned in Neh. vii. 7); Ezr. ii. 68; the allusion to the pollution of the Temple, xiii. 7-9 and the nature of the ceremonies described in ch. xii. 26-43.

and the epistles of the kings (of Persia) concerning the holy gifts." How much of this has any historical foundation is difficult to determine. It should be added, however, that the son of Sirach, in celebrating Nehemiah's good deeds, mentions only that he "raised up for us the walls that were fallen, and set up the gates and the bars, and raised up our ruins again," *Eccles.* xlix. 13. Returning to the sure ground of the sacred narrative, the other principal achievements of this great and good governor may be thus signaled. He firmly repressed the exactions of the nobles, and the usury of the rich, and rescued the poor Jews from spoliation and slavery. He refused to receive his lawful allowance as governor from the people, in consideration of their poverty, during the whole twelve years that he was in office, but kept at his own charge a table for 150 Jews, at which any who returned from captivity were welcome. He made most careful provision for the maintenance of the ministering priests and Levites, and for the due and constant celebration of Divine worship. He insisted upon the sanctity of the precincts of the Temple being preserved inviolable, and peremptorily ejected the powerful Tobias from one of the chambers which Eliashib had assigned to him. He then replaced the stores and vessels which had been removed to make room for him, and appointed proper Levitical officers to superintend and distribute them. With no less firmness and impartiality he expelled from all sacred functions those of the high priest's family who had contracted heathen marriages, and rebuked and punished those of the common people who had likewise intermarried with foreigners; and lastly, he provided for keeping holy the Sabbath day, which was shamefully profaned by many, both Jews and foreign merchants, and by his resolute conduct succeeded in repressing the lawless traffic on the day of rest.

Beyond the 32d year of Artaxerxes, to which Nehemiah's own narrative leads us, we have no account of him whatever. Neither had Josephus. For when he tells us that "when Nehemiah had done many other excellent things . . . he came to a great age and then died," he sufficiently indicates that he knew nothing more about him. The most probable inference from the close of his own memoir, and in the absence of any further tradition concerning him is, that he returned to Persia and died there. On reviewing the character of Nehemiah, we seem unable to find a single fault to counterbalance his many and great virtues. For pure and disinterested patriotism he stands unrivaled. The man whom the account of the misery and ruin of his native country, and the perils with which his countrymen were beset, prompted to leave his splendid banishment, and a post of wealth, power, and influence, in the first court in the world, that he might share and alleviate the sorrows of his native land, must have been preëminently a patriot. Every act of his during his government bespeaks one who had no selfishness in his nature. All he did was noble, generous, high-minded, courageous, and to the highest degree upright. But to stern integrity he united great humility and kindness, and a princely hospitality. As a statesman he combined forethought, prudence, and sagacity in counsel, with vigor, promptitude, and decision in action. In dealing with the enemies of his country he was wary, penetrating, and bold. In directing the internal economy of the state, he took a comprehensive view of the real welfare of the people, and adopted

the measures best calculated to promote it. In dealing whether with friend or foe, he was utterly free from favor or fear, conspicuous for the simplicity with which he aimed only at doing what was right, without respect of persons. But in nothing was he more remarkable than for his piety, and the singleness of eye with which he walked before God. He seems to have undertaken everything in dependence upon God, with prayer for his blessing and guidance, and to have sought his reward only from God.

The principal authorities for the events of Nehemiah's life, after Josephus, are Carpoz's *Introduction ad V. T.*; Eichhorn, *Einleitung*; Hävernick's *Einleit.*; Rambach in *Lib. Nehem.*; Le Clerc in *Lib. histor. V. T.*, besides those referred to in the following article. Those who wish to see the questions discussed of the 20th Artaxerxes, as the *terminus a quo* Daniel's seventy weeks commence, and also the general chronology of the times, may refer to *Genealogy of our Lord Jesus Christ*, ch. xi.; and for a different view to Prideaux, *Connect.* i. 251, &c. The view of Scaliger, Hottinger, etc., adopted by Dr. Mill, *Vindiciæ of our Lord's Genealogy*, p. 165 note, that Artaxerxes Mnemon was Nehemiah's patron, is almost universally abandoned. The proof from the parallel genealogies of the kings of Persia and the high-priests, that he was Longimanus, is stated in a paper printed for the Chronolog. Institute by the writer of this article.

2. [*Nehemias, Neemia*: Vat. in Ezr., *Neeemios: Nehemia, Nehemias*.] One of the leaders of the first expedition from Bablylon to Jerusalem under Zerubbabel (*Ezr.* ii. 2; *Neh.* vii. 7).

3. [*Nehemias*: FA. *Neeemias: Nehemias*.] Son of Azbuk, and ruler of the half part of Beth-zur, who helped to repair the wall of Jerusalem (*Neh.* iii. 16). Beth-zur was a city of Judah (*Josh.* xv. 58; *1 Chr.* ii. 45), belonging to a branch of Caleb's descendants, whence it follows that this Nehemiah was also of the tribe of Judah. A. C. H.

NEHEMIAH, BOOK OF. The latest of all the historical books of Scripture, both as to the time of its composition and the scope of its narrative in general, and as to the supplementary matter of ch. xii. in particular, which reaches down to the time of Alexander the Great. This book, like the preceding one of Ezra [*EZRA, BOOK OF*], is clearly and certainly not all by the same hand. By far the principal portion, indeed, is the work of Nehemiah, who gives, in the first person, a simple narrative of the events in which he himself was concerned; but other portions are either extracts from various chronicles and registers, or supplementary narratives and reflections, some apparently by Ezra, others, perhaps, the work of the same person who inserted the latest genealogical extracts from the public chronicles.

1. The main history contained in the book of Nehemiah covers about 12 years, namely, from the 20th to the 32d year of Artaxerxes Longimanus, *i. e.* from B. C. 445 to 433. For so we seem to learn distinctly from v. 14 compared with xiii. 6; nor does there seem to be any historical ground whatever for asserting with Prideaux and many others that the government of Nehemiah, after his return in the 32d of Artaxerxes, extended to the 15th year of Darius Nothus, and that the events of ch. xiii. belong to this later period (*Prid. Connect.* b. c. 409). The argument attempted to be derived from *Neh.* xiii. 28, that Eliashib was then dead and

Joiada his son high-priest, is utterly without weight. There is a precisely parallel phrase in 2 Chr. xxxv. 3, where we read "the house which Solomon the son of David king of Israel did build." But the doubt whether the title "king of Israel" applies to David or Solomon is removed by the following verse, where we read, "according to the writing of David king of Israel, and according to the writing of Solomon his son." The LXX. also in that passage have βασιλέως agreeing with David. There is, therefore, not the slightest pretense for asserting that Nehemiah was governor after the 32d of Artaxerxes (see below).

The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's times, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the high-priesthood to the close of the Persian empire on the other. The view given of the rise of two factions among the Jews — the one the strict religious party, adhering with uncompromising faithfulness to the Mosaic institutions, headed by Nehemiah; the other, the gentileizing party, ever imitating heathen customs, and making heathen connections, headed, or at least encouraged by the high-priest Eliashib and his family — sets before us the germ of much that we meet with in a more developed state in later Jewish history from the commencement of the Macedonian dynasty till the final destruction of Jerusalem.

Again, in this history as well as in the book of Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definitive form on both religious and political grounds. It would seem from iv. 1, 2, 8 (A. V.), and vi. 2, 6, &c., that the depression of Jerusalem was a fixed part of the policy of Sanballat, and that he had the design of raising Samaria as the head of Palestine, upon the ruin of Jerusalem, a design which seems to have been entertained by the Samaritans in later times.

The book also throws much light upon the domestic institutions of the Jews. We learn incidentally the prevalence of usury and of slavery as its consequence, the frequent and burdensome oppressions of the governors (v. 15), the judicial use of corporal punishment (xii. 25), the continuance of false prophets as an engine of policy, as in the days of the kings of Judah (vi. 7, 12, 14), the restitution of the Mosaic provision for the maintenance of the priests and Levites and the due performance of the Temple service (xiii. 10-13), the much freer promulgation of the Holy Scriptures by the public reading of them (viii. 1, ix. 3, xiii. 1), and the more general acquaintance with them arising from their collection into one volume and the multiplication of copies of them by the care of Ezra the scribe and Nehemiah himself (2 Macc. ii. 13), as well as from the stimulus given to the art of reading among the Jewish people during their residence in Babylon [HILKIAH]; the mixed form of political govern-

ment still surviving the ruin of their independence (v. 7, 13, x.), the reviving trade with Tyre (xiii. 16), the agricultural pursuits and wealth of the Jews (v. 11, xiii. 15), the tendency to take heathen wives, indicating, possibly, a disproportion in the number of Jewish males and females among the returned captives (x. 30, xiii. 3, 23), the danger the Jewish language was in of being corrupted (xiii. 24), with other details which only the narrative of an eye-witness would have preserved to us.

Some of these details give us incidentally information of great historical importance.

(a.) The account of the building and dedication of the wall, iii., xii., contains the most valuable materials for settling the topography of Jerusalem to be found in Scripture. [JERUSALEM, vol. ii. pp. 1321-22.] (Thrupp's *Ancient Jerusalem*.)

(b.) The list of returned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to only 42,360 adult males, and 7,337 servants), which is given in ch. vii., conveys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone numbered 470,000 fighting men (1 Chr. xxi. 5). It justifies the description of the Palestine Jews as "the remnant that are left of the captivity" (Neh. i. 3), and as "these feeble Jews" (iv. 2), and explains the great difficulty felt by Nehemiah in peopling Jerusalem itself with a sufficient number of inhabitants to preserve it from assault (vii. 3, 4, xi. 1, 2). It is an important aid, too, in understanding the subsequent history, and in appreciating the patriotism and valor by which they attained their independence under the Maccabees.

(c.) The lists of leaders, priests, Levites, and of those who signed the covenant, reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that twelve leaders are named in Neh. vii. 7, indicates the feeling of the captives that they represented the twelve tribes, a feeling further evidenced in the expression "the men of the people of Israel." The enumeration of 21 and 22, or, if Zidkijah stands for the head of the house of Zadok, 23 chief priests in x. 1-8, xii. 1-7, of whom 9 bear the names of those who were heads of courses in David's time (1 Chr. xxiv.) [JERUSALEM], shows how, even in their wasted and reduced numbers, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular 22 or 23 names. But it does more than this. Taken in conjunction with the list of those who sealed (x. 1-27), it proves the existence of a social custom, the knowledge of which is of absolute necessity to keep us from gross chronological error, that, namely, of calling chiefs by the name of the clan or house of which they were chiefs. One of the causes of the absurd confusion which has prevailed, as to the times of Zerubbabel and Nehemiah respectively, has been the mention, e. g. of Jeshua and Kadmiel (Ezr. iii. 9) as taking part with Zerubbabel in building the Temple, while the very same Levites take an active part in the reformation of Nehemiah (Neh. ix. 4, 5, x. 9, 10); and the statement that some

<sup>a</sup> This lately acquired acquaintance with the Scriptures appears incidentally in the large quotations in the prayers of Nehemiah and the Levites, cc. 1, ix., ciii. 26, &c.

<sup>b</sup> The evidence of Hebrew having ceased to be the vernacular language of the Jews, which some find in Neh. viii. 8, is very doubtful, and dependent on the meaning of בְּיָדָם.

21 or 22 priests came up with Zerubbabel (xii. 1-7), coupled with the fact that these very same names were the names of those who sealed the covenant under Nehemiah (x. 1-8). But immediately [as soon as] we perceive that these were the names of the courses, and of great Levitical houses (as a comparison of 1 Chr. xxiv.; Ezr. ii. 40; Neh. vii. 43; and of Neh. x. 14-27 with vii. 8-38, proves that they were), the difficulty vanishes, and we have a useful piece of knowledge to apply to many other passages of Scripture. It would be very desirable, if possible, to ascertain accurately the rules, if any, under which this use of proper names was confined.

(d.) Other miscellaneous information contained in this book embraces the hereditary crafts practiced by certain priestly families, *e. g.* the apothecaries, or makers of the sacred ointments and incense (iii. 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii. 8), and who may have been the ancestors, so to speak, of the money-changers in the Temple (John ii. 14, 15); the situation of the garden of the kings of Judah by which Zedekiah escaped (2 K. xxv. 4), as seen iii. 15; and statistics, reminding one of Domesday-Book, concerning not only the cities and families of the returned captives, but the number of their horses, mules, camels, and asses (ch. vii.); to which more might be added.
